Any student of the problem must be forced to the unalterable conclusion that the more scarce the basic money is the more easily it is or can be controlled by a few. To add silver would eradicate this evil which has long contaminated our financial policies. Approximately four fifths of the population of the entire world are on a silver standard and can trade with us only on that basis. A program such as this would in no wise hinder or retard our trade with nations which are now on a gold standard or where gold is the basis for the issuance of currency. The ratio of production of silver and gold in the world is about 14½ ounces of silver to 1 ounce of gold, and this has been true over a period of approximately 4,000 years. Eight hundred million people in the Orient with their purchasing power put on a par with our own purchasing power would absorb the surplus of production in this country of both industry and agriculture. A bullion basis for our currency consisting of both gold and silver in fixed proportions would give our money a broader metal base, could not be readily controlled, would be more stable than gold alone and would have a more constant purchasing power in that the production of silver in the world has been more regular in quantities than gold. Such a program should neither alarm a Republican nor a Democrat as this was the theory relative to the money question advocated by both Alexander Hamilton and Thomas Jefferson.

I am not discounting the value of what has been done with reference to silver by the administration and the Congress in the adoption of the Pittman proposal at this session of Congress, but I am contending the program should be carried a step further and in the manner I have attempted to outline. That I am not alone in my contention let me remind you that a very similar proposal was defeated at this session of Congress in the Senate of the United States by a majority of only two votes and my judgment is its adoption in the near future is a foregone conclusion—a consummation to be devoutly hoped for. Let me be not misconstrued. I feel this administration is moving toward recovery much more rapidly than we had a right to anticipate. His loyal supporters should and of right ought to be proud of the part they took in making Franklin D. Roosevelt President of the United States. I feel I have a fair comprehension of the mental processes of President Roosevelt. His great heart beats in unison with the welfare and interests of the masses of our people. He is by nature and education a great humanitarian—to follow his leadership means success. His untiring efforts to save and economically rehabilitate a great Nation and a great people should not, must not, and shall not fail. His name in history like that of Lincoln will be an inspiration to future generations and a grateful people will ever keep green in their memory the Nation's debt of gratitude.

THE DRAMA OF 1933—ARTICLE BY JAMES MORGAN

Mr. COOLIDGE. Mr. President, I ask unanimous consent that there be printed in the RECORD a very ably written article by James Morgan of the editorial staff of the Boston Globe, as of Sunday, December 31, 1933, on the subject the "Drama of 1933."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Boston Sunday Globe, Dec. 31, 1933]

IF ZANGARA HAD NOT MISSED—THE DRAMA OF 1933—NATION NEVER UNDERWENT SUCH STARTLING EMOTIONAL CHANGE AS IN 1 HOUR—BOY SCOUT WITH INDIA-RUBBER SMILE DISCLOSED AS DETERMINED LEADER—STRANGE EVENTS IN YEAR OF LIGHTNING CHANGES

By James Morgan

It may be said, after duly weighing the words, that the year 1933 opened more darkly than any other in the history of the United States. Grave as the situation was in 1861, yet at that time only our political institutions were menaced with a separation of the States into two Nations. Conditions in the beginning of this present year seemed * * * at least seemed to threaten not alone our political institutions but also our economic and social system. It is important to remember that our plight, as a continental Nation, with every diversity of interest, was different from that of smaller, more compact, and less diversified countries and therefore our problem of restoring a balance is more difficult. Our very richness in prosperity had led us into greater excesses, which brought upon us a more violent reaction. Our boom having been more inflated than any other, the deflation of it necessarily was worse.

A YEAR AGO

After long and anxious groping for a bottom to the depression there was a sickening fear that the bottom might have dropped out. Fifty standard industrial and railroad stocks had sunk by January 1 last from an average of $300 a share to $58; New York bank stocks from $357 to $67 a share; the volume of trade from 100 points in 1926 to 54; farm incomes from a high of sixteen billions a year to only a little more than five billions, and farm prices from the pre-war level of 100 to 54, where they hovered close to an all-time low. The operating revenue of the railroads had declined one half, with almost as heavy a cut in the number of railroad workers. Tax collections had so shrunk as to leave the Federal Government facing the prospect of an accumulated deficit of four billions at the approaching end of the fiscal year last June. City after city was drifting in the wake of Chicago toward an insolvency which left it unable to pay teachers, policemen, and firemen, who hold the outposts of public safety.

The unemployment estimates of the American Federation of Labor had risen from a total of 3,000,000 in April 1930, to 7,000,000 in October 1931, to 11,000,000 in October 1932, and the roll of the idle still was mounting toward the 13,000,000 mark, which it reached last spring, with more than 20,000,000 people reduced to dependence on public doles. Counting the farmers, whose products were selling for less than the cost of production, and the urban employed who had been ground down below a subsistence wage, it is possible that near half our population were not making a living.

WHAT MADE IT SO BAD

Unlike England and France and many other countries, our credit system, the nerve center of modern civilization, was in collapse. Those nations had eased the burden of debt resting upon them by depreciating their currencies. We, on the contrary, had rejected that means of relief and our Government, transportations, business, industry, and agriculture were weighted down with an unprecedented overhead of debt which had been contracted when money was cheap and prices were high.

In other depressions our railroads and other great corporations had written down and written off their debts by running them through the wringer of bankruptcy. But this time we had generally resisted that process of liquidation, that method of wiping off the slate and making a fresh start. The debts thus were left intact, to a total variously estimated to be from one hundred and thirty-five billions to two hundred and fifty billions, with a wholesale default on interest payments. These frozen assets so clogged our great fiduciary agencies—commercial banks, savings banks, and life-insurance companies—as to raise an uneasy doubt of the system standing up under the strain through another year. Already 10,000 banks had failed since the war, and so much weakness remained in the system that the report of the Comptroller of the Currency on January 30, 1932, was withheld from the public for 6 months; even then the tell-tale comparison with former years was omitted. Meanwhile the Government, through the Reconstruction Finance Corporation, went on pumping oxygen into the banks until the total of the loans rose to $850,000,000. Some sections of the country were reverting to an age of barter or resorting to "wooden money."

LEADERLESS PEOPLE

It was gravely questioned whether the people, alike the unemployed in the cities and the unrewarded farmers in the country, would stand up to the threat of another such winter as that in which they were floundering from bad to worse a year ago. The loss in dollars that the depression had caused could be measured, but there had been an immeasurable loss in national morale. Leadership had been destroyed in business as well as in politics. The apostles of the new era of limitless expansion had been swept down as false prophets in the crash of 1929. The heralds of prosperity around the corner in 1930–31 became the Pollyannas of 1932. The stark exposures of Insull and Mitchell were shattering to what confidence remained in things as they were.

As a dismal climax to that winter of discontent came the ironically named bank holiday. Starting with the proclamation of the Governor of Michigan on February 14, it spread like creeping paralysis from State to State until 15 States were without an open bank on March 1. At last the unbelievable happened on March 4, when the great banks of New York and Boston shut up and all the exchanges in the land suspended trading in securities and commodities.

A PLEASANT GENTLEMAN

That is the dark background that we need to keep in mind when we review the Roosevelt administration and policies. The country clung to a vague hope that the Democrats would, at least, do something different when they came to power, although the election had gone to them not so much as a vote of confidence as a vote of discontent with the Republicans. There was little confidence left in the Government itself as a means of checking the downward spiral or of breaking the vicious circle. It had shown itself unwieldy and powerless throughout the storm.

Nor was a high hope pinned on the President-elect. The liberal intellectuals, who had almost solidly opposed his nomination and held aloof from his campaign, dismissed him as "a pleasant gentleman with no important qualifications for the Presidency." A preelection poll of the faculty and students of Harvard his alma mater, had gone overwhelmingly against him. Most of his party leaders at Washington were infected with this doubt of his capacity. His outstanding success as Governor of New York for 4 years did not supply a convincing test of his statesmanship or leadership. With a Republican legislature, in which even his own party was controlled by the hostile Tammany machine, he had exercised no independent power at Albany, but had to win his points by displaying the arts of a politician.

Mr. Roosevelt's campaign speeches were lightly discounted at the time as promising too much. Yet he has fulfilled most of these promises in the first 10 months of his administration. The Securities Act and his banking policy were charted by him on the stump at Columbus; his agricultural policy at Topeka; his Budget plan at Pittsburgh; his railroad scheme at Salt Lake; the Tennessee Valley Authority and his water-power policy at Portland, Oreg.; N.R.A. at San Francisco.

THE BOY SCOUT

The refusal of the President-elect, in his conferences with President Hoover, to harmonize his policies with those of his defeated rival was mistaken as confirmation of the suspicion that he lacked decision and was inclined to dodge issues. Nor was there any assurance to be drawn from his attempt, which he made with obvious reluctance, to galvanize into action a "lame duck" Congress, resulting only in making confusion worse confounded at the Capital. Finally, his Cabinet, when announced, contained none of "the big names" that had been urged upon him by those who opposed his election. He called into his council lieutenants rather than leaders. His prestige had fallen low when a new interest in him was aroused by his cool, self-forgetful bearing under an assassin's fire at Miami on February 15. Sometime a dramatist may find a problem play under the title, "If Zangara Had Not Missed."

A Washington cartoonist caught the prevailing mood of the gray dawn of the advent to power of a President whom the jesters of the Capital greeted as "the Boy Scout with an india-rubber smile", and the pessimists as possibly the last President of the United States. The cartoon showed a sadly muddled Democratic donkey, while the Republican elephant lay stretched at ease on a park bench and singing "Hallelujah! I'm a bum!" But the occasion recalled to the minds of the cynics another popular song as they waited to see if any parading band would dare to strike up the Roosevelt campaign tune, Happy Days Are Here Again.

THE CHANGE IN AN HOUR

Surely the Nation never underwent such a startling emotional change in any other hour of its history as it experienced between 1 and 2 o'clock of Saturday, March 4, 1933, when it thrilled to the spirit of the new President's inaugural. He removed the gay, smiling mask behind which he had persisted through a winter of misunderstanding to conceal his purpose until invested with the power to put it into effect. He had lifted it while on his way to the Capitol, when he made an unprecedented pause at the altar of St. John's Church. As he advanced with labored step to the front of the inauguration stand it was plainly to be seen that this also was to him an altar.

What other speech ever produced so great an effect so quickly as that inaugural address. The millions who listened to it over the radio felt the grasp of a firm hand on the loose reins of leadership. Suddenly there was revealed to them a man ready for power and responsibility and action; who convinced them of his sincerity by his frankness in facing the realities of the situation; who infected them with his courage and his high faith in them. In that instant a country that had seemed to be on the point of disintegrating was reunited, with its confidence in itself restored.

PRESIDENT AND PEOPLE

The desperate emergency created by the bank holiday was a gift of fortune to the new President. It gave him the leadership of a people anxious, clamorous to be led. He had promised them action, and he gave it to them in such abundance that week as to work a complete reversal in the national psychology. For the first time a Cabinet was sworn in and called in session on Inauguration Day. The next day Washington saw such a stirring Sunday as she had not seen since the Battle of Bull Run. Under a generally forgotten but unrepealed World War statute, the President took control of the banking crisis, closing all banks everywhere and summoned Congress in extraordinary session on

Thursday. An emergency banking act was rushed through the House in 38 minutes and through the Senate in 3 hours. Thousands of unsound banks were sifted out in a week and the sound banks were reopened in the next week.

But the evening before the reopening began, his second Sunday evening in office, the President, by means of the radio, talked over with millions of his countrymen, like a neighbor dropping in on them, just what it was all about in terms that brought problems of finance and Government close to the general understanding for the first time. That was the beginning of such an intimate contact as no other President ever had established with his vast constituency, which is now overwhelming the White House with a fan mail that has had to be shunted off to another building.

Mrs. Roosevelt also has done her part in focusing popular interest on the White House. At first the public was not sure what it should think of her breaking out of a traditional haremlike seclusion, in which Presidents' wives were to be seen, but always with their minds veiled and their lips sealed. She freely went her way nevertheless, by train and plane and at the wheel of her car, with a strenuousness that recalled to memory her Uncle Theodore, and she has won, little by little, the respect of her countrymen for her independence.

The first weeks of the Roosevelt Presidency, an unforgetable springtime of national hope and courage, produced a great popular revival of interest and faith in democratic government. Parliaments had talked themselves to death in Italy and Germany. The loquacity and inaction of Parliaments in England and France and of our own Congress had exhausted public interest, which is the breath in the nostrils of free institutions.

AT TOP SPEED

With delighted surprise, the country watched last March the huge machinery of the Federal Government throw off its inertia and begin to function with an unexpected efficiency. The President had gathered a new kind of "kitchen cabinet", made up of college professors, formed into his so-called "brain trust", and he kept them preparing bills at top speed which he shot up to the Capitol with machine-gun rapidity. Within 5 weeks after the inauguration the emergency bank bill, the economy bill, the beer bill, and the act establishing the Civilian Conservation Corps were passed by panting Senators and Representatives; the banks were reopened; 3.2 beer started to flow and 25,000 jobless youths were on the march to the C.C.C. camps as the vanguard of more than 300,000 who were recruited, mostly among the idlers on city streets, and more quickly than we had ever mobilized as many soldiers under the pressure of war.

Those measures were a powerful stimulant for the public imagination. More exhilarating than the 3.2 beverage was the proof it gave that the Government could act and not merely talk about doing something. The economy law also was more effective on the spirits of the country than it has been in cutting down expenditures. It demonstrated the willingness of Congress to give the President power to bring the runaway Budget under control. That assurance has enabled him to use the improved credit of the Government for borrowings to finance his campaign against the depression.

STORM SIGNALS

Although the Nation was feeling better, business was not much better; it was still licking its wounds received in the bank holiday. The various barometers continued to be lower than they were in the spring of 1932. Farm strikes flared up as a warning signal.

The huge load of debt still weighted the country down and the dollar had grown dearer than ever in comparison with foreign currencies. A rising demand for inflation was threatening to sweep Congress away from the President's leadership when he accepted, on April 19, an amendment to the farm relief bill which authorized him to employ the several inflationary schemes under consideration; but it left the use of them to his discretion.

At the same time increasing unemployment spurred Congress toward the adoption of a 30-hour labor week for the purpose of spreading work. This incited some leading employers to come forward also with an appeal for the Government to help industry to get on its feet by so relaxing the old antitrust laws as to permit industrialists to combine for the adjustment of production and the prevention of cutthroat competition. That spontaneous movement gained headway with astonishing rapidity and dominated the meeting of the United States Chamber of Commerce, at Washington, early in May, when few dissenting voices were lifted against it. Thus the N.R.A. was born.

Meanwhile the President, to all intents and purposes, had taken us off the gold standard. At his request Congress also had canceled the gold clause in all securities, public and private. The dollar was falling, growing cheaper on foreign money markets.

GENESIS OF THE BOOM

Discounting the possibility of further inflation and the prospect of industrial revival under governmental guidance, a speculative boom started at the end of April. The old familiar race was on again under the old rule of every one for himself and the devil take the hindmost. Eager to "beat the gun", industrialists piled up production before they should come under codes reducing the hours of labor and increasing the minimum wage. Anticipating higher prices, wholesalers stocked up regardless of retail demands. With prices of farm products jumping up, farmers balked the efforts of the Agricultural Adjustment Administration to reduce production.

Between March and July the output of automobiles rose from 10 points to 60, and of the steel mills from 19 to 77. Wheat shot up in July to $1.26 a bushel, corn to 64 cents, and cotton to 12 cents a pound. Prices in general were rising at the rate of 70 percent for the whole year, according to the Annalist index. Business activity, by the New York Times index, had increased 50 percent and was the highest in 3 years. Wall Street was boiling over, with stocks soaring 51 points in 3 months; the prices of all listed securities, taken together, had increased nearly twenty billions.

HALF BOOM AND HALF BROKE

The inevitable collapse of production and prices without the underpinning of employment and purchasing power occurred on July 19. On July 24 the President came on the air to remind a rueful Nation that it could not attain a lasting prosperity half boom and half broke. That wild flight of American optimism had threatened to upset his planned recovery. Industrialists who crusaded for cooperation in April and May were for going it alone when they found the going good. After an existence of more than 5 weeks, N.R.A. had brought only the cotton-textile industry under a code, which in a day abolished child labor and harmonized the old difference between basic wages and hours of labor in northern and southern mills.

That slow rate of progress gravely threatened his whole plan of organized recovery, and the President appealed to all the millions of employers in every kind of trade and business to sign a temporary blanket code for increasing employment and wages. And the Blue Eagle was hatched. It was a doubtful experiment, this reliance on mass emotion in a war-time drive, with its implied threat of mob coercion and boycott. And the net results remain in serious doubt.

WHO IS THE DICTATOR?

In an extra session of 100 days, from March 9 to June 16, Congress enacted many important bills in addition to those already named in this summary. A bare mention of these will suffice to recall them to mind and to suggest the objects of the acts for the Tennessee Valley Authority, Home Owners' Loans, Railroad coordination, $500,000,000 emergency relief, and for the establishment of a Federal Employment Exchange. In the revealing light shed by a spectacular investigation of banks and investment concerns the Securities Act was passed, and the Glass-Steagall banking bill was enacted.

That immense grist of legislation was not only unprecedented in volume of output for one session, but it was also unprecedented for the powers it delegated to the President. It did not, in fact, make him a dictator; our only dictatorship resides in the public opinion behind the President. But the mass of legislation did create an enormous burden of administration, which undoubtedly shortened not a few lives in the course of a sweltering Washington summer. Every N.R.A. code represents an elaborate constitution of self-government and cooperation within an industry under the supervision of the Federal Government.

Although the Recovery Act is an emergency measure which will expire 2 years after its passage, or on June 16, 1935, whatever provisions in it prove to be beneficial and are sustained by the decisions of the courts are likely to become permanent.

The Recovery Act carried also the vastest scheme for public works ever authorized by a legislative body, looking to the expenditure of $3,200,000,000. Like the $4,000,000,000 authorized for farm credits and home loans, this has been a disappointingly slow job. The hope is held out now that the public works will get under way in sufficient force to prime the pump of industry and employment next spring.

BANK INSURANCE

The Banking Act increases the powers of the Federal Reserve Board to prevent the use of credit for speculation; discourages competition for deposits by prohibiting the payment of interest on demand deposits, or ordinary checking accounts; decrees the divorce of Federal Reserve banks from investment companies and private banking from the business of marketing securities; and it establishes an insurance corporation for insuring deposits.

This latter provision will go in effect at the opening of the windows next Tuesday, when all deposits in banks that have passed the examination will be insured up to $2,500 for each depositor. On July 1 next the insurance will cover fully deposits up to $10,000, 75 percent of those from $10,000 to $50,000, and 50 percent of deposits above $50,000. All that can measure up to the standard, whether in or out of the Federal Reserve System, are made eligible; but after July 1, 1936, the State banks will have to come into the System if they wish to continue the insurance for their depositors. The Government has gone into the banking business in a large way by purchasing preferred stock or making loans for the purpose of enabling many banks to meet the requirements of the plan.

WHERE HE SLIPPED

Although the President said in his inaugural that international relations were "in point of time and necessity secondary to the establishment of a sound national economy", he seemed to be among the few who entertained any hope of the World Economic Conference in London in June. Against an almost solid wall of nationalistic policies abroad, and while he himself was building another at home, strangely he went on laboring for an international accord, holding White House conferences day and night with visiting statesmen through April and May. At the same time he made a direct telegraphic appeal to 54 presidents and sovereigns in behalf of an agreement to outlaw aggressive warfare and to reduce armaments.

These remain the least realistic and the least understandable of all the President's efforts. When the nations assembled at London it was instantly apparent that they were ready to talk nothing but the cancelations or the further reduction of their debts to us and the stabilization of our dollar. We ourselves were not ready to talk about anything.

In the presence of such a fiasco the Rooseveltian magic was invoked to save the conference. All the world watched and waited as Professor Moley of the brain trust swooped down in a seaplane upon *Amberjack II* in New England waters, conferred with Skipper Roosevelt in the cockpit and sailed away to London. But when Mr. Moley submitted a plan squinting at the stabilization of exchange, the President threw it overboard from the cruiser *Indianapolis*, on which he was sailing back from a brief vacation. And the conference went glimmering. The foreign policies of the administration have remained ever since deadlocked by its domestic policies except in the one instance of the resumption of diplomatic relations with Soviet Russia.

THE GOLD DRIVE

The President's scheme of depressing the dollar and raising prices by bidding up the price of gold, which he announced in a broadcast of October 22, is almost the only other policy of the administration that the country could not understand. The spectacle presented from day to day of moving up the gold bid a few cents somewhat suggested a ritual of incantation. As the dollar went down in London and Paris there was generally a rise, but not a corresponding rise, in stocks and commodities in New York and Chicago. Thereupon, the opponents of the administration boldly emerged from their cyclone cellars early in November and timed a concerted drive against the gold plan and its "boloney dollar", as Alfred E. Smith called it. The assault was prolonged through November, until it climaxed in the resignation of Dean Acheson, Under Secretary of the Treasury, and of Professor Sprague, adviser to the Treasury. It was almost the first, and by far the most serious, challenge to the popular faith in the President since his inauguration.

But the attack exhausted itself when the man in the street discovered that the President's critics did not agree among themselves. Virtually none of them proposed an immediate return to the old gold standard. Nearly all admitted that it should be changed and modernized, with the dollar reduced in value. Since this seemed to be not very unlike what we were already doing, the general public lost interest in the baffling subject and left it flat.

TWO DIVERSIONS

Instead of involving himself in the debate the President did much to change the topic by launching in November a program of reemploying, by December 15, 4,000,000 persons who were facing another idle winter. A Civil Works Administration quickly was organized and spread its operations over the 3,000 counties of the United States. The sight of crowds of men and women, in their eagerness for work, lined up before the doors of city halls, town halls, and courthouses throughout the land touched the sympathies of the whole country and aroused a new confidence in the speed and efficiency of the Federal Government.

The gold campaign had the misfortune to be telescoped by another distraction in the repeal of the eighteenth amendment on December 6. The most redoubtable champions of that measure in 1932 looked forward to years more of fighting, and many of them doubted if outright repeal could be won in 10 years. But the twenty-first amendment caught the tempo of 1933 and took the necessary 36 hurdles in less than 1 year. And the President is undertaking to curb and guide the revived liquor industry under an N.R.A. code.

A NEW PSYCHOLOGY

The reaction from the bursting of the boom in July has not yet been absorbed; that is to say, the ground lost has not been fully regained in the last half of the year. But at no time and in no respect have we fallen to the 1932 level. On the contrary, the farmers' purchasing power, which stood on March 4 at 49 percent of the pre-war standard, is now above 70 percent, and their income has increased more than a billion dollars in the year. The pay roll of labor, as a whole, has had a similar rise. The American Federation of Labor reckons that, while men went back to work at the rate of 500,000 a month in the boom, the N.R.A. codes increased this to 850,000 a month in August and September, and that the gain has by no means been wiped out by the seasonal recession in the fall.

The credit system alone remains stalled under the staggering load of debt it assumed in the great inflation of 1924–29. This ominous situation thrust upon the Government in the Hoover administration the necessity of stepping into the breach with the Reconstruction Finance Corporation, and Uncle Sam remains the major money lender of the Nation.

The President himself makes no bigger claim than that "we seem to be on our way, but we are not yet out of the woods." A leadership that makes no pretense to infallibility has communicated an unaccustomed patience and open-mindedness to a people much given to dogma, doctrines, ancient fetishes, and traditional catchwords. That change in national psychology is a large part of the battle.

Even before his nomination in 1932 Mr. Roosevelt called for bold, persistent experimentation in attacking the cloud of problems brewed in the witches' cauldron of the depression. "It is common sense," he insisted, "to take a method and try it; if it fails, admit it frankly and try another. But above all, try something." When he started in to raise prices by the gold buying formula he said to the country, "If we cannot do it this one way, we will do it another. Do it, we will." He has likened his strategy to that of the football field, where a second play cannot be decided upon until the outcome of the first play is seen. This is something out of the ordinary in popular leadership, requiring great dexterity and celerity, and that is what we have been seeing in this year of lightning changes.

Many of us who watched the procession of events that has swept by us with bewildering rapidity since last New Year's Day may not live to know whether we have had the rare fortune to see the birth of a new era in human history or have been lookers on at only a brief interlude in the old era. That remains a sealed verdict.

THE WORLD COURT

Mr. PITTMAN. Mr. President, I ask unanimous consent to have printed in the RECORD at this time a statement as Chairman of the Senate Committee on Foreign Relations relative to so-called "World Court."

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

WORLD COURT TREATY

Many inquiries come to me as Chairman of the Committee on Foreign Relations of the United States Senate relative to the status of the protocol concerning adherence to the Permanent Court of International Justice, commonly known as the "World Court Treaty."

In some of these inquiries it is asserted that a poll of the Foreign Relations Committee has been taken and that two thirds of the members of the committee are in favor of adherence. Other writers assert that they are informed that a poll of the Senate has been taken, and that two thirds of the Members of the Senate are in favor of adherence to the World Court.

The situation is this: The protocol as originally ratified by the United States Senate contained a reservation that the Court should not have jurisdiction to render any advisory opinion with regard to any matter in which the United States had or claimed an interest without the affirmative consent of the United States Government. Various governments, adherents to the World Court, refused to approve of such reservation, which, in effect, voided such ratification. Subsequently, in the Seventy-second Congress, the committee again reported favorably the protocol for adherence, with certain other reservations of similar character to those first adopted and which were disapproved by other governments. This report was on a divided vote, and, as I remember, by a majority of only one of the committee.

Under the rules of the Senate, no action having been taken upon the report of the committee before the end of that Congress, the matter automatically came back to the Foreign Relations Committee, where it is now.

I should say that at the present time, without having polled the committee, a majority of the committee are opposed to the pending reservations which were adopted by the committee heretofore as I have stated.

The question, therefore, is not simply one as to whether the committee favors adherence to the World Court, but whether it favors the reservations heretofore adopted. This is a question which will require considerable consideration and will result in long debate, both in the committee and on the floor of the Senate.

Various peace organizations have applied to the committee for an opportunity to discuss not only adherence to the World Court but the pending and attached reservations. It has been impossible for the committee to grant such hearings so far during this session because of pending treaties and other matters of an emergency nature. Again, a majority of the members of the Foreign Relations Committee are also members of other committees which have been considering emergency measures relating to the national recovery program.

As Chairman of the Committee on Foreign Relations, I am giving every effort to secure hearings on these disputed questions at the request of interested parties at the earliest practical moment. I have no doubt that such hearings will be had on some date during the present month.

PRESIDENT ROOSEVELT'S ADDRESS ON THE N.R.A.

Mr. BYRNES. Mr. President, I ask unanimous consent to have printed in the RECORD the address delivered this morning by the President of the United States before the general conference of code authorities and trade-association code committees.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Eight and a half months ago when I signed the Recovery Act I said: "Must we go on in many groping, disorganized, separate units to defeat, or shall we move as one great team to victory?"

That team is before me this morning—3,500 leaders of 600 great organized industries representing, as measured by employment, more than 90 percent of the industrial field which is covered by the N.R.A. Naturally I am deeply gratified that the faith which I expressed last June is so well-justified in March.

I do not undertake today to present either a broad review of all the manifold causes which led up to the distressful situation from which the Nation is emerging, or a recapitulation of the

events, the measures, and the results of this past year. You are here as the direct representatives of only one element in our complex modern life, but at the same time because of the fine spirit you have shown I can congratulate you on an approach to your own problems which shows an understanding of the many other problems which crisscross and dovetail into each other to make up the broad objective of the American people.

It is sufficient for me to point out once more that the difficult and dangerous situation into which the United States had got itself was due to the general attitude, "Every man for himself; the devil take the hindmost." Individuals were seeking quick riches at the expense of other individuals. Geographical sections were seeking economic preference for themselves to the disadvantage of other sections. Cities were recklessly offering inducements to manufacturing plants to move away from other cities. Within given industries unfair competition went on unheeded or resulted in vast consolidations whose securities were peddled to the public at dishonest prices. There was little consideration for the social point of view and no planning whatsoever to avoid the pitfalls of overproduction or of selling methods which foisted articles on a gullible public which the family budget could not afford.

That is a strong picture, but you and I, in the bottom of our hearts, know that it is a true picture. Most of us participated in the making of that picture. We did not know as much then as we know now, and, because our eyes have been opened, it is possible that future history will call that crazy decade of 1919 to 1929 one of the greatest blessings that ever came to the American people.

It was because the situation in March 1933 was so serious, all along the line, that remedies had to be applied to every phase of the illness. The objective was, as you know, to apply these remedies in the American way and not to copy those which are being tried in other countries which do not live under the same form of democratic government as ours. I am always a little amused and perhaps at times a little saddened—and I think the American people feel the same way—by those few writers and speakers who proclaim tearfully either that we are now committed to Communism and collectivism or that we have adopted Fascism and a dictatorship. The real truth of the matter is that for a number of years in our country the machinery of democracy had failed to function. Through inertia on the part of leaders and on the part of the people themselves the operations of government had fallen into the hands of special groups, some of them vociferously led by people who undertook to obtain special advantages for special classes and others led by a handful of individuals who believed in their superhuman ability to retain in their own hands the entire business and financial control over the economic and social structure of the Nation.

The fine response given by the overwhelming majority of the component parts of industry as represented here today proves to me that you have the same understanding of our broad purpose as is held by the average of the workers of the United States—and that word "workers" means almost all of the American people. You have shown sincere desire for real cooperation; you have shown prompt response to the governmental request for national unity. For this support I give you my thanks.

The National Industrial Recovery Act was drawn with the greatest good of the greatest number in mind. Its aim was to increase the buying power of wage earners and farmers so that industry, labor, and the public might benefit through building up the market for farm and factory goods. Employer, wage earner, and consumer groups are all represented on its boards with the Government; all three groups with the Government must have the interests of all the people as their main responsibility.

What we seek is balance in our economic system—balance between agriculture and industry and balance between the wage earner, the employer, and the consumer. We seek also balance that our internal markets be kept rich and large, and that our trade with other nations be increased on both sides of the ledger.

You and I are now conducting a great test to find out how the business leaders in all groups of industry can develop capacity to operate for the general welfare. Personally I am convinced that with your help the test is succeeding.

The very conception of N.R.A. follows the democratic procedure of our Government itself. Its theory of self-regulation follows the American method, rather than any of the experiments being tried in other nations. The very fact that you have been in Washington to criticize and to discuss the way N.R.A. is working out is sufficient proof of this point.

There are some people, of course, who do not think things through, as, for example, the man who complained in one of yesterday morning's papers that criticism was held to be unpatriotic. Let me put the case so clearly that even his type will understand. If we admit that the Government has a specific problem to solve and undertakes to do it in a specific way, the critic is unpatriotic who contents himself with loudly proclaiming that that way, that method is no good; that it won't work; that it is wrong to do this. This critic contributes nothing—he is not constructive; he is unpatriotic because he attempts to destroy without even suggesting a way to build up.

On the other hand, the critic is patriotic, whether he be a business man, a worker, a farmer, or a politician, if he says, "I don't like the methods you are using to solve the problem; I believe it would be far better if we were to use the following alternate method", and thereupon outlines for the benefit of his neighbor and his Government a helpful proposal.

In this great evolution through which we are passing the average American is doing splendid service by coming back at the captious critic and saying to him, "Well, old man, and what do you suggest?" One thing is very certain, we are not going back either to the old conditions or to the old methods.

And now to be more specific in regard to N.R.A. itself. You have set up representative government in industry. You are carrying it on without violation of the constitutional or the parliamentary system to which the United States has been accustomed. Your industrial groups are composed of two parts—labor and management; and the Government is a participant in this organization in order to carry out this mandate of the law. "To promote organization in industry for the purpose of cooperative action in trade groups and to induce and maintain united action of labor and management under adequate Government sanction and supervision." Somebody, of course, must strike the equitable balance between conflicting interests and especially must protect the third group—the consumer—and that word "consumer" means the whole American people.

That group has also been in Washington, invited to come here and to make known publicly any complaint as to the effects of any of the codes. I am sure it will hearten you to know that the great majority of the complaints were directed not at the codes but at errors and omissions in what has been done under codes. The great bulk of complaint or criticism of the Recovery Act does not go to the act itself or to its basic principles but rather to the details of mere method. In this we should feel encouraged and heartened that we are on the right track and can go forward.

In working out the balance on a national scale, of which I have spoken before, we can list certain immediate objectives. I spoke last June of the fact that wage increases will eventually raise costs, but I asked that management give first consideration to increasing the purchasing power of the public. I said, "That is good economics and good business. The aim of this whole effort is to restore our rich domestic market by raising its vast consuming capacity." Complaint has been made of a few industries and of some companies that they have not followed this suggestion, and evidence brought forward shows that in some cases these complaints are justified. What I said was true in June, and it is true now. The first task of industry today, as it was then, is to create consuming power.

We must remember that the bulk of the market for American industry is among the 90 percent of our people who live on wages and salaries and only 10 percent of that market is among people who live on profits alone. No one is opposed to sensible and reasonable profits, but the morality of the case is that a great segment of our people are in actual distress and that as between profits first and humanity afterward and humanity first and profits afterward we have no room for hesitation. With millions still unemployed the power of our people to purchase and use the products of industry is still greatly curtailed. It can be increased and sustained only by striving for the lowest schedule of prices on which higher wages and increasing employment can be maintained.

Therefore I give to industry today this challenge: It is the immediate task of industry to reemploy more people at purchasing wages and do it now. Only thus can we continue recovery and restore the balance we seek. It is worth while keeping in the front of our heads the thought that the people in this country whose incomes are less than $2,000 a year buy more than two thirds of all the goods sold here. It is logical that if the total amount that goes in wages to this group of human beings is steadily increased merchants, employers, and investors will in the long run get more income from the increased volume of sales.

I want to speak for a moment directly to the public. In my initial statement of policy I said:

"Finally, this law is a challenge to our whole people. There is no power in America that can force against the public will such action as we require. But there is no group in America that can withstand the force of an aroused public opinion. This great cooperation can succeed only if those who bravely go forward to restore jobs have aggressive public support and those who lag are made to feel the full weight of public disapproval."

You all know what happened. We gave you the Blue Eagle as a symbol of cooperation. Its display in a shop or factory window, or upon a garment, or product, or delivery wagon, informed you that the firm with which you were dealing was doing its part in this great national cooperation to defeat depression. For the first time—so far as I know—all of the people in this country were given a part in making a law effective.

This is a law for the public benefit. Obviously an employer who pays Blue Eagle or code wages cannot compete with an employer who does not. It is therefore common sense for the consuming public in their own interests, as well as for labor and for industry, to join in seeing to it that the few who think only of selfish gain be made to play the game with the overwhelming majority.

Every examination I make, and all the information I receive lead me to the inescapable conclusion that we must now consider immediate cooperation to secure increase in wages and shortening of hours. I am confident that your deliberations will lead you also to this conclusion. Reduction in hours coupled with a decrease in weekly wages will do no good at all, for it amounts merely to a forced contribution to unemployment relief by the class least able to bear it. I have never believed that we should violently impose flat, arbitrary, and abrupt changes on the eco-

nomic structure, but we can nevertheless work together in arriving at a common objective. The Government cannot forever continue to absorb the whole burden of unemployment. The thing to do now is to get more people to work. Your self-governing groups are not here to devise ingenious plans to circumvent the purposes of the act. You are here in a patriotic spirit to effect these purposes. With few exceptions industry will give wholehearted compliance. It is only in the case of rare exceptions where industrial self-government may fail that the Government itself must and will under the law move firmly and promptly to prevent failure.

Under the code system you and I are aware that experience must be the guide for the working out of difficulties and the prevention of abuses. For example, you on code authorities are your industrial brother's keeper, and especially are you the keeper of your small industrial brother. We must set up every safeguard against erasing the small operator from the economic scene. Many years ago antitrust laws were passed and one of the primary reasons for their enactment was the protection of the little fellow against the big fellow. In many cases these laws failed to protect the little fellow. We do not want to maintain that condition. The essential provisions of the codes should check or reverse competitive methods by which the small-business man was or is being squeezed out.

These same antitrust laws must continue in their major purpose of retaining competition and preventing monopoly. It is only where these laws have prevented the cooperation to eliminate things like child labor and sweat shops, starvation wages, and other unfair practices that there is justification in modifying them.

One more subject I call to your special attention. The law itself has provided for free choice of their own representatives by employees. Those two words "free choice", mean just what they say. It is obvious that the Government itself not only has the right but also the duty to see, first, that employees may make a choice; and, secondly, that in the making of it they shall be wholly free. I ask that the letter and the spirit of free choice be accorded to its workers by every corporation in the United States.

We have been seeking experience in our first 8 months of code making; for that same reason we have been tolerant of certain misunderstandings even when they resulted in evasions of the spirit if not of the letter of the law. Now we are moving into a period of administration when that which is law must be made certain and the letter and the spirit must be fulfilled. We cannot tolerate actions which are clearly monopolistic, which wink at unfair trade practices, which fail to give to labor free choice of their representatives, or which are otherwise hostile to the public interest.

In a word, we cannot tolerate abuses of economic power—abuses against labor, abuses against employers, or abuses against the consuming public, whether they persist either with the aid of codes or despite their prohibitions. This does not mean that we can at once make perfect many hundred codes covering the major trades and industries of the Nation, nor that we can get a mark of perfection in a day or a month. It does mean that we have arrived at the time for taking stock for correcting manifest errors, for rooting out demonstrated evils.

One year ago we were suffering and shrinking under economic pressures so intolerable that collapse was at hand. We had arrived at the day to make our choice. We made that choice. The American people responded to the call for action with eager enlistment—enlistment in the struggle against ruthless self-seeking, reckless greed, and economic anarchy. We undertook, by lawful, constitutional processes, to reorganize a disintegrating system of production and exchange.

The methods and details of that reorganization may and will change from year to year, but it is very certain that the American people understand that the purpose of the reorganization was not only to bring back prosperity. It was far deeper that that. The reorganization must be permanent for all the rest of our lives in that never again will we permit the social conditions which allowed the vast sections of our population to exist in an un-American way, which allowed a maldistribution of wealth and of power.

The willingness of all elements to enter into the spirit of the new deal becomes more and not less evident as it goes on. As an example, I have just received a telegram from Mr. Francis M. Law, the president of the American Bankers Association. In it he said: "On this your first anniversary please allow me in behalf of the country's banks to express our full confidence and our sincere desire to cooperate in your courageous efforts to bring about recovery. * * * The banking structure of the country is sound and liquid and banks have never been in stronger position to function effectively. Conditions have improved to the point where it is no longer necessary for banks to be superliquid. * * * There is a definite call now for banks not to extend loose credits or to make improper loans but for a most sympathetic attitude toward legitimate credit needs and for a recognition of responsibility for their proper and vital part in the program of recovery."

Think back exactly 1 year ago today. You know where the banks stood at that time; you know where your own business stood. That telegram is a living illustration of the progress we have made. Let us consolidate our gains and let us resolve that that consolidation shall be for the continued progress and especially for the greater happiness and well-being of the American people.

EDUCATION, SCIENCE, AND THE NEW DEAL—ADDRESS BY THE ATTORNEY GENERAL

Mr. WALSH. Mr. President, I ask unanimous consent to have printed in the RECORD an able address by Hon. Homer Cummings, Attorney General of the United States, on the subject Education, Science, and the New Deal. The address was delivered before the faculty and students of Rollins College, Winter Park, Fla., February 26, 1934.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. President, members of the faculty, students, and friends: In educational methods and aims Rollins College has departed from trodden paths. In this complex world it has individualized education; it has substituted learning for instruction; it has adopted for its students the criterion of accomplishment rather than the old conventions of marks and credit-hours; and it has set as the goal of education complete living. All of this sounds to me like a new deal in education. I felt at home here. As one "new dealer" to another, I greet you.

Our country, almost from the beginning, has been committed to the idea of education. There was, however, at the outset a note of dissent. Governor Berkeley, of Virginia, responding to the question of English Commissioners of Foreign Plantations as to what course was being taken in the Colony for instruction of the people in the Christian faith, said: "The same that is taken in England, every man according to his ability instructing his children." But he added, "I thank God there are no free schools or printing presses, and I hope we shall not have them these 100 years, for learning has brought disobedience and sects into the world, and printing has divulged them and libels against the best of governments. God keep us from both." This was an Old World idea. Wide-spread learning was feared. Ignorance upon the part of the subject was bliss for the monarch, and it was folly to make the masses wise.

In America the earliest impetus to education came from religion. Enacting, in 1647, what has been called "the mother of school laws", the General Court of Massachusetts said:

"It being one of the chief projects of that old deluder Satan to keep men from the knowledge of the Scriptures, as in former times by keeping them in an unknown tongue, so in these latter times by persuading from the use of tongues * * * It is, therefore,

"*Resolved*, That every township in this jurisdiction, after the Lord hath increased them to the number of 50 householders, shall then forthwith appoint one within their town to teach such children as shall resort to him, to write and read."

There was a hint of the secular and of the dissemination of learning in the next sentence:

"It is further ordered, that when any town shall increase to the number of 100 householders they shall set up a grammar school, the master thereof being able to instruct youth, so far as they may be fitted, for the university."

In any event, from this time on, the American idea of free schools grew rapidly. Colony after Colony, State after State, and even the Federal Government itself through congressional school-land grants to the States contributed to the spreading of education. The free school, with its democratized education for the masses, with its educational ladder, upon the steps of which the student might systematically climb from one stage of instruction to another, became a fully and permanently developed system.

The predicate of this idea was that literacy is essential to democracy. Committed to democracy, we are hence committed to education. So long as government rests ultimately upon the consent of the governed, so long as we seek to maintain a government of, for, and by the people, an informed electorate is a first essential. Both the one and the many profit by a trained intelligence in the individual. Our trust is firmly based upon the enlightening influence of education, thereby insuring intelligent cooperation and wise leadership in the conduct and the development of our institutions.

I have mentioned that the first impetus to education in this country was religion, and the second was the ideal of literacy for democracy. There has been a third—science—an impulse drawn from within. For, as the common school developed, as the native intelligence of men and women was trained to the love of learning and the pursuit of truth, there developed, as of course, the scholar of book and tool, of library and laboratory. It is the nature of man to break down frontiers. As the scouts of our early days passed with the conquest of prairie and mountain there arose, to follow and carry on, the scouts of science, clearing the path for their fellows through the frontier of knowledge. Great institutions of higher learning developed, first in the classics, then in pure science, finally in applied science and the various arts. Physics, chemistry, biology, economics, sociology, and, indeed, all the physical and social sciences were developed and applied to the myriad uses of man. As the thirteenth century was essentially an age of religion, so our age is largely one of science—of scientific accomplishment and of scientific method, of collection and classification of data, of formation and testing

of hypotheses, of reaching conclusions and building thereon, of checking one discovery against another so that, ultimately, isolated findings become a part of the pattern of all, and great gains of tested knowledge inspire further quest and lead to still greater accomplishments.

How far these schools and this science have carried us. In transportation, from the canoe and the ox cart to the ocean liner, the transcontinental train, the automobile, and the airplane. In communication, from slow-moving letters to the telephone and the radio. In agriculture, from truck garden and small farm to acres by the million spilling crops toward all the seas. In manufacturing, from village shoemaker and smithy to the specialized factories of today, ravenous for the raw material of the whole earth. In medicine and surgery, from the kit of the country doctor to the great life-saving clinics and hospitals in every part of the land, ministering to health and prolonging the span of life. In sanitation, from successions of plagues, decimating the earth, to relative freedom from contagious disease. In architecture, from hut to skyscraper. In business, from clumsy coins to bank credit, from the corner store to the corporate enterprise. Speed of travel, ease of communication, longevity, health, comfort, wealth, and beauty—these are the fruits of science.

And yet, a short 12 months ago our transportation facilities were largely idle; our abundant crops were rotting in the warehouses; our factories were closed or running upon pitifully short time; 13,000,000 people were idle; and our elaborate and carefully constructed banking system entirely ceased to function. We were confronted with the puzzling paradox of starvation amidst plenty.

A learned jurist once said:

"The law, so far as it depends on learning, is indeed as it has been called the "government of the living by the dead." To a very considerable extent, no doubt, it is inevitable that the living should be so governed. The past gives us our vocabulary and fixes the limits of our imagination; we cannot get away from it. There is, too, a peculiar, logical pleasure in making manifest the continuity between what we are doing and what has been done before. But the present has a right to govern itself, so far as it can; and it ought always to be remembered that historic continuity with the past is not a duty, it is only a necessity.

"I hope that the time is coming when this thought will bear fruit. An ideal system of law should draw its postulates and its legislative justification from science. As it is now, we rely upon tradition, or vague sentiment, or the fact that we never thought of any other way of doing things, as our only warrant for rules which we enforce with as much confidence as if they embodied revealed wisdom. * * *

"The Italians have begun to work upon the notion that the foundations of the law ought to be scientific, and, if our civilization does not collapse, I feel pretty sure that the regiment or division that follows us will carry that flag. Our own word seems the last always; yet the change of emphasis from an argument in Plowden to one in the time of Lord Ellenborough, or even from that to one in our own day, is as marked as the difference between Cowley's poetry and Shelley's. Other changes as great will happen. And so the eternal procession moves on, we in the front for the moment; and, stretching away against the unattainable sky, the black spearheads of the army that has been passing in unbroken line already for near a thousand years."

These are the impressive words of Mr. Justice Holmes, speaking at a dinner of the Harvard Law School nearly 40 years ago. And now we are "in the front for the moment."

Mr. Justice Holmes was entirely right. Literacy is essential to democracy, but not mere literacy. Education and science, if they are to be useful to government, must function within government as they have functioned outside of it. It is a sad commentary that we have used science least where we needed it most. To transportation, communication, agriculture, industry, medicine, sanitation, architecture, finance, and business we have applied science and the fruits thereof, but not to government. There has been learning, but it has gone unused. Economists, sociologists, historians, students of politics there have been; and, like their brothers in the pursuit of truth, they have sought and they have found. In the books of the dead and the activities of the living they have traced the growth and science of government. In the great laboratory of life down the ages they have seen the trial and error of collective life. All this knowledge they have stored for the use of those of the eternal procession who are for the moment in the front and we have not used it.

The genius of the new deal lies in the application of science to government and contemplates the reapplication of the doctrines of cooperation. The Agricultural Adjustment Act is a planned attack upon unbalanced production, the National Recovery Act upon unbalanced employment, and both upon our diminished purchasing power. These acts were carefully devised. Not only were individual enactments thought out in advance but their relationships to each other and to the whole result were recognized factors in the problem. The Agricultural Adjustment Act complements the National Recovery Act. The Public Works feature sustains both. Thus production, consumption, and capital goods industries are being aided simultaneously. The Civilian Conservation Corps, the Civil Works Administration, and various other modern measures are component parts of a seriously thought-out program. The banking structure is undergoing a necessary rehabilitation. Price adjustments and dollar stabilization are sought by the scientific method of trial and error and not by arbitrary fiat. A cleansing of the public service and a campaign against crime have been undertaken as matters essential to a healthy national life.

In brief, the attack of the new deal is economic rather than political. The very terminology of the present measures is that of finance, accounting, budgeting, crop production, labor distribution, costs of living, costs of production, margins of profit, price levels, and the like. The measures thus operating seek to adjust the economic factors of our life so as to produce efficiency in that sense of the word which means the abolition of idleness and poverty in a land of plenty.

It will be said that the new deal is experimental and that not all of its measures will succeed. But this is no sufficient challenge. The method of the new deal is one of action, not of laissez faire. It refuses to abandon in despair our economic life to the operations of chance. The new deal is education and science in action.

"And so the procession moves on, we in the front for the moment; and, stretching away against the unattainable sky, the black spearheads of the army that has been passing in unbroken line already for near a thousand years."

And in a moment, my student friends, it will be you who are in the front. Let me exhort you to remember, as educated men and women, as scholars, as scientists, as citizens, that literacy must be for, not merely in, democracy. It must function for government, and it must function through you. Only thus shall we have, in the words of Rollins College, "complete living", and only thus, in the words of our great President, "a more abundant life for all."

N.R.A. CODES—ADDRESS BY SENATOR WAGNER

Mr. BARKLEY. Mr. President, I ask unanimous consent to have printed in the RECORD an address delivered today by the junior Senator from New York [Mr. WAGNER] at the conference of code authorities in the city of Washington.

There being no objection, the address was ordered to be printed in the RECORD as follows:

This representative gathering symbolizes the spirit of cooperation and the desire for action that have animated the entire Nation during the past year. The dynamic personality and capacity for leadership of President Roosevelt have struck a responsive chord in the hearts of his countrymen. If I were asked to designate the greatest single accomplishment of the recovery program, I should not refer to revived industrial activity or to reemployment, important though these are. What is new is the philosophy that we are not the helpless victims of natural law, but are able to control our own destinies and provide for our future welfare and prosperity.

You are all familiar with the wealth of statistical evidence that economic recovery is assured. The index of basic industrial output is 30 percent higher than a year ago. During the past 2 months there have been more favorable changes in dividend payments than in any equal period of time since the depression began. Freight-car loadings, residential construction, the automobile industry, electric-power production, and coal and steel operations all tell the same story of rapid progress.

The time has come to ask: Where are we progressing? Are we content to return to the uneven prosperity of the nineteen twenties, with its poverty, its uncertainty, and its seeds of recurrent depressions? Or are we prepared to lay the solid foundations for a saner and happier mode of economic life?

Since the turn of the century this country has been prolific in the production of goods. Wealth has poured forth from factory and mine and field in unequaled abundance. If our social organization had kept pace with our mechanical inventiveness, the paradox of progress and poverty would have vanished completely. Instead, the paradox has become more glaring. No one with a sense of economic realities would attempt to explain this incongruity by a single formula. But patient and careful students, working independently of one another, have almost all arrived at a major agreement. This is that the distribution of income among the masses of our people has not been sufficient to absorb industrial output. Purchasing power has been dried up at the source, with inevitable reactions upon business and upon the entire economic structure.

I bring to the forefront the problem of coordinating production and wages because here lies the most significant economic challenge which faces us. Everyone recognizes this, and everyone admits that upon a satisfactory solution depends the welfare of all groups.

To this task, the entire Recovery Administration, under the extraordinary leadership of General Johnson, have devoted themselves with rare understanding. They have blazed a new trail, and the obstacles have been manifold. It is because they have achieved such splendid results that it is now appropriate to consider the program for the future.

The increase in the real income of the entire wage-earning class has been due to reemployment rather than to improved individual standards. The individual worker employed full time is earning less today than he did last March, and his welfare is still further imperiled by the rising of all price levels in response to our monetary policy.

It is therefore essential that most of the code provisions affecting wages should be revised drastically. Some of the minimum standards set by the codes are lower than those actually prevailing in industry. In the upper wage brackets, there have been reductions in hours without corresponding increases in wage rates per hour. As a result, there has been some tendency for the wage

rises in the lower brackets to be counteracted by reductions in the upper ones. This is a serious evil, for prosperity can neither be attained nor preserved by making workers share with workers.

If we intend to achieve the fundamental reforms of the new deal, we must be careful not to stop short even when wages reach a volume that is sufficient to keep factories open. Under a controlled economy, it would be perfectly possible to balance production and consumption, and still keep workers in poverty. Our efforts should be directed, first toward providing the worker with an income sufficient for comfortable living, and then toward assuring him an equitable share in our national wealth. I believe that to accomplish this there must be considerable change of emphasis in connection with the setting of minimum wages under the codes.

The same considerations apply to the regulation of working hours. Most of the scales under the codes are far too high, even by the narrow test of emergency measures. The Recovery Act, by establishing an average week of 38 hours, has destroyed the slavery of the sweatshop, but it has not reduced hours enough to provide for the 10,000,000 people who have not been reabsorbed by industry. Of these people, only 4,000,000 are being employed by public projects; 6,000,000 remain in desperate need.

It is a mistake to regard the shorter-hour movement simply as a means of spreading work or to criticize it as a lowering of productive efficiency which necessarily would tend to reduce all standards of living. Our technological skills have advanced so greatly during the present century that we can produce more than ever before even while lightening the burden upon the back of labor. During 1919–29 our manufacturing output rose 50 percent despite an actual decline in the number of workers engaged. During this so-called "prosperity era" we had over 3,000,000 unemployed, because we tried to appropriate too large a share of progress to a few in the form of profits and not enough to the many in the form of shorter hours. We apologetically referred to technological unemployment, when in truth we were suffering from refusal to confer the benefits of technology upon workers as well as owners. The shorter week should become a permanent part of our prosperity program. If not, the dead weight of the unemployed will drag us continually into the mire.

This analysis indicates the need for a constant process of wise adjustments between industry and labor. We have reached the period where there must be a gradual transition from an emergency basis to a permanent basis. Permanent problems cannot be solved simply by reopening codes or by general exhortations, although both of these devices may be necessary at the present time. There must be above all cooperation between employers and employees, dealing with one another on an equal footing. Our great leader, President Roosevelt, has been tireless in his advocacy of this ideal.

The first step involved in cooperation between employers and employees is that they should settle their disputes amicably and profitably, without resort to the bitter and indecisive strife of the past. The National Labor Board, of which I have served as chairman for 6 months, has handled disputes involving over 900,000 workers. Of these, over 650,000 have been put back to work or kept at work with high promise of durable peace. This figure does not include the additional thousands who have been aided by the quiet, unspectacular work of the regional labor boards in all parts of the country. The universal esteem in which the members of the Board are held and the unanimity of most of their decisions have gained the confidence of the Nation.

It is certain that almost everyone interested in economic welfare desires the permanent establishment of this Board by Congress. To that end, I have introduced a bill on March 1, and Representative CONNERY has introduced a similar measure in the House. The bill provides for a board of 7 members, with 2 representing employers, 2 employees, and 3 the general public. Provisions are made for the establishment of regional or local boards.

However, the experience of everyone connected with the National Labor Board has shown that no board alone can promote cooperation and industrial peace unless the basic conditions exist upon which peace and cooperation must rest. Section 7 (a) of the Recovery Act sought to establish these basic conditions. But the ambiguity of some of its terms, and the inadequacy of enforcement power, have enabled a minority to flaunt the law and endanger the entire recovery drive. The appeal for the clarification and fortification of section 7 (a) has intensified recently, and has received response in the new legislation proposed last week.

The primary requirement for cooperation is that employers and employees should possess equality of bargaining power. The only way to accomplish this is by securing for employees the full right to act collectively through representatives of their own choosing. The principle of collective bargaining has been attacked as a violation of the constitutional guaranty of freedom of contract, since it does not preserve for each employer the right to make contracts with each of his employees as individuals. Nothing could be more fallacious. The fathers of our Nation did not regard freedom of contract as an abstract end. They valued it as a means of insuring equal opportunities, which cannot be attained where contracts are dictated by the stronger party.

The law has long refused to recognize contracts secured through physical compulsion or duress. The actualities of present-day life impel us to recognize economic duress as well. We are forced to recognize the futility of pretending that there is equality of freedom when a single workman, with only his job between his family and ruin, sits down to draw a contract of employment with a representative of a tremendous organization having thousands of workers at its call. Thus the right to bargain collectively, guaranteed to labor by section 7 (a) of the Recovery Act, is a veritable charter of freedom of contract; without it there would be slavery by contract.

Since the passage of the Recovery Act, the freedom of workers to engage in genuine collective bargaining has been hampered enormously by the growth of the employer-dominated union. The number of employees covered by such unions rose from 432,000 in 1932 to 1,164,000 in 1933, representing a gain of 169 percent. Over 69 percent of the employer-dominated unions now in existence have been inaugurated in the brief period since the passage of the Recovery Act.

I can see no objection to the so-called "company union", if by that term one means simply a union which is not affiliated with any other organization, and whose members all work for the same employer. But I do oppose the domination of such unions by employers who do not permit their workers to become affiliated with outside organizations even when they desire to do so. In many cases, such wider cooperation is necessary to stabilize and standardize wage levels, to cope with the sweatshop and the exploiter, and to combat the employer who is unfair and overweening. Moreover, it is an absolute essential to real collective bargaining that employees should have the right to be represented by independent experts who have a knowledge of business conditions and who are not subject to the economic sway of the employer with whom they deal.

Many of the employer-dominated unions, I am well aware, have amended their rules so as to recognize these outside representatives. But the privilege granted to employees is a barren one if, on the whole, they are dominated by the employer-controlled organization. In truth, the very fact that the grant comes through employer consent is a travesty upon workers' rights.

The bill which I have introduced forbids employers to engage in specific practices whereby they exercise undue control over employee organizations. At the same time, it does not prevent employers from participating in schemes to promote the general welfare of their workers. Employer organizations should be encouraged to serve their proper function of supplementing trade unions, but they should not be allowed to supplant or destroy them.

Another defect of section 7 (a) of the Recovery Act is that it guarantees the right of employees to organize, but does not expressly secure to their representatives the right of recognition. Over 70 percent of the cases before the National Labor Board have resulted from the failure of employers to follow the clear intent of the law. The new bill, modeled after the successful experience of the Railway Labor Act, requires fair efforts to bargain collectively and genuine attempts to arrive at satisfactory agreements.

I believe that most fair-minded employers, when they have occasion to study the provisions of the proposed legislation, will be heartily in favor of it. Fair-minded men who are now allowed to band together in large trade associations do not desire to deny analogous rights to their workers. Fair-minded men do not take kindly to the pretense that industry and labor are cooperating if, in fact, one side controls both parties by holding the strings. Most important, far-sighted, broad-minded employers, who see the threat to industrial peace and economic security implicit in the present state of affairs, will enter whole-heartedly into this plan for improvement.

The new bill empowers the Board to issue restraining orders, enforceable in the courts, against the unfair minorities whose devastating tactics force well-intentioned parties to follow the same course. But the most important function of the new Board, as of the present one, would be the peaceful and voluntary conciliation of industrial disputes. The measure does not have the slightest flavor of compulsory arbitration. It relies upon the good will, common sense, and public spirit of the interested parties. It presents, in my opinion, the best solution to the thorniest problem confronting us all at the present time. When enacted it will remove the chief obstacle to economic recovery and industrial peace, and I earnestly hope that it will win the support of everyone.

RECIPROCAL TARIFF AGREEMENTS

Mr. BARBOUR. Mr. President, the President of the United States today enjoys a degree of esteem and popularity on the part of his fellow citizens certainly equal to, if not surpassing, that of any other Chief Executive within my memory. And while, with many millions of others, I applaud him for the courage he has so far evidenced along the road to recovery, I am convinced, at the same time, that genuine cooperation is not to be found in apathetic acquiescence to any and every program suggested, regardless of what it may consist. A merely "yes man" Congress is not really performing its duty either with respect to itself, its President, or the country.

It is in a spirit of honest criticism that I condemn the proposal to give the President unlimited authority to negotiate any tariff treaties he may see fit, without ratification by the Senate or final review in any quarter. If this proposal shall be adopted, the net result will be, whatever others may say to the contrary, that the Senate will simply go on record

as favoring a reduction, possibly a very drastic reduction, in our tariff rates here and now. I, for one, particularly under conditions prevailing at present in this country, am not willing to place the Senate or myself in that position.

The President, under the National Industrial Recovery Act, has the power under section 3 (e) to increase tariff rates in protection of N.R.A. principles and codes. It is obvious that such protection is necessary because of the basic philosophy of the N.R.A. itself. But it is equally obvious, I admit, that the President cannot enter into any international trading in respect to the tariff when his power is restricted only to increasing tariffs. No foreign power will enter a conference with the President's power so limited. The foreign powers are all looking for decreases in our tariff; they are looking for an outlet into which they may pour the greatest possible volume of the products of their underpaid labor. And I believe the President is being put in a position which ultimately will end in his making only decreases in our rates of duty if he is to move at all in any direction under this latest suggested yielding of a duty and responsibility specifically assigned to the Congress under the Constitution.

Why is it necessary for the Congress to sanction his future acts in advance? If he is committed to international tariff negotiations, he now has ample authority under the Constitution to undertake them; and the mere fact that he must submit such arrangements to the Senate for ratification cannot be of itself considered either harmful or, in the light of past experience, dangerous to any part of his program that is really in the best interests of the country. And, since he now has the right to increase rates, this request in its practical application can only place the Senate squarely on record as favoring tariff reductions. This in the face of the N.R.A., under which protection of home industry is absolutely essential for its proposed maintenance of higher commodity prices, shorter hours, and increased wages. The very law which makes the N.R.A. possible recognizes this truth, as I have pointed out, in section 3 (e).

I am opposed to international bargaining with our tariff because I am convinced that, no matter how we may proceed or for what purpose, it means only in the end no real bargaining at all but simply the undermining of our protective policy, actually more necessary today than ever before.

This Government with very few exceptions has never advanced its own interests to its own advantage at the international round table. We generally come out at the small end of the horn. Foreign nations which have turned their backs on their obligations to us come now seeking to take our home markets. This proposal, as I see it, is in line with a policy which already has cost us far too much, and on this ground I find additional ample grounds for opposition.

There is one more very important consideration which must have force even among those here who really do favor, without camouflage, reductions of our tariff schedules. And it is the fact that tariffs written into treaties remove the whole problem from the consideration and purview of the people as directly represented by the Congress, thereby automatically placing this country in a veritable tariff strait-jacket, from which it can thereafter move neither upward nor downward without assent of the other contracting nation, even should we later find it necessary for our well-being and preservation to change a schedule or rate. There is danger enough on this ground alone to justify opposition to such procedure, whatever one's individual views may be in respect to how low or how high our tariff should be at the present time. Furthermore, treaties are not made in a day, and there can be no real or substantial recovery while business waits anxiously and uninformed for weeks, months, and perhaps even longer for rates of duty to be revised, if they are to be revised, by treaty makers.

I am convinced that recovery cannot be advanced by surrendering home markets to foreign exploitation, even in the avowed adjustment of the foreign debts, adjustments that can, if made at all, only be ever downward.

The significance of all this is greatly emphasized, in my opinion, when viewed in the light of the tremendously increased deficit which now stares the Nation in the face, and which obviously demands every possible national support at home, and no weakening of any stimulation that can be vouchsafed to American agriculture, labor, and industry.

NAVAL CONSTRUCTION

The Senate resumed consideration of the bill (H.R. 6604) to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington, February 6, 1922, and at London, April 22, 1930, at the limits prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes.

The VICE PRESIDENT. The Senator from North Dakota [Mr. FRAZIER] is entitled to the floor.

Mr. FRAZIER. Mr. President, on Thursday afternoon, when the Senate recessed until today, I was talking on the so-called "Vinson bill", to authorize the building up of the United States Navy to the treaty limits of the conferences of 1922 and 1930. At that time I referred to a book written by Mrs. Morgan, the secretary of the National Council for the Prevention of War, published here in Washington.

Mrs. Morgan states in this book that the Washington Conference was made necessary by the situation which had been developed by our own enormous naval building program, undertaken during the war and continued in 1919. A program of building 16 capital ships, including 10 battleships, and 6 battle cruisers, had been started in 1916, and was suspended in 1917, after we went into the war, because of the need of more destroyers to fight the German submarines, and so forth. She also quotes a little statement from Hon. Charles E. Hughes, who was Secretary of State at the time, made on April 28, 1927. He says, in regard to naval competition:

> Whatever the motives that inspired our naval program of 1916, it was clear after the end of the war that it was unnecessarily extensive, and had become essentially provocative.

Mrs. Morgan also gives some tables that are very interesting. One gives the strength of the navies of the United States, the British Empire, Japan, France, and Italy. I will state that this book was written in 1930. The table gives the number of ships and total tonnage of the navies of the five powers built, building, appropriated for, and authorized within the effective age of 20 years for capital ships, aircraft carriers and cruisers, 16 years for destroyers, and 13 years for submarines.

The United States at that time had 452 ships. The British Empire had 339; and, of course, Japan and France and Italy were below that. The tonnage of the British Navy, however, was somewhat larger than that of the United States.

Comparing the strength of the five navies, the chart shows that the United States led in number of ships by 113. The British Empire led in tonnage by 50,440 tons.

Another table shows that the United States at that time was greatly in the lead in the number of destroyers and also in submarines, leading all the other nations of the world.

Mrs. Morgan also gives some interesting figures in regard to the cost of battleships, stating that at that time the modern type of battleship cost from $35,000,000 to $40,000,000; and she goes on to tell that each battleship has a crew of about 1,200 men, and that it costs about $2,000,000 each year to pay the expenses of such a battleship and crew.

Mr. President, it seems to me that the passage of the Vinson navy bill is absolutely unnecessary at the present time, inasmuch as we have already, during the present session of Congress and during the past few months, made provision for the building of a large number of ships. During the summer, money was set aside from the Public Works Administration fund, and 32 ships were laid down under that provision. In the regular appropriation bill of the

Navy Department, passed only a few days ago, 54 ships were authorized, making a total of 86 new ships that will be constructed under the program we have already adopted; and this bill is supposed to carry an authorization for 102 warships, which would make a total of 188 new ships for war purposes during the present year.

It seems to me that it is absolutely unjustifiable to appropriate so much money for the building of new ships. The appropriation for the Navy during the present year, for the building of 188 new ships, amounts to well over a billion dollars. Mr. President, that means that 188 ships that we have at the present time will be scrapped and dismantled—used as targets, I presume—and that 188 new ships will be built in their place; and many of the ships that will be dismantled and scrapped because of this measure that we are asked to authorize at the present time, we are told by people in good authority, are in pretty good shape. Some of them have been reconditioned at an expense of millions of dollars during the past 3 or 4 or 5 years, and these authorities tell us that the life of those ships has not yet run out; that they should be continued; but, of course, under the London Treaty, ships can be scrapped that are, as it is called "over-age."

I desire to read just a word about these over-age ships.

During the recent debate on the floor of the House, Representative COLLINS of Mississippi, who has long been a member of the Naval Committee of the House, made a rather interesting statement in regard to the so-called "over-age" ships. He said:

At the London Conference some men sat at a table and arbitrarily determined that if a destroyer was laid down before the 1st of January 1921 it would be over-age 12 years thereafter; but if it was laid down 1 day, mark you, subsequently, its life would be 4 years more—in other words, 16 years.

Representative COLLINS cites this particular example to show the absurdity of the so-called "age limit" of our ships.

This group at the London Conference agreed that if these destroyers were laid down prior to this arbitrary date of January 1, 1921, their life would be only 12 years; but if they were laid down, as the Congressman says, just one day after that, on the 2d day of January, 1921, their life would be 16 years. The mere statement shows the arbitrariness and the lack of rhyme or reason for a ruling of that kind; and, of course, most of our destroyers were laid down prior to January 1, 1921. Therefore, they are practically all over-age and obsolete.

I made the statement the other day that all of our battleships would be obsolete if we got into another world war. With the constant improvements of so-called "scientific warfare", our battleships would be obsolete even though they had been completed only a few months.

It has been stated time after time, and thoroughly demonstrated, that in the event of another war our battleships could be sunk by one well-directed bomb. Think of it, Mr. President! A battleship costing thirty or forty or more million dollars can be sunk to the bottom of the ocean with one bomb from a bombing plane! It seems to me the money spent for such a vessel would be practically wasted; and this money could be put to so much better use in these hard times.

I desire to go into that matter further a little later on.

Representative COLLINS continues:

The life of a submarine was fixed at 13 years unconditionally.

That is, it did not make any difference when the submarines were built; they were considered to be out of date and obsolete and over-age at the end of 13 years. That, of course, was another arbitrary ruling.

It so happens that practically all of our destroyers were laid down prior to January 1, 1921.

The Representative continues:

On January 20, 1931, let me tell you what the Chief Constructor of the Navy told the Appropriations Committee.

That is, the Appropriations Committee of the House.

In referring to 86 destroyers that had just been thoroughly overhauled and recommissioned, in response to an inquiry as to whether or not they had had much service, Admiral Rock said:

They have not; no, sir. They have been kept in fairly good condition. They have had very little service, and therefore the hulls in general are in very good condition.

He was asked:

That would also be true of the machinery?

Admiral Rock said again:

It probably would be true of machinery also.

These vessels were reconditioned just prior to 1931. He stated somewhere that they would be good at least another 10 years, "certainly 10 years for the hulls", he said. Those 10 years will not be up until at least 5 or 6 years from now, although technically the ships are over-age and can be scrapped under this treaty and new submarines built in their place.

There is no question about the authorization in the bill of 102 ships, and even more can be built, as well as some airplanes. That was thoroughly discussed in the House and acknowledged there by the Chairman of the Committee on Naval Affairs and not contradicted or denied.

It seems, Mr. President, that practically all of our ships, or nearly all of them, numbering a total of 372, are over the age limit. In fact, all but 86, I believe, are over the age limit technically. But, as has been stated, many of them have been reconditioned and are good for many years to come.

In a discussion on the floor of the Senate a few days ago the Kellogg Peace Pact was interjected into the debate and some comment made upon it. It seems to me the fact that the United States was responsible for the adoption of the Kellogg Peace Pact, responsible for getting practically all of the nations of the world to agree to it and to adopt it, throws on us a little more obligation under that pact than rests on any other nation, although other nations have adopted it the same as did the United States. It seems to me that we have a little more responsibility, because it was our activity that resulted in the adoption of that pact.

We all know that the very title and essence of the Kellogg Peace Pact is the renunciation of war, and now it seems to me contrary to the purpose and intention of the Kellogg Peace Pact, when it was adopted, at least, contrary to the thought of those who believed in it at the time it was adopted, to continue to build up a navy larger than that of any other navy on the face of the earth.

Congress during the seventy-third session has made appropriations, or authorizations, including those in the pending bill, for well over a billion dollars, about a billion forty million dollars, for the building up of a navy, and, of course, that is a great deal more than has been spent by any other nation over a period of several years. I introduced into the RECORD the other day a statement showing the increase in the expenses of navies during the last 15 years, and, of course, those expenses have been increasing rapidly. The United States has spent almost twice as much as any other nation on earth for war purposes in peace times, and that in spite of the fact that we were instrumental in the adoption of the Kellogg Peace Pact for the renunciation of war.

During the last 7 years there has been spent for our Navy $2,413,000,000. During the last 3 years the amount spent for that purpose was $1,085,000,000. For this year, if this bill shall be enacted, we are appropriating and authorizing a billion and about forty million, almost as much as we have spent in the last 3 years, and that amount spent in the last 3 years is more by far than any other nation on the face of the earth has ever spent in peace time for the building up of its navy. When we include the Army appropriations along with these Navy appropriations, it means that in the last 7 years we have spent $5,330,000,000, an immense amount.

Besides this authorization of 102 ships in the pending bill, there is a proviso, beginning on page 2, line 15, in the pending bill, which reads:

Provided, That the President of the United States is hereby authorized to replace, by vessels of modern design and construc-

tion, vessels in the Navy in the categories limited by the treaties signed at Washington, February 6, 1922, and at London, April 22, 1930, when their replacement is permitted by the said treaties.

I take it, Mr. President, that means that, in addition to building the 102 ships which are spoken of in the discussion in the House and on the floor of the Senate, the President can also replace some of the great battleships. I want to refer again to what Representative COLLINS said about that particular provision of the bill in the discussion on the floor of the House on January 30 last, as found on page 1616 of the RECORD. He said:

Think of it, gentlemen! We are here asked to approve of the construction of 15 capital ships of 35,000 tons average, that may be laid down after January 1, 1936. Fifteen great, big, lumbering hulks that cost in the neighborhood of $40,000,000 apiece to build, which, in the event of a war with a big naval power, would, as Admiral Sims, I believe it was, who said, "better be tied up somewhere up the Mississippi out of harm's way."

As I remember it, Admiral Sims, in a statement before one of the committees of the House of Representatives a few years ago, stated, in substance, that in the event of another world war, the safest place for the United States Navy would be up the Mississippi River just as far as they could get, because, he explained, one well-directed bomb would sink the biggest battleship afloat. Some of the Members of the Senate who have been here for some time remember, and perhaps some saw, the experiments that were tried out in the Atlantic shortly after the World War in the sinking of a German battleship. It was demonstrated that it could be easily sunk with one bomb.

As I understand it, the provision in the bill to which I have referred authorizes the President to scrap these old battleships and build new ones in their places. Of course if that were done, it would bring the total cost of the bill much higher than the $470,000,000 that is anticipated by those who are advocating the measure.

Mr. KING. Mr. President——

The PRESIDING OFFICER (Mr. REYNOLDS in the chair). Does the Senator from North Dakota yield to the Senator from Utah?

Mr. FRAZIER. I yield.

Mr. KING. It occurs to me, from an examination of the bill, that the provision to which the Senator has just referred is one of the most subtle, deceptive pieces of proposed legislation that has ever found its way into the Senate of the United States. I think it is an attempt to commit the Government of the United States to the construction of large battleships, when the bill ostensibly is for the purpose of building auxiliary craft, craft which are smaller than the capital ships. It seems to me that if the proponents of this measure are entirely fair and candid they will consent to the elimination of that proposed provision in the bill. It is too early for us to determine now as to the future policy of the Government in dealing with battleships. We are not ready to commit ourselves to the building of a large number of battleships, certainly not in advance of the expiration of the disarmament conference treaty.

If a measure such as this one shall be passed by the Senate, it will produce repercussions in other nations, will arouse their fears and apprehensions. They will say that this is a sly and subtle and adroit way of committing the United States to the construction of big battleships, and it will induce them to adopt naval policies perhaps against their wishes, certainly against the condition of their treasuries, and they will do that under the pretext that they must defend themselves against the manifestations of an aggressive policy upon the part of the United States.

Mr. FRAZIER. I thank the Senator from Utah for his observations. I think the whole bill is deceptive and misleading. My reason for that statement is this: The naval appropriation bill for the fiscal year ending June 30, 1935, which the Senate passed a few days ago, contained a provision for the building up of the Navy to treaty strength. The naval construction bill contains an authorization of $470,000,000 for the building up of the Navy, beginning a year from the 1st of next July. In the meantime, another Congress will have met, and if it is then necessary to go on with the shipbuilding program, appropriation can then be authorized instead of authorizing it now.

Mr. President, much has been said about the profits that accrue from the construction of battleships. Much has been said about the profits that accrue from a preparedness program. Much has been said about profits accruing from the furnishing of munitions of war. A limit has been placed to such profits by the terms of the pending bill. In the House a limit of 10-percent profit was fixed. The provision was made that contractors and shipbuilders could make no more or no less than 10 percent. The Senate committee amended and modified that provision, making it a little bit better. The Senate committee's amendment restricts profits so they shall never be more than 10 percent, and they might possibly be less.

Mr. President, I am satisfied that if the profits could be taken out of the furnishing of war supplies, if the profits could be taken out of the building of our warships, if the profits could be taken out of the furnishing of other supplies for war purposes, if the profits could be taken out of the furnishing of munitions of war, if the profits could be taken out of war itself, I believe we should have very little propaganda in favor of preparedness for war, and I believe it would be a long, long time before we should go into another war. In other words, if when we conscript the boys to fight our battles we shall also conscript the wealth of the Nation to pay for the war as we go along, I believe we would go a long way toward preventing war in the future. At least, there would have to be a mighty good reason for war before we went into it if such restrictions were placed upon those who furnish the munitions of war, and if we conscripted the wealth of the Nation as well as the youth of the Nation to fight our battles. If war profits can be eliminated, I am satisfied that more will have been done to bring about world peace and disarmament than could be done in most any other way.

The naval construction bill contains a provision limiting profits to 10 percent. Ten percent on the cost of a large battleship means a pretty good profit. A battleship costing $40,000,000 would provide a profit of $4,000,000, and in these hard times that would be a pretty good profit. For the purpose of safeguarding such profits, Mr. President, I presume private shipbuilding companies feel it is worth while to spend some money for propaganda in behalf of preparedness. The propaganda is for preparedness. Preparedness for what? Preparedness for peace? Oh, no; it is preparedness for war.

It is said that the preparedness, of course, is for defense, to insure defense to our great Nation, to our institutions, to the industries of our country, to our Government itself. Such preparedness is not possible. Under the provisions of the pending bill we shall be authorized to build up the United States Navy to be the largest in the world. We are the richest country in the world. So the question is asked, Why should we not have the largest Navy? The excuse offered for the demand for the largest navy in the world is that we are the richest country in the world. We can easily build a navy larger than that of Great Britain, and the bill provides for such a navy. But, Mr. President, suppose there is some sort of agreement between Great Britain and several other of the foreign nations, will it be possible for us to continue to build and keep our Navy larger than the combined navies of the Old World? I believe any thinking citizen must agree that that would be practically an impossibility, and it would not do any good even if we did it.

During the last few years there have been a number of so-called "sham air battles" in which there were a great number of defense planes used, a certain number of Army attacking planes, including bombing planes, and planes of all varieties, of course. One such sham battle, the description of which I recall particularly, was had over the city of London. In that case an official committee was appointed to watch the battle, which lasted 5 days, as I remember it, and the committee made a careful observation and made a thorough study of the whole situation, after which they made their official report, at the conclusion of the battle.

The committee in the official report said, in substance, that it was a practical impossibility to keep the enemy planes from over the city of London. They reported that one of the great bombing planes could come over the city and blow up and burn up a great portion of the city of London, and they said it was impossible to keep such planes from coming over the city; that they could come in under cover of darkness, they could come in under cover of fog or during a storm, and it would be impossible to keep them away. During that sham battle the enemy planes came over London several times.

Another such sham battle was had over the city of Paris a short time afterward. On that occasion the same experience was had. A short time after that a sham battle was held over the city of New York; and in that case the same experience was had, that it was absolutely impossible to keep enemy planes from coming over the city of New York.

Of what good is the great Navy of ours if bombing planes should come over and attack our cities? Mr. President, in the last few months I understand bombing planes have been greatly perfected. Such planes can even be steered and guided by radio. A so-called "robot system" is used for running the airplanes, which system can direct the course of the plane within a distance of three, four, or even five hundred miles, and the plane can be sent almost exactly to the point desired. The plane will move just as the radio operator guides it, and will go to the place to which he sends it. In such case there is no pilot in the ship. Bombs can be let fall from the ship at any point desired unless the plane is shot down, in which case it would explode where it strikes.

Mr. President, I am told that one of these so-called "modern, scientific instruments of destruction" could clean up a territory in a city like New York at least half a mile wide and three quarters of a mile long. Just one bombing plane could do such damage. Should we get into another world war there will be hundreds—yes, thousands—of such great bombing planes sent to bombard our cities.

A few days ago Mrs. Roosevelt, the First Lady of the Land, in speaking at a conference in the city of Washington, made a remark which was quoted on the floor of the House the other day. The statement was made before a convention for the "Cause and Cure of War." The First Lady had this to say:

> I believe anyone who thinks must think of the next war as they would of suicide.

Then she adds:

> But most people do not think. How deadly stupid we are!

Mr. KING. She referred to the Senate, probably.

Mr. FRAZIER. I think she referred to anyone who says we can by building a navy a little larger than that of Great Britain insure the safety and the defense of the people of the United States. Certainly a world war under the so-called "scientific method" would be suicide.

The people who seem to advocate preparedness apparently go on the theory that might makes right. That is rather an old, threadbare argument. It goes back to the cave man's days, when the strongest man, the man who could wield the most deadly club, was the man who dominated. He was right, because he had the might to wield that war club. If we are going to endorse the sentiment that "might makes right", I do not care whether it is in private affairs or in public affairs, if our Government is going to endorse the theory that "might makes right" and build up a navy larger than that of any nation in the world, and have, as well, a larger army, it seems to me that such a policy is repudiating the whole theory of civilization which we have been glad to see developed, that might was not the only thing in the world; that there was right and justice to be considered.

I have before me a little magazine which was published during the war time in the city of Washington. It is called "The Congressional Magazine." The copy I have is volume 1, no. 2, published in June 1916, and is entitled "Peace or War." The discussion in the magazine refers to conditions at that time, of course, when there was a strong sentiment for preparedness. I want to quote some of the statements from this little magazine. Here is a statement from the then Senator Vardaman, who came from the great State of Mississippi. The speech was made January 25, 1916, according to this magazine, and under the subtitle, "The Question of Preparedness", I want to quote Senator Vardaman, as follows:

> I am especially desirous that the people of Mississippi think deeply on this question of "preparedness" for war.

A little further down he says:

> I heard a distinguished officeholder say a few days ago that he was in favor of preparing for war for the purpose of preserving peace.

"Preparing for war for the purpose of preserving peace!" That was back in 1916. We have those among us now who make the same argument today, that we should prepare for war for the purpose of preserving peace.

Former Senator Vardaman goes on to say:

> Germany was prepared for war at the beginning of the devastating struggle now going on in Europe. Did her preparation preserve peace? France was prepared for war; England had the greatest navy the world had ever known at the beginning of this war. Russia with her compulsory military spirit rampant and paramount—did all these influences work for peace? Let the flowing blood and the groans of the wounded in the trenches and the heartaches of the mothers and wives and the cry of orphaned children of Europe answer that dread question. Governments are but the individuals in the aggregate. The same influences move masses of men to action that actuate the individual. Did you ever know a man who really wanted peace ornament his person with a couple of pistols and a bowie knife, and other modern implements of hell, and go out into the street as an apostle of peace? Do you really think that that character of man ever promoted peace in the community in which he lived? Of course you do not. But, on the contrary, he is a disturber of the peace and a fomenter of strife.
>
> Nations, I repeat, are but the individuals in the aggregate; and the same code of laws and morals should govern the nations in their dealings that individuals insist upon governing men in their intercourse with each other.

I think former Senator Vardaman was absolutely correct in that statement.

There are a number of interesting articles in this little magazine.

Here is an article on the Navy League. The Senate will recall that we heard a great deal about the Navy League, the patriotic organization that wants to build up a navy for defense. Oh, yes. They even operate clear over in European countries; the same group having the same purposes apparently are organized and advocating preparedness programs over there.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Utah?

Mr. FRAZIER. I yield.

Mr. KING. The Senator will recall that the Navy League, of which he speaks, when President Hoover delivered an admirable address in which he referred to disarmament and to the importance of reducing military expenditures, denounced him and said that he exhibited "abysmal ignorance." They were willing to denounce the President of the United States as well as everyone else who did not accept their militaristic and navalistic views.

Mr. FRAZIER. I remember that statement, and only a few years previously a similar attack was made, as I recall, against President Coolidge by the same Navy League.

Here is a statement from Hon. Claude Kitchin, who was at that time Democratic leader in the House of Representatives. This statement was made in November 1915. He was talking about the immense appropriations that had been made for years; he quoted from statements from President Wilson and also from Mr. Josephus Daniels, who was then Secretary of the Navy.

> We have under Mr. Wilson's and Mr. Daniels' administration, for the first time in years, the full complement of enlisted men authorized by law.

And he stated that they were spending more money for the Navy, and still there was propaganda going on for greater preparedness and a larger navy and a larger army.

He quotes from the report submitted by Secretary Daniels to Congress in 1914. I wish to read an extract or so from that report of Secretary Daniels:

The naval appropriations in our own country have doubled in a dozen years, and have gone up by leaps and bounds in other countries. If this mad rivalry in construction goes on, the burden will become too heavy for any nation to bear.

At that time they wanted to increase the appropriation for the Navy by $200,000,000. Think of it—$200,000,000! Secretary Daniels said, if the increase in appropriations for the Navy should continue to go up, no nation would be able to bear the expense. Yet what are we doing now? Anybody who would now talk about simply $200,000,000 for the increase of the Navy would be a "piker." They talk in billions now. The appropriations, as I have shown, for this one year, if the appropriation carried by this bill shall go through, will be over a billion dollars. In Secretary Daniels' day he objected to an amount of $200,000,000 which it was sought to have appropriated at that time.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from North Dakota yield further to the Senator from Utah?

Mr. FRAZIER. I yield.

Mr. KING. The Senator might with propriety add that the passages of the pending bill, as well as the other measures alluded to, makes commitments which will involve us in an amount greatly in excess of a billion dollars. It is just like the program of 1915–16, which contemplated the construction of 15 great battleships and battle cruisers; but the construction of those vessels meant enlarged harbors, because we had to deepen them; we had also to have larger docks in which to repair the ships; and then auxiliary craft had to be acquired, because, when we build a battleship, we must have auxiliary craft at a cost of millions and hundreds of millions of dollars more; so that the eight or nine hundred million dollars for battleships would have cost at least $1,500,000,000 because of the changes that would be required to supplement the battleships.

Mr. FRAZIER. That is undoubtedly true. In this respect Secretary Daniels also states:

The growing cost of dreadnaughts, of powder, and of everything that makes an efficient navy gives reason to pause. The heavy expense commands national and international consideration. Ten years ago our largest battleships cost $5,288,000.

That would be 10 years prior to 1914, which would make it 1904. At that time the cost of a battleship was $5,288,000, but in 1914 he said:

The next dreadnaught will cost $14,044,000.

Its cost would be $14,044,000; and he was protesting against that. How much do battleships cost now, Mr. President? According to the best estimates, it will cost between $35,000,000 and $40,000,000 for each one of the great dreadnaughts which now may be built.

Mr. KING. Mr. President, will the Senator permit another interruption?

Mr. FRAZIER. Yes.

Mr. KING. The Senator will recall that the four Hoods which Great Britain contemplated building, when we were forcing through the 1916 naval program, each would have cost $75,000,000, because that type of ship had a tonnage of 43,500 against 32,000 and 35,000 tonnage of the largest battleships that are now afloat. So there is no limitation. If we keep on building we may have battleships of the Hood type which will cost, as indicated, at least $75,000,000 each.

Mr. FRAZIER. The Secretary of the Navy, back in 1914, went on to protest that the taxpayers could not pay the increased indebtedness that would be brought about and could not bear the increased burden because of the building up of a great Navy.

Mr. BONE. Mr. President, I understood the Senator from North Dakota to say from the record we have that in 1914 battleships could be built for $5,000,000 each, while now they cost $40,000,000. Did I understand the Senator correctly?

Mr. FRAZIER. That is the statement contained in the report submitted by the Secretary of the Navy in December 1914, in which he says that—

Ten years ago our largest battleships cost $5,288,000.

I do not know whether they were as large at that time as they are now, but approximately they were, I think. I do not know what the profit was on those $5,000,000 battleships at that time, but unless human nature has greatly changed the builders of those ships probably made a fairly good profit at that time.

Mr. BONE. As I recall, during the Spanish-American War the large guns on the battleships were 12-inch guns. I may be in error about it, but it is my recollection that the large guns on the *Oregon*, the *Texas*, and other ships during the Spanish-American War were 12-inch guns. Everything has been increased in size since then, which would step up the cost. I do not know in just what ratio, but nevertheless the cost would be stepped up. If there is a multiplication factor of somewhere near eight in costs, it would indicate certainly the presence of inordinate profit in the building of these vessels.

Mr. FRAZIER. I think there is no question about the profits.

Mr. NYE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to his colleague?

Mr. FRAZIER. Certainly.

Mr. NYE. In connection with what the Senator from Washington just said, I think his attention ought to be called to the fact that prices have not ceased going up, even during more recent years. I understand that the Joint Committee on Printing of the Congress, dealing this morning with bids received by the Government Printing Office for papers that have to be used during the next fiscal year, found the bids quite similar under the new code system, and found also that the costs of the papers involved were something like 40 to 50 percent higher than they were in 1929, when we presumed we had reached the peak.

I understand certain members of the committee have made inquiry and discovered that in spite of these increases in costs, the cost of labor involved in producing the paper is something like 20 to 30 percent lower than it was in 1929, and the cost of the raw material to which the paper manufacturers must resort is something like 15 percent less now than it was in 1929. Yet the bids to the Government Printing Office call for 40 percent higher prices than were offered in 1929.

On that basis, how much is a battleship or a battle cruiser or destroyer going to cost today if it cost a certain amount in 1904 or in 1929?

Mr. FRAZIER. Of course, most all of our big factories and manufacturing corporations got the habit during the World War of making larger profits than they have ever made up until that time, and it seems they cannot get out of that habit now. They still want to make war-time profits. Battleship equipment, of course, costs more than it did a few years ago. Because the inventors and gun manufacturers of Germany have put out a larger gun, we had to keep pace with them, and so the United States Navy had to scrap the old guns and put larger guns into our battleships.

When Germany made an improvement the United States had to do a little better, and it has been the same all down the line. When Great Britain had 1 battleship we had to build 2. It has been the other way in the recent past, Great Britain being a little above us, but now we are going to show Great Britain that we can build a larger navy and spend more money for it than she can. We are going to have the greatest navy on earth—for peace? No; for preparedness for war. That is what it is for, and there is no getting away from it.

Secretary Daniels, in his report to the Congress, made some further interesting statements. It is stated further in his report—at least, I assume it is a continuation of his report—speaking about the deficit:

After the expiration of the present emergency tax, December 31, 1915, we will be faced with deficits for the coming year of at least $117,000,000.

Think of it! They were worried in those days about a deficit of $117,000,000 back in 1915.

For this program of militarism and navalism, euphoniously called by its advocates national defense or preparedness program, $200,000,000 annual increase of taxation is required. This added to the deficit above mentioned makes a total of $317,000,000.

That was the deficit they were going to have back in 1915 and 1916 because of the naval preparedness program, and the Secretary of the Navy at that time was greatly worried because they had a deficit of $117,000,000 and perhaps would have $200,000,000 more.

The difference between the deficit then and the deficit now, of course, only brings out the changes that have taken place in the last few years. If we had only $117,000,000 deficit now, I think it would not ever be mentioned. It would not be considered. But the deficit now runs into billions instead of millions.

I shall take no further time to read from Secretary Daniels or Congressman Kitchin, but I want to read from a speech of Hon. William Jennings Bryan, who, it will be remembered, was Secretary of State during the first part of the Wilson administration. I have forgotten just when he did resign that position, but it was some time during President Wilson's first term. Secretary Bryan, after he resigned as Secretary of State, in November 1915 made a speech at Johnstown, Pa., and he is quoted in the little magazine to which I have been referring. I want to read a few of the statements the former Secretary of State made at that time. This, remember, was late in the year 1915. Mr. Bryan said:

A propaganda is being actively carried on which has for its object the establishment of the doctrine that the only way to preserve peace is to get ready for war.

It is the same argument that we have today.

The exponents of this theory admit that war is a horrible thing and that it should be avoided, but they contend that the only way to prevent war is to organize, arm and drill, and then stand rifle in hand and finger on hair-trigger, and preserve peace. I never expected to hear this theory advanced after the present war began.

It was in 1915 that he made this statement, and he was speaking of the World War that was then going on.

I never expected to hear this theory advanced after the present war began. * * * When this war broke out I thought that at least one good would come out of it, namely, that no one would hereafter stand before an intelligent audience and argue that preparedness would prevent war.

They were continuing that propaganda in the latter part of 1915, however, and they are still continuing it.

Mr. Bryan goes on:

If war could be prevented by preparedness, there would be no war in Europe today, for they have spent a generation getting ready for this war. They had the kindling all ready; all they needed was a match. When the war broke out those best prepared went in first, and others followed as they could prepare, and I believe that if we had been as well prepared as some now ask us to be we would be in the war today shouting for blood as lustily as any of them.

Mr. President, those were the words of William Jennings Bryan, who was Secretary of State in President Wilson's Cabinet and probably knew more about the actual cause of the World War, and what we were getting into, and why we were being dragged into it or expected to be dragged into it, than any other man in the United States. You will remember that he finally resigned his position because he disagreed with the President's program. It, however, was not until after his second election, in 1916, that President Wilson apparently changed his program to one of war instead of peace; but Secretary Bryan had resigned, as I remember, in 1915, sometime along in the middle of the year.

Mr. Bryan makes some more very interesting statements. Here is another paragraph that I desire to read. He says:

Do not allow yourselves to be deceived or misled as to the real issue. The question is not whether this Nation would defend itself if attacked. We have a potential power of defense such as no other nation has today—such as no other nation has ever had—and other nations know it.

That was in 1915, mind you. He said at that time we had a potential defense such as no other nation had; and we have been increasing that defense year by year, Congress by Congress, ever since that time.

Mr. Bryan continues:

There is no danger that an attack would not be resisted, and we would not depend upon the jingoes. They would be too busy making Army contracts and loaning money at high rates of interest to reach the front. If we ever have a war, we will depend, as in the past, upon those who work when the country needs workers, and fight only when the country needs fighters.

The same prediction would stand good in the event we get into another world war.

Here is another statement that interests me from Secretary Bryan's speech:

The people who profit by furnishing preparedness have been playing the nations of Europe against each other for a generation. Every battleship that is built in one country is made the excuse for building more battleships in other countries.

And that is just as true today, although the navies have increased to a marked degree since that time; yet, because we are not quite up to the limit of Great Britain, we have to build more battleships. We have to have the leading navy in the world.

Here is another statement from Mr. Bryan:

There is no excuse for the attempt which is now being made to lash the country into a fright over possible wars.

That was in 1915.

Let us do what we can to stop the war in Europe; humanity, as well as our own security, demands it. But if we cannot stop the war there—if the dogs of war must fight—we should at least keep hydrophobia out of this country while the war lasts.

Mr. President, if we had taken Bryan's advice, and kept hydrophobia out of this country while the World War lasted, we would not be in the terrible financial and economic conditions we are in today. We would not have the eleven or twelve million unemployed that we have had during the past few months. We would not have the terrible conditions that we have now if we had stayed out of the war. We would not have the billions of dollars of deficit, instead of the few millions that Secretary Daniels speaks of, if we had kept hydrophobia out of the United States while the World War was going on in Europe. Yet, Mr. President, there is a certain group that is advocating preparedness. Bryan says somewhere that those who are advocating preparedness are generally the people who expect to make some profit out of that preparedness, and I think he is absolutely correct in that statement. That, in all probability, has a great deal to do with it.

Mr. BONE. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BULOW in the chair). Does the Senator from North Dakota yield to the Senator from Washington.

Mr. FRAZIER. I yield to the Senator from Washington.

Mr. BONE. Can the Senator tell us what the total national debt was in 1914? I wonder if any of the data he is employing there contain that information.

Mr. FRAZIER. I am very sorry that I have not those figures.

Mr. NYE. Mr. President, my recollection is that it was about $9,000,000,000 just before our entry into the war.

Mr. BONE. In 1914, $9,000,000,000? I think the Senator must be in error.

Mr. FRAZIER. Mr. President, I do not believe it was anything like that, but I have not the figures regarding it. They could easily be obtained, of course. What I was interested in was the statement of the Secretary of the Navy at that time that there was a deficit of $117,000,000, and he was worried about the taxpayers raising money to pay that deficit, and intimated that the taxpayers would be likely to rise up in protest against an increased tax burden to balance the Budget and raise enough to pay this deficit of $117,000,000, especially if Congress put on $200,000,000 more for war purposes.

During the World War a tremendous drive was put on all over the United States for compulsory universal military training. A real organization was formed; I have forgotten what it was called, but it had some high-faluting, patriotic-sounding name, and it sent men all over the country advocating compulsory military training for every able-bodied man. The War Department said we should have an

army of three or four million men, and could have if we had this universal military-training law put through. I happened to be in office up in North Dakota at that time, and one of these men made a special trip out there from Chicago and had a statement all ready; all I had to do was just to put my signature on it to endorse this patriotic proposition of universal military training, which I did not do, to train our young men and have them ready for war in the event of another war, so that we could go in at once, so that we would not have to wait and train men and build up a navy, and so forth, after a war started.

There was a great deal of opposition to universal military training, growing out of the fact that a war was going on at that time, and Germany and some of the other countries had had universal military training for years, and a lot of us thought that was one thing that led to the war, because they had their soldiers all trained, because they had a great navy; in other words, because they were prepared for war. Just as Mr. Bryan said, the countries that were best prepared were the ones that went into the war first; and I am satisfied that that would be the case if another world war should come.

So the universal military-training scheme was blocked; but, as you all know, we have compulsory military training in our land-grant colleges and universities in practically every State in the Union, I think, with the single exception of the State of Wisconsin. There the State legislature, when former Senator Blaine was Governor, passed a law to provide against compulsory military training in the agricultural college and State university. So far as I know, that is the only State in the Union that bars compulsory military training in its land-grant colleges and universities.

In the great State from which my friend the senior Senator from Kansas [Mr. CAPPER] comes, a farmer's son cannot go to the great agricultural college there to get a training in agriculture without taking 2 years of compulsory military training, if he is an able-bodied man—and most of our farm boys are. He cannot take a course in agriculture in the State college there—or in any other State college, so far as that goes, with the exception of Wisconsin—unless he takes 2 years of compulsory military training. He must do that in order to get his training in agriculture in one of those colleges.

As I say, it is the same way at the other State universities. A boy must take 2 years of compulsory military training in order to get his degree at any State university in the United States, as far as I know, except the State University of Wisconsin.

You may remember that out here in Maryland, right at the border of the District, in the University of Maryland, only a year or two ago a couple of boys refused to take compulsory military training, and they were expelled from the university. They took the matter into court, and I do not remember how it was settled, but they had quite a time over it. I understand that in at least one of the Middle West universities in the past fall the same thing occurred, and the boys were expelled there because they refused to take compulsory military training. Of course, we have been building up our Army, potentially at least, ever since the World War, with the R.O.T.C. and the compulsory military training.

We have great need for public funds for the unemployed, to put people to work, and for improvements of many kinds. The Civil Works Administration, which has been doing such remarkably good work in giving the unemployed something to do, giving them a meal ticket, and accomplishing a lot of good work, are compelled now, and have been for the past few weeks, to cut down their forces because of lack of money. They say they will have to quit entirely unless large appropriations shall be made at this session of Congress.

We have not money for this public work, we have not money to keep these men on the pay rolls, but we have money for the preparedness program, so called, over a billion dollars this year for the building up of a great navy. A billion dollars would go a long way toward keeping the Civil Works program going. But we must use it to build up a navy, to make our Navy just a little bit bigger and a little bit better than that of Great Britain.

Business men are either broke or are going broke all over the Nation. Thousands of cities are going bankrupt, municipalities, townships, and counties are practically bankrupt now, and some of the States mighty near it, and the national deficit runs away into the billions. Farmers by the wholesale have been losing their farms and their homes during the last few years because they could not make money enough, under the existing conditions, to pay their running expenses, to pay their taxes, and to pay the interest on their mortgages. Mortgages have been foreclosed on their farms, and the farmers have been put out of business.

Home owners in cities have lost their jobs, or have lost their savings in bank failures, have lost their homes in the cities, and they are not being taken care of. The farmers are not being taken care of, because we have not the funds to take care of them, we are not taking care of the little business man, we are not taking care of the home owner in the town who is losing his home, but we have the money, apparently, or will have when we pass the pending bill, carrying over a billion dollars for this year, for the building of a great navy in preparedness for war, not preparedness for peace, but preparedness for war.

Mr. President, a great many of the World War veterans have felt the need of immediate payment of the balance of their bonus, but the movement in that regard has been turned down. They were denied because we did not have the money to pay the boys the money which was coming to them, the money the Government owes them, without any question of a doubt. I think no one will deny that the Government owes them the money; yet we did not pay them because we did not have the money.

During the special session last spring an economy bill was enacted cutting down the appropriations for the Veterans' Administration by $400,000,000, which resulted, as everyone knows, in untold hardship to many veterans of the various wars, veterans who were disabled, who were diseased, who were sick, who in some instances had been hospitalized or bedridden for years in Government hospitals. They were turned out to shift for themselves and do the best they could. Men who had been depending upon their little pensions, who were disabled and could not work, depending upon the little compensation they were getting from the Government for their living and for the support of their families, were cut out entirely or their compensation was cut down to such a point that it would not begin to support their families. That was in the name of economy, saving $400,000,000. Yet in the pending bill we authorize the expenditure of at least $470,000,000, while denying to the boys who fought in the recent World War enough compensation or pension, where they are disabled or sick, to take care of themselves and their families.

Mr. President, that seems mighty strange to me. I think Mrs. Roosevelt was right when she said that people do not think much. It seems strange that measures of this kind can be put across, the Congress of the United States cutting out $400,000,000, in the name of economy, from the pensions of those who served in the various wars, and then appropriating over a billion dollars this year for the building up of a greater navy, merely that we might have a little bit larger navy than that of Great Britain. That is why we are to build it.

Many public schools throughout the Nation are closed because the taxpayers cannot pay their taxes to support those schools. Schools are still running where the teachers have not been paid for months and months because there was no money with which to pay them. School district after school district, city after city, county after county, and State after State have appealed to the United States Congress for aid to keep their public schools going. We have no money to help keep the schools going in these various States, cities, counties, and school districts which cannot keep them going, but we have plenty of money to appropriate for preparedness for war.

A strange situation confronts us at this time. When this bill passed the House a few days ago they could not get a

record vote on it. There were not enough on the floor of the House, when the bill was passed a few days ago, to second the motion for a record vote. I am not surprised at any who were ashamed to vote for the bill, but I was rather surprised that there were not enough present who had courage enough at least to join in a demand for a record vote on the measure. We may have some difficulty in getting a vote when the bill comes up in the Senate, but we are going to try to get a record vote, regardless of who opposes it, because I believe the people of this great Nation are entitled to know how every Member of the United States Senate stands on this big-navy bill, a bill increasing the appropriations for this single year to over a billion dollars for the building up of the greatest navy on earth.

Mr. President, I have taken more time than I had expected to take, but there are one or two other points I want to make. I hold in my hand one of the little slips entitled "Information for the Press", from the United States Department of Agriculture, Office of Information, Press Service, Washington, D.C., Agricultural Adjustment Administration, January 12, 1934.

Beginning made in increasing farmer's share of food dollar.

That sounds pretty good, but they will have a hard time convincing the farmers out in the "sticks" that their dollar goes any further than it did before the so-called "new deal" program started. I was out among the farmers during the fall months, I talked with them, and almost universally they told me that their dollar did not go as far in most cases as the dollar did a year ago. This press release states:

In 1932 the farmer got 33 cents of this consumer dollar. In 1933 his share had increased, but only to 35 cents.

I think that is largely an estimate. On the average there has been an increase of perhaps a few cents on a dollar's worth; but even granting that the farmer gets 35 cents out of the consumer's dollar, that is not anywhere near enough. The spread is altogether too great yet between the price the producer gets for his commodity and the price the consumer pays. Think of it! When a farmer gets a dollar for his product—and oftentimes it takes a whole cow or steer or hog to bring that dollar—the consumer pays on the average $3 for that for which the farmer gets $1. About 35 cents of the consumer's dollar goes to the farmer who produces the raw material.

Mr. President, the farmers need some help; there is no getting away from that. Congress has seen fit to help most everyone else. Of course, we have had some assistance for the farmers, too. We passed a farm bill at the special session of Congress. It will be remembered that when that bill came to us, in the Committee on Agriculture and Forestry of the Senate we inserted another method by which the Secretary of Agriculture might increase the prices of farm products and restore the purchasing power of the farmers, and according to the title of the bill and according to those who were backing the bill the purpose of the bill was to increase the prices of farm products and thus increase the purchasing power of the farmer.

We put in another method that the Secretary might use, and that was to fix the prices of the principal farm products, based on cost of production and a fair profit, covering the amount used for home consumption in the United States. After debate on the floor of the Senate, it was adopted by the Senate. The measure went to the conferees, and the conferees struck out the cost-of-production feature of the farm bill, because, they said, the administration was opposed to it.

A little later, when the Industrial Recovery Act came along, a provision was included in it for studying the cost of production for the manufacturer, the distributor of farm products and other products, and the Industrial Recovery Act was adopted. N.R.A. codes have been put into operation under that act providing for a price based on the cost of production and a fair profit to the manufacturer, the wholesaler, the retailer, the jobber, and everybody else handling the product—to practically everyone excepting the farmer. The cost of production was all right for industry but not for the farmer. The statement is made that we do not have the money in order to assist the farmer in getting adequate prices. On the other hand, it is proposed that we shall spend a billion dollars to build up the Navy in order to defend the poor farmers who are losing their homes and their farms, to defend the poor fellows in the cities who have lost their jobs, and because they have lost their jobs they cannot pay the installments on their homes, and, therefore, they are now losing their homes, if they have not already lost them.

Mr. President, it is not that kind of defense the farmers want. It is not that kind of defense that the workers want. What they want is a square deal.

A few weeks ago a hearing was held in Washington before the Interstate Commerce Commission on general grain rates. I have a letter from one of the State railroad commission workers in my State on this subject, and the case interested me especially because from my home county in North Dakota the proposed increase in freight rates, if carried out, would result in increasing the freight rates on grain in my home county 51 percent.

The freight rate is so high now that the farmers cannot make any money on their grain at the prices they are forced to sell the grain. Yet it is said the railroads are not getting a rate sufficient to pay the cost of operation, therefore they desire to increase the freight rates 51 percent up in my county on wheat, flax, barley, oats, and so forth. I cannot see how it is figured that such action would help the farmers. I cannot see, Mr. President, how anyone can figure that the spending of a billion dollars for a big navy would help the farmers or help anyone else outside of those who make a profit in the building of the warships.

I have a copy of a speech made by the Honorable George H. Dern, Secretary of War, at the Armistice Day ceremonies at the Tomb of the Unknown Soldier in Arlington, November 11, 1933, at 11 a.m. The Secretary of War makes some very interesting statements. I desire to read a paragraph or two. After talking about the World War the Secretary said:

The post-war years form a drab, dreary chapter. After the exalted idealism of the war period—

I do not think the general public will appreciate the statement about the exalted idealism of the war period, but there were certain groups of so-called "100-percent patriots" who were exalted by the talk that we were in the World War in order to prevent war, in order to make the world safe for democracy, and all that kind of thing. That is what the Secretary of War undoubtedly referred to. He further said:

No need to recite the story. Let it be sufficient to say that the world, as seen today, was not made safe for democracy, and war was not abolished nor even made any more remote than it was in 1914. The lofty aims that Woodrow Wilson thought had been accomplished were after all not realized.

Mr. DAVIS. Mr. President, will the Senator yield?

Mr. FRAZIER. I yield.

Mr. DAVIS. I think the World War made it safe for dictators more than it did for democracy.

Mr. FRAZIER. That has been a result, yes. Whether it is safe or not I do not know. I have my doubts about dictatorship. The Secretary continues with this remarkable paragraph:

There has been too much dispute as to who won the war.

Mr. LONG. Mr. President, I hope the Senator from North Dakota is not confused over who won the war.

Mr. FRAZIER. Oh, no, I have no doubt about it. The Secretary of War has no doubt about it either, as the Senator will see as I continue reading. He said:

The plain fact is that nobody won. Everybody lost. The war was purely negative in character and the cost was ruinous. In a prolonged modern war both sides, in ultimate results, are bound to lose.

That, Mr. President, is a statement made by the present Secretary of War. He said further:

Although the United States and the nations associated with her were victorious in battle, yet they shared the terrific losses of their defeated adversaries. It could not be otherwise, with up-

wards of ten million lives lost, twenty millions injured, billions upon billions of the accumulated wealth of the world destroyed, and civilization itself disarranged. That was a terrible price to pay for a negative result.

Yes, a terrible price to pay for negative results. The Secretary states that in future wars there are bound to be the same results. Of course, in future wars there will be more losses, there will be more destruction, and the cost will probably be greater than in the last war, because great improvements have been made in the development of scientific instruments of war. Inventions have been made to conduct war by so-called "scientific" methods. It is now stated that a disease germ has been discovered which is potent enough so it can be placed in little glass test tubes, the tubes corked up and dropped from airplanes and when they strike the ground they will break open and the disease germs will spread out, and it is said that one little test tube containing such disease germs will be sufficient to kill practically every living being in a great city within a few days' time.

Yet we want to prepare for another world war.

The Secretary of War makes some other statements which are rather interesting. He says:

I have said that one of our main aims in the war was to abolish war. That sublime dream did not come true, and the age-old aspiration of the human heart for everlasting peace and brotherhood is still far away.

Yes; it is still far away. The Secretary might well have added that it will continue to stay far away as long as we continue to set the example of building a greater navy than that of any other nation on earth just because it is said we have more money than any other nation on earth.

Mr. President, I suppose our indebtedness probably is not taken into account when the wealth of our great Nation is considered. But because we are a wealthy Nation we can have a navy just a little bit larger than Great Britain's. Great Britain has boasted for generations of being queen of the seas; yes; and having a larger navy than any other nation on earth; and now we are going to change this situation about and let Uncle Sam strut as the king of the seas, with the largest navy in the world if the rest of this billion-dollar appropriation is put through.

Mr. President, it seems to me in summing up the situation that it is absolutely unfair and unsound to pass a bill of this kind authorizing an appropriation that will bring this year's appropriation to over a billion dollars for the Navy. And that in spite of the fact that there is no apparent danger from any source of an attack upon the United States. If there is such danger of attack I do not know where the attack is coming from. No one can convince me that Great Britain has any thought of attacking the United States. Then why must we have our Navy just a little bit bigger than that of Great Britain? No one can make me believe either that Japan will attack us. I know Japan is a warlike nation, but I do not believe that Japan wants to attack the United States. Our Navy at the present time is greatly in excess of that of Japan.

If we continue to build, of course, we shall make them that much larger; but, in my opinion—and I know in the opinion of many others—there is no prospect whatever of war at the present time; and yet we are told that we must prepare for war; yes, we must build the largest navy that we have ever had or that any other nation has ever had, and so defend this country. Prepare for defense, it is said, but it just does not work out in that way, as past history has abundantly proven. Those who have been prepared for war have been the ones that have gone to war, and, as Secretary Dern states, even though they won the battle they have not won the war because of the economic results that naturally follow the termination of great wars.

Mr. President, I shall now take no more time on this subject, but may later on discuss some other phases of it. I have some amendments which I desire to offer if I can get an opportunity to do so.

Mr. BORAH obtained the floor.

Mr. NYE. Mr. President, will the Senator from Idaho yield to me?

The PRESIDING OFFICER. Does the Senator from Idaho yield to the Senator from North Dakota?

Mr. BORAH. I yield.

Mr. NYE. During the discussion of my colleague [Mr. FRAZIER] the Senator from Washington [Mr. BONE] made inquiry as to what the national debt was in 1914. I undertook at the time to draw upon my memory, which I find was very faulty. I now desire to state that the national debt in 1914, the statistics before me reveal, was $1,188,235,000.

Mr. BORAH. Mr. President, I desire to discuss a subject which seems to me entirely relevant to the bill which is now before the Senate, and that is the position, power, and influence, and activities of munition manufacturers in the building up of armaments, and in questions affecting peace and accord between the nations of the world. So long as the munition manufacturers exercise the influence which they now wield with governments we shall make little progress in reducing armaments or holding navies down to a reasonable program. It is well known that one of the great contributing causes to the World War was the naval race between Great Britain and Germany. But the naval building program of itself, in my opinion, did not so much contribute to the estrangement and the ill feeling between Great Britain and Germany as did the propaganda, sordid and vicious, which was constantly in those days disseminated by the munition manufacturers. They carried on with ability and persistency a campaign of misrepresentation.

It is now known that many of the reports which went to Germany as to what Great Britain was doing with reference to preparation for war and which went to Great Britain as to what Germany was doing with reference to the building up of her navy and her preparation for war constituted false propaganda, issued and disseminated by the great munition manufacturers of Europe. They were seeking a market for their instruments of murder and that market was war. Those men then, as they do today, held positions of great prestige and influence, and they were often successful, as I believe they are at this time, in inducing public men and statesmen to accept as facts the baseless statements of their false propaganda. When one turns back and reads the numerous statements, some of them made by public men in England, as to the program of Germany and vice versa the program of England, many of them are now found to be utterly unfounded. It is also true that those which were unfounded and have been shown in history to be without support came from those who were interested in selling munitions to the respective nations.

I read yesterday in one of the newspapers a statement coming from an admiral of the Japanese Navy which is so similar to the statements made prior to the actual breaking out of the great World War that one is prone to believe that it had its inspiration in the same source as had those which preceded the outbreak of that war. The Japanese admiral says:

The United States has now restored normal relations with Soviet Russia. We naturally think that the restoration of normal diplomatic relations between them, two good neighbors of Japan, involves a scheme to surround Japan for some military purpose.

In other words, it is now being propagandized that the recognition of Russia by the United States has as its ultimate object and purpose the surrounding of Japan for military purposes.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. CLARK. Has it not been the Senator's observation that for the last 25 years, at least, every time a big Navy bill came before either the House or the Senate of the United States it was invariably accompanied by propaganda as to the possibility or probability of a war with some foreign power, usually with Japan?

Mr. BORAH. Yes; that is true. The first disagreement I ever had with President Theodore Roosevelt was when a vessel-building program was proposed in the Senate. When

I expressed my disapproval of it I was informed that we were upon the verge of a war with Japan.

I was proceeding to say, Mr. President, that this statement purporting to come from an admiral of the Japanese Navy, in my opinion, is the result of some such propaganda as that which emanates from munition manufacturers of the world. No sane, thoughtful, healthy mind knowing anything about the attitude or disposition of the people of the United States would for a moment entertain the view that the recognition of the Soviet Government by the United States had an ulterior purpose with reference to Japan or that we in doing so entertained anything in the way of an unpeaceful attitude toward the people of Japan. The people of the United States desire nothing but peace with reference to the great Japanese nation, and those who disseminate the propaganda that we are disposed to formulate our policies and our program with a view of attacking Japan must do so not because they are misled, but because they have sordid ulterior motives such as have characterized the great munitions manufacturers throughout the history of the world whenever an occasion of this kind has arisen.

Mr. BONE. Mr. President, will the Senator yield?

Mr. BORAH. I yield.

Mr. BONE. May I express the hope that as the Senator from Idaho proceeds he will discuss the feasibility of this Government preparing for war in its own plants? I mean by that, the public manufacture of munitions and the instrumentalities of war. I think it will be opportune to discuss that question at this time, in face of the pending bill.

Mr. BORAH. I thank the Senator. I am of the opinion my general proposition may include the suggestion of the able Senator.

Mr. President, everything at the present time points unfortunately to a naval race, to a competitive naval-building program. I do not know what can be done, or whether anything can be done to mollify the situation, but I do think that, in view of the circumstances as they now present themselves with reference to the naval-building programs of several great nations, it is worth while to stop and consider what we can do with reference to controlling the evil, pernicious influence of those who will make vast gains in case a disturbance shall occur. A naval-building program means that the munition manufacturers will aggravate the situation in every conceivable way.

A short time ago one of the leading statesmen of Great Britain, Winston Churchill, declared that Great Britain should denounce the London Naval Treaty in order to enable Great Britain to build a navy in proportion to her needs and in harmony with her desires.

We are informed by the press that a very strong sentiment now obtains in Great Britain with a view to denouncing that treaty. On yesterday the ex-Premier of Great Britain said:

> An understanding on armaments is also remote and the present situation will inevitably lead to a competitive increase in arms. Agitation in Britain for a more powerful air fleet and a larger number of cruisers is growing in momentum and its influence will be felt in the coming budget.

In the magazine known as "Contemporary Japan" we read an article by a prominent Japanese publicist who said:

> It is for this reason that the present writer wishes to state that Japan cannot accept any arrangement at the forthcoming conference which seeks to perpetuate the present ratio of 5–5–3, the inadequacy of which for purposes of Japan's national defense he hopes to demonstrate in what follows.

A vast amount of material might be gathered and presented to disclose that at the present time we seem to be entering upon a real naval race or a competitive armament race instead of making progress toward disarmament. A naval race or anything which looks like a naval race is a Christmas holiday season for the munition manufacturers. They take advantage of that kind of situation to circulate just such statements as I read a few moments ago as to the evil purposes of the United States in recognizing Russia, and to circulate such statements as are calculated to augment the purposes on the part of the respective nations to build armaments and to bring about a greater estrangement and a deeper feeling of resentment on the part of the respective nations.

I have reached the conclusion that it would be about as absurd to turn the War Department or the Navy Department over to private interests as it is to leave the manufacture and sale of the instrumentalities of warfare in the hands of private interests. The influence of these interests is so very great that they can directly shape and dominate the policy of a nation toward war and away from peace. Yea, more, they can shape and dominate the policy with reference to budgets for armaments. So long as that is true—and it will be true so long as profits are made out of war; so long as war means vast gains, so long as vast corporations have the influence which they have, that will continue to be true, and the only remedy, in my opinion, is for the Government to take control and dominate the manufacture and output of armaments, either naval or land. This can be brought about by the Government manufacturing armaments or by adopting a policy of licensing under which the Government could control the amount of armaments built and when and to whom they might be sold. This would involve our establishing our own policy and, if possible, extending the policy through treaty. In some way we should seek to eliminate profits in the matter of manufacturing the instrumentalities of warfare.

Let us survey some of the facts with reference to the armament manufacturers and the influence they exert upon the expenditures which the people are called upon to make for navies and armies, and the influence which they exert in breaking down disarmament conferences, in blocking all efforts to bring about peace and a better understanding among the nations of the world. Armament manufacturers are in every sense of the word international criminals engaged in disseminating such false facts as are calculated to bring their fellow man into war. When they bring him into war they reap the reward of their influence.

During the period of depression, while millions of men and women walk the streets ill-clad and half-starved, while governments have been unable to pay their debts, while educational institutions have been starved of funds, it is a fact that the munition manufacturers have been realizing profits of 12 and 20 and 30 percent during the entire period of the depression. While the world was struggling to get from under the catastrophe of the great World War and to relieve itself of the untold and immeasurable burdens which it imposed, these manufacturers have been engaged in disseminating the news which brings another world war. I know of no way to restrain or control them except for the Government to take from them the power to manufacture, to take it over by the Government or to take it under license so they can put out only the amount which the Government itself determines they shall put out.

In an article which appears in this month's Fortune, a great publication which came to my desk today, I read:

> According to the best accountancy figures, it cost about $25,000 to kill a soldier during the World War. There is one class of big business men in Europe that never rose up to denounce the extravagance of the Government in this regard, to point out that when death is left unhampered as an enterprise for the individual initiative of gangsters, the cost of a single killing seldom exceeds $100. The reason for the silence of these big business men is quite simple: The killing is their business; armaments are their stock and trade; governments are their customers; the ultimate consumers of their products are, historically, almost as often their compatriots as their enemies. That does not matter. The important point is that every time a burst-shell fragment finds its way into the brain, the heart, or the intestines of a man in the front line, a great part of the $25,000, much of it profits, finds its way into the pocket of the armament maker.

It is not alone that they are engaged even at a reasonable profit in an enterprise which would be a matter in itself sufficiently serious for consideration, but the exorbitant profits and gains which they make in furnishing instruments to maim, to destroy their fellow men, is something almost unbelievable.

> For without a shadow of a doubt there is at the moment in Europe a huge and subversive force that lies behind the army and counterarmy of nations: Their mines, smelters, armament works, holding companies, and banks, entangled in an inter-

national embrace, yet working inevitably for the destruction of such little internationalism as the world has achieved so far. The control of these myriad companies vests, finally, in not more than a handful of men whose power, in some ways, reaches above the power of the State itself. Thus, French interests not only sold arms to Hungary in flat violation of the Treaty of Trianon, but when Hungary defaulted on the bill the armorers got the French Government to lend Hungary the money to pay the French armorers.

They are proceeding in utter disregard of treaties. No treaty, no law made by man or God, controls them, and when the default arises, growing out of the violation of the treaty, they have sufficient influence upon their government to make their government, their own taxpayers, get behind the default which has resulted from the violation of the treaty. They break down laws; they break down governments; they kill human beings; they trample upon everything which gets in their way, human or divine; and they do it for gain—nothing but sordid gain.

Thus, too, the great Czechoslovakian armament company, controlled by Frenchmen, promoted the rise of Hitler in Germany, and contributed millions of marks to Hitler's campaign.

Manufacturers of armaments in France promoting the rise of Hitler in Germany; manufacturers of armaments in France shipping armaments to Hitler, and then contributing millions of marks to Hitler's campaign!

These same Frenchmen own newspapers that did more than any others to enrage France against Hitler. It is time we had a dramatis personae of arms, and the men.

Now, what is the game? Here are France and Germany in a tense situation, the result of centuries of disagreement. The munitions manufacturers ship armaments to Germany, to Hitler. They have the influence to help build up the Hitler regime. They loaned money to the Hitler campaign, not because they cared for Hitler but because they knew it would furnish a place to sell their armaments. They betray their own country; they sell their own people's security; they coin the blood of their fellow citizens.

Capone, Dillinger on the highway, are not more heartless and bloodthirsty than the man who builds up armaments in another nation for the purpose of sending his own people to the front that they may furnish the means by which to murder them.

This magazine—this is a most extraordinary article, and I shall read only brief paragraphs from it—gives a list of the different munitions manufacturers—the Krupp people in Germany, the Bethlehem Steel Co. in this country—and, on that subject, says:

We have * * * our Colt's Patent Firearms Manufacturing Co., which supplies machine guns as well as squirrel rifles, which declared an extra dividend in 1933; our Remington Arms Co., * * * whose output of firearms and ammunition together is one third of United States production. And we have our Bethlehem Steel Co.

Bethlehem's Mr. Charles M. Schwab dismayed the cadets of West Point in 1927 by saying: "Today the Bethlehem Steel Co. has definitely abandoned any thought of ever again engaging in the manufacture of ordnance except in times of great national emergency." Such times are apparently with us now—have, in fact, been continually with us since Mr. Schwab unloosed this shaft of oratory. In the official listing of Bethlehem's products * * * you will find armor plate, projectiles, gun and shell forgings, battleships, battle cruisers, scout cruisers, destroyers, submarines, and airplane carriers, all listed as products of Bethlehem's plants—

And so forth.

Then we have a description of Vickers-Armstrongs in England. This article says:

The sun never sets upon Vickers. It has its factories in Rumania where, for greater convenience, Sir Herbert Lawrence is a director of the Bank of Rumania (and Vickers to some degree allies itself with the Czechoslovakian armament firm of Skoda). In Italy it latinizes its name to Società Vickers-Terni; in Japan it has as a subsidiary the Japan Steel Works, and thus allies itself with the Japanese armament and industrial firm of Mitsui. There are Vickers factories or subsidiary companies in Spain, Canada, Ireland, Holland * * * and New Zealand.

In other words, while the pantomine called the "International Disarmament Conference" is going on in Geneva, this tremendous power located in Great Britain has spread out its network into every nation in the world, and is interested in selling its armaments and is selling its armaments, fit for no other purpose than carrying on war, to all the nations with which the conference is undertaking to bring about disarmament.

Through these industrial and financial interlockings, Vickers-Armstrongs conducts its affairs. They are profitable affairs—for as the agreement with Sun Insurance indicates, a profit of some $4,500,000 a year is considered so unsatisfactory that insurance must be carried against it. And England's aristocracy takes pleasure in clipping its coupons. Among the more prominent shareholders of Vickers or allied concerns in 1932 were: Right Honorable Neville Chamberlain, Chancellor of the Exchequer; Sir Austen Chamberlain, M. P., winner of the Nobel Peace Prize in 1925; and Sir John Simon, Secretary of State for Foreign Affairs (but who sold out his shares last year). In 1914 the list was even more imposing. It included that lofty philosopher, Lord Balfour, * * * Lord Curzon, and also Lord Kinnaird (president of the Y.M.C.A.), three bishops, and Dean Inge, of St. Paul's. It was in that same year that Socialist Philip Snowden spoke in Parliament:

Listen to his words:

It would be impossible to throw a stone—

Says the ex-Chancellor of the Exchequer—

on the benches opposite without hitting a member who is a shareholder in one or the other of these firms.

Great opportunity to disarm. No wonder the disarmament conference and disarmament have come to be a kind of an organized piece of hypocrisy. There is lying back of it, constantly in operation, the influences which work against anything in the nature of disarmament. It is not to their interest to see disarmament. They see, therefore, that nothing is really accomplished; and there, Senators, is the influence which in some way or other men must control before we will secure any success in disarmament; and, secondly, before we will have any real assurance of amity among the nations of the world.

What does a declaration of good will, such as the President of the United States announced when the recognition of Russia took place, amount to in the way of arousing friendly feeling and sentiment as against what is given out, purporting to be the actual fact, that the United States is seeking to surround Japan and to enforce her military dominance upon Japan? A more cowardly or infamous falsehood could not be circulated, and yet you can imagine what effect it has among the masses in the great nation of Japan. If the lips which publish or pronounce such falsehoods cannot be silenced—and they cannot be silenced so long as there is gain—we will not have any real amity or good will among the nations of the world.

Another paragraph or two from this article, which I trust will be very generally read, and I shall pass from it.

This article says:

France stands at the very top. She stands at the top in the amount her Government spends on armaments; at the top in the amount of arms she exports to other nations; at the top also by virtue of the billion francs she has spent to build a military Chinese wall of forts, many of them underground, along her eastern boundaries.

We read just a few minutes ago how, at the very time France was seeking to make herself secure against the invasion of Hitler's forces, the French manufacturers were selling armaments to Hitler, and were furnishing money for Hitler's campaign. What a medley of crime!

She stands today as a queer paradox: France, the democracy, a quiet pastureland for the world's most famous peasantry, coexisting with France, the greatest military power of modern times, with an army which all but equals in number and far surpasses in equipment Germany's vast militaristic machine of 1914.

At the head of this latter France stands the figure of Gen. Maxime Weygand (vice president of the higher war council, inspector general of the army, possessor of the grand cross of the legion of honor, member of the French Academy), ruling an army (including colonials) of 650,000 men. But, despite his decorations, his medals, his orders, and the power he has, once a new war begins, to order several million men to death, General Weygand * * * represents not the urge for war but, on the contrary, France's desire for peace—by means of security. The French threat to the peace of the world lies elsewhere—in France. For in France, and only in France, a new situation exists: The armament makers are no longer, like Alfred Krupp or Sir Basil Zaharoff, in his younger days, humble petitioners of government, hat-in-hand solicitors of orders—their influence is so infiltrated into the industrial, social, and political affairs of the nation that they have

power in some ways beyond the state; a power so mighty that they are all but able, for their own individualistic reasons, to sweep the state along in a course of action against its own will.

They are displeased by publicity and are well able to enforce their displeasure. But we must now displease one of them and present the figure of M. Charles Prosper Eugène Schneider.

Charles Prosper Eugène Schneider is a man of many offices—the executive head of hundreds of armament firms throughout Europe. He is the president of the Schneider-Creusot Co., armament manufacturers with mines, smelters, and foundries scattered throughout France. He is director of the Bank de l'Union Parisienne, one of whose most profitable sources of business is the financing of loans for armaments. In 1920 he founded and became the president of l'Union Européenne Industriale et Financiére—a holding company capitalized at 140,000,000 francs. Through it Schneider-Creusot controls 182 French companies that manufacture heavy ordnance, machine guns, tanks, shells, ammunition, and warfare chemicals. Out of the $300,000,000 which, at the most conservative guess, represents the annual billing of France's armament concerns, Schneider-Creusot or subsidiaries take the lion's share.

But l'Union Européenne has an even more important function. Through it Schneider-Creusot reaches out to control 230 armament and allied enterprises outside France. The greatest of these concerns is that glittering jewel in the crown of the principal ideal state that came into being in 1919 as the result of the self-determination of oppressed people. The state is Czechoslovakia, and its jewel is Skoda.

In other words, the French control the munitions manufactures of all the nations now allied with France, either directly or indirectly, in what we might call a "military alliance."

Mr. SHIPSTEAD. And they are also members of the League of Nations.

Mr. BORAH. Yes; France is for the League.

Let me read what Lord Cecil said on the question of disarmament, speaking sometime ago.

Therein lay one difficulty. But why could concerted action toward disarmament make so little progress?

One important reason was first laid bare by Lord Robert Cecil. He said:

There is a very sinister feature to all the disarmament discussions. I refer to the tremendous power wielded against all the proposals by armament firms. We must aim at getting rid of this immense instrument in the maintenance of suspicion. Yet in 1932 the Disarmament Conference was enriched by the presence of Mr. Charles Dumont of Schneider-Creusot, president of the Schneider-controlled Banque Franco-Japonaise, on the French delegation. The British delegation was similarly benefited by the advice of Col. A. G. C. Dawney, the brother of a director of Vickers-Armstrongs, and now the political supervisor of the British Broadcasting Corporation.

If the armament business were conducted by an outlawed band of international gangsters, the problem would be simple to define. The difficulty is that precisely the opposite is the case. The armament business is a part of the most essential industries of industrialized nations—steel and chemicals. But even so the problem does not become acute until you have a nation in which the biggest part or a very, very large part of these essential industries is the manufacture of the actual munitions of war. Such is the case in France, and also in Czechoslovakia.

Also in Great Britain, also to a marked extent in the United States. And yet we talk about disarmament and peace.

I said a few moments ago that during the depression these great munitions manufacturers have enjoyed a profit of from 12 to 20 and 30 percent. That is not to be compared, however, with the profits they enjoy during a struggle in any part of the world, and particularly when it is a struggle such as that which began in 1914.

Mr. President, I venture to believe, and I have no hesitancy in saying, that when we shall have passed this bill, we will see circulated by someone interested in these munition manufactures, possibly imposing upon public men sufficiently to believe that they are true, statements to the effect that the United States, in addition to recognizing Russia for the purpose of aggression upon Japan, is completing her Navy for the purpose of attacking Japan; and against that the world must be prepared to stand, or we will drift into a situation which we and the whole world may have cause to regret.

Mr. President, I read a paragraph or two from other publications. I now read from an article appearing in the Living Age, from an article issued by the Union of Democratic Control, London. I read briefly:

While scientists, acting on the instructions of the politicians, make war more and more deadly, the armament manufacturers and the makers of material essential to this manufacture watch their profits grow. While almost every other form of industry is in the slough of depression, the shares of armament firms improve in value.

The Aeroplane, a paper which may be fairly described as the unofficial, and sometimes surprisingly outspoken, voice of the Air Ministry, says:

The manufacturers of both aeroplanes and engines may hope for increased turnover and profits a year or so hence when the Disarmament Conference has faded out and the program of expansion (of armaments) is allowed to proceed.

Does anyone suppose that they are listless or indifferent in seeing that the Disarmament Conference fades out? Has anyone any doubt that the inability of these nations to get together has been largely influenced by these same forces? The peoples of the world do not want to go to war. As Woodrow Wilson once said, the peoples of the nations do not make war. They desire peace. But they are not permitted to have that which they desire, because sitting on the throne of power, speaking from the source of authority, are those who make their unspeakable fortunes out of the fact that we do not have disarmament, and that we do not have peace.

I quote from an article by George Hoog, on Steel Against Peace, the following:

During the last half century many monarchies have collapsed, but monarchy itself is not dead. It has simply changed its name. We are now living under a capitalistic monarchy which, like all others, has its kings and dynasties. It even has its princes of the blood, cannon merchants, the purpose of whose industries is to fill the charnel houses of all nations impartially by means of war. They are the real aristocrats of modern times. Before the war they included four principal dynasties:

Vickers and Armstrong in England, Schneider in France, Krupp and Stumm in Germany, and Putilov in Russia. Naturally the governments treated such powerful families like aristocrats.

In fact, all governments did them honor, no matter what the nationality of these princes of the blood might happen to be. For princes demand international courtesy.

Thus Napoleon III made the head of the Krupp dynasty an officer in the French Legion of Honor. And, of course, the German Emperor had to treat the Krupps at least as well as the French Emperor did, so that William II offered one of the Krupps the title of prince. But, since Krupp was more accustomed to financial activity than to court titles, he refused the honor. However, he accepted for his daughter what he had refused for himself.

Again, this article says:

The question of the labor member of Parliament from Liverpool applied to English industrialists. Here is something about French industrialists. "We bring back from Geneva", wrote the deputy, Pierre Cot, in the Republic for February 21, 1932, "a piece of information that stands in no danger of being denied. Here it is: The House of Schneider has received orders for heavy artillery from Japan."

One of the gentlemen attending the Disarmament Conference was unable to bring anything home of any moment with reference to peace, but he was able to notify his associates and those in interest that he had brought home a large order for military supplies to Japan, and our people, our own manufacturing institutions, are now selling on a very large scale military equipment in the Orient, to both Japan and China.

Mr. President, I have no expectation whatever of any contest or conflict between the United States and Japan. I do not believe that even the munitions manufacturers can bring about such a war. Suppose, however, it should happen. Suppose such a war should come. The American soldier would be torn limb from limb, disemboweled by the munitions sold by his own compatriots in the United States to the enemy. And if war should come, even the approaching hour of conflict would not stay the insatiable greed of the men engaged in the manufacture of munitions. To the very hour when the embargo would be laid they would be selling and sending away their munitions, which munitions would be used for the purpose of enabling the enemy to destroy the American boys.

Mr. President, the thought of making profits out of war, of building fortunes out of the misery and the sorrows of the maimed, the broken in health, and the insane is revolting enough to anyone who has left in him a spark of human

sympathy or a sense of decency. But to foment discord and to spread false and sordid statements, to engender bitterness and suspicion and hate and fear among nations, all that such profits may be made and enlarged reaches the dead level of human depravity. There is nothing lower in the scale of human avarice.

Mr. President, I ask permission to print two editorials from the Baltimore Sun.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

[From the Baltimore (Md.) Sun, Mar. 4, 1934]

REPETITION

The State Department's latest announcement of American policy on disarmament repeats in weariness what President Roosevelt said with enthusiasm in his address to the heads of all nations on May 16 last.

Much water has gone over the diplomatic dams since that earlier pronouncement. Speaking through Norman H. Davis, our Government has offered to modify its traditional doctrine about the freedom of the seas as our contribution to the solution of Europe's problem of security. Europe in its turn has gone from hope to despair as a result of Hitler's disturbing influence on German policy. The Disarmament Conference, which the President sought to save by his proclamation of last May, is now concerned more with finding a formula to camouflage its failure than with concluding a treaty of positive disarmament. It is not surprising, therefore, that the State Department should be disposed merely to reiteration of what has been said before. Nor is it surprising that our policy should seem to be inspired by benevolence rather than by determination.

The negotiations of the Disarmament Conference are now in reality subordinate in importance to the question of German policy. It may be possible for the conference to find some way to check the rapidity of the rearmament to which the Hitler government in Germany is dedicating its energies. But positive reduction in the forces of any of the other European governments seems out of the question in the light of the new German attitude. And as for a pact of nonaggression, do we not already have the Kellogg Pact outlawing war as an instrument of national policy? If the nations will not honor that, of what avail to create another obligation of the same tenor?

This is not to say that any blame attaches to our own Government for the impasse which exists. Washington has done its part by the Disarmament Conference time and time again. President Hoover presented a formula in 1932. Mr. Roosevelt presented another in 1933. There have been occasions when we seemed to move half-heartedly and when a little more get-up on the part of our spokesmen might have exercised a favorable influence. But, by and large, the distressing situation by which we are now confronted is due not to anything in the disarmament negotiations in themselves, but to the failure of Europe to make readjustments in the post-war system while there was yet time.

Our own intransigeance on debts and reparations perhaps contributed to the failure, but our course in the Disarmament Conference is, at least, as clear if not clearer than that of any other first-rate power.

[From the Baltimore Sun of Feb. 12, 1934]

TRAGIC NAVAL POLICIES

Next year or early in 1936 there should be held a new naval conference for the purpose of revising and extending the Washington and London treaties. We say "should be held" and not "will be held", for there have lately been accumulating many indications that the conference may never be called. In that event the existing naval treaties will automatically lapse and we shall then without question be treated to a spirited competition in ship construction such as the world has never witnessed. And for this, if it really comes to pass, we will have the tragic naval policies of the three great maritime powers to blame.

The British, strangely enough, have until now pursued a less aggressive course than either of their two rivals. Although the admiralty and an influential section of the press, disturbed by the huge American and Japanese programs, have been demanding new ships, the MacDonald-Baldwin government has been reluctant to encourage them. The British program has been expanded somewhat, but by no means on a scale comparable with the Japanese and American extensions. Now, however, the British are reaching the end of their patience. Spurred on by men like Winston Churchill, who is demanding that the Geneva Conference be dropped and the naval treaties be forthwith denounced, and who is said to have the support of a majority of the Conservative (Government) Party, spokesmen for the cabinet have given notice that England will increase its armaments if its latest effort—the Simon plan providing for partial rearmament of Germany and abolition of all offensive weapons—should fail. According to Stanley Baldwin, "If we fail, the Government will feel their duty is to look after the interests of this country, first and quickly."

Meanwhile the Japanese admirals are going their perilous way quite without regard to its probable consequences. The liberal and moderate elements in Japan have been speaking out a bit more bravely of late, but this has not chastened the admirals one whit or reduced the naval budget a single yen. Though warned by business men and responsible Government officials that war will almost certainly follow if the admiralty continues along its present course, the Minister of the Navy, Admiral Osumi, has not for a moment stopped discussing the ways and means by which the Japanese Navy is preparing for what he calls "the extraordinary situation" on the seas. The Navy, he declares, will go ahead with its building plans, though it knows that these plans exceed the limits set down in the Washington and London Treaties.

Nor does there seem to be anything that will stop the Roosevelt administration. It is not yet clear whether the administration actually means to build all of the ships included in its present program or intends to keep most of them on paper for bargaining purposes at the 1935 conference. In either case the success of the conference is bound to be endangered, for it does not seem likely that real success can be built on a big-stick policy. The Roosevelt program has aroused Japanese liberal opinion to active realization of the foolhardiness of a naval race with America, but since the Japanese admirals, far from being deflected from their course, seem only the more determined to carry on with their own plans, it should be obvious that as a threat the Roosevelt program is doomed to failure.

It would be worse than futile to hold the 1935 conference with the three maritime powers in their present frame of mind. It is imperative, nevertheless, that the conference be held. Preparations should begin at once, and the first step in that direction should consist in a resolution by the three countries that in order to show they are sincere in desiring naval disarmament they will promptly call a halt to their senseless and costly building programs.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had passed without amendment the following bills of the Senate:

S. 2277. An act to establish fish and game sanctuaries in the national forests;

S. 2461. An act to amend an act entitled "An act to give the Supreme Court of the United States authority to prescribe rules of practice and procedure with respect to proceedings in criminal cases after verdict"; and

S. 2529. An act to promote the conservation of wild life, fish, and game, and for other purposes.

The message also announced that the House had concurred in Senate Concurrent Resolution 10, as follows:

Resolved by the Senate (the House of Representatives concurring), That the Secretary of the Senate be, and he is hereby authorized and directed, in the enrollment of the bill (S. 1759) to extend the time for the construction of dams and dikes in Lincoln County, Oreg., to prevent the flow of waters of Yaquina Bay and River into Nutes Slough, Boones Slough, and sloughs connected therewith, to correct an error by striking out, in line 1, of the House engrossed amendment, the words "June 13" and inserting in lieu thereof "June 17."

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 2. An act for the relief of C. M. Williamson; Mrs. Tura Liljenquist, administratrix of C. E. Liljenquist, deceased; Lottie Redman; and H. N. Smith;

S. 406. An act for the relief of Warren J. Clear;

S. 750. An act for the relief of the Lebanon Equity Exchange, of Lebanon, Nebr.;

S. 751. An act authorizing the Secretary of the Treasury of the United States to refund to the Farmers' Grain Co., of Omaha, Nebr., income taxes illegally paid to the United States Treasurer;

S. 1069. An act authorizing adjustment of the claim of the Chicago, North Shore & Milwaukee Railroad Co.;

S. 1074. An act authorizing adjustment of the claims of John T. Lennon and George T. Flora;

S. 1087. An act authorizing adjustment of the claim of William T. Stiles;

S. 1115. An act to authorize the Department of Agriculture to issue a duplicate check in favor of Department of Forests and Waters, Commonwealth of Pennsylvania, the original check having been lost;

S. 1347. An act for the relief of Little Rock College, Little Rock, Ark.;

S. 1426. An act for the relief of the estate of Benjamin Braznell;

S. 1496. An act for the relief of Nannie Swearingen;

S. 1724. An act authorizing the reimbursement of Edward B. Wheeler and the State Investment Co. for the loss of certain lands in the Mora Grant, N.Mex.;

S. 1782. An act for the relief of the B. & O. Manufacturing Co.;

S. 2201. An act for the relief of the Neill Grocery Co.; and

S. 2766. An act to extend the period during which direct obligations of the United States may be used as collateral security for Federal Reserve notes.

MAKE CORRECTION OF THE MALDISTRIBUTION OF WEALTH

Mr. LONG. Mr. President, I have presented to the Senate and there are now pending two resolutions looking toward the correction of the condition of maldistribution of wealth in the United States. On this morning our President delivered an address, a copy of which I saw some several hours ago, and I was moved to write the President a letter, a copy of which I have in my hand, which I send to the desk and ask to have read.

The PRESIDING OFFICER. Without objection, the clerk will read, as requested.

The legislative clerk read as follows:

UNITED STATES SENATE,
Washington, March 5, 1934.

Hon. FRANKLIN D. ROOSEVELT,
President of the United States,
Washington, D.C.

DEAR MR. PRESIDENT: I have a copy of the speech delivered by you this morning over the radio. In it you said:

"We undertook by lawful, constitutional processes to reorganize a disintegrating system of production and exchange * * *. The reorganization must be permanent for all the rest of our lives in that never again will we permit the social conditions which allowed the vast sections of our population to exist in an un-American way, which allowed a maldistribution of wealth and power."

Many of us are happy, Mr. President, that you again take occasion to pronounce against maldistribution of wealth in the hands of the few brought on in this country through the means as you indicate.

We are clearly of the view that you would wish the lawmakers of this Congress to correct the maldistribution of wealth, but possibly there are some who might not be so convinced, notwithstanding your expressions, unless you so advised.

Can it be announced, in following up your declaration of today, that you would desire this maldistribution of wealth and power corrected by this Congress?

Assuring you that such a pronouncement made open to this Congress would gladden the hearts of the millions suffering from such maldistribution, I am, my dear Mr. President,

Yours sincerely,

HUEY P. LONG,
United States Senator.

REKINDLE THE FIRES OF AMERICA'S DREAM OF 1776

Mr. LONG. Mr. President, the foundation upon which this Government rests is the guaranty to humanity in the Declaration of Independence. It says:

> We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness. That to secure these rights—

Of life, liberty, and happiness—

> governments are instituted among men, deriving their just powers from the consent of the governed. That whenever any form of government becomes destructive of these ends—

Of life, liberty, and happiness—

> it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness.

Which meant no less than among mankind all should be brothers—every man a king.

Gentlemen of the Senate, I call your minds to the fact that too long have we praised the form and forgotten the substance of our Government. The spirit and purpose of this Government is pure, wholesome, and all sufficient for the human beings of this country to be fed and clothed, to be given the liberties of free people and the things which go to make them happy. This principle, upon which our forefathers rested this Government, was the same as a written insurance policy to every child. On the day of birth, it said to the new-born babe:

> You are created equal with all the balance; you are guaranteed life, liberty, and happiness so long as you do nothing to take away that right from someone else.

And our Declaration of Independence, from which I have just read, declares that the form of our Government is set up only as a means of carrying out that principle and purpose, and that Declaration says that when the form does not serve to that end, that it is the right of the people to change or abolish it for another one that will protect, safeguard, and promote human rights. The Government therefore rests upon humanity and not upon form, for, says this Magna Carta of our Nation, we have made and constructed this vehicle of government that shall distribute the blessings which have been guaranteed to our people, and, when this vehicle breaks down, or when some few get hold of the drivers and will not let the vehicle serve anybody but themselves, then the human family of American people will have to force such a change as will serve their needs.

If the form of our Government has been so rigged and perverted as actually to deny the human purpose of this society, then that corruption can be, should be, and must be swept aside for the life, liberty, and happiness guaranteed to our people.

If legislative bodies, executives, or courts should hold that there are forms of law which prohibit all the people, through their government, from being supplied with a fair share of the things with which God has blessed this country, then such rulings of the powers, whoever they may be, would cause to turn over in their graves those sleeping patriots who wrote: "All men are created equal, endowed by their Creator with rights of life, liberty, and happiness. * * * To secure these rights, governments are instituted among men. * * * Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it."

The failure of government to take the steps necessary to guarantee life, liberty, and happiness to all our people is just as bad as though we did something to keep the people from having those rights. The sad fact is that on many occasions our laws have been used actually to keep the common run of mankind from enjoying what they were told they should have since July 4, 1776.

Once each year on our great national holiday, the Fourth of July, we celebrate the signing of the Declaration of Independence. Why do we celebrate it? Because it marks the anniversary of the day when the people of America threw down the gauntlet to a tyrant 3,000 miles away and said:

> The government has not given us life, liberty, and happiness; it has not served the cause of equality among mankind; we are, and of right ought to be, free and independent; we declare ourselves organized into a government to promote equality among human beings and to guarantee those inalienable rights of life, liberty, and happiness to our people; and we say more, that it is the right of the people to change or get rid of any government that fails to hold such rights sacred for all persons walking the face of this American earth.

How, now, should we celebrate the 4th of July? Can we nail a placard across the canopy of heaven on that day to read:

> This anniversary is to remind that on July 4, 1776, we set the standard that all men are created equal, with the inalienable right of life, liberty, and happiness to all.

What would be the response if we dared to say to our people just what it is we are supposed to be celebrating?

Would the tens of millions who have searched for a living, for something to do, so that they could make a living for their families, understand that kind of a celebration? Would the man and woman who have struggled for a lifetime understand why, if we celebrated such an accomplishment, they had no food or clothes for themselves and those whom they were struggling to rear in this world? O Senators, would the children of tender years grasp what it was all supposed to mean when millions of them are born to starvation, raggedness, homelessness, and while others are born to a life where there is so much about them they see little use for it all?

And how could we who sit in this Chamber, which before these days when we abdicated so many of our functions to others was called the forum of the highest legislative tribunal in all the world, knowing what is happening in America today, how could we go before the American people on the anniversary of July 4 and say:

We are celebrating this day with you because, in our work, we have kept the standard straight that all men are created equal and because we have fulfilled that guaranty of life, liberty, and happiness to the people.

Here in this land where there is too much to eat and wear and an oversupply of houses of all kinds, here where we have more than all Americans can consume, blessed by God with everything in superabundance, the land flowing with milk and honey, how can we tell anybody there is a semblance of equality or justice, how can we say to our people they have been protected in their rights to life, liberty, and happiness when there is starvation, nakedness, and homelessness in this land of too much of everything?

I could not say any such thing to the people. None of you here can say it.

In 1929, when the fortune holders of America grew powerful enough that 1 percent of the people owned nearly everything and 99 percent of the people owned practically nothing, not even enough to pay their debts, a collapse was at hand.

There is no rule so sure as the one that the same mill that grinds out fortunes above a certain size at the top grinds out paupers at the bottom. The same machine makes them both; and how are they made? There is so much in the world—just so much land, so many houses, so much to eat, and so much to wear. There is enough—yea, there is *more*—than the entire human race can consume if all are reasonable.

All the people in America cannot eat up the food that is produced in America; all the people in America cannot wear out the clothes that can be made in America; nor can all the people in America occupy the houses that stand in this country if all are allowed to share in homes afforded by the Nation. But when one man must have more houses to live in than ninety-nine other people; when one man decides he must own more foodstuffs than any other ninety-nine people own; when one man decides he must have more goods to wear for himself and family than any other ninety-nine people, then the condition results that instead of one hundred people sharing the things that are on earth for one hundred people, one man, through his gluttonous greed, takes over ninety-nine parts for himself and leaves one part for the ninety-nine.

What can this one man do with what is intended for ninety-nine? He cannot eat the food that is intended for ninety-nine people; he cannot wear the clothes that are intended for ninety-nine people; he cannot live in ninety-nine houses at the same time; but, like the dog in the manger, he can put himself on the load of hay and say, "This food and these clothes and these houses are mine; and while I cannot use them, my greed can only be satisfied by keeping anybody else from having them."

Wherefore and whence developed the strife in the land of too much? Because, by action or inaction, this Government had either provided for just such a thing to happen or else had not provided against a few owning all and the masses owning nothing above their debts.

The gangsters have killed hundreds, maybe thousands, to carry out their nefarious rackets to extort money.

The hoarders of wealth have destroyed humanity by millions in their quest for greater accumulation.

From the new-born babe to the man bowed with age, some have been denied the sustenance for life; they have been thrown from the shelter above their heads; to keep children warm, they have been placed in the ground; to start life not in the cradle but in the grave; half-naked bodies have been thrown against the winter's wind; some have become beggars, some thieves, and some have been murderers; others have been driven insane and still others to suicide—all in the wake of the drive that the masters of fortunes may own and control so much that, even in the land of too much to eat and too much to wear, people perish in their shadow.

Jefferson, Jackson, Webster, Lincoln, Theodore Roosevelt, and Bryan have clamored to spread our work and our wealth among all the people.

It is the law of God that a nation must free and refree its people of debt, and spread and respread the wealth of the land among all the people.

Mr. President, we do not need to change even the form of our Government to bring to our people all they were assured by the proceedings which set this Government in motion on July 4, 1776. We have only to relight the candle that will illuminate the lettered words of America's dream.

We can allow all our people to accumulate and grow prosperous. We can allow so much to any one person as will encourage ambition and inspire genius, but to do so there must be such a limit as will curb greed and avarice. Beyond that point where the accumulation of one becomes a menace to our society and well-being of others no one should be permitted to go. That point is reached when one man or set of men become possessed of more than they and their children and their children's children can use for all the comforts and luxuries of their lifetimes. When more than such an amount is permitted to one person, then his ambition and genius turn to the color of greed; his desire for the well-being of himself and others is turned to the ravenous avarice of hoarding to the detriment of humanity. Therein is the chance and the hope that are needed to bestir the ambition and genius in countless millions of other people, who may be of talent superior to that of any money master, crushed or suppressed without so much as an opportunity to assert itself. Much greater would be the development in science and intellect if all our millions had a fair chance to exert their genius than to confine it to the fortunate few who possess the greater amount of money.

Mr. President, we hear much about the great genius of the Morgans, the Mellons, the Rockefellers, the Fisks, and the Bakers, and are told if we were to suppress them and hold their fortunes within millions or even hundreds of millions that the world might be deprived of some scientific or financial genius that otherwise it would have. In order to give them the superior outlook of greed, we have crushed, Mr. President, the hope that would have inspired the ambition and the genius of millions of people whose talents might have given the world many, many times more than it has ever received from the Rockefellers and the Morgans and their ilk.

There is a great problem in mathematics which the talent of the world has tried to solve throughout the ages. It is said that someone found that solution, only when he had become so impoverished that he did not have the penny to buy the paper needed to make the proof of his table, and thus was the fruit of his genius denied to the world. And so it is in America today, with millions of fine young men turned into the world, trained for work in science, law, agriculture, and industry, but who, by reason of never having the chance to exert their talents, must deny to the country the benefits which some day they would be able to confer if opportunity were not in the control of a few money masters.

Oh, yes; there are occasionally some 1 or 2 or 10 who get an opportunity. Perhaps some young man makes the acquaintance in college of the son of one of these rich gentlemen; it may be that a liking and a friendship spring up between the son of the rich man and some poor fellow from the forks of the creek, and perhaps that one particular individual will be taken into some law firm or into some counting house or some other kind of institution and given a chance; but that is the exception, Mr. President; it is not the rule.

An inspired talent and encouraged ambition to 120,000,000 people would show improvement and benefit many times beyond what may come from those few whose energies can only be excited by greed. When they tell us of a need for greater desire from the few masters of finance, we tell them the need for hope and possibility that there may be such desire in the breasts of the millions. If one who is allowed to have more of this world's goods than he and his children

and their children can ever use is not encouraged enough to put forth all his efforts of genius and brawn that may be needed by the country, then it is far better that we depend upon a talent that we are sure to exert in the hundreds of millions of other people.

In line with that thought, Mr. President, this morning the President of the United States has felt inspired to say something that is not new so far as his own words are concerned. I repeat, he has not said anything new; but the President of the United States, by the words which he has uttered this morning, has reaffirmed the promise he made to the American people when he was a candidate for the office which he now holds. It was the promise of the President of the United States when he was a candidate for that high office, a promise which he reaffirmed this morning—that this party that was going to be placed in power was going to abolish poverty; and he said it in those words.

It was the promise of the President that every man needing work was going to have wholesome work to do.

It was the promise of the President of the United States that he was going to sponsor legislation designed to limit the amount which any one man could own; and those are virtually the words of the President of the United States.

It was the promise of the President of the United States that the man laboring the number of hours required of him for a day's toil would have enough from that day's earnings to provide a home and the comforts of life for himself and his family; and those are virtually the words of the President of the United States.

It was the promise of the President of the United States, Mr. President, that we were going to shorten the hours of labor in order that there would not be a surplus production as compared with consumption; and that statement virtually is in the words of the President of the United States.

It was the promise, Mr. President, of our candidate that if he were elected there was going to be given to the man plowing the soil a profit for his products above the cost of production in order that he might sustain and support the family which he was raising into this world, and before today's speech was made there was another address delivered by the President of the United States, which I have previously read on the floor of the Senate and a few lines of which I will again read. I refer to the address delivered at Chestertown, Md., October 21, 1933, as given out to the newspapers by the courtesy of the Associated Press.

I quote the words of the President:

> In wealth and education there is represented only a minority of the people; I recall the words of a professor in my school, "the wider a distribution of wealth there is in the proper way, the more we can make it possible for the men and women of the land to have the necessities of life in such shape that they will not have to lie awake at night worrying where the food for tomorrow will come from. Then, and only then, will we have the security necessary for the country."

Mr. President, notwithstanding the promise we have made to the people, notwithstanding the pledged word of the President of the United States, notwithstanding the words as they have been uttered by our distinguished Chief Executive, I call the attention of the Senate to the fact that until this time not one single thing has been done by the Congress, directly or indirectly, to take the big fortunes of this country that are cursing this land and strip them down in their size or in their power. Consequently people are still destitute, millions are unemployed, and there are starvation and misery in this land that has too much. I defy any man on the floor of the Senate or off the floor of the Senate to tell me one thing that has been done by the Congress or by any agency of the Government operating through the authority of the Congress, or any one else—one single thing that means that the fortunes of the financial classes of the country are any less than they were when we came into power on the 4th day of March 1933.

And now our President says we must not return to that old system which allowed a maldistribution of wealth and power. So said the President! We must not return to that old system of government which permitted this maldistribution of wealth and power. Then I take it, and I have the word of the Chief Executive uttered many times before, that if we are not to return to the system that allowed the maldistribution of wealth in this country, we should not silently sit here and permit the maldistribution to remain and to continue. If it was a curse for the old system to allow the maldistribution to accumulate, if it was a curse to allow the concentration of wealth in the hands of a few, then it is a curse just as much to permit it to continue after denouncing what the other men did. To this date the fruits of all financial piracy remain in the hands of the money masters.

I am of the opinion, so far as I am concerned, that nothing further need come from the President to indicate that he would desire that the Congress take action to put an end to this orgy and this agony of maldistribution of wealth brought on by the old system. I say that, so far as concerns myself, I need no further light, I need no further advice, I need no further information to convince me, not only by reason of the statement made by the President today, but by reason of the many other statements and promises which he has made, I need nothing further to come from the President to convince me that he wants something done by the lawmaking body of this country to break up the maldistribution of wealth.

I would not think for a moment that the President was of such a single-track mind that he would curse the administration of the past for permitting a condition to go on, and then do nothing himself to break up what he has said is a menace to the country. I think I know our candidate, I think I know our Chief Executive, too well to believe that he would say to the people of America on this very day on which I now stand on the floor of the United States Senate that this old orgy which permitted the maldistribution of wealth must not be allowed to come back into power and then to believe that the President would mean that the present Congress of the United States should sit supinely by and allow the fortunes of the mighty to continue to curse the country. Such an inaction by this Congress would be just as bad as inaction by the Congresses which preceded us and which allowed this condition finally to come to where we now find it.

Mr. President, on the word and authority of our Chief Executive and the promises of our party, I have undertaken to bring action by the Congress. I have introduced resolutions. I have, I might say, reintroduced resolutions which I offered to the Senate a few days after I became a Member of this body, long before the last national election. I have proposed to limit the amount which one man may own. I do not pride myself as being possessed of the only intellect to say how far one man should be allowed to own. Perhaps he should not be allowed to own more than a couple of million. Perhaps he should be permitted to own $5,000,000. My opinion is that that would be enough, and maybe too much. But I have set the limit that no one person's fortune, to start with, should be more than $50,000,000.

I do not propose to say how far the Congress must go in order to eliminate poverty among the families of the land. I do not propose to claim that I have the only intellect that can say just how far we will allow a family to fall toward the mire of distress before we begin to help it, but I have proposed that when an ordinary deserving family of the country has left only one third of the average family accumulation in this country, probably that is as far as that family should be allowed to fall toward destitution before the hand of the Government steps in to prevent poverty for the manhood, womanhood, and childhood of America.

I do not propose, gentlemen of the Senate, to say what should be the exact hours of labor, but I do say that there should be such a shortening of the hours of labor as will spread the work that must be done to the point where there will be none seeking employment, none who must of necessity be idle. I have voted for bills in the Congress which would have limited such weekly hours to 30, and I would vote to make it less than 30 hours per week if the inventions con-

stantly being made in the country should make unnecessary the 30-hour week.

Mr. President, I have offered to the Senate a resolution to carry out another promise made by the Democratic Party in the Chicago convention and approved by the people of the United States. I have offered to carry out the old-age pension promise as another means, first, of decentralizing wealth and, second, taking care of the surplus labor in America. I have proposed that at the age of 60 the old-age pension should begin. Perhaps the age should not be 60; maybe it should be 62, perhaps 58. I am not quibbling as to the exact age when the pension should begin, but I have selected the age upon which most people seem to agree, and I have proposed that at the age of 60 we shall begin to pay a pension of $30 per month to all men and women who have not a sufficient income or who do not possess property in a sufficient amount to care for themselves.

Then I have also coupled with my proposal another that we care for the veterans of the wars along the lines and upon the basis that the men who went to the front were given to understand they would be cared for. I do not believe that a pledge based upon the integrity of a government, depending upon the soldiers of the past and soldiers of the future, should be broken. I believe in the word being kept. I believe in the disabled veterans of the World War and the veterans of the other wars being given the allowance which the Government assured them they would have, not only as a means of caring for the veterans, but in carrying out the work of spreading the wealth of the land among the people as a whole.

I have further issued a circular which I presented to the Senate and which I distributed to many people throughout the United States, showing the means and methods by which this could be done. I am not picking my means; I am not picking the method. Perhaps someone else will come forward with a proposition bearing the approval of the administration to carry out the words which the President uttered today.

I will bow myself in the most humble form of submission if the President of the United States or any leader on this floor or in the other House of Congress comes here with any kind of proposed legislation to carry out what has been said to be necessary by the President of the United States. But are we going to have it in this Congress? Is it going to be introduced by someone else? If not, Mr. President, then the only thing I can urge upon this Congress is that we should proceed as the President and the American people have a right to expect us to proceed; that we should instantly set in motion the processes of law on our own motion, as the legislative body that is primarily vested with that duty and with that function, to do something to decentralize the wealth of America, which we have not done up until this time; to spread the work and the wealth of this land among the people; to care for the aged and the dependent; to care for the veterans of the war, by limiting the amount which one man can own, by limiting the amount of poverty which we will allow to be imposed upon the average human family.

Such is the promise of the party, such is the hope of the people; it is the dream of America, the spirit of 1776.

INCLUSION OF CATTLE AS A BASIC COMMODITY

Mr. ROBINSON of Arkansas obtained the floor.

Mr. CONNALLY. I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Brown	Costigan	Frazier
Ashurst	Bulkley	Couzens	George
Austin	Bulow	Cutting	Gibson
Bachman	Byrd	Davis	Glass
Bailey	Byrnes	Dickinson	Goldsborough
Bankhead	Capper	Dieterich	Gore
Barbour	Caraway	Dill	Hale
Barkley	Carey	Duffy	Harrison
Black	Clark	Erickson	Hastings
Bone	Connally	Fess	Hatch
Borah	Coolidge	Fletcher	Hatfield
Hayden	McCarran	Pope	Thomas, Utah
Hebert	McGill	Reed	Thompson
Johnson	McKellar	Reynolds	Townsend

Mr. LEWIS. I desire to announce that the Senator from South Carolina [Mr. SMITH] is detained because of death in his family, and that the Senator from New York [Mr. COPELAND] is unavoidably detained.

The PRESIDENT pro tempore. Ninety-two Senators have answered to their names. A quorum is present. The Senator from Arkansas is entitled to the floor.

Mr. CONNALLY. Mr. President, will the Senator yield to me?

Mr. ROBINSON of Arkansas. I yield to the Senator from Texas.

Mr. CONNALLY. I should like to have the attention of the Senator from Oregon [Mr. MCNARY]. I ask unanimous consent that when the pending business, the naval bill, shall have been disposed of, the Senate may proceed to the consideration of House bill 7478, known as the "cattle bill."

Mr. MCNARY. Mr. President, I think on three distinct occasions I have objected to the consideration of this bill because of the absence of the able Senator from Wyoming [Mr. CAREY]. On Thursday, when I last objected, the Senator from Texas stated here on the floor that he had an understanding with the Senator from Wyoming [Mr. CAREY], which was satisfactory, that the bill might be brought up today. In view of that statement, I feel that there is no further responsibility resting upon me. For that reason I shall make no objection to the consideration of the bill referred to by the Senator from Texas.

Mr. CONNALLY. I thank the Senator.

The PRESIDENT pro tempore. Is there objection to the unanimous-consent agreement proposed by the Senator from Texas? The Chair hears none, and it is so ordered.

THE ADMINISTRATION'S NATIONAL RECOVERY PROGRAM

Mr. ROBINSON of Arkansas. Mr. President, probably no session of the Congress held during recent years, save perhaps that which assembled in extraordinary session last March, has had more important business before it than the present session.

The Senate has disposed of its work up until this date with very gratifying promptness and efficiency. There still remain many subjects matter to be acted upon.

If the Senate were ready to vote on the pending amendment, I should be glad to yield for that purpose; but it is my understanding that the debate will continue for some time. Therefore, I avail myself of this opportunity of discussing certain phases of national recovery, which appears to me to be the one subject around which almost all others revolve.

All the great legislative and administrative measures of the present administration are aimed at accomplishing or promoting the business and industrial recovery of the citizens of the United States. There may exist, no doubt there do exist, marked differences of opinion as to the extent to which recovery has been accomplished, and in what degree the various measures constituting the administration program have contributed. There is, I believe, unanimity of sentiment in favor of throwing off the strange yoke of fear and helplessness which for some years has restrained both capital and labor.

A year has passed since the political control of the Government was changed. During that year the Congress has been in session about one half the time—a little less than 6 months. Perhaps it may be said without great objection that the Congress has recognized and followed the leadership of the President. This does not mean that doubts and differences of opinion have not arisen and been asserted; but it does mean that there has been general recognition of the necessity for promptness and for compromises, and

the end of the first year of the new deal, it is believed, signalizes the initiation of radical changes in both the legislative and the executive policies of the Government.

Some are disappointed that the new policies are not more radical; others believe that the new policies have been too radical; but the point I am attempting to make now is that a change has taken place in both the legislative and the executive policies of the National Government.

Barring the first few days following the 4th of March 1933, when the banking system of the country had broken down and all business had come to a standstill, there has been no effort in this body to restrict discussion and deliberation concerning the numerous and important bills that have been brought forward and enacted. The pressing emergency which menaced public affairs at the beginning of the administration caused everyone in the Senate to waive the right of prolonged debate in order to prevent delay. This course was not only justified because of the clouds which enveloped our country in dense gloom but also by the strange and fearsome noises which came from the darkness on every side.

The effort has been made by some to make it appear that Senators have been gagged in the expression of their views. There is no truth in this propaganda. No effort has been made to restrict debate in the Senate for the purpose of concealing any fact or suppressing any argument pertaining to public measures or affairs. Here, it appears to me, is an appropriate point at which to make clear that as to the bills which the Senate will consider during the remainder of this session, ample opportunity for deliberation and debate will be afforded, but filibusters will not be invited or encouraged and, insofar as possible, will be avoided.

Whether the stock exchange regulation bill may be ready for disposition during this session no assurance at this time can be given. The pendency of the measure has had two important effects: First, it arouses interest among those who control the exchanges in attempting to set their own houses in order. It is the neglect of this duty and obligation by those who operate the exchanges that has created the necessity and demand for the legislation.

In the second place, knowledge that the subject is being carefully studied by committees of the Congress with the determination to reform outstanding abuses pertaining to stock markets will deter those racketeers who have prospered by plundering ill-informed and unsuspecting investors. The spotlight will shine on their malignant practices and motives.

THE RECIPROCAL TRADE AGREEMENT BILL

The one subject undisposed of which will provoke more prolonged debate in the Senate than any other is that pertaining to the bill authorizing the Executive to enter into reciprocal trade agreements or tariff arrangements with foreign nations.

Ample time will be available before the 15th of May for disposing of the bill authorizing the President to enter into reciprocal trade arrangements with other countries. It would be impracticable, almost impossible, to enter upon a general revision of the tariff during the present session, and there is no thought of any such movement. To revise the tariff is a task requiring many months because of the numerous details and interests to be dealt with. While the proposal to grant the President power to enter into tariff agreements relates to emphatically controverted principles, the issues involved in the proposed legislation are, nevertheless, comparatively few and simple. This characterization does not minimize their importance or their far-reaching effects on governmental policies.

JUSTIFICATION OF EXECUTIVE TARIFF AGREEMENTS

It is not my intention now to enter into a discussion of the constitutionality of the proposed bill. Let it suffice on this to say that, in my judgment, the rule for the President's action as the agent of the Congress is more clearly defined than was the rule in the flexible tariff statute, which has been confirmed as valid by the Supreme Court of the United States. The rule referred to is found in the first section of the bill. It sets forth the object of the authorization, and the findings necessary on the part of the President, as the agent of the law-making branch of the Government, in order that he may exercise the power to change existing tariff rates.

Without doubt, the objection will be interposed that the selection of the President as its agent by the Congress is unwise, even though the rule for the government of the President's action is clearly defined. I freely concede that the Congress should never delegate any part of its work, unless the delegation be under conditions which promise better results to the public than may be accomplished by direct congressional action.

Of course, it is admitted that the Congress cannot delegate the power to make laws. It can choose its agent, define the rule for the agent's action, and enable its agent thus to execute the details of tariff making, just as has been done with respect to the transportation rates through the instrumentality of the Interstate Commerce Commission.

It is easily demonstrable that in the present crisis the task of reviving commerce through reciprocal trade agreements can be more effectively accomplished under the plan in the bill than by pursuing the course ordinarily to be followed, that is, by negotiating a large number of treaties and bringing them back to the Senate for ratification.

One of the factors which makes direct congressional action difficult is found in the constantly changing relation of foreign exchange to tariff duties imposed by law. This, added to the prolonged period which would be required to secure action in the Senate on tariff treaties, would make the terms of the trade arrangements obsolete before they could be put into effect.

Of course, the same argument applies, but in a very much less degree, to any plan for promoting international trade during a period when exchange rates are in constant flux. If the principle of reciprocity in tariffs is sound, if it is desirable that this principle be employed as one means of reviving commerce, it follows irresistibly that some such plan as that which the President proposes shall be resorted to. Another point. The power to fix transportation rates in interstate commerce is just as much a legislative duty as is that to levy import duties, imposts, and excises. There can be no distinction between the principle of the power to regulate commerce and the power to levy tariffs, unless it be that the latter is inseparable from the taxing power; but even this is a distinction without material difference. In some sense transportation rates constitute a tax on the free flow of commodities in commerce just as import duties impose a burden on international commerce. The details involved in the transportation rates are so numerous as to make impossible the intelligent performance of the task of fixing transportation charges through direct action by the Congress.

The time may come, indeed some believe it is approaching, when the law-making authority may find it wise and essential in the public interest to delegate a measure of its authority with respect to tariffs to agencies especially trained and equipped for the study and solution of the problems which tariff making involves.

Indeed, instead of saying that the time may come, it may with confidence be asserted that the action already has been taken in connection with the work of the Tariff Commission, particularly in relation to the flexible tariff.

The proposed arrangement for reciprocal trade agreements, however, is to be regarded more as an emergency measure than as a change in the policy of the Congress regarding the execution of its powers over the subject of tariffs.

There is a provision in the pending bill which makes terminable at the end of 3 years, at the option of either party to a trade agreement negotiated and entered into under the terms of the act, "every foreign-trade agreement concluded pursuant to its provisions."

Undoubtedly, this is quite different from limiting the period in which agreements may remain in effect to 3 years. It is a very different thing from saying that the agreements may be terminated at the end of 3 years, and some criticism of the measure has been indulged in by the press, and I think in both the House and the Senate, on that account.

It seems to me it is well worthy of consideration that if the agreement proves effective and satisfactory it might be wisely permitted to continue in force, and that it is better to leave its termination optional rather than to make it mandatory. But admittedly it does give the proposed statute a more permanent character than it would have possessed if the language were such that the agreements entered into should be terminated at the end of 3 years without regard to the manner in which they were operating. But, Mr. President, at last that is a consideration of relatively minor importance.

Recognizing the fact that this bill presents one of the issues that will be most bitterly fought out in the Congress during this session, I am taking advantage of the present opportunity to indicate my views concerning the value and the importance of the measure. I recognize that there are those here who entertain radically different opinions. It may be asserted that this is a new course marked out for the Congress.

It cannot fairly be claimed, in my judgment, that this is a surprising delegation of authority on the part of the lawmaking body. It differs in no material particular from the principle of the flexible-tariff provision. The difficulty about that is that it has not functioned very effectively for the promotion of American trade and commerce. If the old custom of working out, either separately or in a general tariff revision, changes in the tariff rates for the purpose of promoting our commerce, is to be adhered to and followed, I think I can demonstrate to any mind that it will make it impossible to negotiate the treaties and secure their ratification until such time as conditions will have so changed that the arrangements in the agreements may be entirely ineffective for the accomplishment of the purposes for which they were intended.

We all know the manner in which tariff laws have been framed and enacted. We all know the delays necessarily incident to the performance of so great a task, particularly when it is to be performed by many who are not familiar with the details of the work that they are required to do. And in addition to that there has prevailed a practice commonly called "log rolling" which has resulted in a combination of influences and factors desiring special recognition in tariff laws, which combinations have not produced results favorable to the general public interest.

There is not any excuse for anyone to say that the consideration of this measure will keep the Congress in session all summer. There is not any excuse for a filibuster on such a measure. There is ample justification for careful study of the subject and for such discussion of it as will enlighten the minds of those who are charged with the responsibility of reaching a decision.

Always since the formation of political parties in the United States the tendency has been for those in political control to exaggerate achievements, and on the other hand the natural tendency of the opposition has been to minimize and discredit the performance of their adversaries. In the long run, fairness and moderation prevail. No permanent advantage can be secured through misrepresentation. Every measure must be tested by its effects upon the public welfare. Cloud-capped towers and gorgeous palaces erected in brilliant but vain imaginations tumble and crumble into ruins in the heat, the light, and moisture of argument, truth, and consequences.

That the Roosevelt administration has substituted a policy of decisive action for the dominant policy of the Hoover administration, which is fairly epitomized in the expression, "let conditions correct themselves", it is believed cannot be conclusively denied. That this alteration in national policy has worked and is working notable changes, some of them revolutionary in character, cannot be controverted, either by the sponsors or the critics of the administration. Furthermore, that on the whole the changes have been beneficial in the promotion of national recovery is supported by the preponderance of the evidence and the argument. Whether the benefits to the public shall be permanently secured is a question locked among the secrets of the future. As to that we may and shall differ and dispute. It is natural that mistakes will be made. The important thing is to correct them when they have been disclosed. This is a task to which we may devote ourselves in a spirit of earnestness and cooperation. The result depends, in part at least, upon the frankness and fairness of our efforts. Piracy on the seas has been outlawed and destroyed. Plunder by monopoly and privilege under law must be condemned and prevented.

Those who stand for the old system must remember that it is directly responsible for the depression which has so nearly wrecked our industrial and social system. They must answer to the people how it is they hope that its return will bring peace, comfort, and happiness. They must respond to the inquiry, How shall unrestrained speculation be relied upon to secure honest investments? How shall the industrial structure of the Nation be safeguarded against a recurrence of the evils which have had both birth and nourishment in monopoly and special privilege?

On the other side, what assurance shall be given that the National Industrial Recovery Act, the agricultural adjustment plan, the regulation of transactions on exchange, the attempts to slay the octopus will not prove futile and abortive?

It has been asserted with confidence that general conditions are improving. The supreme task is to make the reforms which finally are to be relied upon effective in averting the oppressions of monopoly, while at the same time giving just assurance to honest and fair-minded business men that their efforts will be free from unreasonable handicaps and unnecessary restrictions.

In that great newspaper, the New York Times, appears today an editorial signalizing the end of the first year of the Roosevelt administration. It is entitled "Annus Mirabilis"—"A Wonderful Year." That editorial discusses the accomplishments of the administration and the spirit in which they have been accomplished. It says, among other declarations:

> "Measures, not men." That political saying appears to have received its quietus in the person of President Roosevelt. He has sponsored many measures, but not one of them has made upon the country an impact anything like that of his own personality. Critics say that he was the most fortunate of men in assuming power when misfortunes were heavy upon the land. Doubtless there is something in that, politically speaking. Any change must be for the better when things are at their worst. But it requires a man of heroic mold and great strength of character to deal with public misfortunes so as to win from them glorious gain both for his own reputation and for the country's good.
>
> This is what Mr. Roosevelt has done, even his political opponents being witnesses. One of his great efforts has been to restore commodity prices for the farmers. But he has bestowed upon them and upon the whole Nation a more precious gift. It is that of "the commodity called a man."

Mr. President, there is a summary contained in the Associated Press report sent out from the Capitol on March 4, 1934, under the headline, Upturn Grows as New Deal's First Year Ends. I ask unanimous consent to have printed in the RECORD, at the conclusion of my remarks, both the editorial from the New York Times and the Associated Press dispatch.

The PRESIDENT pro tempore. Without objection, it is so ordered.

(The editorial and the Associated Press dispatch appear at the conclusion of the remarks of Mr. ROBINSON of Arkansas.)

Mr. ROBINSON of Arkansas. Mr. President, assuming that there is a purpose, which may be regarded as common among Americans without regard to the partisan political affiliations, to promote by legitimate action national recovery; assuming that this is the end in mind, it can only be intelligently sought in an atmosphere of free thought and expression and in processes of legislation and administration earnestly intended to be responsive not only to the necessities of the present but also to those which will grow out of the changes which are taking the place of the old methods and policies.

Manifestly purchasing power cannot be re-created while unemployment is general and while labor is inadequately compensated. Neither can it be if monopoly shall be permitted to strangle consumers in the name of freedom to industry and labor.

The modified monetary standard has justified itself in combating the effects on American trade and commerce resulting from depreciated foreign exchanges. It has terminated hoarding; but we have yet to find some means of stimulating private credit to avoid thrusting the Government further and further into the banking business. Until business shall have been revitalized and earnings shall have been increased there will exist the necessity for drawing on the national credit. There is real danger that this may go to the point of permanently impairing the national credit through uncontrollable inflation, an expedient which has rarely, if ever in the history of mankind, been confirmed as safe.

There remains so much to be thought out, so many steps to be taken, so many dangers to be warded off, that there is time neither for boastful exultation nor mournful lamentation.

The cries and complaints of those who have nothing to suggest, however voluminous, cannot win back power and confidence to those described as financial wizards, and who were dumb and helpless in the extremity which their own misjudgment brought upon mankind.

Studying history one learns that vainglory and selfishness disappear in the knowledge that enduring power rests upon and is inseparable from wisdom. Wisdom in leadership is chiefly the ability to profit by experience, which means a determination to discard and reject institutions which fail to accomplish the purposes for which they are established. Wisdom is the capacity to turn away from well-trodden paths, however beflowered, if they lead downward; it is the farsightedness to select and determine the ends essential to the accomplishment of indispensable purposes and to move toward them with irresistible force in spite of obstacles and difficulties.

Partisan efforts conceived in honest conviction and expressed in temperate language have their proper place, even in times of emergency and crisis. They are a forceful check on the vagaries and misdirection of energy which oftentimes emanate from misguided genius as well as from blindfolded mediocrity.

There has been general acceptance of the President's leadership, for the reason, among others, that advancement is thus facilitated and delay avoided. Instances where partisan attacks have gone beyond fair criticism have been rare. Unfairness and injustice usually react against their perpetrators. No experiment which cannot justify itself by trial and argument is worthy to be perpetuated. This is the spirit of the President's leadership. He has recognized from the beginning that the necessity for prompt and decisive action may cause errors to be made, but that they cannot prove greatly harmful if corrected when discovered.

What matters it that blunders, whether trivial or grave, may in good faith occasionally be made if the efforts for reform, in which every loyal American should be interested, shall finally meet with success, and this Government shall prove itself to be "a government of the people, for the people, and by the people."

(The editorial and Associated Press dispatch ordered printed in the RECORD at the conclusion of the remarks of Mr. ROBINSON of Arkansas are as follows:)

[From the New York Times of Mar. 4, 1934]

ANNUS MIRABILIS

"Look on this picture—March 4, 1933—and then on that—March 4, 1934." That might pass for sufficient defense and praise of President Roosevelt's first year in the White House. When he took office, the gloom in this country was so thick that it could be cut with a knife. All the banks had to be closed; industry and commerce were at their lowest; the unemployed numbered at least 13,000,000; every citizen exchanged with his neighbor blank looks of doubt, alarm, and despair; the general feeling was that the new President had taken over a state of things which it would be impossible for him to repair. But a year later we have the happy contrast of steadily increasing recovery, of improved business and manufacture, of the banking crisis ended, of several millions more at work, and, more important than all, a sweeping change of sentiment, with revived hope and renewed courage visible on all sides. To the question still put by some obstinate pessimists, what the President has done, the answer is just to look about and note the concrete evidence everywhere.

No President in his first year—not even Van Buren in the panic of 1837—ever faced such desperate necessities of action as confronted Franklin D. Roosevelt a year ago. His personal contribution to the mental uplift of the American people has been without precedent. He has done many important things, but the spirit in which he has done them has been still more important. The qualities which he has displayed came as a surprise to the closest observers of his previous public career. As Governor of New York for 4 years he had seemed to be more of a politician than a statesman; too often timid and hesitant and compromising; occasionally stooping to conquer questionable support; his eye more on a nomination for high office than on achievement in it. Then there was his campaign for election in 1932. It was, to be sure, shrewdly planned in the sense that he held himself as an inevitable beneficiary of the immense popular revolt against President Hoover, but it was marked by little bold and forthputting utterance and gave the people only an inadequate conception of the man whom they were about to elect President.

From the moment of his taking the oath of office, all the old hesitancies and veilings fell away from him. He stood forth as one willing to assume the heaviest responsibilities with the utmost resolution and firmness. Withal, he set about his arduous labors with cheery optimism; having confidence in himself; sure of the response of the people to his leadership; versatile, resourceful, daring, and with a fine courage and hopefulness that never failed him. He went far to justify the old latent belief of Americans that the hour would bring forth the man. Certainly the black hour of March 4, 1933, marked the accession to power of a man whose blithe energy was all that could have been hoped for.

"Measures, not men." That political saying appears to have received its quietus in the person of President Roosevelt. He has sponsored many measures, but not one of them has made upon the country an impact anything like that of his own personality. Critics say that he was the most fortunate of men in assuming power when misfortunes were heavy upon the land. Doubtless there is something in that, politically speaking. Any change must be for the better when things are at their worst. But it requires a man of heroic mold and great strength of character to deal with the public misfortunes so as to win from them glorious gain both for his own reputation and for the country's good. This is what Mr. Roosevelt has done, even his political opponents being witnesses. One of his great efforts has been to restore commodity prices for the farmers. But he has bestowed upon them and upon the whole Nation a more precious gift. It is that of "the commodity called a man."

Such a meed of praise will be accorded Mr. Roosevelt by the almost universal voice of the country today. This does not mean that he has solved every problem or vanquished every foe. Indeed, it may fairly be said that he has created new problems and raised up formidable obstacles in his future path. He is at least partly responsible for the new and exigent demands of organized labor, which are today like a cloud on the horizon of industry. He also sees rising before him new and powerful blocs of voters who maintain that they now have a vested right to support by the Government. It would be possible, and even desirable, on other occasions to point out serious mistakes which the President has made and inconsistencies into which he has fallen. But on this anniversary day every note except that of congratulation should be stilled. Americans will salute their President at the end of his first year in office, will be proud of the vigor and high spirit with which he faced a frowning world, and will count upon him to go on with the same ardor and good cheer in the great and trying work which remains to be done.

[From the Washington Post of Mar. 4, 1934]

UPTURN GROWS AS NEW DEAL'S FIRST YEAR ENDS—ROOSEVELT SPURS REVIVAL, DISREGARDING STORMS OF CONTROVERSY

The first year of the new deal ends today with much of its program buried in controversy, but with the Nation in a bettered economic condition than upon that dismal day on which Franklin D. Roosevelt took office.

While the political opposition on Capitol Hill reiterates its charges of dictatorship, and both industry and labor berate the National Recovery Administration, the President proceeds with his plans, undisturbed by the hullabaloo that surrounds them.

The individual items of the Chief Executive's program have, roughly, fallen into one of two categories—temporary measures designed to expedite business recovery, and projects of a permanent nature intended to bring about lasting changes in the fundamentals of the country's economic system.

TEMPORARY MEASURES

In the first category are listed the Public Works and Civil Works Administrations, Federal purchases of agricultural surpluses for relief purposes, the Emergency Conservation Corps, Federal refinancing of home and farm mortgages; Reconstruction Corporation loans to banks and railroads.

On the side of reconstruction are the farm act, the Tennessee Valley Authority, the devalued dollar, the securities law intended to protect the public against rapacious financiers, the President's request for governmental control of the stock and commodity exchanges.

Some of the administration projects originally regarded as temporary are now slowly advancing into the permanent category.

Outstanding among these is the National Recovery Administration, which has become an ever-increasing subject of controversy both in Congress and out.

C.W.A. TAPERING OFF

Administration critics have argued, too, that the Civil Works Administration, through which more than 3,000,000 jobless have been given made work, has a distinct tendency to become permanent. The idea behind it was that it should furnish employment until industry and the advancing Public Works program could absorb its workers.

But, when the President recently asked for $950,000,000 to continue it until May, congressional conservatives were quick to predict that the administration would find it just as difficult to abolish civil works then as in February and predicted another request for funds at that time. However, the President is following a well-defined program for tapering off which has resulted already in its dropping thousands of workers.

The N.R.A., conceived as a plan for industrial self-government under which the units of an industry would work in cooperation to prevent overproduction, reduct hours, and raise wages, has been wrapped in dispute from its very inception. Complaints have come from both sides of the industrial conflict. Employers have contended in some instances that the plan has operated to the detriment of the small business man. Labor has called for more representation and asserted that the employers were denying them the rights contemplated in the National Industrial Recovery Act.

PROVISIONS OF LAW

That law, charter of the N.R.A., stipulated that the workers should have the right to bargain collectively through representatives of their own choosing and that labor should be free to affiliate itself with any organization, or refuse to affiliate itself with any union, without that being made a condition of employment.

Labor's complaint is that the employers have by devious methods sought to nullify this provision, and in some instances have done all in their power to perpetuate the company union, anathema to organized labor. Both consumers and labor have charged that local compliance boards have been ineeffective in removing abuses and have been dominated by employers.

When Mr. Roosevelt took office virtually every bank in the Nation had closed its doors against the crowds seeking to withdraw deposits. Mr. Roosevelt completed the job on his second day in the White House with his famous proclamation imposing a general Nation-wide banking holiday.

OPENING OF BANKS

The next task was to get the banks that had been closed open for business as quickly as possible, and for those institutions which could meet tests of solvency and reasonable liquidity the ban was lifted March 16.

In the months that followed, the Reconstruction Corporation poured millions of dollars into hundreds of banks to improve the position of those already operating and enable those still closed to open for business.

Now only a very small proportion of the banks whose doors remained shut on March 16 are not operating, and the Federal Government, over the opposition of the banks, has guaranteed all deposits of $2,500 or less in full. A permanent plan for deposit insurance was to have become effective July 1, 1934, but has now been postponed 1 year.

GOLD PROGRAM

Slowly Mr. Roosevelt developed his monetary program. It saw the country abandon the gold standard and resume it in modified form, and reached its culmination a month ago in devaluation of the dollar to 59.06 percent of its former gold worth. At the same time, the Treasury made a standing offer to buy imported gold at $35 an ounce, which it said had put the country upon an international gold-bullion standard.

Primarily the President's recovery program has been aimed at increasing commodity prices. This objective has linked together virtually all of his individual projects, whether the method be by increasing purchasing power or by manipulation of the currency.

Mr. FESS. Mr. President, I have received a great number of letters during the last two months making inquiry why there has been no attempt to classify the various activities undertaken in connection with the recovery program and why there seems to be an acquiescence that looks like what might be called subserviency on the part of the minority in the Senate of the United States. My reply to all such inquiries is that, in the first place, so far as I am concerned, I have never dragged in out of order a discussion of a subject unless it was under consideration by the Senate at the time. I am now, however, in view of what has been said by the Democratic leader of the Senate [Mr. ROBINSON of Arkansas], afforded an opportunity to say what I have wanted for a long while to say.

Mr. President, it matters not what efforts may be put forth through the agencies of communications to the public in attempting to sell any kind of a program, that program must be measured by the results and not by an effort of ballyhoo. It is true that there seems to have been a friendly conspiracy, including the press, the air, and the screen, to give every possible publicity to everything that has been attempted by the President, largely because there has not been any other program before us and because in the public mind there has been constantly the query, "What will take place if this program shall fail?" I have never in my own experience, either as an observer or as a reader of history, known of a period when there has been such united support of those in power and authority, first, on the part of those who believe in the program, and, second, in the quietude on the part of those who have not any faith in the program.

We do not have a government such as that of Great Britain; we cannot change a governmental policy whenever we want so to do. In a parliamentary system of government, where there is a responsible ministry, if the government announces a policy, and that policy is rejected, the responsible ministry is left to one of two alternatives: One is to resign and allow the opposition to form the government, and the other is to ask the king to prorogue parliament and go to the people for a popular vote on the issue involved. We do not have any such system here. Consequently President Roosevelt is in charge of the program until 1937; there is no possibility of changing it, and he is responsible for it. I have felt all along that the furthest I could go would be to point out what I thought was unsound in the items of the program, but not to go beyond that, and I have not taken the opportunity to do that simply because we have not been considering subjects such as would open the matter to a discussion. Now, however, the Senator from Arkansas, the Democratic leader, for whom we all have not only a high opinion but an affectionate regard, has brought up the subject of the accomplishments of the new deal during the first year of President Roosevelt's administration.

I desire to ask some questions in the light of the report which has come from the Labor Department in response to a resolution which I submitted on the 11th of January of the present year. The response came on the 12th day of February. In the resolution submitted by me, in order that we might understand whether there has been any recovery, or whether the expenditure of billions of dollars of Government funds has been and is to continue to be limited to relief and not recovery, I asked that the Senate be given a report on employment and unemployment, first, in the durable-goods field, and, second, in the consumptive field, knowing that if there has been an increase of employment in the durable-goods field it is a very promising indication and points directly to recovery, while, if there has been no reemployment in the durable-goods field, the outlook is not promising at all; knowing also that if there has been reemployment in the consumptive-goods field, beyond that which would be brought about by Government expenditure, it is also somewhat promising, but if there has been no reemployment in the consumptive field except that which has been stimulated by the expenditure of Government funds, then in that aspect the situation is not at all promising.

I asked, also, that the report furnish information on unemployment in the case of all labor producing goods and also as to all labor-providing services. Unfortunately, we are not furnished with that information. It is stated by the Labor Department that they have not the facilities to enable them to give us the figures in that field. That is unfortunate for the reason that those providing services are out of employment if industry is not employing labor. If the industries employing labor and paying wages are prosperous, there is no unemployment among those providing services, because services depend wholly upon industry employing labor and paying wages. I regret that the Labor Department do not have the figures in that field. I am not complaining, because, if they do not have the facilities, of course that is a sufficient explanation.

I also asked for a statement as to the volume of labor employed on both private projects and Government projects, the one separated from the other. I also wanted to know the number of people employed by the Government on public undertakings, such, for example, as public works,

civil works, and so on. I could not get the figures covering the last two.

I also asked that we be given the figures as to unemployment in all these fields, the specific inquiry being as to the number of unemployed. What do we get in response from the Labor Department? On February 12 I received the following information:

The number of persons employed during the month of November 1929 in the capital or durable goods industry is estimated to have been 4,207,900. That was the high point of employment. In November 1932, being the low point of employment, the number is estimated to have been 2,082,900. That is a falling off of 50 percent in employment from the high point of November 1929 to the low point of November 1932. That is in the durable-goods field. The employment in the same field in November 1933 was 2,654,200, or an increase of 571,300 persons, which is a mere bagatelle in the face of the expenditure of billions of dollars in an effort to stimulate business and in view of the statement that there were 12,000,000 unemployed. In the consumptive field, where I would expect a very much larger increase, in November 1929, at the high point, 4,468,600 people were employed. In November 1932, the low point, there were 3,231,000 people employed, a falling off of a little more than 1,100,000. In the durable-goods field there was a falling off of 50 percent, while in the consumptive field there was a falling off of less than 33 percent. The increase in the consumptive field, which I had expected would be tremendous, was only 499,501, less than half a million in a field that employed 4,400,000. Yet we are talking about recovery!

When I speak of the durable-goods field, I mean heavy manufacturing, such as iron and steel, the machinery group, the nonferrous metal group, the transportation equipment group, railroad repair shops, lumber and allied products group, stone, clay, and the glass group. Those are in the durable-goods field, and only a little over half a million out of a total number of over 4,000,000 were reemployed.

I refer to the consumptive group as embracing the food group, textile group, leather group, paper and printing group, chemical group, rubber-products group, tobacco-products group, and all other industries not included in the durable goods group. In that field where the N.R.A. operates, as in the rubber industry, where I would have assumed there would be a tremendous increase in reemployment, the Labor Department reports on February 12 of this year that there were less than 500,000 reemployed in all the groups comprehended in the durable-goods field. I have here the figures indicating the percentage of increase. It is true that in some particular lines there is more than 25 percent increase, while in others there is a falling off and less employment in 1933 than in 1932.

Anthracite is one of the industries in which employment fell off. Telegraph and telephone communication is another where employment fell off. The motor-bus business is another. There are several industries in these fields that were employing less people in November 1933 than in November 1932, and the average increase is somewhere between 16 and 18 percent.

The increase of employment under the N.R.A., if General Johnson's statement is to be relied upon, is 25 percent; for he stated, not only over his pen but the other day officially, that the N.R.A. had caused the reemployment of 3,000,000 people. I have asked one of the industries to give me the statistics as to their own business, to indicate what has been the increase under the operations of the N.R.A. Part of this industry is located in the city of Milwaukee. The official of whom I made the request stated that they had three stations there for doing this particular work, and they were required under the N.R.A. to make certain additions, which represent just 41-percent increase. That is much more than the 24 or 25 percent suggested by General Johnson.

Not only that, but the match industry increased its labor personnel 20 percent, and increased its labor cost from 28 to 32 percent. As long as there is a compensatory increase of return, business can safely add such costs; but if there is not a compensatory increase of return, a certain type of business—that is, one that cannot stand running at a loss for any length of time—cannot continue operation very long.

Mr. President, generally speaking, of all the manufacturing industries of the country, 8 percent produce 50 percent of the product. Those are the big industries. The other 50 percent is produced by the remaining 92 percent of the industries. It is true that the big industry may be able to spread its work and add from 20 to 40 percent to the cost of the article and assess it upon the public. It may be able to do that and live; but there is a doubt in the mind of every man whether the small industries, each employing 250 people and less, which make up the 92 percent, can live under the conditions under which the big industry can live. That is a question that to my mind is most doubtful; and if they cannot live, then the operation of the N.R.A. is going to be injurious to that great proportion of the manufacturing industries.

There has not been a time from the beginning when there has not been objection to the N.R.A. on the ground that it was getting rid of law by agreement. I do not like that phase of it at all. We tried to amend the antitrust laws under the recommendation of President Woodrow Wilson. We did not succeed. Their amendment was recommended by Presidents Harding, Coolidge, and Hoover, but without success. Now, by agreement, where men get together and avoid the provisions of laws which cannot be amended by Congress we have a government of men rather than a government of law; and it is unwise in the degree that it is such a government. In the case of a government of law, we know from the beginning what it is, for the law stands until it is changed by the body that made it. An agreement, however, can be changed just as frequently as the minds of the individuals change; and we should not be put under the rigidity of obeying a rule that is merely agreed upon by individuals.

Mr. LONG. Mr. President——

The PRESIDING OFFICER (Mr. LEWIS in the chair). Does the Senator from Ohio yield to the Senator from Louisiana?

Mr. FESS. I will yield in a moment.

Mark my words, Mr. President; the charge of a trend toward monopoly under the N.R.A. is bound to grow. It is inevitable. There is no way to avoid it. Furthermore, the assessing of additional costs through the N.R.A. upon 100 percent of our people is bound to create a protest that will be vocal; and no amount of ballyhoo on the part of communication agencies to "sell" a program will be able to overcome these facts, which are more stubborn than any attempt at propaganda.

Mr. LONG. Mr. President——

Mr. FESS. I yield to the Senator from Louisiana.

Mr. LONG. I rose at the point where the Senator mentioned the great harm involved in intrusting the powers of the Government to the ipse dixit of individuals and therefore to change and modification overnight. Some of us on this side of the Chamber brought out that point.

Mr. FESS. I recall that very well.

Mr. LONG. If we could have convinced our Republican friends at that time as well as they now seem to be convinced, I believe that we might have averted some of the legislation now complained of.

Mr. FESS. There was not any difficulty in convincing the present speaker, because, as the Senator knows, I did not vote for the bill. I opposed it here at the time on the ground that it was a movement in the wrong direction.

Mr. President, I do not want to be misunderstood at all. If a man is to be judged by his good intentions; if a public personage is to be judged by his industry; if a man is to go down in history upon the basis of his desire to help, or of his courage and daring to do what never before has been undertaken, the present President of the United States will occupy a very high place in the history of the country. I desire to have that understood as my belief. Unfortunately, however, reputation never stands upon promises; it is not

measured by good intentions. Reputation must stand upon what is accomplished, and not upon something that is promised; and we must await the results and what I feel absolutely certain will be a breaking down before we can judge as to the greatness of accomplishment of this new, adventurous effort on the part of a very daring Executive.

Mr. KING. Mr. President——

Mr. FESS. I yield to my friend from Utah.

Mr. KING. Is the Senator quite accurate in his exposition of the effect of the N.R.A. in permitting monopolistic agreements?

My understanding is that no agreements may be entered into that would be in contravention of the provisions of the Sherman anti-trust law or of the Clayton Act. The Senator will recall—and he will pardon me for making the suggestion—that recently a decision of the Supreme Court affirmed the validity of the agreements or acts or conduct of corporations and individuals in furnishing information to one another, in conferring with a view to determining what would be fair and reasonable prices, even though the particular industry in which they were engaged controlled a very considerable part of the product that was consumed in the United States.

Mr. FESS. Mr. President, I desire to be not only accurate but entirely fair. What I fear, as the Senator knows—and I think he fears it, too—is that if we substitute for existing law the power of agreement to be approved by the President, the agreement thus entered into becomes a fair-trade practice having the force of law and having a penalty attached to its violation which is to be assessed not in a court but by the order of the Director. That is something the Senator and I certainly would think over for a long time before giving any carte blanche authority. That is what I have in mind.

Mr. KING. Mr. President, if the law were susceptible of the interpretation which, as I understand, the Senator places upon it, I think I should agree with him; but my understanding of the N.R.A. and the terms and provisions of the act, is that no agreement may be entered into—I do not care whether it receives the validating signature of the President of the United States or that of General Johnson—which in letter or in spirit would be in contravention of the Sherman antitrust law through permitting the organization or perpetuation of a monopoly.

Mr. FESS. Mr. President, the Senator may be correct, but I certainly think he is not, because if the Sherman antitrust law is to remain in full force without any diminution by agreements, certainly the business of the country would not be asking for a suspension of the Sherman law, which they thought they were getting when they entered into the agreements.

I desire to repeat that, in my judgment, the forces in opposition to the plan now being carried into execution under the N.R.A. will be so cumulative and so commanding that it cannot last; and I shall not be at all surprised if within a year the Blue Eagle shall become an emblem for ridicule, and people will decline to remember that they ever had been devoted to it.

My reason for thinking so is that the only interest the business man has is to get a suspension of the operation of the antitrust laws, and with that desire a lot of people have sympathy. If that consideration is to be removed, business will have no further interest and the support of business will be gone; and I think that condition will have to eventuate. Otherwise, we are almost certain to move toward monopoly, with the cumulative protests on the part of people who will have to suffer the increased costs, whose complaints will be so commanding that there will be no question as to what will be done later on. I merely throw that out as a suggestion of what I think is bound to come.

I have referred to a business in Ohio. I asked the man who ran that business how his business was prospering, and he said, "I have been manager of this business for 42 years. We have always cut our expenditures so as to keep within our income. In August we went under the N.R.A., believing that was the thing to do. In September we went into the red for the first time, and we have been in the red every month since August." He stated further, "We cannot continue to go on without some recovery in the way of increased business, which we are not getting."

How representative that illustration is I do not know, but every man who can think two thoughts in a row knows that condition cannot continue, if it is true of most of the small industries of the country, as I fear it is. So in due time we will be looking for some other method in which to solve this particular problem.

Mr. President, in the light of the figures from the Department of Labor which I have quoted, which give us so little to hope for, so little promise, let me remind Senators of some statements which are difficult for me to understand. The Secretary of the Interior states that his Department has taken up 5,000,000 unemployed. Of course, he meant that in that number would be included those employed under the Civil Works Administration, which was a proper interpretation. General Johnson says that under the N.R.A. 3,000,000 unemployed have been afforded employment.

With 1,000,000 employed on the Public Works program, under the Secretary of the Interior, 4,000,000 on the Civil Works program, under Director Hopkins, and 3,000,000 in the N.R.A., under General Johnson, that makes 8,000,000 who have been reemployed. That is three quarters of the unemployed, if we take the maximum figure, and most people give the figure as 10,000,000. So that there should not be such a great number of unemployed at the present time.

However, let us look at the figures of William Green, the president of the American Federation of Labor. I telephoned his office and asked whether they had his statement, and whether it had been verified, and it was stated it had been. That statement sets forth that industrial unemployment increased 921,000 in January, a month ago. They state that the total unemployed in industry today amounts to 11,690,000.

I am willing to include in that 11,690,000 the 4,000,000 temporarily employed in the C.W.A., but take the 4,000,000 in the C.W.A. and subtract that from 11,690,000 and we find today over 7,000,000 out of employment in industry. We have been operating under this program now for a year. The year closed yesterday.

Mr. WAGNER. Mr. President, will the Senator yield?

Mr. FESS. I yield.

Mr. WAGNER. I want to ask the Senator whether a great improvement is not manifested by the fact that there are, according to reliable estimates, only 6,500,000 unemployed today, compared with over 15,000,000 a year ago?

Mr. FESS. Mr. President, that is a nice sort of a question, a question from a propagandist. In accordance with the statements of the heads of these unemployment agencies, under an expenditure of money which will create a deficit of $7,000,000,000 this year, how many have been put on the pay roll purely as relief, in response to humanitarian impulses? At least 5,000,000. I am not finding fault with putting 5,000,000 on the pay rolls for relief purposes, but the employment of the 5,000,000 is not an aid to recovery. There is not a scintilla of recovery in that. Those people are employed out of Government funds which come from taxation, which money must be paid by business, and we cannot make an unlimited demand upon the Treasury to take up unemployment and call it recovery. That is only relief.

Now, if the Senator asks me if that is not an improvement, I say that it is an improvement from the standpoint of the relief of the unemployed, certainly, but it is no improvement in what we call "national recovery." If that is the cost of national recovery, the more we do it the more difficult it will be for us ever to get back to stable conditions. I think the Senator will sympathize with that contention.

Mr. WAGNER. No; I do not sympathize with it. Besides, 4,000,000 people have been reabsorbed by private industry. There may be a little seasonal slack here and there——

Mr. FESS. Now, wait a minute.

Mr. WAGNER. Let the Senator wait a minute.

Mr. FESS. I have the floor; let the Senator wait a minute. I am not basing my observations on newspaper articles.

I am basing them on the report of the Secretary of Labor. Secretary Ickes says a million people are employed under the Public Works program and General Johnson says 3,000,000 are employed under the N.R.A. He said that day before yesterday. That makes 8,000,000, with those employed under the Civil Works program.

The Senator may say that the reemployment under the N.R.A. is in industry, but it is in industry at the cost of industry, not recompensed by returns, and it will destroy industry if there is not some other relief.

Mr. WAGNER. Mr. President, will the Senator yield?

Mr. FESS. I yield.

Mr. WAGNER. May I be enlightened as to what the Senator means when he says that recovery is at the expense of industry?

Mr. FESS. The improvement, whatever it may be, is at the expense of recovery. It is not recovery.

Mr. WAGNER. Is it not recovery when shorter hours, minimum-wage provisions, and the abolition of child labor lead to the absorption of nearly 4,000,000 workers in this country?

Mr. FESS. No; it is not a recovery. When child labor is eliminated, that is splendid, and I will go as far as the Senator will go in that direction. When the sweatshop is eliminated, that is a fine accomplishment. When the number of hours of labor is reduced without destroying industry, when industry undertakes to work out that problem itself, that is an accomplishment.

Mr. WAGNER. Does not the Senator think that reducing hours of labor, so that the ordinary worker will have some leisure time, is a desirable achievement?

Mr. FESS. He will have too much leisure time. That is the trouble.

Mr. WAGNER. Is that what troubles the Senator? Is he disturbed because the worker is having too much leisure or because hours of work have been shortened?

Mr. FESS. No. If it is leisure the Senator wants the working people to have, just let them quit work, and they will have plenty of it. The lack of work is our difficulty now.

Mr. WAGNER. Does the Senator want us to go back to the 64- to 70-hour working week?

Mr. FESS. Mr. President, the Senator from New York is trying to get away from the theme on which we started. Let me state again, so that he never need be confused about it, recovery results when industry is enabled to absorb unemployment; and when the work is spread through a shorter day, unless there can be an increase in the return from the sale of the product, there will not be recovery, because every business will lay off its men, as industry is now doing.

We had the same problem with the railroads. We established the 8-hour day on the railroads for humanitarian as well as for economic reasons; but when the 8-hour day was adopted, the railroads reduced the number employed on the roads in order to take up the difference in the cost. Now we are talking about a 6-hour day on the railroads. Suppose we enact a law establishing a 6-hour day, as we likely will. As soon as the railroads shall reduce their operations to 6 hours as a basic day, instead of 8, they will immediately absorb the additional cost by laying off more men. That is what has always been done.

Mr. WAGNER. Then the Senator's theory is that we should not reduce hours of labor?

Mr. FESS. No, Mr. President; it is not. I am talking about what the policy advocated by the Senator will inevitably bring about. I am in favor of shorter hours of labor. I think we must come to shorter hours, under our method of machine production.

Mr. WAGNER. Of what is the Senator complaining, if he is not complaining of shorter hours?

Mr. FESS. My complaint is that the Senator is holding that the N.R.A. is spreading work and bringing about recovery. It is not recovery unless it is shown that there is an increase in return that will take up the additional expense. Otherwise, employers will lay off their labor, and instead of resulting in recovery it will result in increased unemployment.

Mr. WAGNER. Mr. President, will the Senator further yield?

Mr. FESS. I yield.

Mr. WAGNER. The Senator talks about profits. Were not excess profits the cause of the depression? Did not the tendency to reinvest these profits in production goods, instead of translating them into purchasing power by the payment of adequate wages, bring on the collapse? Did not the selfish greed of industry, manifested by low wages and long hours, ruin us all?

What we are now trying to do is to shorten hours and increase wages, thus giving the worker his fair share of the wealth of the country, which he is still a long ways from getting. When he reaches that goal, we shall have economic stability.

That is the object of the N.R.A., and that is the thing which the Senator from New York is upholding.

Mr. FESS. Mr. President, I am not opposing that. What I am opposing is the administration's undertaking to impose an artificial regulation, which regulation cannot subsist in business methods.

Mr. WAGNER. Mr. President, what is that artificial regulation? Is it the reduction of hours?

Mr. FESS. No.

Mr. WAGNER. Is it the abolition of child labor? Is it the increase in minimum wages?

Mr. FESS. Increasing the cost to the public. The administration is increasing the cost of the product to the public, brought about by the shorter hours; and when the public will not buy, business must stop.

Mr. WAGNER. Who are the consumers of the country, if not the wage earners?

Mr. FESS. The consumers are the people, and the extra cost is assessed on them, thus making it more difficult for them to live.

Mr. WAGNER. Not at all.

Mr. FESS. The Senator will find out before the year shall be over.

Mr. WAGNER. If the consumers of the country—and, by the way, wage earners with incomes of less than $2,000 per year now buy two thirds of all the products of the country—are given a higher wage, they will live better lives, and they will save industry by consuming the goods which industry can produce. But if industry insists upon adopting the policy which the Senator proposes, we shall have another collapse.

Mr. NORRIS. Mr. President——

Mr. FESS. Mr. President, I have great admiration for the Senator from New York, but I do not very much appreciate his undertaking to make my speech.

Mr. WAGNER. Oh, no; I am not doing that, Mr. President.

Mr. FESS. The Senator seems to be doing so. He is talking about a doctrinaire idea. He wants to eliminate profit. He says that business is selfish; that business ought to be run as a philanthropy; that we must take out the profit element and run business in the interest of the public. There is not a man outside of the insane asylum who will risk a dollar in business if there is not some chance for a profit, and the Senator knows it.

Mr. WAGNER. Business is entitled to a reasonable profit. The Senator knows that I have never stated otherwise.

Mr. FESS. Certainly.

Mr. WAGNER. I have been talking about excess profits; and if the Senator will look at the figures——

Mr. FESS. I agree with the Senator that excess profits are not justifiable.

Mr. WAGNER. That is what caused our collapse; and what I am saying to the Senator is that if he will examine the figures——

Mr. FESS. Mr. President, our collapse was due to speculation.

Mr. WAGNER. I do not care what the Senator calls it. Speculation was involved in the purchase of securities, but excess profits made excess speculation possible. The invested money went into excess production facilities. If the Senator will take the trouble to examine the figures of the time just before our collapse, he will see the disparity that existed between the tremendous profits and the low wages. Then, I am sure, he will take a different attitude.

Mr. FESS. If we continue on this kind of a program for another 18 months, Mr. President, we will hear a different story from the Senator from New York. He will then see the fruitage of his plan. Theories have been and are being hatched in the brains of individuals who could not make a living if they were turned out to make it; and men who know nothing but theories are undertaking to tell the Government how to run the greatest business in the world, and are running it on the basis of some untried theory, such as that of Soviet Russia, State socialism, the elimination of profits, not permitting anybody to make and retain any money, but, when it is made, compelling him to give it to others.

Mr. NORRIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Nebraska?

Mr. FESS. I yield.

Mr. NORRIS. Since the Senator has made his argument with the view of showing that the present program is all a failure, will he now tell us what he would do, or what his plan would be to save the situation?

Mr. FESS. That is very much the sort of question I should expect to come from the Senator from Nebraska. In order to justify one's self in opposing a half-baked theory which would result in revolutionizing the fundamental principles of the American business, it seems to be considered that one must offer some other artificial plan. I say to my friend from Nebraska that we do not need to do more than retain the fundamental principles underlying sound business, and stop penalizing business because there happens to be some culprit in its ranks. Let us not burn down the house because we have found some bedbugs in one bedroom.

Mr. NORRIS. The Senator will admit that there is a considerable depression, and we are in a dilemma. He has criticized everybody else's effort to get out of it. Why will not the Senator answer a civil question, and tell us what his plan is for getting out of the dilemma?

Mr. FESS. I would not do anything artificial.

Mr. NORRIS. Of course the Senator would not. The Senator would go to hell in 15 minutes, and take the country with him. [Laughter.]

Mr. FESS. I certainly shall be on the way to that place if I follow the Senator from Nebraska, and I will be traveling at a high rate of speed, too. [Laughter.]

Mr. NORRIS. The Senator is going to get there soon enough if he has his way. The Senator will not need to follow me. [Laughter.]

Mr. FESS. Mr. President, this is a fine display; is it not? Here we have a Senator sitting on this side of the aisle joining a Senator sitting on the other side of the aisle in criticism of the legitimate contentions on the part of a minority Senator; and yet we talk about an aggressive minority, the function of which is to call attention to the foibles and the dangers of the experimentation that is now going on. In connection with that experimentation, small reference is made to gambling with the value of the dollar—the most amazing thing that any nation ever witnessed—by which the power of the Government is being used to break down the purchasing power of our dollar, although up to date not much has been accomplished along that line, except over in Europe. That gives a suggestion of the stability of our money based upon 70 years of integrity, during which the Government never stooped to the dishonor and the perfidy of breaking its contract with its citizens as has been done during the present administration.

The time is coming, as certainly as that I am looking into the face of the Presiding Officer, when we shall see the same thing done about the public debt. We have today a large deficit, a deficit that will approach $9,000,000,000 before the year is out. We shall run our public debt next year beyond $32,000,000,000. The public debt ultimately will reach $40,000,000,000. When we get through, what will be done? The President will announce "We cannot pay it", just as it was announced that we could not pay in gold. When people asked, "What will you do if you do not pay in gold?" the reply was made, "We will eliminate the gold clause." It is not a question of whether we have a contract. A contract means nothing. The pledge of the Government has no force. Take it out! Why? There is not enough gold in the country with which to pay. On the same principle, it might be said that there are not enough bushel baskets to measure the wheat of the country. It is perfectly silly, however, to suggest that we have to have a new basket for every bushel of wheat we measure.

When we come to the time when it is plainly seen that there is no recovery, as there has not yet been in the country, with unemployment increasing after 10 months of present experiments, with 7,000,000 persons out of employment and an expenditure next year that must be repeated as it has been made this year, what will we do with the deficit? Then we will start on the road that Germany took, on the ground that there is not anything else to do. When I have talked to some of my friends on the other side who, I know, do not believe in these measures, they have said, "There is nothing else for us to do. We must do it."

So, Mr. President, we are in this remarkable program of experimentation, with the White House serving as a laboratory in which all sorts of agents and reagents are used, such as will be found in laboratories where tests are being made. There all these experiments are going on, with the President announcing, "I do not know what this will do," and then the statement is repeated here on the floor, "We do not know what this will do; we only hope it will do something"; and it is thought the expression of that hope is an excuse for going on in this way. It is like the man who does not know whether he can swim or not, but jumps into the sea in order to make ascertainment, and if he cannot swim he will be the first to admit the fact. That is a difficult situation for a country as well as for an individual.

Mr. WAGNER. Mr. President, will the Senator yield again?

Mr. FESS. I will have to yield now to the Senator.

Mr. WAGNER. I want to ask the Senator if it is his wish that we should follow the advice and guidance of those industrialists and those bankers and those public officials who, through their management of our economic system, brought us last March to the point of economic and social disintegration? Are those the doctors whose advice we should follow?

Mr. FESS. There have been evil practices. I would punish those who are guilty of malfeasance. I will join anybody in putting them behind the bars. I have not any respect for the high-jacking and racketeering that went on in certain financial circles. I have no more respect for that than has the Senator from New York. I will join anybody in bringing about proper punishment. But the Senator from New York must know that he is seizing upon incidents such as that as an opportunity on occasion to overturn fundamental principles of the country. I know that there are not less than 50 Senators on the other side of the aisle who believe at this minute that we are taking steps and sowing seeds the results of which no living person is able to foresee and that we are starting things the end of which we will never see, and it is all being done on the basis of relief. I do not believe that is a wise course to pursue.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Arkansas?

Mr. FESS. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. Will the Senator tell us what he would do? He is objecting in general terms to what is being done, and is doing that very violently, in such terms and in such spirit that I feel assured that if he will

just take us into his confidence he will tell us the way out of our troubles.

Mr. FESS. Mr. President, had the American people not made the mistake of rejecting a program constructive in every degree, except for the Reconstruction Finance Corporation, which was not a sound one, but which was much more sound at the time than its administration is today, if we had gone on with that program and not tampered with the medium of exchange and the measure of value and if we had kept our faith with our people and our country, we would have been far out of the depression today instead of being in a worse condition than the Nation has ever before known.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield further?

Mr. FESS. I yield.

Mr. ROBINSON of Arkansas. To what program is the Senator referring?

Mr. FESS. I am referring to the program which the Senator from Arkansas assisted in supporting under President Hoover in the last administration.

Mr. ROBINSON of Arkansas. Oh, the Senator is advocating a return to the Hoover program? Is that the fact?

Mr. FESS. The Senator is recommending a repeal of revolutionary measures recently enacted. I voted against the agricultural adjustment measure, and anyone who is free from political bias and loyalty to his administration will admit with me that there has never been such a dismal flat failure as the agricultural program, so confessed by its authors.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield further?

Mr. FESS. I will yield if the Senator is mild, but I will not yield if he is not mild. [Laughter.]

Mr. ROBINSON of Arkansas. I shall be compelled to be mild, whatever may be my inclination. [Laughter.] Of course, in all probability the Senator from Ohio has included me in the class which he regards as incapable of impartial action.

Mr. FESS. Oh, no; of course, the Senator from Arkansas could not do otherwise; he simply could not.

Mr. ROBINSON of Arkansas. The Senator knows that the prices of agricultural commodities on the average have been raised 57 percent.

Mr. FESS. To what is that due?

Mr. ROBINSON of Arkansas. It is due in large part to the very measures which the Senator from Ohio condemns.

Mr. FESS. That gives me another opportunity to show that the Senator from Arkansas does not know what he is talking about.

Mr. HASTINGS. Mr. President, will the Senator from Ohio yield?

Mr. FESS. No; not now. I want to go after this good man from Arkansas right now. [Laughter.]

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. FESS. No; I will not yield until I answer the Senator's statement.

Mr. ROBINSON of Arkansas. The Senator from Ohio refuses to yield. That is like him. [Laughter.]

Mr. FESS. I am going to yield after I have answered the terrible break the Senator from Arkansas just made. He said the increases in prices of agricultural commodities are due to the very measure which I am indicting. I am indicating the measure known as the "Agricultural Adjustment Act." That covers seven commodities, wheat, corn, rice, tobacco, milk, hogs, and cotton. The prices of those agricultural products have somewhat increased except as to hogs. Hogs have gone down 7 percent.

Mr. ROBINSON of Arkansas. That is just like hogs, is it not? [Laughter.]

Mr. FESS. Exactly; yes. The greatest increase in agricultural products is 175 percent, and that is in the price of wool, which is not covered by the A.A.A. The next greatest increase is in oats, 137 percent, and that is not covered by the A.A.A. The next greatest increase is in rye, 132 percent, and that is not covered by the A.A.A. The commodities not covered by the A.A.A. have increased in percentage more than the ones covered by it, and some that are covered by it have gone down. What now becomes of the Senator's statement?

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from Ohio yield at that point?

Mr. FESS. I yield.

Mr. ROBINSON of Arkansas. The Senator did not understand, I assume, that it was expected that the benefits of these measures would be confined exclusively to the particular commodities directly involved in the processes of the Agricultural Adjustment Administration?

Mr. FESS. The Senator knows that those increases were largely due to the reduction in the value of the dollar. There has been an increase, of course.

Mr. ROBINSON of Arkansas. Oh, the Senator, then, will admit that one thing the administration has done has caused a substantial increase in prices even as to those commodities which were not directly involved in the Agricultural Adjustment Act.

Mr. FESS. Yes; it increased some prices, but they were——

Mr. ROBINSON of Arkansas. I thank the Senator for that.

Mr. FESS. Does the Senator from Arkansas, this lovable character from Arkansas, this great leader—and he is a great leader—say that if I change the yardstick to 18 inches, I thereby buy more cloth because a yard costs more?

Mr. ROBINSON of Arkansas. Why, Mr. President, I could not be responsible for anything that would result from the vagaries of the Senator from Ohio.

Mr. FESS. Now the Senator has gotten himself into a box. [Laughter.] Here is a dollar that is worth 50 cents, and the price of the article purchased with a 50-cent dollar increases, but it does not feed any more stomachs.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. FESS. Wait a minute. It does not put any more clothing on anybody's back. It changes the price, but it does not change the value, just as halving the yardstick does not increase the number of yards we buy. That is the box in which the Senator has gotten himself.

Mr. ROBINSON of Arkansas. Mr. President, I do not conceive that I have gotten myself into any sort of a box.

Mr. FESS. Oh, yes; the Senator has.

Mr. ROBINSON of Arkansas. The difficulty with the Senator from Ohio is that he never knows when he is in a hole or in a box.

Mr. FESS. I am not in a hole as yet, as the Senator knows.

Mr. ROBINSON of Arkansas. Perhaps the Senator is not the exclusive judge of the situation he is in.

Mr. FESS. I would not let the Senator from Arkansas be the judge of that.

Mr. ROBINSON of Arkansas. If the Senator will permit me in his time to say so, I think that in attempting to maintain that there has been no improvement in conditions since the 4th of March 1933 the Senator is disregarding every material evidence that has been presented during the last 12 months. I think the conviction of the country is that there has been a great measure of improvement, and I do not believe the Senator can maintain successfully, even by resort to fallacious arguments, that conditions are as bad as they were on the 4th of March 1933.

If the Senator is right in that, then he has me in a hole; but if he is wrong in that, then he has concealed himself in a hole from which he cannot escape.

Mr. FESS. Mr. President, I am not going to yield to the Senator any more until I finish with him.

The Senator refers to the question of improvement. The word "improvement" may mean something different from "recovery." I have stated, and I state again, that there is no recovery. I have not said there is no relief. We are pouring out money for relief; and when we spend billions of dollars for employment as a relief measure, that money naturally goes from Washington through various hands into

business. When we limit the improvement to purchases by Government money, that is not a healthy improvement, and that is to what it is limited. It is not only not healthy, but it is a dangerous improvement unless it opens the way for substantial recovery, which it has not done up to date.

Mr. WAGNER. Mr. President, will the Senator yield?

Mr. FESS. Mr. President, I rose to speak on the question of recovery upon the basis of the report of the Labor Department. I rose to give figures which cannot be disputed, and which show that although it is claimed that 8,000,000 people have been reemployed, there still are 11,000,000 out of employment, which means—I do not want anybody to misinterpret my statement—that unemployment in industry is on the increase. That means that the taxing power, which is dependent upon industry, is lessening all the time in the degree that we make exactions upon the Government in public expenditures; and unless we change this course, Senators on the other side of the aisle will change their tone before the year is out, because without doubt that is coming.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. FESS. Not yet.

Mr. President, this program has had three great basic objects in view: One is reform, another is relief, another is recovery.

Recovery is the last thing that is being considered, but it ought to be the first thing, for we can reform and change our system into a socialistic system; we can adopt Russian sovietism here, if we desire; we can abandon American institutions of government, if we desire, and call our action reform.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield.

Mr. FESS. Just a moment.

Reform, however, will not mean anything unless there is recovery. Relief is important, and we must go through with it now. We have destroyed the local agencies for relief. The Government has stepped in, and is supplying the funds. We must go on with it; but relief ought not to interfere with recovery. We ought to have made recovery the first step; but, as we have dealt with the subject, it is the last step, and little, if anything, has yet been accomplished.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield now?

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Arkansas?

Mr. FESS. I yield.

Mr. ROBINSON of Arkansas. In his last statement the Senator has raised an issue which I am glad to meet. He states that recovery should have preceded either relief or reform. I ask Senators on the other side of the Chamber whether relief was not necessary, whether reform was not essential before any recovery might be looked for, and whether the course that has been taken by the administration has not been the logical course—first, relief, and with it reform, and then hoped-for recovery.

I admit—I admitted in my remarks this afternoon—that recovery has not progressed to an extent that justifies boastfulness; but I do believe that it was impossible for the Nation to recover without measures of relief and without measures of reform.

Mr. FESS. Mr. President, I admit to the Senator from Arkansas and the other Senators present that relief was essential while we were working out recovery, especially when the emergency was such that local agencies and State agencies could not provide it. That statement I ought to have made; but relief must be based upon recovery. Recovery cannot be based upon relief. Recovery becomes the cause from which effects can be produced. That is not true of relief. Let reform come along as, in the light of discussion, we find it wise to transform our Government from the basis on which we have developed for 150 years to some untried basis.

Mr. President, I was drawn into this discussion because of the statement of the Senator from Arkansas. We will discuss with him later the tariff measure which proposes to transfer the making of tariffs from the legislative body to the Executive. That is in keeping with the entire program from the day we abdicated our functions here and gave the President complete control over agriculture and all industries. If we go a little further, we shall see the Fascist idea fastened upon us, with the people voting for it as the people in Germany voted for Hitler. That is what I am afraid of; and while regarding with the greatest degree of respect those responsible for the administration of public affairs, it is the right and the duty of every man in this body to point out the signals of warning that today confront everyone who has watched the events of the past year.

The existing condition is not pleasant to me. It is ominous; and I am wondering whether, when the President of the United States was given this broad authority, we were surrendering the freedom and democracy for which our fathers fought and battled for more than 200 years. I think not.

Mr. McKELLAR. Mr. President, the Senator from Ohio says there has been no recovery. I desire to read from the Washington Post of March 3, 1934, a complete refutation of every word the Senator from Ohio has said. The article is headed "Commodities price range. Leaders in markets." It covers the leading commodities, farm commodities, and other commodities.

Mr. FESS. I have that statement, and I will discuss it when the Senator concludes.

Mr. McKELLAR. I do not yield to the Senator now. This is a complete answer to what he has said. This statement shows the relative prices of commodities today and a year ago.

Wheat, Chicago, a year ago, 47¼; today, 87⅞.
Corn, a year ago, 24; today, 51⅝.
Oats, a year ago, 16¼; today, 35⅜.
Cotton, a year ago, 6.09; today, more than double, 12.28.

Mr. FESS. To what is that due?

Mr. McKELLAR. That is due to the recovery measures this Congress has passed, and the President has signed.

Mr. FESS. It is due to the 50-cent dollar.

Mr. McKELLAR. I do not blame the Senator for rising and trying to interrupt, because this absolutely destroys every argument the Senator from Ohio has made today.

Mr. FESS. It is due to the 50-cent dollar.

Mr. McKELLAR. I do not yield.

The PRESIDING OFFICER. The Senator from Tennessee does not yield, and the rules of the Senate compel the Chair not to recognize the Senator from Ohio.

Mr. McKELLAR. Even cattle went up in price.

Cattle, a year ago, 4.75; today, 5.50.
Hogs, which the Senator said had gone down, a year ago brought 3.90; today, 4.50.
Lambs, a year ago, 6.25; today, 9.50.
Eggs, a year ago, 15; today, 18.
Butter, a year ago, 19; today, 27¼.
Flour, a year ago, 3.70; today, 6.55.
Steel, a year ago, 1.60; today, 1.75.
Pig iron, a year ago, 14.50; today, 17.50.
Tin, a year ago, 23.50; today, 52.55.
Copper, a year ago, 5; today, 8.
Gold, a year ago, 20.67; today, 35.

Mr. FESS. Of course.

Mr. McKELLAR. The Senator says "Of course." That "of course" is the Senator's stock argument. He has given us no facts; he has merely made assertions. I am stating the facts as to all the principal products.

Mr. FESS. Measured by the 50-cent dollar.

Mr. McKELLAR. The Senator does not know what he is talking about if he does not know any better than to deny that all commodities have gone up in price. The statement continues:

Silver, a year ago, 26.05; today, 46.25.
Zinc, 2.65 a year ago; 4.40 today.
Lead, a year ago, 3; today, 4.
Coal, a year ago, 1.85; today 2.06.

Mr. President, I ask that this statement be printed in full in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Commodities price range

Leaders in markets	Today	Yesterday	Week ago	Month ago	Year ago
Wheat (May), Chicago	87⅞	86¼	88½	89¾	47¼
Corn, yellow (May), Chicago	51⅝	50⅝	50½	49½	24.00
Oats, white (May), Chicago	35⅜	34⅜	35.00	37.00	16¼
Cotton (May), New York	12.28	11.88	12.18	10.90	6.09
Cattle, choice steers, Baltimore	5.50	5.50	5.25	5.25	4.75
Hogs, choice, Baltimore	4.50	4.50	4.62	3.55	3.90
Lambs, choice, Baltimore	9.50	9.25	10.00	8.65	6.25
Eggs, special, New York	18.00	17.00	17½	20⅝	15.00
Butter, New York creamery	27¼	26½	25¾	24.00	19.00
Flour, New York	6.55	6.70	6.50	6.87	3.70
Coffee, New York	11½	11½	11¾	10½	8¾
Raw sugar, New York	3.31	3.34	3.30	3.25	2.80
Steel, Pittsburgh, bar	1.75	1.75	1.75	1.75	1.60
Rubber, New York	10.73	10.63	10.45	9.90	6.75
Pig iron, foundry	17.50	17.50	17.50	17.50	14.50
Tin	52.55	52.37	52.40	50.00	23.50
Copper (electrolytic)	8.00	8.00	8.00	8¼	5.00
Gold	35.00	35.00	35.00	35.00	20.67
Silver	46¼	46¼	46.40	43.09	26.05
Zinc, East St. Louis	4.40	4.40	4.40	4.25	2.65
Lead (New York pig)	4.00	4.00	4.00	4.00	3.00
Coal (bituminous)	2.06	2.06	2.07	2.05	1.85

Mr. McKELLAR. Mr. President, the Senator from Ohio says there has been no recovery. I have read a list of the leading products, and every one of them has increased in price, some having more than doubled in price. The four principal ones—corn, cotton, wheat, and oats—have doubled in price and even more. Yet the Senator says there is no recovery. Will he tell the oat farmer, the wheat farmer, the cotton farmer, and the corn farmer that there has been no recovery in this country? If so, they will not accept any such statement. They know from the prices they have received that conditions are better. If the Senator wants to go to the stock market, he will find that all of the principal stocks have increased in value. Yet he talks about there being no recovery. There has been the greatest kind of a recovery; and if we can keep Senators on the other side of the aisle from constantly complaining and distorting the facts, as has been done here this afternoon, the recovery will come very much more quickly.

Mr. BYRNES. Mr. President, I ask permission to insert in the RECORD a number of editorials and news articles from newspapers of the State of Ohio; and because the Senator from Ohio seems to be so unhappy this afternoon about conditions, lest he should be forced to retire to his home in that unhappy mood, I want to read a few of the headlines.

Under date of February 14 the Cleveland Press states:

Business and jobs up 18 to 20 percent. Cleveland leads the country average in January recovery.

From the Akron Times Press:

Akron satisfied with the N.R.A. results. Objectives generally approved by business leaders.

From the Youngstown Vindicator:

Ohio business showing gains. Reserve bank reports marked change for the better.

From Toledo:

Willys-Overland tunes up plant to put 3,000 on jobs. Orders for materials to build 5,000 cars go out; operate in month.

From Canton, Ohio:

Ohio finances satisfactory, C. of C. reports. State has made excellent showing, chamber survey says. Cash balance improved. Checkup made by O.S.U. professor to guide organization.

From Youngstown:

Coal miners back at work. One hundred and fifty men win fight for $1.25 rate—scale to be retroactive.

From the Cleveland Press, February 2:

Textile mills here speed up in trade boom. Clothing manufacturers look forward to big spring business.

From Dayton, February 10:

Four million one hundred thousand four hundred and ninety-three dollars paid workers here in past month. Pay roll for January is above figures for same month in 1933.

From Akron, February 24——

Mr. FESS. Mr. President, will the Senator designate how much of that money comes from Washington?

Mr. BYRNES. Mr. President, these articles do not indicate, but if, as a result of the activities of the administration at Washington, the people of Ohio are in the prosperous and happy mood indicated by these press articles, they would sincerely hope that this administration would continue in power, and that more of this kind of relief would come from Washington. I am now speaking in behalf of the people of Ohio.

Mr. FESS. The Senator would have the people look to the same source from which the money has heretofore come, to the Government?

Mr. BYRNES. I sympathize with the Senator. I listened to him for several years during the last administration telling the people of his State and the country that prosperity was just around the corner, a corner no man, woman, or child could ever see. Now he is spending his time telling them that destruction is just around the corner, and that is a corner they never will see.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from South Carolina yield to me?

Mr. BYRNES. I yield.

Mr. ROBINSON of Arkansas. The Senator from Ohio says the only way to promote national recovery successfully is to return to the policies and practices of the Hoover administration.

Mr. BYRNES. Mr. President, the Senator from Ohio said more than that.

Mr. HARRISON. Mr. President, the Senator from Arkansas does not want to do the Senator from Ohio that injustice.

Mr. FESS. Oh, yes; he does. [Laughter.]

Mr. HARRISON. I am sure the Senator from Arkansas will disclaim any such intention.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from South Carolina yield to me further?

Mr. BYRNES. I yield.

Mr. ROBINSON of Arkansas. My friend the Senator from Mississippi must have been absent. The Senator from Ohio expressly stated, in answer to a question I asked him, that what is necessary is a return to the policies of the Hoover administration.

Mr. HASTINGS. Mr. President——

Mr. BYRNES. Mr. President, in response to a question of the Senator from New York, the Senator from Ohio said he would undo everything that had been done. I believe he was sincere and meant that he would return to the period before March a year ago, when we were passing through Congress a bill to provide for placing railroads in bankruptcy, when men were being driven out of their homes all over the United States, when millions were walking the streets, and when in the West and in the Senator's own section men were even defying the courts, when distracted citizens had lost confidence not only in the Government but in themselves; and the Senator this afternoon says he would have us return to those conditions. I dare say, however, the Senator is today the only man in the United States of America who would say he would undo everything that has been done and return to the pessimism and the despair of March 3 of last year.

Mr. FESS. We shall wait and see what the Senator will see a year from now.

Mr. BYRNES. Mr. President, my friend from Ohio is in the unfortunate position that he now is willing to admit conditions have improved, but he fears that a year from now we shall be in an unfortunate situation. No man can now say what condition we shall be in a year from now, but every man in America knows what condition we were in a year ago.

Mr. FESS. Have we improved by going in debt $9,000,000,000? Is that improvement?

Mr. HARRISON. Mr. President, the Senator talks about a year from today. The Senator from Ohio will not be here a year from today.

Mr. FESS. Mr. President, that is possible; but the Senator from Ohio will be somewhere where he can remind the Democrats of their follies.

Mr. BYRNES. Mr. President, in the hope that I may make the Senator from Ohio feel a little better, may I read some newspaper clippings to the Senator?

Mr. HASTINGS. Mr. President——

Mr. BYRNES. Mr. President, I do not care to yield at this point. I am insisting upon giving some happiness to the Senator from Ohio. He has discussed hogs, and, therefore, I advise him that a Dayton, Ohio, paper called the News has a large headline as follows:

Rise in hog prices first break farmers have had for months.

Mr. FESS. Mr. President, that is Jimmy Cox's paper.

Mr. BYRNES. Mr. President, the paper further says:

Predictions by experts are that $6 mark will soon be touched. Immediate benefits clearly apparent.

Mr. FESS. Mr. President, as I said, that is Jimmy Cox's paper.

Mr. BYRNES. I will read from the Akron (Ohio) Times-Press——

Mr. FESS. That is another Democratic paper.

Mr. BYRNES. I am glad to know that in Ohio there are now so many Democratic papers that really, Mr. President, there may be something to the pessimistic prediction of the Senator from Mississippi with respect to the Senator from Ohio. Here is a clipping from another Ohio paper, the Vindicator, of Youngstown, Ohio.

Mr. FESS. The Youngstown Vindicator is a Democratic paper.

Mr. BYRNES. I think, Mr. President, all the newspapers of Ohio are now Democratic.

Mr. FESS. Yes.

Mr. BYRNES. And nearly all of the voters in Ohio are Democratic.

Mr. FESS. They are printing the news sent from Washington.

Mr. BYRNES. Mr. President, the unfortunate situation is that the Senator from Ohio will not believe even the newspapers of his own State. He will not believe the Washington Post's figures. In fact, he will believe nothing that does not convince him that in the very near future the Government is to be destroyed, and its people returned to the poverty of the last administration; but he asks too much, and no one can join him in that wish.

I hasten to read further, Mr. President, to give the Senator a little more encouragement.

Mr. FESS. What is the next one?

Mr. BYRNES (reading):

Two million two hundred and seventy-two thousand five hundred and fourteen dollars net profit shown by Goodrich.

Mr. FESS. What newspaper is that in?

Mr. BYRNES. The Akron, Ohio, Times-Press.

Mr. FESS. Yes; that newspaper was previously referred to.

Mr. BYRNES. Will the Senator say that it was not so—that the Goodrich Co. did not make that much?

Mr. FESS. The newspapers print what is sent out from Washington.

Mr. BYRNES. That is sent out from the Goodrich Tire & Rubber Co. Does the Senator mean to say that this newspaper deliberately misstated the facts as to the financial condition of the Goodrich Co.?

Mr. FESS. The N.R.A. is spreading the news of 25 percent increase. That is not recovery.

Mr. BYRNES. I read the statement. Does the Senator say that these newspapers in the State of Ohio deliberately misstated the facts?

Mr. FESS. The newspapers are engaged in the same sort of ballyhoo in which the Senator is right now engaged.

Mr. BYRNES. Does the Senator say the newspapers have misstated the facts?

Mr. FESS. I say that the newspapers are working in support of the administration, hoping nothing worse shall come from this administration.

Mr. BARKLEY. Mr. President, what is the date line of the article sent out from Washington?

Mr. FESS. It is dated yesterday. It is a part of the ballyhoo of "The Year of Roosevelt." Everyone knows about that.

Mr. BARKLEY. Will the Senator from South Carolina tell us the date line?

The PRESIDING OFFICER. Does the Senator from South Carolina yield; and if so, to whom?

Mr. BYRNES. No, Mr. President; I do not yield, because I want to have the RECORD show that these articles were printed in Ohio. They are not sent out under a Washington date line. When the Senator from Ohio says they were sent out yesterday or the day before, the Senator is speaking, as he so often is willing to do, without having knowledge of the facts, and without seeing the newspaper clippings.

I have here an article dated February 14. It is printed in Akron, and is not printed under any Washington date line.

Mr. FESS. The Senator has been gathering those articles for several weeks in order to put them in the RECORD.

Mr. BYRNES. Well, I love to read the Ohio newspapers, especially since the Senator says they have all gone Democratic.

Mr. FESS. The Senator likes to read especially the Democratic newspapers.

Mr. BYRNES. Oh, they are really splendid newspapers.

Mr. McKELLAR. Especially since they have been showing the results of the recovery.

Mr. BYRNES. It would give the Senator much distress to know that the people in his State are recovering.

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Missouri?

Mr. BYRNES. One second, Mr. President. I have here a clipping from the Beacon Journal. The item in this Akron paper is headed:

Would absorb 2,000 idle men. Move fits United States program for fewer hours in all industries. Workers' assembly sponsors proposal, asks $21.75 salary minimum.

That is a local story. It does not come from Washington. It may make the Senator unhappy, but I dare say it brought happiness to 2,000 men who were given a chance to make a living and support their families.

Mr. CLARK. Mr. President, when the Senator speaks of making the Senator from Ohio happy by reading the news of recovery as it appears in the various newspapers of his State, of course the Senator from South Carolina realizes that the news which would make the Senator from Ohio really happy would be the unthinkable news of an impossible thing—the recovery of the Republican Party.

Mr. BARKLEY. Mr. President, I want it to appear in the RECORD also that the Akron Beacon Journal is a Republican newspaper.

Mr. BYRNES. I judge so, for the reason that the Senator from Ohio did not interrupt to say anything about it being a Democratic newspaper.

The Toledo Blade, under date of February 6, has an article headed:

GLASS WORKERS GET PAY BOOST—250 TOLEDOANS AFFECTED BY RESTORATION OF HIGHER WAGES

A wage increase of from 10 to 17½ percent for members of the American Flint Glass Workers' Union, including 250 Toledo workers, was made effective Monday, it was announced here today at the union headquarters.

If this be a Democratic newspaper, it certainly brought to the people of Ohio the happy news that 250 more were restored to jobs.

Mr. FESS. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Ohio?

Mr. BYRNES. Yes.

Mr. FESS. How much recovery does the Senator think would have come if the last administration had had nine billion dollars to distribute among the people?

Mr. BYRNES. The last administration, Mr. President, never would have distributed nine billion dollars among the

people. They might have distributed it among those who were despoiling the people, but never among the people.

Mr. FESS. Mr. President, I suppose the Senator from South Carolina is satisfied with that answer.

Mr. BYRNES. Absolutely; just as satisfied as he was with the answer of the Senator from Ohio.

Let me read further:

Increased output of steel forecast.

This is from Cleveland, by the Associated Press. I presume the Senator would say that the Associated Press is Democratic.

Cleveland district gains.

This is from the New York Times, but the story comes from Cleveland.

Operations in some industries increase—retail sales rise.

Let me read this for the Senator from Ohio, from the Toledo Blade again:

$4,200,542.38 profit shown by glass company. Business upturn carries Libbey-Owens-Ford plants into full operation.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from South Carolina yield to the Senator from Tennessee?

Mr. BYRNES. I yield.

Mr. McKELLAR. The Senator from Ohio asked the Senator about the distribution of the $9,000,000,000. What would have happened if the $9,000,000,000 had been in the hands of the last administration? How much of the $9,000,000,000 does the Senator estimate would have gone to the subsidy people in this country?

Mr. BYRNES. Mr. President, I do not want the Senator to engage in the discussion of so unpleasant a subject as that.

Mr. FESS. I would not do that with the Senator from Tennessee. That would be unkind.

Mr. BYRNES. Mr. President, let me read further, under date of February 10, a local story in the Cleveland Press showing that employment in Cleveland during the month of January was 20.7 percent higher than in the corresponding month of 1933.

Again, under date of February 5, an article from the Cleveland Plain Dealer:

Jobs in industry up sharply here. More employed than at any time since May 1931.

Another one from the Beacon-Journal, of Akron, Ohio; also an article from the Toledo Blade:

Industry looks up.

An article from Cleveland, published in the New York Times:

Cleveland trade swells. Some gains are as much as 60 percent over 1933 period.

Then from the Columbus (Ohio) Dispatch:

Telephone installations continue to show gain. Net gain of 1,056 stations reported in Columbus since August 1, 1933, with 103 for January.

Aid for building and loan depositors seen in new State regulation.

Again, from the Cleveland Plain-Dealer, an article by the financial editor, Guy T. Rockwood, headed:

Increased sales shown in month by chain stores. Run ahead of January 1933; employment gains; merchandise sales are on increase.

Mr. FESS. Mr. President, will the Senator yield?

Mr. BYRNES. Certainly.

Mr. FESS. My contention was that there has been no recovery. I have never contended that there was no business. We are spending hundreds of millions of dollars a month out of the Treasury. Certainly that money is going into business. There will be a revival of business in every State, not alone in the State of Ohio, but that is not recovery.

Mr. BYRNES. As the Senator has been heretofore told, he is in the unfortunate position of telling a man who has been out of employment for a year, whose family were in want and who now has a job once more, that he is not prospering again, that he is not looking forward to life with some pleasure. He would tell him, "You are all wrong. You are not prospering. You have not anything. You have experienced no recovery. You are in want." The Senator will never find anybody in America believing in the doctrine he has been preaching this afternoon, because the United States today is in better shape than any man in the Senate dared to believe 1 year ago it would be.

Mr. FESS. But that is relief. That is not recovery.

Mr. BYRNES. Whenever the Senator goes to the people of Ohio to tell them that he wants to draw a distinction between relief and recovery, I fear the prediction of the Senator from Ohio will be found to be correct.

Mr. President, I ask permission to have printed in the RECORD the statements from the press of Ohio to which I have referred.

There being no objection, the statements were ordered to be printed in the RECORD as follows:

[From the Press, Cleveland, Ohio, Feb. 14, 1934]

BUSINESS AND JOBS UP 18–20 PERCENT—CLEVELAND LEADS COUNTRY AVERAGE IN JANUARY RECOVERY

More jobs and more business were reported for Cleveland and the Nation today by B. C. Seiple, head of the State-city free-employment bureau, on his return from a conference in Washington.

"January employment figures were 18 to 20 percent above January of last year", he said. "This is slightly above the national average of 18 percent flat. Except Youngstown, Cleveland shows the best rate of improvement among Ohio cities. There are still signs of a shortage of skilled labor in metal trades.

"Meanwhile we are approaching May, the peak job opportunity month of the year."

The Washington conference was held by the National Advisory Council for the United States Employment Service. Mr. Seiple told of reports of heavy increases in retail trade, the textile and shoe industries.

[From the Times-Press, Akron, Ohio, Feb. 28, 1934]

AKRON SATISFIED WITH N.R.A. RESULTS—OBJECTIVES GENERALLY APPROVED BY BUSINESS LEADERS

Akron has little criticism to offer against N.R.A. and much commendation, a check disclosed today. With Recovery Administrator Hugh Johnson's fault-finding congress in session at Washington, Akron business, industrial, and commercial leaders generally approved N.R.A. objectives.

Some adjustments were believed necessary to lighten the added financial burden on small businesses, but the N.R.A. program as a whole was hailed as a step in the right direction.

Business men pointed out that increased trade, due to better times, has more than offset the additional outlay for increased wages, under codes.

[From the Vindicator, Youngstown, Ohio, Feb. 1, 1934]

OHIO BUSINESS SHOWING GAINS—RESERVE BANK REPORTS MARKED CHANGE FOR THE BETTER

CLEVELAND, OHIO, February 1, 1934.—Business conditions in the fourth Federal Reserve district are showing a marked change for the better in comparison with the picture a year ago, it is stated in the monthly business review of the Federal Reserve bank released today.

Money paid to workers on governmental projects is beginning to bounce back into retail and wholesale channels, and this circumstance combined with the fact that industrial pay rolls have increased makes the business scene a little brighter.

The review points out that department-store sales in this district in December had a 14.4 percent greater dollar value than in the closing month of 1932; wearing apparel store sales were up 15 percent and furniture-store sales, 38 percent.

"In mid-January", it is stated, "operations in most steel centers of this district expanded, and the industry was turning out steel at double the rate of January 1933."

[From the News Bee, Toledo, Ohio, Feb. 8, 1934]

WILLYS-OVERLAND TUNES UP PLANT TO PUT 3,000 ON JOBS—ORDERS FOR MATERIALS TO BUILD 5,000 CARS GO OUT—OPERATE IN MONTH

Orders for the materials necessary in the manufacture of from 5,000 to 7,500 autos by the receivers of the Willys-Overland Co. were in the mail Thursday, and actual operation of the big plant out Central Avenue was scheduled to begin in approximately 4 weeks.

This was announced by David R. Wilson, coreceiver in charge of plant operation, who said that the starting date depended largely on how soon the receivers can obtain delivery of pressed steel for bodies and forged steel for crankshafts.

Mr. Wilson added that approximately 3,000 men would be put to work here; that 500 would get employment in the company's assembly plant in Los Angeles, Calif., that several hundred more would be employed in subsidiaries in Elmira, N.Y., and Pontiac, Mich., and that 30,000 workers would be affected indirectly.

AUTHORIZES CERTIFICATES

Court orders authorizing the construction of the autos, the issuance of $750,000 in receivers' certificates to finance this construction, and the payment to the bondholders of $500,000 proceeds from the sale of unneeded machinery were signed in Federal court Wednesday afternoon by Judge George P. Hahn, who expressed his delight in the action in no uncertain terms.

Mr. Wilson characterized Judge Hahn's orders as "of paramount importance to Toledo" and added that Willys-Overland executives already were shaping their merchandising plans for the year, presumably in the belief that manufacture would continue beyond the 7,500. The operating executive, who viewed the reemployment of so many men as in line with President Roosevelt's policies, praised the Willys-Overland "77" highly.

FEW CHANGES MADE

"Introduced a year ago, it still stands as America's only fully stream-lined economy car", he said. "Only a few changes have been made in the 1934 Willys model. The louvres have been more completely stream-lined to fit in the entire styling of the car and wire wheels have replaced the pressed disk wheels."

The court orders were handed to Judge Hahn by Bert P. Hebenstreit, a young attorney in the office of Brown & Sanger, who has been in charge of the receivers' legal work during the past week because of a brief illness of Sigmund Sanger. Both Mr. Sanger and Walter Brown, former Postmaster General, were in court at the time.

"I have here the orders", Mr. Hebenstreit said.

"All right", said the judge, "you can't get them up here any too soon." Then, as he finished his signature, he added:

"I've always felt that the seventh day of the month was a lucky day for me and this proves it."

FINAL HEARING IS BRIEF

The final hearing on the orders, which were drafted after a month and a half of disagreement between attorneys for the bondholders and those for the general creditors, consisted simply of Hebenstreit's handing the papers to Judge Hahn after George Welles, attorney for the bondholders' trustee, had made a hurried inspection of a report by the receivers showing that they already had agreements from purchasers of the cars and of the receivers' certificates.

This report was in process of preparation in the Brown & Sanger office when court opened.

While it was awaited, the treasurer of Lucas County appeared, through Assistant Prosecutor Paul L. Alexander, to press an application for $65,000 in personal taxes due, and Charles W. Racine, special master to determine claims against the receivers, appeared to ask for an extension of time when his report is due to May 1.

TAX DECISION DUE SOON

The bondholders are opposing payment of the personal taxes and Judge Hahn is expected to make a decision in the near future, now having briefs before him. Mr. Racine reported that more than 1,000 creditors had placed claims for more than $12,000,000. This does not include the bondholders' claim for $2,000,000, plus interest. It is expected that some of the claims will be disallowed.

The last possible chance of the order not going through disappeared before court when the National Supply Co., 384 South Erie Street, withdrew an objection it had filed as the claimant to a $35,054 mechanic's lien against the Willys-Overland for machinery and supplies.

[From the Repository, Canton, Ohio, Feb. 4, 1934]

OHIO FINANCES SATISFACTORY, CHAMBER OF COMMERCE REPORTS—STATE HAS MADE EXCELLENT SHOWING, CHAMBER SURVEY SAYS—CASH BALANCE IMPROVED—CHECK-UP MADE BY OHIO STATE UNIVERSITY PROFESSOR TO GUIDE ORGANIZATION

COLUMBUS, OHIO, February 3.—Results of a survey on the financial condition of the State, conducted at the request of the Ohio Chamber of Commerce by Walter D. Wall, certified public accountant and professor of accounting in Ohio State University, were revealed here today.

The survey, which was taken to enable the chamber to consider intelligently tax problems and legislation, showed that at the close of 1933 there was a cash balance in the general revenue fund of $716,902.93, but that there were encumbrances payable amounting to $2,055,472.45, leaving a net deficit in the general revenue fund of $1,338,469.52.

SAYS REPORT REASSURING

"The report", said a bulletin issued by the chamber, is "reassuring."

"In comparison with past years, the State's finances make an excellent showing", the bulletin said.

After all of the funds, including the general-revenue fund, the highway maintenance and repair, highway improvement, institutional building, State office building, and Ohio Racing Commission, are taken into consideration, the report disclosed, it is found that the total cash balance is $9,300,334.34, with encumbrances payable amounting to $7,374,914.15, or a net cash balance of $1,925,420.19.

In addition to the above, the report shows, there are certain subsidy funds, such, for instance, as educational aid and poor relief, which show a cash balance of $2,896,741.65, but with encumbrances payable of $343,425.87, or a net cash balance of $2,553,315.78.

CASH BALANCE LARGER

Total revenues for 1933, exclusive of highway maintenance and repair, highway construction (including Federal funds), the racing commission, and office building funds, amounted to $27,110,066.49, whereas the expenditures from such revenues and funds amounted to $27,317,613.22.

The amount of the encumbrances in the general-revenue fund were not as large at the end of 1933 as they were at the end of the previous year and the cash balance on hand was greater than at the end of 1932, the report stated.

[From the Vindicator, Youngstown, Ohio, Feb. 7, 1934]

COAL MINERS BACK AT WORK—ONE HUNDRED AND FIFTY MEN WIN FIGHT FOR $1.25 RATE—SCALE TO BE RETROACTIVE

By James Gregg

SALEM, February 7.—Idle 3 weeks, 150 striking pick miners returned to work this morning as 9 mines in the Salem-Leetonia-Greenford district reopened under a ruling made late yesterday by the divisional labor board.

The miners will receive $1.20 and $1.25 a ton for coal mining, including "dead work." The scale, approved last fall, was made retroactive to October 1.

Under the ruling operators will refund to miners the difference between the agreed scale and wages paid since October 1. The approved scale sets wages at $1.20 for coal 3 feet thick or more and $1.25 for coal under 3 feet thick.

The labor board, representing division 2, district 6, in Ohio, ruled that the operators were in error in abrogating the $1.20-$1.25 scale, including all "dead work."

The miners have contended that the wage agreement was made effective from October 1, 1933, to April 1, 1934, but that it never was put into effect, and that they have been receiving 88 cents per ton for coal mined, plus certain charges for "dead work." They claim that, under the wage paid, coal could be mined for 93 cents to $1.06 per ton.

The operators contend that in signing the wage agreement they believed the scale was to be in effect but a few days.

The board's ruling was signed by John Wynn, Canton, chairman; Ivor Harris, New Philadelphia; F. J. Barnes, Coshocton; and W. W. Dunn, Salem, board members; Thomas J. Price, Midvale, miners' commissioner for Ohio, and W. H. Haskins for the operators' commission of Ohio.

[From the Press, Cleveland, Ohio, Feb. 2, 1934]

TEXTILE MILLS HERE SPEED UP IN TRADE BOOM—CLOTHING MANUFACTURERS LOOK FORWARD TO BIG SPRING BUSINESS

Bobbins are spinning gaily in Cleveland textile mills these days and nimble fingers are flying over coats and dresses getting ready for the biggest spring trade in years.

There is no question about it, clothing manufacturers will tell you, smiling, business is getting decidedly better. Old customers are ordering much heavier than last year. New customers are appearing.

Plants are running on capacity time with capacity staffs. Volume of anticipated production has increased anywhere from 10 to 30 percent.

STORES STOCKING UP

Of course the clothing industry is an off-and-on business. This is always a busy time of the year for the manufacturers. Merchants are taking inventory and stocking their shelves for spring.

Prohibited from overtime work by N.R.A., employers have added many employees in an attempt to catch up with demand. Pay rolls have increased as high as 50 percent.

Here are some typical examples:

Printz Biederman Co., makers of women's coats: Reports orders 35 percent ahead of last year. Has outlined ambitious spring program which is expected to keep plant running full time through April. Pay rolls up 25 percent.

Korach & Co., makers of women's dresses: Order volume up 10 to 30 percent. Full staff of 150 at work. Decidedly better feeling of prospects ahead. Pay rolls up 30 to 50 percent.

Friedman-Blau-Farber Co., knit goods: Business very much better than last season's production value, and pay rolls up approximately 25 percent.

Industrial Rayon Co.: Business looking up all along the cloth-manufacturing line.

Joseph & Feiss Co., men's clothing: Running to capacity with staff of 1,650 as compared to 1,200 last season. Will take 3 months to finish present orders on hand. Prospect of $2,000,000 spring business as compared to $1,250,000 last year. Orders on unit basis show 50 percent increase.

Bloch Co., men's clothing: Running full speed; still too early to tell whether orders will fulfill expectations, which are for considerably increased business.

Stone Knitting Mills Co.: Feeling regular seasonal increase and doing good business, though not appreciably better than last year.

Federal Knitting Mills Co.: Business good. Volume not expected to exceed 1933 noticeably.

Keller-Kohn Co., women's coats: Full staff of 300 at work. Increase over last spring's trade noticeable, with feeling it will grow still larger.

Cleveland Worsted Mills: General improvement noticed since last November. Outlook considerably better than in past, attributed to generally improved conditions throughout Nation. Export trade still lagging due to unsettled foreign exchange.

And so on down the line. From mill to maker, worker to consumer, wholesaler to retailer, a lighter, brighter spirit is making itself felt. New money, new business, new hope.

[From the News, Dayton, Ohio, Feb. 10, 1934.]

$4,100,493 PAID WORKERS HERE IN PAST MONTH—PAY ROLL FOR JANUARY IS ABOVE FIGURES FOR SAME MONTH IN 1933

Total pay rolls in Dayton in January amounted to $3,484,308.46, according to figures released Saturday by A. C. Wolf, secretary of the Dayton Clearing House Association.

The total does not include the Civil Works Administration pay roll, which for January amounted to approximately $616,185.10.

Comparatively, the January figures, including both industrial and C.W.A. totals, are only $431,695.94 less than the December 1933 figure of $4,532,189.50. The January total exceeded by $1,137,065.90 the pay roll for January 1933, which was $2,963,427.66.

Business and financial leaders were much enthused by the payroll reports, particularly as to its comparison with December 1933, which was unusually large.

They pointed out the fact that the amount of money paid workers in the various business interests here shows a decided improvement in business conditions.

The total C.W.A. pay roll for Dayton for the week ending Saturday amounted to $96,474.55, according to Walter Conway, disbursing officer.

That amount of money was less than the total for last week. The difference was caused by weather conditions and the fact that the pay roll on C.W.A. projects at Wright Field was paid out of the Columbus office. Wright Field pay roll totals approximately $12,000.

Conway also reported that 7,277 men were given employment for a total of 158,736 hours.

[From the News, Dayton, Ohio, Feb. 10, 1934]

RISE IN HOG PRICES FIRST BREAK FARMERS HAVE HAD FOR MONTHS—PREDICTIONS BY EXPERTS ARE THAT $6 MARK WILL SOON BE TOUCHED—IMMEDIATE BENEFITS CLEARLY APPARENT

The first real good break farmers have had in a month of Sundays is the steadily growing price quoted on hogs. The rise has been almost phenomenal. What the future holds is any man's guess, but if present prices hold, farmers will be in the way of seeing a profit in the business of raising and feeding hogs for market. Predictions and forecasts, issued by acceptable authorities, promise $6 hogs within a few days, and there are some who give even higher figures. At present prices the quotations on corn and hogs more nearly represent an even ratio between the two commodities than has been the case for several months.

Farmers with feed lots crowded with hogs that were quoted around $3 or slightly higher knew they were feeding at a loss when corn was quoted at 40 to 45 cents a bushel. The position of such farmers was unenviable, because they were forced to continue feeding in order to prepare the animals for market, while at the same time they knew the practice was ruinous unless hog prices advanced. With improved prices feeding operations may be carried on with greater confidence. Reliance on still higher prices is not entertained by experienced farmers, who realize that market fluctuations may change the picture overnight.

Government experts explain that the current upward tendency in hog prices is caused by the sweeping policy of the A.A.A. last fall in drawing pigs from the farm to market centers. The greater number of the pigs so taken from farms would now be coming into market, with the effect of retarding price advances. If this is the correct explanation it proves the wisdom of the plan, which, briefly, was and is to reduce production in order to raise prices. The present benefit to farmers is apparent when consideration is given to the unbalanced ratio between corn and hogs which has prevailed for months.

If farmers still had those pigs in feed lots, at this time about ready for market, there is little doubt prices would be even lower than they were a few days ago, because of an oversupplied market, and 40- to 45-cent corn would be fed to hogs at a possibly lower price than prevailed a short time ago.

The Government's plan to reduce production and raise prices is simple and easily understood. It was not so easily put into effect. Millions of hogs and pigs had to be bought outright and practically destroyed in order to reduce the number of swine in the country to meet the calculations of A.A.A. experts. Accepting present price schedules as directly creditable to the plan, farmers are joining the Government's corn-hog program by thousands in every section where hogs are raised commercially.

In southwestern Ohio but few hog-feeding farmers will stay out of the program. The response is almost unanimous among farmers who have a feeling that they should be sufficiently patriotic to do their individual best to help forward the tremendous program. Here and there a farmer prefers to stay out, and the Government apparently contemplates no action against him. They may continue to produce their usual quota and market them under the advantage in price secured by the A.A.A. program. Nevertheless, community feeling is potent and those who choose to decline to cooperate are in a more or less marked position.

The Government asks no one to incur loss. Production reduced to the prescribed base will decrease the normal number of hogs normally produced, but the loss will be repaid to the farmer, which is a most generous proposition, as all fair-minded persons will admit.

The ultimate purpose justifies whatever means may be required to accomplish it, but the Government cannot bring it about without the practically unanimous support of hog feeders everywhere.

[From the Times-Press, Akron, Ohio, Feb. 14, 1934]

$2,272,514 NET PROFIT SHOWN BY GOODRICH—SALES INCREASE 6.43 PERCENT FOR 1933, SAYS ANNUAL REPORT—POSITION IS GOOD—LAST YEAR'S STATEMENT REVEALED LOSSES OF $6,582,148

Net profit of $2,272,514 was shown today in a preliminary statement of the B. F. Goodrich Co. 1933 annual report.

A loss of $6,582,148 in 1932 was changed to the two and a quarter million profit last year, according to the report read at a meeting of directors in New York.

SALES UP 6 PERCENT

Last year's sales amounted to $79,293,495, an increase of $4,791,691 or 6.43 percent over the previous year. Current assets were placed at $53,322,766 and current liabilities $8,330,854, a ratio of 6.4 to 1.

Cash, short-term deposits, and Government securities amounted to $12,091,364, which exceeded total current liabilities by $3,760,510, according to the report.

The company was seen in good position to meet 1934 by reason of increase in prices of raw materials. Materials on commitment at the end of the year were at prices below the market at that date.

MOHAWK SHOWS LOSS

The difference between cost and face value of company bonds and debentures acquired during the year and credited to income amounted to $2,374,937, compared with $2,500,957 in the previous year.

An operating profit of $316,488 was shown by the Mohawk Rubber Co. report, issued at the annual meeting yesterday, but adverse conditions reduced this to a net loss of $181,141.

[From the Beacon Journal, Akron, Feb. 24, 1934]

WOULD ABSORB 2,000 IDLE MEN—MOVE FITS UNITED STATES PROGRAM FOR FEWER HOURS IN ALL INDUSTRIES—COLONEL LEA VISITS AKRON—WORKERS' ASSEMBLY SPONSORS PROPOSAL, ASKS $21.75 SALARY MINIMUM

By Harry H. Harriman

The Goodyear Tire & Rubber Co., Saturday, through its workers' industrial assembly, called upon the N.R.A. for a 30-hour minimum week and a minimum wage of 60 cents an hour for all the codes of the rubber industry.

The present code provides for a 36-hour week and a minimum rate of 40 cents an hour.

The action, taken with acknowledged support from C. C. Slusser, vice president and general factory manager, was passed unanimously by the senate and house of representatives of the assembly Friday afternoon.

FORWARDED TO JOHNSON

Copies of the resolution were immediately forwarded to Gen. Hugh S. Johnson, N.R.A. Administrator, and Goodyear officials.

Meanwhile, heads of the tire industry in Akron were speculating over significance of a "mysterious" visit Col. Robert S. Lea, Assistant N.R.A. Administrator, is reported to have paid Akron last Wednesday and Thursday.

Reached in Washington Saturday, Colonel Lea told the Beacon Journal his visit to Akron was "entirely personal" and added, "I didn't talk a word of business while there."

The Assistant Administrator said that Goodyear's action "anticipates a program" which will be discussed the week of March 5, when more than 7,000 business executives assemble in Washington for conferences on the N.R.A. and its future.

DENIES PREVIOUS KNOWLEDGE

Lea denied he previously had known of Goodyear's new labor and wage stand, but said it was "in line with policies the Government is advocating."

Goodyear's action is believed to be the first taken by a major company of the country in asking for more liberal labor and wage provisions in its industry's N.R.A. code.

The assembly's resolution pointed out that although the tire industry is operating at "near normal production schedule" there are 2,000 former Goodyear workers who have not been taken back on the pay roll under the 36-hour-a-week working plan.

WOULD AID WORKERS

"A shorter work week with a corresponding increase in pay would enable these workers to be brought back at Goodyear and consequently relieve the C.W.A., P.W.A., and direct charity."

The statement also asks that weekly minimum wage for all salaried employees be increased to not less than $21.75.

Slusser, who is the "official contact" between the workers' organization, which has been functioning for 15 years, and the company, Saturday announced his hearty approval of the resolution.

"It will be a good thing for Akron and help Akron companies", he said.

AVERAGE WAGE HIGH

"The average wage here is 85 cents an hour, while outside of Akron it is about 70 cents. Smaller companies in other parts of

the country should pay the same labor rates that Akron tire manufacturers pay", he added.

Although most Akron labor leaders have held out for the 60-cent wage minimum Goodyear asks, Coleman Claherty, American Federation of Labor representative, said 60 cents would not be a satisfactory base rate.

"If the industrial assembly passed such a resolution, it plainly was at the request of the company management which dominates the assembly. They know very well that labor will not be satisfied with such a minimum wage.

MUST BE BETTER

"They will have to do better than that before they forestall our efforts.

"If the Goodyear has millions to give to the Sears, Roebuck Co., we want to get part of that money for the workers."

John House, president of the Goodyear rubber workers' union, said:

"It is right in line with what organized labor wants. In fact, it is not surprising that the assembly passed such a resolution, since most of the assemblymen are also members of our union."

WORDING OF RESOLUTION

The complete resolution reads:

"Subject: Protesting maximum hours and minimum wage as defined in the rubber tire manufacturing, rubber mechanical goods, rubber reclaim, and rim manufacturing codes:

"Whereas it is very evident at this time that the present maximum number of hours per week as defined within the abovementioned codes will not absorb the labor classified under these codes; and

"Whereas the rubber industry is at present operating on a near normal production schedule; and

"Whereas there are approximately 2,000 former employees of the Goodyear Tire & Rubber Co., who to date have not been recalled on the Akron plant; and

REDUCE CHARITY BURDEN

"Whereas a shorter work week with a corresponding increase in pay would enable these workers to be brought back at Goodyear and consequently relieve the C.W.A., P.W.A., and direct charity; therefore, be it

Resolved by the Fifteenth Goodyear Industrial Assembly (both bodies concurring), That the labor provisions for all factory workers under the above codes be the same, with a maximum week of 30 hours and a minimum wage of 60 cents per hour, with a leeway of 80 hours per year as at present, and that the weekly minimum wage for all salaried employees be increased to not less than $21.75."

It was signed by Jack Shirley, president, and C. D. Clark, secretary of the senate, and H. W. Harmon, speaker, and Paul Hedges, secretary of the house of representatives.

[From the Blade, Toledo, Ohio, Feb. 6, 1934]

GLASS WORKERS GET PAY BOOST—250 TOLEDOANS AFFECTED BY RESTORATION OF HIGHER WAGES

A wage increase of from 10 to 17½ percent for members of the American Flint Glass Workers Union, including 250 Toledo workers, was made effective Monday, it was announced here today at the union headquarters.

M. J. Gillooly, president; Harry H. Cook, vice president; Charles J. Shipman, secretary-treasurer; and Arthur Elbert, assistant secretary-treasurer of the union, returned here today from Pittsburgh following a 10-day conference with manufacturers at which the wage levels were lifted to affect all of the 15 departments of the union. E. J. Barry, chairman of the Manufacturers Association of Pressed and Blown Glass Ware, presided at the meeting.

The increases restore the wage level for the glass workers to that in effect in 1929 and 1930, which marked the salary peak. It was agreed also that the workers will operate under the N.R.A. code for the glass industry which means, according to Mr. Gillooly, that some of those who suffered salary reductions of 17½ percent will actually receive increases amounting to 21 percent.

The agreement will remain in effect until the first Monday in September when another conference will be held in Atlantic City.

[From the Baltimore Sun, Jan. 8, 1934]

INCREASED OUTPUT OF STEEL FORECAST—PRONOUNCED FEBRUARY-MARCH "BULGE" IN PROSPECT, TRADE MAGAZINE SAYS—PENNSY LOAN FACTOR—EXPECTED TO RELEASE HEAVY TONNAGE FOR COMPLETION OF RAILROAD'S IMPROVEMENTS

CLEVELAND, January 7.—A pronounced increase in the production of steel in February and March is considered likely, the magazine Steel said today.

The "pronounced February-March bulge", as the magazine described it, will follow the expected placing of steel orders by the railroads, the automotive and the building industries, and a 60-percent production rate is seen as a possibility by steel executives, the magazine said.

TWICE RATE OF YEAR AGO

"Miscellaneous requirements from a diversified list of customers, plus some moderate automotive, railroad, and structural business, have been sufficiently broad to prevent the steel works operations last week from going below 31 percent, exactly twice the rate in the comparable week last January. All indications appear to assure a rebound of several points this week."

Operations in the Wheeling, New England, Cleveland, and Detroit districts increased during the week, in the case of Detroit 27 points to 79 percent. Operations in the New England district rose 23 points to 95 percent, in Wheeling 15 to 56, in Cleveland 6 to 51.

At the same time Chicago operations dropped off 6 points to 34, Youngstown was down 6 to 32, Pittsburgh 5 to 22, eastern Pennsylvania 2 to 22½. Birmingham remained at 52.

ORDERS UNEXPECTEDLY HEAVY

Unexpectedly heavy steel orders were received during the first week of January and with inventories out of the way the general manufacturing industries are expected to negotiate their first-quarter contracts, the magazine said.

Approval by P.W.A. of a $77,000,000 loan to the Pennsylvania Railroad is expected to release a heavy tonnage of structural material for completion of the railroad's electrification program, construction of 7,000 freight cars and orders for 100 locomotives.

The daily average pig-iron production for December was 38,456 gross tons, 6.5 percent higher than November. The total for the month, 1,192,136 tons, brought the output for the year to 13,221,707 tons, 52.3 percent over 1932.

Steel's iron and steel composite is unchanged at $32.42; the finished steel composite remains $51.10; while the scrap index is up 13 cents to $10.83.

[From the New York Times, Jan. 27, 1934]

CLEVELAND DISTRICT GAINS—OPERATIONS IN SOME INDUSTRIES INCREASE—RETAIL SALES RISE

CLEVELAND, January 26.—Operations in some of the smaller industries of the district in early January expanded at a greater-than- or contrary-to-seasonal rate. The National Pottery Show at Pittsburgh had more buyers in attendance than for several years and orders for china and glassware were placed in large volume. Plants now are advancing operating rates. Orders were over 50 percent in excess of January 1933.

Paint sales also have increased contra-seasonally as Civil Works Administration projects consumed large amounts. Retail sales also have increased.

Construction contracts awarded in this territory the first half of January were at a rate exceeding the December figure, which was the highest for any month since May 1931. Public Works contracts, financed by Federal funds, continue to represent by far the greater part of total building.

Steel operations and work at automobile parts and accessories plants increased the past week as a result of orders received from automobile producers, who, according to reports, have more orders than in several years.

[From the Blade, Toledo, Feb. 22, 1934]

$4,200,542.38 PROFIT SHOWN BY GLASS COMPANY—BUSINESS UPTURN CARRIES LIBBEY-OWENS-FORD PLANTS INTO FULL OPERATION

The Libbey-Owens-Ford Glass Co. in 1933 had a net profit of $4,200,542.38 as compared to a loss of $295,019.16 in 1932.

These figures of the upturn that has favored this company's business are contained in the annual report mailed to stockholders Wednesday night.

The report shows that during 1933 all convertible gold notes of the company were retired and notes of a par value of $2,638,000 were purchased for cash, the remainder with a par value of $5,400,500 being exchanged for 216,200 shares of common stock of the company, leaving the only security issue of the company the common stock.

CAPITAL SURPLUS INCREASED

The report shows that there was an increase in the capital surplus of the company of $4,050,375. In the year, too, the company authorized the purchase in the open market of 8,000 shares of the common stock. This stock was purchased at an average price of $25.94 per share and since has been retired, having the status of unissued, authorized shares.

Cash and Government securities of the company totaled $4,138,988.58 at the close of the year, a gain of $209,722.02 for the year.

AUTO BUSINESS HELPS

The report says that plate- and safety-glass sales increased substantially as a result of the revival of the automobile business in the latter part of 1933. Motor-car production climbed 43 percent over the low level of 1932, the report says. The increase in safety glass, the report says, was caused not alone by the pick-up of the automobile industry but to the use of safety glass by industry generally. The report says that 40 percent of the glass used in the motor industry in 1933 was safety glass as compared with 20 percent in 1932.

WINDOW SALES GAIN

During the last months of 1933, also, the report says, there was a sharp increase in window-glass sales. The report says that to cooperate fully with the recovery program the company, July 16, 1933, restored one of the two 10-percent wage and salary reductions made in the previous 2 years, and put into effect the minimum wages of the N.R.A. code of the glass industry. In addition, the report says, the company introduced the 6-hour day, providing work for 1,200 new employees. All employees, the report said, received the equivalent of 8 hours' pay for the 6 hours of work.

ALL FACTORIES OPERATE

All factories of the company, the report says, are in operation and maintained at a high rate of efficiency. The plate-glass plant at Ottawa, Ill., which was closed for 2 years, resumed operations last July, the report adds. A $100,000 addition to the safety-glass plant was built in the last year and work has been started on a storage plant at Rossford. The new building will cost $250,000.

The report says the company resumed dividends during the year at the rate of 30 cents a share a quarter. The balance sheet of the company shows it has assets of $34,309,609.89.

RESERVE IS $2,044,827

It has set up reserves for contingencies and for rebuilding furnaces amounting to $2,044,827.84, and at the end of the year had an earned surplus of $7,427,150.70 and a paid-in capital surplus of $7,268,770.60, or a total of $14,695,921.30.

The company showed a manufacturing profit for the year, after deducting material costs, labor, and manufacturing expenses, of $7,671,657.75. It charged off in depreciation on manufacturing properties $1,794,533.93. Other income, including dividends, royalties, etc., amounted to $448,671.29.

[From the Plain Dealer, Cleveland, Ohio, Feb. 5, 1934]

JOBS IN INDUSTRY UP SHARPLY HERE—MORE EMPLOYED THAN AT ANY TIME SINCE MAY 1931, CHAMBER OF COMMERCE REPORTS

By Paul L. Einstein

Cleveland industry has hit a stride that bids fair to return most of its remaining unemployed to places on factory pay rolls before the spring of 1934 is out.

With forces up to a level not seen since May of 1931 and the peaks of last summer already left well behind by soaring activity in January, Cleveland is stepping out with a pace that even the optimistic had not dared to anticipate.

The chamber of commerce survey of employment in 100 representative concerns shows that on January 31 these concerns had 2,261 more on their pay rolls than in August, when the best previous record since the depression began was made, and 17,362 more than in the gloomiest days last March. The January 31 total was 59,840 employees.

Fifty-four of the 100 reporting concerns increased their forces in January and 27 of them expect to make further additions in the current month, while only 3 anticipate any lay-offs.

ADVANCES DISTRIBUTED

"The most significant thing about the January record", J. W. Vanden Bosch, the chamber statistician, said yesterday, "is that the advances were well distributed throughout almost every line. Seasonal declines in one branch of the textile industry, for instance, were more than made up by extraordinary advances in another division of the same field. The automobile and iron and steel activity was particularly strong and encouraging."

Increases in the iron and steel group from December to January were 12.2 percent, or 1,690 men, and in the automotive group 15.7 percent, or 1,713 men.

Industrial observers calculated that succeeding months will find a steady upward climb in the employment index for industry, whether or not there is any marked rise in the index of general business activity, because Cleveland in predepression years almost invariably saw longer factory pay rolls in the late winter, spring, and early summer months than in January. Even including the depression years, February activity has generally stepped fractionally ahead of January.

UPTURN FOUNDED ON DEMAND

With the extraordinary influences which built up the July, August, and September peaks of 1933 behind us and out of the way, the present upward trend is founded on actual current demands, rather than anticipations of soaring prices and mounting buying power, which led to the piling up of huge inventories. The goods are for the market and not for the warehouses.

The January employment record showed the following changes for the various fields covered by the chamber survey: Food and food products, off 2.1 percent; textiles, up 1.8 percent; iron and steel, up 12.2 percent; lumber, up 7.7 percent; paper and printing, up 0.5 percent; chemicals, off 1.6 percent; nonferrous metals, up 2 percent; automobiles, up 15.7 percent; miscellaneous, off 1 percent.

The aggregate was up 5.8 percent over last month, for an increase of 3,303 persons.

[From the Blade, Toledo, Ohio, Feb. 1, 1934]

INDUSTRY LOOKS UP

Expansions of Toledo industries last year exceeded the losses by more than $2,000,000. There are now listed by the chamber of commerce exactly 1,106 industrial concerns in this city. A new high mark is thus established.

Of course the total number of industrial employees is still much below the peak of the late 1920's, but this is attributable chiefly to the virtual shut-down of the Overland under receivership during reorganization negotiations. However, a definitely encouraging report of absorption of workers by private industry comes from local C.W.A. headquarters. Fifty to one hundred men are going back daily to the stores and factories, making place for equal numbers of idle men to take their places on C.W.A. jobs to maintain the local quota of that organization.

The gain, at least in some respects, is permanent. The greater diversification of local industry brings about gradually a greatly to be desired condition.

While Toledo wants, and must have, great factories, it should not be dependent upon any one industry for well-being and prosperity.

[From the New York Times, Feb. 17, 1934]

CLEVELAND TRADE SWELLS—SOME GAINS ARE AS MUCH AS 60 PERCENT OVER 1933 PERIOD

CLEVELAND, February 16.—Comparison of current business operations in most lines of importance in this district reveal some startling gains from a year ago. Besides, considerable added improvement has occurred in recent weeks in many lines.

Consumption of crude rubber in February is estimated as 60 percent above a year ago at rubber and tire plants. Operations at china and pottery plants have been increasing and orders and shipments for the year to date are reported 50 per cent ahead of the same period of 1933.

[From the Dispatch, Columbus, Ohio, Feb. 14, 1934]

TELEPHONE INSTALLATIONS CONTINUE TO SHOW GAIN—NET GAIN OF 1,056 STATIONS REPORTED IN COLUMBUS SINCE AUGUST 1, 1933, WITH 103 FOR JANUARY; AID FOR BUILDING AND LOAN DEPOSITORS SEEN IN NEW STATE REGULATION

By Albert E. Redman

Installations and cancelations of telephone stations, still one of the best guides for general business, continued to show improvement in Columbus, it was revealed in the latest report of H. W. Lindaman, district commercial manager for the Ohio Bell Telephone Co. here.

Net gain in the number of stations in Columbus since August 1, which represented the low point in the number of stations in service, was 1,056.

Gains for the various months since August 1 follow:

August 82, September 312, October 278, November 76, December 95, January 130, and the first week of February 83.

In order to make the gain of 130 stations in January, according to Lindaman, it was necessary to connect 902 telephones, or practically 7 stations for each 1 gained.

At the end of January 1934 the number of stations in service in Columbus was 60,559, which is 3,096 less than was in service at the same time last year.

"Since the loss for the first 7 months of 1933 was 4,545, it will be observed that the company is slowly reducing severe losses sustained up to the turning point, August 1," Lindaman said.

[From the Plain Dealer, Cleveland, Ohio, Feb. 5, 1934]

INCREASED SALES SHOWN IN MONTH BY CHAIN STORES—RUN AHEAD OF JANUARY 1933—EMPLOYMENT GAINS—MERCHANDISE SALES ARE ON INCREASE

By Guy T. Rockwell

First reports of leading chain stores show that January business was considerably in excess of the corresponding month last year, reflecting the increase in spending that is being done as a result of the increase in employment and business activity.

According to the Alexander Hamilton Institute, 37,249,000 persons were employed in the United States in December exclusive of C.W.A. projects, an increase of 415,000 over November.

S. S. Kresge sales last month were 14.51 percent greater than January 1933, totaling $8,824,000. The company was operating 721 stores January 31, just 2 more than a year ago. F. W. Woolworth reported January sales as $18,137,341 against $15,844,684, while W. T. Grant's sales totaled $4,832,562 against $4,272,878 and Neisner Bros. $984,463 against $793,048.

The advance guard of 12,000 merchandisers reaching Chicago yesterday for the twenty-fifth semiannual Interstate Merchants' Council convention reported business ranging from 28 to 60 percent ahead of last year. C. D. Southard, wholesaler, stated that "we are entering a period of rising prices. Merchants generally have depleted their stocks and are anxious to replace them, taking advantage of any price increases."

From Dayton comes the report that business of the National Cash Register Co. last week was substantially better, domestic sales being 63.7 percent above January 1933, S. C. Allyn, general manager, reports.

THREE OHIO PLANTS BENEFIT

Railroad-equipment plants in Canton, Columbus, and Lima, Ohio, will benefit from the equipment business allocated by the Chesapeake & Ohio and Nickel Plate. The official allocations announced yesterday total $24,170,000, which, with the Erie awards announced Saturday, bring up the equipment purchases of the Van Sweringen roads to approximately $35,000,000.

Of these awards the Ralston Steel Car Co. of Columbus will get 750 hopper cars, the Canton Car Co. 500 hoppers, and the Lima Locomotive Works five 0–80 locomotives and 20 extra tenders for the Nickel Plate.

The American Locomotive Co. was awarded 15 of the 2–8–4 type locomotives and tenders for the Nickel Plate. When it is recalled that this latter order calls for more locomotives than were bought by all the railroads in 1932 and 1933 the importance of this buying looms all the greater. The car orders announced yesterday are as follows:

American Car & Foundry Co., 1,900 gondola, hopper, and automobile; Pullman Co., 1,150 box cars; Standard Steel Car Co., 1,150 hoppers; Pressed Steel Car Co., 500 hoppers; General American Car Corporation, 2,250 hoppers; Ralston Steel, 750 hoppers; Bethlehem Steel Co., 675 gondolas; Canton Car Co., 500 hoppers; Mount Vernon Car Manufacturing Co., 100 furniture cars; Ryan Car Co., 25 flat cars; Pullman Car Manufacturing Co., 7 coaches; St. Louis Car Co., 12 mail and express cars and 15 coaches.

PENNSY ORDERS AIR BRAKES

Other railroad purchases announced yesterday included 7,000 sets of air-brake equipment placed by the Pennsylvania with the Westinghouse Air Brake Co. The equipment will cost about $1,000,000. The Philadelphia & Reading Coal & Iron Co. announced 1,000 men were returning to work with the reopening of the Alaska Collier at Mount Carmel, Pa.

CAR LOADINGS GAIN

Companies reporting yesterday showed that car loadings for last week were substantially above corresponding week last year. The C. & O. reported 25,720 cars against 25,937 handled the previous week and 22,388 a year ago. On the Atchison loadings totaled 20,607 against 21,621 week before and 19,358 in 1933 week. The Nickel Plate handled 11,725 cars against 11,882 week before and 10,081 year ago.

[From the Beacon-Journal, Akron, Ohio, Feb. 1, 1934]

AUTOMOBILE TIRE PRICES TO CLIMB—INCREASES TO FOLLOW BOOST IN COMMODITIES, ADVANCE IN WAGES—DUE TO GOLD POLICY

Increase in Akron tire prices appeared almost certain Thursday as President Roosevelt's gold policy forced commodity prices up, and wage boosts for tire factory workers went into effect in Akron.

Rising commodity prices, as a result of the President's offer to buy and sell gold in foreign markets, will undoubtedly carry with it an advance in the price of rubber, experts say.

RUBBER PRICES CLIMB

Since October, during which the Treasury has been buying gold at higher than the market price, the most pronounced price effect has been on rubber and silver. Their increase was in greater percentage than gold.

Approximately 40,000 rubber-factory workers are to receive larger pay envelopes for their work starting today, the average pay increase being announced as 10 percent.

Reports of tire-price increases have been current for more than a week, with dealers anticipating an announcement boosting the prices some time this month.

WAGES ARE INCREASED

Both Goodyear and General announced that wages for practically all factory workers were increased an average of 10 percent, effective today.

Firestone's boost in pay was in effect Monday, while the Goodrich, although making no formal announcement yet of exactly what adjustments are being made, is also reported to be increasing pay.

Tire manufacturers in the fourth Federal Reserve district reported a production increase in January which would put their output about 30 percent above the level of the last 2 months in 1933, the Monthly Business Review of the Federal Reserve Bank of Cleveland said Thursday.

SALES ARE HEAVIER

Excess of production over shipments was attributed partly to the seasonal character of the tire business. Sales, it was revealed, have been larger than a year ago in every one of the last 6 months.

The increase in stocks in recent months, which on December 1 represented an estimated 4.2 months' supply, accompanied the sharp reduction in automobile production prior to the introduction of new models.

January increase in crude rubber price gave tire inventories a much higher value than those of a year ago.

[From the Plain Dealer, Cleveland, Ohio, Feb. 27, 1934]

BANK DEPOSITS MAKE BIG GAIN IN 6 MONTHS—CLIMB NEARLY $1,000,000,000 SINCE LAST AUGUST—OHIO GROCERY TRADE SHOWS INCREASE

By Guy T. Rockwell

Due to large Government expenditures and renewed confidence in the banking structure which has brought money out of hoarding, deposits in member banks of the Federal Reserve System increased nearly $1,000,000,000 from mid-August to mid-February.

This huge gain was cut down $86,000,000 in the week ended February 21 when net deposits dropped, due in all probability to the financing of the recent Treasury issues. Secretary Morganthau announced last night that this financing was six times oversubscribed thus keeping the rate of oversubscription in line with other issues brought out by the Government since the program to raise $6,000,000,000 of needed money was undertaken.

Net deposits of $4,372,000,000 represent an increase of $868,000,000 since August 23 but are still $120,000,000 under the total a year ago.

In the latest report of member banks investments increased $340,000,000 and loans on securities increased $99,000,000. Of the $99,000,000 increase in loans on securities $97,000,000 represented an increase in loans to brokers. Business loans declined $27,000,000 and at $4,718,000,000 such loans are $89,000,000 under the 1933 figure.

Principal assets and liabilities of member banks, with changes for the week and same week last year are, in millions of dollars:

	Feb. 21, 1934	Feb. 14, 1934	Feb. 21, 1933
Loans and investments, total	17,494	↑402	↑1,179
Loans, total	8,348	↑62	↓152
On securities	3,630	↑99	↓63
All other	4,718	↓37	↓89
Investments, total	9,146	↑340	↑1,331
United States Government securities	6,199	↑332	↑1,363
Other securities	2,947	↑8	↓32
Reserves with Federal Reserve banks	1,996	↓14	↑274
Cash in vault	230	↓5	↓13
Net demand deposits	11,246	↓86	↑579
Time deposits	4,372	↑28	↓120
Government deposits	1,418	↑427	↑1,289
Due from banks	1,369	↓44	↑156
Due to banks	3,147	↓57	↑512
Borrowings from Federal Reserve banks	11	↑1	↓54

↑ Increase. ↓ Decrease.

MORE CREDIT TO GROCERS

Grocery sales in Ohio are on the upgrade, but the increase is being carried on a credit basis, according to the Ohio State University bureau of business research. Where sales had an average December–January loss of 7.7 percent the past 5 years, there was a gain of 4.7 percent last month, the bureau points out.

"The increase in January sales", the bureau reported, "was due to the gain in charge sales, cash sales having declined 6.7 percent. Charge sales as a percentage of total sales increased from 82.8 percent in December to 84.1 percent in January. Average daily sales during January were 23.8 above January 1933, and physical volume, as indicated by dollar sales adjusted for price changes, was 0.7 percent higher."

OHIO GETS AUBURN BUSINESS

Ohio companies have received orders from the Auburn Co. for $1,250,000 of materials. An additional $600,000 of orders were released over the week-end, according to W. H. Beal, president Auburn Automobile Co., the Weatherhead Co., Elso Grease & Oil Co., and National Copper & Smelting Co., of Cleveland, shared in this additional order, according to Beal.

Ohio Rubber Co., Willoughby; Mullins Manufacturing Co., Salem; Firestone Tire & Rubber Co., Akron; Couche-Uthe Co., of Elyria; Falls Steel Tube & Manufacturing Co., Newton Falls; Powell Pressed Steel Co., Hubbard; Columbus Bolt Works, Columbus; Bingham Stamping & Tool Co. and Doehler Die Casting Co., of Toledo, also received portions of the order.

Cash dividend payments by the Standard Oil group the first quarter this year are estimated at $24,424,434, compared with $42,457,920 preceding quarter and $32,406,332 first quarter of 1933.

The absence of a payment by the Standard Oil Co. of New Jersey this quarter, while payments were made in both the preceding quarter and the first quarter of 1933, accounts for the greater part of the decline. At this time last year the New Jersey company paid a quarterly dividend of 25 cents a share, or approximately $6,450,000, while in preceding quarter a semiannual distribution of 50 cents a share amounting to approximately $12,900,000 was made. This followed a similar payment in the June quarter, at which time company inaugurated the policy of paying dividends semiannually instead of quarterly.

[From the Press, Cleveland, Ohio, Feb. 2, 1934]

BUTTER PRICES SOAR—HITS NEW 12-MONTH HIGH AS STORAGE HOLDINGS DECREASE

Cleveland wholesale butter prices today soared to a 1933–34 high market. Extra grade was up 1 cent at 28 cents a pound, standard grade up 1¼ cents to 27½ cents a pound. This is a 27-percent increase since January 1, 1934.

[From the Press, Cleveland, Ohio, Feb. 10, 1934]

REPORTS SHARP GAIN IN CLEVELAND JOBS—O.S.U. REVEALS 20.7-PERCENT INCREASE IN JANUARY OVER LAST YEAR

Employment in Cleveland during the month of January was 20.7 percent higher than in the corresponding month of 1933, but declined 3.1 percent from the figure reached in December of last year.

This was revealed yesterday in a report issued in Columbus by the business research bureau of Ohio State University.

The State as a whole showed a decline of 2.9 percent from December's high mark. However, employment in Ohio was 26 percent higher in January than in the same month of 1933.

WILLIE B. CLEVERLY

The PRESIDING OFFICER (Mr. LEWIS in the chair) laid before the Senate the amendments of the House of Representatives to the bill (S. 407) for the relief of Willie B. Cleverly, which were, on page 1, line 6, after the sum "$124.23." to insert "in full settlement of all claims against

the Government of the United States"; on page 1, line 6, to strike out "in full compensation"; and on page 1, line 12, after the word "station" to insert:

Provided, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Mr. WALSH. I move that the Senate concur in the amendments of the House.

The motion was agreed to.

PHILIPPINE INDEPENDENCE

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which was read and referred to the Committee on Territories and Insular Affairs, as follows:

To the Congress:

Over a third of a century ago the United States as a result of a war which had its origin in the Caribbean Sea acquired sovereignty over the Philippine Islands, which lie many thousands of miles from our shores across the widest of oceans. Our Nation covets no territory; it desires to hold no people over whom it has gained sovereignty through war against their will.

In keeping with the principles of justice and in keeping with our traditions and aims, our Government for many years has been committed by law to ultimate independence for the people of the Philippine Islands whenever they should establish a suitable government capable of maintaining that independence among the nations of the world. We have believed that the time for such independence is at hand.

A law passed by the Seventy-second Congress over a year ago was the initial step, providing the methods, conditions, and circumstances under which our promise was to be fulfilled. That act provided that the United States would retain the option of keeping certain military and naval bases in the islands after actual independence had been accomplished.

As to the military bases, I recommend that this provision be eliminated from the law and that these bases be relinquished simultaneously with the accomplishment of final Philippine independence.

As to the naval bases, I recommend that the law be so amended as to provide for the ultimate settlement of this matter on terms satisfactory to our own Government and that of the Philippine Islands.

I do not believe that other provisions of the original law need be changed at this time. Where imperfections or inequalities exist, I am confident that they can be corrected after proper hearing and in fairness to both peoples.

May I emphasize that while we desire to grant complete independence at the earliest proper moment, to effect this result without allowing sufficient time for necessary political and economic adjustments would be a definite injustice to the people of the Philippine Islands themselves little short of a denial of independence itself. To change, at this time, the economic provisions of the previous law would reflect discredit on ourselves.

In view of the fact that the time element is involved, I suggest that the law be amended as I have above suggested and that the time limit for the acceptance of the law by the proper authorities and by the people of the Philippine Islands be sufficiently extended to permit them to reconsider it.

For 36 years the relations between the people of the Philippine Islands and the people of the United States have been friendly and of great mutual benefit. I am confident that if this legislation is passed by the Congress and accepted by the Philippines, we shall increase the mutual regard between the two peoples during the transition period. After the attainment of actual independence by them, friendship and trust will live.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 2, 1934.*

TRADE AGREEMENTS WITH FOREIGN NATIONS

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which was read and referred to the Committee on Finance, as follows:

To the Congress:

I am requesting the Congress to authorize the Executive to enter into Executive commercial agreements with foreign nations; and in pursuance thereof within carefully guarded limits to modify existing duties and import restrictions in such a way as will benefit American agriculture and industry.

This action seems opportune and necessary at this time for several reasons.

First, world trade has declined with startling rapidity. Measured in terms of the volume of goods in 1933, it has been reduced to approximately 70 percent of its 1929 volume; measured in terms of dollars, it has fallen to 35 percent. The drop in the foreign trade of the United States has even been sharper. Our exports in 1933 were but 52 percent of the 1929 volume and 32 percent of the 1929 value.

This has meant idle hands, still machines, ships tied to their docks, despairing farm households, and hungry industrial families. It has made infinitely more difficult the planning for economic readjustment in which the Government is now engaged.

You and I know that the world does not stand still; that trade movements and relations once interrupted can with the utmost difficulty be restored; that even in tranquil and prosperous times there is a constant shifting of trade channels.

How much greater, how much more violent is the shifting in these times of change and of stress is clear from the record of current history. Every nation must at all times be in a position quickly to adjust its taxes and tariffs to meet sudden changes and avoid severe fluctuations in both its exports and its imports.

You and I know, too, that it is important that the country possess within its borders a necessary diversity and balance to maintain a rounded national life, that it must sustain activities vital to national defense and that such interests cannot be sacrified for passing advantage. Equally clear is the fact that a full and permanent domestic recovery depends in part upon a revived and strengthened international trade and that American exports cannot be permanently increased without a corresponding increase in imports.

Second, other governments are to an ever-increasing extent winning their share of international trade by negotiated reciprocal trade agreements. If American agricultural and industrial interests are to retain their deserved place in this trade, the American Government must be in a position to bargain for that place with other governments by rapid and decisive negotiation based upon a carefully considered program, and to grant with discernment corresponding opportunities in the American market for foreign products supplementary to our own.

If the American Government is not in a position to make fair offers for fair opportunities, its trade will be superseded. If it is not in a position at a given moment rapidly to alter the terms on which it is willing to deal with other countries, it cannot adequately protect its trade against discriminations and against bargains injurious to its interests. Furthermore, a promise to which prompt effect cannot be given is not an inducement which can pass current at par in commercial negotiations.

For this reason, any smaller degree of authority in the hands of the Executive would be ineffective. The executive

branches of virtually all other important trading countries already possess some such power.

I would emphasize that quick results are not to be expected. The successful building up of trade without injury to American producers depends upon a cautious and gradual evolution of plans.

The disposition of other countries to grant an improved place to American products should be carefully sounded and considered; upon the attitude of each must somewhat depend our future course of action. With countries which are unwilling to abandon purely restrictive national programs or to make concessions toward the reestablishment of international trade no headway will be possible.

The exercise of the authority which I propose must be carefully weighed in the light of the latest information so as to give assurance that no sound and important American interest will be injuriously disturbed. The adjustment of our foreign-trade relations must rest on the premise of undertaking to benefit and not to injure such interests. In a time of difficulty and unemployment such as this the highest consideration of the position of the different branches of American production is required.

From the policy of reciprocal negotiation which is in prospect, I hope in time that definite gains will result to American agriculture and industry.

Important branches of our agriculture, such as cotton, tobacco, hog products, rice, cereal, and fruit raising, and those branches of American industry whose mass-production methods have led the world, will find expanded opportunities and productive capacity in foreign markets and will thereby be spared, in part at least, the heartbreaking readjustments that must be necessary if the shrinkage of American foreign commerce remains permanent.

A resumption of international trade cannot but improve the general situation of other countries and thus increase their purchasing power. Let us well remember that this in turn spells increased opportunity for American sales.

Legislation such as this is an essential step in the program of national economic recovery which the Congress has elaborated during the past year. It is part of an emergency program necessitated by the economic crisis through which we are passing. It should provide that the trade agreements shall be terminable within a period not to exceed 3 years; a shorter period probably would not suffice for putting the program into effect. In its execution the Executive must, of course, pay due heed to the requirements of other branches of our recovery program, such as the National Industrial Recovery Act.

I hope for early action. The many immediate situations in the field of international trade that today await our attention can thus be met effectively and with the least possible delay.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 2, 1934.*

A MENACE TO RECOVERY—EDITORIAL FROM ST. LOUIS POST-DISPATCH

Mr. WHEELER. Mr. President, I present an editorial from the St. Louis Post-Dispatch of February 15, 1934, entitled "A Menace to Recovery", which I ask may be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the St. Louis Post Dispatch, Feb. 15, 1934]

A MENACE TO RECOVERY

The text of section 7A of the Recovery Act is so clear that no interpretation is needed, but if its meaning must be stated in rulings by administrative groups, the language of the St. Louis Regional Labor Board could hardly be improved. This section, the local board says, "recognizes not only the right of employees to be free from interference, restraint, and coercion of employers in their designation of representatives, but also in all activities relating to their self-organization. This section both creates rights in employees and imposes reciprocal obligations in employers. The statute is explicit in forbidding interference by the employer with the self-organization of his employees."

Members of a board which appreciates so fully the guaranties of this historic piece of legislation could come to only one conclusion in the case of Chevrolet Motor Car and the Fisher Body companies and their employees. Any activity on the part of an employer to dictate or influence workers to join a company union or association is a violation of the law. Discharge of employees who have refused to adhere to the company organization is both unfair and illegal. They should be taken back. The company union is not prohibited, but employees must join it voluntarily.

The chief complaint of the workers, presented at a hearing to which the companies named failed to send representatives, was that when the plants resumed operations after the seasonal summer and fall lay-off, the companies did not take back approximately 1,000 workers who were members of the United Automobile Workers' Federal Labor Union, opposed to the company organization known as the "works council." Failure to reemploy these workers, the men contend, could not have been because there was no work for them, since the companies found it necessary to engage C.W.A. workers and former employees who had been dismissed for inefficiency.

This is the situation as reported by the protesting employees. If the regional labor board did not have a true picture, that is the fault of the companies. Obviously, the purpose of a hearing before an impartial tribunal is to get at the facts through the recital of both sides. As a matter of fact, the situation is the one common wherever employers seek to evade section 7A by the company-union device.

We believe employers who are menacing the success of the recovery program through the institution of company unions will find it profitable to study the experience of the Rocky Mountain Fuel Co., which has just been reported by Miss Mary Van Kleeck, director of the department of industrial studies of the disinterested Russell Sage Foundation.

This Colorado company, located in a region of great labor strife, has tried both types of organization—company and workers' unions—and has found that the latter is more beneficial to the company as well as to its employees. Freedom of the workers to organize and manage their own union inspired loyalty to the company, which greatly increased its good will and was the leading factor in enabling it to increase its business, even in a time of depression.

The company-union issue falls like a black shadow across the door of the N.R.A. In the case of the Weirton Steel Co., the workers sent a delegation direct to President Roosevelt when their effort to organize their own union was resisted by the company. The New Republic tells what happened:

"His response was definite and to the point. In a proclamation issued 2 days later, he directed the National Labor Board to determine 'in any manner it sees fit' whether a substantial number of workers are against the company union and for a union of their own. If that is the case, then an election shall be held under the Board's exclusive control, and a majority vote in favor of a given union shall make that union the accredited instrument for collective bargaining."

This is a matter as to which the Government must display great firmness if we are to make any progress along the route charted by the Recovery Act. It is not easy for industry to abandon the practices of decades and realize that its own interest lies in a greater diffusion of the profits of industry among the workers. The failure of industry to see this was one of the causes of the depression. How many times have we pointed out that, by taking always a greater proportion of this profit, industry collapsed itself?

We do not wish to be understood as believing that the company union is always without merit. What we do believe is that in its more beneficent aspect it is on all-fours with the slave owner who was kind to his slaves. That estimable man stood in the way of a great social reform, and so does the company union.

ONE WAY OUT

Mr. WHEELER. Mr. President, I present an open letter from John D. Pearmain, of Scarboro, N.Y., entitled "One Way Out", reprinted from the February 10 issue of Today, which I ask may be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[Reprinted from Feb. 10, 1934, issue of Today]

AN OPEN LETTER TO THE PRESIDENT, MEMBERS OF CONGRESS, AND PRESS OF AMERICA—ONE WAY OUT—WE HAVE PAID TRIBUTE LONG ENOUGH

(Foreword.—The article below assumes that interest, as well as principal, on the present public debts will be paid in full—but that few, if any, new interest-bearing debts will be contracted in the future—and that it is these millions of annual interest on new financing that will be saved to the public by the method suggested below.)

Billions for revenue—not one cent more for tribute.

We have paid tribute long enough.

Isn't it time we inaugurated a new method of financing public improvements, a method that would eliminate in the future the present mounting interest charges?

Why should the wealthiest nation on earth pay two times for everything it needs—once for materials and labor and a second time all over again in accumulated interest charges?

What is the power of these money lenders, anyway, that the wealthiest nation on earth should go to them on bended knee to borrow money at interest?

Why pay interest to others to perform a service that the Government can perform equally well for itself?

Isn't the name and backing of the wealthiest nation sufficient security for such issues of credit as are needed in this time of emergency?

We have paid tribute long enough.

Why should the dumb public forever go on paying more in unnecessary interest charges than the original cost of any project?

To pay once for a public improvement is enough; to pay a second or third time for it, in interest charges, is to change it from a public asset to a public liability.

Why pay hundreds of millions in interest to the money lenders when public improvements can be financed by the Government itself through non-interest-bearing currency (issued to pay for labor and materials on public improvements), such currency, thus issued to create public works, to be retired—at the rate of depreciation of each property so created—from taxes and tolls collected by the Government, State, or local community?

A famous case in history of this type of financing is found in the experience of the isle of Guernsey, which, between 1819 and 1829, financed the building of its new market hall and other public improvements by an issue of non-interest-bearing currency, secured by the value of the new improvements and the credit of the island of Guernsey, backed up by its power and ability to collect taxes. The currency so issued was not convertible into gold or other medium of exchange but was retirable, and was retired from taxes and tolls during succeeding years. The experiment was successful, and the interest saved to taxpayers enormous on the $400,000 worth of currency so issued.

Another famous case in history of this type of financing is found also in the experience of Venice where the state bank (which existed for a period of 600 years) issued, throughout the period of the last 400 years non-interest-bearing certificates of indebtedness, nonconvertible into gold or other coin, and these non-interest-bearing certificates of indebtedness were used by the merchants of Venice as their principal medium of exchange during the entire 4 centuries—a credit on the State bank—in the form of one of these certificates, being exchangeable for goods and passing at a premium of 20 percent over gold or other current medium of exchange; and during this entire time the State Bank of Venice functioned without panic or crisis, continuing in successful operation until the end of the Republic of Venice, when Napoleon, in 1797, invaded Venice and carried off the archives and records of the bank.

We all know that the fact that the Government is back of the present interest-bearing bonds and currency issued against them is what maintains our present currency at par.

Isn't it obvious, then, that if the Government is back of the new non-interest-bearing currency bonds that fact equally will maintain at par the currency issued against such non-interest-bearing bonds?

The two kinds of currency, both being legal tender and both being backed by the full taxing power of the Government, would be indistinguishable from each other—would be acceptable to all.

Isn't it universally recognized now that our $4,000,000,000 of gold at best is but a nominal base for our total of $5,600,000,000 of currency—our $40,000,000,000 or so of bank deposits—and our $135,000,000,000 or more of bonds and mortgages—most, or all of which currency, bank deposits, bonds, and mortgages at least until recently, were supposed to have been convertible into gold?

Isn't it universally recognized now—not only that individuals can no longer convert paper money into gold, but also that if a paper dollar is exchanged for a silver dollar—and that silver dollar is melted down, that the silver in that silver dollar is worth less than 30 cents if returned to the United States Mint to be recoined?

So, isn't it daily becoming clearer that the strength we have behind our currency is the credit of the Government—and the credit of our Government is such that people generally are willing to accept the present paper money without discount as a medium of exchange?

Thus it is seen from historical example as well as from our own experience that there is no greater security for currency issued by a government than the credit of that government supported by its power and ability to collect taxes—and there is no question as to the power and ability of the Government of this country to collect taxes from its citizens.

But, that the interest-weighted load is getting heavy enough, and too heavy, without being added to further, is evidenced by the fact that some 2,019 communities—from Detroit, the fourth largest city in the country, down to the smallest—are said to be in default on debts of about $2,000,000,000, and that the number of such communities in default is increasing at the rate of about 100 a month. To cite a typical example—not of default in this case but merely typical of conditions holding all too widely throughout the country: Recent Westchester County, N.Y., budget figures show, of taxes collected, only 17 percent as going to operating expense, 28 percent for relief purposes, and 55 percent for service on the county debt—which shows the extent to which funding and refunding of public debts can go. Clearly, for such communities throughout the country hasn't the tax burden already become too hard to bear?

Well, then, apply the foregoing to the present situation and see that, since there is no greater security in the world than the power and ability of the Government to collect taxes, you can finance future public improvements without borrowing money at interest from the money lenders, that you can finance and pay for future public improvements through an issue of currency backed by non-interest-bearing Government bonds. These bonds and the currency back of them, to be retired at the rate of depreciation of each property thus created, from taxes and tolls collected by the Government, State, and local community.

Obviously, so long as the Government collected the taxes or tolls to retire it, the new non-interest-bearing currency would maintain its parity with other present forms of currency.

The Federal Government would advance non-interest-bearing currency to the States for construction of approved capital improvements of a public nature and the States would either use the money themselves on projects of their own, or reloan the non-interest-bearing currency to local communities within each State, the loans so made to be guaranteed by the States to be repaid to the Government from State and local taxes, or from tolls collected on self-liquidating projects.

Thomas A. Edison, after a visit to Muscle Shoals is quoted as asking, "Why cannot the people have the benefit of their own gilt-edged credit by receiving non-interest-bearing currency on Muscle Shoals, instead of the bankers receiving the benefit of the people's credit in interest-bearing bonds?"—and the Rev. Chas. E. Coughlin, of Detroit, in commenting on this statement of Edison's, is quoted as saying, "Mr. Edison, to my mind, was sensible in his suggestion—Government public works can be built with Government non-interest-bearing bonds, or currency. These bonds, or currency, can be redeemed from the profits gained from the Boulder Dam, the Muscle Shoals, the Federal highway, or from any other productive national enterprise."

Thus, if a new capital improvement were self-liquidating, as in the case of newly-erected buildings, in a slum-clearance project, there would be no need to tax the general public at all for cost of such a project. The Government would issue new currency to cover the cost, would loan the currency to States, the currency to be paid out as bills came due for materials and labor. The new buildings would be rented, and the State or municipal government would then recover, during the lifetime of the buildings, the amount originally put into the project by collecting from the tenants, as rent, both amortization of principal and cost of upkeep of the buildings, but in such charge for rent there would be no charge for interest on the investment unless the Government, Federal, State, or local, wished to make a profit on its venture.

In the case of the proposed St. Lawrence River waterway it is estimated that the tolls collected from sale of power, from freight charges, and from other sources, may just about meet the interest charges on the cost of underwriting the American share of the project, which means that the bonds behind the project might run for the full 50 years allowed by law, whereas, if the St. Lawrence River waterway were financed by the method herein proposed, any earnings, above cost of maintenance from the very start could be set aside for amortization of cost, and for retirement of the currency issued originally to build the waterway, and on this project alone the saving to the taxpayers in interest would run into hundreds of millions over such a term of years.

Of course it has been said by well-known financiers that, to curb undue borrowing and spending on the part of any government, local, State, or Federal, it is perhaps both wise and necessary to impose on such governments the penalty of interest on sums they borrow.

But, I ask you, doesn't making the borrower pay two times for everything, once at the start for materials and labor, and a second time in interest charges before the loan is repaid, put the borrowing government just twice as badly in debt? The answer is obvious, that it does.

Certainly a government's having to borrow at interest, having thus to pay twice, for what it gets, makes it just twice as hard for that government to get out of debt, makes it just twice as hard for that government, local, State, or Federal, to balance its budget—and the theory, nice for the money lenders, of the necessity of a government's having to penalize itself with interest to keep from spending too much, actually results in exactly the opposite, and makes that government spend twice as much as it otherwise would over a period of years to fill its needs—and the total of dollars borrowed by that government, and spent by it on capital improvements of a public nature, must be repaid twice—once the principal borrowed originally, and a second time in interest payments over the period of the loan.

So, I ask you again, would it make the security back of such new currency any greater to add interest in an amount which over a period of years would double the tax rate? It is ridiculous to suggest it.

Isn't it obvious by now that the financial position of the local, State, and Federal Governments would be improved proportionately by their not having to carry indefinitely a constantly increasing burden of interest on the public debt?

Just why should the richest nation in the world be mortgaged to the hilt with interest-bearing bond issues?

Just how is it even to the advantage of money lenders that this country be slowly strangled with mounting interest charges?

Isn't it daily becoming clearer that that part of our taxes, $1,600,000,000, which goes to paying interest on the public debts, local, State, and Federal, would do more good creating capital improvements of a public nature, than paid, in largest part, as now, in interest to the banks and corporations which are largest holders of Government bonds?

Isn't it daily becoming clearer that the use of such millions, in creation of public works, in normal times would take up the

slack of unemployment, in the spending of those millions where they are needed most—i.e., amongst the unemployed?

Why should the Government and taxpayers longer be "bled white" by a system that repeatedly exceeds the capacity of the average borrowing community to pay? Isn't any such system of interest, that levies tribute beyond the capacity of the average borrower, confiscatory of the community's and the Nation's wealth and capital?

We have certainly paid tribute long enough.

The interest charged on money borrowed by governments, local, State, and Federal, may not seem too high in normal times, or in times of great prosperity, and may never have seemed exorbitant when the total amount borrowed was relatively small compared to national wealth and income, but, when public debts expand as rapidly as now, due thought and consideration must be given not only to the number of billions of principal being borrowed but equally to the mounting interest charges, which, in time, will double that principal unless checked.

Federal debts of $23,000,000,000, plus State and local debts of $19,000,000,000, make $42,000,000,000 in all of present public debts—soon to rise to $50,000,000,000 when the Nation has borrowed to fill its immediate needs—interest alone already totaling $1,600,000,000 on the present $42,000,000,000 of public debts, and soon to rise to $2,000,000,000 a year in current interest charges, unless we improve our method of financing.

We have paid tribute long enough.

Certainly the new method of financing suggested here need put substantially neither more nor less of currency into circulation than the present Government method of paying billions directly and indirectly to the country's unemployed; but the new method eventually would save to the taxpayers hundreds of millions a year in interest.

Under the new method of financing, the taxing power of each local community, plus the taxing power of the States, plus taxing power of the Federal Government, would be back of the new non-interest-bearing currency.

The value of the new capital improvements (wealth) thus created would be back of the new non-interest-bearing currency.

Thus there would be ample security—the taxing power of the local, State, and Federal Government, plus the value of the new wealth created.

In summary—it is seen that, of the three roads that lie ahead of us, the right-hand road would continue, as now, in piling up of further interest charges—the left-hand road would lead us eventually to repudiation of present public debts through printing of fiat money—but the middle road suggested here would steer a course between these two, would lead to incurring of no new debts at interest, while yet allowing present interest-bearing debts to be paid off.

In future the Government primarily would collect taxes for two purposes—to cover current cost of Government operation and to cover obsolescence on capital improvements of a public nature.

Credit, in emergency, would be a public utility, issued as needed to put the unemployed to work, issued as needed to create new wealth of any kind, issued as needed for construction of capital improvements of a public nature.

The future would not be mortgaged with increasingly prohibitive interest charges.

The cost of Government eventually would be cut about in half.

JOHN D. PEARMAIN,
Scarboro, N.Y.

NAVAL CONSTRUCTION

The Senate resumed the consideration of the bill (H.R. 6604) to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington February 6, 1922, and at London April 22, 1930, at the limits prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes.

Mr. NYE obtained the floor.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator from North Dakota yield to enable me to move a recess?

Mr. NYE. If I yield, am I to understand that I shall have the floor upon reconvening in the morning?

The PRESIDING OFFICER. The Senator from North Dakota having the floor at this time and yielding to enable the Senator from Arkansas to move a recess, he will have a right to the floor tomorrow morning upon the convening of the Senate.

RECESS

Mr. ROBINSON of Arkansas. I move that the Senate recess until tomorrow morning at 11 o'clock a.m.

The motion was agreed to; and (at 5 o'clock and 50 minutes p.m.) the Senate took a recess until tomorrow, Tuesday, March 6, 1934, at 11 o'clock a.m.

HOUSE OF REPRESENTATIVES

MONDAY, MARCH 5, 1934

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D.D., offered the following prayer:

Merciful God, we rejoice and wonder at Thy infinite nature. Thou art the music that knows no discord, the beauty that suffers no blemish, the love that touches no limit, and the purity that excludes all evil; we linger here with hallowed hopes and hushed memories. Holy Spirit, whisper Thyself into our souls. Despising nothing, neglecting nothing, O minister unto us a sense of Thy nearness. Be Thou the purity of every stained life, the cup of water for every parched lip, the light for every starless sky, and the springtime of promise for every dreary winter of discontent. Gracious Father, teach us that patience, endurance, and fortitude are of the essence of the great and the heroic. O cross the horizon of our souls, inspiring, uplifting, and cleansing all within. In these sadly disordered times, Almighty God, come, O come and rule over this Congress, and may wisdom, understanding, and good government be the trumpets of our victories. Amen.

The Journal of the proceedings of Saturday, March 3, 1934, was read and approved.

COMMITTEE ON ROADS

Mr. BYRNS. Mr. Speaker, at the request of the Chairman of the Committee on Roads, the gentleman from Oklahoma [Mr. CARTWRIGHT], I ask unanimous consent that this committee may sit during the sessions of the House today and tomorrow.

The SPEAKER. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

CROP-PRODUCTION LOANS

Mr. BUCHANAN. Mr. Speaker, I ask unanimous consent for the present consideration of House Joint Resolution 290, to provide an appropriation to carry into effect the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934.

The Clerk read the joint resolution, as follows:

House Joint Resolution 290

Resolved, etc., That to enable the Governor of the Farm Credit Administration to carry into effect the provisions of the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other puposes", approved February 23, 1934 (Public Act No. 97, 73d Cong.), including personal services and rent in the District of Columbia and elsewhere; paper, printing and binding; supplies and services, without regard to section 3709 of the Revised Statutes (U.S.C., title 41, sec. 5) when the aggregate amount involved does not exceed $50, and such other expenses as may be necessary, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $40,000,000, to remain available until June 30, 1935.

The SPEAKER. Is there objection to the present consideration of the resolution?

There was no objection.

Mr. BUCHANAN. Mr. Speaker, I wish to make a short statement in order that the Membership may understand the import of this bill. It will be remembered that the House recently passed a bill authorizing the appropriation of $40,000,000 to make crop-production loans. The Budget estimate came up to my committee last Saturday. I received word from the Farm Credit Administration as well as Members of the House that if these appropriations are to be made and are to be available for this year they must be made at once to serve the purposes Congress intended by the passage of the legislative act.

In order that the House may have the figures with regard to past appropriations for this purpose I shall read a short statement.

FARM CREDIT ADMINISTRATION,
Washington, D.C., March 3, 1934.

Hon. J. P. BUCHANAN,
Chairman House Committee on Appropriations,
House of Representatives, Washington, D.C.

MY DEAR MR. BUCHANAN: In response to your informal request of this date there are transmitted herewith the following schedules:

(a) Estimate of the appropriation of $40,000,000 authorized by the act of February 23, 1934 (Public, No. 97, 73d Cong.), showing the distribution of estimated expenditures for loans and administrative expenses.

(b) Statement of crop production and farmers' seed loans from 1921 to 1933, as of January 31, 1934.

I hope that the approval of the appropriation estimate of $40,000,000 now pending before your committee can be expedited because it is essential that it be treated as a special emergency item of legislation. The funds should be available forthwith for the preliminary work incidental to the filing of loan applications, and the approval thereof, to the end that the actual loan disbursements may be begun as soon after the middle of March as may be possible.

Yours very truly, W. I. MYERS, *Governor.*

Farm Credit Administration estimate of appropriation for loans to farmers for crop production and harvesting, act of Feb. 23, 1934 (Public, No. 97, 73d Cong.)

Loans to farmers	$38,500,000
Administrative expenses for period Mar. 1, 1934, to Feb. 28, 1935: [1]	
Personal services	1,400,000
Communication services	25,000
Travel expenses	500,000
Transportation of things	20,000
Printing and binding	75,000
Rent	10,000
Miscellaneous (including recording fees)	450,000
Equipment	20,000
Total	2,500,000
	41,000,000
Less interest withheld on loans [2]	1,000,000
Net appropriation	40,000,000

Farm Credit Administration statement of farmers' seed and crop-production loans as at Jan. 31, 1934

LOANS AND REPAYMENTS

	Approved amount of loans	Amount collected on principal	Unpaid principal Jan. 31, 1934
Farmers' seed loans, 1921-31	$72,348,709.60	$36,380,714.49	$35,967,995.11
Crop-production loans:			
1932	64,204,503.06	30,193,881.41	34,010,621.65
1933	57,442,217.46	40,111,569.17	17,330,648.29
Total	193,995,430.12	106,686,165.07	87,309,265.05

COLLECTIONS OF PRINCIPAL AND INTEREST

	Amount collected on principal	Amount withheld or collected on interest	Total
Farmers' seed loans, 1921-31	$36,380,714.49	$630,537.44	$37,011,251.93
Crop-production loans:			
1932	30,193,881.41	2,571,893.62	32,765,775.03
1933	40,111,569.17	1,755,010.14	41,866,579.31
Total	106,686,165.07	4,957,441.20	111,643,606.27

PRINCIPAL UNPAID AT JAN. 31, 1934, AND ESTIMATED FUTURE COLLECTIONS

	Unpaid principal	Estimated future collections	Estimated uncollectible
Farmers' seed loans, 1921-31	$35,967,995.11	$15,967,995.11	$20,000,000
Crop-production loans:			
1932	34,010,621.65	9,010,621.65	25,000,000
1933	17,330,648.29	7,330,648.29	10,000,000
Total	87,309,265.05	32,309,265.05	55,000,000

[1] The necessary administrative expenses after Mar. 1, 1935, will be paid from collections of interest and principal as provided in section 5 of the act of Feb. 23, 1934 (Public, No. 97, 73d Cong.).

[2] Interest is deducted from the face amount of the loan for the period from date of note to the date of maturity.

In some years the collections were greater than in others. As a general rule, we collected about 70 percent of these loans. In 1932 we collected only 58 percent, but that was due to two causes. We had some droughts in certain sections of the country in 1932 and, also, that was an election year, and the President, through the Department of Agriculture, issued an order that they should not pay in the Northwest more than 25 percent of the amount they borrowed, the balance to be disposed as Congress directs. Of course, the 25 percent was all that was ever paid under those conditions. Then the South got to raising sand about it, so the President issued another order letting the southern farmers pledge their cotton at 9 cents a pound for these loans when it was worth only 6 or 7 cents a pound; and, of course, they paid no more. This, Mr. Speaker, is the history of our embarkation upon this uncharted sea of making loans, a thing the Government should stop as soon as possible. We have caught a cub bear by the tail and have not yet been able to turn it loose. Thank goodness, under the Farm Credit Administration we are now organizing throughout the Nation permanent farm-credit institutions that will, we hope, hereafter supply all needed agricultural credit.

Mr. SNELL. Mr. Speaker, will the gentleman yield for a question?

Mr. BUCHANAN. I yield.

Mr. SNELL. I understood the gentleman to say that we had caught a bear by the tail and could not let go. Can the gentleman see any indication that at some future time we are going to be able to let go of this kind of appropriation?

Mr. BUCHANAN. Yes; I have great hope and great faith in letting go of this kind of an appropriation, because we have organized farm-credit institutions throughout the country through which the farmers will be advanced credit upon reasonable security; and that is the reason this appropriation is $40,000,000 instead of $60,000,000 or $70,000,000, as heretofore.

That is the very reason. So far as I am concerned, I hope that this is the last of this character of appropriation the Congress will be called upon to make.

Mr. SNELL. I may state to the gentleman that I will assist him because I have been opposed to such appropriations right along. I think the time has come when we ought to quit this kind of business and I hope the gentleman stands solidly on his statement.

Mr. BUCHANAN. I thoroughly agree with the gentleman.

Mr. BLANTON. Will the gentleman yield?

Mr. BUCHANAN. I yield to the gentleman from Texas.

Mr. BLANTON. At the same time that the distinguished minority leader aids our very able Chairman of the Committee on Appropriations in stopping loans to farmers, he ought at the same time to help stop making loans to big insurance companies, some of whose presidents have drawn as high as $200,000 a year in salary.

Mr. SNELL. That has nothing to do with the question before the House.

Mr. BLANTON. Yes it has.

Mr. SNELL. And the gentleman knows it.

Mr. BLANTON. It involves the very fundamentals of good government.

Mr. SNELL. It has nothing whatever to do with this subject. The gentleman should talk about the subject before the House.

Mr. BLANTON. Would the gentleman from New York continue to loan money to insurance companies and allow them to pay $200,000 a year to their presidents, but when it comes to aiding the farmers who feed the people of New York City, Potsdam, and Abilene, would the gentleman vote "No"? Is that the situation?

Mr. SNELL. The gentleman from New York has never been in favor of paying these salaries, and the gentleman from Texas has no reason to say that, either.

Mr. BLANTON. Let us stop it all when we stop any of it. Do not make fish of some and fowl of others.

Mr. SNELL. I am ready to stop it now, and I will vote against this appropriation if the gentleman will.

Mr. BLANTON. If we will stop loans to railroads, banks, and insurance companies at the same time, I may go along with him.

Mr. SNELL. I have voted against all of these. If the gentleman is serious he will vote against them, too.

Mr. BLANTON. I will vote with the gentleman to stop loans to them all, but let us stop them all together. We are not going to cripple the farmer by stopping loans to him, and then make huge loans to the insurance companies paying $200,000 a year to their presidents.

Mr. BUCHANAN. Since the cyclone has passed, let me make a further general statement.

I hope the time will soon come when we may stop making loans to insurance companies or this character of loans to farmers, and every other character of loan that the Federal Government is now called upon to make, and let private enterprise, business, and the farmers themselves furnish their own credit, and let the Government attend to strictly Government affairs. I hope this appropriation will pass. It is needed at this time. I will vote for it and hope you will all vote for it. [Applause.]

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

Mr. BUCHANAN. Mr. Speaker, I ask unanimous consent to insert a table which bears on the matter just considered by the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

WAR DEPARTMENT APPROPRIATION BILL

Mr. COLLINS of Mississippi, from the Committee on Appropriations, submitted a privileged report on the bill (H.R. 8471) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes (Rept. No. 869), which was read a first and second time, and, with the accompanying report, referred to the Committee of the Whole House on the state of the Union and ordered to be printed.

Mr. TABER reserved all points of order on the bill.

CONSTRUCTION OF DAMS AND DIKES IN LINCOLN COUNTY, OREG.

Mr. MARTIN of Oregon. Mr. Speaker, I ask unanimous consent for the present consideration of Senate Concurrent Resolution 10, the purpose of the resolution being to correct a date in the engrossment of the bill.

The Clerk read as follows:

Senate Concurrent Resolution 10

Resolved by the Senate (the House of Representatives concurring), That the Secretary of the Senate be, and he is hereby, authorized and directed, in the enrollment of the bill (S. 1759) to extend the time for the construction of dams and dikes in Lincoln County, Oreg., to prevent the flow of waters of Yaquina Bay and River into Nutes Slough, Boones Slough, and sloughs connected therewith, to correct an error by striking out, in line 1, of the House engrossed amendment, the words "June 13" and inserting in lieu thereof "June 17."

Mr. SNELL. Mr. Speaker, reserving the right to object, this is merely to correct a clerical error?

Mr. MARTIN of Oregon. Yes.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The concurrent resolution was agreed to.

COMMITTEE ON ACCOUNTS

Mr. WARREN. Mr. Speaker, I ask unanimous consent that the Committee on Accounts be permitted to meet today during the session of the House.

Mr. SNELL. Mr. Speaker, reserving the right to object, are we going to have all the committees meet in the afternoon? Practically every committee is now meeting during the session of the House.

Mr. WARREN. This is the first time this request has been made on behalf of the Committee on Accounts, and it is for the accommodation of certain members.

Mr. SNELL. I am not going to object, but I call the attention of the House to the fact that soon there will be no one here because all the committees will be meeting in the afternoon instead of in the morning.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

LIABILITY OF COMMON CARRIERS BY RAILROAD FOR INJURIES TO EMPLOYEES

Mr. MEAD. Mr. Speaker, I ask unanimous consent that the bills (H.R. 7484 and H.R. 7794) to amend section 51 of chapter 2, title 45, of the Code of Laws of the United States of America, which have been referred to the Interstate and Foreign Commerce Committee, be recalled and referred to the Committee on the Judiciary. In this connection I may say that I took the matter up with the Chairman of the Interstate and Foreign Commerce Committee, and he agrees to the rereference.

Mr. SNELL. Will the gentleman state what these bills are?

Mr. MEAD. They are two bills that pertain to the Federal Liability Law and they were referred to the Committee on Interstate and Foreign Commerce, and more properly belong to the Judiciary Committee. I took this matter up with the Chairman of the Committee on Interstate and Foreign Commerce, and he agreed that they should be rereferred.

Mr. SNELL. The gentleman wants them to be referred to the Judiciary Committee?

Mr. MEAD. Yes.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

PENSION RATES OF ARMY MAIL FLYERS

Mr. MEAD. Mr. Speaker, I ask unanimous consent to extend my remarks by inserting in the RECORD both the peace-time and war-time pension rates that will apply in the case of Army flyers engaged in the Air Mail Service, in compliance with a request by the gentleman from Wisconsin [Mr. BLANCHARD] made at the time the bill was under discussion on the floor of the House. The gentleman asked at that time what the rates would be and I did not have them available, but stated that as soon as I could get them I would have them inserted in the RECORD for the convenience of the Members of the House.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MEAD. Mr. Speaker, during the debates on the emergency air mail legislation I was asked to have printed in the RECORD the pension rates payable to those of the Army personnel who are engaged in flying the mail.

The peace-time pension rates are as follows:

	Per month
Widow but no child	$22
Widow and 1 child	30
(With $4 for each additional child.)	
No widow but 1 child	15
No widow but 2 children (equally divided)	22
No widow but 3 children (equally divided)	30
(With $3 for each additional child; total amount to be equally divided.)	
Dependent mother or father	15
Both (each)	11

NOTE.—The total pension payable shall not exceed $56.

The following are the war-time pension rates:

	Per month
Widow but no child	$30
Widow and 1 child	40
(With $6 for each additional child.)	
No widow but 1 child	20
No widow but 2 children (equally divided)	30
No widow but 3 children (equally divided)	40
(With $5 for each additional child; total amount to be equally divided.)	
Dependent mother or father	20
Both (each)	15

NOTE.—The total pension payable shall not exceed $75.

Pensions to injured enlisted men for peace-time service range from $9 to $125 a month.

Pensions to injured enlisted men for war-time service range from $10 to $250 a month.

(Pensions to widows and dependents as shown in tables, above.)

Retired pay to officers of the Regular Army is the same for peace-time service as for war-time service—three fourths of their regular pay; in the event of death, the gratuity to their beneficiaries is the same—6 months' pay; pensions to their widows and children are higher for war-time service than for peace time, as indicated above, in tables.

Pensions to Reserve officers on an active-duty status injured in line of duty are the same as the above general rates of pension, ranging from $9 to $125 a month for peace-time service and from $10 to $250 a month for war-time service. (Pensions to widows and dependents, as shown in above tables.) Present law does not provide gratuity to beneficiaries of Reserve officers.

Army has employed no civilian pilots so far, but may do so later. However, a few civilians have been employed in connection with the carriage of the mail by the Army, but not as pilots. Pensions for such civilians are provided by the Employees' Compensation Act and are based upon salary, as follows:

Maximum pension for disability (based upon monthly wage of $175), $116.66 per month.

If salary is less than $175 per month, pension would be two thirds of salary.

	Percent of husband's salary
Widow	35
Children (under 18 years of age)	10
Parents:	
1 parent wholly dependent	25
Both parents wholly dependent (each)	20
If partially dependent, a proportionate amount.	
Minor brothers and sisters:	
1 wholly dependent	20
More than 1 wholly dependent, equally divided	30

NOTE.—Aggregate compensation shall not exceed $116.66 per month.

ARMY OFFICERS' PAY RATES

Base pay of Army officers ranges from $1,500 a year, for lieutenants, to $7,500 a year, for generals.

Allowances are granted for quarters, subsistence, and so forth.

Flight pay, 50 percent of base pay, in addition, when on regular flying duty (must fly at least 4 hours a month).

Retired pay is 75 percent of base pay only.

Mr. McSWAIN. Mr. Speaker, I ask unanimous consent to extend my remarks and include therein some facts compiled by General Mitchell, as expressed in an address he delivered in New York on March 3, 1934, on the subject of Profiteering in Preparedness.

Mr. TABER. Mr. Speaker, I think that is going a little far with extensions. It seems to me that should go in the hearing of the committee and should be printed there. It hardly seems proper that we should put in the RECORD statements of people outside of the congressional body who hold no official position.

I object, Mr. Speaker.

Mr. CONNERY. Mr. Speaker, I ask unanimous consent that the speech delivered by the President today at the N.R.A. conference be printed in tomorrow morning's RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

[See p. 3675.]

THE CONSENT CALENDAR

The SPEAKER. This is Consent Calendar day. The Clerk will call the calendar.

BRIDGE ACROSS LAKE SABINE, PORT ARTHUR, TEX.

The Clerk called the first bill on the Consent Calendar, H.R. 4870, to extend the times for commencing and completing the construction of a bridge across Lake Sabine at or near Port Arthur, Tex.

Mr. DIES. Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

EXEMPTION FROM THE QUOTA OF PARENTS OF AMERICAN CITIZENS

The Clerk called the next bill, H.R. 3519, to exempt from the quota parents of citizens of the United States, and for other purposes.

Mr. JENKINS of Ohio. Mr. Speaker, reserving the right to object, I expect to object——

Mr. BLANTON. Let us stop it now.

Mr. JENKINS of Ohio, Mr. BLANTON, and Mr. SWICK objected.

EMPLOYEES COMPENSATION ACT

The Clerk called the next bill, H.R. 1766, to provide medical services after retirement on annuity to former employees of the United States disabled by injuries sustained in the performance of their duties.

Mr. JENKINS of Ohio. Mr. Speaker, reserving the right to object, this bill came up at the last call of the calendar and it was developed that the gentleman from Tennessee [Mr. BROWNING] acted as spokesman for the Judiciary Committee. The gentleman is here and I would like to ask if he has made the investigations that were requested at the last call of the calendar. [After a pause.] Mr. Speaker, I ask unanimous consent that this bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

THIRD-CLASS POSTMASTERS

The Clerk called the next bill, H.R. 1626, granting equipment allowance to third-class postmasters.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That on and after July 1, 1934, postmasters at third-class offices in which post-office fixtures and equipment are not provided by the Post Office Department shall be paid, as allowances for personally owned or rented post-office fixtures and equipment, an amount equal to 50 percent of the box rents collected at such offices, the allowances to be paid quarterly, under such rules and regulations as the Postmaster General may prescribe: *Provided*, That when post-office fixtures and equipment are furnished by the Post Office Department at post offices of the third class, the provisions of this act shall become inoperative.

With the following committee amendment:

Page 1, line 3, strike out "1933" and insert in lieu thereof "1934."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

BRIDGE ACROSS MISSOURI RIVER, RANDOLPH, MO.

The Clerk called the next bill, S. 2308, to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Randolph, Mo.

Mr. JENKINS of Ohio. Mr. Speaker, reserving the right to object, I do not intend to object, but I thought there might be something about this bill that needed correction. I am not sure about the correctness of the language.

Mr. ZIONCHECK. I am going to ask unanimous consent that the bill be passed over.

Mr. JENKINS of Ohio. I withdraw my reservation, Mr. Speaker.

Mr. ZIONCHECK. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

BRIDGE ACROSS COLUMBIA RIVER NEAR THE DALLES, OREG.

The Clerk called the next bill, H.R. 7060, to extend the times for commencing and completing the construction of a bridge across the Columbia River, near The Dalles, Oreg.

Mr. ZIONCHECK. Mr. Speaker, I ask unanimous consent that the bill may be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

ELECTIONS IN ALASKA

The Clerk called the next bill on the Consent Calendar, H.R. 6185, fixing the date for holding elections of a Delegate from Alaska to the House of Representatives and of members of the Legislature of Alaska; fixing the date on which the Legislature of Alaska shall hereafter meet; prescribing the personnel of the Territorial Canvassing Board, defining its duties, and for other purposes.

There being no objection, the Clerk read the bill, as follows:

Be it enacted, etc., That the election of a Delegate from the Territory of Alaska to the House of Representatives provided for by the act of Congress entitled "An act providing for the election of a Delegate to the House of Representatives from the Territory of Alaska", approved May 7, 1906, as amended, and the election of the members of the Legislature of the Territory of Alaska, provided for by the act of Congress entitled, "An act to create a legislative assembly in the Territory of Alaska, to confer legislative power thereon, and for other purposes", approved August 24, 1912, shall hereafter be held on the second Tuesday in September in the year 1934, and every second year thereafter on the said Tuesday next after the first Monday in September.

SEC. 2. That the Legislature of the Territory of Alaska shall hereafter convene at the capitol at the city of Juneau, Alaska, on the second Monday in January in the year 1935, and on the second Monday in January every 2 years thereafter.

SEC. 3. That the canvassing board for the Territory of Alaska created by the act of Congress entitled "An act providing for the election of a Delegate to the House of Representatives from the Territory of Alaska", approved May 7, 1906, shall hereafter consist of the Governor, the secretary of the Territory, and the collector of customs for Alaska. It shall be the duty of the said canvassing board to canvass and compile in writing the vote specified in the certificates of election returned to the Governor from the several election precincts in the Territory and to keep an accurate record of each voting precinct in the Territory and the date of its creation.

The said canvassing board shall commence the performance of its duties at the office of the Governor within 10 days after the second Tuesday in October in each year in which an election is held as hereinabove provided, and shall continue with such work from day to day until the same is completed. No packages containing election returns shall be opened until the canvass commences, at which time they shall be opened in public and in such manner and under such conditions, as nearly as possible, as to give all parties interested an opportunity to see the returns. In case it shall appear to the board that no election return, as herein prescribed, has been received by the Governor from any precinct in which an election has been held, the said board may accept in place thereof the certified copy of the certificate of election for such precinct received from the clerk of the court, and may canvass and compile the same with the other election returns. The canvassing board shall terminate the canvass and issue the certificates of election so soon as it is satisfied that no missing return would, if received, change the result of a canvass based upon the returns at hand, but when the board has information that an election was held at any precinct from which no return has been received and which return, if received, the board has reason to believe will affect the result of the election, it shall be the duty of the board to await the arrival of such return until 4 o'clock p.m. on the 10th day of December in the year during which the election is held, but no longer, and any return received after that time shall not be counted by the board.

Upon the completion of the said canvass as herein provided, the said board shall declare the person who has received the greatest number of votes for the office for which he is a candidate elected to such office for the term for which he is elected, and shall issue and deliver to him in writing, under their hands and seals, a certificate of his election. It shall be the duty of the Governor to preserve all election returns carefully and inviolate, and, after the certificates of result have been canvassed, to replace the returns into the packages from which they were taken and carefully seal the same and preserve all such returns inviolate for at least 2 years thereafter, unless sooner called upon by the House of Representatives of Congress or some court or tribunal of competent jurisdiction to produce the same for inspection. It shall also be the duty of the Governor to notify each successful candidate of his election, and to do so by the speediest means of communication.

SEC. 4. Except as herein otherwise provided, all of the provisions of the acts of May 7, 1906, and of August 24, 1912, hereinabove referred to, shall continue in full force and effect until altered, amended, or repealed by Congress. And any and all laws enacted by the legislature of the Territory of Alaska pertaining to elections in said Territory shall remain in full force and effect until altered, amended, or repealed by the said legislature or by Congress. That the legislature of the Territory of Alaska shall have the power from time to time as the need therefor may arise, to change the date of general elections in the said Territory, including the date of election of a delegate from the Territory of Alaska to the House of Representatives and of the members of the Territorial legislature; and that the Legislature of the Territory of Alaska shall also have the power by law to change from time to time the personnel of the canvassing board, the dates of its meetings, and may prescribe its duties.

With the following committee amendment:

Page 2, lines 7 and 8, strike out the words "Tuesday next" in line 6, and all of line 7, and in lieu thereof insert the following: "second Tuesday in September."

The committee amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

INTERNATIONAL TECHNICAL COMMITTEE OF AERIAL LEGAL EXPERTS

The Clerk called the next resolution on the calendar, House Joint Resolution 271, providing for an annual appropriation to meet the quota of the United States toward the expenses of the International Technical Committee of Aerial Legal Experts.

The SPEAKER. Is there objection?

Mr. JENKINS of Ohio. Reserving the right to object, I should like to ask the gentleman whether there are any other expenses involved which are not discoverable on the face of this bill?

Mr. FORD. No; it is an annual expenditure of $3,000 to pay the expenses of a committee to attend the meeting of the International Technical Committee of Aerial Legal Experts to codify and modify the air laws.

Mr. JENKINS of Ohio. Can the gentleman tell us what they did last year—what benefit is it?

Mr. FORD. We are attempting at the present time to establish a single international code of private aerial law. The United States wants to take part in it and be in on the original make so that when they get through we will not have to get the law changed to fit our situation.

Mr. JENKINS of Ohio. Is this a permanent appropriation.

Mr. FORD. It is.

Mr. JENKINS of Ohio. What was done last year?

Mr. FORD. We did not participate in the conference; we did not attend last year for we did not have the money.

Mr. GOSS. This makes a permanent appropriation?

Mr. FORD. It does.

Mr. GOSS. I know; I happen to be on the subcommittee. We are putting these permanent appropriations into the law year after year, and they go for a hundred years and are never called to the attention of Congress. Why does not the gentleman make it an authorization and then appear before the Appropriations Committee and justify it? If the gentleman will do that I will not object. I am going to object to permanent annual appropriations in the future.

Mr. TABER. Mr. Speaker, in order that a proper amendment may be made, making this an authorization rather than a permanent appropriation, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection?

There was no objection.

DETERMINATION OF INDIAN HEIRS AND DISPOSITIONS OF ALLOTMENTS OF DECEASED INDIANS

The Clerk called the next bill on the Consent Calendar, H.R. 5075, to amend section 1 of the act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes", approved June 25, 1910, as amended.

The SPEAKER. Is there objection?

Mr. ELTSE of California. Reserving the right to object, I should like to ask the gentleman a question. As I understand, all moneys paid by the purchaser, whether it is 75 percent or 90 percent, with the accrued interest, will be forfeited.

Mr. WERNER. Section 1 of the act of June 25, 1910, provides for the determination of heirs of deceased Indians and for the descent and distribution of lands owned by deceased Indians. The act also provides for the sale of inherited lands and the purchaser is required to make a payment of one fourth of the purchase price. The remaining three quarters is required to be paid in three equal installments. The law has been construed to mean that where a purchaser makes his second payment or his third payment

and then defaults and refuses to make further payment or final payment, in such event only the first payment is forfeited and the Indian owner of the land is required to repay to the purchaser the second payment, or the second and third payment made by the purchaser. This has resulted, in many cases, in extreme hardship to the Indian heirs, and it is the only statute under which such a condition exists.

Where tribal lands, as contrasted to inherited lands, are sold and where the purchaser defaults, all payments made up to and including the default are forfeited to the tribal fund. In many instances, tribal lands and inherited lands lie side by side. The purchaser of tribal lands can make no recovery against the tribe in the event of default, but the purchaser of inherited lands may require the Indian heir to repay to the purchaser all payments made, with the exception of the first payment.

This bill corrects this condition by putting the purchaser of inherited lands on the same footing as the purchaser of tribal lands, and all payments made up to and including a default are forfeited.

In many instances, Indian heirs, still under restrictions, have found themselves charged with repayment to defaulting purchasers after the money itself has been expended for their benefit, and this charge then remains upon the books of the agency as a charge against the Indian heirs' individual funds.

This bill will correct a condition which never should have existed and which is inequitable, and which imposes an undue burden upon heirs of deceased Indians.

Mr. ELTSE of California. Is it not true that if the purchaser gets within 10 percent of the completion of the contract, and some adverse situation occurs where he cannot make the final payment, a forfeiture can be invoked?

Mr. WERNER. I think that is correct, for the reason that it is in effect a foreclosure of a mortgage, and it puts the Indian in the same position as the white man.

Mr. PEAVEY. Mr. Speaker, will the gentleman yield?

Mr. ELTSE of California. Yes.

Mr. PEAVEY. As a member of the committee that reported this bill, I might say that the purpose is to give the Indian just the same protection that the white man has. These contracts are not being foreclosed hurriedly by the Department or without cause. On the contrary, they are being repeatedly extended for the benefit of the contract holder, and the gentleman will readily see that that not only robs the Indian of the benefits of his land but of the benefit of the purchase price.

Mr. ELTSE of California. The gentleman says that he wants to put the Indian on the same basis as the white man in respect to forfeitures?

Mr. PEAVEY. Yes.

Mr. ELTSE of California. I contend that this will put the Indian far ahead of the white man, because the white man has to go into court, and here the Secretary of the Interior says, "All right, Mr. Indian; you can forfeit."

Mr. PEAVEY. If the gentleman will pardon me, it is not the Indian who forfeits; it is the white man buying the Indian's land.

Mr. ELTSE of California. But it is the Indian who does the forfeiting.

Mr. PEAVEY. It is the Indian Bureau, and they never do this without having exhausted every resource to make the collection. They extend these payments repeatedly.

Mr. BLANCHARD. Mr. Speaker, will the gentleman yield?

Mr. ELTSE of California. Yes.

Mr. BLANCHARD. There is no provision whereby these lands can go through the courts as provided in the case of an ordinary foreclosure of a land contract or a mortgage.

Mr. PEAVEY. No.

Mr. BLANCHARD. In any event, it will have to go through the Indian Bureau.

Mr. PEAVEY. Yes.

Mr. WERNER. This bill merely puts Indian inherited lands in the same status as tribal lands.

Mr. BLANTON. Mr. Speaker, will the gentleman yield?

Mr. WERNER. Yes.

Mr. BLANTON. Have there been hearings upon this bill?

Mr. WERNER. Yes; and the committee unanimously reported the bill.

Mr. BLANTON. Were the hearings held by a subcommittee or by the full committee?

Mr. WERNER. The full committee.

Mr. BLANTON. Were all of the members of the committee present?

Mr. WERNER. Most of them were.

Mr. BLANTON. I served on that committee a few years myself. It is a little unusual for the author of the bill to report out his own bill, which was done in this case.

Mr. WERNER. I was instructed to report the bill by our worthy chairman and merely followed orders without any intent or desire to do anything unusual.

Mr. BLANTON. That proves that he has excellent standing in his committee. I want to commend my friend for his good work.

Mr. WERNER. I have no pecuniary interest in this legislation; neither am I motivated by any selfish interest. My only desire is to correct a long-standing wrong; a wrong which has, in my humble opinion, worked a grave injustice on the Indian landowners. The speculators in land have had their day and the hour has arrived to deal justly with the Indian. This bill will give the Indian greater protection. It has the approval of the Secretary of the Interior, unanimous favorable action by the Committee on Indian Affairs after hearing; is just, fair, and right.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That section 1 of the act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes" (36 Stat. 855), be, and the same is hereby, amended to read as follows:

"That when any Indian to whom an allotment of land has been made, or may hereafter be made, dies before the expiration of the trust period and before the issuance of a fee simple patent, without having made a will disposing of said allotment as hereinafter provided, the Secretary of the Interior, upon notice and hearing, under such rules as he may prescribe, shall ascertain the legal heirs of such decedent, and his decision thereon shall be final and conclusive. If the Secretary of the Interior decides the heir or heirs of such decedent competent to manage their own affairs, he shall issue to such heir or heirs a patent in fee for the allotment of such decedent; if he shall decide one or more of the heirs to be incompetent, he may, in his discretion, cause such lands to be sold: *Provided*, That if the Secretary of the Interior shall find that the lands of the decedent are capable of partition to the advantage of the heirs, he may cause the shares of such as are competent, upon their petition, to be set aside and patents in fee to be issued to them therefor. All sales of lands allotted to Indians authorized by this or any other act shall be made under such rules and regulations and upon such terms as the Secretary of the Interior may prescribe, and he shall require a deposit of 10 percent of the purchase price at the time of the sale. Should the purchaser fail to comply with the terms of sale prescribed by the Secretary of the Interior, the amount so paid shall be forfeited; in case the balance of the purchase price is to be paid on such deferred payments, all payments made, together with all interest paid on such deferred installments, shall be so forfeited for failure to comply with the terms of the sale. All forfeitures shall inure to the benefit of the heirs. Upon payment of the purchase price in full the Secretary of the Interior shall cause to be issued to the purchaser patent in fee for such land: *Provided*, That the proceeds of the sale of inherited lands shall be paid to such heir or heirs as may be competent and held in trust subject to use and expenditure during the trust period for such heir or heirs as may be incompetent as their respective interest shall appear: *Provided further*, That the Secretary of the Interior is hereby authorized, in his discretion, to issue a certificate of competency, upon application therefor, to any Indian, or in case of his death to his heirs, to whom a patent in fee containing restrictions on alienation has been or may hereafter be issued, and such certificate shall have the effect of removing the restrictions on alienation contained in such patent: *Provided further*, That hereafter any United States Indian agent, superintendent, or other disbursing agent of the Indian Service may deposit Indian moneys, individual or tribal, coming into his hands as custodian, in such bank or banks as he may select: *Provided*, That the bank or banks so selected by him shall first execute to the said disbursing agent a bond, with approved surety, in such amount as will properly safeguard the funds to be deposited. Such bonds shall be subject to the approval of the Secretary of the Interior."

With the following committee amendment:

Page 3, line 6, after the word "the", where it occurs the second time, insert the words "allottee or his."

The amendment was agreed to; and the bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider laid on the table.

PRESENTATION OF FALSE INSTRUMENTS WITH INTENT TO DEFRAUD THE UNITED STATES

The Clerk called the next bill, H.R. 8046, to provide a penalty for the knowing or willful presentation of any false written instrument relating to any matter within the jurisdiction of any department or agency of the Government with intent to defraud the United States.

The SPEAKER. Is there objection?

Mr. ZIONCHECK. Mr. Speaker, I reserve the right to object.

Mr. JENKINS of Ohio. Mr. Speaker, I reserve the right to object. I do this more to ask a question than really to object. It strikes me that this is using a cannon to kill a snowbird. Here is a bill with a penalty of 5 years and a fine of $5,000. It just sounds as if somebody is reaching out to do somebody else an injustice. I do not know wherein our criminal laws are so deficient now that they cannot reach such terrible offenses as this penalty seems to indicate.

Mr. McKEOWN. We just took the statute as it now is and tried to make it applicable to the new operations of the Government. We know that there are men who have been making some false affidavits as to the quantity and quality of material that goes into these projects that the United States Government is lending its money to construct. We were asked to pass this bill to correct that situation, and decided that we may as well make one bite of the cherry, so we included every species of fraud where an attempt is made to defraud the United States Government in any of these operations.

Mr. HEALEY. Is not this bill aimed at collusive bidding?

Mr. McKEOWN. Yes; at collusive bidding, where these vast sums of money that the Government is spending are involved, such as in road material and bridges and work that is being done by municipalities on the 30-70 proposition.

Mr. JENKINS of Ohio. The gentleman does not mean to say that we have not now sufficient laws to meet cases of the violation of law with reference to bridge contracts and things of that sort?

Mr. McKEOWN. We have not sufficient statutes to prosecute in cases covered by this bill.

Mr. JENKINS of Ohio. The gentleman knows I have heretofore tried to show due deference to bills recommended by the Committee on the Judiciary, but I should like to ask this question: Has this bill been considered by the full committee?

Mr. McKEOWN. Yes, sir; it was very thoroughly considered by the full committee, and it was gone over very carefully. It was practically rewritten in the committee.

Mr. JENKINS of Ohio. Is it not a fact that the reason for this bill is that someone who has to do with the Public Works program or the C.W.A. program is afraid that the law is not broad enough to reach violations of some of these numerous spending organizations that we have to contend with?

Mr. McKEOWN. There was a representative from the Department who came down and stated that they wanted to stop collusive bidding, and we had examples where, on gravel alone, for instance, in one project the gravel could be bought for 20 cents, but the contractors got together and the lowest bid was $2.05 and the other was $2.10. Things like that ought not to be tolerated.

Mr. JENKINS of Ohio. If the full Committee on the Judiciary has passed on this and made a unanimous report I do not want to inject my own personal opinion about it. I will withdraw my reservation of objection.

Mr. ELTSE of California. Reserving the right to object, I should like to ask if this is limited to written instruments?

Mr. McKEOWN. It is. All instruments or contracts or representations in writing.

Mr. ELTSE of California. It does not provide for false verbal testimony, then?

Mr. McKEOWN. No. That would be a different offense. Does the gentleman mean if a man makes a false representation orally?

Mr. ELTSE of California. If he appears before any board or commission or agency or administration, as it is provided in this bill, and gives testimony that is false, why should it not apply to him just the same as it does the man who makes a written bid?

Mr. McKEOWN. The trouble is, there is always a dispute as to whether he said it or whether he did not, but when he puts it on paper there is no dispute about it.

Mr. ELTSE of California. As a matter of fact, is there not more proof offered by way of verbal testimony than by these written documents?

Mr. McKEOWN. The offense charged is if he signed a written document. It is the purpose of the Department to print this statute right on every proposal so as to deter persons from getting into this trouble rather than punish them after they get into it.

Mr. ZIONCHECK. Reserving the right to object, I think this provision takes care of it where it is stated, "or who with such intent in anywise procures the making or presentation of any false or fraudulent affidavit, declaration, statement, certificate, voucher, or paper, or writing purporting to be such."

Mr. ELTSE of California. No. I submit it does not, because it goes on to say "or paper or writing."

Mr. ZIONCHECK. It is in the disjunctive.

Mr. McKEOWN. He must do it willfully and knowingly, and he is protected if he does not do it knowingly and willfully.

Mr. ELTSE of California. If you are going to make the bill effective, why do you not extend it to verbal testimony?

Mr. McKEOWN. It is an unheard-of proposition to try to convict a man for a mere statement unless he has testified under oath. If he has testified under oath, then there is a penalty provided for that.

Mr. ELTSE of California. As a matter of fact, are not all of these witnesses who appear before these boards and commissions sworn?

Mr. McKEOWN. If they make a false statement, they are liable to punishment now, under the perjury law.

Mr. JENKINS of Ohio. Mr. Speaker, I withdraw my reservation of objection.

Mr. MARTIN of Oregon. Mr. Speaker, I object. There is so much trouble among the lawyers that I am going to object. The lawyers must agree. They are having all this talk.

Mr. McKEOWN. Certainly, the gentleman does not want to put himself in the attitude of objecting to this bill.

Mr. MARTIN of Oregon. Well, you lawyers should get together.

Mr. McKEOWN. We are through.

Mr. MARTIN of Oregon. Are you all in agreement?

Mr. McKEOWN. Yes.

Mr. MARTIN of Oregon. Are all the lawyers agreed?

Mr. BLANTON. All the lawyers are agreed and all the generals.

Mr. MARTIN of Oregon. Then I agree if all the lawyers agree. God bless them. I withdraw the objection, Mr. Speaker.

There being no objection, the Clerk read as follows:

Be it enacted, etc., That every person who with intent to defraud the United States knowingly or willfully makes or aids or assists in the making, or who with such intent in anywise procures the making or presentation of any false or fraudulent affidavit, declaration, statement, certificate, voucher, or paper or writing purporting to be such, concerning or pertaining to any application, bond, bid, loan, or payment thereof, or concerning or pertaining to any matter within the jurisdiction of any department, establishment, administration, agency, office, board, or commission of the United States, or any corporation owned or controlled by the United States in whole or in part, shall be punished by a fine not exceeding $5,000 or by imprisonment for a term of not more than 5 years, or by both such fine and imprisonment.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

CONSERVATION OF WILD LIFE, FISH, AND GAME

The Clerk called the next bill, H.R. 7672, to promote the conservation of wild life, fish, and game, and for other purposes.

Mr. JENKINS of Ohio. Reserving the right to object, this bill is one of three conservation bills that seem to be harmless on their face, and are very particular to recite that it is not going to cost anybody anything. At the same time, they extend into the activities of the various departments, and they carry every earmark of being just a forerunner to a very extensive onslaught upon the Treasury in the days to come. If somebody can relieve me of that fear, I shall not object.

Mr. BLANCHARD. Will the gentleman yield?

Mr. JENKINS of Ohio. I yield.

Mr. BLANCHARD. I think the gentleman is familiar with the very last provision of the bill—

That no authority is given in this bill for setting up any additional bureau or division in any department or commission and shall not authorize any additional appropriation for carrying out its purposes.

I appreciate just exactly what the gentleman is striking at. He is concerned with possible commitments under this bill, and also is concerned with what may happen in connection with future departmental requests. Of course it will be up to the gentleman from Ohio and other Members of Congress to be diligent and alert to see that the ordinary coordinating activity of effort on the part of Government officials shall not lead to the creation of another bureau. I think the gentleman from Texas [Mr. KLEBERG] can assure us on that point, that it is not designed to create any new department or any new bureau or engage in any additional obligation on the part of Government agencies. Am I right about that?

Mr. JENKINS of Ohio. My opening statement was to the effect—and I appreciate what the gentleman has to say—that the bill is very well written and the language would indicate that the bill is going to be very harmless, but there are several pages in the bill that provide for extensive activities. I should like to know, if this bill is not going to cost anything, how these extensive preliminary steps will be paid for?

Mr. KLEBERG. I might illustrate that by citing examples of what has been done.

Mr. JENKINS of Ohio. I shall be glad to hear them.

Mr. KLEBERG. I call attention to the Chesapeake swamp which was made salty at an expense of $500,000 to the Government by the opening of a lock, which was afterward abandoned, and the territory returned to a condition where fish, for instance, could live and where ducks could feed. This was done purely through an effort made by the Biological Survey with the help of interested parties to restore this great area to this use.

What we are trying to do is to provide ways by which other similar projects can be carried out and to economize by calling on every agency of the Government affected by this bill. The result will be that at the time matters such as the building of dams and the draining of areas are undertaken the various departments of the Government interested will give consideration not only to wild-life resources but to other natural resources.

This bill is known as "the coordination bill." It merely makes effective the operation of the various agencies of the Government along economical lines by providing that they shall coordinate their activities before the individual department or bureau take steps to effectuate them.

Mr. BLANCHARD. Mr. Speaker, will the gentleman from Ohio yield?

Mr. JENKINS of Ohio. I yield.

Mr. BLANCHARD. I may state to the gentleman from Texas that this bill, as he indicated, will result in economies in the future administration of the conservation laws and cooperation between our great governmental agencies. And, if I may make one other statement, this is but a forerunner of future efforts on the part of the special committee recently created by the House to secure coordination and cooperation.

Mr. KLEBERG. The gentleman is correct.

Mr. JENKINS of Ohio. I have no reason to doubt that the gentleman is just as much interested in protecting the Treasury as I am. With this idea in mind, I withdraw my reservation of objection, Mr. Speaker, believing this bill will do what the gentlemen have indicated.

Mr. KLEBERG. I may say further that the Senate conducted hearings on this bill, as did the Subcommittee of the House Committee on Agriculture. We went into the very subject the gentleman has spoken of. The hearings with reference to this particular bill have not been printed, but the gentleman will find they were exhaustive.

The pending bill is identical with a bill which has already passed the Senate.

Mr. JENKINS of Ohio. One other question; the gentleman from Texas, I presume, will champion the passage of the two succeeding bills?

Mr. KLEBERG. Yes.

Mr. JENKINS of Ohio. These three are companion bills, are they?

Mr. KLEBERG. Yes.

Mr. JENKINS of Ohio. They intermesh and work together.

Mr. KLEBERG. They are all involved in effecting the completed program for conservation of wild life.

Mr. JENKINS of Ohio. And the same fears I voice with reference to the first one are groundless also with respect to the other two bills?

Mr. KLEBERG. Neither of the three provide for the appropriation of money or any increase in the expense to the Government of the United States.

Mr. Speaker, I ask unanimous consent to substitute an identical Senate bill.

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That the Secretary of Agriculture and the Secretary of Commerce are authorized to provide expert assistance to and to cooperate with Federal, State, and other agencies in the rearing, stocking, and increasing the supply of game and fur-bearing animals and fish, in combating diseases, and in developing a Nation-wide program of wild-life conservation and rehabilitation.

SEC. 2. The Secretary of Agriculture and the Secretary of Commerce are authorized to make such investigations as they may deem necessary to determine the effects of domestic sewage, trade wastes, and other polluting substances on wild life, with special reference to birds, mammals, fish, and shell-fish, and to make reports to the Congress of their investigations with recommendations for remedial measures. Such investigations shall include studies of methods for the recovery of wastes and the collation of data on the progress being made in these fields for the use of Federal, State, municipal, and private agencies.

SEC. 3. (a) Whenever the Federal Government through the Bureau of Reclamation or otherwise, impounds water for any use, opportunity shall be given to the Bureau of Fisheries and/or the Bureau of Biological Survey to make such uses of the impounded waters for fish-culture stations and migratory-bird resting and nesting areas as are not inconsistent with the primary use of the waters and/or the constitutional rights of the States. In the case of any waters heretofore impounded by the United States, through the Bureau of Reclamation or otherwise, the Bureau of Fisheries and/or the Bureau of Biological Survey may consult with the Bureau of Reclamation or other governmental agency controlling the impounded waters, with a view to securing a greater biological use of the waters not inconsistent with their primary use and/or the constitutional rights of the States and make such proper uses thereof as are not inconsistent with the primary use of the waters and/or the constitutional rights of the States.

(b) Hereafter, whenever any dam is authorized to be constructed, either by the Federal Government itself or by any private agency under Government permit, the Bureau of Fisheries shall be consulted, and before such construction is begun or permit granted, when deemed necessary, due and adequate provision, if economically practicable, shall be made for the migration of fish life from the upper to the lower and from the lower to the upper waters of said dam by means of fish lifts, ladders, or other devices.

SEC. 4. The Office of Indian Affairs, the Bureau of Fisheries, and the Bureau of Biological Survey are authorized, jointly, to prepare plans for the better protection of the wild-life resources, including fish, migratory waterfowl and upland game birds, game

animals and fur-bearing animals, upon all the Indian reservations and unallotted Indian lands coming under the supervision of the Federal Government. When such plans have been prepared they shall be promulgated by the Secretary of the Interior, the Secretary of Commerce, and the Secretary of Agriculture, who are authorized to make the necessary regulations for enforcement thereof and from time to time to change, alter, or amend such regulations.

SEC. 5. The Bureau of Biological Survey and the Bureau of Fisheries are hereby authorized to make surveys of the wild-life resources of the public domain, or of any lands owned or leased by the Government, to conduct such investigations as may be necessary for the development of a program for the maintenance of an adequate supply of wild life in these areas, to establish thereon game farms and fish-cultural stations commensurate with the need for replenishing the supply of game and fur-bearing animals and fish, and, in cooperation with the National Park Service, the Forest Service, or other Federal agencies, the State agencies, to coordinate and establish adequate measures for wild-life control on such game farms and fish-cultural stations: *Provided*, That no such game farm shall hereafter be established in any State without the consent of the legislature of that State.

SEC. 6. In carrying out the provisions of this act the Federal agencies charged with its enforcement may cooperate with other Federal agencies and with States, counties, municipalities, individuals, and public and private agencies, organizations, and institutions, and may accept donations of lands, funds, and other aids to the development of the program authorized in this act: *Provided, however*, That no such donations of land shall be accepted without consent of the legislature of the State in which such land may be situated: *Provided*, That no authority is given in this act for setting up any additional bureau or division in any department or commission, and shall not authorize any additional appropriation for carrying out its purposes.

Mr. COCHRAN of Missouri. Mr. Speaker, I move to strike out the last word.

Mr. Speaker, I seek recognition to call the attention of the gentleman from Texas [Mr. KLEBERG] to a situation right here in the District of Columbia. One of the greatest fishing streams in the country is the Potomac River. On its banks is built the Capital of the Nation; but the sewage from the Capital is polluting the stream right below Washington. Now, I have fished this stream and I know what I am talking about. It is literally filled with bass, but on the Maryland side the fish are living in water polluted by the sewage from this city. This should be corrected immediately.

I suggest to the gentleman from Texas that he make use of this legislation we are now passing to call upon the Biological Survey or the Government department that has control to get busy and see if this cannot be remedied in some way. The people of Washington are entitled to some place to play. They have a river at their door which will give them plenty of enjoyment; but until this sewage is disposed of and we stop the pollution of the river the people of Washington are not going to get the pleasure from this source they should receive from this wonderful stream. [Applause.]

Mr. Speaker, within a half hour's drive of the Capitol on the Maryland side of the Potomac you will find celery and cabbage leaves and all other kinds of sewage, still you can drop a fly or minnow in the water and get plenty of big-mouthed bass. I have caught dozens of them but always returned them to the water knowing the water was polluted. Aside from the fish, the people of Washington are deprived of a fine river at this point that would be used for bathing if this condition that I refer to did not exist.

Clean up this river below Washington and you will see clubhouses spring up along the banks of the Potomac. As a fishing stream you cannot ask for more.

Across from Mount Vernon the Bureau of Fisheries formerly had a fish hatchery station. It has been moved to the Virginia side of the river and while I cannot speak with authority still I understand that it was moved on account of the polluted water.

Is the Government of the United States going to ask and demand that citizens discontinue polluting our streams and then permit the District of Columbia over which it has control to dump its sewage in one of the greatest bass streams within its borders? I say to my friend from Texas, start at home, right here in the District of Columbia and clarify the Potomac. I will take the gentleman down the river anytime he desires and show him what exists.

It is hard to picture a more beautiful stream. It might be well for the special committee that was recently appointed by the House to investigate this situation right at our front door. [Applause.]

Mr. KLEBERG. I appreciate what the gentleman has said. It demonstrates the need for this kind of legislation. There are hundreds and even thousands of cases throughout the country which will be brought to the attention of the Biological Survey and other agencies of the Government such as the Engineers of the War Department engaged in river and harbor work.

This legislation will mean much to the people of the interior of the country as well as to locations where there is this pollution to which the gentleman has referred and where other waste is growing. These conditions will in time certainly be corrected by this bill.

By unanimous consent, the pro forma amendment was withdrawn.

The bill was read a third time, and passed.

A motion to reconsider was laid on the table.

A similar House bill was laid on the table.

FISH AND GAME SANCTUARIES IN NATIONAL FORESTS

The Clerk called the next bill, H.R. 2277, to establish fish and game sanctuaries in the national forests.

Mr. TABER. Mr. Speaker, reserving the right to object, I notice the report on this bill states that it does not place any additional burden on the Treasury, but the bill itself does not so state, as the previous bill did. Does not the gentleman think we should amend the bill?

Mr. KLEBERG. I do not understand just what the gentleman refers to. The matter involved in the bill that we are now discussing has to do merely with the establishment of sanctuaries in the various national forests and, of course, taking into contemplation certain sanctuaries to be established under the program for the retirement of marginal land. The gentleman will realize that the three bills are very definitely companion bills, and one guards against the other with reference to failure to economize and failure to harbor the natural resources in the most economical manner. The gentleman will readily see that there is little or no chance for an additional expense under this bill. I call his attention also to the fact that the bill is drawn with great care to protect the interests of the various States and not change their position with reference to sanctuaries located within their boundaries.

Mr. TABER. The authority to establish carries authority to maintain, which would authorize annual appropriations unless it were indicated that maintenance should simply flow from the stamp tax, which is provided in Calendar Bill No. 90, H.R. 5632. Does not the gentleman think, in view of this fact, that the bill should carry a limitation to the effect that it shall not authorize an additional burden on the Treasury?

Mr. KLEBERG. I do not think that would be at all necessary in view of the hearings on this bill in the Senate and before our committee. We discussed this phase of the matter at great length. We felt that in the national program for conservation such a limitation might not only be unwise but, for instance, if there should be an outbreak of disease in a certain Federal sanctuary in which very important game animals and birds found refuge, does the gentleman think it wise to fix a reservation which would preclude the expenditure of money in such cases of emergency? An emergency would be the only way in the world that an extra expenditure would be involved under any of these bills.

Mr. TABER. I am inclined to believe that we ought not to tell the people we are bringing out a bill which will not carry an expense on the Treasury when it is understood that perhaps it will. When these things are put through in this way the invariable result is that there is an added expense to the Treasury.

Mr. GLOVER. Will the gentleman yield?

Mr. TABER. I yield to the gentleman from Arkansas.

Mr. GLOVER. This bill was before the subcommittee, of which I am chairman. We had before us Senator HAWES and Senator WALCOTT. Each of these gentlemen said that the bill had been so framed that it covered every objection, and so far as we could find there was not a single objection to the three bills. As the gentleman from Texas [Mr. KLEBERG] stated, they dovetail together and make a complete system for the care of wild life in the United States. I may say to the gentleman that last year I introduced a special bill to establish a preserve, and had the matter up with the Department. A statement was made at that time that the employees they had looking after affairs in the respective areas would be able to take care of the enforcement feature without any expense whatever. It is not contemplated that there will be any expense in the administration of this bill. Besides that the bill is safeguarded so that it has to have the approval and consent of the legislature of each State before one can be established, and there is not contemplated one penny of cost to maintain this so far as the National Government is concerned. There is a fund which is created from the fees charged in the duck stamp bill, amounting to a million dollars, that takes care of looking after all of this. This is a general bill, which would obviate the necessity hereafter of having a special bill passed.

Mr. TABER. Would it not be better under the circumstances to limit it so that it did not carry an additional appropriation?

Mr. GLOVER. I do not think it would affect the bill at all. As the gentleman stated, there might be an emergency come up where it would be necessary to spend some money and you would then have this legislation. There is not in contemplation the expenditure of money at all.

Mr. TABER. Would not the gentleman accept such an amendment?

Mr. KLEBERG. I would appreciate if the gentleman would not push his request for the amendment for this reason. If the gentleman will look into the future with reference to the conservation of wild life, he could readily understand that there might be an emergency occur in some locality which would necessitate possibly the expenditure of a small amount of money. Under the bill just passed all of the agencies of the Government having to do with the establishment of these sanctuaries are well within the province of the public domain, such as highways and things of that sort, and there might be required the diversion of a highway or a new route and it might be laid to this bill, whereas as a matter of fact, it would not touch it at all. The provisions of this bill provide for the setting aside of the sanctuary and I hope the gentleman will not press his amendment.

Mr. TABER. My experience has been that unless such a thing is guarded against, the very next year there is an application for an appropriation in the Budget estimate. This is the reason for my feeling as I do.

Mr. KLEBERG. I understand the gentleman's position, but I hope he will not press his request with reference to this one bill, which merely provides a power in the Government to establish these sanctuaries on forest reserves and under the marginal land retirement program.

Mr. TABER. After the bill is once passed without such an amendment it is impossible to prevent appropriations. Does not the gentleman really think it would be better to have the amendment in here?

Mr. KLEBERG. As a matter of fact, to be frank with the gentleman, I do not think so. I do not feel there should be that amendment with reference to this permissive measure permitting the allocation of sanctuaries in the various forest preserves. The idea that there might be some expense connected with the allocation seems to me to be completely out of the picture.

Mr. BACON. Will the gentleman yield?

Mr. TABER. I yield to the gentleman from New York.

Mr. BACON. I hope the gentleman will not press his amendment. Any future appropriation will have to be subject to the will of the Appropriations Committee and of the Congress. These three measures are companion measures. They dovetail with each other. Each is important to the other, and I congratulate the gentleman from Texas for the fine work he has done in bringing this legislation before the House.

Mr. KLEBERG. May I say to the gentleman, in a last plea to him not to press the proposed amendment in connection with this particular bill, that the bill provides for the establishment of sanctuaries in the national forests; in other words, the setting out of a boundary if and when the various States in which these properties are located agree thereto. Insofar as the matter of expense involved under this bill is concerned, there could not be an expense other than the ordinary expense in the Division of Forestry for the running of a line or survey to set out and establish what might be construed to be a boundary line. The bill has nothing to do with the expense involved in maintenance. It has to do with allocation only.

Mr. CHASE. Mr. Speaker, will the gentleman yield?

Mr. TABER. Yes.

Mr. CHASE. Supporting the statement of the gentleman from Texas [Mr. KLEBERG], the State of Minnesota is a typical example of the operation of such a bill and can be taken to illustrate how the measure will work out. In that State is the Superior National Forest. All through the Superior National Forest are working the game wardens of the State of Minnesota as well as Federal and State timber cruisers.

Every State park in the State of Minnesota is a State game refuge or sanctuary and has supervision by superintendents and game wardens engaged and active in that part of the State. This measure applies the same principle to the Federal forest lands that applies to the State park system in the State of Minnesota. The bill will involve no more money and no more men. It simply establishes artificial lines outlining a game refuge or game sanctuary. Consequently, there cannot, or certainly should not be any reason for expecting additional expenditure, and I hope the gentleman from New York [Mr. TABER] will not urge his point.

Mr. KLEBERG. I am only anxious to satisfy the gentleman from New York by my explanation.

Mr. TABER. I am going to let this bill go by, but I do think we must begin to be careful about these additional expenses.

There being no objection, the Clerk read the Senate bill, as follows:

Be it enacted, etc., That for the purpose of providing breeding places for game birds, game animals, and fish on lands and waters in the national forests not chiefly suitable for agriculture, the President of the United States is hereby authorized, upon recommendation of the Secretary of Agriculture and the Secretary of Commerce and with the approval of the State legislatures of the respective States in which said national forests are situated, to establish by public proclamation certain specified and limited areas within said forests as fish and game sanctuaries or refuges which shall be devoted to the increase of game birds, game animals, and fish of all kinds naturally adapted thereto, but it is not intended that the lands included in such fish and game sanctuaries or refuges shall cease to be parts of the national forests wherein they are located, and the establishment of such fish and game sanctuaries or refuges shall not prevent the Secretary of Agriculture from permitting other uses of the national forests under and in conformity with the laws and the rules and regulations applicable thereto so far as such uses may be consistent with the purposes for which such fish and game sanctuaries or refuges are authorized to be established.

SEC. 2. That when such fish and game sanctuaries or refuges have been established as provided in section 1 of this act, hunting, pursuing, poisoning, angling for, killing, or capturing by trapping, netting, or any other means, or attempting to hunt, pursue, angle for, kill, or capture any wild animals or fish for any purpose whatever upon the lands of the United States within the limits of said fish and game sanctuaries or refuges shall be unlawful except as hereinafter provided, and any person violating any provision of this act or any of the rules and regulations made under the provisions of this act shall be deemed guilty of a misdemeanor and shall upon conviction in any United States court be fined in a sum of not exceeding $100 or imprisonment not exceeding 6 months, or both.

SEC. 3. That the Secretaries of Agriculture and Commerce shall execute the provisions of this act, and they are hereby jointly authorized to make all needful rules and regulations for the administration of such fish and game sanctuaries or refuges in accordance with the purpose of this act, including regulations not

in contravention of State laws for hunting, capturing, or killing predatory animals, such as wolves, coyotes, foxes, pumas, and other species destructive to livestock or wild life or agriculture within the limits of said fish and game sanctuaries or refuges: *Provided*, That the present jurisdiction of the States shall not be altered or changed without the legislative approval of such States.

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

MIGRATORY-BIRD HUNTING STAMP

The Clerk called the next bill, H.R. 5632, to supplement and support the Migratory Bird Conservation Act by providing funds for the acquisition of areas for use as migratory-bird sanctuaries, refuges, and breeding grounds, for developing and administering such areas, for the protection of certain migratory birds, for the enforcement of the Migratory Bird Treaty Act and regulations thereunder, and for other purposes.

Mr. WARREN. Mr. Speaker, reserving the right to object, I have prepared an amendment which several of us think will greatly improve this measure. On page 1, line 4, after the word "person" insert "over 16 years of age."

This would have the effect of not requiring a young boy 16 or under to take out this license, which he is not going to do anyway. I hope the gentleman will accept the amendment.

Mr. KLEBERG. I may say, in response to the gentleman's plea, that so far as accepting the amendment is concerned, of course, I shall be glad to help out the boys and girls, but I think the gentleman is unnecessarily alarmed with reference to the application of the bill to those who are not required now to pay a hunting license in the various States.

As a matter of fact, since my friend and I talked about the situation involving this amendment it has occurred to me that the amendment is not necessary, but in order to make their rights doubly sure I shall agree to the amendment.

Mr. DIES. Mr. Speaker, reserving the right to object, I want to ask the gentleman a question. What does this bill propose to do?

Mr. KLEBERG. This bill proposes to tax all hunters in the various States who desire to shoot ducks or other migratory or upland game birds which come under the treaty between the United States and Canada and are known as "migratory birds" under the Migratory Bird Treaty $1 for a stamp license.

Mr. DIES. What is proposed to be done with this money?

Mr. KLEBERG. The money is to be expended in the purchase of sanctuaries.

Mr. DIES. Who is going to buy these sanctuaries?

Mr. KLEBERG. The Department of Agriculture, on the advice and with the assistance of the various agencies that operate under the coordination bill.

Mr. DIES. What are those agencies?

Mr. KLEBERG. They are very well defined in the measure itself.

Mr. DIES. I have heard of instances where land was proposed to be bought for migratory birds and exorbitant sums were proposed to be paid for the acquisition of practically worthless land. I want to know if there is any restriction upon any Government agency to prevent it from going out and buying practically worthless land for three or four or five times its value.

Mr. KLEBERG. Has the gentleman read the bill?

Mr. DIES. No; that is the reason I am asking the question.

Mr. KLEBERG. I may say to my friend that the purchase of these sanctuaries will only be made after exhaustive study and recommendation by the Biological Survey and the Bureau of Forestry and other agencies of the Department of Agriculture that are well acquainted with plant life and the adaptability of the various areas to the production of edible food that these birds are supposed to be able to live and thrive on.

Mr. DIES. Is the gentleman acquainted with lands that have been purchased in the past 2 or 3 years by the commission established for the same purpose? Has the gentleman any information as to how much has been paid by the Federal Government in the last 3 or 4 years for the acquisition of land to establish sanctuaries?

Mr. KLEBERG. No; I know nothing about the purchase of land by the Federal Government in the last few years for such purpose, and I would appreciate it if the gentleman would call my attention to instances of the sort that he has referred to.

Mr. DIES. We have a commission that has purchased land for the purpose of establishing bird sanctuaries, and I understand quite a bit of land has been purchased under that law.

Mr. KLEBERG. As far as I am concerned, the gentleman is discussing something I know nothing about.

Mr. GIFFORD. Mr. Speaker, reserving the right to object, some of you may remember that I made a few remarks on the floor the other day on a sort of companion measure to this one. I want to refer the House to the fact that some 7 or 8 years ago we debated for almost an entire afternoon practically this same measure and it was defeated. No such bill should be presented to the House under unanimous consent with such limited time to make any remarks.

I also want to remind the House that here is a bill requiring another license fee of $1 for everybody and the license is to be on sale only in post offices in towns larger in population than 2,500. A real nuisance to many who would not be unwilling to pay $1, but the inconvenience of getting the license might be considerable.

It is another nuisance bill. I wish the Members could read the debate of 7 or 8 years ago in which this bill was defeated. You ought to stop and think whether you are trying to pass legislation simply to help the sportsmen and against the native population in many sections. In my section we oppose taking of large tracts for game refuges.

I dislike to object; I know that these three bills go together; but I want to remind you that we ought to have considerable debate on this important matter.

Why do you not bring in a bill that will prevent the oil pollution that is killing great numbers of our migratory birds? I dislike to object to this bill. I do call your serious attention to its provisions. You will notice in the last paragraph of the bill that anyone who may appear to pursue or chase a wild fowl and is caught by an inspector may be taken in many cases a distance of 50 or 75 miles before a Federal court to have his case tried. If you look back at the former debates, this was a chief objection. It seems to me that this is too important a matter to try to pass by unanimous consent.

Mr. JONES. Mr. Speaker, I desire to state to the gentleman that I happened to be a member of the committee when the bill he refers to was before the House, and I joined with those who fought the bill. We fought it because, instead of appropriating money for sanctuaries, it provided for public shooting grounds. That is an entirely different proposition. All those who fought that bill, or practically all, stated that they were willing to have sanctuaries to protect the wild fowl—sanctuaries that will be kept inviolate. On no other basis can the wild life of this country be preserved.

We are going to adopt an amendment which exempts anyone under 16 years of age. If you will study the disappearance of the migratory birds in this country I do not believe you will object to this bill. No one likes to think of America stripped of her wild life. We have a treaty with Canada, and this is to enable us to comply with our part of the agreement with Canada.

Mr. BEEDY. Will the gentleman yield to me?

Mr. JONES. I yield.

Mr. BEEDY. Mr. Speaker, I come from a section of the country where the conservation of fish and game is one of our main problems. I have gone to some length to try and ascertain the best sentiment of my State. My best judgment is that my people are in favor of the adoption of the pending legislation. I am happy to say that the best thought we have is that this is one of the most constructive

pieces of game-conservation legislation that has recently been proposed.

It aims not only at properly conserving our game but it puts the burden of supporting the conservation program on those who are most vitally interested. It is not the rich fellow, it is not the millionaire sportsman alone to whom reference has been made as the group who will benefit by this proposed legislation. We have some of those who come up to Maine, but it is the man in the shop who likes to take a gun on an afternoon and go out when he has a half day. It is that type of man in my State who is back of this program. These men come from the small towns. I attended a dinner within a month where, in the midst of one of our biggest storms, over 500 of our local people were present to urge the adoption of this and similar legislation.

Mr. JONES. That is the universal report all over the country. This is an entirely different bill from what the gentleman from Massachusetts [Mr. GIFFORD] has in mind. I thoroughly sympathize with the statement of the gentleman. I was opposed to that bill just as much as he.

Mr. BEEDY. I have always had great respect for the opinion of the gentleman from Massachusetts [Mr. GIFFORD]. He is always sincere and forceful in his advocacy of what he believes. Unquestionably he represents one phase of thought on this problem, but I do hope that he is not going to object to this bill, and I have my doubts that he represents the majority thought.

Mr. GIFFORD. Mr. Speaker, I said that I would not object, but that I did, however, wish that we could have a proper debate upon this subject. I remind the gentleman and others again how far it may be from your home to a Federal court. A boy may be caught and carried to a Federal court 100 miles, even 200 miles away, as is the case in some sections of Maine. He has to go there on this little matter.

Mr. BLANTON. Mr. Speaker, I reserve the right to object. This bill starts out by purporting to exempt the owner of the property, and then does not exempt him, because it indicates that before the owner of the property is exempt the Department must ascertain that he was attempting to kill the migratory birds for the protection of his crop. That is a question of fact. It may be determined in his favor or it may be determined against him, and the tribunal that determines it against him may be rather prejudiced sometimes.

It would be a hard, harsh law to say that the owner of a ranch, not a large ranch, but a small one of 200 or 300 acres, who has a little tank, cannot go out there and kill a mallard duck that is flying through the country, even if it is on his own property. Even though the duck may have been feeding on his own tank for weeks, he is haled 60 miles away to a Federal court. That kind of a law must not pass.

Before I shall agree to let this bill pass by unanimous consent it must allow the question of necessity to be decided by the owner of the property, and not by the Department. It ought not to require him to have a Federal license on his person all of the time before he can go out to his own tank and kill a teal duck.

The plover is a migratory bird. There are certain seasons when they fly through Texas. A few Texas boys go out and kill a few plover on their own land, and then, if some Federal game warden is out there spying on them, they may be taken away to a Federal court. I am not in favor of that, and as long as I am a Member of this House no such law as that is going to pass by unanimous consent. The owner of the property must be protected under this law.

In the State of Texas for a hunting license we pay $2. That is a reasonable fee. But the State of Texas has never required an owner to get a license to hunt on his own land. Any man in Texas can hunt on his own land without a license. I am thinking about the ordinary citizen back home who ought to have the right to hunt on his own land, without Federal supervision, and until amendments are agreed upon to go into the bill, I shall object to it.

Mr. KLEBERG. Mr. Speaker, I have profound regard for the views of my friend from Texas [Mr. BLANTON] on these different matters involving the ownership of property and the sanctity thereof.

My friend, with reference to this particular proposition, is overlooking something. He is overlooking the proposition that this bill benefits the owners of land, where ducks may light, where that owner is interested in killing that duck. This bill benefits that man to the extent of $1 a year, for all expenses involved, for a whole season's sport. If this bill is not passed and if something is not done to not only protect the migration of these migratory birds, and give them a place to land and feed and rest, the landowner will not have the ducks to shoot at any price before long. This is why I say my friend is mistaken. He has said nothing about the difficulty involved in protecting the crops under ownership or tenant from damage or destruction by ducks. If we exempt the owners, a regular slaughterhouse would be set up under this bill. A club, for instance, could buy a lake and it would have 500 owners of the lake, all exempt to shoot migratory birds. What is my friend going to do about that?

Mr. BLANTON. Limit it. Exempt from license only the resident, individuals, excluding all collective ownership.

Mr. KLEBERG. Just a moment. My point is that my friend is taking an attitude on this proposition, based upon a perfectly natural objection to this kind of legislation, when you go back to the legislation referred to by the gentleman from Massachusetts [Mr. GIFFORD] with reference to the public shooting grounds bill. As a matter of fact, if the gentleman insists upon an amendment exempting owners in this bill, in my candid and honest opinion he will make it impossible for the United States of America to live up to its obligations under the treaty with Canada, insofar as the protection of bird life is concerned.

Mr. BLANTON. How about limiting it to the small resident, individual owner?

Mr. KLEBERG. Why do that? The gentleman recognizes the fact that we have been in the position in this House for years of listening to what might be termed "differentiation between large and small owners." There are many owners of real property, and my friend knows it, who have hundreds of places of less than 200 acres in different places, scattered all over the United States, and they would come under the provision of exempting owners.

Mr. BLANTON. I want my friend to answer this one question: Does he know of a single State in the Nation that taxes a man for hunting on his own land?

Mr. KLEBERG. I will say to the gentleman——

Mr. BLANTON. Can he name one State?

Mr. KLEBERG. I have always paid for hunting on my own land or land, I should say, that I have been in charge of.

Mr. WEIDEMAN. If the gentleman will yield, the State of Michigan is one State.

Mr. ZIONCHECK. To exempt the small farmer would render this bill unconstitutional, because of an unreasonable basis of classification. It would be class legislation.

Mr. KLEBERG. That is correct.

Mr. BLANTON. I want to say to my friend, every male constituent of mine in the State of Texas probably goes hunting once in a while on his own land.

Mr. KLEBERG. Is he interested in keeping up the duck shooting?

Mr. BLANTON. I do not want the Federal Government to put restrictions on him respecting his own land that the State does not.

The regular order was demanded.

Mr. BLANTON. Mr. Speaker, if the regular order is demanded, I object. I will reserve the objection, and probably will not object if we can have some definite understanding about this bill; but if I am forced, I will object.

The SPEAKER. Regular order is demanded.

Mr. BLANTON. I object. Mr. Speaker, if my friend will allow an amendment to remain in the bill as it was originally written, without tacking it onto a provision that the Department of Agriculture first must ascertain and determine that he was doing it to protect his crops, and will give

him the right as an owner to kill migratory birds on his own land to protect his crops, I shall not object to the bill.

Mr. KLEBERG. Will the gentleman permit me to explain for the benefit of the committee as well an amendment that I propose to offer to this bill, in line 4, page 2, after the word "owner", including "tenant or share-cropper"? The question involved with reference to the owner's exemption and the Department of Agriculture in connection therewith has simply to do with this proposition: It is not necessary for the owner of property to call on the Department of Agriculture to protect it, nor, after inclusion of the words "tenant or share-cropper", for them to call on the Department of Agriculture for permission; but it is necessary for them, if they want assistance from the Department of Agriculture, to notify the Department, and the language of the amendment is for the sole purpose of permitting the Government to cooperate with that owner for the protection of that property.

Mr. BLANTON. Who is going to determine the urgent necessity to save the crop? If it is left to the owner to make this determination, I will not object. But if the Department of Agriculture is to have control of it, then I will object.

Mr. KLEBERG. There is no determination, except by the owner.

Mr. BLANTON. If that is so, and if that is the legislative interpretation of this act, I will withdraw objection. But I wanted to have that understanding, and to have that legislative interpretation, because I do not want the Department of Agriculture, through some Dr. Tugwell, autocratically to determine whether a farm boy down in my district has violated the law, after he has killed a plover or duck on his own home farm. I withdraw my objection, Mr. Speaker.

The SPEAKER. Is there objection?

Mr. CARPENTER of Kansas. Mr. Speaker, reserving the right to object, I do not want this legislation to pass without taking this opportunity to register in the RECORD my objection to it. I am in favor of the objectives of the sportsmen and hunters of this country to preserve the wild life and protect our migratory birds by providing refuges for them.

It has been my experience, however, that after game laws are passed giving the average person an opportunity to do a little hunting that hunting clubs and rich hunters will lease up all of the country where there is good hunting, have some of their members appointed deputy game wardens, and do their utmost to prevent everyone who is not a member of the club from hunting; therefore I do not believe that such amendments as have been suggested will make this legislation any less objectionable or for the benefit of the greatest number of hunters.

What I object to is putting an extra tax upon the average hunter and requiring him to go to the post office and pay further tribute to the Government to enjoy that to which he has the right as a citizen of this country.

We have had experience in my State with legislation that provided for increasing the cost of the hunting license. The license fee for hunting out of the county was increased from $1 to $3, with the idea of bringing in more money to the fish and game department. The result, however, was, with this added increase in the license fee, fewer licenses were sold; and instead of getting more funds, the fish and game department discovered they were getting less funds. In my judgment, such a tax as here proposed may result in injuring the fish and game department of the various States with the same result just mentioned in Kansas.

I doubt very much whether the fee paid into the post office under this act will amount to enough to permit game refuges to be established over very much of the United States. We will be just adding another criminal law to our statute books, which will result in more disregard for the law and will further result in more persons being subject to be arrested by snoopers going about the country and being dragged into Federal courts many miles from where they live.

I believe it is proper for the Government to establish sanctuaries, refuges, and breeding grounds for the propagation of these migratory birds and to pass adequate legislation to protect them, but I do not believe that we ought to annoy the average hunter of this country with this additional stamp tax.

While I am not going to object to the consideration of this bill, I do want to register my ideas and objections in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read as follows:

Be it enacted, etc., That after the expiration of 90 days after the date of enactment of this act no person shall take any migratory waterfowl unless at the time of such taking he carries on his person an unexpired Federal migratory-bird hunting stamp issued to him in the manner hereinafter provided; except that no such stamp shall be required for the taking of migratory waterfowl by Federal or State institutions or official agencies, for propagation purposes or for the killing of such waterfowl when found injuring crops or other property, under such restrictions as the Secretary of Agriculture may by regulation prescribe. Any person to whom a stamp has been issued under this act shall upon request exhibit such stamp for inspection to any officer or employee of the Department of Agriculture authorized to enforce the provisions of this act or to any officer of any State or any political subdivision thereof authorized to enforce game laws.

Committee amendment: Section 1, page 2, line 4, after the word "or", insert "by the owner of the property or officially designated agencies of the Department of Agriculture."

Mr. JONES. Mr. Speaker, I suggest that the committee amendment should be modified to read "resident owner."

Mr. KLEBERG. Yes; it should be resident owner.

Mr. JONES. Mr. Speaker, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. JONES to the committee amendment: Before the word "owner" insert "resident."

The amendment to the committee amendment was agreed to.

Mr. KLEBERG. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KLEBERG to the committee amendment: Page 2, line 4, after the word "owner", insert "tenant or share cropper."

The amendment to the committee amendment was agreed to.

The committee amendment as amended was agreed to.

The Clerk read as follows:

Committee amendment: Page 2, line 7, strike out the word "property" and insert the word "property" with a comma after it.

The committee amendment was agreed to.

The Clerk read as follows:

Committee amendment: Page 2, line 9, after the word "prescribe", insert the following: "The Secretary of Agriculture shall, immediately upon the passage of this act, adopt and promulgate such regulations as are pertinent to the protection of private property in the injury of crops."

The committee amendment was agreed to.

Mr. WARREN. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WARREN: On page 1, line 4, insert after the word "person" the words "over 16 years of age."

The amendment was agreed to.

The Clerk read as follows:

SEC. 2. That the stamps required under this act shall be issued, and the fees therefor collected, by the Post Office Department, under regulations prescribed jointly by the Secretary of Agriculture and the Postmaster General: *Provided*, That stamps shall be issued at the post office or post offices of all county seats in the several States, at all post offices in all cities with a population of 2,500 or over and at such other post offices as said officers may by regulation prescribe. Each such stamp shall, at the time of issuance, be affixed adhesively to the game license issued to the applicant under State law, if the applicant is required to have a State license, or, if the applicant is not required to have a State license, to a certificate furnished for that purpose by the Post Office Department at the time of issuance of such stamp. For each such stamp issued under the provisions of this act, there shall be collected by the postmaster the sum of $1. Each such stamp shall expire and be void after the 30th day of June next succeeding its issuance.

SEC. 3. Nothing in this act shall be construed to authorize any person to take any migratory waterfowl otherwise than in accordance with regulations adopted and approved pursuant to any

treaty heretofore or hereafter entered into between the United States and any other country for the protection of migratory birds, nor to exempt any person from complying with the game laws of the several States.

SEC. 4. All moneys received for such stamps shall be accounted for by the postmaster and paid into the Treasury of the United States, and shall be reserved and set aside as a special fund to be known as the "migratory-bird-conservation fund", to be administered by the Secretary of Agriculture. All moneys received into such fund are hereby authorized to be appropriated for expenditure as follows:

(a) Not less than 75 percent shall be available for the acquisition, administration, maintenance, and development of suitable areas for migratory-bird sanctuaries, refuges, and breeding grounds under the provisions of the Migratory Bird Conservation Act, to be expended for such purposes in all respects as moneys appropriated pursuant to the provisions of such act, and for the administration, maintenance, and development of other preserves, reservations, or breeding grounds frequented by migratory game birds and under the administration of the Secretary of Agriculture.

(b) Not more than 20 percent shall be available for the enforcement of the Migratory Bird Treaty Act and any other act to carry into effect any treaty for the protection of migratory birds.

(c) The remainder shall be available for administrative expenses under this act, including reimbursement to the Post Office Department of funds expended in connection with the issuance of stamps, and printing and engraving of the same, and for administration expenses under the Migratory Bird Treaty Act and any other act to carry into effect any treaty for the protection of migratory birds, and the Migratory Bird Conservation Act.

Mr. KLEBERG. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. KLEBERG: Page 3, line 20, strike out section 4 down to and including line 25, on page 4 and insert the following:

"SEC. 4. All moneys received for such stamps shall be accounted for by the postmaster and paid into the Treasury of the United States, and shall be reserved and set aside as a special fund to be known as the "migratory-bird-conservation fund" to be administered by the Secretary of Agriculture. All moneys received into such fund are hereby appropriated for the following objects and shall be available therefor until expended:

"(a) Not less than 90 percent shall be available for the location, ascertainment, acquisition, administration, maintenance, and development of suitable areas for inviolate migratory-bird sanctuaries, under the provisions of the Migratory Bird Conservation Act, to be expended for such purposes in all respects as moneys appropriated pursuant to the provisions of such act; for the administration, maintenance, and development of other refuges under the administration of the Secretary of Agriculture, frequented by migratory game birds; and for such investigations on such refuges and elsewhere in regard to migratory waterfowl as the Secretary of Agriculture may deem essential for the highest utilization of the refuges and for the protection and increase of these birds.

(b) The remainder shall be available for administrative expenses under this act and the Migratory Bird Conservation Act, including reimbursement to the Post Office Department of funds expended in connection with the printing, engraving, and issuance of migratory-bird hunting stamps, and including personal services in the District of Columbia and elsewhere: *Provided*, That the protection of said inviolate migratory-bird sanctuaries, shall be, so far as possible, under section 17 of the Migratory Bird Conservation Act, passed February 18, 1929."

The amendment was agreed to.

The Clerk read as follows:

SEC. 5. (a) No person shall alter, mutilate, loan, or transfer to another any stamp issued to him pursuant to this act, nor shall any person other than the person to whom such stamp is issued use the same for any purpose.

(b) No person shall imitate or counterfeit any stamp authorized by this act, or any die, plate, or engraving therefor, or make, print, or knowingly use, sell, or have in his possession any such counterfeit, license, die, plate, or engraving.

SEC. 6. For the efficient execution of this act the judges of the several courts, established under the laws of the United States, United States commissioners, and persons appointed by the Secretary of Agriculture to enforce the provisions of this act shall have, with respect thereto, like powers and duties as are conferred upon said judges, commissioners, and employees of the Department of Agriculture by the Migratory Bird Treaty Act or any other act to carry into effect any treaty for the protection of migratory birds with respect to that act. Any bird or part thereof taken or possessed contrary to such acts shall, when seized, be disposed of as provided by the Migratory Bird Treaty Act or acts aforesaid.

SEC. 7. Any person who shall violate any provision of this act or who shall violate or fail to comply with any regulation made pursuant thereto shall be subject to the penalties provided in section 6 of the Migratory Bird Treaty Act.

Mr. COCHRAN of Missouri. Mr. Speaker, I move to strike out the last word for the purpose of asking a question.

I wish the gentleman from Texas would inform the House of the penalties provided by section 6 of the Migratory Bird Treaty Act. The same penalties will apply to this law. Can a man be sent to the penitentiary under the Migratory Bird Act? If so, I am sure the gentleman from Texas does not want to send a man to the penitentiary for failing to have a stamp in his possession at the time he kills a duck.

Mr. KLEBERG. The penalties under the Migratory Bird Treaty Act would be effective in the enforcement of the terms of this bill. The penalties would be the same as those provided under the Federal game law pertaining to migratory birds for willful extra-legal slaughter of those birds; that is all.

Mr. COCHRAN of Missouri. I know that. It is for that reason I ask, What are those penalties?

Mr. KLEBERG. It can be $10 and costs or as high as $500 or imprisonment for not more than 6 months.

Mr. COCHRAN of Missouri. Under the Migratory Bird Act can a man be sent to the penitentiary?

Mr. KLEBERG. Yes; but that is for a greater offense than extra-legal shooting.

Mr. COCHRAN of Missouri. The gentleman can assure the House then that the judge would have the power to provide a small sentence for violations of the terms of this bill?

Mr. KLEBERG. The judge has the same freedom of action with reference to the imposition of penalties under this bill as he has under the Federal law applicable today without regard to this bill.

Mr. COCHRAN of Missouri. The terms of the pending bill would not compel a judge to send a man to jail for violation?

Mr. KLEBERG. No.

Mr. COCHRAN of Missouri. The gentleman is sure of that?

Mr. KLEBERG. Yes.

Mr. COCHRAN of Missouri. As the judge has the option of imposing a small fine, I am satisfied. I now have section 6 of the Migratory Bird Act before me. This section provides that any person, association, partnership, or corporation that shall violate any of the provisions of the act shall be fined not more than $500, or be imprisoned not more than 6 months, or both. This will enable a judge to impose a small fine. To that I do not object.

The Clerk read as follows:

SEC. 8. The Secretary of Agriculture is authorized to cooperate with the several States and Territories in the enforcement of the provisions of this act.

SEC. 9. (a) Terms defined in the Migratory Bird Treaty Act, or the Migratory Bird Conservation Act, shall, when used in this act, have the meaning assigned to such terms in such acts, respectively.

(b) As used in this act (1) the term "migratory water fowl" means the species enumerated in paragraph (a) of subdivision 1 of article I of the treaty between the United States and Great Britain for the protection of migratory birds concluded August 16, 1916; (2) the term "State" includes the several States and Territories of the United States; and (3) the term "take" means pursue, hunt, shoot, capture, collect, kill, or attempt to pursue, hunt, shoot, capture, collect, or kill.

With the following committee amendment:

Page 6, line 16, after the word "States", insert "and the District of Columbia."

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time and passed.

A motion to reconsider was laid on the table.

ANTOINE BARADA AND OTHERS

The Clerk called the next bill, H.R. 5881, to investigate the claims of and to enroll certain persons, if entitled, with the Omaha Tribe of Indians.

Mr. BAKEWELL. Mr. Speaker, this is a very unusual bill, and more unusual still is the committee report that accompanies it. It contains a lengthy preamble which has no relevance whatever to the question at issue. It is a very pretty romance, and for the benefit of those who have not the report before them, I shall give an outline of the story.

It appears that some time before the French Revolution a French count, a roistering blade, saw a dusky Indian maiden by the name of "Laughing Buffalo" on the streets of Paris and became forthwith enamored of her, and sought a meeting with the fair charmer, but without success. She had left for her home in the New World before he had the opportunity of making her acquaintance. He immediately followed, but, unfortunately, Laughing Buffalo had set sail for New Orleans, and the count found himself on a boat bound for Montreal. Nevertheless, the ardor of his passion unabated, he still determined to find the maiden, and engaged in trading and in trapping with that end in view. Now, such was the affinity of these two souls that the count setting out from Montreal and Laughing Buffalo from New Orleans, they were drawn together somewhere on the prairies of Nebraska. They were married, and in due course of time three children resulted from the union. There are numerous grandchildren and great-grandchildren. Some 57 of them are enumerated in this bill, and no one knows how many more there may be.

This bill proposes that these descendants of that romantic union be forthwith enrolled as regular members of the Omaha Indian group, with all the rights and privileges thereto appertaining, including certain payments which are to be made, and a certain sum which is to be set aside, amount not specified, for the benefits that they would have received had they been enrolled earlier in this group.

The second peculiarity about this bill is that the Department of the Interior has been asked to express an opinion and has not yet done so. Under these circumstances it seems to me we should not pass the bill without hearing what the Department of the Interior has to say about it.

Mr. FISH. Will the gentleman yield?

Mr. BAKEWELL. I yield to the gentleman from New York.

Mr. FISH. Was this a Frenchman that married the Indian girl?

Mr. BAKEWELL. This was a Frenchman.

Mr. FISH. I may suggest to the gentleman that we might deduct this from the French war debt.

Mr. O'CONNOR. Will the gentleman yield?

Mr. BAKEWELL. I yield to the gentleman from New York.

Mr. O'CONNOR. If the gentleman objects to the bill, perhaps he has no objection to the report.

Mr. BAKEWELL. Oh, no! It is a most interesting story. The gentleman from New York, with his well-known gifts, might elaborate it into a charming novelette.

Mr. O'CONNOR. I see some very prominent names in here and we ought to find out whether they are a part of the Omaha Tribe. I see the names here of James, Mitchell, Mott, Beck, and others. We cannot tell how far this investigation will go in finding out who belongs to the Omaha Tribe.

Mr. CHAVEZ. Mr. Speaker, I believe the Chairman of the Committee on Indian Affairs can give the gentleman all the information he desires with reference to the merits of the bill, and I should like to have him listen to the gentleman from Nebraska.

Mr. HOWARD. Mr. Speaker, in view of the fact that the gentleman has so magnificently portrayed in his own way the language of my colleague, Mr. CHAVEZ, who wrote the report, I do not think it is necessary to make other explanation. I do not know how I can improve upon the gentleman's reading of the report.

I may suggest to the gentleman and to all others that there is nothing unfair in this bill. It is simply asking that an investigation be made; and if the Secretary of the Interior discovers that the claim of these people is good, then they shall be admitted to all the rights and privileges of the Omaha Tribe. If the gentleman will take the trouble to read the report, he will discover that the Omaha Tribal Council is in favor of this legislation with the amendment, provided that in the granting of the request for enrollment it does not detract from the property of the Omaha Tribe in any respect. There is no objection, and it seems to me fair that the Secretary of the Interior should be privileged to investigate this matter and see whether or not these people are justly entitled to be enrolled.

Mr. BAKEWELL. This bill does not simply authorize the Secretary of the Interior, but instructs him, after investigation has been made, to do certain things.

Mr. HOWARD. If he shall so find.

Mr. BAKEWELL. My contention is that the Secretary of the Interior has been asked for an opinion on this matter and has not seen fit to answer the committee, and this bill should not be passed until we hear from the Department of the Interior.

Mr. MOREHEAD. Mr. Speaker, I seldom annoy anyone, and in the 12 years I have been here I have never advocated the passage of a bill on the Consent Calendar. These people do not live in my district, I am not related to them, and I am not here to defend the romance; but for some 50 years I have been personally acquainted with this family and with their descendants. If my statement as a Member of Congress and my service here and as Governor of my State means anything, I want to testify to the justness of this claim. No more righteous or just claim was ever offered on the floor of this House, at least in my 12 years' service. I repeat, these are not constituents of mine. The reservation is not in my district, but I know the people and I know them well. They were at one time customers of mine.

Mr. BAKEWELL. All 57?

Mr. MOREHEAD. No; not that far back. Here is a statement in the report:

> In some cases the failure or refusal to record the full rights of an Omaha Indian appears to have been based upon some minor technicality, a matter always somewhat of a mystery to the Indian. In other cases such failure or refusal appears to have been wholly arbitrary and discriminatory. In some instances there is evidence before the committee to the effect that parties who refused to pay tribute were denied their right.

It is regretable that we have to dig up old historical, musty records, but that was the case in this instance.

The heads of the families that appealed for their rights adopted the poor policy which was established in those historical early days of paying a small tribute to certain parties. They refused to buy a feast or to give a fee, as was customary at that time. After they were denied their rights, of course, there have been refusals by the directly interested members of the tribal council.

As I understand this bill now, all these demands upon the tribe are released. The only thing they are asking for in this bill is, if the Secretary of the Interior finds that they have the necessary blood, that they shall be entitled to certain benefits. Even their sisters and cousins were placed upon the list in the earlier days. I say in defense of this, these claimants have a just claim under the law.

Mr. BAKEWELL. What is the amount involved?

Mr. MOREHEAD. I am not able to answer the gentleman's question. May I ask the gentleman from New Mexico [Mr. CHAVEZ] to furnish the technical information? I only desire to state the justness of this claim and testify to the deservingness of these people. There is no question in the world but that they are as justly and rightfully entitled to go upon these rolls as anyone that has ever been enrolled.

Mr. DONDERO. What will this cost the Government of the United States?

Mr. CHAVEZ. It may not cost the Government one cent. because, after all, unless the Secretary of the Interior finds they are entitled to this right, there will be no authorization to pay a nickel. All this does is to authorize the Secretary of the Interior to investigate the particular claim; and if he finds that they have a just claim, then he is to make a report to the Congress. The matter has been investigated by the Indian Affairs Committee very thoroughly; and not only this, but we also wanted to protect the Omaha tribal Indians in Nebraska, and we inquired of the tribe whether or not they objected to this bill, and if the gentleman will look on page 3 of the original bill——

Mr. BAKEWELL. Yes; I have seen that.

Mr. CHAVEZ. We put in a proviso suggested by the tribal Indians of Nebraska that the enrollment of the persons named in the act shall not be permitted to disturb or affect the Omaha tribal land nor the proceeds of the sale of the Omaha tribal lands, nor shall any such person share in the distribution of any money now in the United States Treasury to the credit of the Omaha Tribe of Indians.

Mr. BAKEWELL. I admit the force of what the gentleman says and he may be entirely right, and as the gentleman from Nebraska [Mr. MOREHEAD] has said, this may be a just claim, but I want to read the last sentence from the committee's report:

> The views of the Department upon this bill were requested by the committee under date of January 30 last, but up to the present time have not been received.

It seems to me we should pass this bill over without prejudice.

Mr. JENKINS of Ohio. If the gentleman from Connecticut will permit, I should like to ask the gentleman from Nebraska [Mr. MOREHEAD] a question with reference to this matter which I think goes to the meat of the whole thing. Whoever prepared the report seems to think it is an argument in favor of the bill to provide that the funds of the Omaha Indians shall not be invaded in any way to meet these payments. If these people want to come in as Omaha Indians, the other Omaha Indians who have their share ought to be compelled to divide up with them. In other words, I maintain that if these people are going to come in or if we are going to do anything for them at all, they ought to be brought in as Omaha Indians, and then they should get their share or whatever they are entitled to out of the funds of the Omaha Tribe instead of the Federal Government.

Mr. MOREHEAD. The gentleman, of course, will realize that after an effort has been made here for 45 or 50 years, the clients become mightily disgusted and are willing to get in, in any way, to get justice. I think the Secretary of the Interior has held that they are not entitled to this on account of subsequent legislation fixing a certain time for all of them to be on the rolls; but there is no justification for such action by reason of their blood or their tribal relations and if this bill is allowed to go through here, it is simply giving an opportunity to right a wrong that has existed, as I have said, for 50 years.

Mr. BAKEWELL. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

Mr. BLANTON. Mr. Speaker, I reserve the right to object, for a moment, because I want to ask a question. The gentleman from Connecticut, under his reservation of objection, only has a right to his share of the time.

Mr. MARTIN of Massachusetts. Mr. Speaker, I ask for the regular order.

Mr. BLANTON. Then, I object. I want to ask some questions.

Mr. MARTIN of Massachusetts. Mr. Speaker, I ask for the regular order.

The SPEAKER. Is there objection?

Mr. BLANTON. Mr. Speaker, since the regular order is demanded, I object.

Mr. ZIONCHECK. Mr. Speaker, I ask unanimous consent that the last paragraph on the first page of the committee report and the second paragraph thereafter be printed in the RECORD along with this argument.

Mr. TABER. Mr. Speaker, I think that ought not to be in the RECORD. I object.

Mr. HOWARD. Mr. Speaker, may I ask the gentleman who objected to this bill if he will be kind enough to let it go over without prejudice?

Mr. MARTIN of Massachusetts. I did not object to the bill. I called for the regular order.

Mr. BLANTON. The gentleman forced the objection by demanding the regular order. That precipitated the objection.

Mr. BAKEWELL. No——

Mr. BLANTON. The gentleman from Connecticut cannot take up all the time. The bill goes over automatically under the objection.

PROCEDURE IN CRIMINAL CASES AFTER VERDICT

The Clerk called the next bill, S. 2461, to amend an act entitled "An act to give the Supreme Court of the United States authority to prescribe rules of practice and procedure with respect to proceedings in criminal cases after verdict."

Mr. ZIONCHECK. Mr. Speaker, I ask unanimous consent that this bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

FORT MORGAN MILITARY RESERVATION, ALA.

The Clerk called the next bill, H.R. 8208, to provide for the exploitation for oil, gas, and other minerals on the lands comprising Fort Morgan Military Reservation, Ala.

Mr. ELTSE of California. Mr. Speaker, reserving the right to object, I should like to ask the gentleman from Alabama [Mr. HILL] if this bill does not establish a new precedent in appropriating money for the Federal Government to go into oil exploitation.

Mr. HILL of Alabama. I may say, frankly, to the gentleman that that construction might be put on section 1 of the bill. The idea of putting section 1 in the bill was simply to give the Secretary of the Interior power, if he thought it was necessary, to go down to the reservation and do anything necessary to acquire knowledge with which to make the right kind of lease. It was not the idea that it should cost the Government any money.

Mr. ELTSE of California. Why is the provision put in the bill?

Mr. HILL of Alabama. If the gentleman has any very strong objection to the provision, as the author of the bill, I shall interpose no objection to striking section 1 from the bill.

Mr. GOSS. Will the gentleman yield?

Mr. ELTSE of California. Yes.

Mr. GOSS. This land in Alabama is in a remote section. It used to have on it this fort, which is of no more use to the War Department or the Federal Government.

I say this because I happen to be on the subcommittee and heard the evidence—in drilling wells for water they ran across oil in the water, and inasmuch as the War Department is authorized by law now to sell this property, it seemed advisable to the committee that the Government should determine whether there is oil there before the War Department sells. If oil exists there, it would be more valuable to the Government than if it did not.

Mr. HILL of Alabama. I believe the gentleman concurs with the Committee on Military Affairs that while the land is in the hands of the Government it should be determined whether or not there is oil on it. The last time the land was appraised it was appraised at $15,000. Suppose the War Department sold the land for $15,000 and it went into the hands of a private party and then oil should be developed on it. It would seem that someone was derelict in his duty in disposing of Government property.

Mr. ELTSE of California. There is nothing to prevent the Government's leasing it. There are people who could exploit it.

Mr. GOSS. The Military Affairs Committee sometime ago declared this surplus property for sale, and at one time the War Department advertised for bids for sale, not for lease, but for sale.

Now, if at the end of 2 years oil is not discovered it goes back to the War Department for that sale.

Mr. ELTSE of California. Mr. Speaker, in view of the fact that the Secretary of the Interior sees no justification for the Government to prospect for oil, and in view of the statement from the Geological Survey that this would be setting a precedent for the appropriation of money for the discovery of oil, I shall have to object to the bill.

Mr. HILL of Alabama. Would the gentleman object if I agreed to strike out section 1? That would simply leave it as a leasing proposition.

Mr. ELTSE of California. Very well; I will withdraw my objection.

Mr. HILL of Alabama. If you strike out section 1, that will give the Government the right to lease it under the general leasing law.

Mr. ELTSE of California. I will withdraw my objection.

There being no further objection, the Clerk read section 1 of the bill, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized to make exploitation for oil, gas, and other minerals on the lands comprising Fort Morgan Military Reservation situate in the county of Baldwin, State of Alabama, including that portion of said lands which has been transferred to the Department of Commerce for lighthouse purposes, that portion of said lands which has been transferred to the Treasury Department for quarantine purposes, and that portion of said lands quitclaimed to the State of Alabama comprising 493.92 acres, more or less, and appropriations for such exploitation are hereby authorized: *Provided*, That the operation upon the tract quitclaimed to the State of Alabama shall be only by and with the consent of the State of Alabama.

Mr. GOSS. Mr. Speaker, I move to strike out section 1 of the bill.

The amendment was agreed to.

The Clerk read section 2 of the bill, as follows:

SEC. 2. The Secretary of the Interior is hereby authorized to lease within the period of 2 years from the date of the passage of this act said lands or parts thereof for exploitation for oil, gas, and other minerals under the act of February 25, 1920 (41 Stat. 437), as amended, and regulations thereunder. The Secretary of the Interior shall within 30 days from the date of the passage of this act advertise said lease for sale under the act of February 25, 1920 (41 Stat. 437), as amended, and regulations thereunder: *Provided*, That in case but one offer or bid is received, the Secretary may, in his discretion, award the right to extract the oil and gas to such bidder: *Provided further*, That the operation of the lease shall not interfere with the use for military purposes or for lighthouse purposes of that portion of said land transferred to the Department of Commerce nor with the use for quarantine purposes of that portion of said lands transferred to the Treasury Department: *And provided further*, That the operation upon the tract quitclaimed to the State of Alabama shall be only by and with the consent of the State of Alabama. If a lease be made the Secretary of the Interior is directed to make a written report to Congress of its terms and conditions within not less than 30 days after the execution of the lease.

Mr. HILL of Alabama. Mr. Speaker, I offer the following amendment.

The Clerk read as follows:

Page 2, line 10, after the word "act", strike out "said lands or parts thereof" and insert "and lands comprising Fort Morgan Military Reservation situated in the county of Baldwin, State of Alabama."

The amendment was agreed to.

The Clerk completed the reading of the bill as follows:

SEC. 3. Any part or parts of the act approved March 12, 1926, authorizing the sale of the Fort Morgan Military Reservation is hereby suspended for a period of 2 years following the passage of this act or until it has been determined by the Secretary of the Interior that it is impracticable and uneconomical to exploit this reservation for oil, gas, and other minerals under the provisions of this act: *Provided*, That the failure of private interests to submit satisfactory proposal for the leasing of this property under the provisions of section 2 of this act, after due advertisement thereof, may be accepted as proof of impracticability of exploitation.

Mr. HILL of Alabama. Mr. Speaker, I ask unanimous consent that the Clerk be authorized to correct numbers.

There was no objection.

The bill as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

RULES OF PRACTICE IN CRIMINAL CASES AFTER VERDICT

Mr. MILLER. Mr. Speaker, I ask unanimous consent to return to Calendar No. 92, S. 2461, to amend an act entitled "An act to give the Supreme Court of the United States authority to prescribe rules of practice and procedure with respect to proceedings in criminal cases after verdict."

The SPEAKER. Is there objection?

Mr. JENKINS of Ohio. Mr. Speaker, I reserve the right to object for the purpose of getting an explanation of this bill.

Mr. MILLER. Mr. Speaker, in the Seventy-second Congress we authorized the Supreme Court to make certain rules and regulations pertaining to appeals from the United States courts after a verdict of guilty. The Supreme Court is about to promulgate these rules, but they are not certain that they have a right under that statute to promulgate the same rules governing an appeal from conviction by a court sitting without the intervention of a jury, or in the case of a plea of guilty.

Mr. JENKINS of Ohio. Is the report from the committee unanimous?

Mr. MILLER. Yes.

Mr. JENKINS of Ohio. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection?

There was no objection.

The Clerk read the bill, as follows:

Be it enacted, etc., That the act of February 24, 1933 (ch. 119), entitled "An act to give the Supreme Court of the United States authority to prescribe rules of practice and procedure with respect to proceedings in criminal cases after verdict" (U.S.C., title 28, sec. 723a), be, and the same is hereby, amended to read as follows:

"That the Supreme Court of the United States shall have the power to prescribe, from time to time, rules of practice and procedure with respect to any or all proceedings after verdict, or finding of guilt by the court if a jury has been waived, or plea of guilty, in criminal cases in district courts of the United States, including the District Courts of Alaska, Hawaii, Puerto Rico, Canal Zone, and Virgin Islands, in the Supreme Courts of the District of Columbia, Hawaii, and Puerto Rico, in the United States Court for China, in the United States Circuit Courts of Appeals, in the Court of Appeals of the District of Columbia, and in the Supreme Court of the United States: *Provided*, That nothing herein contained shall be construed to give the Supreme Court the power to abridge the right of the accused to apply for withdrawal of a plea of guilty, if such application be made within 10 days after entry of such plea, and before sentence is imposed.

"SEC. 2. The right of appeal shall continue in those cases in which appeals are now authorized by law but the rules made as herein authorized may prescribe the times for and manner of taking appeals and applying for writs of certiorari and preparing records and bills of exceptions and the conditions on which supersedeas or bail may be allowed.

"SEC. 3. The Supreme Court may fix the dates when such rules shall take effect and the extent to which they shall apply to proceedings then pending, and after they become effective all laws in conflict therewith shall be of no further force."

The bill was ordered to be read a third time, was read the third time, and passed.

A motion to reconsider was laid on the table.

PRELIMINARY EXAMINATION OF OGEECHEE RIVER, GA.

The Clerk called the next bill, H.R. 7793, authorizing a preliminary examination of the Ogeechee River in the State of Georgia with a view to controlling floods.

The SPEAKER. Is there objection?

Mr. JENKINS of Ohio. Mr. Speaker, I should like to ask the Chairman of the Flood Control Committee a question with reference to this bill, because it embodies a matter of policy. As I remember it, in the sessions gone by all these matters have been referred to the Committee on Rivers and Harbors and the omnibus bill of the Committee on Rivers and Harbors took care of these items. I remember distinctly in the last Congress all these were objected to. I had a bill that I was interested in myself. These bills were all set aside and everyone was instructed to take steps to get his bill heard before the Committee on Rivers and Harbors and put into the omnibus bill, which I did, and had my survey made.

Mr. PARKER. Mr. Speaker, the gentleman from Louisiana [Mr. WILSON], Chairman of the Flood Control Committee, does not appear to be here at the moment, but this is my bill, and I happen to be a member of both the Rivers and Harbors Committee and the Flood Control Committee and I happen to know that the Rivers and Harbors Committee did not report a bill at the last session of Congress and they do not plan to report a bill at this session, if I am correctly informed——

Mr. JENKINS of Ohio. I meant the last Congress.

Mr. PARKER. If I am required to change procedure, I shall lose the chance of having my bill passed, because there will not be any possible chance to get it passed in the suggested manner——

Mr. JENKINS of Ohio. Would the gentleman allow this matter to be passed over until the next call of the calendar so that it can be looked into? I think a very serious matter is involved here because, as I remember it, we had exhaustive discussions and a question then was raised as to whether or not the Flood Control Committee should embark on the same thing that the Rivers and Harbors Committee had been doing. The opinion at that time was that they should not do so. I ask unanimous consent that the bill go over without prejudice.

The SPEAKER. Is there objection?

Mr. PARKER. Mr. Speaker, will the gentleman withhold that request for a moment until I can make a statement?

Mr. JENKINS of Ohio. Yes.

Mr. PARKER. If this is not a flood-control measure, Mr. Speaker, it is not anything. It is a bill that my people are vitally interested in. It means something to me and it means something to them. If the gentleman is going to object purely on the ground of procedure, then I think I ought to have some remedy. I have already stated to the gentleman that there will be no omnibus bill from the Committee on Rivers and Harbors. This bill comes from the Flood Control Committee with a unanimous report.

Mr. JENKINS of Ohio. That may be justification of my position, because the Committee on Rivers and Harbors has refused to report an omnibus bill.

Mr. PARKER. It has not refused to report it. The committee desires to report such a bill, but I am told there are reasons why it will not be reported by that committee.

Mr. HILL of Alabama. Mr. Speaker, let me say to the gentleman from Ohio that there is good precedent for the Flood Control Committee reporting this type of bill.

I remember some 2 years ago I had a similar bill, and the gentleman from Alabama [Mr. STEAGALL] had a similar bill. Those bills were referred by the Parliamentarian of the House to the Flood Control Committee and were reported out by that committee and passed this House unanimously.

Mr. JENKINS of Ohio. I remember distinctly that I had a bill and it went off, and we had to go to the other committee and have it passed. Now, this is my objection, and it is not a captious objection at all; but in this bill you seek to amend a big program. For instance, each of these bills that comes up contains language to the effect that it is sought to "amend the act for the control of floods in the Mississippi Valley and the Sacramento Valley of California."

All of these are bills that are amendments to the great Mississippi Valley control bill. It was considered that that was a law unique in itself, and that these matters should not come in under the cloak of that great improvement, and they should all go back to the Committee on Rivers and Harbors. If the gentleman will agree to my suggestion that this go over until the next session, I shall not object. Then we can marshal these precedents and see about it.

I therefore renew my request, Mr. Speaker, that the bill be passed over without prejuduice.

Mr. PARKER. Mr. Speaker, I object. I had rather the gentleman would object to the bill.

Mr. JENKINS of Ohio. Then I object to the consideration of the bill.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate requests the House to return to the Senate the bill (S. 2359) to provide for the disposition of unclaimed deposits in national banks.

The message also announced that the Senate disagrees to the amendment of the House to the bill (S. 551) entitled "An act for the relief of A. W. Holland", requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BAILEY, Mr. TRAMMELL, and Mr. CAPPER to be the conferees on the part of the Senate.

The message also announced that the Senate agrees to the amendments of the House to the bills of the Senate of the following titles:

S. 2. An act for the relief of C. M. Williamson; Mrs. Tura Liljenquist, administratrix of C. E. Liljenquist, deceased; Lottie Redman; and H. N. Smith;

S. 751. An act authorizing the Secretary of the Treasury of the United States to refund to the Farmers' Grain Co. of Omaha, Nebr., income taxes illegally paid to the United States Treasurer;

S. 1426. An act for the relief of the estate of Benjamin Braznell;

S. 1496. An act for the relief of Nannie Swearingen; and

S. 1782. An act for the relief of the B. & O. Manufacturing Co.

DEPORTATION OF ALIEN SEAMEN

Mr. DICKSTEIN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3842) to provide for the deportation of certain alien seamen, and for other purposes.

The Clerk read as follows:

Be it enacted, etc., That this act may be cited as the "Alien Seaman Act of 1933."

SEC. 2. Every alien employed on board of any vessel arriving in the United States from any place outside thereof shall be examined in quarantine by an immigration inspector to determine whether or not he (1) is a bona fide seaman, and (2) is an alien of the class described in section 7 of this act; and by a surgeon of the United States Public Health Service to determine (3) whether or not he is suffering with any of the disabilities or diseases specified in section 35 of the Immigration Act of 1917.

SEC. 3. Unless such alien was shipped in a port in continental United States, then if it is found that such alien is not a bona fide seaman, he shall be regarded as an immigrant and immediately be ordered removed from the vessel to an immigration station; and the various provisions of this act and of the immigration laws applicable to immigrants shall be enforced in his case. From a decision holding such alien not to be a bona fide seaman the alien shall be entitled to appeal to the Secretary of Labor, and on the question of his admissibility as an immigrant he shall be entitled to appeal to said Secretary, except where exclusion is based upon grounds nonappealable under the immigration laws. If found inadmissable, such alien shall be deported, as a passenger, on a vessel other than that by which brought, at the expense of the vessel by which brought, and the vessel by which brought shall not be granted clearance until such expenses are paid or their payment satisfactorily guaranteed. If an alien shall be shipped in a port of the United States and subsequently shall be returned to the United States by the same vessel, his right to remain in the United States shall not thereby be improved, extended, or altered.

SEC. 4. If it is found that such alien is subject to exclusion under section 7 of this act, the inspector shall give immediate order to the master to remove such alien together with his effects and wages, if any, to an immigration station, and such alien shall then be deported in accordance with the provisions of said section 7.

SEC. 5. If it is found that, although a bona fide seaman, such alien is afflicted with any of the disabilities or diseases specified in section 35 of the Immigration Act of 1917, disposition shall be made of his case in accordance with the provisions of the act approved December 26, 1920, entitled "An act to provide for the treatment in hospital of diseased alien seamen."

SEC. 6. All vessels entering ports of the United States manned with crews the majority of which, exclusive of licensed officers, have been engaged and taken on at foreign ports shall, when departing from the United States ports, carry a crew of at least equal number, and any such vessel which fails to comply with this requirement shall be refused clearance: *Provided, however*, That such vessel shall not be required when departing to carry in the crew any person to fill the place made vacant by the death or hospitalization of any member of the incoming crew.

SEC. 7. No vessel shall, unless such vessel is in distress, be granted entry into a port of the United States if such vessel has as a member of her crew any alien who if he were applying for admission to the United States as an immigrant would be subject to exclusion under subdivision (c) of section 13 of the Immigration Act of 1924, except that any ship of the merchant marine of any sovereign nation may freely bring any excluded citizen or subject of such nation or any person not racially excluded who is a bona fide seaman as a member of the vessel's crew, exclusive, however, of any citizen, subject, or inhabitant of any colony, dependency, or mandate who is racially excluded from coming to the United States as an immigrant. Any alien seaman brought into a port of the United States in violation of this provision shall be excluded from admission or temporary landing and shall be deported, either to the place of shipment or to the country of his nativity, as a passenger, on a vessel other than that on which brought, at the expense of the vessel by which brought, and the vessel by which brought shall not be granted clearance until such expenses are paid or their payment satisfactorily guaranteed.

SEC. 8. This act shall take effect 60 days after it is passed.

Mr. BLAND. Mr. Speaker, I demand a second.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. BLAND. I am.

Mr. DICKSTEIN. Mr. Speaker, I ask unanimous consent that a second be considered as ordered.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. DICKSTEIN. Mr. Speaker, I yield 10 minutes to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Speaker, ladies and gentlemen of the House, this bill has been sponsored by the American Federation of Labor for many years. It has been endorsed at the conventions of the American Federation of Labor for a number of years. It passed the Senate, but its sponsors were never able to get it through our committee and have it considered by the House. I introduced the bill at the request of organized labor on March 30, 1933. We conducted extensive hearings on the bill, and during the last session a majority of the committee reported the bill unfavorably. Several weeks ago we succeeded in getting the committee to reconsider the vote by which the bill was previously rejected and to report the bill favorably. During all of the years that organized labor has exerted itself to have this bill passed certain shipping interests have conducted a well-organized and highly financed lobbying activity against the bill because it would prevent them from employing oriental labor as a substantial part of their crews instead of American labor. They have contended that they could not operate their vessels successfully unless they had the benefit of oriental labor. Others have opposed it because they did not want to carry away from our ports as large a crew as they brought and they do not want to pay the expenses for deporting aliens brought by them illegally under the guise of seamen.

SITUATION TO BE CORRECTED BY THIS BILL

Now, what is the situation that we want to correct? In the first place, we want to prevent the entry of aliens into the United States under the guise of seamen. Since the enactment of the La Follette Seaman Act in 1915 every seaman coming to the ports of the United States on any vessel has the right to go ashore and to remain there for 60 days. He can reship on the same vessel that he came on or on any other vessel that he desires to. He cannot be arrested until after the expiration of 60 days. Since the passage of this act immigrants who were inadmissible have entered the United States illegally under the guise of being seamen. Our immigration laws and Chinese Exclusion Act have been steadily, and in a constantly increasing number of instances, violated by means of substitution by young Chinese for aged ones, desiring to return to China, departing as seamen on the same ship (b) by smuggling Chinese excluded by law into the United States, (c) by bringing to the United States a larger number of persons as seamen than the vessel carries away on departure, (d) by shipping as seamen persons who are in fact immigrants unable to obtain a visa and who, on the vessel's arrival in the United States, leave the vessels to mix at once with such of the population as are of their own language and nationality.

The hearings have shown that large sums of money—in some instances as much as $1,100—were paid by Chinese in order to secure entrance into the United States; and that a large number of persons from Europe have entered the United States as seamen, although they were immigrants and not entitled to enter the United States. These persons are designated as mala fide seamen under this bill. The record shows that more than 500,000 so-called "seamen" have deserted their vessels during the past 25 years and become a part of the population of this country in violation of our immigration laws and exclusion acts. Among this number are thousands of Chinese and others who are excluded by law from entrance to the United States. We only have a partial record of the number of immigrants who have masqueraded as seamen and entered the United States in violation of our laws. Investigation has shown that there are many thousands of others concerning which we have no record who have come to this country illegally.

SECRETARY OF LABOR'S STATEMENT

The Secretary of Labor, in her annual report for the fiscal year ending June 30, 1933, made this pertinent and very interesting statement:

In the past, oftentimes as many as half of the crew of vessels of certain flags, passed as bona fide seamen, would desert in port, and when the vessel came to sail the master would sign on none or very few others to replace them, a plain indication that the crew was excessive upon arrival, and a moral certainty that aliens have been signed on for a consideration and with fore knowledge that illegal entry into the United States was planned. This is one of the many rackets to circumvent the immigration laws, but is not actionable unless convincing and corroborative evidence of conspiracy is obtained, which is almost impossible, as the deserters speedily lose themselves in our population.

WILLIAM GREEN'S STATEMENT

The American Federation of Labor, through its president, Hon. William Green, sent to each Member of Congress a letter dated March 2, 1933, which expresses the need for this legislation so well that I wish to include it at this point.

DEAR SIR: H.R. 3842, a bill for the deportation of certain alien seamen, which has been reported out of the Committee on Immigration and Naturalization, is expected to come up under the suspension of the House rules on Monday, the 5th of March.

The American Federation of Labor and all its affiliated organizations are deeply interested in the passage of this bill. The purpose of the bill is to make the exclusion and immigration laws applicable to seamen, and to compel vessels to take away as many seamen upon departure as they brought into our port.

Nearly all of those who have come by evasion of the exclusion and immigrations laws, in late years especially, are men who could not obtain a visa and, therefore, come as seamen. The number of seamen so coming—many of whom are being smuggled in at rates running from $200 to $1,100 per man—are interfering with the enforcement of the immigration law, and are scattering all over the country, causing trouble everywhere. It has been proved that a large number of gangsters and racketeers have so entered.

The American Federation of Labor in its several conventions for the last 10 years has urged the passage of this bill. We respectfully request your presence and ask your assistance in getting the bill passed.

THIS BILL WILL STOP SMUGGLING OF ALIENS

This bill provides that when any vessel arrives in the United States from any place outside thereof every employee on board of it shall be examined and quarantined by an immigration inspector to determine whether or not he (1) is a bona fide seaman and (2) is an alien of the class described in section 7 of this act; and by a surgeon in the United States Public Health Service to determine (3) whether or not he is suffering with any of the disabilities or diseases specified in section 35 of the Immigration Act of 1917. Section 3 of the bill provides that unless such alien was shipped in a port in continental United States, then if it is found that such alien is not a bona fide seaman, he shall be regarded as an immigrant and immediately be ordered removed from the vessel to an immigration station. If found inadmissible, such alien shall be deported, as a passenger, on a vessel other than that by which brought, at the expense of the vessel by which brought, and the vessel by which brought shall not be granted clearance until such expenses are paid or their payment satisfactorily guaranteed. The bill also provides that all vessels entering ports of the United States manned with crews the majority of which, exclusive of licensed officers, have been engaged and taken on at foreign ports shall, when departing from the United States ports, carry a crew of at least equal number, and any such vessel which fails to comply with this requirement shall be refused clearance.

Of course, no vessel shall be required when departing to carry in the crew any person to fill the place made vacant by the death or hospitalization of any member of the incoming crew. The bill also provides that no vessel entering our ports can carry as a member of her crew any alien who, if he were applying for admission to the United States as an immigrant, would be subject to exclusion under subdivision C of section 13 of the Immigration Act of 1924, which applies to Asiatic people such as Chinese, Japanese,

and so forth, with the exceptions provided in section 7 of this bill.

Investigation has shown that the examination of the crew of any vessel seeking entrance to our ports for the purpose of determining whether or not members of the crew are bona fide seamen must be made in quarantine. Many of our consuls have stated that it is impossible for them to adequately examine the crews of vessels coming to the United States because of insufficient force and principally because even after an examination is conducted in a foreign port the masters of ships succeed in substituting immigrants for seamen and there is no way for the consul to check up on this. It is also necessary to order an immigrant who has been found in quarantine to be masquerading as a seaman taken from the vessel and detained at an immigration station because the law of the United States gives every seaman the right to go ashore and forbids any master from holding any such seaman on the vessel. It is also necessary to send the alien to an immigration station and to require that he be deported on some other vessel at the expense of the guilty vessel, because if the vessel which has been found guilty of bringing a mala fide seaman is only required to carry the immigrant back, there is not sufficient penalty to discourage the violation of the immigration laws and induce the shipowners and masters to be extremely careful in selecting crews. But when vessels know that if they try to smuggle an alien into the United States in violation of the law, or if they permit the violation of our law through their carelessness and indifference they will be required to pay the expenses of sending the alien back on some other vessel, it will not only deter them from violating the law, but it will make them be very careful and diligent in selecting their crews so as to prevent immigrants from masquerading as seamen. This safeguard against violation or negligence on the part of the vessel owners and masters is also strengthened by the requirement that the vessel carry away with her as large a crew as she brought. It is well known that most nations require a minimum crew, but do not forbid any number above the minimum. Therefore, owners and masters who want to smuggle aliens into the United States bring a large number of immigrants in excess of the minimum crew and when they anchor in our ports all of the immigrants in excess of the minimum crew required by the law of the particular nation immediately go ashore and mix at once with such of the population as are of their own language and nationality. Unless the masters see fit to report these desertions, the Government is not likely to know about them, and if the Government does find out about it, it is extremely difficult to discover the whereabouts of the deserting aliens. But when the owners and masters of a vessel know that they will be required to carry away with them as large a crew as they brought there will be no inducement to smuggle aliens into the United States.

OBJECTIONS URGED TO THE BILL

A number of nations have filed vigorous protests against the bill with our State Department. The grounds of their objections are so numerous that it would be impossible to state them here. Some of them oppose the provisions of the bill which will forbid them from bringing into our ports as members of their crews Chinese, Japanese, and other aliens who belong to the races who are now excluded under our immigration laws. They do not wish to be deprived of this cheap, pauper labor. The answer to this is, first, that the same law will not only apply to foreign vessels entering our ports but also to American vessels. It is true that a British, German, or French vessel will not be permitted to enter our ports carrying Chinese, Japanese, or members of one of the excluded races; but neither will an American vessel be allowed to enter our ports with these people on board as seamen. So the law does not put any greater burden on foreign vessels in this respect than it does on American vessels, and therefore it does not discriminate in favor of American vessels or the vessels of any other flag. Not only does this law apply to all nations alike, including our own, but it has been found necessary to apply the Exclusion Act to seamen in order to prevent the illegal entry of thousands of Chinese and other Asiatics who come into the United States under the guise of seamen. It has been found very difficult, if not impossible, to arrest a Chinaman after he has gone ashore and mixed with his own nationality in some thickly populated center. Under the law of the United States he has a right to remain ashore 60 days, and during that time he loses himself so completely with the aid of his friends that his identity and whereabouts cannot be discovered. Even if our immigration officers knew that a certain number of Chinese had come in on a vessel under the guise of seamen, the Chinese have a way of substituting older men for the young ones, so that when the vessel sails she carries back with her the same number of Chinamen that came. This is usually what the Chinese want. The older one, who has earned his money, wants to return to China so that he can spend it and be with his wife and children or relatives during his declining days. On the other hand, the younger Chinaman wants to enter the United States so that he can make his money and later on return to China and spend it. So many Chinamen and other Asiatics have entered the United States in the past 25 years under the guise of seamen that it has been thought necessary to prevent vessels from entering the ports of the United States with such Asiatics as members of their crew.

Insofar as the protesting of foreign nations is concerned, they can be answered by simply referring to the fact that foreign powers have objected to every immigration law that we have ever passed. The State Department has agreed that this does not violate any treaty with any foreign nation. No nation has a right to dictate to us what laws we shall pass in the protection of our own people.

Certain shipowners have objected because this law will not permit them to use Chinese crews and other Asiatics to man their ships. The United States Shipping Board has informed me that the labor cost of an American vessel is only about 10 or 15 percent of the total cost of operating the ship. Therefore assume that it will cost the American shipowners more money to operate their vessels with American labor, the increased cost will only constitute a trivial part of the total cost of operation. Certainly this increased cost is justified if we can give to the American labor the jobs that are now filled by the Chinese coolie. We have approximately 7,000,000 men unemployed, and we can only find work for these people when we give them preference. Many of the ships sailing American flags are subsidized by our taxpayers, and yet some of them carry as high as 60 percent aliens in their crews. If an American vessel is going to be subsidized by our taxpayers and if her profits are to be made by the transportation of American merchandise and goods, it is certainly not asking too much that such vessels be required to employ American labor.

AMERICAN VESSELS NOT DISCRIMINATED AGAINST

The American vessel is not discriminated against by preventing her from carrying Chinese and other Asiatics as members of her crew, because the same provision applies to all other vessels entering our ports. This bill really helps the American ships because it puts our vessels in a position to compete with foreign ships. By denying foreign vessels entering our ports the right to use Asiatic labor will make it possible to require American vessels to employ American seamen and to pay decent wages. We, therefore, not only aid labor but we prevent the Asiatics from being exploited and enslaved by greedy shipowners.

Mr. LANHAM. Mr. Speaker, will the gentleman yield?

Mr. DIES. I yield.

Mr. LANHAM. The gentleman made the statement that in years gone by approximately 500,000 of these seamen became intermixed with our own population.

Mr. DIES. That was during the past 25 years.

Mr. LANHAM. What has been done to check up on them, and to what extent have they been deported under present law?

Mr. DIES. I do not have those figures with me now. Some of them have been deported, but a large number of them are still here.

Mr. LANHAM. Mr. Speaker, will the gentleman yield further?

Mr. DIES. I yield.

Mr. LANHAM. I am in sympathy with the gentleman's contention in this matter. I am just wondering to what extent these 500,000 people who were absorbed into our population have been deported and whether the majority of them were allowed to remain in this country or were sent back.

Mr. DIES. I think it can be safely said that the majority of aliens who have entered this country illegally during the past 25 years are still here. As I previously stated, they lose themselves and conceal their identity in the great populous centers of the country. I might also add that there is no question that most of these aliens can be deported by appropriate legislation and vigorous enforcement of the law.

This bill is also objected to by shipowners because they say it imposes too great a burden upon vessels by requiring them to pay the expenses to deport inadmissible immigrants brought by them under the guise of seamen and making it necessary for the vessel to carry away with her as large a crew as she brought. The answer to this is that if the master or owner of the vessel will obey the law and will exercise prudence and care in selecting as members of the crew bona fide seamen, they have nothing to fear. Shipowners who do not wish to obey our laws and help us prevent smuggling and illegal entries should be penalized. Although many shipowners have opposed this bill for many years and successfully blocked favorable consideration, they have never proposed any adequate substitute for it. They all admit that thousands of aliens are entering this country illegally by desertions and that this condition is making ineffective our immigration laws, but they have never come forward with any constructive plan to remedy the situation.

This bill is one of the most important bills that organized labor has sponsored in many years. It will not only materially aid American seamen by giving them the jobs now filled by Asiatics on board American vessels, but it will help all other classes of American labor. The thousands of aliens illegally entering the United States under the guise of seamen compete with the American workmen. Perhaps the word "compete" does not adequately express the true situation. These aliens do more than compete. Their willingness to work for low wages and under any conditions make it impossible for the American workmen to compete with them. The unemployment problem can never be solved so long as we permit foreigners to enter this country legally or illegally and take the jobs that should be filled by American labor. This bill will not only help labor but it will promote law enforcement in the United States and maintain our standard of living. Many of these aliens become racketeers and criminals.

This bill will go a long way toward the solution of the great problem caused by the thousands of aliens who illegally come to the United States but it does not completely solve the problem. We must prevent the thousands of aliens who are illegally crossing our Mexican and Canadian borders from coming here and we must reduce the quota of all nations and prevent new seed immigration. I have a bill pending before the Immigration Committee to accomplish this purpose. Hearings on this bill will begin tomorrow and I certainly hope that after this bill has been enacted today the Committee will favorably report my other bill and the House will pass it. With the passage of these two bills and their honest enforcement, our immigration problem will be solved and when we have solved our immigration problem we will have accomplished a great deal in the matter of solving our unemployment problem. Let it be remembered that the unemployment problem can never be permanently solved in this country as long as our labor supply is increased by additions from abroad. Such additions are not needed and will not be needed for many decades.

Mr. BLAND. Mr. Speaker, if there were nothing more in this bill than has been presented by the distinguished gentleman from Texas, who is always fair, I should not oppose it. My opposition to this bill is based first upon a fundamental conviction that a bill of this magnitude involving questions affecting relations between America and foreign countries and affecting very vitally the interests of some of our ports, ought not to be considered under a suspension of the rules without the right to change any part of the bill.

There are provisions in this bill which, in my opinion and in the opinion of industries in Hampton Roads, would vitally affect that port in its bunkering business.

The great argument that carries this bill—and in principle I agree with the desire and purposes of those sponsoring the bill—is to exclude alien seamen who are coming into this country. I will go further than this bill goes. When the La Follette Act was passed we extended an invitation to alien seamen to come into this country, and we are reaping today what was then sown. In many particulars I agree with that bill, but, Mr. Speaker, when we denied the right to a foreign shipmaster to arrest a deserting alien seaman, we invited the alien seaman to stand upon our docks while his ship sailed and to go into the population of this country. I do not claim that there should be the right in the master of a ship to arrest to enforce a contract, but if an alien seaman seeks to enter this country other than by the prescribed modes of immigration, let him be arrested and taken back to the ship. On the one hand we are inviting these aliens to come in, and on the other we are penalizing the ship when the ship has no power to stop them from coming in.

Mr. Speaker, I will go as far as anyone in stopping immigration into this country. I have voted for every bill that would restrict immigration that has ever been brought up on the floor of the House since I have been here; and I think my record is consistent on this point. I will go further: Let these gentlemen require that a certificate shall be given to every man who goes ashore as an alien seaman, and if he is found in the body of the population after its expiration let him be deported.

I am perfectly willing to go along with the registration of immigrants in this country and have a check-up on them so that they may be sent out. This bill will be nothing else but stopping at the spigot when you ought to be stopping at the bunghole. Has the Secretary of State been heard on this measure?

Mr. DIES. The gentleman asks me the question?

Mr. BLAND. Yes.

Mr. DIES. I may say to the gentleman that we have heard the Labor Department and the State Department many times. The State Department has said repeatedly that this does not violate any treaty with a foreign nation.

Mr. BLAND. But the State Department has stated that 10 nations have protested against this bill. I do not care much about the protests of other nations, but we are dealing with nations who can play at the same game, and when we pursue pin-prick policies they can retaliate.

Mr. DIES. May I say to the gentleman that when we passed the 1924 immigration law practically all the nations objected.

Mr. BLAND. I am not going to bind myself by what the other nations say or do, but we are pursuing a policy that will result in pin pricks. Now let us get down to facts.

Mr. BRITTEN. Will the gentleman yield?

Mr. BLAND. I yield to the gentleman from Illinois.

Mr. BRITTEN. Can the gentleman tell me whether the State Department or the Labor Department is opposed to this bill?

Mr. DIES. I will tell the gentleman. The subordinates of these Departments that appeared before our committee opposed the bill. I undertook to get them to say whether or not the Secretaries themselves opposed it, and I know of nothing in the record to the effect that the Secretary of Labor or the Secretary of State has opposed this bill, but their subordinates have objected.

Mr. BRITTEN. Were they in favor of the bill or opposed to the bill?

Mr. DIES. They opposed the bill.

Mr. BLAND. Every time these Departments have come before the committee they have opposed this bill. They have opposed it on the ground that we have not the deten-

tion camps in which to keep these people. It is going to cost $600,000 more a year to enforce the law. That is one of the grounds of objection. In a few minutes I will show you what the Assistant Secretary of State had to say in former hearings. I submit that this matter should be threshed out by consideration under the ordinary rules of the House. This bill has been heard many times, but not by this Congress. There have been hearings, but we have no printed hearings here for our guidance.

Mr. DIES. The gentleman wants to be fair I know. We have had something like four or five hearings in the Senate and House and they have been printed from time to time.

Mr. BLAND. Yes. I have two or three here.

Mr. DIES. I know the gentleman wants to be fair. He said something about this increased cost of enforcement. This does not require any more of a set-up than we have at the present time. The Labor Department does not say that they would employ any other set-up except the one they have now.

Mr. BLAND. But they will have to employ more men. May I remind the gentleman that he is taking my time? I am sure he would not want to do this.

Here is what the Secretary of State said when a similar bill (S. 7) was before the Senate in 1932. Mr. Carr, the Assistant Secretary of State, testified as follows:

Approximately 1,000,000 alien seamen arrive in the United States ports during a fiscal year and are examined by the Public Health Service and the Immigration Bureau officials. Of this number, the record of desertions as shown by the figures of the Bureau of Immigration during the past 5 years has been as follows:

1926–27	23,447
1927–28	12,357
1928–29	11,314
1929–30	9,117
1930–31	3,341

Mr. Carr goes on to say that of that number approximately one third remain in the United States and two thirds reship on other vessels, so that the total number remaining in the United States in the year 1930–31 by virtue of the desertion clause, which I have referred to, was approximately 1,114.

Mr. O'MALLEY. Out of a million?

Mr. BLAND. Out of a million. I am in favor of keeping them out, but keep them out in a proper way.

The gentleman has made reference to the question of bunkers. The ports of Norfolk and Newport News do more bunker business than any other ports in this country. These other ports do a large bunker business. Under this law a British ship cannot come into port with Lascars in her crew, although they are from Great Britain's own dominions. They are people of her own country. A Japanese boat can come in with Japanese in the crew, but a Japanese boat cannot come in with Chinese in the crew. I am not in favor of Chinese coming in, but should we undertake to regulate these other ships and say that they shall not carry such crews as they desire? Let us approach this question in a bigger, broader way. Every time these alien seamen are permitted to come ashore, let them be equipped with a certificate which certifies to their right to come ashore only as bona fide seamen. If they are found without the certificate afterward, subject them to deportation. The difficulty with this bill is that it will impose such hardships that these boats will not come in for bunkers and provisions.

I call attention to another point. The answer that the gentleman from Texas will make, unquestionably, is that under the Tariff Act of 1930 a ship may come in for bunkers and is not subject to these provisions.

Mr. DIES. Every ship has a right to come in for 24 hours. I agreed with the gentleman that we would accept his amendment. I told the gentleman a few days ago that insofar as I was concerned if this bill passed and went to the Senate I would go to the Senate with him and help him get an amendment that will meet the situation.

Mr. BLAND. I have not the slightest doubt that the gentleman will do everything he said he will do, but I have no guaranty that the Senate will listen to the gentleman, although I think they would be very foolish if they did not listen to him. I have no guaranty that they will carry out his wishes.

There is another point that I desire to bring out. It is true that the law of 1930 does provide that vessels may come in for bunkers if they go out in 24 hours, but this bill in my opinion would repeal by implication the law of 1930 relating to bunkers. This would be done under the principle familiar to the lawyers in this House that a statement of one thing is an exclusion of another. I have forgotten what the Latin maxim is. Here it says, "No vessel shall unless such vessel is in distress", and so forth. The law of 1930 gives the vessel that is in distress and also the vessel desiring bunker fuel the right to come in for 24 hours. This bill gives the right to come in only when the vessel is in distress. Therefore the privilege expressly given to vessels in distress contained in the law might be construed as an exclusion of the vessel coming in for bunker fuel.

Mr. DIES. The gentleman will agree that regardless of this law every ship would have a right to come in for 24 hours for refueling purposes.

Mr. BLAND. Without this law, the gentleman is right, but this law provides that the ship in distress may come in.

Mr. DIES. This law does not repeal that provision.

Mr. BLAND. I think the right of entry for bunkers would be repealed by implication.

Mr. O'MALLEY. Will the gentleman yield?

Mr. BLAND. Yes.

Mr. O'MALLEY. I want to ask if the gentleman does not think that an alien registration law brought in by the Committee on Immigration would largely solve not only this problem but most of the other problems in connection with this entire question.

Mr. BLAND. Exactly; and I am for that.

Mr. KRAMER. Would this repeal section 20 of the act of 1924?

Mr. BLAND. What is that section?

Mr. KRAMER. That is the section that would take power from the immigration inspector, so that an immigrant would not be considered an immigrant under the provisions of this bill.

Mr. BLAND. I am not prepared to answer that question.

Mr. O'CONNOR. Will the gentleman yield?

Mr. BLAND. I yield to the gentleman from New York.

Mr. O'CONNOR. Is this the same bill that has been hanging around here for years?

Mr. BLAND. It has been hanging around a long time.

Mr. O'CONNOR. Is it not a bill that was championed by the former Chairman of the Committee on Immigration, Mr. Johnson of Washington?

Mr. BLAND. I am not sure about that.

Mr. O'CONNOR. I thought I recognized whiskers on it. It has been around here for about 12 years and no one has ever thought seriously enough about it to bring it up before.

Mr. BLAND. I reckon that is true. They have tried to get it up under suspension of the rules.

Mr. Speaker, I reserve the balance of my time.

Mr. DICKSTEIN. Mr. Speaker, I yield 5 minutes to the gentleman from Massachusetts [Mr. CONNERY].

(Mr. CONNERY asked and was given permission to revise and extend his remarks.)

Mr. CONNERY. Mr. Speaker, the Members of the House have all received, probably, this letter from the President of the American Federation of Labor, but I should like to read it at this time.

WASHINGTON, D.C., *March 2, 1934.*

Hon. WM. P. CONNERY, Jr.,
House Office Building, Washington, D.C.

DEAR SIR: H.R. 3842, a bill for the deportation of certain alien seamen, which has been reported out of the Committee on Immigration and Naturalization, is expected to come up under the suspension of the House Rules on Monday the 5th of March.

The American Federation of Labor and all its affiliated organizations are deeply interested in the passage of this bill. The purpose of the bill is to make the exclusion and immigration laws applicable to seamen and to compel vessels to take away as many seamen upon departure as they brought into our port.

Nearly all of those who have come by evasion of the exclusion and immigration laws, in late years especially, are men who could not obtain a visa and, therefore, come as seamen. The number of seamen so coming—many of whom are being smuggled in at rates running from $200 to $1,100 per man—are interfering with the enforcement of the immigration law and are scattering all over the country, causing trouble everywhere. It has been proved that a large number of gangsters and racketeers have so entered.

The American Federation of Labor in its several conventions for the last 10 years has urged the passage of this bill. We respectfully request your presence and ask your assistance in getting the bill passed.

Most respectfully yours,

WM. GREEN,
President American Federation of Labor.

My distinguished colleague the gentleman from Virginia has mentioned the fact of ships coming into Norfolk to coal, and the distinguished gentleman from Texas [Mr. DIES] has stated there is nothing in the bill which would interfere with the 24-hour provision allowing the coaling of such ships, and has further stated that if this bill passes the House and goes to the Senate the committee of conference will agree to an amendment offered by the gentleman from Virginia which will clarify this situation to which the gentleman from Virginia referred. I should like to call the attention of my friend from Virginia to the fact that during all the years during which the American Federation of Labor and the Seamen's Union have tried to get this legislation through the shipowners have been asked time and time again, if they disagreed with this sort of legislation, to bring in a bill which they considered fair and equitable, and up to date they have not done it.

This bill is favored by the Seamen's Union and by the American Federation of Labor. The man up there in the gallery with glasses, the grand old man of labor, Andrew Furuseth, for 40 years has been fighting in the interest of the seamen through the Seamen's Union to get this sort of legislation enacted and to protect the real, bona fide seamen of the United States.

As regards the alien seamen referred to in this bill, these men desert, and the gentleman from Virginia [Mr. BLAND] gave figures of some 1,000 or 1,100 that they know are in the country; but these are the figures of the masters of the ships. The masters of the ships are not going to give the actual figures as to all the men whom they know have actually deserted. They are interested in keeping the figures down as low as they can. There are undoubtedly thousands of these men in the United States who are Japanese, Chinese, and other national aliens, and, as the president of the American Federation of Labor tells you, many of them are racketeers and gangsters who have come into the United States.

Mr. BLAND. Will the gentleman yield there? I know the gentleman wants to be fair.

Mr. CONNERY. Certainly; I shall be very pleased to yield to the gentleman.

Mr. BLAND. The gentleman made the statement that these figures were given by the masters of the ships. The statements I have given come from the Bureau of Immigration.

Mr. CONNERY. But those figures are given to the Bureau of Immigration by the masters of the ships. We know there are thousands of other immigrants in the United States who come over the Mexican border, or come in from Canada, or Cuba, and are not here legally, and certainly, the Department of Labor has not the figures of how many there are. We know there are 1,100 seamen and that probably means that there are thousands who have come in unknown to the Department of Labor.

As the gentleman from Texas [Mr. DIES], has said: "This bill does not interfere with any treaties we have with foreign nations." This is not a question of whether you are in favor of the immigration laws or not. I do not agree with my distinguished colleague from Virginia that we ought to restrict immigration as tightly as we do. I am on the other end of that picture, but I believe when people are coming into the United States illegally we ought to deport them whether they come in as alien seamen or come in over the Mexican border, or over the Canadian border, or in any other way. If they are illegally in the United States we ought to deport them and this is one measure that will actually deport people who have no right to be in here under the laws of the United States.

Mr. BACON. Will the gentleman yield?

Mr. CONNERY. I yield.

Mr. BACON. I am in sympathy with the general purpose of the bill, but I am somewhat troubled by the international aspect of it. For example, India is a part of the British Empire, but under this bill you tell England they cannot bring their own colonials into our ports on their own ships.

Mr. CONNERY. Unless they conform with the laws of the United States. When we had the immigration bill on the floor of the House the Japanese were objecting, but the entire California delegation were interested in the welfare of their State and did not cease because Japan did not like their attitude. They wanted California protected, and I believe we ought to protect the United States.

Mr. BACON. I hope the gentleman is in favor of a large American Navy.

Mr. CONNERY. You bet your life I am—the largest we can get—larger than any in the world. (Laughter and applause.)

Mr. BLAND. I yield 2 minutes to the gentleman from Massachusetts [Mr. ANDREW].

Mr. ANDREW of Massachusetts. Mr. Speaker, I agree with my colleague, Mr. CONNERY, and with the sponsor of the bill as to the purpose of the bill, with which I am wholly in accord, but I am sure that my colleague, Mr. CONNERY, coming from the county where I come from and interested in people who make their living by the sea, would not want to see a discrimination made against them.

In section 7 of this bill there is a provision that seems to me to involve a rank discrimination against American vessels, and I am thinking of those fishermen who sail from the Massachusetts coast and who fish on the Nova Scotian coast.

This section provides that no American vessel shall be allowed to enter an American port which has as a part of its crew any alien who, if he were applying for admission to the United States as an immigrant, would be excluded. That does not mean only aliens of a banned race or aliens subject to banned diseases among immigrants, to whom the gentleman from Texas [Mr. DIES] referred. But if a fishing vessel from Gloucester went to Nova Scotia and shipped a man who cannot read or write in order to replace men lost in some disaster, the ship could not come back to its harbor in America. The Gloucester captain might lose his whole fare, the fruits of weeks of labor, because he had not conducted a literacy test when taking on a new member of his crew.

On the other hand, there is a provision that any foreign vessel having such an illiterate alien not of a banned race shall be allowed to enter and may freely bring any such alien with him. It seems to me that this is a clear discrimination against the American vessel and in favor of the Canadian or European vessel.

Mr. DIES. Will the gentleman yield? This does not apply to any coastwise shipping. It is no discrimination against an American ship.

Mr. ANDREW of Massachusetts. Does not it say that "no vessel shall, unless such vessel is in distress, be granted entry into a port of the United States, if such vessel has as a member of her crew any alien who, if he were applying for admission to the United States as an immigrant, would be subject to exclusion"? And does it not make an exception for a foreign vessel to do that very thing?

Mr. DIES. That does not apply to coastwise vessels.

Mr. ANDREW of Massachusetts. I am talking about United States vessels arriving from Nova Scotia. It seems to me that this only illustrates why the bill ought not to have been brought up under suspension where it is impossible to revise it or amend it. I think the bill ought to be referred back to the committee and brought before the House in the ordinary way.

Mr. BLAND. Mr. Speaker, I have 1 minute remaining, and I want to call attention to the parliamentary situation that a vote of "no" against the passage of the bill does not defeat the bill. It only forces the gentleman to bring the bill up under the ordinary rules of the House, where we may fully debate it and where amendments may be offered.

Mr. DIES. Will not the gentleman yield? Did not the gentleman say that the bill had whiskers?

Mr. BLAND. Yes; but we want to shave the whiskers off in the regular way. [Laughter.]

Mr. DICKSTEIN. Mr. Speaker, I yield 5 minutes to the gentleman from Illinois [Mr. SABATH].

Mr. SABATH. Mr. Speaker, this is not a new question by any means, but I disagree with my colleague from New York [Mr. O'CONNOR] that it has whiskers. I concede that this bill has been here in one form or another for nearly 15 years. Many praiseworthy efforts have been made by organized labor through that game old intrepid gladiator who sits in yonder gallery—Andrew Furuseth, president of the Seamen's Union of America—to secure this legislation. I am, indeed, pleased that I have a chance for the first time to favor the adoption of this bill on the floor of this House, because up to this session, contrary to statements of my learned colleague from New York [Mr. O'CONNOR], the bill never was reported by the former Chairman of the Committee on Immigration, Mr. Johnson, who was an ardent restrictionist. Whenever we had the bill up in our committee he would invariably find many excuses for not reporting it to the House. So for nearly 10 years, although a majority of the Committee on Immigration was in favor of the bill, we never could get consideration of it on the floor of the House.

I think this bill has been carefully studied and prepared and that it deserves the support of each and every Member of the House. Most of you gentlemen know me. I am not one of those who can be classified as a restrictionist, but I have always been for liberal and sane restrictive immigration measures. I have always been opposed to people coming into the country in violation of law. I would oppose any unreasonably restrictive bill, but after a bill has been enacted and becomes a law it binds all good citizens and should be enforced.

The gentleman from Texas [Mr. DIES] who introduced this bill, and whose name it bears, states that we have more than half a million deserter seamen in this country. I think he has been misled in his youthful enthusiasm as to the number, but I do not believe that we have a large number here—possibly 50,000—illegally, and who ought to be deported. They should not have been permitted to enter. The statement of the gentleman from Virginia [Mr. BLAND] that the number is only nominal—about 1,100—is also erroneous, because the reports received by the Department of Labor are only those from the masters of the vessels, and we know the practice of some of the largest lines that are in the habit of bringing in an extra hundred or two hundred men, unloading them here, and then going back with a normal crew. In the last year or so, if I am reliably informed—and I believe I am—not only the Chinese and the Japanese vessels bring in large crews, but the North German Lloyd and the Hamburg-American and the Italian lines are, perhaps, guilty of this condemnable practice to a greater degree than are the Japanese and the Chinese.

All this bill does is to require that a ship coming into the United States shall take back on its return trip as many seamen as were on a ship when it reached our port.

For the reason I have given, I feel that the bill should receive favorable consideration. It is legislation that has been pleaded for these many years. I am glad of the opportunity to voice my approval of the bill and of the privilege of saying a few words in its favor.

Mr. O'MALLEY. Mr. Speaker, will the gentleman yield?

Mr. SABATH. Yes; I am glad to yield to my assiduous and aspiring friend.

Mr. O'MALLEY. Are any alien seamen coming into the port of Chicago?

Mr. SABATH. Yes; we have some there. They did not come directly, but they are there, and we have apprehended in and deported many from the city of Chicago. Of course we have not as many Chinese there as, perhaps, have gotten into the gentleman's State, which may have more poachers and smugglers than has the great State of Illinois. Then, too, there is this deterrent—the city of Chicago is enforcing all law in such a manner as to merit the approval and even the plaudits of all worthy citizens of our good country, including those who once delighted in holding the good city of Chicago up as a haven of the lawless of all our country. But, happily, those days are gone and gone forever. Law and order and the highest type of citizenship now prevail in Chicago, and we Chicagoans, with heads held high, are justifiably proud of our fair and worthy city, and this, of course, under able and efficient Democratic control.

The SPEAKER. The time of the gentleman from Illinois has expired. All time has expired. The question is on suspending the rules and passing the bill.

The question was taken; and on a division (demanded by Mr. DICKSTEIN) there were—ayes 77, noes 18.

So (two thirds having voted in favor thereof) the rules were suspended, and the bill was passed.

ARMY APPROPRIATION BILL, 1935

Mr. COLLINS of Mississippi. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 8471) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes. Pending that, Mr. Speaker, I ask unanimous consent that general debate continue throughout the afternoon and tomorrow, and that on Wednesday 2 hours shall be set aside at which time the bill shall be generally debated, all time to be equally divided between the gentleman from Ohio [Mr. BOLTON] and myself.

Mr. BOLTON. Mr. Speaker, that is satisfactory.

Mr. BRITTEN. Do I understand that the debate will be general in its character today and tomorrow?

Mr. COLLINS of Mississippi. Yes.

Mr. BRITTEN. But that on Wednesday the debate shall be confined to the bill?

Mr. COLLINS of Mississippi. Yes.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. COLLINS of Mississippi. Yes.

Mr. BANKHEAD. When will it be possible under that agreement to take the bill up for consideration under the 5-minute rule?

Mr. COLLINS of Mississippi. Immediately after the 2 hours have expired.

The SPEAKER. Pending his motion to go into the Committee of the Whole House on the state of the Union, the gentleman from Mississippi asks unanimous consent that debate upon the bill extend through today and tomorrow, and that 2 hours be devoted to debate, to be confined to the bill, on Wednesday next, all time to be equally divided between him and the gentleman from Ohio [Mr. BOLTON]. Is there objection?

There was no objection.

Mr. COLLINS of Mississippi. Mr. Speaker, I ask unanimous consent that business in order on Calendar Wednesday be dispensed with.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The question now is on the motion of the gentleman from Mississippi that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the Army appropriation bill.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the Army appropriation bill, with Mr. LANHAM in the chair.

The Clerk read the title of the bill.

Mr. COLLINS of Mississippi. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 15 minutes to the gentleman from California [Mr. HOEPPEL].

Mr. HOEPPEL. Mr. Chairman, I feel highly honored to have this opportunity to address the House on the pending War Department appropriation bill. As a retired Army enlisted man, I feel more or less qualified to discuss this question. I thank the Chairman of the Subcommittee on Appropriations [Mr. COLLINS] for giving me the opportunity to open the debate on this bill.

Mr. Chairman, I am very proud of the fact that the House took action last Saturday with a view to investigating the functions of the War Department. Through my long experience in the service I feel that that investigation will be welcomed by the officials of the War Department. My only hope and wish is that they will not only investigate possible corruption and collusion but that the committee at the same time will investigate the state of efficiency of the Army, especially in its application to the personnel. I am in favor of all such investigations. I am in favor of every sort of petition. I am in favor of publicity of governmental activity. Just a moment ago I had the pleasure and the honor of signing a petition to bring before the House a bill to grant independence to the Filipinos.

I am a firm believer in the democratic principle of self-determination. I also had the privilege of signing another petition today, a petition submitted by the gentleman from Illinois [Mr. DE PRIEST], which seeks to prevent racial discrimination. In my service in the Army I have served with men of every character and creed. I have no animosity and no prejudice against any man because of his color or his creed. In the days of the Spanish-American War the Roosevelt Rough Riders were pleased to receive the support of a Negro regiment, the Tenth Cavalry, at the battle of San Juan. That same principle and thought should actuate us here in the Congress. I feel that any citizen of the United States should be entitled to equal consideration one with another. Incidentally, my good friends, especially those of you on the Democratic side, that is in our platform, the platform of 1932—equal rights to all.

We are living up to our party platform again, my friends; at least we did when we passed the Navy bill. The Democratic platform speaks in favor of adequate defense, but in this bill which we are now considering I feel we are not going far enough. We have never gone far enough in the past 10 or 12 years. The defense of our Nation should not be a partisan subject. It is a problem which is pertinent and important to us all. Partisanship should be effaced. While I could justly criticize the Republicans for their constant whittling of the Army and the Navy, if I did so I would merely be criticizing my own colleagues, because we Democrats are doing the same thing.

May I call your attention to our state of unpreparedness? I visited Honolulu last summer. I then and there found that we had only two modern artillery pieces in Honolulu. Two well-directed aerial bombs from a foreign foe would put Hawaii entirely at the mercy of a foreign fleet. If we lost Hawaii, we would also lose the Philippines, and as a consequence our sugar supply would be seriously curtailed.

I also know conditions on the west coast. We have not a single piece of artillery on the entire west coast which can shoot within 5 miles of the range of a modern naval rifle. This is a question we should consider when we speak of economy. Because of economy we cannot have target practice for heavy artillery or even small arms. Our Nation today, as far as the Army is concerned, is in a high state of unpreparedness. We on the west coast do not have any representation on the Military Affairs Committee in this House, yet we have a large proportion of the personnel of the service. I think the Democratic Congress ought to be investigated on its own committee assignments. We should put men on committees according to sectional lines and also in accordance with their experience. With 36 years' experience in the Army and study of military affairs I endeavored to get on the Military Affairs Committee. Did I get there? There is not a man from the entire west coast on that committee. Political expediency prevented my assignment to the committee for which I consider myself best qualified.

Speaking of preparedness, the question was brought up recently regarding our aviation policy. We have been parsimonious with our aviation appropriations. Our aviators were grounded, unable to fly, because they did not have sufficient gasoline. In the last Congress we attempted to cripple military aviation by withholding extra pay for flying hazards. We did whittle it down as far as enlisted men were concerned. The Republican and Democratic parties are both responsible. We have failed to build up our national defense. We have an admirable aviation field in Texas. I notice that the gentlemen from Texas have quite a bit of influence in this Congress. Notwithstanding that flying conditions are more perfect in California, the good State of Texas garnered to itself the excellent and extensive flying field of Randolph Field near San Antonio. Despite our facilities for training we are actually training very few of our citizens in the art of flying. Economy! Many of us think you can train a man overnight. That was disproved in every war in which we have engaged. You cannot even train a man to carry a musket in a short period, let alone train him to fly. I think sufficient provision should be made in this bill for that service. I understand there is $1,000,000 more for aviation. It should be $10,000,000 more for aviation, in order that the young boys graduating from college can have military aviation training at the expense of the Government. Once they become proficient, let them return to private life and go in the reserves. In case of war, you can understand how effective they would be. Future wars will be fought in the air. There is no question about that. Aviation and gas will be the principal weapons in all future wars.

We heard a great deal about consolidation and about economy, both on the Republican side and on the Democratic side in the past sessions of Congress. We are squandering money needlessly in this Government of ours with the Army and Navy. We ought to consolidate our Army posts. Why have an Army post in ever village and hamlet in the United States? We should consolidate in order that our men can be trained, in order that the Army can be administered economically.

With reference to the Navy, we have another situation. We heard a great deal about consolidation there. The Navy should absorb the Coast Guard, the Coast and Geodetic Survey, and the Lighthouse Service. They are all kindred. But, instead, we have extensive duplications. In the same city we will be paying for two docks, one used for the Navy and another used for the Coast Guard, and both unoccupied most of the time. In the city of San Diego we have 3 distinct aviation fields, 3 different machine shops, and 3 different groups of personnel all taking care of airplanes and training for the Army, the Navy, and the Marine Corps, when 1 facility could serve all.

Politics has prevented this. While we are having investigations, and investigation appears to be the mode, why not investigate the politics which is in charge of the Congress and which prevents us from economizing in the Army as well as in the Navy by proper consolidation?

Notwithstanding that the Congress has permitted the Army and Navy to fall behind other leading Nations in relative strength and equipment, the Congress has been even more derelict in contributing further to inefficiency of the service by reducing the pay of the personnel out of all proportion to that in the civil branches of Government. The armed services have received an average increase in compensation of only 11 percent since 1908, while the civil branches of Government have received as high as 175-percent increase in compensation since that period. Notwithstanding this disparity, the Congress, under the stimulus of economy, has reduced the pay of the armed services in complete parity with the reduction applying to civil em-

ployees, and, as a consequence, the pay of the armed services under the Economy Act is approximately the same as it was in 1908. The enlisted man of the service today receives only $17.85 and is subject to call every hour of the day or night throughout the month. If he dies in service as a result of disease or injury, his dependents receive $22 per month pension. Boys in the Civilian Conservation Corps work 30 hours per week only and receive $30 per month. If they die of disease or injury their dependents receive $45 per month. This discrimination should be recognized by the Congress, which should immediately restore the pay of enlisted men of the services. In justice, in the light of comparison with the Civilian Conservation Corps, the pay of the enlisted men should be increased. Under the stimulus of economy, the Hoover administration, as well as the present Democratic administration, reduced the clothing and ration allowances of enlisted men. In addition to this, the enlisted men are subject to a 15-percent pay deduction, and also, they have had taken from them their reenlistment allowances. As a consequence, the total loss which enlisted men suffer today is approximately 33 percent of the pay and allowances which heretofore applied.

Retired enlisted men are especially discriminated against. The per capita allowances to convicts in Federal penitentiaries are higher than the per capita allowances which the Government pays to its retired enlisted men. The allowance for subsistence, clothing, and quarters for retired enlisted men is only $15.75 per month and is today wholly inadequate. These allowances were established in 1908 and have not been changed one iota since. As the retired enlisted men receive only three fourths of the pay of their rank, plus these insignificant allowances, and in addition suffer a 15-percent pay deduction, the plight of these aged and enfeebled men, in many instances, is especially desperate. They served for years on the western plains at $13 per month. They served in Cuba, the Philippines, and China at $15.60 per month—yet this Democratic Congress discriminates against them and takes from them 15 percent of their retired pay!

Retired civil-service employees receiving $100 per month are not subjected to a reduction in pay under the Economy Act. In addition, this class of personnel, if veterans, is permitted to receive pension or emergency officer retired pay while the poor enlisted man, receiving the allowances of 1908 and only three fourths of the pay of his rank, whether he bears service-connected disabilities or not as a result of service in two or more wars, is denied equality of treatment with the retired civil-service employee.

The plight of a lower-grade officer of the service is pathetic and tragic in its consequences. Only yesterday, an enlisted man, speaking to me, stated that he felt sorry for the lower-grade officer of the service whose wife and family, according to his own observation, are compelled to wear shabby clothing and shoes run down at the heel; and if he has an automobile, it is of an ancient vintage, because of the fact that the pay of the lower-grade officer was reduced below the reasonable cost of living.

From the standpoint of fair play, kindly analyze, if you will, the high caliber and character of these men, most of whom are graduates of West Point or Annapolis, who, because of an unsympathetic attitude of the administration, suffer not only inordinate pay reductions but at the same time suffer the unfair pay freeze which prevents them attaining an increase in pay, predicated upon service, which has always been basic law in military circles. In the parlance of the street, practically all that the enlisted men and lower-grade officers have left are their nightshirts. But nevertheless, even though the Government is so niggardly toward them, it has not diminished their loyalty one whit, nor has it diminished their patient hope that under the new deal, the enlisted men and lower-grade officers of the service will at least be given some consideration for a justifiable pay increase.

Retired officers in the lower grades suffer, in a sense, even more than do those in the active service because of the fact that on account of the low pay received during their service they have been unable to amass a competency of any sort. They had every reason to believe that the Government which they served so faithfully in two or more wars would not permit them in their old age to suffer a reduction in their retired pay, which is nothing other than an earned annuity, predicated upon the fact that such annuity was earned because of diminished pay or lower pay received during their service in comparison with wages in civil life.

We Democrats ought to make amends for our lack of sympathy and understanding of the problems of the armed services by restoring to them at once their full pay and by the release of the so-called "pay freeze" for both officers and enlisted men. We are quite liberal in dispensing high-salaried positions to individuals—so-called "experts" in the various bureaucracies which we have in Washington and elsewhere under the various alphabetical organizations—very few of whom, I predict, could measure up educationally or professionally with our officers of the service. Since we are so liberal in our treatment of those of our friends who fought political battles for us quite vociferously and successfully, may we not, and should we not, at the same time be just a bit more liberal to the enlisted men and officers of the services who stand ready at all times to fight any battle or to enter any conflict as the Congress may direct, even to the sacrifice of their own lives? [Applause.]

Mr. BOLTON. Mr. Chairman, I yield 10 minutes to the gentleman from Massachusetts [Mr. GIFFORD].

Mr. GIFFORD. Mr. Chairman, I wish at this time to make a few observations relating to the twentieth amendment to the Constitution. Some of you may remember that I had charge of that resolution on the floor for several years. Therefore, I may be pardoned for speaking now on this particular subject.

Last session I introduced a bill containing, as we thought, the provisions of law made necessary by the adoption of this twentieth amendment. As you will readily appreciate, it will be necessary to advance the date when the electoral college of the several States must meet, the day for the counting of the vote, and also to incorporate several other provisions. Fortunately, we have recently had a Presidential election so that the larger, and most important, part of this legislation may not be needed for a couple of years. I wish, however, to make some remarks about the interregnum between November 4, the date of the election, and the date of the inauguration. We may rejoice in the fact that the lengthy interregnum which formerly occurred can never happen again, and that after a President is elected on November 4 he will take office early in the following January.

The country should know, as soon as possible after a Presidential election, what the policies of the President-elect may be. It has many times been discussed on the floor of the House what might or might not have happened had Abraham Lincoln been able immediately to have taken his seat after his election as President of the United States.

I will read a little editorial that I found in one of the most important magazines in our country on the interregnum between Roosevelt's election in November and his inauguration in March.

It was a period of futility. The Government tried to do things but couldn't, because the incoming Government had not formulated its program and would not cooperate on a Hoover program. Bank runs were in progress, but were hushed up. The open panic and Nation-wide blow-up came at the tail end of February, and paralysis descended. At this point a new, untried, mysterious President stepped in.

The Government grabbed agriculture with one fist (A.A.A.), industry with another fist (N.R.A.). It voted three billions for Public Works, out of which quicker-acting Civil Works were born belatedly. It picked up Hoover's much-cussed R.F.C. and gave it new powers. The public looked with amazement and acquiescence at all these Washington goings-on, delighted to see anything done, right or wrong.

Mr. KELLER. Will the gentleman yield?

Mr. GIFFORD. No; I will not yield.

Then came the summer boom, a speculative boom, like the spree of a sick man just out of bed. The public took all of the extravagant promises of Washington at face value and went to it.

Mr. KELLER. I shall object to the reading if the gentleman does not want to give us a chance to ask him a question.

Mr. GIFFORD. Mr. Chairman, I do not know how such an objection can be made. I think I am perfectly within my rights in reading this article.

Mr. KELLER. I am putting it up to the Chairman. I want to know whose article it is.

Mr. GIFFORD. This is taken from the Saturday Evening Post. I think the gentleman knows the editor.

The CHAIRMAN. Does the gentleman from Illinois object?

Mr. KELLER. Mr. Chairman, I was going to object unless the name was given.

Mr. GIFFORD. I have given the name. The gentleman knows the editor of the Saturday Evening Post. Mr. George Lorimer is supposed to be the editor. I do not know whether he wrote this article or not.

Mr. KELLER. That is all I want to know.

The CHAIRMAN. Does the gentleman from Illinois withdraw his objection?

Mr. KELLER. Mr. Chairman, I withdraw the objection.

Mr. GIFFORD. I thank the gentleman.

The fall, up through November, was spent paying for the summer spree. Business and prices and confidence fell off largely because demand hadn't caught up with earlier preparations for supply, and because N.R.A. proved to be no great factor in emergency recovery. Inflation was in the air, but didn't take hold. In October the President started his gold buying, and the dollar continued its depreciation in foreign exchange, or world value, but this did practically nothing to domestic commodity prices. It was a period of new harrassment and discouragement. The low occurred in late November.

Then came Civil Works, as a shot in the arm. Due largely to them, business began to be a little better. In late January came devaluation and return to the gold standard—a new and different gold standard.

I might remark here that we had embarked on some very peculiar monetary experimentations and many of the gentlemen, particularly on the other side of the House, had been drinking in a lot of what Professor Fisher had been telling them about inflation of the commodity dollar. This same Professor Fisher said last Christmas at the Economic Congress that we would have been farther on the road to recovery if we had not had any election last year. This ungrateful thrust was from one who had done so much to promote the cause of currency tinkering.

Mr. FISH. Is that the same Professor Fisher who made the statement back in 1929 that the high levels of 1929 were to continue indefinitely?

Mr. GIFFORD. I presume so.

Mr. Chairman, during the last day or two the newspapers of the country have been carrying much edulation for the present President of the United States. I also want to congratulate him and to join in these encomiums. He is a most remarkable man. He has done all that has been done. He, perhaps, has done all that could be done with his corps of advisers, and I admire him just as much as you do. But I am now speaking of the remarkably low estate in which the Congress of the United States has fallen.

Where are our statesmen? Why the wails of John W. Davis, Al Smith, Carter Glass, and all of these elder statesmen, who were formerly shown so much consideration? The people are with the President of the United States because they believe in him. The President of the United States has had to send down here practically every scrap of legislation that is written and we, under the pressure of an emergency, have passed it without question or without having the slightest degree of credit for it. I fear our people's reaction toward our apparently useless parliamentary body and I now ask: When are we going to reassume our legislative duties? The President of the United States should make his recommendations, and let the statesmen in the Congress write the necessary legislation.

Our present President is trying to do all he can. I am not criticising him for assuming this burden Congress seems to have abdicated. He is trying these various experimentations because Congress is so helpless in constructive suggestions.

At the session of Congress in December 1932 the former President reported on the state of the Nation and sent his recommendations to the Congress, realizing that Congress itself should frame and enact the essential legislation. Suppose I read a few of these recommendations made by President Hoover so that the gentlemen on the other side of the House may see how they later embraced practically all of the recommendations. Let us refer to the R.F.C. How you have enlarged upon it, how you have boasted about its achievements during the year just passed! I also wish to refer to President Hoover's recommendations in his message to Congress in December 1931.

Mr. BANKHEAD. Will the gentleman yield?

Mr. GIFFORD. I yield to the gentleman from Alabama.

Mr. BANKHEAD. If I understand the gentleman's premise, he has admitted that the people of the United States are now with the President.

Mr. GIFFORD. Oh, yes.

Mr. BANKHEAD. They are supporting his experimental policies. Does the gentleman think that the Congress ought to fight the will of the American people by having them differ with the President?

Mr. GIFFORD. Oh, no; but I would have the statesmen, which I do hope this Congress may have within its Membership, frame their own legislation. Consult with the President, if you will. But let not these many professors, whom we do not know and who cannot be blamed or given credit for the framing of legislation, continue to send it here for us to put our rubber stamp upon, without reasonable consideration and with the scantiest of knowledge regarding its probable effect upon the Nation.

[Here the gavel fell.]

Mr. BOLTON. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. KELLER. Will the gentleman yield?

Mr. GIFFORD. For a brief question.

Mr. KELLER. The gentleman refers in that editorial to Mr. Hoover's R.F.C., as I understood the reading of the article.

Mr. GIFFORD. Yes.

Mr. KELLER. As a matter of fact, is not the R.F.C. simply a revamping of the War Finance Corporation?

Mr. GIFFORD. I fully understand that. That great statesman, CARTER GLASS, during the Roosevelt-Hoover campaign informed the country that Hoover had no reason for accepting any credit for that; but Hoover did invoke this former plan, and when it was invoked, with its loans to banks, insurance companies, railroads, and so forth, what a barrage of criticism was laid down. The statement by the Democrats was made, "You are beginning at the top. Why don't you make the loans to everybody from the bottom up?"

Mr. KELLER. Then it was not Hoover's R.F.C.

Mr. GIFFORD. I do not yield further.

Mr. Chairman, in December 1932 President Hoover came before this Congress and made a recommendation that, above all other things, we must balance the Budget. Your President said the same thing in 1933 and asked us to maintain the credit of the United States by the enactment of some exceedingly harsh measures, some of which you and I greatly regret now and will remedy at this session. We cannot feel the full force of these appeals after some $10,000,000,000 has been or is to be spent on other things bearing no relation to the ordinary expenses of government. An $830,000,000 reduction was recommended by the Budget presented by Mr. Hoover, and he also declared that the credit of the country was predicated upon the balancing of that Budget.

He asked for a reduction of 14.8 percent in all salaries over $1,000. Did you grant this to Mr. Hoover? No; but on March 4 you granted more to the new President.

He recommended the elimination of certain payments to the veterans. Would you help eliminate them under the Hoover recommendation? No.

He issued orders consolidating over 50 Government departments, and you said, "No; wait for the incoming Presi-

dent." Then you proceeded to reorganize and were going to save $100,000,000. We read in your Budget Director's report last fall that it was thought you might have saved a mere $5,000,000 by your consolidations.

Economic cooperation with foreign nations was recommended by Hoover. We have just received a message relating to the tariff, and we are going to act upon it very soon. We are to have economic tariff cooperation, about which we will hear more later. But President Hoover recommended economic cooperation with foreign nations.

He recommended ratification of the St. Lawrence waterway, a matter which has now been discussed for a month or more in another body and greatly favored by President Roosevelt.

But the great difference is this: Mr. Hoover declared that government should never be a competitor with the people; that whenever it became a competitor with the people, then it became tyranny.

Today we have a nationalistic, socialistic program. Nobody knows where we are going, as is being constantly stated by Cabinet heads. I was disturbed on Saturday to hear the gentleman from Maryland [Mr. GOLDSBOROUGH] explain the pending bill by declaring it was necessary to bolster up the market for our own Government bonds; and also to hear the gentleman from Mississippi [Mr. BUSBY] put in the RECORD a statement, which seemed to be confirmed in the newspapers this morning, commenting on the report of the Federal Reserve banks, which indicate that large amounts of new money have been deposited in the member banks, but that a smaller amount was loaned out to our citizens than was loaned a year ago.

This shows that private industry is frightened, and you can do nothing with "scared money." I beg this administration to begin soon to give a little aid and comfort to private industry and stop cussing out the banks all the time. There are many banks in my district. There are probably 1,000 bankers, and all of them are really doing a public service, with none of them getting very much salary nowadays. However, because of the action of a few large bankers, you keep on abusing them and frightening the so-called "money changers" so that they dare not do legitimate business any longer. [Applause.]

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. YOUNG].

Mr. YOUNG. Mr. Chairman, a fundamental defect of the Home Owners' Loan Act has been that the principal of the bonds was not guaranteed by the Government. I am happy that our President has recommended the elimination of this weakness. Guarantee of bonds of the H.O.L.C. will, of course, enhance the market value and marketability of these bonds. Certainly there is a moral obligation on the part of the Government to guarantee the principal as well as the interest. This should be made legal.

With the bonds unconditionally guaranteed by the Government and backed by the full faith and credit of the United States and in addition supported by the assets and property upon which loans are made, it will be seen that the additional factors of safety are likely to cause investors to switch from Liberty bonds and other Government obligations to H.O.L.C. bonds.

It is my belief that the interest rate should be reduced from 4 percent to 3 percent. This would be in line with most securities issued by the Government of the United States. The profits accruing to the H.O.L.C. would be materially increased. Home owners should profit by reason of this differential. Instead of paying interest on their loans at the rate of 5 percent, I advocate that the interest charge to mortgagors intent upon saving their homes be reduced to 4 or 4½ percent. There would still be a differential of 1 or 1½ percent to provide for the operating expenses of the Corporation and for the creation of a reserve fund to take care of any losses which might be sustained upon some of the loans.

All bonds of the H.O.L.C. heretofore issued at 4 percent, without Government guaranty as to payment of the principal, should immediately be recalled and new bonds bearing 3-percent interest should be substituted therefor.

My bill, H.R. 7646, provides for bonds bearing 3-percent interest, fully guaranteed by our Government as to principal and interest. It provides that the home owners pay 4 percent only instead of 5 percent.

The Federal Home Loan Bank Board has adopted an unbelievably stupid policy in dealing with home owners who have secured home loans through the H.O.L.C. All mortgagors must remit interest payments and later payments on the principal as well to the treasurer of the Board, Patrick J. Maloney, at Washington. Few of these mortgagors have checking accounts. A great many do not understand the mechanics of making remittances by mail and are compelled to consult with attorneys at an expense. In any event, they are compelled to go to the expense of purchasing postal or express money orders. Red tape of this sort should be cut. If any judgment at all were exercised, the Chairman, John H. Fahey, would allow State administrators some discretion. Certainly the Federal Bank Board should establish collection agencies in each State. Payments of interest and on principal will be facilitated as soon as a sensible policy is adopted and mortgagors are enabled to make payments in the cities and States where the loans are made instead of sending on money to Washington. Success of the Home Owners' Loan Corporation is jeopardized even now by the red tape and restrictions imposed here in Washington.

"What will the Government do to help save my home?" This question has been asked thousands of times. The Congress, in the extraordinary session last spring, passed the Home Owners' Loan Act. Two hundred million dollars was appropriated. A bond issue of $2,000,000,000 of Home Owners' Loan Corporation bonds, interest at 4 percent, interest guaranteed by the United States Government for 18 years, was authorized. This law became effective June 13.

More than 600,000 of our people have already applied to the Board and the 257 offices of the Home Owners' Loan Corporation established throughout the country to save their homes. More than $2,000,000,000 has been asked for mortgage relief.

The Home Owners' Loan Corporation may refinance mortgages up to 80 percent of the value of the property, exchanging its bonds for the mortgage. The home owner then owes the Corporation the amount of the mortgage, plus interest. He is obligated to pay this by installment payments during 15 years. His mortgage, however, provides that no payments need be made on the principal for 3 years.

The bonds may or may not be salable. Success of the Home Owners' Loan Corporation, even in a small degree, depends upon the salability of the bonds at close to par value. They are currently quoted at about 95. These bonds must be sufficiently attractive to cause creditors to desire to exchange their mortgages for the bonds. At present a large number of mortgagors refuse to exchange mortgages for the bonds.

The Congress should now, in my judgment, amend and strengthen the Home Owners' Loan Act by authorizing issuance of at least $3,000,000,000 additional bonds and enhance the value of the bonds by guaranteeing payment of principal as well as interest. It is a moral obligation on the part of the Government to pay off these bonds upon maturity. This moral obligation should be made legal.

Under the laws of many States insurance companies, banks, and executors are prohibited from investing funds in such bonds as the present Home Owners' Land Corporation bonds. As 80 percent of the home-loan mortgages in this country are owned by trust companies, executors, insurance companies, and others handling trust funds, it is apparent that the present act will help but very few mortgagors. This is further apparent when one considers that home owners of this country owe on mortgages more than $21,000,000,000. I consider that it would be dangerous to let down the safeguards which for generations have been built around the investment of insurance and trust funds. We have too many horrible examples of the consequences of unsound investments. It would be far better to remedy this

deplorable situation by legislation. We should make the bonds of the Home Owners' Loan Corporation discountable at Federal Reserve banks. They would then be attractive to investors and convertible into cash.

The bonds issued to take up mortgages of home owners must certainly be maintained at a price close to par, otherwise the Home Loan Corporation cannot provide real relief and people will be disappointed and disillusioned.

This law was signed by President Roosevelt June 13. William F. Stevenson, Chairman of the Federal Home Loan Bank Board, notwithstanding that the need for action was acute, permitted many precious weeks to elapse before he took action that amounted to anything. No bonds were, in fact, prepared and issued up to November. Interim certificates were prepared but not the bonds. It is unfortunate that under the present set-up a home owner is not permitted to borrow 40 percent of the appraised value of his property in cases where the creditor refuses to take the bonds except where the property is in the process of foreclosure. It is stated to home owners that even then it must be a very special case in order to procure the loan as it is the desire to conserve the money appropriated by Congress. I hope this situation will be remedied during the coming session of the Congress.

The operation of the Home Loan Corporation throughout the country has been disappointing to date. This is particularly due to the inadequacy of the act itself and because of the procrastination and ineptitude of administrators in some of the States.

A surprising situation has developed. Some greedy and avaricious mortgagees are demanding that home owners pay the difference between the market value and par value of these bonds. Mortgagees should be glad to accept these bonds in exchange for their mortgages at face value notwithstanding temporary fluctuations that at present cause the bonds to be quoted at about 95.

Conscienceless creditors, who insist that the home owner pay the difference between the market and par value of the bonds would squeal loudest at the suggestion they should repay this money when the bonds sell for par or above.

There is too much red tape in connection with the operation and administration of the Washington office of the Loan Corporation. More discretion must be given to State and district administrators. Home owners need relief now. A few years longer will be too late. Relief of home owners from staggering debts is a tremendous problem. It is of paramount importance. The problem should be studied from all angles.

The Congress should amend the present Home Owners' Loan Act, authorize an increased bond issue, strengthen the law, and make the bonds attractive as an investment. Principal as well as interest could properly and safely be guaranteed by the Government with this Corporation managed properly and functioning perfectly.

Doubtless it will be necessary to appropriate more than $200,000,000 in order to make cash loans to those mortgagors where the mortgagees refuse to accept bonds. The first thing to do, however, is to make the bonds more attractive. If this is done, most creditors will gladly accept them at face value.

Under the present procedure home owners seeking relief make formal application at the local office of the Home Loan Corporation. Accompanying the application for relief must be the consent of the mortgage holder or mortgage holders to accept bonds of the Corporation paying 4-percent interest, guaranteed by the Government for 18 years, in exchange for the mortgage. The property is then appraised. Loans may be made up to 80 percent of the appraisal.

If the mortgage holder arbitrarily refuses to accept bonds, then the home owner applies for an emergency loan in cash. This, however, can be made only to the extent of 40 percent. In most instances the mortgage indebtedness far exceeds 40 percent of the value of the property. Many applications for loans have been rejected because of the inadequacy of the law. My bill, H.R. 7646, provides for cash loans to the extent of 50 percent of the appraised value of the property.

The Home Owners' Loan Corporation and its success is of utmost importance. It is something that goes right down to the people. If home owners who listened to radio talks by Secretary Louis McHenry Howe, and who have read of the relief promised by this act, meet with bitter disappointment in their efforts to refinance and save their homes, they are going to be skeptical of the President's program and of the new deal.

During the first 5 months of operation there were about three times as many forms used in connection with each application for a home loan as were used by most banks or insurance companies. It was necessary that more than 1,000 items be checked and answered and 22 forms completed before the application could even be sent from the branch office to the State office. Then new rules were promulgated from Washington with great frequency. For many weeks it was the rule that every loan in every part of the country must first be sent to the loan examining committee in Washington for scrutiny and further checking before the loan application, previously thoroughly checked at the local and State offices, could be granted. For many weeks it was necessary for each district manager to affix his signature to each application for a loan 18 times and the State manager 22 times.

Although it is true that loans have not been made as promptly as possible, it is only fair to report that many foreclosures have been averted and much valuable time gained for the mortgagors due to the existence of the Home Owners' Loan Corporation.

Mortgage holders are subject to criticism in many instances for refusal to accept the 4 percent interest guaranteed bonds. Had these bonds been properly placed before the public it would be apparent to all that they are really very attractive from an investment viewpoint. Notwithstanding this, some mortgage holders have attempted to add to financial burdens already oppressing distressed home owners by forcing the home owners to agree to pay in cash any difference existing between the face and market values of these 4 percent long-term bonds. Such a practice was never contemplated in the Congress and should not be tolerated anywhere. It is highly reprehensible.

In some sections of the country the offices have been established on an altogether too extravagant basis. In New York City the Home Owners' Loan Corporation is located in the Empire State Building, probably the most luxurious office building in the world. In Illinois and many States the State and local headquarters have been organized upon a most extravagant scale.

The procedure following application for a loan is somewhat as follows: A preliminary appraisal of the home is made. An appraiser or perhaps two appraisers simply drive in front of the house and look over the house and lot and estimate the value. This is called "flash appraisal." If the appraisal shows that 80 percent of the value will be adequate to take care of the present mortgage or mortgages and delinquent taxes, then the home owner and his creditor are asked to come in. If the creditor will accept the bonds, the property is appraised. The second appraisal is thorough. Then all the papers relating to the transaction are turned over to lawyers employed by the Home Owners' Loan Corporation. The attorneys examine the title of the owner, the liens against same, the insurance policies carried, the amounts due mortgages and taxes, and the entire matter is figured out carefully. The entire file is then forwarded to the State office for rechecking the title, insurance policies, amount of taxes owing, agreements signed by mortgage holders, amounts of judgments and mortgage liens; and after this has been gone over, if the loan is approved by officials of the State office, all of the papers together with the bonds and checks for the fees and taxes are mailed to the district office from the State office. Then officials of the district office must arrange for the cancelation of the old mortgages and satisfaction of judgment liens and for

the recording of the new mortgage. After this has been done and the Home Owners' Loan Corporation given first lien against the property, the interim certificates are given to the creditors, checks are disbursed, and the home has been saved to the owner. He need pay only interest for 3 years and then for the next 15 years make payments on principal in addition to the interest payments, liquidating the indebtedness at the end of that period. [Applause.]

Mr. FOCHT. Will the gentleman yield?

Mr. YOUNG. I yield.

Mr. FOCHT. The gentleman has stated the amount asked for. Does he happen to have the figures as to how much has actually been loaned to the home-mortgage people? I have had great difficulty in getting anything done—there is so much red tape. It seems to me that although they had their heart in it they did not know themselves what they were going to do. They had the intention and the purpose of relieving the people, but they did not know the details. It was the same with the farmers' loan bill. There it required an amount of money to make the loan, and if the farmer had that he would not require a loan. The heart was there, the President wanted to do it, Congress wanted to do it, but they did not have sufficient details to get the thing done.

Mr. YOUNG. It would be impossible to tell the exact number of homes that have been saved to their owners throughout the country. Many have been saved merely by reason of the enactment of this legislation.

Mr. FOCHT. Why is it impossible to tell?

Mr. YOUNG. More than $56,000,000 has actually been loaned through the office of the State administrator to home owners in my State.

Mr. BOLTON. Does the gentleman know the average cost of the loan?

Mr. YOUNG. The average cost in Ohio of making the loan has been less than $15 for each loan. That includes payments to attorneys for examining the title, appraisal fees, examination of title, and is the total cost. In some sections of the country some State administrators are subject to criticism because they established offices on too extravagant a basis.

[Here the gavel fell.]

Mr. BOLTON. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. REED].

Mr. REED of New York. Mr. Chairman and members of the Committee, my purpose in appearing before you today is to place in the RECORD a notice, because I realize that few Members at this late hour are now on the floor.

On the 21st of February the Secretary of Agriculture sent out a notice of a hearing to be held March 3 in Washington to determine the minimum price to be paid by the canners to the producers of tomatoes.

There are 18 States that are interested in the production of tomatoes in a large way.

In a normal year the business amounts to $56,000,000. Two hundred and fifty thousand acres are devoted to the production of tomatoes. The canners held their convention in Chicago, and as a result they suggested a hearing with the Secretary of Agriculture to consider the minimum price per ton to be paid by the canners to the farmers for tomatoes. Mr. Chairman, I ask unanimous consent to insert that in the RECORD.

The CHAIRMAN. Without objection, it is so ordered.

Mr. REED of New York. There is a schedule in the marketing agreement showing the proposed minimum prices per ton to be paid by the canners to the farmers for tomatoes.

Mr. McFADDEN. Will the gentleman yield?

Mr. REED of New York. Certainly.

Mr. McFADDEN. Did they fix a minimum price?

Mr. REED of New York. A tentative price. Hearings on the subject have been held. The notice that went out was dated February 21, 1933, and the hearing was held on Saturday, March 3, in Washington. Only 10 days elapsed between the notice and the hearing. I have made inquiry and I find that the farmers generally who were interested in the proposal of the Secretary of Agriculture were not aware of the hearing. A few men came down from my district, because I had been watching the tomato situation very closely and notice of the hearing had been announced in some of the local papers. A few men prepared hurriedly and attended the hearing. I want to bring home to you gentlemen who are here, and to those who are not here, who represent the 18 States vitally interested in the price to be paid the farmer by the canners for tomatoes the importance of permitting the farmers full opportunity to show the cost of production as a basis for establishing a minimum price for tomatoes. The hearing on this subject is closed. The only recourse the farmer now has, unless further hearings are held, is to file briefs, and the briefs must be under oath, showing the cost of production. Four copies of each brief duly sworn to must be filed within 7 days from March 3 with the Secretary of Agriculture. The farmers who testified as to the cost of production at the hearing on March 3 were under oath. Farmers generally did not receive notice of this hearing. It is of vital importance because, for instance, the minimum price suggested for New York State was $11.50 a ton, and the cost of production in my State is over $105 per acre.

Mr. McFADDEN. May I ask the gentleman whether the minimum price was fixed by the Department of Agriculture here or by the State authority?

Mr. REED of New York. It is going to be fixed as a result of the hearings held here. The minimum price is something like $11.50 per ton and the cost of production is $105 per acre, and the average production in my State is about six and a half tons to the acre. In Virginia, in the Shenandoah Valley, the average production is only about two and a half tons per acre. The hearing held here March 3 was largely a canners meeting, and I want the farmers to have a chance to be heard on this minimum-price proposal.

Mr. McFADDEN. The point I make is this: The Department of Agriculture has construed the law to give them the right to fix the price?

Mr. REED of New York. Yes; under section 8.

Mr. McFADDEN. Of the code?

Mr. REED of New York. Under the A.A.A. I hope my remarks will bring notice to the Members of the House and through the Members of the House to the farmers who may wish to file briefs showing the cost of production. Hearings fixing the price of a product, national in scope, should not be held on such short notice. The canners are highly organized. The farmers are not. It takes time for them to get the necessary statistics to present their case. I hope you gentlemen who are interested in the proposed marketing agreement will urge the Secretary of Agriculture to give the tomato growers a further opportunity to be heard.

The proposed marketing agreement to which I have referred and which I have leave to extend in the RECORD, is as follows:

[Docket No. 154]

UNITED STATES DEPARTMENT OF AGRICULTURE,
AGRICULTURAL ADJUSTMENT ADMINISTRATION.

PROPOSED MARKETING AGREEMENT FOR CANNED TOMATOES AND TOMATO PRODUCTS INDUSTRY

This proposed marketing agreement for the canned tomatoes and tomato-products industry in its present form merely reflects the proposal of the above-mentioned industry, and none of the provisions contained herein are to be regarded as having received the approval of the Agricultural Adjustment Administration as applying to this industry.

ARTICLE I. PURPOSE

The parties to this agreement are the contracting canners of tomatoes and tomato products and the Secretary of Agriculture of the United States.

Whereas it is the declared policy of Congress, as set forth in section 2 of the Agricultural Adjustment Act, approved May 12, 1933, as amended—

(a) To establish and maintain such balance between the production and consumption of agricultural base commodities and such marketing conditions therefor as will reestablish prices to farmers at a level that will give agricultural base commodities a purchasing power with respect to articles that farmers buy equivalent to the purchasing power of agricultural base commodities in the base period, the base period in the case of all agricultural base commodities except tobacco being the pre-war period, August 1909–July 1914;

(b) To approach such equality of purchasing power by gradual correction of the present inequalities therein at as rapid a rate

as is deemed feasible in view of the current consumptive demand in domestic markets; and

(c) To protect the consumers' interest by readjusting farm production at such a level as will not increase the percentage of the consumers' retail expenditures for agricultural base commodities, or products derived therefrom, which is returned to the farmer, above the percentage which was returned to the farmer in the pre-war period, August 1909 to July 1914; and

Whereas, pursuant to the Agricultural Act, the parties hereto, for the purpose of correcting conditions now obtaining in the packing and selling of canned tomatoes and tomato products in the United States and the distribution thereof in interstate commerce and to effectuate the declared policy of the act, desire to enter into a marketing agreement under the provisions of section 8 (2) of the act:

Now, therefore, the parties herein agree as follows:

ARTICLE II. DEFINITIONS

SECTION 1. As used in this agreement—

(a) The term "Secretary" means the Secretary of Agriculture of the United States.

(b) The term "act" means the Agricultural Adjustment Act, approved May 12, 1933, as amended.

(c) The term "person" means any individual, partnership, corporation, association, or any other business unit.

(d) The term "tomato" means each and every variety of the vegetable commonly known as a "tomato" grown in continental United States, and includes all tomato products.

(e) The term "tomato products" means the products made from the juice and pulp of red, ripe tomatoes, exclusive of seeds, skins, and cores, concentrated or unconcentrated, with or without the addition of condiments such as sugar, salt, vinegar, etc., packed in hermetically sealed containers, and sufficiently processed by heat to preserve the product. This shall be taken to include, among others, the following: Tomato pulp, tomato puree, tomato catsup, tomato juice, tomato chili sauce, tomato paste, tomato sauces, tomato cocktail, or any other product of which the principal ingredients are tomatoes.

(f) The term "canned tomatoes" means the normally flavored and normally colored canned food consisting of the peeled, cored, and trimmed whole or large pieces of the mature red fruit of the tomato vine (Lycoforsieum esculentum), with or without tomato juice to fill the interstices, and with or without added seasoning, and with or without added puree, packed in hermetically sealed containers and sufficiently processed by heat to preserve the product.

(g) The term "grower" means any person engaged in growing tomatoes within continental United States, or any cooperative association of such growers.

(h) The term "canner" means any person engaged in the business of canning tomatoes and/or manufacturing tomato products within continental United States.

(i) The term "books and records" means any books, records, accounts, contracts, documents, memoranda, papers, correspondence, or other written data pertaining to the business of the person in question.

(j) The term "subsidiary" means any person, of or over whom a canner has, either directly or indirectly, actual or legal control, whether by stock ownership or in any other manner.

(k) The term "affiliate' means any person who has, either directly or indirectly, actual or legal control of or over a canner, whether by stock ownership or in any other manner.

(l) The term "national committee", means the National Tomato Commodity Committee, created pursuant to article IV hereof.

(m) The term "regional committee" means the Regional Tomato Commodity Committee, created pursuant to article IV hereof.

(n) The term "packing season" means the period during which a cannery is in operation for the actual processing of tomatoes or tomato products.

(o) The term "case" means a package containing 24 no. 2 cans, or their equivalent.

ARTICLE III. MINIMUM PRICES TO GROWERS

SECTION 1. Price districts. The following price districts for the purchase of tomatoes for canning are hereby established: New York, New Jersey, Pennsylvania, Ohio, Indiana, Illinois, Iowa, Missouri, Delaware, Maryland, Virginia, Kentucky, Tennessee, Colorado, Utah, California, Michigan, and Arkansas.

Any canner having a plant in an area not included within those specified shall be considered in the nearest price district. The Secretary may set up such additional price districts as he may deem necessary or advisable.

SEC. 2. Minimum prices to growers. Each canner shall pay for tomatoes purchased in any price district during the 1934 season a minimum price as set forth in schedule A of this agreement. The contracting canners agree that the Secretary, after consultation with the national committee, may modify such schedule on or before January 1, 1935, to be effective during the 1935 canning season, provided that the minimum prices so determined do not exceed parity; and the contracting canners agree that the minimum prices so specified shall be the minimum prices effective for the several varieties of tomatoes in each district during the 1935 season.

SEC. 3. Payment to growers. In no case shall any contract for the purchase of tomatoes from a grower provide a later date for final payment and/or settlement than was contained in the 1933 contracts with such grower. In no event shall such final payment and/or settlement be made later than December 31 of the contract year. Within 5 days after such final payment and/or settlement, each canner shall file with his regional committee a verified report showing that he has made such final payments and/or settlements and the amount paid to each grower. If any canner fails to file such statement by January 5 following each contract year, the regional committee shall immediately report such fact to the national committee and to the Secretary for such action as the Secretary shall deem necessary.

SEC. 4. Contracts. All contracts for the purchase of tomatoes for canning entered into prior to the effective date of this agreement in contemplation of its execution and for the purpose of evading its provisions and defeating the purposes of the act shall be subject to the terms of this agreement.

SEC. 5. The procedure specified in this article and schedule A shall be followed for the canning season of 1935.

ARTICLE IV. NATIONAL AND REGIONAL COMMITTEES

SECTION 1. Regional areas. New York, Pennsylvania, New Jersey, Delaware, Maryland, eastern shore Virginia, tidewater Virginia, western Virginia, West Virginia, Tennessee-Kentucky, Colorado, Michigan, Ohio, Indiana, Illinois, Iowa-Nebaska, Missouri-Kansas-Arkansas-Oklahoma, New Mexico, Utah, northern California, southern California, and Washington-Oregon shall each constitute a regional area. Any canner not included in any of the foregoing regional areas shall be included in the nearest regional area above specified, or the Secretary may create such new areas as shall be necessary. Any two or more of such areas may combine for the purposes of this agreement.

SEC. 2. National and regional committees: A national committee and regional committees shall be created as follows:

(a) Within 3 days after the effective date of this agreement the director of extension of the agricultural college, having the largest enrollment in any regional area, or such other person as the Secretary may designate, shall call a meeting of all canners in such area to be held at a convenient place. Such notice as in his judgment is reasonable under the circumstances shall be given by mail and in the public press.

(b) At each of these meetings called pursuant to subparagraph (a) above, not less than 3 nor more than 7 persons (not necessarily canners) shall be selected to serve as members of the regional committee; such election shall be by majority vote of the canners present. Each canner shall be entitled to one vote.

(c) Each regional committee shall elect one of its members to serve as a member of the national committee. In addition, the Secretary may appoint to the national committee not more than five additional members without vote.

(d) The members of the national and regional committees shall serve for the period of this agreement or until their successors are elected or appointed.

(e) Any regional committee may appoint the member elected by any other regional committee to serve as their representative on the national committee by duly notifying the secretary in writing of such authorization. The regional committee from any area may at its option send a substitute or proxy to act in the place and stead of the duly appointed delegate by giving notice in writing to the secretary on or before the meeting date of the national committee.

(f) The members of the national and regional committees shall be subject to the disapproval of the secretary.

(g) The members of the national committee and the regional committees shall serve without compensation from the national operating fund, but shall be allowed all expenses incurred in performing their duties.

(h) The expenses of calling and conducting the meetings specified in this section shall be met from the operating fund provided in article V of this agreement.

SEC. 3. Powers and duties of the national committee. The national committee shall, in addition to the powers and duties specifically conferred herein, have the following powers:

(a) To supervise the performance of this agreement and to act as intermediary between the secretary and the canners.

(b) To appoint such employees as may be necessary and to determine the salaries and define the duties of such employees.

(c) To incur such expenses and make such expenditures as may be necessary to carry out the provisions of this agreement.

(d) To investigate suspected violations of this agreement and to hear and rule upon any question, dispute, or complaint existing in connection with the performance of this agreement. Said committee may require any canner to furnish a statement of facts under oath, and may, in its discretion, conduct such hearing as it may deem advisable. If a member of the national committee shall be an interested party, or the representative of such interested party, he shall be disqualified from participating in the consideration and decision of such dispute or complaint.

The contracting canners agree to abide by the decision of the national committee unless an appeal in writing is taken to the secretary from any such decision of the national committee within 10 days after the decision is announced, which appeal shall be addressed to the secretary and a copy thereof shall be forwarded to the chairman of the national committee. Pending the disposition by the secretary of any such appeal, the parties involved shall abide by the decision rendered by the national committee unless the secretary shall rule otherwise pending such disposition. In the event of an appeal, it shall be the duty of the national committee to forward to the secretary its complete record with regard to the manner and the contracting canners agree to abide

by any final decision rendered by the secretary pursuant to this section.

(e) To adopt such rules and regulations for the conduct of its business as may be necessary. Rules and regulations shall be subject to the approval of the secretary.

SEC. 4. Powers and duties of regional committees: Each regional committee shall, in addition to the powers and duties specifically granted herein, have the following powers and duties:

(a) To employ, subject to the approval of the national committee, such employees as may be necessary, and to determine the salaries and define the duties of all such employees.

(b) To incur, subject to the approval of the national committee, such expenses and make such expenditures as may be necessary to carry out the provisions of this agreement; such expenses shall be paid out of the operating fund provided in article V.

(c) To investigate suspected violations of this agreement in its regional area and to report results of such investigations to the national committee.

(d) To adopt such rules and regulations for the conduct of its business as may be necessary. Rules and regulations shall be subject to the approval of the secretary.

ARTICLE V. EXPENSES

SECTION 1. Each canner shall pay to the national committee a share of all expenses incurred pursuant to this agreement. The national committee shall establish an operating fund for 1934 as follows:

(a) Every canner intending to can tomatoes and/or manufacture tomato products in 1934 shall pay to his respective regional committee for deposit with the national committee the sum of one tenth of 1 cent for each case packed by him in 1933. A canner who did not pack tomatoes and/or tomato products in 1933 shall deposit one tenth of 1 cent per case based upon his esimated 1934 pack. Payment of such initial deposit shall be made on or before March 15, 1934.

(b) If the operating fund is inadequate, the national committee may, subject to the approval of the secretary, levy additional assessments ratably on all canners on the basis of each canner's 1934 allotment.

(c) When the 1934 pack is completed, or upon the termination of this agreement, as the national committee may elect, the assessments covering the entire expenses incurred by the national committee and the approved expenses of the regional committees for the administration of this agreement shall be computed, and adjustments or collections made on the basis of the proportion of the total expenses which each canner's total actual pack of canned tomatoes or tomato products during 1934 bears to the total of canned tomatoes or tomato products by all canners in 1934.

SEC. 2. The procedure specified in section 1 shall be followed for the 1935 canning season, except the assessment shall be based on the 1934 pack.

ARTICLE VI. MISCELLANEOUS

SECTION 1. The members of the national committee or of any regional committee, and any employees thereof, shall not be held responsible individually in any way whatsoever to any canner or any other person, for errors in judgment, mistakes, or other acts either of commission or omission, of such member or employee, except for acts of willful misfeasance or malfeasance.

SEC. 2. The liability of the canners under this agreement is several and not joint, and no canner shall be liable for the default of any other canner.

SEC. 3. Nothing herein contained is or shall be construed to be in derogation or modification of the right of the Secretary to exercise any powers granted to him by the act, and, in accordance with such powers, to act in the premises whenever he shall deem it advisable.

ARTICLE VII. REPORTS

SECTION 1. To the Secretary:

(a) The contracting canners shall severally, from time to time, upon the request of the Secretary, furnish him such information, on and in accordance with forms of reports to be supplied by him as may be necessary for the purposes of (1) assisting the Secretary in the furtherance of his powers and duties with respect to this agreement, and/or (2) enabling the Secretary to ascertain and determine the extent to which the declared policy of the act and the purposes of this agreement will be effectuated, such reports to be verified under oath.

(b) The contracting canners also severally agree that, for the same purposes, and/or to enable the secretary to verify the information furnished him on said forms of report, all their books and records, and the books and records of their affiliates and subsidiaries, shall, during the usual hours of business, be subject to the examination of the secretary.

(c) Contracting canners shall severally keep books and records which will clearly reflect all financial transactions of their respective businesses and the financial condition thereof, and shall see to it that their respective affiliates keep such records.

(d) All information furnished the secretary pursuant to this article shall remain confidential in accordance with the applicable general regulations, Agricultural Adjustment Administration.

SEC. 2. To the regional committee:

(a) Each canner shall maintain an adequate record of acreage for which he has contracted, planted, or agreed to use. He shall also keep records of the yield, pack, shipments, payments for tomatoes on hand, and shall have a written contract for all purchases of tomatoes.

The contracting canners shall severally, upon the request of the regional committee, furnish to such committee on and in accordance with forms of reports to be supplied by it, full particulars in regard to matters specified in this section. The regional committee shall furnish the Secretary and/or the national committee all information obtained from the canners pursuant to this section.

(b) The contracting canners also severally agree that to enable the regional committee to verify the information furnished on said forms of reports, such of their books and records, and the books and records of their affiliates and subsidiaries, as are pertinent to such inquiry, shall, during the usual hours of business, be subject to the examination of the regional committee.

ARTICLE VIII. PROTECTION OF CONTRACTS

No processor shall knowingly purchase or receive any tomatoes for the purchase of which any other processor has an effective contract.

ARTICLE IX. EFFECTIVE TIME

SECTION 1. This agreement shall become effective at such time as the Secretary may declare above his signature attached hereto, and this agreement shall continue in force until the close of business December 1, 1935, or until terminated as follows:

(a) The Secretary may at any time terminate this agreement as to all parties thereto by giving at least 1 day's notice by means of a press release or in any other manner which the Secretary may determine.

(b) The Secretary shall terminate this agreement by giving notice in the same manner as provided in paragraph (a) above upon the request of a majority of the contracting canners, providing such canners packed not less than a majority of the total canned tomatoes or tomato products packed by all canners.

(c) This agreement shall, in any event, terminate whenever the provisions of the act authorizing it cease to be in effect.

ARTICLE X. DURATION OF IMMUNITIES

SECTION 1. The benefits, privileges, and immunities conferred by virtue of this agreement shall cease upon its termination, except with respect to acts done prior thereto; and the benefits, privileges, and immunities conferred by this agreement upon any party signatory hereto shall cease upon its termination as to such party except with respect to acts done prior thereto.

ARTICLE XI. COUNTERPARTS

SECTION 1. This agreement may be executed in multiple counterparts, which, when signed by the Secretary, shall constitute, when taken together, one and the same instrument as if all such signatures were contained in one original.

ARTICLE XII. ADDITIONAL PARTIES

SECTION 1. After this agreement first takes effect any canner may become a party to this agreement if a counterpart thereof is executed by him and by the Secretary. This agreement shall take effect as to such new contracting party at such time as the Secretary may declare above his signature attached to such counterpart, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

ARTICLE XIII. AGENTS

SECTION 1. The Secretary may by a designation in writing, name any person, including any officer or employee of the Government, to act as his agent in connection with any of the provisions of this agreement.

ARTICLE XIV. AMENDMENTS

SECTION 1. Any amendment to this agreement shall become effective at the date designated by the Secretary upon approval of such amendment by the Secretary: *Provided*, That such amendment shall have first been approved by a majority of the contracting canners and by contracting canners who packed not less than a majority of the total canned tomatoes and tomato products packed by all canners.

ARTICLE XV. SIGNATURE OF PARTIES

In witness whereof the contracting parties, acting under the provisions of the Agricultural Adjustment Act, for the purposes and subject to the limitations herein contained, and not otherwise, have hereunto set their respective hands and seals.

SCHEDULE A

SECTION 1. Flat-price buying: The following is the price schedule for 1934 canning season for the areas set out in article III, section 1, whether tomatoes are purchased on contract or open market:

Area and flat price per ton

New York	$11.50
New Jersey	13.00
Pennsylvania	11.50
Ohio	9.50
Indiana	9.50
Illinois	9.50
Iowa	9.50
Missouri	9.50
Delaware	11.50
Maryland	11.50
Virginia	10.25
Kentucky	9.50
Tennessee	9.50
Colorado	9.00

Area and flat price per ton—Continued

Utah	$9.00
California	11.50
Michigan	9.00
Arkansas	9.50

SEC. 2. Definition of flat price: The term "flat price" means the price paid for merchantable tomatoes on a tonnage basis, irrespective of grades.

SEC. 3. When tomatoes are purchased on the basis of U.S. grades, the minimum price paid by grade shall be as follows:

(a) U.S. no. 1 grade, 135 percent of the flat price for the area as per section 1 above.

(b) U.S. no 2 grade, 75 percent of the flat price for the area as per section 1 above.

The Chief Hearing Clerk, Department of Agriculture, does hereby certify that this is a true and correct copy of the proposed marketing agreement for canned tomatoes and tomato products industry delivered to this office by H. R. Wellman, Chief, General Crops Section.

NOTICE OF HEARING WITH REFERENCE TO A PROPOSED MARKETING AGREEMENT

Under the Agricultural Adjustment Act, approved May 12, 1933, as amended, and under the general regulations, series 1, revision 1, of the United States Department of Agriculture, Agricultural Adjustment Administration, issued pursuant thereto—

Notice is hereby given of a hearing to be held at the United States Chamber of Commerce, room A, Washington, D.C., March 3, 1934, at 9:30 a.m., at which hearing interested parties will be heard with reference to a proposed marketing agreement which the National Tomato Canners Committee have requested the Secretary of Agriculture to enter into pursuant to section 8 (2) of said act. A copy of such proposed agreement is now on file and available for public inspection at the office of the Chief Hearing Clerk, in the Department of Agriculture, Washington, D.C. Copies of such agreement may be obtained in such office. The proposed agreement relates to prices, practices, and conditions in the tomato canners' industry.

HENRY A. WALLACE,
Secretary.

WASHINGTON, D.C., *February 21, 1934.*

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Oklahoma [Mr. MCKEOWN].

Mr. MCKEOWN. Mr. Chairman, I rise to say a word or two about the soldier, Beryl M. McHam, whose bill to give him an honorable discharge and pay him adjusted compensation was vetoed. It was a Senate bill, substituted here, and for that reason cannot be brought up in the House. It is my judgment that the President never saw or heard of this man's record. Otherwise I do not believe that he would have vetoed the bill, although it was a veto recommended by the War Department. McHam's record as a soldier will compare with the record of any soldier in the World War. It is remarkable. He enlisted for the service on March 27, 1917, at Fort Sam Houston. He was assigned to Company A, Nineteenth Infantry, and when the President called for volunteers to go with the First Division, he was one of the first volunteers that went with the First Division, and sailed on June 14, 1917, from Hoboken, N.J., and landed at Saint-Nazaire, France, on July 28, 1917. He went into training at Le Mans; in October 1917 with Company C, Twenty-sixth Infantry, he went to the front in the Toul sector with the American Expeditionary Forces, First Division, and he served in active service from that time until the armistice was signed on November 11. He was at the front along with the First Division and was under shellfire for 72 consecutive days, without relief, and upon being relieved he received new clothes, and, having a few days' rest, went again into action, leading in the first major offenses in which American forces participated in an effort to dislodge the enemy from its advanced position before the gates of Paris.

Under the leadership of Maj. Theodore Roosevelt, he was fighting within 10 feet of him when he was wounded by machine-gun shot in the leg and arm. He was one of 12 men who volunteered to make a raid into No Man's Land which resulted in the capture of 29 Germans and loss of their gallant captain and one of the privates. After going over the top on July 18, 1918, in the Soissons drive he was permitted a few days' rest in camp, and then went again into action at St. Mihiel, and there it was that he walked right over Mount Seck, where 30,000 Frenchmen had lost their lives in an attempt on the part of the French to take that point. When Armistice Day came he was one of only 15 of a company of 250 soldiers that had started in with him in the early part of June 1917. He was one of only 15 survivors. He was shot, he was wounded, he was gassed, and today he suffers from the injuries that he received. He volunteered to go into the Army of Occupation and did go and served and never deserted at any time while he was in the Army until after the war closed, and I want to give you the whole history. While he was in the Army of Occupation he went one night with some comrades to a German cabaret, and he freely admits that he became intoxicated, and on his way back he got into a fist fight with some of his companions and struck one or two of them with his fist and said something to a corporal to the effect, "I will meet you," "I will see you later." He has no recollection about that. He was court-martialed, and what do you suppose they did to a man who had been 72 days in the front ranks without any relief, a man who had been wounded, who was a grenadier, who was a messenger at the front?

He was discharged, dishonorably, and sentenced to serve 5 years in United States Army disciplinary barracks at such point as the reviewing authorities might direct. Upon review the board cut it to 15 months.

Mr. BIERMANN. Will the gentleman yield?

Mr. MCKEOWN. I yield.

Mr. BIERMANN. Does the gentleman mean to say that he got that sentence for that brawl?

Mr. MCKEOWN. For that little fight he was given this sentence. I say here and now that you can read the record of these court-martial trials in France and they are the most inhuman sentences ever pronounced upon any brave man. I say to you it is a black spot on American civilization that an army would visit such punishment upon its gallant men.

Mr. BIERMANN. Does the record of that court martial show that he got that severe sentence just for that fight?

Mr. MCKEOWN. That is all it was—a fight. They dishonorably discharged him. They took away from him all the privileges he had. He cannot draw his $1,500 adjusted-service compensation. In order to get by an objection in this House I agreed to let them put in all of the provisos except that he have his adjusted compensation. I do not believe that under the Constitution even the War Department can visit upon a man the right to take his property away from him. That is what this judgment did. He had earned that money. He had earned that $1,500, and I stood pat in this House and refused to let it go without putting in some compensation.

Now, what took place? After he was discharged, then, he thought he could wipe out the infamy of his dishonorable discharge which they had put upon him, and he went back into the Army and enlisted, and he undertook to wipe out the dishonor. But when the officers found that he could not do that, that he could not correct his record, they let him go home. They were human men. They knew that he had been a gallant soldier, and I say to you that a man who has gone through what he has, suffered the hell of the trenches that he has suffered, is entitled to better consideration at the hands of his Government than to say they did not want to set a precedent. He went home. That was 12 years ago. The Army has never from that day to this attempted to lay its hands upon him or to put him back because he walked off up here at Camp Dix, N.J. His comrades told him to go. They said, "There is no use for you to stay here and fill out this service. You cannot wipe it out." Although he comes back to Congress and asks Congress to wipe out this judgment, yet, because of precedent, the War Department says we cannot afford to let this man have what is his. I say to you it is an outrage that any judgment of any tribunal, I care not whether it be a court martial or what, that deprives a man of his property for so slight an offense, a little assault with his fists, should stand. He never deserted under fire. He fought. He was there to fight. As I say, he was 1 of only 15 men left in his company after the armistice was signed. When the roll of his company was called there were only 15 men out of 250.

I am not blaming the President of the United States. I say he does not have the information. General Bridges did

not ask that the bill be not passed when he was in charge of the War Department. He did not make any recommendation. He simply gave this man's history and said he had deserted from his second enlistment and had not returned, but he did not make any recommendation that the bill be not passed. Every fighting man in the Army that knows anything about this man knows that he ought to have every right returned to him, and he ought to have an honorable discharge. He was cited by General Summerall for bravery in battle. [Applause.]

The CHAIRMAN. The time of the gentleman from Oklahoma [Mr. McKEOWN] has expired.

Mr. BOLTON. Mr. Chairman, I yield 20 minutes to the gentleman from California [Mr. ELTSE].

CONCERNING NAVAL POLICY AND EQUITABLE DISTRIBUTION OF NAVAL CONSTRUCTION AND EXPENDITURES

Mr. ELTSE of California. Mr. Chairman, I rise to address the House on the subject of naval policy and equitable distribution of naval-construction contracts and the distribution of naval expenditures. I realize that the announcement of that subject may sound rather dry, but I can assure you that it is a good, juicy subject, and I will demonstrate that to you before I have finished.

The people of the United States are vitally interested in this question of naval policy and the matter of naval construction and the awarding of these contracts and the distribution of these vast sums of money appropriated for naval purposes; but there is no part of the United States that is more interested in this subject than the people on the Pacific coast and the people of the western area of the United States, as has been indicated by the gentleman from California [Mr. HOEPPEL]. The eyes of the whole Nation are turned toward the Pacific because of the grave international problems that have existed in that theater over the last decade and more, and because of the fact that they exist at the present time. The eyes of the Nation have also been turned to that ocean, inasmuch as we must look to the Orient for an outlet for our exportable surpluses of agricultural and manufactured products. Both questions of national defense and expansion of commerce concern policy.

As a background for what I have to say, I wish to quote from the promulgated naval policies of the General Board of the Navy Department. The General Board of the Navy Department has recently announced that the fundamental naval policy of the United States is—

To maintain the Navy in sufficient strength to support the national policies and commerce and to guard the continental and overseas possessions of the United States.

The general naval policy is—

To create, maintain, and operate a Navy second to none and in conformity with treaty provisions—

And—

To support American interests, especially the development of American foreign commerce and the merchant marine.

The fleet building and maintenance policy is—

To build and maintain a fleet of all classes of fighting ships of the maximum war efficiency as permitted by treaty provisions; to replace over-age ships under continuing programs.

The fleet-operating policy, among other things, is—

To exercise economy in expenditures compatible with efficiency.

The shore-establishment policy, among other things, is—

To maintain a shore establishment sufficient to sustain the forces afloat in peace and capable of expansion to meet their needs in emergency—

And also—

To further the development of two main home bases on each coast.

I shall confine my remarks strictly to these announced current policies of the Navy Department; and at this particular point I want to say that I urgently advocate these announced policies as being in fulfillment of an adequate national defense and by way of preparing for an expansion of commerce and trade of which this Nation stands in need. At the same time, however, I want to stress the importance of the announced policy of the Navy Department to exercise economy in expenditures compatible with efficiency.

That you may get the whole picture of this construction program, the present and the projected construction program, I want to point out to you that under the act approved February 13, 1929, provision was made for the construction of six cruisers. As yet no appropriation has been made for this construction. Under the regular naval appropriation bill for 1935, provision is made for the construction of 1 aircraft carrier, 6 heavy cruisers, 1 light cruiser, 3 submarines, and 12 destroyers, 22 vessels in all. Under the N.I.R.A. allocation made under Executive Order No. 6174 by President Roosevelt, and for which contracts have already been let, there will be built 2 aircraft carriers, 1 heavy cruiser, 3 light cruisers, 4 submarines, 20 destroyers, and 2 gunboats, or 32 vessels in all. Therefore, we have a total of 54 ships under the 1935 regular naval appropriation bill and the N.I.R.A. program. Under the Vinson bill, H.R. 6604, which we recently passed, provision is made—and this is in addition to all these other items I have mentioned—for 1 aircraft carrier, 99,200 tons of destroyers, 35,530 tons of submarines, together with replacements, by vessels of modern design and construction, of over-age vessels of the Navy within categories of existing treaties.

What has been done to make this program effective? The preliminary steps have already been taken. First, as I have indicated, by Executive Order No. 6174, $238,000,000 of P.W.A. funds were allocated to the construction of 32 ships. Secondly, by the passage of the Vinson bill under which naval construction will continue over a 5-year period and it is estimated that the expenditure under that bill will be about $475,000,000. Adding these together gives us an estimated total expenditure for new construction in the Navy of $713,000,000. This is a stupendous sum but it is not all that will be involved.

I quote from the testimony of Admiral Land before the Naval Affairs Committee:

It is estimated that for every dollar expended from the Treasury during the first year of a shipbuilding program $4 is expended in outside industry in the purchase of material, appliances, machinery, boilers, and so forth.

Of course, the ratio of outside expenditures in the subsequent years will not be as high; but for the millions poured into this construction program there will be other millions spent on the outside.

I said a moment ago that there was plenty of juice in this subject. It is not a dry one by any means. On the Atlantic coast and also on the Pacific coast private shipbuilding yards and navy yards are involved. The question of national defense is also involved.

In his testimony Admiral Land went on to say that the value of the orders for materials to be purchased by the shipbuilder from sources outside his plant is about 40 percent of the value of the contract. If this be the case, then of the total of approximately $713,000,000 to be expended on this naval-construction program, with approximately $285,000,000 to be expended outside, we have a grand total of approximately $1,000,000,000 to be expended over this 5-year period. On both the Atlantic and the Pacific coasts we have private yards and navy yards vitally interested in this subject.

Breaking down the costs of ship construction, we find that 84 per cent of the cost goes to labor—40 percent to labor at the site, 28 percent to labor away from the site, back into the forests and in the mines; 16 percent of the overhead likewise goes into labor. Then there is 16 percent, roughly, which goes into the cost of materials in a ship.

Mr. Chairman, bees do not gather honey of rocks but they go to plants that have been provided with some juice. The Pacific coast needs and is entitled to a few shipbuilding plants provided with financial juice. With this enormous amount of money to be expended, we on the Pacific coast are interested to know why practically all this terrific sum which already has been appropriated or allocated has been diverted to private shipyards on the Atlantic coast with prac-

tically all the other money going to the navy yards on the Atlantic coast. We wish to know why this is the case.

Much has been said about the spread of labor, about the relief of the unemployed, about the increased purchasing power of the people of the Nation, about a fair distribution of Public Works funds, and a fair distribution of naval-construction contracts. It has been contended, and I would have you hear this, that the Pacific coast has been getting the lion's share of P.W.A. funds. Now, of course, I cannot accede to this statement.

Mr. HOEPPEL. Mr. Chairman, will the gentleman yield?

Mr. ELTSE of California. I yield.

Mr. HOEPPEL. The records show that California has received 131 percent of the revenue it pays to the Government. There are some States which have received as much as 1,680 percent. Most of the Southern States have received from 200 to 500 percent more than they pay to the Federal Government in taxes.

Mr. ELTSE of California. I thank the gentleman for the information. As I say, I cannot accede to the contention. The facts do not support the contention as indicated by my colleague from California. I have something further to say on that subject. Before I finish I hope to make those who have made such a contention, shall I say, blush with shame?

P.W.A. ALLOTMENT OF $238,000,000

Under Executive order, $238,000,000 was allocated from the P.W.A. fund. May I show you what part of this went to the Atlantic and what part went to the Pacific? Naval vessels are either constructed in private yards or navy yards. That is obvious. There are plenty of yards on the Pacific. There are more on the Atlantic. At this point, touching the question of national defense, I remind you that there are 6 navy yards on the Atlantic coast and but 2 small navy yards on the Pacific coast. The Pacific Ocean is recognized by all as being the emergency center. We have a navy yard at Bremerton, Wash., and a small one at Mare Island, Calif.

In view of Admiral Land's testimony that "the private shipyards are fast approaching the starvation point", it is indeed surprising to note that all of the awards to private yards for ship construction under the P.W.A. went to the private yards on the Atlantic coast and not one red cent went to private yards on the Pacific coast. It is true that 4 destroyers of the 1,850-ton class went to the 2 navy yards on the Pacific coast; that is, 2 to Bremerton and 2 to Mare Island. This means that 17 ships out of the 21 under the program went to private yards on the Atlantic. Out of a total of $238,000,000 the small sum of $15,000,000 went to the navy yards on the Pacific coast. This is at the ratio of 15 to 1.

In addition to the P.W.A. allotment under this Executive order there was also allotted to the naval establishments on the Atlantic coast $12,727,355, and $5,836,887 to the Pacific coast. In that connection it is interesting to make a comparison with these figures. The States west of the Mississippi River have a representation in this House of 135 Members. The population west of the Mississippi River is in excess of one third of the total population of the United States, the population being approximately 37,370,000 west of the Mississippi River. Therefore, Mr. Chairman, I think I have a sufficient basis, coupled with what my colleague [Mr. HOEPPEL] said, to make the statement that the Pacific coast has not received the lion's share. I believe such assertions are disproved.

Mr. BOLTON. Will the gentleman yield?

Mr. ELTSE of California. I yield to the gentleman from Ohio.

Mr. BOLTON. Has the gentleman figures to indicate the total amount allotted west of the Mississippi River and east of the Mississippi River out of the total Public Works fund?

Mr. ELTSE of California. Yes; $15,000,000 to the navy yards on the Pacific coast.

Mr. BOLTON. That is the naval allowance?

Mr. ELTSE of California. Yes.

Mr. BOLTON. I refer to the total P.W.A. fund.

Mr. ELTSE of California. No. I have not any figures on that.

Mr. BOLTON. I am sympathetic with the gentleman's situation, but my knowledge of the activities in other directions leads me to believe that the State of California has been pretty well taken care of.

Mr. ELTSE of California. I think when the statements are finally made up we can demonstrate to you that is not the case.

May I make a further comparison? This also appears in the testimony taken before the Naval Affairs Committee. Breaking down the naval expenditures for the year 1932 we find that out of a total of $353,628,363 the sum of $298,442,571 plus went to States east of the Mississippi River with but $55,185,791 going to States west of the Mississippi River. This is at a ratio of more than 5 to 1, and I would have you remember at the same time that the population west of the Mississippi River is in excess of one third of the population of the United States. Total estimated expenditures under the Vinson bill is $475,000,000. There is a vital point I want to bring out. If the construction of naval craft and vessels under the Vinson bill is to be geographically distributed in the same manner that distribution was made under the allotment of the P.W.A. funds, the private yards on the Pacific coast will get exactly nothing, and may I say again that we have many private yards? Under such a division the two navy yards on the Pacific will get about one fifth of the $475,000,000, or $31,666,000. The Atlantic private yards and navy yards will get all the rest or $423,334,000.

[Here the gavel fell.]

Mr. BOLTON. Mr. Chairman, I yield the gentleman from California 5 additional minutes.

Mr. ELTSE of California. But if the existing administrative policy of the Department is pursued, the Pacific coast will not be awarded as favorable an allotment as that which I have indicated. Judging from the past, we are to be met with the objections that there are no private-yard facilities available, and that it would be extremely unwise to assign any more construction to the Pacific coast navy yards, since they would be congested so that ships of the fleet could not be repaired and since they would not be available in case of an emergency. I stop to ask what emergency they have in mind? These two objections have actually been raised.

Mr. BIERMANN. Will the gentleman yield?

Mr. ELTSE of California. I yield to the gentleman from Iowa.

Mr. BIERMANN. A couple of weeks ago, when we were discussing the Vinson naval bill, we were told that the Pacific coast was going to be attacked by Japan. In spite of the fact that San Francisco is 5,200 miles from Yokohama, they said San Francisco would likely be the point attacked by Japan. I presume that for this reason they have to keep the shipbuilding activities away from the Pacific coast, out of harm's way.

Mr. ELTSE of California. Not at all. But that involves the reason why we are contending we must provide for more adequate naval facilities on the Pacific coast.

As to the first objection which has been raised, may I say that the private yards on the Pacific coast are just as rapidly approaching the starvation point as those on the Atlantic coast, and our private yards are just as much in need of financial sustenance as the private yards on the Atlantic coast. The Pacific coast private yards will come to life quickly enough if certain remedial bills are passed and if equity and fairness are allowed to creep into the making of these contracts under the naval-construction program.

As to the second objection, it has been said that it would be unwise to congest the yards on the Pacific coast because we may need them for repairs in case of an emergency. The objection contains within itself the very reason why the naval facilities should be expanded on the Pacific coast and why naval construction should be undertaken there as a part of our naval policy and as a measure of national defense. Without elaboration, I venture to prophesy that unless naval facilities are expanded on the Pacific coast, as a part of the present construction program, this Nation will some day find hopeless and inadequate facilities available in

emergency. Again may I remind you that there are 6 navy yards and 1 naval gun factory on the Atlantic coast with but 2 small navy yards on the Pacific. Moreover, we have no jealous guardian of the seas in the Pacific Ocean to lend support and to unite in a common Anglo-Saxon cause such as we have in the Atlantic, where the battle-fleet forces of the English Navy ride the waves.

In line with the shore-establishment policy, as promulgated by the General Navy Board, I contend that the Pacific coast should have shore establishments sufficient to sustain the forces afloat in peace and capable of rapid expansion in case of emergency. They say that one reason they do not want to congest our yards is because an emergency might arise. In line with shore-establishment policy I say to you that each coast should be provided with two fully developed main home bases. The existing shore establishments are wholly inadequate.

There should be established on the Pacific coast a centrally located naval supply depot. This is urgent. I have talked with many officers of the Navy, and they are all agreed that this should be done; and I venture to assert that all the operative officers of the Navy will agree with this point of view.

Now, happily, I am prepared to point out to you the method by which such a shore establishment and central naval supply depot may be constructed without any increase whatsoever in the naval budget. This can be done through the simple application of the policy promulgated by the General Board, to exercise economy in expenditures compatible with efficiency.

The order was recently given that the fleet should be transferred from the Pacific to the Atlantic Ocean; and the testimony before the Naval Affairs Committee shows that this will be at an additional cost of $3,709,740, with an indication that the cost might run as high as $4,000,000, the additional cost being by reason of the fact that oil costs approximately 54 cents a barrel more on the Atlantic than on the Pacific.

Think of it! Burn up $4,000,000 for this transfer when that money might be used, in strict accordance with the rule of economy and efficiency, for more useful purposes in the expansion of much-needed shore establishments and in particular the construction of a much-needed supply depot on the Pacific coast. Practically all of this vast sum would be paid to labor. Such use would greatly increase employment. The officers and the men of the Navy are already employed and will continue to be employed anyway so that the development of such a project and the expenditure of $4,000,000 would be in fulfillment of the administration's program to spread employment and increase the purchasing power of the people of the Nation. Spend $4,000,000 for a transfer of the fleet from the Pacific to the Atlantic and that program is not set forward in the slightest degree.

Moreover, while it has been said that it is the approved policy of the Navy Department to concentrate the fleet in the Atlantic now and then, what about the policy of maintaining the fleet in the Pacific as a measure of national defense at the time when the fleet is needed in the Pacific? Some time ago I saw in the press that the reason for sending the fleet to the Atlantic was by way of a friendly gesture toward the Japanese. Bring the fleet to the Atlantic and then when the order is given to return it to the Pacific a howl will go up from Tokio of an unfriendly gesture on the part of the United States.

Adverting to the subject of a reasonable and fair distribution of the new naval construction to the Atlantic and Pacific yards, I call your attention to the fact that Senator DILL has introduced a bill in the Senate by way of an amendment to the Vinson bill, [H.R. 6604] providing—

> That in making awards under contracts for the construction of vessels in private shipyards, bids may be accepted from shipyards located on the Pacific coast; *And provided further*, That the cost of the construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation of necessary materials from the Atlantic to the Pacific.

Representative CARTER of California has introduced a similar bill in the House.

The purpose of these bills is laudable, and the principle of differentials should be established as promoting a reasonable and fair distribution of naval construction and naval expenditures. The analysis of the naval expenditures heretofore made and the distribution of naval construction which I have described presents conclusive reasons why differentials should be established such as that suggested under the Dill and Carter bills. There are other vital considerations which I will mention later.

There are numerous private shipyards on the Pacific coast in need of contracts. We have a vast army of unemployed; this army is not all in the East. There are hungry men, women, and children on the Pacific coast as well as on the Atlantic.

During the World War our Pacific yards were spots of high activity where hammers clanged, riveters made machine-gun music, and between thirty and fifty thousand men worked like bees. We still have those yards but they are silent, practically deserted, out of commission as shipbuilding plants, their forces scattered, all because none of the ships built with Government money have been assigned to these yards. This is a lamentable situation. We of the Pacific coast ask why it is that all—I say all—of the recent awards of contracts to private shipyards have been made to those on the Atlantic coast. There is no justification! Oh, I know that it will be said, as has been said, the contracts were let on open bidding, and that no bids were received from yards located on the Pacific coast, but I say to you that had the Pacific coast yards been given due consideration, due and proper notice, some encouragement granted, some indication of the extensive building construction program to be pursued by the Government, those shipyards would have submitted bids. Moreover, I humbly submit that it is the duty of the Government to provide or to see to it that adequate naval facilities are provided and encouraged on the Pacific coast as a measure of national defense.

There is a national necessity for the development and maintenance of shipyards on the Pacific coast. There is far more than the question of comparison of costs of naval shipbuilding by the Atlantic and Pacific yards. As a measure of national defense the maintenance of shipyards on the Pacific coast is vastly more important than the differential assumed to exist between building costs on the two sides of the continent.

The only reason for the existence of an American Navy is to defend the country in case of war and to encourage commerce between the nations, to guard the continental and overseas possessions of the United States, and to protect American lives and property. In war time it is highly essential that there be adequate yards on the Pacific coast for the building and repair of ships, and we cannot wait until war breaks out to provide the yards. Moreover, it is universally agreed that since European markets for American products have practically been closed to us forever, we must turn to the markets of the Orient for an outlet for our exportable surpluses.

Now that there is a definite Navy building program being undertaken, a fair and reasonable share of the construction and of the expenditures ought to be allotted and provided to the yards on the Pacific coast. It is their right as enterprises that stand ready to serve, and the policy of national defense demands it. [Applause.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Alaska [Mr. DIMOND].

Mr. DIMOND. Mr. Chairman, my only purpose in asking leave to be heard today in the consideration of the bill now before the House in Committee of the Whole is to try to point out the place that Alaska has, by virtue of geography, in any proper scheme of national defense.

I have here a small map showing a part of the Northern Hemisphere, called the Great Circle Map. I have outlined on this map in blue the Territory of Alaska and the United States, and also you will see some red lines running from the Pacific ports of the United States to Alaska, other lines to Honolulu, and all converging in the Orient.

You probably do not know that the journey from San Francisco, or from Seattle, to Tokio or Manila is considerably shorter by way of Alaska or by way of the Aleutian Islands, which I am now pointing out, than it is by way of Honolulu or the Hawaiian Islands. You all know, particularly those of you who have been here for some years and have watched the building of our national defense, that Honolulu is fortified. A good many million dollars—I do not know how many—have been spent in the fortification of Honolulu, not alone to defend the Hawaiian Islands, but to defend the Pacific coast of the United States. The pouring of all this money into defenses in the Hawaiian Islands can be justified only upon the theory that it is necessary or advisable in order to provide a proper defense for continental United States; but, as one rather high officer said to me not so long ago, "It is true we have locked one door, but we have left the other door open." I said, "What other door?" and he said, "The Territory of Alaska." Because, so far as continental United States is concerned, the distance to the Hawaiian Islands is 2,200 miles, while the distance from Seattle to the harbors on the southern coast of the main body of Alaska is only 1,400 miles.

In other words, it is 800 miles shorter to go from Alaska to Seattle and it is somewhat shorter to go from Alaska down to San Francisco, than it is to go from Hawaii to the city of San Francisco. I simply mention the city of San Francisco because it is one of the largest cities on the Pacific coast. Seattle, of course, is about 800 miles farther north and that much closer to the Territory of Alaska.

Mr. HOEPPEL. Will the gentleman yield for a correction?

Mr. DIMOND. Yes.

Mr. HOEPPEL. Los Angeles, as the gentleman knows, is on the Pacific coast and its territory extends down to the harbor at Wilmington.

Mr. DIMOND. I beg the gentleman's pardon, I had overlooked that. Los Angeles is a great city.

As a matter of fact, steamships sailing out of Seattle for the Orient ordinarily go south about 50 miles from the Aleutian Islands. They do not go to Honolulu, but they go to the north because it is the shortest route. It is some three or four hundred miles shorter to go that way than it is to go farther south and follow the parallels of latitude around.

Without being unduly considered an alarmist, the gentleman from California [Mr. ELTSE], who last spoke, said what is universally recognized: That the theater of discontent, the theater of danger, if there is any danger to the United States, does not lie to the east or does not lie across the Atlantic Ocean, but lies across the Pacific Ocean; and I say this without in any manner indicating that I am of the opinion that war is going to break out the next day, or the next week, or within a year or so.

We all know that in the last administration, under the policy then pursued, if it had been pursued much further, we would have found ourselves in a state of war; the only thing the Government could do was to back up in order to maintain peace, and I am not saying that that was wrong.

Here we have the Territory of Alaska that is an important part and parcel in the proper scheme of national defense. The southern coast of the northern part of Alaska lies within 1,400 miles and the southern tip of Alaska within 800 miles of the continental United States.

Alaska is close to the United States and has many magnificent harbors and furnishes possible bases of operations for any foreign power that may attempt to attack the United States; but nothing has been done there by way of defense. In fact, we have gone the other way. In the four-power treaty, the United States entered into a covenant that they would not put any fortifications on the Aleutian Islands west of Dutch Harbor, which I point out to you on the map.

Here we have a string of islands running toward Asia. It is American territory and furnishes one, at least, of the finest harbors in the world for a base for a hostile power, and we agreed not to put any fortifications out there. I do not mean to say that there were not sufficient reasons for that, although it seems inexplicable to me.

Now, it seems to me that we should place fortifications here, so that if a foreign power tries to attack us we can cut in and stop them. How is that to be done? It can be done simply by the establishing of an air base in Alaska.

A fleet of planes properly equipped for war could cut in on any hostile army or fleet, and could give us ample warning of what is taking place.

There is another good and substantial reason why an Army air base should be established in Alaska, that is, that it would give the military pilots some experience in flying in cold weather in a sub-Arctic climate, which they have not had heretofore in any proper proportion. Recently the famous Col. Carl Ben Eielson flew across the top of the continent, as I indicate on the map, with Capt. Sir Hubert Wilkins, over to Spitzbergen. He came back to Alaska afterwards and established an air company there, and in a commercial flight made to Siberia he was forced down along the Siberian coast and was lost. It was months before his body was found. The people of Alaska appealed to the Government to send Army planes up there and search for Colonel Eielson, and we found that the Army did not have any equipment fit for flying in that climate or in that country or in that weather, and so in the end we had to appeal, indirectly, to the Soviet Government, and that Government spent a good many thousand dollars in the effort to find Colonel Eielson.

They sent up there military planes which were equipped for sub-Arctic and Arctic flying, and they went there and searched for a long time, but finally the body of Colonel Eielson and that of his mechanic Earl Borland were discovered by Joe Crosson, an almost equally famous American flyer, accompanied by the intrepid pilot, Harold Gillam. While our flyers could not think of going into Alaska to face the storms at that same time, the military pilots of Soviet Russia were properly equipped, and they sent their ships into northern Siberia and searched for Colonel Eielson.

One would think that under any adequate scheme of military defense our air pilots ought to be trained in that sort of flying, because Alaska may be the theater of war in the future. Some may say, "We don't care what happens to Alaska, let the foe take it." That might be all right for the people in continental United States, but did you ever consider the position the United States would be in if a strong and hostile power got possession of the Territory of Alaska. Then you would have a potential enemy within a very few hundred miles of Seattle and San Francisco, and—I shall not forget this time—also not so far from Los Angeles.

Let me, if I may, sum up, since my time is limited:

So far as the United States is concerned, the theater of discontent lies to the westward, not across the Atlantic. Trade expansion in the Orient and racial antagonisms involve this country whether it pleases to be involved or not. Our economic stake in Asia is large, and constantly growing.

We are separated from the Continent of Asia not by the broad Pacific but by the narrow Pacific. The western arm of the Aleutians juts out past 172° longitude. Alaska proper lies far to the west of continental United States. Alaska is the very close neighbor of Asia.

An enemy from Asia could scarcely hope to send his fleet east to the main cities of the Pacific coast via the Hawaiian Islands. Two factors would deter him: First, the United States fleet; second, distance from bases of supply which such an attempt would involve. But he naturally would make the attempt via Alaska. He would have many advantages by so doing:

First. Route is shortest and regularly used by commercial vessels at present.

Second. Alaska offers harbors without number, and enemy could take shelter therein, and any effort to dislodge him would be difficult.

Third. Under present circumstances it would be wholly within his power to make a surprise sortie upon Pacific

Northwest from Alaska, and the advantage would be all his. He would have harborages to which he could retreat; he could consolidate his gains and a greatly superior fleet would be necessary to drive him back.

Fourth. It is entirely conceivable that once he was in possession of Alaska that he could not be driven out. From that position he could not only worry continually the American fleet and cities on the Pacific coast but he could establish a transport route by which soldiers could be massed in Alaska for invasion of the United States.

To obviate any such possibility—

First. Establish at Anchorage or Fairbanks and also in the Aleutian Islands, and elsewhere in Alaska at points deemed proper by naval and military authorities, such fortifications, and particularly an adequate air force, as would effectively prevent a successful attack by an enemy fleet or army. Such a program is essential for the proper protection of the United States. Alaska, too, is deserving of adequate protection.

Second. There should be periodical voyages to Alaskan waters by the United States fleet so that the personnel may become acquainted with the waterways as a matter of preparedness. Of course, such visits need not be made by the entire fleet at one time, but substantial units should be sent north in rotation.

This program is advocated by the people of Alaska; it has the support of the American Legion in Alaska. I wish that I had time to read the letters I have from the several posts of the American Legion in Alaska. I believe that it is in entire harmony with the views and policy and plans of the command of the Army, and particularly that of the Army air force. I say to you, Defend the United States by defending Alaska. And do not forget that 60,000 citizens of the United States who love our common country, and are as much entitled to protection as any other citizens of the United States, live in Alaska.

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. THOMPSON].

Mr. THOMPSON of Texas. Mr. Chairman and members of the Committee, I did not intend to ask you for any time during this first term of mine, and I came here this afternoon with a good deal of reluctance. However, you are dealing with a group of men who are friends of mine, whose lives you hold in your hand, and if I did not raise my voice in behalf of them I would feel very disloyal. Last week and the week before we heard some soul-stirring oratory incident to the air mail bill. It was prompted by the death of five Army pilots, who either directly as a result of flying the air mail, or because of something connected with it, went down to their deaths. It was significant that in all the criticism that was leveled at the authorities who brought about the cancelation of the air-mail contracts, the Army men themselves did not say one word, and I believe, except in one case, that no member of the family of any of the men who lost their lives raised any complaint about it. Most, if not all, of the criticism came from those who on the floor of this House sought to make political capital of these unfortunate deaths.

The men in the Army Air Corps are in a hazardous occupation. They recognize that as do their families. Flying the air mail to them was all in a day's work, and there is no more reason to complain about these particular accidents than any of the other accidents that have occurred in the past or may occur in the future. I want to leave with you just this one thought—that if there is any guilt at all in the death if men flying in the Army, if the accident is due to faulty or inadequate equipment that those men are using, that guilt must rest on the shoulders of this House itself, because, after all, we are the ones who provide them with equipment.

Mr. HOEPPEL. Mr. Chairman, will the gentleman yield?

Mr. THOMPSON of Texas. Yes.

Mr. HOEPPEL. I rise to agree with the gentleman and to state that we have been continually harassing these men by threatening to take away from them their 50-percent increase in pay because of their hazardous service.

Mr. THOMPSON of Texas. That is quite true. I understand that the appropriation bill now before you provides the equipment the Air Corps would like to have. I verified that from the Air Corps officers this afternoon. I am glad that is the case, because it will set a precedent and may result in saving lives in the future. Remember, whenever you act on an Army Air Corps appropriation, that if an accident occurs on account of faulty equipment, the blood of these men is on your heads and not on anyone else's.

Mr. BIERMANN. Is there anything in the record to show that any of these Army aviators lost their lives through faulty equipment?

Mr. THOMPSON of Texas. There has been so much conversation about these things that I really cannot sift it out. There was talk about improper equipment, improper radio equipment, and I am sure the gentleman must recall that. Does not the gentleman recall that?

Mr. BIERMANN. I heard something from the Republican side about that, but in the debate Friday there was nothing to that effect, and General Foulois, I think, has all along controverted any intimation that those men lost their lives through faulty equipment.

Mr. THOMPSON of Texas. I think, perhaps, that is correct. I will tell you my personal opinion of why they lost their lives. It was just the boundless enthusiasm of the men of the Air Corps. That is the entire reason. They started to go to their objective. It was just another objective, and they would not turn back even though the weather was too bad for flying. I think that is the secret of the whole thing.

Mr. BIERMANN. But I think the record ought to show that there is nothing, from the standpoint of real intelligent testimony, that indicates in the slightest degree that any one of the Army flyers lost his life because of faulty equipment. I think the record does not show that at all. The gentleman's explanation is a reasonable one.

Mr. THOMPSON of Texas. I think the gentleman is entirely correct, and I checked it up with many of my Army friends at the time.

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield the gentleman one additional minute.

Mr. THOMPSON of Texas. In the words of General Martin, if you give these men proper equipment, then do not coddle them.

Speaking of General MARTIN, I should like to correct an impression that was left after he had been on his feet the other day. I am sure the gentleman who unknowingly left the impression will welcome a correction. General MARTIN draws no pension, and, by his own vote, he eliminated his pension in the Economy Act a year ago.

Mr. HOEPPEL. Will the gentleman yield to me to answer that question?

Mr. THOMPSON of Texas. Yes; I yield.

Mr. HOEPPEL. It is thoroughly understood that while General MARTIN is a Member of Congress, he does not receive any retired pay; but if he declines to run or is no longer a Member of Congress, he will immediately again receive $6,000 per year retired pay. I was criticizing him because he was trying to prevent the widows of men who were being killed in these accidents from receiving what I considered just compensation under the United States compensation laws.

Mr. THOMPSON of Texas. Nevertheless, the Members, to a large extent, misunderstood the gentleman's inference, and in fairness both to him and to the gentleman from Oregon I think the matter should be thoroughly understood, and that it should appear in the RECORD that General MARTIN does not draw a pension plus his congressional salary.

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield to the gentleman from Iowa [Mr. WEARIN].

Mr. WEARIN. Mr. Chairman, I should like to consume just a few minutes to ask the chairman of the subcommittee a question or two with reference to the appropriation for the Air Corps. I notice on page 34 this statement:

Not exceeding $3,848,824 may be expended for experimental and research work with airplanes or balloons and other equipment, including the pay of necessary civilian employees.

Does the gentleman interpret that as meaning the War Department might, by some interpretation, be able to use a portion of that fund for the construction of a new dirigible?

Mr. COLLINS of Mississippi. There will be none of this money used for dirigibles, either rigid or otherwise.

Mr. WEARIN. The gentleman is quite sure that there is no construction program contemplated in that?

Mr. COLLINS of Mississippi. None whatever.

Mr. WEARIN. Now, with reference to the helium gas that is mentioned, I presume that is for the maintenance of the ships that we already have?

Mr. COLLINS of Mississippi. Such as we already have. They are listed in the hearings.

Mr. WEARIN. I thank the gentleman.

Mr. COLLINS of Mississippi. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. LANHAM, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 8471) making appropriations for the War Department, and for other purposes, had come to no resolution thereon.

LEAVE OF ABSENCE

Mr. BYRNS. Mr. Speaker, my colleague, Mr. CRUMP, has been called home today on account of very serious and critical illness of a member of his family. I ask unanimous consent that he be given leave of absence for 1 week.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. BYRNS. Mr. Speaker, the gentleman from New York, Mr. CORNING, has had serious illness in his family since February 23, which has necessitated his being away from the House. I ask unanimous consent that he be given indefinite leave of absence on account of illness in his family.

The SPEAKER. Without objection, the request is granted.

There was no objection.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 421. An act for the relief of Joseph Gorman; to the Committee on Military Affairs.

S. 458. An act for the relief of Lyman I. Collins; to the Committee on Military Affairs.

S. 521. An act for the relief of Henry Poole; to the Committee on Military Affairs.

S. 870. An act for the relief of L. R. Smith; to the Committee on Claims.

S. 872. An act to facilitate the use and occupancy of national-forest lands for purposes of residence, recreation, education, industry, and commerce; to the Committee on Agriculture.

S. 1138. An act authorizing transfer of an unused portion of the United States Range Livestock Experiment Station, Mont., to the State of Montana for use as a fish-cultural station, game reserve, and public recreation ground, and for other purposes; to the Committee on Agriculture.

S. 1164. An act to amend an act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes", approved September 7, 1916, and acts in amendment thereof; to the Committee on the Judiciary.

S. 1754. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River at or near New Boston, Ill.; to the Committee on Interstate and Foreign Commerce.

S. 1820. An act to amend the Code of Law for the District of Columbia; to the Committee on the District of Columbia.

S. 2043. An act to amend the act of May 22, 1928, entitled "An act to authorize the collection in monthly installments of indebtedness due the United States from enlisted men, and for other purposes; to the Committee on Military Affairs.

S. 2089. An act to amend the Code of Laws for the District of Columbia, approved March 3, 1901, as amended (D.C. Code, title 5, ch. 3), relating to building and loan associations; to the Committee on the District of Columbia.

S. 2139. An act for the relief of the Western Union Telegraph Co.; to the Committee on Claims.

S. 2267. An act for the relief of Isaac Pierce; to the Committee on Military Affairs.

S. 2313. An act providing for the suspension of annual assessment work on mining claims held by location in the United States and Alaska; to the Committee on Mines and Mining.

S. 2445. An act to authorize the Secretary of the Navy and the Secretary of Commerce to exchange a portion of the naval station and a portion of the lighthouse reservation at Key West, Fla.; to the Committee on Interstate and Foreign Commerce.

S. 2509. An act to readjust the boundaries of Whitehaven Parkway at Huidekoper Place in the District of Columbia, provide for an exchange of land, and for other purposes; to the Committee on the District of Columbia.

S. 2550. An act granting an easement over certain lands to the Springfield special road district in the county of Greene, State of Missouri, for road purposes; to the Committee on the Judiciary.

S. 2554. An act for the relief of Cohen, Goldman & Co., Inc.; to the Committee on Claims.

S. 2675. An act creating the Cairo Bridge Commission and authorizing said commission and its successors to construct, maintain, and operate a bridge across the Ohio River at or near Cairo, Ill.; to the Committee on Interstate and Foreign Commerce.

S. 2688. An act to validate payments for medical and hospital treatment of members of Reserve Officers' Training Corps and citizens' military training camps; to the Committee on Claims.

S. 2696. An act to amend an act entitled "An act granting a charter to the General Federation of Women's Clubs"; to the Committee on the Judiciary.

S. 2742. An act to authorize the Secretary of War to abandon or evacuate real estate no longer required for cemeterial purposes in Europe, and for other purposes; to the Committee on Military Affairs.

S. 2790. An act for the relief of the Charlestown Sand & Stone Co., of Elkton, Md.; to the Committee on War Claims.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 2. An act for the relief of C. M. Williamson; Mrs. Tura Liljenquist, administratrix of C. E. Liljenquist, deceased; Lottie Redman; and H. N. Smith;

S. 406. An act for the relief of Warren J. Clear;

S. 750. An act for the relief of the Lebanon Equity Exchange of Lebanon, Nebr.;

S. 751. An act authorizing the Secretary of the Treasury of the United States to refund to the Farmers' Grain Co. of Omaha, Nebr., income taxes illegally paid to the United States Treasurer;

S. 1069. An act authorizing adjustment of the claim of the Chicago, North Shore & Milwaukee Railroad Co.;

S. 1074. An act authorizing adjustment of the claims of John T. Lennon and George T. Flora;

S. 1087. An act authorizing adjustment of the claim of William T. Stiles;

S. 1115. An act to authorize the Department of Agriculture to issue a duplicate check in favor of Department of Forests and Waters, Commonwealth of Pennsylvania, the original check having been lost;

S. 1347. An act for the relief of Little Rock College, Little Rock, Ark.;

S. 1426. An act for the relief of the estate of Benjamin Braznell;

S. 1496. An act for the relief of Nannie Swearingen;

S. 1724. An act authorizing the reimbursement of Edward B. Wheeler and the State Investment Co. for the loss of certain lands in the Mora grant, New Mexico;

S. 1759. An act to revive and reenact the act entitled "An act granting the consent of Congress to the Mill Four Drainage District in Lincoln County, Oreg., to construct, maintain, and operate dams and dikes to prevent the flow of waters of Yaquina Bay and River into Nutes Slough, Boones Slough, and sloughs connected therewith", approved June 17, 1930;

S. 1782. An act for the relief of the B. & O. Manufacturing Co.;

S. 2201. An act for the relief of the Neill Grocery Co.; and

S. 2766. An act to extend the period during which direct obligations of the United States may be used as collateral security for Federal Reserve notes.

ADJOURNMENT

Mr. COLLINS of Mississippi. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 5 minutes p.m.) the House adjourned until tomorrow, Tuesday, March 6, 1934, at 12 o'clock noon.

COMMITTEE HEARINGS

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

(Tuesday, Mar. 6, 10 a.m.)

Continuation of the hearing on H.R. 7852, the National Securities Exchange Act of 1934.

COMMITTEE ON THE POST OFFICE AND POST ROADS

(Tuesday, Mar. 6, 10 a.m.)

Hearings on H.R. 8097, salaries and allowances for rural letter carriers.

COMMITTEE ON IMMIGRATION AND NATURALIZATION

(Tuesday, Mar. 6, 10 a.m.)

Hearing on restriction of general immigration in room 445, old House Office Building.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

369. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, United States Army, dated March 2, 1934, submitting a report, together with accompanying papers, on a preliminary examination and survey of Turtle Bayou, Tex., authorized by the River and Harbor Act approved July 3, 1930; to the Committee on Rivers and Harbors.

370. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, United States Army, dated March 2, 1934, submitting a report, together with accompanying papers, on a preliminary examination of Smiths Creek, N.J., authorized by the River and Harbor Act approved March 3, 1925; to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. BUCHANAN: Committee on Appropriations. House Joint Resolution 290. Joint resolution to provide an appropriation to carry into effect the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934; without amendment (Rept. No. 868). Referred to the Committee of the Whole House on the state of the Union.

Mr. COLLINS of Mississippi: Committee on Appropriations. H.R. 8471. A bill making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes; without amendment (Rept. No. 869). Referred to the Committee of the Whole House on the state of the Union.

Mr. COLLINS of California: Committee on Indian Affairs. H.R. 5887. A bill to authorize the creation of an Indian village within the Shoalwater Indian Reservation, Wash., and for other purposes; without amendment (Rept. No. 870). Referred to the Committee of the Whole House on the state of the Union.

Mr. DICKSTEIN: Committee on Immigration and Naturalization. H.R. 8312. A bill to provide adjustment of status of certain aliens lawfully admitted without requirement of departure to foreign country; without amendment (Rept. No. 871). Referred to the House Calendar.

CHANGE OF REFERENCE

Under clause 2 of rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H.R. 5757) granting a pension to Emily Cecil; Committee on Invalid Pensions discharged and referred to the Committee on Pensions.

A bill (H.R. 6401) granting a pension to Anna Hill Wilson; Committee on Invalid Pensions discharged and referred to the Committee on Pensions.

A bill (H.R. 7484) to amend section 51 of chapter 2, title 45, of the Code of Laws of the United States of America; Committee on Interstate and Foreign Commerce discharged, and referred to the Committee on the Judiciary.

A bill (H.R. 7794) to amend section 51 of chapter 2, title 45, of the Code of Laws of the United States of America; Committee on Interstate and Foreign Commerce discharged, and referred to the Committee on the Judiciary.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. COLLINS of Mississippi: A bill (H.R. 8471) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes; to the Committee on Appropriations.

By Mrs. NORTON: A bill (H.R. 8472) to authorize steam railroads to electrify their lines within the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. DUNCAN of Missouri: A bill (H.R. 8473) to amend section 22, title 2, of an act approved May 12, 1933, entitled "An act to relieve the existing national economic emergency by increasing agricultural purchasing power, to raise revenue for extraordinary expenses incurred by reason of such emergency, to provide emergency relief with respect to agricultural indebtedness, to provide for the orderly liquidation of joint-stock land banks, and for other purposes"; to the Committee on Agriculture.

By Mr. BRUNNER (by request): A bill (H.R. 8474) to provide that citizens of the United States of America who served overseas with the allied armies be given same preference and credits in United States civil-service examinations as if they had served as soldiers of the United States of America in the World War, Spanish-American War, or the Philippine insurrection; to the Committee on the Civil Service.

By Mr. BUCK: A bill (H.R. 8475) to provide that transferors for collection of negotiable instruments shall be preferred creditors of national banks in certain cases; to the Committee on Banking and Currency.

By Mr. CHAVEZ: A bill (H.R. 8476) for the economic rehabilitation of the Mescalero Indians of New Mexico; to the Committee on Indian Affairs.

By Mr. RANDOLPH: A bill (H.R. 8477) authorizing the State Road Commission of West Virginia to construct, maintain, and operate a toll bridge across the Potomac River at or near Shepherdstown, Jefferson County, W.Va.; to the Committee on Interstate and Foreign Commerce.

By Mr. WALTER: A bill (H.R. 8478) to exempt certain articles from the tax on floor stocks imposed by the Agricultural Adjustment Act; to the Committee on Agriculture.

By Mr. McLEOD: A bill (H.R. 8479) to promote resumption of industrial activity, increase employment, and restore confidence by fulfillment of the implied guaranty by the United States Government of deposit safety in national banks; to the Committee on Banking and Currency.

By Mr. PEYSER: A bill (H.R. 8480) to amend the Trading with the Enemy Act; to the Committee on Interstate and Foreign Commerce.

By Mr. CHAPMAN: A bill (H.R. 8481) to amend the act entitled "An act to provide for the collection and publication of statistics of tobacco by the Department of Agriculture", approved January 14, 1929, as amended; to the committee on Agriculture.

By Mr. FISH: Resolution (H.Res. 291) requesting the names and addresses of all persons and corporations who own tax-exempt securities in the amount of $100,000, or over; to the Committee on Ways and Means.

MEMORIAL

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Kentucky, urging the passage of a bill providing for the immediate payment of the adjusted-compensation certificates due the World War veterans; to the Committee on World War Veterans' Legislation.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BECK: A bill (H.R. 8482) conferring jurisdiction upon the Court of Claims of the United States to hear, consider, and render judgment on certain claims of George A. Carden and Anderson T. Herd; to the Committee on Claims.

By Mr. CONNOLLY: A bill (H.R. 8483) for the relief of Frank Rote; to the Committee on Military Affairs.

By Mr. CARTER of California: A bill (H.R. 8484) for the relief of Albert C. Moe; to the Committee on the Judiciary.

By Mr. DARDEN: A bill (H.R. 8485) for the relief of Linda Wright Ward; to the Committee on Claims.

By Mr. KNUTE HILL: A bill (H.R. 8486) for the relief of A. L. Ostrander; to the Committee on Claims.

By Mr. PETERSON: A bill (H.R. 8487) granting a pension to Sarah Hampton; to the Committee on Pensions.

Also, a bill (H.R. 8488) granting a pension to Kathryn E. Fraley; to the Committee on Invalid Pensions.

By Mr. REECE: A bill (H.R. 8489) to extend the benefits of the Employees' Compensation Act of September 7, 1916, to Robert Judson McGarry; to the Committee on Claims.

By Mr. WILCOX: A bill (H.R. 8490) granting a pension to Emma Washburn; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

2748. By Mr. ANDREW of Massachusetts: Resolutions adopted by the General Court of Massachusetts, urging that the immigration quotas be increased so as to enable persecuted Jewish people in Germany to enter the United States; to the Committee on Immigration and Naturalization.

2749. By Mr. AYERS of Montana: Petition of C. N. Clark, of Bonner, and sundry other citizens of Bonner and Great Falls, Mont., praying for repeal or modification of the fourth section of the Interstate Commerce Act; to the Committee on Interstate and Foreign Commerce.

2750. By Mr. BEITER: Petition of Erie County committee of the American Legion, Buffalo, N.Y., urging Congress to change regulations which prohibit veterans who are receiving compensation from sitting on adjudication boards unless they waive their rights to such compensation, so that such veterans may be permitted to sit on such boards without being required to waive their rights to compensation; to the Committee on World War Veterans' Legislation.

2751. By Mr. BOYLAN: Resolutions adopted by the Chamber of Commerce of the State of New York, opposing certain provisions of the National Securities Exchange Act; to the Committee on Banking and Currency.

2752. Also, letter from the National Committee on Wild Life Legislation, urging the passage of Senate bills 2277, 2529, and 2633; to the Committee on Agriculture.

2753. Also, letter from the American Ice Co., Jersey City, N.J., protesting against provisions of the proposed National Securities Exchange Act of 1934, which provides drastic regulation of the business and affairs of corporations whose securities are listed on the stock exchange; to the Committee on Banking and Currency.

2754. By Mr. CARTER of California: Petition of James S. Britt, Albert E. Strand, Benjamin F. Straight, and 46 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2755. Also, petition of J. C. Macauley, Frank Lentz, Edward Armour, and 46 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2756. Also, petition of Thomas F. Dolan, Henry White, Roy J. Johnson, and 47 others, residents of Alaska County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2757. Also, petition of H. E. Selby, John Weidlein, Henry Stevens, and 20 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2758. Also, petition of Joseph H. Montgomery, George Pringle, Evangeline Duarte, and 34 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2759. Also, petition of E. J. Callahan, George Smith, Joseph S. Moreno, and 45 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2760. Also, petition of Lou Ryan, Leland Chapman, Paul W. Kelly, and 48 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2761. Also, petition of Laura E. Lines, Joseph C. Clark, Beatrice Harlow, and 37 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2762. Also, petition of George S. Hamlin, J. L. Dailey, J. E. Morgan, and 47 others, residents of Alameda County, Calif., urging restoration of benefits to Spanish-American War veterans and their dependents; to the Committee on Pensions.

2763. By Mr. KINZER: Resolution from the Society of Friends of West Chester, Pa., petitioning for higher moral standards for films entering interstate and international commerce; to the Committee on Interstate and Foreign Commerce.

2764. By Mr. LAMBERTSON: Resolution of the Allied Independent Railroad Labor Organizations, Western District, urging amendments to Senate bill 2651 and House bill 7650; to the Committee on Interstate and Foreign Commerce.

2765. By Mr. McCORMACK: Memorial of the General Court of Massachusetts, urging the increasing of the existing immigration quotas for the purpose of enabling persecuted Jewish people in Germany to enter the United States; to the Committee on Immigration and Naturalization.

2766. By Mr. MEAD: Petition of Columbia County Rural Letter Carriers Association, Wyocena, Wis., urging full pay restoration and an adequate equipment allowance; to the Committee on Post Office and Post Roads.

2767. By Mr. ROMJUE: Petition of the Goad-Ballinger Post, No. 69, American Legion, of Springfield, Mo., demanding of Congress the immediate cash payment of the adjusted-compensation certificates or bonus, and that same shall be paid without deductions therefrom for interest on loans previously made thereon; to the Committee on World War Veterans' Legislation.

2768. By Mr. SABATH: Resolution adopted by Local Union No. 1, Chicago, Ill., United Brotherhood of Carpenters and Joiners of America, memorializing Congress to enact legislation establishing a universal 30-hour week; to the Committee on Labor.

2769. By Mr. SHANNON: Petition of C. H. Darnell, commander Lieutenant Jules G. Ord Camp, No. 45, United Spanish War Veterans, and over 1,500 other qualified voters of Kansas City, Mo., requesting all members of the House of Representatives to support the Steiwer-McCarran amendment to the independent offices appropriation bill; to the Committee on Appropriations.

2770. By Mr. TREADWAY: Petition of Miss Caroline Goodyear and other residents of Great Barrington, Mass., protesting against the Vinson naval construction bill; to the Committee on Naval Affairs.

2771. Also, resolutions of the General Court of Massachusetts, relative to increasing immigration quotas so as to enable persecuted Jewish people in Germany to enter the United States; to the Committee on Immigration and Naturalization.

2772. By Mr. WOLCOTT: Petition of Earl M. Doig and 52 others, opposing the Fletcher-Rayburn bill, S. 2693 and H.R. 7852, for the reason that it will seriously restrict credit facilities; to the Committee on Interstate and Foreign Commerce.

2773. By the SPEAKER: Petition of the city of Dearborn, Mich., concerning the payment of the soldiers' bonus; to the Committee on World War Veterans' Legislation.

SENATE

TUESDAY, MARCH 6, 1934

(Legislative day of Wednesday, Feb. 28, 1934)

The Senate met at 11 o'clock a.m., on the expiration of the recess.

THE JOURNAL

On motion of Mr. ROBINSON of Arkansas, and by unanimous consent, the reading of the Journal for the calendar days Thursday, March 1, and Monday, March 5, was dispensed with, and the Journal was approved.

CALL OF THE ROLL

Mr. ROBINSON of Arkansas. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Couzens	Kean	Reynolds
Ashurst	Cutting	Keyes	Robinson, Ark.
Austin	Davis	King	Robinson, Ind.
Bachman	Dickinson	La Follette	Russell
Bailey	Dill	Lewis	Schall
Bankhead	Duffy	Logan	Sheppard
Barbour	Erickson	Lonergan	Shipstead
Barkley	Fess	Long	Steiwer
Black	Fletcher	McAdoo	Stephens
Bone	Frazier	McCarran	Thomas, Okla.
Borah	George	McGill	Thomas, Utah
Brown	Gibson	McKellar	Thompson
Bulkley	Glass	McNary	Townsend
Bulow	Goldsborough	Murphy	Trammell
Byrd	Gore	Neely	Tydings
Byrnes	Hale	Norris	Vandenberg
Capper	Harrison	Nye	Van Nuys
Caraway	Hastings	O'Mahoney	Wagner
Carey	Hatch	Overton	Walcott
Clark	Hatfield	Patterson	Walsh
Connally	Hayden	Pittman	Wheeler
Coolidge	Hebert	Pope	White
Costigan	Johnson	Reed	

Mr. ROBINSON of Arkansas. I desire to announce that the Senator from New York [Mr. COPELAND] and the Senator from Illinois [Mr. DIETERICH] are unavoidably detained from the Senate. I desire further to announce that the Senator from South Carolina [Mr. SMITH] is absent from the Senate because of a death in his family.

Mr. HEBERT. I desire to announce that my colleague the senior Senator from Rhode Island [Mr. METCALF] and the Senator from South Dakota [Mr. NORBECK] are necessarily absent.

The VICE PRESIDENT. Ninety-one Senators have answered to their names. A quorum is present.

PETITIONS

The VICE PRESIDENT laid before the Senate a resolution adopted by beet-growing members of Weld County local of the Colorado Farmers' Protective Association, favoring the passage of legislation giving the President authority to alter or amend sugar quotas as he may deem necessary, which was referred to the Committee on Finance.

Mr. ROBINSON of Arkansas presented a letter from W. C. Fordyce, of St. Louis, Mo., relative to the regulation of security markets, which was referred to the Committee on Banking and Currency.

PAYLESS FURLOUGHS OF POSTAL CLERKS

Mr. WALSH presented a telegram from Emmett J. Whelan, president, Boston (Mass.) Post Office Clerks Union, which was referred to the Committee on Post Offices and Post Roads and ordered to be printed in the RECORD, as follows:

BOSTON, MASS., *March 5, 1934.*

Hon. DAVID I. WALSH,
United States Senate, Washington, D.C.:

Sixteen hundred Boston postal clerks' families urge you make vigorous protest against Postmaster General Farley's 4-day payless furlough atop existing 15-percent pay cut. This policy unwarranted and inconsistent with President Roosevelt's appeal today for higher wages and consideration for those receiving $2,000 or less.

EMMETT J. WHELAN,
President Boston Post Office Clerks Union.

THE 40-HOUR WEEK

Mr. WALSH presented a telegram from J. F. Downey, executive secretary of the Cambridge (Mass.) Industrial Association, which was referred to the Committee on Education and Labor and ordered to be printed in the RECORD, as follows:

CAMBRIDGE, MASS., *March 5, 1934.*

Senator DAVID I. WALSH,
United States Senate, Washington, D.C.:

A questionnaire submitted by this association to the industrial firms of Cambridge places substantially all industry in the city as opposed to any reduction in the present 40-hour week. Replies prove reduction will diminish sales and put some concerns out of business. Shorter week will develop little new employment. As our representative in Congress we fully expect your judgment will be in keeping with opinions expressed by these industries that are doing their utmost to employ as many people as possible at best wages possible.

THE CAMBRIDGE INDUSTRIAL ASSOCIATION,
J. F. DOWNEY, *Executive Secretary.*

PAYMENT OF SO-CALLED "SOLDIERS' BONUS"

Mr. LOGAN presented a letter from the chief clerk of the Kentucky Senate, embodying a resolution adopted by the Legislature of the State of Kentucky, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

KENTUCKY SENATE,
OFFICE OF CHIEF CLERK,
Frankfort, Ky., February 28, 1934.

Hon. M. MILLS LOGAN,
Member of Congress, Washington, D.C.

DEAR SIR: The following resolution was adopted by the Kentucky State Senate, the House of Representatives concurring therein:

JOINT RESOLUTION

"Whereas the Congress of the United States has heretofore passed what is known as the 'Adjusted Compensation Act' for the benefit of World War soldiers, sailors, marines, and nurses, and has under said act issued adjusted-compensation certificates to said World War veterans, which said certificates are due in 1945; and

"Whereas, largely on account of the depression, a great number of those holding these adjusted-compensation certificates have found it necessary to borrow money thereon and are re-

quired to pay interest upon money which the Government has acknowledged that it owes them; and

"Whereas the necessity for the relief of the said veterans and their families is greater today than ever in history, and probably greater than it will be in 1945, when many of them will be dead and unable to enjoy the benefits of the money due them; and

"Whereas it is the policy of the President and the Congress of the United States to increase the spending power of the Nation and the citizens thereof through various agencies established by the Congress, and for this purpose the expenditure of large sums from public funds has heretofore been authorized by Congress; and

"Whereas no better way is known for the accomplishment of this purpose than the payment in cash of the face value of the said adjusted-compensation certificates at the present time, which, while serving the purpose of paying off an existing Government indebtedness, will serve to circulate cash in every community, town, and city of the land, no matter how small or how great, thereby increasing the spending power of the people in every community, town, and city; and

"Whereas by doing this the Government will recognize a just obligation to its former soldiers and bring happiness and some degree of prosperity to millions of soldier homes: Therefore be it

"Resolved by the Senate of Kentucky (the house of representatives concurring therein):

"SECTION 1. That the President of the United States, the Congress thereof, and especially the Senators and Representatives from Kentucky be, and they are hereby, respectfully memorialized, petitioned, and urged to use their best efforts and vote for the passage of a bill now pending in Congress providing for the immediate payment of the adjusted-compensation certificates due the World War veterans.

"SEC. 2. The clerk of the senate is hereby directed to send a certified copy of this resolution to the President of the United States, to the clerks of the Senate and of the House of Representatives of the Congress of the United States, and a copy to each Senator and Member of the House of Representatives from Kentucky."

Respectfully submitted.

BYRON H. ROYSTER,
Chief Clerk of Senate.

FEDERAL EMERGENCY RELIEF IN ARIZONA

Mr. ASHURST presented a letter from the Assistant Federal Emergency Relief Administrator, which was ordered to lie on the table and to be printed in the RECORD, as follows:

FEDERAL EMERGENCY RELIEF ADMINISTRATION,
Washington, February 28, 1934.

Hon. HENRY F. ASHURST,
United States Senate, Washington, D.C.

MY DEAR SENATOR ASHURST: I am in receipt of your letter of February 24. We are putting into Arizona for transient care something like $250,000 per month, more than in any other State in the Union, more than we are putting into Mississippi, Arkansas, Louisiana, Tennessee, and Missouri combined.

Very truly yours,

AUBREY WILLIAMS,
Assistant Administrator.

AIR-MAIL CONTRACTS

Mr. BARBOUR. Mr. President, I ask unanimous consent to have printed in full in the RECORD a letter which I have received from Mr. Fred G. Tauber, of Jersey City, N.J., with reference to the authority of the United States Army to carry the mail.

There being no objection, the letter was ordered to lie on the table and to be printed in the RECORD, as follows:

NEW YORK, *March 1, 1934.*

Hon. W. WARREN BARBOUR,
Senate Office, Washington, D.C.

MY DEAR SENATOR: As a citizen and one of your constituents, I am writing this letter in protest against the useless and wanton sacrifice of life brought about by the hasty determination on the part of our bureaucratic administration to cancel air-mail contracts. This, in spite of the fact that none of the private mail carriers have had their day in court or a hearing which would give them an opportunity to present their side of the story. Even a murderer is entitled to his day in court, and certainly the same treatment ought to be accorded to respectable citizens engaged in the carrying of the mails under contract with their Government. I feel that Army aviators, who sacrificed their lives due to such hasty action, were forced to brave the elements with inadequate equipment, not in line of duty but in line of politics.

All of this has been thoroughly discussed in the press, but there is one further matter I desire to call to your attention which, insofar as I know, has thus far not been considered. In reviewing the United States Statutes, it is my humble opinion that there are specific violations of law on the part of the Postmaster General in utilizing the Army for the carrying of mails. While the President of the United States, under the Constitution, is "Commander in Chief of the Army and Navy of the United States, and of the militia of the several States, when called into the actual service of the United States", he, nevertheless, has only such powers to use the Army or Navy as directed by Congress, for, under the Constitution, Congress alone is empowered "to make rules for the government and regulations of the land and naval forces." So that, while the President is the Commander in Chief, he must command the Army and Navy as directed by Congress, and whenever Congress desires the Army or the Navy to perform duties beyond the scope of regular military service, it, by law, specifically authorizes such service. Some of the duties specifically authorized by Congress are the following:

Assistance to foreign governments.
Assignment for instruction of National Guard.
Assistants to Director of Public Buildings and Public Parks.
Number of officers to be detailed to the Bureau of the Budget.
Chiefs of staff of division of National Guard.
Coast and Geodetic Survey work.
Duty with National Guard.
Officers of the Engineer Corps detailed to Federal Water Power Commission.
Officers detailed as Indian agents.
Officers detailed to Indian education.
Officers detailed to educational institutions in military instruction.
Officers detailed to instruct officers of the National Guard.
Officers detailed for promotion of civil aviation.
Officers detailed to work on Federal-aid, highways, and numerous others.

Why specific authorization was not obtained by the administration before this order was promulgated is beyond comprehension. Such course can only indicate two things: (1) That the administration has gone so bureaucratic and has become so drunk with power as to deliberately omit such a minor detail as to ask Congress whether or not they may do so, or (2) that the administration now considers Congress a sublimated rubber stamp for it and considers its ability to obtain such authorization for the mere asking at any time merely as a matter of form. It is true that some years ago during a railroad strike the Army was used for the carrying of the mail, but there was a real emergency. A strike was had and all mail had ceased moving, and therefore the public welfare was at stake; industry and business was faced with a standstill. A real emergency existed—not a mere imaginary one.

What, may I ask, was the emergency that prompted the calling of the Army into service to carry the mails? If, as stated by the President in his proclamation, it is an emergency, it then certainly is now created by the present administration when canceling the contracts summarily. Suffice it to say that unless and until the Government moves to annul the contracts allegedly to have been entered into by fraud in a court of equity no emergency exists.

It is true that under the statute whenever the Postmaster General finds that a contract has been entered into by fraud, he has the power to annual such contracts. But such power is not an arbitrary one, nor may it be arbitrarily used in the manner as employed in the instant case. No one condones graft or corruption, but if such existed it is an easy matter to bring the guilty party before the bar without engaging in a political fishing exhibition, as well as condemning an entire industry without giving them their day in court.

I further desire to point out that the Government had adequate remedy in a court of law to establish its damage if the charges provided in the contracts were exorbitant and fixed fraudulently. It could also have protected itself against further damage by an appropriate action on the contracts in a court of equity. However, now the Army is being used to obviate a civil action. In other words, a military collection agency. The danger of such procedure is obvious. Could not the President call upon the Army or the Navy to take over other activities such as carrying mails by railroad should the Chairman of the Reconstruction Finance Committee merely believe that some of the moneys loaned to the railroads were granted on the basis of fraudulent application? Or, could not the President call upon the Navy to carry mails by water, if the Postmaster General should imagine that the ocean-mail contracts, which everyone knows are nothing but a form of subsidy, have been entered into fraudulently? However, be that as it may, the Army may not be used for any and all purposes. Congress specifically provided that:

"It shall not be lawful to employ any part of the Army of the United States as a posse comitatus, or otherwise, for the purpose of executing the laws, except in such cases and under such circumstances as such employment of said force may be expressly authorized by the Constitution or by act of Congress; and any persons willfully violating the provisions of this section shall be deemed guilty of a misdemeanor and on conviction thereof shall be punished by fine not exceeding $10,000, or imprisonment not exceeding 2 years, or by both such fine and imprisonment" (U.S.C., title 10, sec. 15, p. 170).

Further consideration should be given to the fact that due to the cancelation of such air-mail contracts many of the lines have curtailed their passenger service. I know that Eastern Air Lines flying between New York and Washington have cut their schedule approximately one third. This will ultimately result, beyond a doubt, in a curtailment of personnel, such as pilots, copilots, radio operators, airplane mechanics, engineers, mechanics, reserve pilots, meteorologists, clerical forces, and such other help as may now be employed. In that phase of the question, our State is vitally interested. We have one of the largest airports in the eastern section of the United States. That is Port Newark, which serves as a terminal for planes flying between the south, west, north, and east. The Army has sent its enlisted men, such as mechanics,

etc., to Port Newark to service the Army planes which carry the mail. Such mail had heretofore been carried by the private carriers, but since the cancelation of the mail contracts their staff has been curtailed and, therefore, the enlisted men of the Army if not directly certainly indirectly are replacing men who have been discharged due to the curtailed schedule brought about by the loss of the mails.

Congress specifically provided that—

"No enlisted men in the active service of the United States in the Army, whether a noncommissioned officer, musician, or private, shall be detailed, ordered, or permitted to leave his post to engage in any pursuit, business, or performance in civil life, for emolument, hire, or otherwise, when the same shall interfere with the customary employment and regular engagement of local civilians in their respective arts, trades, or professions" (U.S.C., title 10, sec. 609, p. 192).

The mere fact that we are at the present time passing through an economic depression should have prompted the administration to take into consideration the resultant loss of employment to part of the staff in the air lines. While there are still approximately 12,000,000 people unemployed in this country, and while the administration is creating imaginary employment for thousands of people under the C.W.A., part of the enlisted men of the United States Army should not have been called upon to compete with some of the citizens of our State, throwing them out of employment, even if there were no statute prohibiting such employment on the part of enlisted men. But to directly violate the statute, in my humble opinion, and detail enlisted men from the service to replace civilians of our State who are gainfully employed, is a matter which should commend itself to the serious consideration of the Members of Congress.

In debates before the Senate on February 26, Senator ROBINSON of Indiana said:

"Mr. President, just a concluding word. I understand there is a bill pending before the Congress, discussed in the House of Representatives last Saturday, by which, for some cause or other which I do not pretend to understand, the administration now wants Congress to share the responsibility for this high-handed action which has been taken which resulted in the deaths of all these Army pilots in the service of the United States Government. Of course, such a bill should be defeated—there is no question about that—and I suppose it will be discussed thoroughly when it reaches the floor of the Senate" (CONGRESSIONAL RECORD, p. 3184).

It seems to me that the answer to the query is contained in my letter. The administration had no authority to use the Army and now desires to supply the necessary authority to complete the program.

If the action of canceling air-mail contracts was not motivated by political consideration, why, then, did the Postmaster General refuse to accept the offer of the president of the Eastern Air Lines to run the mails for 30 days without cost to the Government in the event it is proven that the contracts were fraudulently entered into. Or, if the Government did not desire to have the mail carried under the offered conditions, that is, free of charge, it could have agreed with the air lines to dispatch the mail on a quantum meruit basis.

With kindest personal regards, I am,

Respectfully yours,

FRED G. TAUBER.

REPORTS OF COMMITTEES

Mr. FRAZIER, from the Committee on Indian Affairs, to which was referred the bill (S. 1135) to amend section 1 of the act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes", approved June 25, 1910, as amended, reported it with an amendment and submitted a report (No. 410) thereon.

He also, from the same committee, to which was referred the bill (S. 2425) to repeal the act entitled "An act to grant to the State of New York and the Seneca Nation of Indians jurisdiction over the taking of fish and game within the Allegany, Cattaraugus, and Oil Spring Indian Reservation", approved January 5, 1927, reported it without amendment and submitted a report (No. 411) thereon.

Mr. DUFFY, from the Committee on Military Affairs, to which was referred the bill (H.R. 1015) for the relief of Frank D. Whitfield, reported it without amendment and submitted a report (No. 409) thereon.

Mr. COOLIDGE, from the Committee on Military Affairs, to which was referred the bill (H.R. 891) for the relief of Albert N. Eichenlaub, alias Albert N. Oakleaf, reported it without amendment and submitted a report (No. 412) thereon.

Mr. DICKINSON, from the Committee on Military Affairs, to which was referred the bill (S. 557) for the relief of John Ernst, reported it without amendment and submitted a report (No. 413) thereon.

ENROLLED BILLS PRESENTED

Mrs. CARAWAY, from the Committee on Enrolled Bills, reported that on the 5th instant that committee presented to the President of the United States the following enrolled bills:

S. 2. An act for the relief of C. M. Williamson; Mrs. Tura Liljenquist, administratrix of C. E. Liljenquist, deceased; Lottie Redman; and H. N. Smith;

S. 406. An act for the relief of Warren J. Clear;

S. 750. An act for the relief of the Lebanon Equity Exchange, of Lebanon, Nebr.;

S. 751. An act authorizing the Secretary of the Treasury of the United States to refund to the Farmers' Grain Co., of Omaha, Nebr., income taxes illegally paid to the United States Treasurer;

S. 1069. An act authorizing adjustment of the claim of the Chicago, North Shore & Milwaukee Railroad Co.;

S. 1074. An act authorizing adjustment of the claims of John T. Lennon and George T. Flora;

S. 1087. An act authorizing adjustment of the claim of William T. Stiles;

S. 1115. An act to authorize the Department of Agriculture to issue a duplicate check in favor of Department of Forests and Waters, Commonwealth of Pennsylvania, the original check having been lost;

S. 1347. An act for the relief of Little Rock College, Little Rock, Ark.;

S. 1426. An act for the relief of the estate of Benjamin Braznell;

S. 1496. An act for the relief of Nannie Swearingen;

S. 1724. An act authorizing the reimbursement of Edward B. Wheeler and the State Investment Co. for the loss of certain lands in the Mora Grant, N.Mex.;

S. 1782. An act for the relief of the B. & O. Manufacturing Co.;

S. 2201. An act for the relief of the Neill Grocery Co.; and

S. 2766. An act to extend the period during which direct obligations of the United States may be used as collateral security for Federal Reserve notes.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. CAREY (by request):

A bill (S. 2952) authorizing enlistment in the Army for a limited period and intensive military training of boys recently graduated from high school, or young men recently enrolled as students in college, and for other purposes; to the Committee on Military Affairs.

By Mr. McKELLAR:

A bill (S. 2953) granting the consent of Congress to the highway department of the State of Tennessee to construct, maintain, and operate a free highway bridge across the Cumberland River at or near Carthage, Smith County, Tenn.; to the Committee on Commerce.

By Mr. GEORGE:

A bill (S. 2954) for the relief of Homer H. Adams; to the Committee on Claims.

By Mr. McADOO:

A bill (S. 2955) relating to advances to Federal Reserve member banks on time or demand notes, loans on real estate by national banks, shareholders' liability on national-bank stock, and for other purposes; to the Committee on Banking and Currency.

A bill (S. 2956) to provide for the appointment of two additional district judges for the southern district of California and for the southern district of New York, and for other purposes; to the Committee on the Judiciary.

By Mr. BULOW (by request):

A bill (S. 2957) for the relief of the rightful heirs of Wakicunzewin, an Indian; to the Committee on Indian Affairs.

By Mr. ROBINSON of Indiana:

A bill (S. 2958) to correct the military record of Anson W. Oden; to the Committee on Military Affairs.

A bill (S. 2959) granting a pension to Amanda Bastian;

A bill (S. 2960) granting a pension to Susan Harris;

A bill (S. 2961) granting a pension to Mary E. Troutman;

A bill (S. 2962) granting a pension to Gertrude Daly (with accompanying papers);

A bill (S. 2963) granting a pension to Caroline E. Harris (with accompanying papers);

A bill (S. 2964) granting a pension to Emma J. Johnson (with accompanying papers); and

A bill (S. 2965) granting a pension to Fred L. Long (with accompanying papers); to the Committee on Pensions.

By Mr. GOLDSBOROUGH and Mr. TYDINGS:

A bill (S. 2966) to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the founding of the Province of Maryland; to the Committee on Banking and Currency.

By Mr. THOMAS of Oklahoma:

A bill (S. 2967) for the relief of Mrs. Olin H. Reed; to the Committee on Claims.

(Mr. PITTMAN introduced Senate bill 2968, which appears under a separate heading.)

By Mr. BYRNES:

A bill (S. 2969) for the relief of the Mary Black Memorial Hospital; to the Committee on Claims.

LIQUIDATION OF CLOSED BANKS

Mr. PITTMAN. I ask leave to introduce a bill to relieve depositors of banks now in the hands of receivers or conservators to which the Reconstruction Finance Corporation made loans.

The VICE PRESIDENT. Without objection, the bill will be received and appropriately referred.

Mr. PITTMAN. Mr. President, as I consider it a matter of considerable importance dealing with the liquidation of closed banks, I ask to have the bill printed in the RECORD.

The bill (S. 2968) to relieve depositors of banks now in the hands of receivers or conservators to which the Reconstruction Finance Corporation made loans, to restore confidence by fulfillment of the implied guaranty by the United States Government of depositors in such banks, to promote industrial and business recovery, and to increase employment and purchasing power, was read twice by its title, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That the Reconstruction Finance Corporation be, and is hereby, authorized and directed to purchase, acquire, and receive from the receiver or receivers and/or conservator or conservators of a bank or banks now in the possession or control of such receivers and/or conservators, all the remaining assets of banks to which the Reconstruction Finance Corporation made loans prior to such banks going into the hands and control of such receivers and/or conservators in sums of money in excess of 20 percent of the total deposits of such banks at the time of the final loan or loans to such banks.

The Reconstruction Finance Corporation, upon receipt of such remaining assets from such bank or banks, and upon application by the receivers and/or conservators of such bank or banks, shall immediately make available to such receivers and/or conservators as payment for such assets funds sufficient to pay 50 percent of the total deposit liability of such bank or banks at the time such assets are acquired and received by the Reconstruction Finance Corporation.

SEC. 2. Such receivers and/or conservators upon the making available of such funds for payment to the depositors shall immediately disburse such funds pro rata to the depositors of such bank or banks for which they are receivers and/or conservators.

SEC. 3. The receiver or receivers and/or conservator or conservators charged with the disbursement of such funds shall immediately after such funds have all been disbursed proceed without delay to make and file their final reports. Upon the filing and approval of the final report of the said receiver or receivers and/or conservator or conservators they shall cease to act as receiver or receivers and/or conservator or conservators and shall be discharged.

SEC. 4. The assets so purchased shall be liquidated by the Reconstruction Finance Corporation and, with the exception of assets in the form of unsecured notes, the Reconstruction Finance Corporation shall allow debtors a period of not to exceed 10 years in which to pay their indebtedness as evidenced by such assets. The Reconstruction Finance Corporation shall have full discretion concerning terms of liquidation of assets in the form of unsecured notes and may, when it deems such a course advisable, insist upon such terms of payment and such additional security from the debtor as it may demand.

As funds, over and above the 50 percent made available under section 1 of this act, become available by liquidation and after pro rata expenses of liquidation are paid, the Reconstruction Finance Corporation shall pay such funds to such depositors pro rata, either directly or through such agencies as it may establish or designate.

SEC. 5. Regardless of any previous contract or agreement on the part of any person, the rate of interest paid to the Reconstruction Finance Corporation on such assets by the debtors, shall be reduced to 5 percent per annum and that for the purposes of this act, any statute of limitations shall be waived and held not to apply to any transaction referred to or covered by the provisions of this act. Nothing herein contained, however, shall prevent any debtor from anticipating payment on any such indebtedness.

SEC. 6. The Reconstruction Finance Corporation is authorized in its discretion to recognize any assignee of any depositor as a depositor under this act, and upon such recognition by the Reconstruction Finance Corporation such assignee shall be entitled to all the benefits and privileges conferred upon a depositor by this act.

UNSOLICITED MERCHANDISE IN THE MAILS—AMENDMENT

Mr. GOLDSBOROUGH submitted an amendment intended to be proposed by him to the bill (S. 2101) to prohibit the sending of unsolicited merchandise through the mails, which was ordered to lie on the table and to be printed.

AMENDMENT OF AGRICULTURAL ADJUSTMENT ACT

Mr. CONNALLY and Mr. LA FOLLETTE each submitted an amendment intended to be proposed by them, respectively, to the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes, which were ordered to lie on the table and to be printed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House had passed the following bills and joint resolution, in which it requested the concurrence of the Senate:

H.R. 1626. An act granting equipment allowance to third-class postmasters;

H.R. 3842. An act to provide for the deportation of certain alien seamen, and for other purposes;

H.R. 5075. An act to amend section 1 of the act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes", approved June 25, 1910, as amended;

H.R. 5632. An act to supplement and support the Migratory Bird Conservation Act by providing funds for the acquisition of areas for use as migratory-bird sanctuaries, refuges, and breeding grounds, for developing and administering such areas, for the protection of certain migratory birds, for the enforcement of the Migratory Bird Treaty Act and regulations thereunder, and for other purposes;

H.R. 6185. An act fixing the date for holding elections of a Delegate from Alaska to the House of Representatives and of members of the Legislature of Alaska; fixing the date on which the Legislature of Alaska shall hereafter meet; prescribing the personnel of the Territorial Canvassing Board, defining its duties, and for other purposes;

H.R. 8046. An act to provide a penalty for the knowing or willful presentation of any false written instrument relating to any matter within the jurisdiction of any department or agency of the Government with intent to defraud the United States;

H.R. 8208. An act to provide for the exploitation for oil, gas, and other minerals on the lands comprising Fort Morgan Military Reservation, Ala.; and

H.J.Res. 290. Joint resolution to provide an appropriation to carry into effect the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (S. 1759) to revive and reenact the act entitled "An act granting the consent of Congress to the Mill Four Drainage District in Lincoln County, Oreg., to construct, maintain, and operate dams and dikes to prevent the flow of waters of Yaquina Bay and River into

Nutes Slough, Boones Slough and sloughs connected therewith", approved June 17, 1930, and it was signed by the Vice President.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries.

HOUSE BILLS AND JOINT RESOLUTION REFERRED

The following bills and joint resolution were severally read twice by their titles and referred as indicated below:

H.R. 1626. An act granting equipment allowance to third-class postmasters; to the Committee on Post Offices and Post Roads.

H.R. 3842. An act to provide for the deportation of certain alien seamen, and for other purposes; to the Committee on Immigration.

H.R. 5075. An act to amend section 1 of the act entitled "An act to provide for determining the heirs of deceased Indians, for the disposition and sale of allotments of deceased Indians, for the leasing of allotments, and for other purposes", approved June 25, 1910, as amended; to the Committee on Indians Affairs.

H.R. 5632. An act to supplement and support the Migratory Bird Conservation Act by providing funds for the acquisition of areas for use as migratory-bird sanctuaries, refuges, and breeding grounds, for developing and administering such areas, for the protection of certain migratory birds, for the enforcement of the Migratory Bird Treaty Act and regulations thereunder, and for other purposes; to the Special Committee on Conservation of Wild Life Resources.

H.R. 6185. An act fixing the date for holding elections of a Delegate from Alaska to the House of Representatives and of members of the Legislature of Alaska; fixing the date on which the Legislature of Alaska shall hereafter meet; prescribing the personnel of the territorial Canvassing Board, defining its duties, and for other purposes; to the Committee on Territories and Insular Affairs.

H.R. 8208. An act to provide for the exploitation for oil, gas, and other minerals on the lands comprising Fort Morgan Military Reservation, Ala.; to the Committee on Military Affairs.

H.J.Res. 290. Joint resolution to provide an appropriation to carry into effect the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934; to the Committee on Appropriations.

NOMINATION OF ROBERT H. JACKSON—AGREEMENT FOR EXECUTIVE SESSION

Mr. HARRISON. Mr. President, I desire to propose a unanimous-consent agreement which is intended really to accommodate a Senator who is not very well.

I ask that at 2 o'clock tomorrow the Senate go into executive session to consider the nomination of Robert H. Jackson to be general counsel of the Bureau of Internal Revenue. I may say that I think it will take but a few minutes to dispose of the nomination.

Mr. McNARY. Mr. President, that is entirely agreeable.

There being no objection, the unanimous-consent agreement was reduced to writing and entered, as follows:

Ordered, That at 2 o'clock p.m. tomorrow (Mar. 7, 1934) the Senate go into executive session to consider the nomination of Robert H. Jackson, to be general counsel, Bureau of Internal Revenue.

ROOSEVELT'S APPEAL

Mr. GOLDSBOROUGH. Mr. President, I ask unanimous consent to have inserted in the RECORD an editorial from Baltimore Sun of today entitled "Roosevelt's Appeal."

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Baltimore Sun, Mar. 6, 1934]

ROOSEVELT'S APPEAL

President Roosevelt's address before the gathering of N.R.A. code authorities in Washington suggests that he has made little progress toward further and real understanding of the social and economic implications of his recovery program. His appeal had a distinctly familiar ring. On June 16, when he signed the recovery act, and upon other occasions at about the same time, he addressed several messages to business men in particular and the public in general that were of like tenor to his latest speech.

Everybody, he declared 9 months ago, as he declared again on Monday, must do his part to make the recovery program a success. Business must be high-minded and altruistic. It must employ more workers, pay them more money, and so, by increasing the total purchasing power, contribute to its own welfare. Small business enterprises must be protected. The interests of the consumers must be carefully guarded, and the consumers themselves must do their part by patronizing only those manufacturers and merchants who are cooperating in the recovery campaign upon the terms laid down by the Roosevelt administration.

It is a little strange that after 9 months of effort it should still be found necessary to issue another appeal of this nature to the public. If nothing else, it strongly indicates that the desired cooperation has not been forthcoming. Indeed, in the last paragraph of his speech, the President indirectly admitted as much when he said:

"We have been seeking experience in our first 8 months of code making; for that same reason we have been tolerant of certain misunderstandings even when they resulted in evasions of the spirit if not the letter of the law. Now we are moving into a period of administration when that which is law must be made certain and the letter and the spirit must be fulfilled. We cannot tolerate actions which are clearly monopolistic, which wink at unfair trade practices, which fail to give to labor free choice of their representatives, or which are otherwise hostile to the public interest."

In other words, the President is here in effect saying that there have been evasions, and that his repeated appeals for cooperation have not been heeded by everyone. Are we to suppose that still another plea along the same familiar lines will meet with any different response?

Lest anyone be misled by Mr. Roosevelt's moderate language into believing that what he called "evasions in spirit" have been few and far between, it is necessary to refer to the report of the Consumers' Advisory Board issued on Sunday. This report, dealing mainly with price fixing under the N.R.A. codes, shows clearly to what considerable extent these evasions in spirit have been taking place. It flatly asserts that in some industries there has been a tendency to forget the recovery program in their own interests.

The Consumers' Board said it has "evidence indicating that a number of industries have increased prices more than can be justified by increased wage payments under the N.R.A.", a practice "which our observations indicate may have retarded the recovery program." In several instances "there have been efforts to establish uniform prices without code sanction." Low-cost producers have been subjected to pressure to compel them to raise their prices to the level generally desired in the industry, thus depriving the consuming public of the benefit of low prices resulting from efficiency in production. Several other practices, violating the spirit of the recovery law and operating to the disadvantage of the consumers are cited in the report.

It must be emphasized that we do not disagree with the President in the objectives he set forth in his speech yesterday. There can be no question that real recovery cannot be attained until unemployment has been decreased, purchasing power enlarged, and the little man as well as the big manufacturer placed on a sound operating basis. But we do not believe that Mr. Roosevelt's methods are such as to insure progress in that direction.

For one thing, the limitation of competition envisaged in the recovery law must inevitably encourage price-fixing and other monopolistic practices, oppress the small enterprise, and penalize the consuming public by keeping alive marginal and high-cost producers. This becomes doubly certain when the administration of the codes of fair competition is given into the hands of interested parties, to use the language of the Consumers' Advisory Board's report. That is precisely what General Johnson appears to have done.

Only the most efficient and disinterested social control could check or prevent these abuses. The Consumer's Board bravely essays to suggest several ways in which such control could be developed with regard to prices. The President and General Johnson, however, seem to prefer to let industry govern itself, which can only mean that in the end the strongest and greediest factions will prove the real rulers of industry.

Carried to its logical conclusion, social control would appear to require the erection of a Fascist or Socialist dictatorship. Certainly there is no indication that the country is prepared to go that far; thoughtful people must be alarmed at the slightest semblance of dictatorship. The only apparent alternative is free and open business competition. Under such a system abuses are likely to arise, largely because of the immensity and complexity of our economy. But such abuses can be checked or eliminated by vigorous and equitable enforcement of the anti-trust laws and similar statutes, something which this country has never actually witnessed.

Certain of our big business corporations had their own way under the recent Republican administrations. They seem to be having their way again under Roosevelt. This cannot be corrected, on the one hand, by freeing them from the anti-trust laws and allowing them to assume control of the N.R.A. codes, or, on the other hand, by constantly appealing to them to improve their conduct.

TAX FAVORS FOR BIG SPECULATORS—ARTICLE BY HERBERT S. WOOD

Mr. MURPHY. Mr. President, I ask unanimous consent to insert in the RECORD an article by Herbert S. Wood, of Washington, D.C., appearing in the New Republic for March 7, 1934, captioned "Tax Favors for Big Speculators."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New Republic, Mar. 7, 1934]

TAX FAVORS FOR BIG SPECULATORS

The revenue bill recently introduced into the House of Representatives will correct a number of the abuses that were revealed by the Pecora investigation into the income-tax practices of the Mitchells and the Wiggins, the Lamonts and the Morgans. But the bill's new provision for the taxation of so-called "capital gains" is hardly less vicious than the present capital-gains tax. This little-understood section of the old tax law is the largest of the loopholes through which wealthy men have been able to escape their fair share of the Nation's tax burden. It virtually annuls the surtax on speculative profits from long-term investments by permitting gains on the sale of property that has been held 2 years or more (called capital gains) to pay a flat tax of 12½ percent in lieu of a combined normal tax and surtax running up to 63 percent. It thus remits as much as 80 percent of the taxes that would otherwise be paid by the "big fellows" on profits that in boom years make up at least one half their total incomes and represent less useful service to society than any other major class of gains. Moreover, the great bulk of this relief from high surtaxes goes to taxpayers who have little or no just claim for relief.

Under the pending revenue bill the tax on capital gains would be computed at the regular normal tax and surtax rates, but only a part of the capital gains would be included in net income subject to tax—80 percent for property held 1 to 2 years, 60 percent for property held 2 to 5 years, and 40 percent for property held 5 years or more. If enacted, the bill would reduce the tax favors granted to this class of gains, and would distribute the remainder more evenly between large gains and small, and between longer-term and shorter-term investments. But it would still give the recipients of million-dollar incomes a wholly unwarranted reduction of about 60 percent in their taxes on speculative profits from 5-year investments.

From 1925 to 1929 the bounty granted by the capital-gains tax to favored speculators amounted to no less than $75,000,000, of which at least three fourths was wholly unjustifiable. Under the present law the unjustifiable relief granted on the same gains would be $2,000,000,000, and under the pending bill it would be well over $1,000,000,000, of which something like $500,000,000 would go to taxpayers with incomes of one million or more.

It may be fanciful to turn back to the boom years of the late twenties for figures to measure the effects of 1934 tax policies. But is not now the time to adjust our tax system to a new period of rising prices, when the speculators will be in clover, as they were from 1925 to 1929? The administration's currency measures are designed to produce a price rise. Returning prosperity will almost inevitably bring it. If its benefits are not to be monopolized by the speculators, measures to ensure a wider distribution should not be delayed.

The only equitable claim of investors for special consideration in the taxation of their speculative profits arises from the fact that such profits are not taxable until realized by the sale of the property from which they are derived. Gains that presumably accrued through several years may thus be taxed in 1 year, and may be subjected to much higher rates, under our steeply graduated surtax schedule than they would have borne if divided through the years in which they accrued. The House subcommittee on tax revision and the Treasury Department agree that the tax on a capital gain should approximate the tax which would have been paid if the gain had been realized in equal annual amounts over the period for which the asset was held. Allowance should also be made for interest on the tax payments that have been deferred by deferring the realization of the gain. With that modification, the quoted statement affords a fair standard by which to test the soundness of methods designed for the solution of this problem. But both the present law and the substitute proposed in the pending bill utterly fail even to approach that standard. Instead they both grant unwarranted tax reductions several times greater than the excessive burdens that capital gains would bear if no relief were afforded.

If no relief were granted on capital gains, a married man without dependents having an ordinary income (apart from capital gains) of $100,000, and realizing in 1 year a profit of $500,000 on a 5-year investment, would pay, at the rates fixed in the pending bill, 4 years' tax on $100,000, amounting to $121,432, and 1 year's tax on $600,000, or $324,683, making a total of $446,115. On the assumption that his profit accrued evenly over the 5 years he should have paid 5 years' tax on $200,000, or $433,915 in all. His only claim for relief arises from a threatened overpayment of $12,200—less than half the interest he has saved (at 5 percent) by deferring his tax payments. Yet the present law reduces his tax by $232,000 and the pending substitute would reduce his tax by $179,925.

A man with an ordinary income of one million who realizes a capital gain of five millions would pay thereon at regular rates a tax of $3,150,000, whether the gain was realized in 1 year or spread over 5 years. He has no equitable claim for relief, but on the contrary has saved $315,000 in interest (at 5 percent) through deferment of taxes; yet the present law reduces his tax by $2,525,000 and if the property has been held 5 years or more, the pending substitute would reduce his tax by $1,890,000.

Even men with ordinary incomes from $25,000 to $100,000 get, for the most part, grossly excessive relief. Ignoring the interest factor and assuming in each case a capital gain derived from a 5-year investment, amounting to five times the taxpayer's ordinary income, we find that a man with an ordinary income of $25,000 might justly claim a reduction of $24,535 in the tax he would pay at regular rates, but gets a reduction of $39,205 under the present law and $40,305 under the pending bill; a man with $50,000 might justly claim $27,500, but gets $104,750 under the present law and $86,450 under the pending bill; a man with $75,000 might justly claim $14,184, but gets $168,935 under the present law and $132,450 under the pending bill. As the taxpayer's average income rises above $100,000 his equitable claim for relief goes down, but the relief granted shoots upward at an accelerated rate. Moreover, in incomes below $50,000, where the relief granted is moderate, capital gains amounted to less than 5 percent of the taxpayers' total incomes in 1925 to 1929; but in incomes above five millions, where the relief granted is most grossly excessive, capital gains amounted to about 65 percent of the taxpayers' total incomes in those years.

The capital-gains provision of the pending bill fails to accomplish its avowed purpose of equalizing taxation, as between such gains and other income, because it takes into account only one of a number of factors that determine the amount of relief that should equitably be granted with respect to capital gains. The factor considered—the length of time the property has been held—is grossly overweighted. Assuming an ordinary income of $20,000 and a capital gain of $50,000 on a 5- to 25-year investment, we find that from 64 to 74 percent of the capital gain should be included in taxable income in order to obtain a just tax, against 40 percent prescribed by the bill. For an investment lasting from 2 to 5 years, from 73 to 84 percent should be included, against 60 percent prescribed by the bill. For an investment lasting from 1 to 2 years the percentage should range from 80 to 100, against 80 percent prescribed by the bill.

A more important factor—namely, the size of the taxpayer's ordinary income—was mentioned in a published statement of the Treasury Department to the Ways and Means Committee; but it is ignored in the bill. No less important is the amount of the capital gains realized in prior years. Assuming a 5-year investment, if such gains realized this year do not exceed those realized in each of the preceding 4 years, it is obvious that the taxpayer has no just claim for relief.

The size of the capital gains is also a factor. If a taxpayer's ordinary income is $35,000 and he has a capital gain (from a 5-year investment) of $5,000, 100 percent of the gain should be used in computing the tax, instead of 40 percent as prescribed in the bill; but if the capital gain amounts to $75,000, only 74 percent should be used.

A proposal like the capital-gains provision in the pending bill, which grants unwarranted tax favors amounting to far more than the justified relief it gives, is wholly intolerable. The relief provision should either be abandoned altogether, leaving capital gains subject to full taxation at regular rates, or it should be modified so that the tax on such gains will be not less than it would have been (at current tax rates) if the gains had been spread evenly over the years during which the property was held. Even so, we shall be giving the long-term speculators the benefit of the biggest doubt; for such men very commonly take prompt advantage of rises in security prices, so that their profits really accrue in the year of sale.

HERBERT S. WOOD.

DECISION OF SUPREME COURT IN NEW YORK IN MILK-CONTROL CASE

Mr. WAGNER. Mr. President, yesterday the Supreme Court of the United States rendered an epoch-making decision in upholding the constitutionality of the act passed by the Legislature of the State of New York to create a board of control to regulate the entire milk industry of the State of New York. I ask unanimous consent that the prevailing and dissenting opinions of the Supreme Court be printed in the RECORD.

There being no objection, the opinions were ordered to be printed in the RECORD, as follows:

SUPREME COURT OF THE UNITED STATES

(No. 531. October Term, 1933)

LEO NEBBIA, APPELLANT, *v.* THE PEOPLE OF THE STATE OF NEW YORK—APPEAL FROM THE COUNTY COURT OF MONROE COUNTY, N.Y.

[Mar. 5, 1934]

Mr. Justice Roberts delivered the opinion of the Court.

The Legislature of New York established by chapter 158 of the Laws of 1933 a milk control board with power, among other things, to "fix minimum and maximum * * * retail prices to be charged by * * * stores to consumers for consumption off the premises where sold." The board fixed 9 cents as the price to be charged by a store for a quart of milk. Nebbia, the proprietor of a grocery store in Rochester, sold 2 quarts and a 5-cent loaf bread for 18 cents and was convicted for violating the board's

order. At his trial he asserted the statute and order contravene the equal protection clause and the due process clause of the fourteenth amendment and renewed the contention in successive appeals to the county court and the court of appeals. Both overruled his claim and affirmed the conviction.[1]

The question for decision is whether the Federal Constitution prohibits a State from so fixing the selling price of milk. We first inquire as to the occasion for the legislation and its history.

During 1932 the prices received by farmers for milk were much below the cost of production. The decline in prices during 1931 and 1932 was much greater than that of prices generally. The situation of the families of dairy producers had become desperate and called for State aid similar to that afforded the unemployed, if conditions should not improve.

On March 10, 1932, the senate and assembly resolved "That a joint legislative committee is hereby created * * * to investigate the causes of the decline of the price of milk to producers and the resultant effect of the low prices upon the dairy industry and the future supply of milk to the cities of the State; to investigate the cost of distribution of milk and its relation to prices paid to milk producers, to the end that the consumer may be assured of an adequate supply of milk at a reasonable price, both to producer and consumer." The committee organized May 6, 1932, and its activities lasted nearly a year. It held 13 public hearings at which 254 witnesses testified and 2,350 typewritten pages of testimony were taken. Numerous exhibits were submitted. Under its direction an extensive research program was prosecuted by experts and official bodies and employees of the State and municipalities, which resulted in the assembling of much pertinent information. Detailed reports were received from over 100 distributors of milk, and these were collated and the information obtained analyzed. As a result of the study of this material a report covering 473 closely printed pages, embracing the conclusions and recommendations of the committee, was presented to the legislature April 10, 1933. This document included detailed findings, with copious reference to the suporting evidence; appendices outlining the nature and results of prior investigations of the milk industry of the State; briefs upon the legal questions involved; and forms of bills recommended for passage. The conscientious effort and thoroughness exhibited by the report lend weight to the committee's conclusions.

In part those conclusions are:

Milk is an essential item of diet. It cannot long be stored. It is an excellent medium for growth of bacteria. These facts necessitate safeguards in its production and handling for human consumption which greatly increase the cost of the business. Failure of producers to receive a reasonable return for their labor and investment over an extended period threaten a relaxation of vigilance against contamination.

The production and distribution of milk is paramount industry of the State, and largely affects the health and prosperity of its people. Dairying yields fully one half of the total income from all farm products. Dairy-farm investment amounts to approximately $1,000,000,000. Curtailment or destruction of the dairy industry would cause a serious economic loss to the people of the State.

In addition to the general price decline, other causes for the low price of milk include a periodic increase in the number of cows and in milk production, the prevalence of unfair and destructive trade practices in the distribution of milk, leading to a demoralization of prices in the metropolitan area and other markets, and the failure of transportation and distribution charges to be reduced in proportion to the reduction in retail prices for milk and cream.

The fluid milk industry is affected by factors of instability peculiar to itself which call for special methods of control. Under the best practicable adjustment of supply to demand the industry must carry a surplus of about 20 percent, because milk, an essential food, must be available as demanded by consumers every day in the year, and demand and supply vary from day to day and according to the season; but milk is perishable and cannot be stored. Close adjustment of supply to demand is hindered by several factors difficult to control. Thus surplus milk presents a serious problem, as the prices which can be realized for it are much less than those obtainable for milk sold for consumption in fluid form or as cream. A satisfactory stabilization of prices for fluid milk requires that the burden of surplus milk be shared equally by all producers and all distributors in the milkshed. So long as the surplus burden is unequally distributed the pressure to market surplus milk in fluid form will be a serious disturbing factor. The fact that the larger distributors find it necessary to carry large quantities of surplus milk, while the smaller distributors do not, leads to price cutting and other forms of destructive competition. Smaller distributors, who take no responsibility for the surplus, by purchasing their milk at the blended prices (i.e., an average between the price paid the producer for milk for sale as fluid milk, and the lower surplus milk price paid by the larger organizations) can undersell the larger distributors. Indulgence in this price cutting often compels the larger dealer to cut the price to his own and the producer's detriment.

Various remedies were suggested, amongst them united action by producers, the fixing of minimum prices for milk and cream by State authority, and the imposition of certain graded taxes on milk dealers proportioned so as to equalize the cost of milk and cream to all dealers and so remove the cause of price cutting.

The legislature adopted chapter 158 as a method of correcting the evils, which the report of the committee showed could not be expected to right themselves through the ordinary play of the forces of supply and demand, owing to the peculiar and uncontrollable factors affecting the industry. The provisions of the statute are summarized in the margin.[2]

Section 312 (e) on which the prosecution in the present case is founded, provides: "After the board shall have fixed prices to be charged or paid for milk in any form * * * it shall be unlawful for a milk dealer to sell or buy or offer to sell or buy milk at any price less or more than such price * * *, and no method or device shall be lawful whereby milk is bought or sold * * * at a price less or more than such price * * * whether by any discount, or rebate, or free service, or advertising allowance, or a combined price for such milk together with another commodity or commodities, or service or services, which is less or more than the aggregate of the prices for the milk and the price or prices for such other commodity or commodities, or service or services, when sold or offered for sale separately or otherwise * * *."

First. The appellant urges that the order of the milk control board denies him the equal protection of the laws. It is shown that the order requires him, if he purchases his supply from a dealer, to pay 8 cents per quart and 5 cents per pint, and to resell at not less than 9 and 6, whereas the same dealer may buy his

[1] *People* v. *Nebbia* (262 N.Y. 259).

[2] Chapter 158 of the Laws of 1933 added a new article (no. 25) to the agriculture and markets law. The reasons for the enactment are set forth in the first section (sec. 300). So far as material they are: that unhealthful, unfair, unjust, destructive, demoralizing, and uneconomic trade practices exist in the production, sale, and distribution of milk and milk products, whereby the dairy industry in the State and the constant supply of pure milk to inhabitants of the State are imperiled; these conditions are a menace to the public health, welfare, and reasonable comfort; the production and distribution of milk is a paramount industry upon which the prosperity of the State in a great measure depends; existing economic conditions have largely destroyed the purchasing power of milk producers for industrial products, have broken down the orderly production and marketing of milk, and have seriously impaired the agricultural assets supporting the credit structure of the State and its local governmental subdivisions. The danger to public health and welfare consequent upon these conditions is declared to be immediate and to require public supervision and control of the industry to enforce proper standards of production, sanitation, and marketing.

The law then (sec. 301) defines the terms used; declaring, inter alia, that "milk dealer" means any person who purchases or handles milk within the State, for sale in the State, or sells milk within the State except when consumed on the premises where sold; and includes within the definition of "store" a grocery store.

By section 302 a State milk control board is established; and by section 303 general power is conferred upon that body to supervise and regulate the entire milk industry of the State, subject to existing provisions of the public health law, the public service law, the State sanitary code, and local health ordinances and regulations; to act as arbitrator or mediator in controversies arising between producers and dealers, or groups within those classes, and to exercise certain special powers to which reference will be made.

The board is authorized to promulgate orders and rules which are to have the force of law (sec. 304); to make investigations (sec. 305); to enter and inspect premises in which any branch of the industry is conducted, and examine the books, papers, and records of any person concerned in the industry (sec. 306); to license all milk dealers and suspend or revoke licenses for specified causes, its action in these respects being subject to review by certiorari (sec. 308), and to require licensees to keep records (sec. 309), and to make reports (sec. 310).

A violation of any provision of article 25 or of any lawful order of the board is made a misdemeanor (sec. 307).

By section 312 it is enacted (a): "The board shall ascertain by such investigations and proofs as the emergency permits, what prices for milk in the several localities and markets of the State, and under varying conditions, will best protect the milk industry in the State, and insure a sufficient quantity of pure and wholesome milk * * * and be most in the public interest. The board shall take into consideration all conditions affecting the milk industry, including the amount necessary to yield a reasonable return to the producer and to the milk dealer." (b) After such investigation the board shall by official order fix minimum and maximum wholesale and retail prices to be charged by milk dealers to consumers, by milk dealers to stores for consumption on the premises or for resale to consumers, and by stores to consumers for consumption off the premises where sold. It is declared (c) that the intent of the law is that the benefit of any advance in price granted to dealers shall be passed on to the producer, and if the board, after due hearing, finds this has not been done, the dealer's license may be revoked, and the dealer may be subjected to the penalties mentioned in the act. The board may (d) after investigation fix the prices to be paid by dealers to producers for the various grades and classes of milk.

Subsection (e), on which the prosecution in the present case is founded, is quoted in the text.

Alterations may be made in existing orders after hearing of the interested parties (f) and orders made are subject to review on certiorari. The board (sec. 319) is to continue with all the powers and duties specified until March 31, 1934, at which date it is to be deemed abolished. The act contains further provisions not material to the present controversy.

supply from a farmer at lower prices and deliver milk to consumers at 10 cents the quart and 6 cents the pint. We think the contention that the discrimination deprives the appellant of equal protection is not well founded. For aught that appears, the appellant purchased his supply of milk from a farmer as do distributors, or could have procured it from a farmer if he so desired. There is therefore no showing that the order placed him at a disadvantage, or in fact affected him adversely, and this alone is fatal to the claim of denial of equal protection. But if it were shown that the appellant is compelled to buy from a distributor, the difference in the retail price he is required to charge his customers, from that prescribed for sales by distributors is not on its face arbitrary or unreasonable, for there are obvious distinctions between the two sorts of merchants which may well justify a difference of treatment, if the legislature possesses the power to control the prices to be charged for fluid milk. Compare *American Sugar Refining Co.* v. *Louisiana* (179 U.S. 89); *Brown-Forman Co.* v. *Kentucky* (217 U.S. 563); *State Board of Tax Commissioners* v. *Jackson* (283 U.S. 527).

Second. The more serious question is whether, in the light of the conditions disclosed, the enforcement of section 312 (e) denied the appellant the due process secured to him by the fourteenth amendment.

Save the conduct of railroads, no business has been so thoroughly regimented and regulated by the State of New York as the milk industry. Legislation controlling it in the interest of the public health was adopted in 1862[3] and subsequent statutes,[4] have been carried into the general codification known as the agriculture and markets law.[5] A perusal of these statutes discloses that the milk industry has been progressively subjected to a larger measure of control.[6] The producer or dairy farmer is in certain circumstances liable to have his herd quarantined against bovine tuberculosis; is limited in the importation of dairy cattle to those free from Bang's disease; is subject to rules governing the care and feeding of his cows and the care of the milk produced, the condition and surroundings of his barns and buildings used for production of milk, the utensils used, and the persons employed in milking (secs. 46, 47, 55, 72–88). Proprietors of milk-gathering stations or processing plants are subject to regulation (sec. 54), and persons in charge must operate under license and give bond to comply with the law and regulations; must keep records, pay promptly for milk purchased, abstain from false or misleading statements and from combinations to fix prices (secs. 55, 57a, 252). In addition there is a large volume of legislation intended to promote cleanliness and fair-trade practices, affecting all who are engaged in the industry.[7] The challenged amendment of 1933 carried regulation much further than the prior enactments. Appellant insists that it went beyond the limits fixed by the Constitution.

Under our form of government the use of property and the making of contracts are normally matters of private and not of public concern. The general rule is that both shall be free of governmental interference. But neither property rights[8] nor contract rights[9] are absolute; for government cannot exist if the citizen may at will use his property to the detriment of his fellows, or exercise his freedom of contract to work them harm. Equally fundamental with the private right is that of the public to regulate it in the common interest. As Chief Justice Marshall said, speaking specifically of inspection laws, such laws form "a portion of that immense mass of legislation, which embraces everything within the territory of a State, * * * all which can be most advantageously exercised by the States themselves. Inspection laws, quarantine laws, health laws of every description, as well as laws for regulating the internal commerce of a State, * * * are component parts of this mass."[10]

Justice Barbour said for this Court:

"* * * it is not only the right but the bounden and solemn duty of a State to advance the safety, happiness, and prosperity of its people, and to provide for its general welfare, by any and every act of legislation, which it may deem to be conducive to these ends; where the power over the particular subject, or the manner of its exercise is not surrendered or restrained, in the manner just stated. That all those powers which relate to merely municipal legislation, or what may, perhaps, more properly be called internal police, are not thus surrendered or restrained; and that, consequently, in relation to these, the authority of a State is complete, unqualified, and exclusive."[11]

And Chief Justice Taney said upon the same subject:

"But what are the police powers of a State? They are nothing more or less than the powers of government inherent in every sovereignty to the extent of its dominions. And whether a State passes a quarantine law, or a law to punish offenses, or to establish courts of justice, or requiring certain instruments to be recorded, or to regulate commerce within its own limits, in every case it exercises the same power; that is to say, the power of sovereignty, the power to govern men and things within the limits of its dominion. It is by virtue of this power that it legislates; and its authority to make regulations of commerce is as absolute as its power to pass health laws, except insofar as it has been restricted by the Constitution of the United States."[12]

Thus has this Court from the early days affirmed that the power to promote the general welfare is inherent in government. Touching the matters committed to it by the Constitution, the United States possesses the power,[13] as do the States in their sovereign capacity touching all subjects jurisdiction of which is not surrendered to the Federal Government, as shown by the quotations above given. These correlative rights, that of the citizen to exercise exclusive dominion over property and freely to contract about his affairs, and that of the State to regulate the use of property and the conduct of business, are always in collision. No exercise of the private right can be imagined which will not in some respect, however slight, affect the public; no exercise of the legislative prerogative to regulate the conduct of the citizen which will not to some extent abridge his liberty or affect his property. But subject only to constitutional restraint the private right must yield to the public need.

The fifth amendment, in the field of Federal activity,[14] and the fourteenth, as respects State action,[15] do not prohibit governmental regulation for the public welfare. They merely condition the exertion of the admitted power by securing that the end shall be accomplished by methods consistent with due process. And the guaranty of due process, as has often been held, demands only that the law shall not be unreasonable, arbitrary, or capricious, and that the means selected shall have a real and substantial relation to the object sought to be attained. It results that a regulation valid for one sort of business, or in given circumstances, may be invalid for another sort, or for the same business under other circumstances, because the reasonableness of each regulation depends upon the relevant facts.

The reports of our decisions abound with cases in which the citizen, individual, or corporate has vainly invoked the fourteenth amendment in resistance to necessary and appropriate exertion of the police power.

The Court has repeatedly sustained curtailment of enjoyment of private property, in the public interest. The owner's rights may be subordinated to the needs of other private owners whose pursuits are vital to the paramount interests of the community.[16] The State may control the use of property in various ways; may prohibit advertising billboards except of a prescribed size and location,[17] or their use for certain kinds of advertising;[18] may in certain circumstances authorize encroachments by party walls in cities;[19] may fix the height of buildings, the character of materials, and methods of construction, the adjoining area which must be left open, and may exclude from residential sections offensive trades, industries, and structures likely injuriously to affect the public health or safety;[20] or may establish zones within which certain types of buildings or business are permitted and others excluded.[21] And although the fourteenth amendment extends protection to aliens as well as citizens[22] a State may for adequate reasons of policy exclude aliens altogether from the use and occupancy of land.[23]

Laws passed for the suppression of immorality, in the interest of health, to secure fair-trade practices, and to safeguard the interests of depositors in banks have been found consistent with

due process.[24] These measures not only affected the use of private property but also interfered with the right of private contract. Other instances are numerous where valid regulation has restricted the right of contract, while less directly affecting property rights.[25]

The Constitution does not guarantee the unrestricted privilege to engage in a business or to conduct it as one pleases. Certain kinds of business may be prohibited;[26] and the right to conduct a business, or to pursue a calling, may be conditioned.[27] Regulation of a business to prevent waste of the State's resources may be justified.[28] And statutes prescribing the terms upon which those conducting certain businesses may contract, or imposing terms if they do enter into agreement, are within the State's competency.[29]

Legislation concerning sales of goods, and incidentally affecting prices, has repeatedly been held valid. In this class fall laws forbidding unfair competition by the charging of lower prices in one locality than those exacted in another,[30] by giving trade inducements to purchasers,[31] and by other forms of price discrimination.[32] The public policy with respect to free competition has engendered State and Federal statutes prohibiting monopolies,[33] which have been upheld. On the other hand, where the policy of the State dictated that a monopoly should be granted, statutes having that effect have been held inoffensive to the constitutional guaranties.[34] Moreover, the State or a municipality may itself enter into business in competition with private proprietors, and thus effectively although indirectly control the prices charged by them.[35]

The milk industry in New York has been the subject of long-standing and drastic regulation in the public interest. The legislative investigation of 1932 was persuasive of the fact that for this and other reasons unrestricted competition aggravated existing evils and the normal law of supply and demand was insufficient to correct maladjustments detrimental to the community. The inquiry disclosed destructive and demoralizing competitive conditions and unfair trade practices which resulted in retail price cutting and reduced the income of the farmer below the cost of production. We do not understand the appellant to deny that in these circumstances the legislature might reasonably consider further regulation and control desirable for protection of the industry and the consuming public. That body believed conditions could be improved by preventing destructive price cutting by stores which, due to the flood of surplus milk, were able to buy at much lower prices than the larger distributors and without incurring the delivery costs of the latter. In the order of which complaint is made the Milk Control Board fixed a price of 10 cents per quart for sales by a distributor to a consumer, and 9 cents by a store to a consumer, thus recognizing the lower costs of the store, and endeavoring to establish a differential which would be just to both. In the light of the facts the order appears not to be unreasonable or arbitrary, or without relation to the purpose to prevent ruthless competition from destroying the wholesale price structure on which the farmer depends for his livelihood, and the community for an assured supply of milk.

But we are told that because the law essays to control prices it denies due process. Notwithstanding the admitted power to correct existing economic ills by appropriate regulation of business, even though an indirect result may be a restriction of the freedom of contract or a modification of charges for services or the price of commodities, the appellant urges that direct fixation of prices is a type of regulation absolutely forbidden. His position is that the fourteenth amendment requires us to hold the challenged statute void for this reason alone. The argument runs that the public control of rates or prices is per se unreasonable and unconstitutional, save as applied to businesses affected with a public interest; that a business so affected is one in which property is devoted to an enterprise of a sort which the public itself might appropriately undertake, or one whose owner relies on a public grant or franchise for the right to conduct the business, or in which he is bound to serve all who apply; in short, such as is commonly called a "public utility"; or a business in its nature a monopoly. The milk industry, it is said, possesses none of these characteristics, and, therefore, not being affected with a public interest, its charges may not be controlled by the State. Upon the soundness of this contention the appellant's case against the statute depends.

We may as well say at once that the dairy industry is not, in the accepted sense of the phrase, a public utility. We think the appellant is also right in asserting that there is in this case no suggestion of any monopoly or monopolistic practice. It goes without saying that those engaged in the business are in no way dependent upon public grants or franchises for the privilege of conducting their activities. But if, as must be conceded, the industry is subject to regulation in the public interest, what constitutional principle bars the State from correcting existing maladjustments by legislation touching prices? We think there is no such principle. The due-process clause makes no mention of sales or of prices any more than it speaks of business or contracts or buildings or other incidents of property. The thought seems nevertheless to have persisted that there is something

peculiarly sacrosanct about the price one may charge for what he makes or sells, and that, however able to regulate other elements of manufacture or trade, with incidental effect upon price, the State is incapable of directly controlling the price itself. This view was negatived many years ago (*Munn* v. *Illinois*, 94 U.S. 113). The appellant's claim is, however, that this Court, in there sustaining a statutory prescription of charges for storage by the proprietors of a grain elevator, limited permissible legislation of that type to businesses affected with a public interest, and he says no business is so affected except it have one or more of the characteristics he enumerates. But this is a misconception. Munn and Scott held no franchise from the State. They owned the property upon which their elevator was situated and conducted their business as private citizens. No doubt they felt at liberty to deal with whom they pleased and on such terms as they might deem just to themselves. Their enterprise could not fairly be called a "monopoly", although it was referred to in the decision as a "virtual monopoly." This meant only that their elevator was strategically situated and that a large portion of the public found it highly inconvenient to deal with others. This Court concluded the circumstances justified the legislation as an exercise of the governmental right to control the business in the public interest; that is, as an exercise of the police power. It is true that the Court cited a statement from Lord Hale's De Portibus Maris, to the effect that when private property is "affected with a public interest, it ceases to be juris privati only"; but the Court proceeded at once to define what it understood by the expression, saying: "Property does become clothed with a public interest when used in a manner to make it of public consequence and affect the community at large" (p. 126). Thus understood, "affected with a public interest" is the equivalent of "subject to the exercise of the police power"; and it is plain that nothing more was intended by the expression. The Court had been at pains to define that power (pp. 124, 125), ending its discussion in these words:

"From this it is apparent that, down to the time of the adoption of the fourteenth amendment, it was not supposed that statutes regulating the use, or even the price of the use, of private property necessarily deprived an owner of his property without due process of law. Under some circumstances they may, but not under all. The amendment does not change the law in this particular; it simply prevents the States from doing that which will operate as such a deprivation."[36]

In the further discussion of the principle it is said that when one devotes his property to a use, "in which the public has an interest", he in effect "grants to the public an interest in that use" and must submit to be controlled for the common good. The conclusion is that if Munn and Scott wished to avoid having their business regulated they should not have embarked their property in an industry which is subject to regulation in the public interest.

The true interpretation of the Court's language is claimed to be that only property voluntarily devoted to a known public use is subject to regulation as to rates. But obviously Munn and Scott had not voluntarily dedicated their business to a public use. They intended only to conduct it as private citizens, and they insisted that they had done nothing which gave the public an interest in their transactions or conferred any right of regulation. The statement that one has dedicated his property to a public use is, therefore, merely another way of saying that if one embarks in a business which public interest demands shall be regulated, he must know regulation will ensue.

In the same volume the Court sustained regulation of railroad rates.[37] After referring to the fact that railroads are carriers for hire, are incorporated as such, and given extraordinary powers in order that they may better serve the public, it was said that they are engaged in employment "affecting the public interest", and therefore, under the doctrine of the Munn case, subject to legislative control as to rates. And in another of the group of railroad cases then heard[38] it was said that the property of railroads is "clothed with a public interest" which permits legislative limitation of the charges for its use. Plainly the activities of railroads, their charges and practices, so nearly touch the vital economic interests of society that the police power may be invoked to regulate their charges, and no additional formula of affectation or clothing with a public interest is needed to justify the regulation. And this is evidently true of all business units supplying transportation, light, heat, power, and water to communities, irrespective of how they obtain their powers.

The touchstone of public interest in any business, its practices and charges, clearly is not the enjoyment of any franchise from the State (*Munn* v. *Illinois*, supra). Nor is it the enjoyment of a monopoly; for in *Brass* v. *North Dakota* (153 U.S. 391), a similar control of prices of grain elevators was upheld in spite of overwhelming and uncontradicted proof that about 600 grain elevators existed along the line of the Great Northern Railroad, in North Dakota; that at the very station where the defendant's elevator was located two others operated; and that the business was keenly competitive throughout the State.

In *German Alliance Insurance Co.* v. *Lewis* (233 U.S. 389), a statute fixing the amount of premiums for fire insurance was held not to deny due process. Though the business of the insurers depended on no franchise or grant from the State, and there was no threat of monopoly, two factors rendered the regulation reasonable. These were the almost universal need of insurance protection and the fact that while the insurers competed for the business, they all fixed their premiums for similar risks according to an agreed schedule of rates. The Court was at pains to point out that it was impossible to lay down any sweeping and general classification of businesses as to which price regulation could be adjudged arbitrary or the reverse.

Many other decisions show that the private character of a business does not necessarily remove it from the realm of regulation of charges or prices. The usury laws fix the price which may be exacted for the use of money, although no business more essentially private in character can be imagined than that of loaning one's personal funds (*Griffith* v. *Connecticut*, 218 U.S. 563). Insurance agents' compensation may be regulated, though their contracts are private, because the business of insurance is considered one properly subject to public control (*O'Gorman & Young* v. *Hartford Ins. Co.*, 282 U.S. 251). Statutes prescribing in the public interest the amounts to be charged by attorneys for prosecuting certain claims, a matter ordinarily one of personal and private nature, are not a deprivation of due process (*Frisbie* v. *United States*, 157 U.S. 160; *Capital Trust Co.* v. *Calhoun*, 250 U.S. 208; *Calhoun* v. *Massie*, 253 U.S. 170; *Newman* v. *Moyers*, 253 U.S. 182; *Yeiser* v. *Dysart*, 267 U.S. 540; *Margolin* v. *United States*, 269 U.S. 93). A stockyards corporation, "while not a common carrier, nor engaged in any distinctively public employment, is doing a work in which the public has an interest", and its charges may be controlled (*Cotting* v. *Kansas City Stockyards Co.*, 183 U.S. 79, 85). Private contract carriers, who do not operate under a franchise, and have no monopoly of the carriage of goods or passengers, may, since they use the highways to compete with railroads, be compelled to charge rates not lower than those of public carriers for corresponding services, if the State, in pursuance of a public policy to protect the latter, so determines (*Stephenson* v. *Binford*, 287 U.S. 251, 274).

It is clear that there is no closed class or category of businesses affected with a public interest, and the functions of courts in the application of the fifth and fourteenth amendments is to determine in each case whether circumstances vindicate the challenged regulation as a reasonable exertion of governmental authority or condemn it as arbitrary or discriminatory (*Wolff Packing Co.* v. *Court of Industrial Relations*, 262 U.S. 522, 535). The phrase "affected with a public interest" can, in the nature of things, mean no more than that an industry, for adequate reason, is subject to control for the public good. In several of the decisions of this Court wherein the expressions "affected with a public interest" and "clothed with a public use" have been brought forward as the criteria of the validity of price control, it has been admitted that they are not susceptible of definition and form an unsatisfactory test of the constitutionality of legislation directed at business practices or prices. These decisions must rest, finally, upon the basis that the requirements of due process were not met because the laws were found arbitrary in their operation and effect.[39] But there can be no doubt that upon proper occasion and by appropriate measures the State may regulate a business in any of its aspects, including the prices to be charged for the products or commodities it sells.

So far as the requirement of due process is concerned, and in the absence of other constitutional restriction, a State is free to adopt whatever economic policy may reasonably be deemed to promote public welfare and to enforce that policy by legislation adapted to its purpose. The courts are without authority either to declare such policy, or, when it is declared by the legislative arm, to override it. If the laws passed are seen to have a reasonable relation to a proper legislative purpose and are neither arbitrary nor discriminatory, the requirements of due process are satisfied, and judicial determination to that effect renders a court functus officio. "Whether the free operation of the normal laws of competition is a wise and wholesome rule for trade and commerce is an economic question which this court need not consider or determine" (*Northern Securities Co.* v. *United States*, 193 U.S. 197, 337, 338). And it is equally clear that if the legislative policy be to curb unrestrained and harmful competition by measures which are not arbitrary or discriminatory, it does not lie with the courts to determine that the rule is unwise. With the wisdom of the policy adopted, with the adequacy or practicability of the law enacted to forward it, the courts are both incompetent and unauthorized to deal. The course of decision in this court exhibits a firm adherence to these principles. Times without number we have said that the legislature is primarily the judge of the necessity of such an enactment, that every possible presumption is in favor of its validity, and that, though the court may hold views inconsistent with the wisdom of the law, it may not be annulled unless palpably in excess of legislative power.[40]

---

[36] As instances of acts of Congress regulating private businesses consistently with the due-process guaranty of the fifth amendment the Court cites those fixing rates to be charged at private wharves, by chimney sweeps and hackneys, cartmen, wagoners, and draymen in the District of Columbia (p. 125).

[37] *Chicago, B. & Q. R.R. Co.* v. *Iowa* (94 U.S. 155). It will be noted that the emphasis is here reversed, and the carrier is said to be in a business affecting the public not that the business is somehow affected by an interest of the public.

[38] *Peik* v. *C. & N. W. Ry. Co.* (94 U.S. 164).

[39] See *Wolff Packing Co.* v. *Court of Industrial Relations, supra; Tyson & Bro.* v. *Banton* (273 U.S. 418); *Ribnik* v. *McBride* (277 U.S. 350); *Williams* v. *Standard Oil Co.* (278 U.S. 235).

[40] See *McLean* v. *Arkansas* (211 U.S. 539, 547); *Tanner* v. *Little* (240 U.S. 369, 385); *Green* v. *Frazier* (253 U.S. 233, 240); *O'Gorman & Young* v. *Hartford Ins. Co.* (282 U.S. 251, 257, 258); *Gant* v. *Oklahoma City* (289 U.S. 98, 102).

The lawmaking bodies have in the past endeavored to promote free competition by laws aimed at trusts and monopolies. The consequent interference with private property and freedom of contract has not availed with the courts to set these enactments aside as denying due process.[41] Where the public interest was deemed to require the fixing of minimum prices, that expedient has been sustained.[42] If the lawmaking body within its sphere of government concludes that the conditions or practices in an industry make unrestricted competition an inadequate safeguard of the consumer's interests,[43] produce waste harmful to the public, threaten ultimately to cut off the supply of a commodity needed by the public, or portend the destruction of the industry itself, appropriate statutes passed in an honest effort to correct the threatened consequences may not be set aside because the regulation adopted fixes prices reasonably deemed by the legislature to be fair to those engaged in the industry and to the consuming public. And this is especially so where, as here, the economic maladjustment is one of price, which threatens harm to the producer at one end of the series and the consumer at the other. The Constitution does not secure to anyone liberty to conduct his business in such fashion as to inflict injury upon the public at large or upon any substantial group of the people. Price control, like any other form of regulation, is unconstitutional only if arbitrary, discriminatory, or demonstrably irrelevant to the policy the legislature is free to adopt, and hence an unnecessary and unwarranted interference with individual liberty.

Tested by these considerations we find no basis in the due-process clause of the fourteenth amendment for condemning the provisions of the agriculture and markets law here drawn into question.

The judgment is affirmed.

SUPREME COURT OF THE UNITED STATES

(No. 531—October Term, 1933)

LEO NEBBIA, APPELLANT, *v.* THE PEOPLE OF THE STATE OF NEW YORK, APPEAL FROM THE COUNTY COURT OF MONROE COUNTY, STATE OF NEW YORK

[Mar. 5, 1934]

Separate opinion of Mr. Justice McReynolds.

By an act effective April 10, 1933 (Laws 1933, ch. 158), when production of milk greatly exceeded the demand, the legislature created a control board with power to "regulate the entire milk industry of New York State, including the production, transportation, manufacture, storage, distribution, delivery, and sale * * *." The "board may adopt and enforce all rules and all orders necessary to carry out the provisions of this article. * * * A rule of the board, when duly posted and filed as provided in this section, shall have the force and effect of law. * * * A violation of any provision of this article or of any rule or order of the board lawfully made, except as otherwise expressly provided by this article, shall be a misdemeanor. * * *" After considering "all conditions affecting the milk industry, including the amount necessary to yield a reasonable return to the producer and to the milk dealer * * *," the board "shall fix by official order the minimum wholesale and retail prices, and may fix by official order the maximum wholesale and retail prices to be charged for milk handled within the State."

April 17, this board prescribed 9 cents per quart as the minimum at which "a store" might sell.[44] April 19, appellant Nebbia, a small-store keeper in Rochester, sold two bottles at a less price. An information charged that by so doing he committed a misdemeanor. A motion to dismiss, which challenged the validity of both statute and order, being overruled, the trial proceeded under a plea of not guilty. The board's order and statements by two witnesses tending to show the alleged sale constituted the entire evidence. Notwithstanding the claim that under the XIV amendment the State lacked power to prescribe prices at which he might sell pure milk, lawfully held, he was adjudged guilty and ordered to pay a fine.

The court of appeals affirmed the conviction. Among other things, it said—

"The sale by Nebbia was a violation of the statute 'inasmuch as the milk control board had fixed a minimum price for milk at 9 cents per quart.'

"'The appellant not unfairly summarizes this law by saying that it first declares that milk has been selling too cheaply in the State of New York, and has thus created a temporary emergency; this emergency is remedied by making the sale of milk at a low price a crime; the question of what is a low price is determined by the majority vote of three officials. As an aid in enforcing the rate regulation, the milk industry in the State of New York is made a business affecting the public health and interest until March 31, 1934, and the board can exclude from the milk business any violator of the statute or the board's orders.'

"In fixing [sale] prices the board 'must take into consideration the amount necessary to yield a "reasonable return" to the producer and the milk dealer. * * * The fixing of minimum prices is one of the main features of the act. The question is whether the act, so far as it provides for fixing minimum prices for milk, is unconstitutional * * * in that it interferes with the right of the milk dealer to carry on his business in such manner as suits his convenience without State interference as to the price at which he shall sell his milk. The power thus to regulate private business can be invoked only under special circumstances. It may be so invoked when the legislature is dealing with a paramount industry upon which the prosperity of the entire State in large measure depends. It may not be invoked when we are dealing with an ordinary business, essentially private in its nature. This is the vital distinction pointed out in *New State Ice Co.* v. *Liebmann* (285 U.S. 262, 277). * * *

"'The question is as to whether the business justifies the particular restriction, or whether the nature of the business is such that any competent person may, conformably to reasonable regulation, engage therein. The production of milk is, on account of its great importance as human food, a chief industry of the State of New York. * * * It is of such paramount importance as to justify the assertion that the general welfare and prosperity of the State in a very large and real sense depend upon it. * * * The State seeks to protect the producer by fixing a minimum price for his milk to keep open the stream of milk flowing from the farm to the city and to guard the farmer from substantial loss. * * * Price is regulated to protect the farmer from the exactions of purchasers against which he cannot protect himself. * * *

"'Concededly the legislature cannot decide the question of emergency and regulation, free from judicial review, but this court should consider only the legitimacy of the conclusions drawn from the facts found.

"'We are accustomed to rate regulation in cases of public utilities and other analogous cases and to the extension of such regulative power into similar fields. * * * This case, for example, may be distinguished from the Oklahoma ice case (*New State Ice Co.* v. *Liebmann*, 285 U.S. 262, 277) holding that the business of manufacturing and selling ice cannot be made a public business to which it bears a general resemblance. The New York law creates no monopoly; does not restrict production; was adopted to meet an emergency; milk is a greater family necessity than ice. * * * Mechanical concepts of jurisprudence make easy a decision on the strength of seeming authority. * * *

"'Doubtless the statute before us would be condemned by an earlier generation as a temerarious interference with the rights of property and contract * * *; with the natural law of supply and demand. But we must not fail to consider that the police power is the least limitable of the powers of government and that it extends to all the great public needs; * * * that statutes aiming to stimulate the production of a vital food product by fixing living standards of prices for the producer, are to be interpreted with that degree of liberality which is essential to the attainment of the end in view; * * *

"'With full respect for the Constitution as an efficient frame of government in peace and war, under normal conditions or in emergencies; with cheerful submission to the rule of the Supreme Court that legislative authority to abridge property rights and freedom of contract can be justified only by exceptional circumstances and, even then, by reasonable regulation only, and that legislative conclusions based on findings of fact are subject to judicial review, we do not feel compelled to hold that the "due-process" clause of the Constitution has left milk producers unprotected from oppression and to place the stamp of invalidity on the measure before us.

"'With the wisdom of the legislation we have naught to do. It may be vain to hope by laws to oppose the general course of trade. * * *

"'We are unable to say that the legislature is lacking in power, not only to regulate and encourage the production of milk but also, when conditions require, to regulate the prices to be paid for it, so that a fair return may be obtained by the producer and a vital industry preserved from destruction. * * * The policy

---

[41] See note 32, supra.

[42] *Public Service Commission* v. *Great Northern Utilities Co.* (289 U.S. 130); *Stephenson* v. *Binford*, supra. See the Transportation Act, 1920 (41 Stat. 456, secs. 418, 422), amending sec. 15 of the Interstate Commerce Act, and compare *Anchor Coal Co.* v. *United States* (25 F. (2d) 462); *New England Divisions Case* (261 U.S. 184, 190, 196).

[43] See *Public Service Commission* v. *Great Northern Utilities Co.*, supra.

[44] Official Order No. 5, effective Apr. 17, 1933. Ordered that until further notice and subject to the exceptions hereinafter made, the following shall be the minimum prices to be charged for all milk and cream in any and all cities and villages of the State of New York of more than 1,000 population, exclusive of New York City and the counties of Westchester, Nassau, and Suffolk:

Milk: Quarts in bottles—By milk dealers to consumers, 10 cents; by milk dealers to stores, 8 cents; by stores to consumers, 9 cents. Pints in bottles—By milk dealers to consumers, 6 cents; by milk dealers to stores, 5 cents; by stores to consumers, 6 cents. * * *

The control act declares:

"Milk dealer" means any person who purchases or handles milk within the State, for sale in this State, or sells milk within the State except when consumed on the premises where sold. Each corporation which, if a natural person, would be a milk dealer within the meaning of this article, and any subsidiary of such corporation shall be deemed a milk dealer within the meaning of this definition. A producer who delivers milk only to a milk dealer shall not be deemed a milk dealer.

"Producer" means a person producing milk within the State of New York.

"Store" means a grocery store, hotel, restaurant, soda fountain, dairy products store, and similar mercantile establishment.

"Consumer" means any person other than a milk dealer who purchases milk for fluid consumption.

of noninterference with individual freedom must at times give way to the policy of compulsion for the general welfare.'"

Our question is whether the Control Act, as applied to appellant through the order of the board, no. 5, deprives him of rights guaranteed by the fourteenth amendment. He was convicted of a crime for selling his own property—wholesome milk—in the ordinary course of business at a price satisfactory to himself and the customer. We are not immediately concerned with any other provision of the act or later orders. Prices at which the producer may sell were not prescribed—he may accept any price—nor was production in any way limited. "To stimulate the production of a vital food product" was not the purpose of the statute. There was an oversupply of an excellent article. The affirmation is "that milk has been selling too cheaply * * * and has thus created a temporary emergency; this emergency is remedied by making the sale of milk at a low price a crime."

The opinion below points out that the statute expires March 31, 1934, "and is avowedly a mere temporary measure to meet an existing emergency"; but the basis of the decision is not explicit. There was no definite finding of an emergency by the court upon consideration of established facts and no pronouncement that conditions were accurately reported by a legislative committee. Was the legislation upheld because only temporary and for an emergency; or was it sustained upon the view that the milk business bears a peculiar relation to the public, is affected with a public interest, and, therefore, sales prices may be prescribed irrespective of exceptional circumstances? We are left in uncertainty. The two notions are distinct if not conflicting. Widely different results may follow adherence to one or the other.

The theory that legislative action which ordinarily would be ineffective because of conflict with the Constitution may become potent if intended to meet peculiar conditions and properly limited, was lucidly discussed and its weakness disclosed by the dissenting opinion in *Home Building & Loan Assn.* v. *Blaisdell* (Jan. 8, 1934). Sixty years ago, in Milligan's case, this court declared it inimicable to constitutional government and did "write the vision and make it plain upon tables that he may run that readeth it."

Milligan, charged with offenses against the United States committed during 1863 and 1864 was tried, convicted, and sentenced to be hanged by a military commission proceeding under an act of Congress passed in 1862. The crisis then existing was urged in justification of its action. But this Court held the right of trial by jury did not yield to emergency; and directed his release. "Those great and good men (who drafted the Constitution) foresaw that troublous times would arise, when rulers and people would become restive under restraint, and seek by sharp and decisive measures to accomplish ends deemed just and proper; and that the principles of constitutional liberty would be in peril, unless established by irrepealable law. * * * The Constitution of the United States is a law for rulers and people, equally in war and in peace, and covers with the shield of its protection all classes of men, at all times, and under all circumstances. No doctrine, involving more pernicious consequences, was ever invented by the wit of man than that any of its provisions can be suspended during any of the great exigencies of government. Such a doctrine leads directly to anarchy or despotism." (Ex parte Milligan (1866), 4 Wall. 2, 120.)

The fourteenth amendment wholly disempowered the several States to "deprive any person of life, liberty, or property, without due process of law." The assurance of each of these things is the same. If now liberty or property may be struck down because of difficult circumstances, we must expect that hereafter every right must yield to the voice of an impatient majority when stirred by distressful exigency. Amid the turmoil of civil war Milligan was sentenced; happily, this Court intervened. Constitutional guaranties are not to be "thrust to and fro and carried about with every wind of doctrine." They were intended to be immutable so long as within our charter. Rights shielded yesterday should remain indefeasible today and tomorrow. Certain fundamentals have been set beyond experimentation; the Constitution has released them from control by the State. Again and again this Court has so declared.

Adams v. *Tanner* (244 U.S. 590), condemned a Washington initiative measure which undertook to destroy the business of private employment agencies because it unduly restricted individual liberty. We there said—"The fundamental guaranties of the Constitution cannot be freely submerged if and whenever some ostensible justification is advanced and the police power invoked."

Buchanan v. *Warley* (245 U.S. 60) held ineffective an ordinance which forbade Negroes to reside in a city block where most of the houses were occupied by whites. "It is equally well established that the police power, broad as it is, cannot justify the passage of a law or ordinance which runs counter to the limitations of the Federal Constitution; that principle has been so frequently affirmed in this Court that we need not stop to cite the cases." *Southern Ry. Co.* v. *Virginia* (Dec. 4, 1933)—"The claim that the questioned statute was enacted under the police power of the State and, therefore, is not subject to the standards applicable to legislation under other powers conflicts with the firmly established rule that every State power is limited by the inhibitions of the fourteenth amendment."

Adkins v. *Children's Hospital* (261 U.S. 525, 545): "That the right to contract about one's affairs is a part of the liberty of the individual protected by this clause [fifth amendment] is settled by the decisions of this Court and is no longer open to question."

Meyer v. *Nebraska* (262 U.S. 390, 399) held invalid a State enactment (1919) which forbade the teaching in schools of any language other than English. "While this Court has not attempted to define with exactness the liberty thus guaranteed, the term has received much consideration and some of the included things have been definitely stated. Without doubt it denotes not merely freedom from bodily restraint but also the right of the individual to contract, to engage in any of the common occupations of life, to acquire useful knowledge, to marry, establish a home and bring up children, to worship God according to the dictates of his own conscience, and generally to enjoy those privileges long recognized at common law as essential to the orderly pursuit of happiness by free men."

Schlessinger v. *Wisconsin* (270 U.S. 230, 240): "The State is forbidden to deny due process of law or the equal protection of the laws for any purpose whatsoever."

Near v. *Minnesota* (283 U.S. 697) overthrew a Minnesota statute designed to protect the public against obvious evils incident to the business of regularly publishing malicious, scandalous, and defamatory matters because of conflict with the fourteenth amendment.

In the following, among many other cases, much consideration has been given to this subject: *United States* v. *Cohen Grocery Co.* (255 U.S. 81, 88), *Wolff Co.* v. *Industrial Court* (262 U.S. 522 and 267 U.S. 552), *Pierce* v. *Society of Sisters* (268 U.S. 510), *Tyson & Bro.* v. *Banton* (273 U.S. 418), *Fairmont Creamery Co.* v. *Minnesota* (274 U.S. 1), *Ribnik* v. *McBride* (277 U.S. 350), *Williams* v. *Standard Oil Co.* (278 U.S. 235), *Sterling* v. *Constantin* (287 U.S. 378). All stand in opposition to the views apparently approved below.

If validity of the enactment depends upon emergency, then to sustain this conviction we must be able to affirm that an adequate one has been shown by competent evidence of essential facts. The aserted right is Federal. Such rights may demand and often have received affirmation and protection here. They do not vanish simply because the power of the State is arrayed against them. Nor are they enjoyed in subjection to mere legislative findings.

If she relied upon the existence of emergency, the burden was upon the State to establish it by competent evidence. None was presented at the trial. If necessary for appellant to show absence of the asserted conditions, the little grocer was helpless from the beginning—the practical difficulties were too great for the average man.

What circumstances give force to an "emergency" statute? In how much of the State must they obtain? Everywhere, or will a single county suffice? How many farmers must have been impoverished or threatened violence to create a crisis of sufficient gravity? If 3 days after this act became effective another "very grievous murrain" had descended and half of the cattle had died, would the emergency then have ended, also the prescribed rates? If prices for agricultural products become high, can consumers claim a crisis exists and demand that the legislature fix less ones? Or are producers alone to be considered, consumers neglected? To these questions we have no answers. When emergency gives potency, its subsidence must disempower; but no test for its presence or absence has been offered. How is an accused to know when some new rule of conduct arrived, when it will disappear?

It is argued that the report of the legislative committee, dated April 10, 1933, disclosed the essential facts. May one be convicted of crime upon such findings? Are Federal rights subject to extinction by reports of committees? Heretofore, they have not been.

Apparently, the legislature acted upon this report. Some excerpts from it follow. We have no basis for determining whether the findings of the committee or legislature are correct or otherwise. The court below refrained from expressing any opinion in that regard, notwithstanding its declaration "that legislative authority to abridge property rights and freedom of contract can be justified only by exceptional circumstances and even then by reasonable regulation only and that legislative conclusions based on findings of fact are subject to judicial review." On the other hand, it asserted, "This court should consider only the legitimacy of the conclusions drawn from the facts found."

In New York there are 12,000,000 possible consumers of milk; 130,000 farms produce it. The average daily output approximates 9,500,000 quarts. For 10 or 15 years prior to 1929 or 1930 the per capita consumption steadily increased; so did the supply. "Realizing the marked improvement in milk quality, the public has tended to increase its consumption of this commodity." "In the past 2 years the per capita consumption has fallen off [possibly] 10 percent." "These marked changes in the trend of consumption of fluid milk and cream have occurred in spite of drastic reductions in retail prices. The obvious cause is the reduced buying power of consumers." "These cycles of overproduction and underproduction which average about 15 years in length, are explained by the human tendency to raise too many heifers when prices of cows are high and too few when prices of cows are low. A period of favorable prices for milk leads to the raising of more than the usual number of heifers, but it is not until 7 or 8 years later that the trend is reversed as a result of the falling prices of milk and cows." "Farmers all over the world raise too many heifers whenever cows pay and raise too few heifers when cows do not pay."

"During the years 1925 to 1930, inclusive, the prices which the farmers of the State received for milk were favorable as compared with the wholesale prices of all commodities. They were even more favorable as compared with the prices received for other farm products, for not only in New York but throughout the United States the general level of prices of farm products has been below that of other prices since the World War."

"The comparatively favorable situation enjoyed by the milk producers had an abrupt ending in 1932. Even before that, in 1930 and 1931, milk prices dropped very rapidly." "The prices which farmers received for milk during 1932 were much below the costs of production. After other costs were paid the producers had practically nothing left for their labor. The price received for milk in January 1933 was little more than half the cost of production."

"Since 1927 the number of dairy cows in the State has increased about 10 percent. The effect of this has been to increase the surplus of milk." "Similar increases in the number of cows have occurred generally in the United States and are due to the periodic changes in number of heifer calves raised on the farms. Previous experience indicates that unless some form of arbitrary regulation is applied the production of milk will not be satisfactorily adjusted to the demand for a period of several years." "Close adjustment of the supply of fluid milk to the demand is further hindered by the periodic changes in the number of heifers raised for dairy cows."

"The purpose of this emergency measure is to bring partial relief to dairymen from the disastrously low prices for milk which have prevailed in recent months. It is recognized that the dairy industry of the State cannot be placed upon a profitable basis without a decided rise in the general level of commodity prices."

Thus we are told the number of dairy cows had been increasing and that favorable prices for milk bring more cows. For 2 years, notwithstanding low prices, the per capita consumption had been falling. "The obvious cause is the reduced buying power of consumers." Notwithstanding the low prices, farmers continued to produce a large surplus of wholesome milk for which there was no market. They had yielded to "the human tendency to raise too many heifers" when prices were high and "not until 7 or 8 years" after 1930 could one reasonably expect a reverse trend. This failure of demand had nothing to do with the quality of the milk—that was excellent. Consumers lacked funds with which to buy. In consequence the farmers became impoverished and their lands depreciated in value. Naturally they became discontented.

The exigency is of the kind which inevitably arises when one set of men continue to produce more than all others can buy. The distressing result to the producer followed his ill-advised but voluntary efforts. Similar situations occur in almost every business. If here we have an emergency sufficient to empower the legislature to fix sales prices, then whenever there is too much or too little of an essential thing—whether of milk or grain or pork or coal or shoes or clothes—constitutional provisions may be declared inoperative and the "anarchy and despotism" prefigured in Milligan's case are at the door. The futility of such legislation in the circumstances is pointed out below.

Block v. *Hirsh* (256 U.S. 135) and *Marcus Brown Holding Co.* v. *Feldman* (256 U.S. 170) are much relied on to support emergency legislation. They were civil proceedings; the first to recover a leased building in the District of Columbia; the second to gain possession of an apartment house in New York. The unusual conditions grew out of the World War. The questioned statutes made careful provision for protection of owners. These cases were analyzed and their inapplicability to circumstances like the ones before us was pointed out in *Tyson* v. *Banton* (273 U.S. 418). They involved peculiar facts and must be strictly limited. *Pennsylvania Coal Co.* v. *Mahon* (260 U.S. 393, 416), said of them: "The late decisions upon laws dealing with the congestion of Washington and New York, caused by the war, dealt with laws intended to meet a temporary emergency and providing for compensation determined to be reasonable by an impartial board. They went to the verge of the law but fell far short of the present act."

Is the milk business so affected with public interest that the legislature may prescribe prices for sales by stores? This Court has approved the contrary view; has emphatically declared that a State lacks power to fix prices in similar private businesses (*United States* v. *Cohen Grocery Co.*, 255 U.S. 81; *Adkins* v. *Children's Hospital*, 261 U.S. 525; *Wolff Packing Co.* v. *Industrial Court*, 262 U.S. 522; *Tyson & Brother* v. *Banton*, 273 U.S. 418; *Fairmont Creamery Co.* v. *Minnesota*, 274 U.S. 1; *Ribnik* v. *McBride*, 277 U.S. 350; *Williams* v. *Standard Oil Co.*, 278 U.S. 235; *New State Ice Co.* v. *Liebmann*, 285 U.S. 262; *Sterling* v. *Constantin*, 287 U.S. 378, 396).

Wolff Packing Co. v. *Industrial Court* (262 U.S. 522, 537): Here the State statute undertook to destroy the freedom of contract by parties engaged in so-called "essential" industries. This Court held that she had no such power. "It has never been supposed since the adoption of the Constitution that the business of the butcher, or the baker, the tailor, the woodchopper, the mining operator or the miner was clothed with such a public interest that the price of his product or his wages could be fixed by State regulation. * * * An ordinary producer, manufacturer, or shopkeeper may sell or not sell as he likes." On a second appeal (267 U.S. 552, 569), the same doctrine was restated: "The system of compulsory arbitration which the act establishes is intended to compel and, if sustained, will compel the owner and employees to continue the business on terms which are not of their making. It will constrain them not merely to respect the terms if they continue the business, but will constrain them to continue the business on those terms. True, the terms have some qualifications, but, as shown in the prior decision, the qualifications are rather illusory and do not subtract much from the duty imposed. Such a system infringes the liberty of contract and rights of property guaranteed by the due process of law clause of the fourteenth amendment. 'The established doctrine is that this liberty may not be interfered with under the guise of protecting the public interest by legislative action which is arbitrary or without reasonable relation to some purpose within the competency of the State to effect.'"

Fairmont Creamery Co. v. *Minnesota* (274 U.S. 1, 9): A statute commanded buyers of cream to adhere to uniform prices fixed by a single transaction. "May the State, in order to prevent some strong buyers of cream from doing things which may tend to monopoly, inhibit plaintiff in error from carrying on its business in the usual way heretofore regarded as both moral and beneficial to the public and not shown now to be accompanied by evil results as ordinary incidents? Former decisions here require a negative answer. We think the inhibition of the statute has no reasonable relation to the anticipated evil—high bidding by some with purpose to monopolize or destroy competition. Looking through form to substance, it clearly and unmistakably infringes private rights whose exercise does not ordinarily produce evil consequences, but the reverse."

Williams v. *Standard Oil Co.* (278 U.S. 235, 239): The State of Tennessee was declared without power to prescribe prices at which gasoline might be sold. "It is settled by recent decisions of this Court that a State legislature is without constitutional power to fix prices at which commodities may be sold, services rendered, or property used, unless the business or property involved is 'affected with a public interest.'" Considered affirmatively, "it means that a business or property, in order to be affected with a public interest, must be such or be so employed as to justify the conclusion that it has been devoted to a public use and its use thereby in effect granted to the public. * * * Negatively, it does not mean that a business is affected with a public interest merely because it is large or because the public are warranted in having a feeling of concern in respect of its maintenance."

New State Ice Co. v. *Liebmann* (285 U.S. 262, 277): Here Oklahoma undertook the control of the business of manufacturing and selling ice. We denied the power so to do. "It is a business as essentially private in its nature as the business of the grocer, the dairyman, the butcher, the baker, the shoemaker, or the tailor, * * *. And this Court has definitely said that the production or sale of food or clothing cannot be subjected to legislative regulation on the basis of a public use."

Regulation to prevent recognized evils in business has long been upheld as permissible legislative action. But fixation of the price at which "A", engaged in an ordinary business, may sell, in order to enable "B", a producer, to improve his condition, has not been regarded as within legislative power. This is not regulation, but management, control, dictation—it amounts to the deprivation of the fundamental right which one has to conduct his own affairs honestly and along customary lines. The argument advanced here would support general prescription of prices for farm products, groceries, shoes, clothing, all the necessities of modern civilization, as well as labor, when some legislature finds and declares such action advisable and for the public good. This Court has declared that a State may not by legislative fiat convert a private business into a public utility (*Michigan Comn.* v. *Duke*, 266 U.S. 570, 577. *Frost Trucking Co.* v. *R.R. Comn.*, 271 U.S. 583, 592. *Smith* v. *Cahoon*, 283 U. S. 553, 563). And if it be now ruled that one dedicates his property to public use whenever he embarks on an enterprise which the legislature may think it desirable to bring under control, this is but to declare that rights guaranteed by the Constitution exist only so long as supposed public interest does not require their extinction. To adopt such a view, of course, would put an end to liberty under the Constitution.

Munn v. *Illinois* (1877) (94 U.S. 113) has been much discussed in the opinions referred to above. And always the conclusion was that nothing there sustains the notion that the ordinary business of dealing in commodities is charged with a public interest and subject to legislative control. The contrary has been distinctly announced. To undertake now to attribute a repudiated implication to that opinion is to affirm that it means what this Court has declared again and again was not intended. The painstaking effort there to point out that certain businesses like ferries, mills, etc., were subject to legislative control at common law and then to show that warehousing at Chicago occupied like relation to the public would have been pointless if "affected with a public interest" only means that the public has serious concern about the perpetuity and success of the undertaking. That is true of almost all ordinary business affairs. Nothing in the opinion lends support, directly or otherwise, to the notion that in times of peace a legislature may fix the price of ordinary commodities—grain, meat, milk, cotton, etc.

Of the assailed statute the court of appeals says: "It first declares that milk has been selling too cheaply in the State of New York, and has thus created a temporary emergency; this emergency is remedied by making the sale of milk at a low price a crime; the question of what is a low price is determined by the majority vote of three officials." Also, "With the wisdom of the legislation we have naught to do. It may be vain to hope by laws to oppose the general course of trade." Maybe, because of this conclusion, it said nothing concerning the possibility of obtaining increase of prices to producers—the thing definitely aimed at—through the means adopted.

But plainly, I think, this Court must have regard to the wisdom of the enactment. At least we must inquire concerning its purpose and decide whether the means proposed have reasonable relation to something within legislative power—whether the end is legitimate, and the means appropriate. If a statute to prevent

conflagrations, should require householders to pour oil on their roofs as a means of curbing the spread of fire when discovered in the neighborhood, we could hardly uphold it. Here, we find direct interference with guaranteed rights defended upon the ground that the purpose was to promote the public welfare by increasing milk prices at the farm. Unless we can affirm that the end proposed is proper and the means adopted have reasonable relation to it, this action is unjustifiable.

The court below has not definitely affirmed this necessary relation; it has not attempted to indicate how higher charges at stores to impoverished customers when the output is excessive and sale prices by producers are unrestrained, can possibly increase receipts at the farm. The legislative committee pointed out as the obvious cause of decreased consumption, notwithstanding low prices, the consumers' reduced buying power. Higher store prices will not enlarge this power; nor will they decrease production. Low prices will bring less cows only after several years. The prime causes of the difficulties will remain. Nothing indicates early decreased output. Demand at low prices being wholly insufficient, the proposed plan is to raise and fix higher minimum prices at stores and thereby aid the producer whose output and prices remain unrestrained! It is not true, as stated, that "the States seeks to protect the producer by fixing a minimum price for his milk." She carefully refrained from doing this; but did undertake to fix the price after the milk had passed to other owners. Assuming that the views and facts reported by the legislative committee are correct, it appears to me wholly unreasonable to expect this legislation to accomplish the proposed end—increase of prices at the farm. We deal only with order no. 5, as did the court below. It is not merely unwise; it is arbitrary and unduly oppressive. Better prices may follow but it is beyond reason to expect them as the consequent of that order. The legislative committee reported: "It is recognized that the dairy industry of the State cannot be placed upon a profitable basis without a decided rise in the general level of commodity prices."

Not only does the statute interfere arbitrarily with the rights of the little grocer to conduct his business according to standards long accepted—complete destruction may follow; but it takes away the liberty of 12,000,000 consumers to buy a necessity of life in an open market. It imposes direct and arbitrary burdens upon those already seriously impoverished with the alleged immediate design of affording special benefits to others. To him with less than 9 cents it says, You cannot procure a quart of milk from the grocer although he is anxious to accept what you can pay and the demands of your household are urgent! A superabundance; but no child can purchase from a willing storekeeper below the figure appointed by three men at headquarters! And this is true although the storekeeper himself may have bought from a willing producer at half that rate and must sell quickly or lose his stock through deterioration. The fanciful scheme is to protect the farmer against undue exactions by prescribing the price at which milk disposed of by him at will may be resold!

The statement by the court below that: "Doubtless the statute before us would be condemned by an earlier generation as a temerarious interference with the rights of property and contract * * *; with the natural law of supply and demand", is obviously correct. But another, that "statutes aiming to stimulate the production of a vital food product by fixing living standards of prices for the producer, are to be interpreted with that degree of liberality which is essential to the attainment of the end in view", conflicts with views of constitutional rights accepted since the beginning. An end, although apparently desirable, cannot justify inhibited means. Moreover, the challenged act was not designed to stimulate production—there was too much milk for the demand and no prospect of less for several years; also "standards of prices" at which the producer might sell were not prescribed. The legislature cannot lawfully destroy guaranteed rights of one man with the prime purpose of enriching another, even if for the moment this may seem advantageous to the public. And the adoption of any "concept of jurisprudence" which permits facile disregard of the Constitution as long interpreted and respected will inevitably lead to its destruction. Then all rights will be subject to the caprice of the hour; government by stable laws will pass.

The somewhat misty suggestion below that condemnation of the challenged legislation would amount to holding "that the due-process clause has left milk production unprotected from oppression", I assume, was not intended as a material contribution to the discussion upon the merits of the cause. Grave concern for embarrassed farmers is everywhere; but this should neither obscure the rights of others nor obstruct judicial appraisement of measures proposed for relief. The ultimate welfare of the producer, like that of every other class, requires dominance of the Constitution. And zealously to uphold this in all its parts is the highest duty intrusted to the courts.

The judgment of the court below should be reversed.

Mr. Justice Van Devanter, Mr. Justice Sutherland, and Mr. Justice Butler authorize me to say that they concur in this opinion.

THE NATIONAL RECOVERY PROGRAM—ARTICLE BY MAXINE DAVIS

Mr. ROBINSON of Arkansas. Mr. President, yesterday there was discussion in the Senate on the subject of national recovery that aroused very great interest. Miss Maxine Davis has made a tour of many portions of the United States looking into the operations of some of the statutes associated with the national-recovery program and particularly that pertaining to national industrial recovery. In the current issue of McCall's Magazine the results of her investigation are made public. I ask that her article, entitled, "We Are On Our Way", be incorporated in the RECORD.

There being no objection, the article was ordered to be incorporated in the RECORD, as follows:

[From McCall's Magazine for March 1934]

(This portrait of the people celebrates the first anniversary of the new deal. Almost 1 year from the day that Franklin D. Roosevelt captured the imagination of the world Maxine Davis began a transcontinental journey which resulted in this stirring article that reveals what's going on in the hearts and minds of our countrymen today.)

On the 4th of March 1 year ago chaos hung, like the sword of Damocles, above the American people. A third of them were dependent on a dole for mere existence, a dole whose cancerous growth had already sapped private, municipal, and even State funds. Revolting farmers with noose and gun, frontier fashion, were guarding their homes from foreclosure. Factory furnaces were cold. The cracking credit structure had given way with the Michigan moratorium and bank doors were closing with the thud of earth on coffins. On that day Franklin Roosevelt stood on the steps of the Capitol and promised action—"Action now!"

Today, 1 year later, that sword is replaced by the rainbow. The President has kept his word. He is doing something. Everywhere conditions are better. True, the Pittsburgh skyline is still ominously clear. Though sirlion steaks are a ruinous 4 cents a pound to the Wyoming cattleman, they are broiled in but few ovens. True, the tongues of Babel were a melody on a single string compared to the apparent confusion of the new deal; wide-eyed economists in Washington's Roman temples, each saving the Nation in his own little cubicle. Chicago meat packers operating under 16 different codes. Kansas wheat farmers feeling they are sinning against the Lord, the Bible, and the church taking checks for not growing grain, but taking them just the same. The President "off gold" and buying more of it every day. The Government spending $13,000,000 to irrigate 80,000 Arizona acres and ordering other arable lands plowed under not 20 miles away.

However, two and three-quarter million men have gone back to work in private industry. Four million have C.W.A. jobs and P.W.A. has employed a quarter of a million more. What else? Thousands of homes saved. Women taken from sweatshops, children from mills. Charity rolls cut in half. Schools open. Banks saved. Farmers relieved. Transients at rest. Artists at work for all the people. Shops have customers. Trains have passengers. Restaurants serve crowds.

Action! America, lusty and still young, is once more going somewhere. It has stopped beating in a feather bed. It is baffled, bewildered, moving.

"There's no knowing where we're going, but, thank God, we're on our way." This was the marching song I heard on a 5,000-mile journey across the United States to see the workings of the new deal. I heard it on Boston Common and San Francisco's Telegraph Hill; on Fifth Avenue and "Main Street"; from a furniture dealer in Lincoln, Nebr.; a street-car motorman in Atlanta; a banker in San Diego; from a South Dakota farm woman a hundred miles from anywhere.

Before the President came into office desperate men were saying, "What we need is a dictator." When he secured from Congress discretionary power so vast that it left our legislators gasping, the Nation shivered, "This is revolution. Toward communism or fascism; which?"

Neither. Actually, one subconscious reason for the average man's trust in the President is his adherence to the principles laid down by the founding fathers. As evidence, read this:

SEPTEMBER 1932—FRANKLIN ROOSEVELT IN HIS SAN FRANCISCO COMMONWEALTH CLUB SPEECH

Every man has a right to life; and this means that he also has a right to a comfortable living. . . . We have no actual famine or dearth. . . . Our Government . . . owes to everyone an avenue to possess himself of a portion of that plenty sufficient for his own needs, through his own work. Every man has a right to his own property, which means a right to be assured . . . in the safety of his savings. . . . If . . . we must restrict the operations of the speculator, the manipulator, even the financier, I believe we must accept the restriction as needful, not to hamper individualism, but to protect it.

JULY 4, 1776—DECLARATION OF INDEPENDENCE

All men . . . are endowed by their Creator with certain inalienable rights . . . among these are life, liberty, and the pursuit of happiness. . . . To secure these rights governments are instituted deriving their just powers from the consent of the governed. . . . Whenever any form of government becomes destructive of these ends, it is the right of the people to alter . . . it.

Here is the philosophy of Thomas Jefferson, of Theodore Roosevelt's "square deal", of Woodrow Wilson's "new freedom"; nothing more * * * nor less. Franklin Roosevelt saw that since it had come to pass that some 600 autocratic corporations controlled the destinies of two thirds of industry, without regard to labor

or consumer, we had swerved a long, long way from our inherited democracy.

When the people voted overwhelmingly for the new deal, they were not asking for a change in the spirit of our Government. Theirs was no mandate to change the framework, to make our parliament a picnic, as in Russia, or, as in Germany, a gesture. We have, to be sure, damned Congress so roundly that at present it is as tame as a gigolo. Under the new deal it tends to retain its ultimate power. Its geographical representation is supplemented by self-governing economic units, guilds, to substitute cooperation, regulation, and control for the anarchy of the old system we knew as "laissez faire." This organization is the N.R.A.

Does labor like it? Does a duck like water? Labor is clumsy, over-reaching, inchoate. Its leaders for the most part are untrained, inadequate, prejudiced, ill-informed. Give them a chance; they've rarely had one.

Do owners of capital like it? Maybe. They don't know. If their books show profits, perhaps. A number are beginning dimly to see that employees are customers. Of course, the big pigs think they see a chance for monopoly, and elimination of the little man, who has noticed that possibility himself. Still, I was nowhere able to discover that the N.R.A. had forced anyone out of business, and Dun & Bradstreet's report about half as many business failures in 1933 as in 1932.

Does the consumer like it? When prices have not gone too high he does not even notice it. He rarely think of himself in his consuming capacity.

Do any of these groups understand the implications of N.R.A.? Emphatically no.

The best evidence of its practicability, however, lies in the fact that two great basic industries that have renewed their codes are the rebellious steel and coal groups. With the introduction of the recovery program their parent State, Pennsylvania, greatest sweatshop State in the Union, where children worked for 25 cents a week, where whole towns were on relief rolls, where deputy sheriffs in private employ could use tear gas to quell labor disputes, is changing. In Pittsburgh's Shantytown hundreds still live in boxes, like dogs in kennels. Most social legislation is still being defeated. A Democratic mayor-elect was arrested for speaking from a soapbox without a permit.

Yet an early robin of liberalism perches there. This winter's legislature did pass a child labor law, by 1 vote. Although the Weirton Steel Mill dispute has been on every front page the American Federation of Labor's Amalgamated Union has had sweeping victories, welcomed by many plants as the alternative to extreme radicalism. More than 415,000 men are at work in the steel mills, nearly 1929's roll, although production is far below that year. Steel production reached twenty-two and one half million tons in 1933; the previous year it was thirteen and one half million!

United Mine Workers have increased their membership by battalions. Coal executives grouch, say they're fearful that their profits won't cover their increased overhead; that 1,000 new mines have opened since they signed their code; that they're afraid of everything, but they won't scuttle the ship. Not openly.

Decidedly, business in this stricken region is improved. In the course of one truck and deliveryman's strike, a Pittsburgh department store put 90,000 parcels through the mails.

Chiseling? Surely. Hairdressers, for instance, raised the price of permanent waves from $3 to $5 as "the N.R.A. rate" until General Johnson bellowed there was no such thing!

Detroit bubbles. The low- and medium-priced automobile business is the best since 1929. Unless the beaming dealers are false prophets, you may have to wait 30 to 60 days for your new car. That has not happened in a long time.

This is news. Automobiles are not bought with C.W.A. money. When a thousand men start digging a ditch in Missouri, a shoe factory in Massachusetts may—and has—called men back to work. When people begin to buy automobiles, it means either their own business is improving or prospects are so bright they feel justified in trading in the old 1928 rattler for a new car with all the delightful 1934 gadgets.

This industry, which began by saying cynically, "Well, boys, we'll have to give this thing a whirl," announces itself 100 percent behind the N.R.A. Although it was already well organized, it is beginning to see cooperation in terms of control of plant expansion and production. It also finds it a possible means of eliminating its worst evil, seasonal unemployment. In the past, most of its men have only worked 4 months a year. Their high wages, when averaged the year round, have been a snare and a delusion.

The automotive industry is for the N.R.A but not for General Johnson. "We don't", a motor magnate stated, "like his top-sergeant manners."

Chicago is where the N.R.A. spirit reads like the wind down Michigan Avenue. When Roosevelt swooped out of the sky to meet the convention that nominated him there, the city was another ruined Pompeii, buried in the ashes of Insull's crash. Thousands of derelict men and women slept on the ground in Grant Park before the marble splendor that lines the lake front. Beyond, city streets echoed. Great stores were empty. Factory machines stood silent. Today it is once more zestful and active, if still patched in the breeches and shoes.

Over in the colossal merchandise mart, Marshall Field & Co., greatest dry-goods wholesalers in the country, found its third-quarter business increased 70 percent. Where it had practically no future business a year ago, its books are nicely inscribed today.

Last fall some 25,000 buyers marched on Chicago and purchased nearly $30,000,000 worth of goods. Usually about 10,000 come and leave fifteen million behind. Merchants are ordering higher colors. Stylists say this shows better times surely as dawn the day.

The mail-order business is enjoying a boom all its own. One concern has orders from the South that approach 1929 proportions. Their increases look like predepression stock-market quotations: Alabama, 259 percent; Georgia, 215 percent; Arkansas, 220 percent. Prices are increased, too. Printed dress goods that cost 9½ cents a yard last fall are now 14 cents. Overalls have gone up. Oh, those overalls! I heard about them right across the farm belt * * * a symbol of the way the city treats the country. Men wear them 6 days a week now. Suits are for Sunday. People are buying just the same; furniture and rugs and new coffee percolators, where they were purchasing bare necessities a year ago. They're getting married, too, and having babies. The catalogue business shows that! I hate to think how many "Niras" are going to have a hard time hiding their right age thirty-odd years hence.

Even so, they don't trust the "brain trust" out in the Windy City. A man who sold me galoshes summed it up. "These college professors, they have good ideas", he remarked, but setting them to run things is like putting a scientist from General Electric's research laboratories in charge of production.

Trade warfare, famous in Chicago, is subsiding. A laundry price war of 25 years' growth, which had come to such a pass that some firms were giving away 3 shirts with every 10 pounds of washing, was ended in 48 hours. The Chicago Federation of Labor has had an increase of 50,000 members. It doesn't like compliance because, according to E. M. Nockles, its secretary, an able, salty old character, "Employers have been cheating like horse thieves, hoping the N.R.A. will break down." The Chicago compliance board has settled 3,486 complaints (as this is written), all but 41 of them without formal proceedings.

Real estate has no more value today, most places, than it had a year ago. Nevertheless, one owner of a building of very small apartments reported, "For the first time in 4 years every flat is rented, chiefly by people who had been doubling up with their families, and now can afford homes by themselves."

Swing down to Texas, to the iron forests where the chug-chug in the tall tapering derricks is ceaseless as the croak of frogs on a summer night. Say "oil code" to a grimy-faced driller or a white-sombreroed owner. Either will offer you a cigar, probably a Corona Corona. For this industry, runaway as it is romantic, was effectively cutting its own throat when the N.R.A. cut its hideous waste to consumption demands, and raised the price of crude oil from 10 cents a barrel to somewhere between 75 cents and a dollar. It also cut hours from 11 or 12 a day to 36 hours a week. Now an oilman can use up some of the gasoline in his own automobile.

The code has not cut the allure, however. I met a woman drilling a well in California. "It looked so pretty", she said, "I had to buy it."

Lumbermen in the Northwest see order but not orders coming out of their code. They tell us we may not be able to order houses by mail any more, because they are prohibited from selling wood cheaply.

The copper mines of Montana and Arizona won't open for a long time. When copper was something to brag about, magnates got together and fixed prices so high, and mined so much, that a 2,000,000,000-pound surplus now hangs over the market. Bridget, in Butte, who used to cook Mike's stew while he dug copper 4,000 feet below the kitchen, is now thankful that he can dig a ditch for a C.W.A. pay envelop, deeply thankful. The silver mines are bright as their own metal, and gold prospecting is itself again. Deadwood, S.D., reminds the oldtimers of the days of Poker Alice and Calamity Jane!

Out in San Francisco, where industries are diversified and not too large, the N.R.A. is a grand adventure to its citizens. Here Franklin Roosevelt is Allah and fiery George Creel is his prophet. Creel, the only disciple of Woodrow Wilson I found active in the new deal, has told them it is the open sesame to a finer, more gracious life. Firmly they believe it.

Not, of course, that San Francisco is a city of commercial saints. "It's a great change surely", a bland bank president remarked. "Here's the Market Street Railway, that used to be a pretty tough customer, talking about giving its employees half its profits." This did seem millenial * * * until I found there are no profits. The idea might be a way to evade the N.R.A.

Down in Hollywood the only actors who know about the N.R.A. at all are the "bit" players who may become "extras", for less pay, and the "extras" who may be converted, economically, into "atmosphere." One carpenter was thankful for it. "Before the code, they made us work 8 weeks on half pay", he explained. "The nerve! Just when me, with a wife and four kids, was workin' tyin' ermine tails on electric-light pulls in a new star's $7,500 dressin' room!" The rest, for the most part, are as oblivious as Oscar, the penguin.

Perhaps you, reader, will say this is too kindly a picture. That I have scarcely hinted at the thousands of injustices in the name of N.R.A. The packed compliance boards; perversions of code provisions; labor racketeers; frank or subtle violations of every sort. The strain on the small business man. The inexcusable price-raising. Human greed, you may well object, may stand arraigned before public opinion, but it has not been exorcised from the

nature of man. Nevertheless, our twentieth century guild system, bearing the seeds of our traditional democracy, looks like quite a sturdy cactus.

The agricultural program is an effort to fit farm production to this pattern of planned economy, so the farmer, too, may have his share of our plenteous goods. It is unnecessary here to repeat his story; we all know it well.

Does he like it? He likes the checks. Still, hasn't he been taught all his life by his father, the State, and the United States Department of Agriculture that long hours, honest sweat, and more and more acres of good grain are the way and the objectives of life? Now along comes the Government and says:

"Look here, you've been a fool. You've slaved away your best days; had your kids running cultivators when their legs weren't long enough to reach the levers. You're wearing out your family, sapping the fertility of the soil, raising so many hogs you can't get a dime for them."

The farmer thinks somebody lies. He isn't sure who.

He knows his savings—the value of his land—are almost gone. He can't forget the prices he was receiving last year, nor the fact that he never had his share of the Harding-Coolidge prosperity. Clinging to his right to do the wrong things no matter what disaster might befall, he persisted in being the liver and lungs of the Republican Party, although its tariff policy contributed largely to his ruin.

Now, although the pleasant rain of Government checks has inspired a feeling of tolerance toward Messrs. Wallace, Tugwell, and others, he still thinks curtailment of products is silly; that there can only be a surplus when everyone has his belly full; and that everything would be fine and dandy if we just had a good hearty inflation. In this he is didactic as the Boston banker who believes a 23.22-grain gold dollar was ordained on high. Neither, apparently, is quite in line with the President's ambitious efforts to evolve a currency which will insure the real value of savings by little fluctuation in its buying power from one generation to another. Nowhere, in fact, did I find much enthusiasm for this particular variety of fiscal manipulation. Outside the farm area, most men wanted stabilization, anywhere, but soon.

The Kansas wheat farmer accepts his check thankfully, although he regards it as only fair return for the years when he produced bread for the cities at less than the cost of production. He does not, however, view the plan as any other than an emergency expedient.

He also regards it with deep suspicion, as a possible entering wedge to putting him on a license. Those who fear fascism for this country would feel better if they could stand on a street corner of a Saturday morning in, say, Dodge City, Kans., and broach the subject of licensing to the farmers who come in. To say that the idea is abhorrent is soda-pop phraseology. However, farm leaders are suggesting that it might be a good idea to license the mavericks who will not cooperate in the crop-reduction program.

The average wheat checks are $179.38, although they range from $100 to $1,400. The average check in the corn and hog plan is $296, because most corn and hogs are raised in Iowa, while the wheat money is spread out over 16 States. What do the farmers do with this money? Pay personal taxes, make an advance on the new crop, pay a few store bills, buy some necessities and save a little to finish out the winter.

One woman in Gray County who had just gotten the family check took a deep breath and announced, "We're practically out of sheets and pillow slips! And Bobby and Alice are each going to have a good warm coat. I'm going to town!"

That first shopping Saturday in Dodge City, after the wheat checks began to come in, saw the biggest crowds that had ever filled the streets of that town. One grocery store had the biggest day in its history.

One big grower was a center of interest. He paid his taxes, back bills, bought clothes for his family and a radio. His check was $1,300.

During the first 4 days the checks were out the county treasurer took in $24,000 in back taxes. That meant keeping the schools open.

One curious result of the depression in the farm region is liberalism in Iowa. The librarian at the Des Moines Public Library invited the Communists and the Socialists to hold meetings there alternate Sundays. Imagine that a few years ago! Men and women from all over the countryside flock into Des Moines to attend open forums on public problems, a project financed by the Carnegie Foundation. They listen attentively to an astounding range of discussions, but will not countenance any criticism of the President. It never occurs to them that any of the radical changes going on might deprive them of their individual liberty. When Harold Hinton said one night, "If I were Hitler", and paused; then, "No, if I were Hitler I would shoot myself", he was interrupted by a long storm of applause.

Iowa is happy. Des Moines sold more Christmas trees this year than ever before. Minneapolis, on the other hand, is a doleful city. Its great flour-milling industry is slumping, due, in part, the millers report, to the fact that the farmer won't pay any processing tax. Little crossroads grist mills are springing up; the farmer has his grain ground here. Wheat millers are highly skeptical of the crop-reduction program, contending that the farmer is a natural bootlegger, that he puts in wheat when he takes out corn. Minnesota, together with other dairy districts, is in the doldrums. Dairy farmers want checks, too!

The cotton-producing South, however, is booming. It has won the Civil War, and is getting reparations! It is whole-heartedly behind the A.A.A. King Cotton led the big parade in code making. The cotton textile code has so improved conditions in the South that Saturday night in a factory town is once more an event!

If the South is a bustling tribute to the recovery program, the realm of finance also feels the new policy—feels it like a toothache.

President Roosevelt has put the Indian sign on the bankers. And nobody but the bankers cares. You feel this, dramatically, in Wall Street. There a cathedral calm prevades the once hectic canyons.

"This bank-deposit guaranty! Horrible!" shuddered an official of a bank that had shocked the Nation with its practices. "An invitation to loose banking." He saw no humor in his statement.

Few executives of large banks like it. Nor do they like the Securities Act any better. Unanimously they claim it is a dyke against the flow of long-term finance.

The banker fears the worst from every aspect of the Roosevelt policies. Well he might. I lunched with a Chicago financier. He led me into a restaurant, a vast chamber somehow familiar to me. Finally I identified it; the Dawes' old bank. In the main body of the room were cages which once were labeled, "Receiving A-L" and "Paying M-R." Now they offer the information, "Oyster stew 35 cents" and "All salads 15 cents."

"Eh bien", murmured my host, savoring his sole Marguery and some excellent Chablis. "After all, the proletariat does us very well."

The President's moves to secure the safety of savings, whatever the gold content of the dollar, meets with thanksgiving in the average depositor. Said one newspaper editor to me, "Since the Government has guaranteed deposits and bought stock in so many banks, the people feel their money is safe as in the Postal Savings. In the past no paper dared to question the policy of any bank in town for fear of causing a run on every bank. Now our queries need not be merely futile post mortems."

The third major part of the recovery program is the Public Works Administration, designed to pump money into the country when times are hard, and to develop needed projects. Those under way include roads and buildings, bridges and canals, vast irrigation projects, the Tennessee Valley development, and subsistence farms, for which there is a special appropriation.

Building of waterways seems extravagantly inconsistent with the administration efforts to get the railroads to wake up, and to make passenger travel something else than a bad dream; to learn how to compete with trucks for hauling, with airplanes for speed, and to strive for coordination for profits.

The C.W.A. and the relief administration as a whole is, of course, purely an emergency measure, but an inspiring one. Work relief, some of it foolish and wasteful, will leave a goodly residue of value received. Edward N. Bruce's inspired plan to set penniless artists to work on public edifices, elimination of malaria and typhoid menaces, nursery schools, adult education, are only a few of the projects under way.

The President has staked our all on this program. "Will we go broke, ma'am?" a chambermaid voiced a general question as she brought me the paper that carried the news that Mr. Roosevelt had asked 10 billion dollars of Congress.

How can we go broke? There are grave doubts about the monetary manipulations. We might fall into a catastrophic financial morass. But the real wealth—the man power, the foodstuffs, the natural resources, the machinery for the business of living—we cannot lose. They are here.

Nor are we going into an Old World dictatorship of any sort. We are revising our economic and social structure to meet the demands of a liberty-loving people.

The President's program opens two roads, one toward the "functional" state, wherein agriculture and industry exercise planned self-control; the other toward some form of state socialism. The Federal Government has put millions to work; one man in every twenty is on the Federal pay roll today. It cannot abruptly withdraw its sustenance to them, nor can it suddenly, if ever, move out of the many enterprises in which it is engaged. If prosperity returns rapidly enough, for whatever cause, if an adequate number of men and women can be reabsorbed by private enterprise, and if we are sufficiently malleable to develop a technique for planned guild government, we will proceed along the line of enlightened capitalism.

Otherwise, we inevitably turn to an Americanized version of socialism. This need not be horrific as it sounds to many. Consider the number of enterprises in which the Federal Government is already engaged.

However this may be, we are thinking. We are acting. Men and women have hope in their hearts. Franklin Roosevelt's experiments are courageous and thrilling. Most of us echo the little boy who said:

"Gee! I wouldn't be dead for a million dollars!"

PROFITEERING IN PREPAREDNESS—ADDRESS BY GEN. WILLIAM MITCHELL

Mr. ROBINSON of Arkansas. Mr. President, I should like to bring to the attention of the Senate an address delivered before the Foreign Policy Association in New York on March 3, 1934, by Gen. William Mitchell. General Mitchell ranks as one of the greatest authorities, if not the foremost, on the subject of aviation. His address contains much information which I believe to be of great value. I ask that it be incorporated in the RECORD in connection with my remarks.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

The Foreign Policy Association has asked me to appear before you today for the purpose of discussing some phases of profiteering in preparedness. The subject of preparedness is a very broad one. Primarily it involves the determination of what our national defenses should be and then fitting the various parts into one another so that the greatest efficiency with the least expenditure may be obtained. There are two main elements in national defense, one the personnel and the other the matériel.

There may be profiteering in personnel. By this I mean those seeking financial profit may create a condition whereby the personnel of a great Government department is prevented from asserting itself or is rendered impotent in the determination of what equipment shall be furnished, who shall get the contracts and what shall be paid for them.

It is generally accepted in the world at large that military aeronautics will be the determining factor in future armed contests between nations. As a basis for this conviction, I shall quote the views of men distinguished outside the aeronautical vocation:

At the close of the war, Marshal Foch, commander in chief of the Allied armies, stated: "The potentialities of aircraft attack on a large scale are almost incalculable, but it is clear that such attack, owing to its crushing moral effect on a nation, may impress public opinion to the point of disarming the government and thus become decisive." This in plain words means that air attack on vital centers will be the decisive element in future wars.

In 1921, the Joint Board of the Army and Navy, under the presidency of Gen. John J. Pershing, witnessed the bombardment tests against naval vessels conducted by the Army Air Service. The report stated:

"Aircraft carrying high-capacity high-explosive bombs of sufficient size have adequate offensive power to sink or seriously damage any naval vessel at present constructed, provided such projectile can be placed in the water close alongside the vessel. Furthermore, it will be difficult, if not impossible, to build any type of vessel of sufficient strength to withstand the destructive force that can be obtained with the largest bombs that airplanes may be able to carry from shore bases or sheltered harbors."

In plain words, this means that aircraft may sink or destroy any vessel that floats on top of the sea, and, as aircraft are able to fly anywhere over land or water, it means that aircraft dominates seacraft.

The finding of this Board did not take into consideration the use of gas, water torpedoes, air torpedoes, gliding bombs, mines, or gun and cannon fire against ships. It must be remembered that naval vessels spend most of their time in harbor and that their attack at such places is an easy matter, as is the destruction of their shore establishments, drydocks, and supply points.

The Honorable Stanley Baldwin, former Premier of Great Britain, during a hearing of the air estimates in the British House of Commons, November 10, 1932, stated as follows:

"If a man has a potential weapon and has his back to the wall and is going to be killed, he will use that weapon, whatever it is * * * experience has shown us that the stern test of war will break down all convention."

This, in plain words, means that vital centers will be attacked by chemical weapons as well as others and that any attempt to limit or curtail the action of aircraft will not be countenanced, as they are more economical weapons than any heretofore devised or used.

The older services have in their past always tried to limit new inventions, opposing such innovations as the bow and arrow, the musket, the iron-clad ship, and now air power. Armies and navies have always been the implacable foes of the development of air power, wishing to restrain it and keep it under their control; the navies, because they see that eventually aircraft will supplant them in most of their duties and that in war no vessels will be able to exist on top of the water; the armies, because they derive a certain prestige from control of it. The American Army has been particularly narrow in this regard. It talks about teamwork, but the teamwork of an army compared to air power has about the same ratio as a team of bow and arrow men compared to a 16-inch cannon, or a team of a goat and a race horse hitched together. The horse's legs would have to be cut off to make him conform to the goat's speed. Air power under some conditions is able to obtain victory in war by its action alone, unaided by an army or navy. Naturally it has its limitations, as have armies and navies.

Armies will always be needed, and efficient ones, in our country particularly. The Army in the United States, with respect to the Air Service, is very much like the farmer who had the bull by the tail. He tries to hold on but is pulled along by it and is afraid that if he lets go the bull will turn around and gore him. At it has worked out here, he has yelled for assistance to the Navy and profiteers who have gallantly come to his rescue have lassoed the bull, cut off his horns, hog-tied him, and left him impotent on the ground. Now they eat the steaks.

Each committee appointed by the President or Congress, with the notable exception of one which will be mentioned later, has recommended the consolidation of our aeronautical activities under one head. On page 5 of the Report of the Select Committee of Inquiry of the House of Representatives into Operations of the United States Air Services, the committee found as follows:

"That there is no uniformity of Army and Navy policy as to organization, equipment, control of personnel, procurement, design, or use of aircraft; * * * that there is duplication in the expenditure of both money and effort by the Army and Navy."

Conditions have not changed since this report was made. The United States has taken no action whatever to meet modern conditions.

Now, let's see what the Europeans have done. In every case they have formed a department of aeronautics coequal with the Army and Navy. They have formed a professional aeronautical personnel, similar in status to that in the Army or Navy. This is trained essentially for aeronautics, is given a life position with appropriate rank and position, so that they cannot be influenced by politicians, profiteers, or corruption, nor domineered over by the other services. It is their duty to carry out the aeronautical policy which has been determined by the state.

In doing this they have created an aeronautical striking weapon, the air force, entirely independent from any other organization. It is designed to hit the vital centers of the enemy at once in case of war and destroy the will of the whole hostile people to resist. In this force there is no time for mobilization, it is constantly ready. It is backed up by a civil and commercial aviation, under the direct control of the Government, which bears much the same relation to the air force as the merchant marine does to the Navy. The Navy and Army are given detachments from this force for their own domestic service, the Navy whatever air units they need on their carriers and other ships, the Army whatever observation it requires. Another very important element placed under the jurisdiction of the air force is the Nation's defense against aircraft. This consists of all the elements including pursuit aviation, units for defense against local air attacks, methods of protecting the population against aerial attacks, and defense against seacraft.

In the United States we have no system of this kind. In Europe it is a result of hard experience. In 1915 the Germans had no difficulty in raiding the British Isles, even with the crude airplanes they had at that time. The British Army Air Service had control of air over the land, the Navy had control of the air over the sea. When the Germans came over the land it was too late for the Army air service to get in the air to attack because they had no previous notice; and when the raiders returned over the sea, as there was no coordination, the naval air service was not there. This is our condition at present. In 1917 the British formed an air ministry consisting of all the air services. The Germans had already done that in 1916. They were followed by Italy, France, Russia, Spain, and others.

In the United States we have had four periods of development of our air power. First, from the time the Wrights began flying, until the World War. During this period about all that could be done was to prove that an airplane could get off the ground and land again. The feeling of the older services toward the new creation was that it was a joke, from a military standpoint.

In the second period, during the World War, we developed a marvelous personnel and system in our military units, but in the production and purchase of our aircraft in the United States, which were turned over to civilians with military titles, one of the worst orgies of graft and corruption occurred in our history. As a result, only 100 airplanes, more dangerous to our men than to the enemy, reached the front in Europe by November 11, 1918, after an expenditure of $1,051,511,988 by the United States. This has been attested to by various committees and boards, one of which was presided over by Mr. Charles E. Hughes, now Chief Justice of the United States. Mr. Hughes recommended trial by courtmartial of those responsible. The planes we fought in were of foreign manufacture. This period ended in 1919.

From 1919 to 1926, the aeronautical racketeers were practically eliminated. The Government ran the Air Services. The Army Air Service, on its return from Europe, had an opportunity to go ahead and adopt an experimental and operational program which put it far ahead of the world in aviation and which would have continued had it not been stopped from outside. It acted at this time practically as an independent force, as it was not throttled then by the General Staff of the Army. Carrying the mail was developed during this same period under Government control.

The fourth period came after the findings of the Morrow Board in 1926, and the enactment of their recommendations into law. The effect of this substantially was to turn over our areonautical development to what might be termed the aeronautical racketeers. Not a single change for the better was made in our aeronautical policy, system, or organization. The old methods were perpetuated in a stronger form and in addition subsidies for carrying the mail were provided for. The result was as follows:

The Navy kept its air organization; the Army kept its air organization. The Coast Guard had one; the Marines had one. The National Advisory Committee and the Bureau of Standards had a finger in it; a new unit was created in the Department of Commerce to handle civil aviation. But, due to the granting of postal

subsidies, still another unit was set up in the Post Office Department, which has proven to be the most pernicious element that ever entered into our aeronautical situation. A small group of people similar to those who gained control of our aeronautical production during the World War formed themselves into holding companies into which were taken the factories building aircraft, the factories building motors, and the companies organized to operate the air mail and passenger service. These civilian operating companies created an entirely new air personnel, that of commercial pilots, over which the Government had no jurisdiction. The airplanes used for carrying passengers and mail were not under the jurisdiction of the Government except as to inspection and airworthiness. The Government, however, paid out the money for the operation and maintenance of this whole system, $46,800,000 being paid out as mail subsidies alone. (CONGRESSIONAL RECORD, Feb. 14, 1934, p. 2471–2.) Sufficient experimental money, which the Government had been able to use before, was taken away from it on the ground that if it was turned over to the aeronautical industry it could do more than the Government.

The result has been that the merchants in control of our aeronautics have attempted to sell what they had to the Government with as little improvement as possible, because if improvements were made, money on experimentation would be required and a change in types of motors and planes would also require different tools, jigs, and other things for the making of new equipment.

As all of this is paid for by the United States Government, it is evident that the Government should have not only the dominating voice in what is done but should see that the funds are honestly and efficiently spent. As has been brought out in evidence, these profiteers have taken their stock and run it up from $1 to $10,000. They have paid enormous salaries, in one case about $400,000 a year, and others in proportion. These men know little about aeronautics and think first of making money, next of furnishing service. This is why our aircraft of all descriptions have fallen way behind what they should be and why our commercial aircraft are deficient in safety devices, navigational instruments, and speed.

These manipulators of our aeronautics have been all-powerful politically. They have put their representatives in Washington to influence not only the giving out of contracts but policies also. They wish to keep our aeronautics separated, for in that way the functions are overlapping and more money is spent by the Government.

Recent investigations have shown, first, that in many cases there have been too great profits in the manufacture of airplanes; second, that profiteering has taken place by manipulation of stock of aircraft companies; third, that there has been collusion between air-mail contractors, operators, and others with respect to Government contracts, as brought out by the United States Senate committee investigating air-mail contracts; fourth, that the method of development and procurement should be improved; fifth, to protect the Government in the construction and operation of aircraft, certain prototype airplanes, and any equipment found necessary should be built by the Government to determine costs and efficiency, and in this connection the Government should operate certain aircraft along all airways to all our possessions, in all kinds of weather throughout the year.

There is nothing new about any of these matters. They have come up before the Congress each year. There have been practically the same discussions among aeronautical men the world over. The conditions are well understood. Every nation has looked them squarely in the face and solved them except the United States. These conditions can be corrected by adopting a definite policy for aeronautics for the United States, causing an experimental program of airplanes, aircraft engines, instruments, and armament to be developed under a permanent and capable personnel of a single service, requiring procurement be made according to law by a single service, by competition, and putting the accounting under the General Accounting Office of the Treasury, presided over by Mr. McCarl. Aeronautical publicity and education should be carried out under the aeronautical branch instead of the Army, Navy, or other agency, as is the case at present.

In the field of operations, these same self-seeking interests have conducted the air mail and passenger services, all the pioneer work on which had been done by the United States Government. Upon these Government airways they superimposed their private radio system. They had their own corps of pilots, about 500, who drew salaries as high as from $750 to $1,000 a month.

When the administration in its wise discretion threw out the air-mail contracts as having been obtained by collusion and fraud, the Army was ordered to carry the air mail. The flying personnel of these civil companies and the airplanes, as they are maintained by Government subsidy, should have been subject to the Government's call at any time the Executive Department decided that an emergency existed. But look what happened to these noble patriots. They are not subject to the Government's call; it is not contained in the law.

The United States could not use their radio system nor their radio equipment, nor their planes. This is why they announced so emphatically that the Army could not carry the mail. Thereupon the Army Air Corps, which was not properly equipped for any kind of duty, due to the machinations of these aviation profiteers and to service politicians, undertook to carry the mail under conditions which these very people who are putting up such a great hue and cry through their controlled press could not have done. They have used inferior radio and inferior airplanes without a whimper to carry out the President's wishes and have rendered a wonderful account of themselves. Only one man has been lost while actually carrying the mail. The operation of these lines will give the Government an opportunity to figure up what the costs should be in a service of this kind, how it should be handled, and what our future course should be.

The civilian companies not only attempted to arrogate to themselves all the functions of air power in this country but to defy the Executive. Their propaganda through their inspired press, has filled the country with their great deeds. But the passenger planes they have provided do not have necessary modern safeguards; they are not provided with automatic pilots, except in a few cases; they do not have cabin parachutes, nor defrosting equipment, nor resonance altimeters, nor landing sticks and other devices for the care and safety of passengers. Such a condition would not have been tolerated for a moment under any sensible aeronautical administration.

The control of civil and commercial aviation presents quite a complex problem and has been handled in different ways in various parts of the world. The object of subsidies is to develop aeronautics as a general asset to the country to be used in case of emergency and to extend the national culture and interests. The great nations of the world subsidize their regular airways. As a general proposition their equipment is prescribed, their personnel, both in the air and on the ground, has to answer certain requirements, and they are all subject to call in emergency by the Government.

The present world position of the United States Air Services (they cannot be called air forces) is well illustrated in a study made by an expert, from which I quote:

"The United States is third of the nations in merely the number of warplanes (three close behind).

"It is sixth of the nations in the number of factories manufacturing warplane or high-powered airplane engines.

"It is definitely the most backward of all the nations manufacturing warplane engines and warplanes, in the design of them in service and projected.

"Its leading warplanes are most deficient in elasticity of performance.

"Its leading warplanes cannot even reach similar foreign planes to do battle with them.

"Comparatively, it does not actually make or possess any warplanes.

"The whole of its air forces could probably be grounded and rendered useless or destroyed by the tiny Belgian air forces, given the same type of warplane pilots as the principal combatant nations had in the World War.

"The whole of its air forces could be grounded and rendered useless or destroyed by 30 percent of the British Royal Air Force, or 40 percent of the French Air Force, or 50 percent each of the Italian, Japanese, or Soviet Russian Air Forces.

"It will take at least 2 years to catch up with the outside world in design, production, and availability of warplane engines and warplanes if it begins to produce the leading types of these devices under license from the original foreign manufacturers; and at least 3 to 4 years if it proceeds without such foreign licenses, and if the foreign nations concerned stop progress meanwhile.

"The United States Air Forces cannot fight when they like, where they like, or how they like."

* * * * * * *

"The structures of that portion of the aviation industry of the United States which is producing warplane engines and warplanes is assembled as follows:

"(a) The United Aircraft and Transport Corporation, New York, N.Y., which controls the following:

"1. Boeing Airplane Co., Seattle, Wash., airplanes and warplanes.

"2. Stearman Aircraft Co., Wichita, Kans., airplanes.

"3. Sikorsky Aircraft Corporation, Bridgeport, Conn., airplanes and warplanes.

"4. Chance-Vought Corporation, East Hartford, Conn., warplanes.

"5. Pratt & Whitney Aircraft Co., East Hartford, Conn., P. & W. 'Wasp' and 'Hornet' air-cooled radial airplane and warplane engines.

"6. Hamilton Propellor Co., East Hartford, Conn., airplane and warplane propellers.

"7. Boeing School of Aeronautics, Oakland, Calif., flying service.

"8. United Aircraft Exports, Inc., New York, N.Y.

"9. Boeing Aircraft of Canada, Ltd., Vancouver, B.C.

"This group of firms, probably the largest aircraft trust in the United States, is not free to make its own decisions on aviation matters. Possibly, its technical and other material becomes speedily known to foreign countries. It is controlled by the National City Co. and the National City Bank of New York and by the Morgan International financial interests.

"(b) The Curtiss-Wright Corporation, New York, N.Y., which comprises the following:

"1. Curtiss Aeroplane & Motor Co., Buffalo, N.Y., airplanes and warplanes.

"2. Keystone Aircraft Corporation, Bristol, Pa., airplanes and warplanes.

"3. Curtiss-Wright Airplane Co., St. Louis, Mo., airplanes.

"4. Wright Aeronautical Corporation, Patterson, N.J., Curtis D. 12 (450–500 rated hp. water-cooled) and 'Conqueror', Prestone-cooled airplane and warplane engines, and Wright 'Cyclone' and 'Whirlwind' air-cooled radial airplane and warplane engines.

"5. Curtiss-Wright Flying Service, flying service.

"6. Curtiss-Wright Export Corporation, New York, N.Y.

"7. Canadian Wright, Ltd., Montreal, Canada.

"This group of firms constitutes another aircraft trust in the United States, and it is about the size of the United Aircraft & Transport Corporation already referred to. The Curtiss-Wright Corporation is likewise not free to make its own decisions on aviation matters. Possibly, all its technical and other material also becomes quickly known to foreign countries. In the background the Chase National Bank and the Rockefeller financial interests are concerned with the Curtiss-Wright Corporation. The Bank of Manhattan Co., the City Bank Farmers Trust Co., the Central Hanover Bank & Trust Co., and the Marine Bank of Buffalo, N.Y., appear more prominently as this corporation's bankers.

"The Curtiss-Wright Corporation and the United Aircraft & Transport Corporation between them control the aviation industry of the United States. Their pattern is the same and they present a united front to any third party, including the Government of the United States. They monopolize the manufacture of airplane and warplane engines in this country. It is the case with both of them, that the last word, on whether or not they shall adopt any aviation improvement or invention, lies not with their technical executives, but with their outside, unqualified financier masters. These groups maintain a pool of patents that discourages the offer and adoption of any aviation improvement or invention from without, and deprives their own personnel of real incentive to make any such improvement or invention. Neither of the groups has been responsible for the introduction or adoption of any actual improvement in aircraft or aircraft engines.

"They have been and are being caused by the purely financial powers behind them to adhere to the false manufacturing policy in a competitive market of maximum reproduction with minimum improvement. Although the trust builders and stock manipulators of these combines have prevented competition in the design and production of aircraft and aircraft engines in the United States, they have been, naturally, unable to slow down that of foreign countries and so their progress has made United States air defense a negligible factor in the world today.

"(c) North American Aviation, Inc., New York, N.Y., which comprises the following:

"1. Berliner-Joyce Aircraft Corporation, Baltimore, Md., warplanes.

"2. Douglas Aircraft Co., Inc., Santa Monica, Calif., airplanes and warplanes.

"3. Sperry Gyroscope Co., Inc., Brooklyn, N.Y.

"4. Ford Instrument Co., Long Island City, N.Y.

"5. Transcontinental & Western Air, Inc., New York, N.Y.

"6. Eastern Air Transport, Inc., Brooklyn, N.Y.

"This smaller aircraft combine is, perforce, subject to the United Aircraft & Transport Corporation, and the Curtiss-Wright Corporation, because of its dependence upon them for airplane and warplane engines, their ascendancy in the aviation industry of the United States, the market they provide, the great financial powers behind them, and interlocking interests in general.

"(d) The leading allegedly individual firms engaged in warplane production in the United States are the following:

"1. Bellanca Aircraft Corporation, New Castle, Del.

"2. Consolidated Aircraft Corporation, Buffalo, N.Y.

"3. General Aviation Manufacturing Corporation, New York, N.Y., affiliate of General Motors Corporation, took over the Fokker Aircraft Corporation in 1931.

"4. Glenn L. Martin Co., Baltimore, Md.

"5. Great Lakes Aircraft Corporation, Cleveland, Ohio.

"6. Gruman Aircraft Engineering Corporation, Valley Stream, Long Island, N.Y.

"7. Hall-Aluminum Aircraft Co., Buffalo, N.Y., affiliate of the said Aluminum Co. of America, New York., N.Y., the Mellon-controlled Aluminum Trust.

"These seven concerns together merely approximate the size of only the Curtiss-Wright Corporation. They are more or less independent, as regards each other and North American Aviation, Inc., but they are, perforce, subject to the United Aircraft & Transport Corporation and the Curtiss-Wright Corporation for the same reasons that North American Aviation, Inc., is subject to these two ascendant combines.

"Thus, at least all the worthwhile limbs of the aviation industry of the United States, engaged in producing warplane engines and warplanes, are shackled as heavily as possible by the limitations of the private and wholly financial interests of the Wall and Pine Streets area of New York. No foreign country, manufacturing warplane engines and warplanes, permits any similar restriction of its aviation industry."

* * * * * * *

In addition to regular passenger lines, the European governments usually encourage by subsidy civilian flying clubs, light airplanes and flying equipment which citizens of the country may own themselves and use either in sport or in commerce. This should have been done long ago in the United States but it has been opposed by the aircraft profiteers as they would not make as great a margin of profit from small planes, or if other factories were developed; also they felt this might develop a mass inclination leading to a department of aeronautics.

To sum up what should be done in this country: I believe we should have a department of aeronautics, under which should be:

(1) An air force. This is an independent striking force to be used against the enemy's vital centers. Detachments from it would be made to the Army and Navy for their own domestic uses. (This is the European system.)

(2) Civil and commercial aviation. This section should supervise all civil and commercial aviation, airways, weather services, radio stations, and inspection of civil air personnel.

(3) Engineering and procurement. This would prepare the engineering data for all aircraft, motors, armament, and equipment and attend to the procurement of all aircraft for the Government.

I would advise the operation of the air mail by the Government, a direct subsidy for passenger air lines, the Government prescribing the class of equipment and the qualifications of the pilots, all of whom should be subject to the call of the Government in case of emergency. I would prohibit all holding companies and combinations, which are made, among other reasons, for the purpose of avoiding income taxes. I would insure competition in design for aircraft and accessories and then allot production orders to the factories who are the lowest responsible bidders. This would insure a regular personnel dedicated to aeronautics, an honest administration of our civil aviation, and an engineering control which would bring out the best talent in the country. At present the best engineering talent has been crowded out by the profiteers.

The Air Service is 50 times more dangerous in time of peace than the Army Service, and 5 times more dangerous in war. Its duties are distinct and separate from those of an army or navy. It cannot be run by either. This has been the experience of every country in the world, including ourselves.

During the former administration, it was impossible to cope with class and privilege, so strongly were they entrenched, but the mandate of the people in the last election was that the Government must clean house and return to the people 100 percent on the dollar for the taxes they contribute to the National Government. We have a man in the White House now who is unafraid, and we hope that he will make a decided change in our desperate aeronautical situation.

ON CRITICISM—EDITORIAL FROM WASHINGTON POST

Mr. FESS. Mr. President, in this morning's Washington Post there is a very thoughtful editorial on the subject of criticism. I ask unanimous consent to have it inserted in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ON CRITICISM

It would be interesting to know how many of those who heard the President yesterday were struck by the paradox in political thinking then revealed. On the one hand, Mr. Roosevelt gave to industry a definite challenge—his own word—to give more employment at higher wages and shorter hours. How industry is to do this and remain self-supporting he did not indicate. It was, we repeat the President's word, "a challenge."

On the other hand, Mr. Roosevelt, attacking those "who do not think things through", explained in some detail the type of opposition which he resents. That is, criticism which fails to suggest alternative methods and does not contain helpful proposals. "This critic," said the President, "contributes nothing—he is not constructive; he is unpatriotic because he attempts to destroy without even suggesting a way to build up."

In other words, it seems, it is entirely appropriate and proper for the administration to "challenge" industry, which certainly has on the whole given most loyal cooperation to the recovery program, while at the same time it becomes unpatriotic for industry or any other element of the body politic to challenge the administration. One partner in the national team may order and instruct. The other partner may suggest—so long as his suggestions do not overstep the bounds of prim obedience. And right there is the distinction, not so subtle that it is hard to understand, between what this administration means when it talks of "the American method" and what many Americans, as sincere and patriotic and self-sacrificing as any party leader, understand by that fine phrase.

There is, moreover, something more than a passing word to be said on the nature and function of criticism. To state that civilization has advanced whenever and wherever the critical faculty is active has bogged down as that faculty has been absent or suppressed, is merely to state the most obvious moral of recorded history. Nor does this apply merely in the field of politics. It is equally true in every form of intellectual and artistic endeavor.

Imagine, for instance, the role of a literary critic who should be told that he must praise the latest novel as a whole, although, to be constructive, he might suggest some alteration, for a future edition, in the delineation of the heroine. Imagine, again, the position of the dramatic critic instructed to praise the play, though generously encouraged to suggest to the leading players some change in the enunciation of their lines. It is just because that form of dramatic criticism is too much the custom that the whole art has declined, and the level of the stage in rapid consequence.

Honesty, conviction, intelligence, and specialized knowledge—those are the hallmarks and the only hallmarks of true criti-

cism, in which neither sycophancy nor the demands of the box office play any part. And if the founders of this country, to whom Constitution Hall is dedicated, had felt that unconstructive criticism was by that token undesirable—we would have no President to tell us otherwise today.

These are the thoughts, induced by apprehension, not by hostility, which raise grave doubts in the minds of countless sober citizens today. Those doubts will not be exorcized by calling them un-American. They cannot be assuaged by assurances—which beg the issue—that the country will not turn back to abuses which only a trivial portion of the population would seek to have restored.

THE ADMINISTRATION'S PROGRAM—ARTICLE BY FRANK KENT

Mr. FESS. Mr. President, there appears in the Baltimore Sun of today an article from the pen of Frank Kent relative to the administration's program. I ask unanimous consent to have it inserted in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ALL STILL IN THE AIR

By Frank R. Kent

WASHINGTON, March 5.—So effective is the propaganda back of the Roosevelt program that it is difficult to see the actual facts. It has what many regard as almost a monopoly of the radio and great support from the press

The latter comes not so much from belief in Roosevelt policies as from a desire not to retard a recovery which started all over the world a year ago and with which legislation has little to do. That desire is deep, too, in the public heart and accounts in large measure for the absence of opposition. There is real reluctance to do anything that might change the mood of the people or create difficulties.

Also, any such effort would be very unpopular. Evidence of this was given in what happened when Alfred E. Smith voiced his belief that the new deal experiments had flopped. He was literally ganged by the administration and in a week's time pulled off his pedestal as a popular idol. It is this sort of thing that renders inarticulate those who distrust the Roosevelt plans, creates a disposition to go along regardless of distaste and disbelief.

Undoubtedly things are better here, just as in England and Canada. In face of that, there is no nourishment trying to stop experiments that can't be stopped, or, while Federal cash pours into millions of pockets, pointing out dangers to a people bulging with enthusiasm.

At the start of the second Roosevelt year, however, one fact stands out. Not one of the new deal experiments has passed beyond the experimental stage. Not one has succeeded. It can be claimed they have bettered conditions and are on the eve of success. It also can be claimed we would have made as much progress without them, that they are bound to fail, that their pursuance makes the future insecure. Whichever view one takes, it is clear the experiments remain experiments.

Take the most vital—A.A.A., N.R.A., and the new monetary policy. By the men directly responsible the admission is made. The agricultural policy, which started as an effort to get farmers voluntarily to reduce production, has been switched to a compulsory policy, which opens so wide a door that Secretary Wallace, himself, recently pointed out the dangers, voiced his doubts and alarm.

Within the week, failure of the N.R.A. to reach its objectives has been generally admitted. Regardless of the Presidential eulogy, the whole business has got to be revamped, the policies changed. A great administration effort is being made to put this sagging experiment again on its feet and regain for it a popular sentiment that has gone sour.

The financial policy remains the most experimental of all. No one knows how it will turn out nor what the next step will be. This includes Secretary Morgenthau. Last week, before a House committee, he frankly said he could not tell from day to day what the course would be. All he wanted was to be let alone while he worked on the experiment. One administration policy—the C.W.A.—was dropped because it was saturated with graft, waste, politics. Also it threatened to become an unbearable drain on the Treasury. A week ago the President announced a substitute, which differs only in name. It is a continuation for at least 6 months of a project indicted by its own Director.

The truth is Mr. Roosevelt's experiments are all still in the air, with neither him nor anyone else able to say where they will land. There is a better feeling in the country, due partly to world recovery, partly to increased buying power, flowing from the Government billions. But, that we are out of the woods, no calm person contends.

It is true many people who had no work are better off than last year. Industry has taken care of some; C.W.A. and other Government pay rolls of many more. But it is also true a great many who had jobs before Roosevelt came in—and still have them—are not nearly so well off. They have had cuts in pay, increase in living costs, and heavier taxes. The latter outnumber the former, but they all feel better. How they will feel in another year no man can tell.

THE ELECTORAL COLLEGE—ADDRESS BY SENATOR POPE

Mr. NORRIS. Mr. President, on the 15th day of February of this year the junior Senator from Idaho [Mr. POPE] delivered an address in Philadelphia at a fraternity banquet. One of the questions discussed was the electoral college and its proposed abolition. I ask unanimous consent that the address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Mr. Chairman and fellow members of Delta Chi, Rousseau once said:

"In a well-conducted city or state, everyone hastens to the assemblies; while under a bad government no one cares to move a step to attend them. * * * As soon as anyone says of the affairs of the state, 'Of what importance are they to me?' we must consider that the state is lost."

Judged by this standard, it is certain we have a well-conducted Government. At any rate, it is true that never before in the peace-time history of our country has there been such governmental activity, and perhaps never before so much active interest in their Government by the people. The citizens are applauding, criticising, discussing, and thinking of their Government. They are suggesting and proposing remedies. My daily mail is filled with plans advocating every sort of remedy from the complete change in our form of government to the simple device of requiring all drunken drivers to place a red flag on their automobile windshields to announce their jovial but dangerous condition to all sober people. Judging from the number of letters received, this simple plan seems to have rather wide support in a certain section in my State.

The idea of a new deal is a stirring force in our national life. It fills the newspapers and magazines; we hear it over the radio and on the street corner. It is the subject, in one form or another, of almost every public address.

The new deal is usually thought of in terms of economic and emergency measures enacted by the special session of Congress last year and the present session and the administrative activities in carrying out these measures. In the public mind it is associated with such measures as the National Recovery Act, the Agricultural Adjustment Act, the Public Works Administration, the Civil Works Administration, the Civilian Conservation Corps, the gold bill, and the like.

It is not these matters, however interesting as they are, that I shall discuss this evening. I would draw your attention to some other proposals, political in nature, that should be a part of the new-deal program of this administration. These proposals have to do with some very vital and fundamental functions of our Government—one with the method of electing the President and the other with the method of ratifying amendments to the Federal Constitution. In other words, one proposal deals with the abolishment of the archaic electoral college, and the other with an amendment to article V of the Constitution providing for direct ratification of amendments by vote of the people.

On June 18, 1787, Alexander Hamilton arose from his seat in the Constitutional Convention and offered a plan for the election of the President of the United States. He said:

"It is admitted that you cannot have a good Executive upon a democratic plan. See the excellency of the British executive. He is placed above temptation. He can have no distinct interests from the public welfare. * * * Nothing short of such an executive can be efficient."

Some days later, discussing this subject, he added:

"That the immediate election should be made by men most capable of analyzing the qualities adapted to the station (of President) and a small number of persons, selected by their fellow citizens from the general mass, will be most likely to possess the information and discernment requisite to so complicated an investigation."

Based upon this idea, the electoral college was provided in the Constitution as the method of appointing the President. It was provided that each State shall appoint, in such manner as its legislature may direct, electors equal to the number of Senators and Representatives to which the State is entitled in Congress.

Hamilton was so well pleased with this plan that during the campaign for the ratification of the Constitution by the States he said:

"The mode of appointment of the Chief Magistrate of the United States is almost the only part of the system, of any consequence, which has escaped without any censure."

It is apparent, then, that the so-called "electoral college" was established for the very definite purpose of enabling a small number of persons to select the President. Its purpose was not to enable the voters of the country to elect a President. Hamilton further said:

"I confess that the plan is very remote from the idea of the people."

Such was the purpose, and such was the plan adopted by the framers of the Constitution about a century and a half ago.

The plan still exists, but its purpose has never been realized. Almost from the time of its creation it has resembled a machine designed for one purpose and used for another. The people declined, in fact, to delegate their prerogative of electing a President. Electors have been chosen to reflect the opinions of the voters and not the opinion of the electors. In this respect the electoral college became obsolete in the eighteenth century and has neither effectuated the aims of its inventors nor fully the democratic views of the voters. It has been a misfit in our governmental structure. Its only effect has been to defeat the popu-

lar will in a number of instances. Three times the voters have chosen a President, but their choice has been defeated by the electoral college.

It is directly responsible for such political atrocities as occurred in 1824, when Jackson was elected by the people and Adams was made President; in 1876, when Tilden was elected and Hays became President; and in 1888, when Cleveland received the popular mandate and Harrison was declared to be President. This speaks eloquently of the patience and forbearance of the American people.

It is not generally realized that under the Constitution, as framed, it would be perfectly regular to select a President without an election at all. A State legislature has power to appoint electors itself or authorize the Governor of the State, the Republican State chairman, or the Democratic State chairman to do so, or such legislature might authorize the President of the United States to appoint electors to select himself or another as President.

This shows what a queer anachronism the electoral college really is.

As the practice of holding elections has developed, however, no legislature would dare resort to such extreme measures in selecting electors, but it is interesting and important to realize the legal situation under the electoral college system.

As Presidential elections are now conducted, there are two serious objections to the method of electing the President.

In the first place, as experience has demonstrated, a candidate receiving a minority vote may be elected as against one receiving the mandate of the voters of the country—a result in contravention of the fundamental principle of our Government. It is easily conceivable that one candidate may be the overwhelming choice of the voters and another who receives a bare majority of the votes of a comparatively few of the larger States may be declared elected. This system has repeatedly been condemned by publicists, students of our Government, and statesmen since the beginning of the nineteenth century. That such a method has survived is one of the remarkable things in the history of our Government.

In the second place, in most States the names of candidates for President and Vice President do not appear on the ballot and the voters are not permitted to vote directly for such candidates. The names of the electors are mere figureheads in whom the voters are not interested and for whom they have not the slightest concern. The effect is to cause confusion and disgust in the minds of the voters who should have the right to vote for President and Vice President freely and directly. It is a rare occasion when one is heard to defend the existence of the electoral college. It should be abolished.

There is now pending in the United States Senate a joint resolution offered by the veteran progressive, Senator GEORGE W. NORRIS, of Nebraska, to abolish the electoral college. His proposal deserves the support of every Member of Congress and of the people of the United States.

The other proposal I shall discuss is one to provide for popular ratification of amendments to the Federal Constitution.

On June 5, 1787, Mr. James Madison, one of the ablest and perhaps the most scholarly man in the Constitutional Convention, said he thought it indispensable that the new Constitution should be ratified by the supreme authority of the people themselves. And on June 23, on the motion made by Mr. Ellsworth that the Constitution be referred to the legislatures of the States for ratification, Colonel Mason considered a reference to the people as important and essential. These suggestions, however, did not prevail, and the Constitution was submitted to the legislatures of the States for ratification.

The Constitution which was finally adopted contained article V, which provides two ways of proposing amendments—(1) by joint resolution of the two Houses of Congress, and (2) by convention called by Congress upon the application of the legislatures of two thirds of the States. Such article also provided two ways of ratifying amendments—(1) by the legislatures of three fourths of the States, and (2) by conventions in three fourths of the States.

Strangely enough, although many States had provisions for popular ratification of amendments to their constitutions, and it had been suggested as to the ratification of the Federal Constitution, no suggestion was made at the time of the adoption of article V for popular ratification of amendments to the Federal Constitution.

Every reason that could be urged for popular ratification of amendments to State constitutions would seem to apply with equal force to popular ratification of amendments to our National Constitution. At any rate, article V was adopted providing for proposal and ratification of amendments without popular ratification, except that when ratification by conventions takes place in the States the delegates to such conventions are elected by the people on the issue involved. This convention method of ratification has never been used in the States except in the recent repeal of the eighteenth amendment.

During the present session of Congress I have introduced a joint resolution to amend article V providing that an amendment to the Constitution may be proposed by a joint resolution of Congress as now, or upon application of the legislatures of two thirds of the States, or by a majority of the electors of two thirds of the States voting at a regular election, and further providing for ratification by a majority of electors of three fourths of the States voting at any congressional election. It is my contention that this proposed amendment is sound and meritorious.

In the first place, since all powers not granted in the Constitution are reserved to the people, it seems entirely logical, and in harmony with the principle of popular sovereignty that the supreme authority—the people themselves—should express approval or disapproval of any proposed change in our fundamental law.

Such authority and responsibility placed in the hands of the people will promote interest and discussion. It has educational value of much importance.

The discussion of prohibition by the people the country over, the throwing of it into the crucible of public opinion, and the determination of this question by the electors themselves, whatever one's view may be on that controversial question, has left a sense of satisfaction in all thoughtful minds. Dean McBain, of Columbia University, in a current magazine article, says that never again will the mode of ratification by the State legislatures be used. That provision, he says, will be another dead letter of the Constitution.

The question then arises: Why does not the present method of ratification by convention suffice? Why is not this method sufficient to give the people the opportunity to determine the issue? Why are not the advantages of discussion and education to be found in the Constitution as it now stands?

There are some very practical considerations to be thought of in using this method.

When special elections are held to select delegates for conventions, the expense of such elections and conventions is an important consideration. I have recently made investigations to determine the expense to the various States and counties incurred at the recent elections to repeal the eighteenth amendment. The secretaries of most of the States were unable to give me any estimates of such expense. A few did. Michigan spent about $600,000; Kentucky, from $185,000 to $200,000; California, about $150,000; Texas, about $150,000; Wisconsin, over $90,000; Oregon, over $75,000; Florida, $55,000; Delaware, about $41,000. Here then are eight States that expended about $1,500,000 on these elections. Assuming that the other 28 States spent proportionately the same amounts, the aggregate would be over $5,000,000. This was expended at a time when almost every city and town in the United States is appealing to the Federal Government for relief funds—when business institutions, school districts, irrigation districts, drainage districts, and other taxing bodies are appealing for funds—when billions of dollars of Federal funds are being expended for relief work throughout the country.

Under the proposed amendment, popular expression on proposed constitutional amendments would be obtained at the regular elections for Members of Congress without additional expense, thus saving substantial sums as above mentioned incident to special elections.

Another important reason for such an amendment is that the popular expression will be obtained at a time convenient for the voters. The largest vote naturally is at a presidential election, the next is usually at a congressional, usually accompanied by a State election.

I have also made an investigation of the number of votes cast at the recent election to repeal the eighteenth amendment as compared to the last presidential election. The following is the interesting result of my inquiries:

State	Vote in 1932	Vote on repeal amendment
1. Alabama	245,354	170,900
2. Arizona	118,251	48,966
3. Arkansas	220,562	113,713
4. California	2,267,966	1,397,104
5. Colorado	457,696	196,185
6. Connecticut	594,183	271,558
7. Delaware	112,901	59,120
8. Florida	276,586	122,636
9. Georgia	255,590	----------
10. Idaho	186,520	106,649
11. Illinois	3,407,926	1,569,441
12. Indiana	1,576,927	809,182
13. Iowa	1,036,683	626,195
14. Kansas	791,978	----------
15. Kentucky	983,063	551,865
16. Louisiana	268,934	----------
17. Maine	298,444	167,795
18. Maryland	511,054	250,906
19. Massachusetts	1,580,114	534,058
20. Michigan	1,664,765	1,138,477
21. Minnesota	1,002,843	508,926
22. Mississippi	146,034	----------
23. Missouri	1,609,894	660,603
24. Montana	216,479	----------
25. Nebraska	576,946	----------
26. Nevada	41,430	(1)
27. New Hampshire	205,520	106,453
28. New Jersey	1,630,063	664,265
29. New Mexico	151,606	69,033
30. New York	4,688,930	2,193,982
31. North Carolina	711,590	373,144
32. North Dakota	256,290	----------
33. Ohio	2,610,088	1,013,104
34. Oklahoma	704,533	----------
35. Oregon	368,808	209,567
36. Pennsylvania	2,859,021	2,069,840
37. Rhode Island	269,170	171,118
38. South Carolina	104,411	71,436
39. South Dakota	288,438	----------

[1] Unknown.

State	Vote in 1932	Vote on repeal amendment
40. Tennessee	390,637	247,103
41. Texas	63,394	506,051
42. Utah	205,579	168,112
43. Vermont	136,980	61,896
44. Virginia	297,943	157,978
45. Washington	632,032	337,043
46. West Virginia	743,774	355,190
47. Wisconsin	1,114,815	789,549
48. Wyoming	96,962	(1)

[1] Unknown.

It will be noted from the above table that the Presidential vote is very much larger than the vote on the eighteenth amendment. In the State of Pennsylvania about 800,000 more voters expressed themselves at the Presidential election than at the special election. In Idaho the difference was about 80,000. In other States the disparity is proportionately very much greater.

In conclusion I submit that such a proposal to extend to the people—the supreme authority in our Government—a practical, inexpensive, and expeditious method of voting directly upon the question of amending our Federal Constitution deserves serious consideration. It is not a novel procedure, as in most of the States the people are permitted to vote directly upon proposed amendments to State constitutions. And they may now, when permitted by Congress, vote indirectly under the convention method.

Such a proposal is in harmony with the fundamental democratic principles of our Government.

The reasons for the proposed amendment to the Constitution sponsored by Senator NORRIS, to abolish the archaic electoral college, which would permit the people to vote directly for candidates for President and Vice President of the United States, apply with almost equal force to the amendment here proposed.

Both provide for a simple and practical method for obtaining a direct expression of the people upon the most vital matters in a government by the people.

NAVAL CONSTRUCTION

The Senate resumed consideration of the bill (H.R. 6604) to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington, February 6, 1922, and at London, April 22, 1930, at the limits prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes.

Mr. NYE. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator will state it.

Mr. NYE. Under the unanimous-consent agreement under which we are now proceeding is it in order to submit a motion to lay the pending bill on the table?

The VICE PRESIDENT. It is not in order.

Mr. NYE. Mr. President, I address myself to the bill pending before the Senate, sometimes called the naval construction bill, sometimes called the national bluff, bluster, and bully bill, but which I should much prefer to call a bill for the relief of the munitions makers of the United States.

One perhaps could find some little humor in the situation were it not for the fact that we are dealing, in this particular question, with something like a billion dollars, at a time when the Congress itself and the Nation as a whole are finding it necessary to resort to all manner of economy. Since we are considering this particularly wasteful piece of legislation, I think it altogether fair to point out what may be irony or what may be brass in connection with it.

It was not many years ago, well within the memory of all of us at least, that we were engaged along with other civilizations in a terrible world war. We got some consolation during those years of warfare out of the thought that we were engaged in a conflict intended to make the world safe for democracy. Today, 15 years later, there are those who rise to ask, where is there any semblance of democracy left?

We got more consolation during those years of conflict when we told ourselves that we were engaged in a tremendous conflict the main purpose of which was that of ending war, ending war for all time, a war to end war. Now, 15 years later, we find every nation on earth practically, including ourselves, preparing as we never prepared in any single year before for, evidently, more war.

The pending naval construction bill, or the bill for the relief of the munition makers of the United States, is calling roughly for $500,000,000 or $600,000,000. Before there has been completed the program, which is generally in outline as the result of this bill, the expenditure is certain to be at least a billion dollars. I think it altogether fair to refer to the naval construction bill as being a billion-dollar construction bill. We are about to pass it. I think that there is little doubt. We are about to pass it at a time when, as others have pointed out, practically every community in these United States is confronted with an impossible problem as relates to the maintenance of their schools. Community after community not only has had to slash its educational expense to the bone, but many of them have found it absolutely impossible to maintain schools at all; and yet we do not find Congress particularly interested in legislation looking to the maintenance of our educational institutions. In fact, when we have to deal with the appropriation bills involving the National Office of Education, we see to it that some more of the expenditures which the Federal Government has authorized in other years are slashed off, and that cuts are made in the appropriation for education.

When the governmental employees appeal to the Congress for the repeal of the pay cuts which have been inflicted in their cases, we find quibblings on every hand in the name and interest of economy.

When we resort to programs looking to the relief of those who are in great distress, those who are without employment, we find ourselves at moments ready to abandon, in many instances, efforts which have been undertaken to provide for the immediate needs of men and women throughout the country.

In the matter of departmental expenditures, with which we have to deal in independent bills year after year, we find ourselves this year slashing to the right and slashing to the left to accomplish greater economies, greater savings to the Federal Government.

All of this, perhaps, is backed with some little understanding; but I see no understanding—I see nothing but insanity, in fact—when I observe our treatment of service men, men who gave their all, men who offered their all, men who went out in time of war in defense of their country, in defense of principle, and sacrificed their all, and who now come to Congress and ask for a restoration of that which would enable them to live according to some decent standard in these days of their inability to find employment, or to make those tired or injured bodies do the work of able-bodied men. They come to Congress, and Congress quibbles. Congress talks for days. Legislators do everything imaginable to prevent a return to these men, victims of war, that would enable them to live with decency.

Yet the same body, the same Congress that deals in that manner with these victims of past wars, when confronted with a program, a request to build a larger, stronger Navy, does not bat an eye. When the roll shall be called, if a roll call can be accomplished upon this bill, there will be very few, indeed, I fear, who will be ready to say "no" to this wasteful program that has in view only more war, to create more misery, to create more hardship, to destroy more bodies.

If I might be permitted to use that language, I should say that as a Congress and as a people we "sure can take it." When we look upon the inconsistencies of our public attitude, upon these measures as they come to us, surely we must be struck by the irony of it all. Certainly we must be struck by the thought that there is some degree of insanity among us; yet there have been years of this irony.

Fifteen years ago, engaged in a great world war, the Congress of the United States found it not at all difficult to raise all manner of means, whatever means were required to carry on that war, to do what? To destroy property; to destroy life. For 15 years following that war we have been dealing with more or less of a depression each and every year, and we find ourselves quite helpless to cope with a problem when the call is that of saving lives and

saving property. So I remind the Senate again of the irony of this whole situation, and I remind the Senate again of how easy it seems to be to prevail upon a body of intelligent men to build more and more of those machines of destruction which brought us the years of hardship and distress with which we are trying to cope here each and every day.

I do not desire my opposition to the pending naval construction bill to be misunderstood. I am not one of those who would do away altogether with preparation for war, because I am quite thoroughly convinced that civilization has not yet reached the stage where that drastic course could be permitted; and yet I hope the time is not far off. I favor preparedness in the fullest measure; but I insist that the preparedness programs which we have been pursuing of more recent years, and which seem to be capped now by this gigantic naval construction program, are occasioned not by a desire to defend ourselves against aggressors but by a will and a determination to believe that the time is coming when Uncle Sam is going to need large naval strength, not to conduct war at our own borders, not to defend our own shores, but to go to all quarters of the earth, there to make war as we have made war in times past, down in Nicaragua, for example. There we had to rally to the defense of dirty American dollars that could not find enough fertile soil at home in which to be planted, but had to be carried to those far-off lands, and, being carried there by our capitalists, seemed to carry with them an assurance and a guaranty that if ever those dollars needed defense the American Army, the American Marines, the American Navy, would be at their beck and call.

But there are those who say, "Look at it as you may; you must admit that the world is in a terrible state of mind; that more war seems to be in the making, and that it may be impossible for us to stay out of it." Men ask, "What are you going to do if another war breaks out over in Europe, and American shipping is destroyed by those who are engaged in that war? Are you just going to sit by and say it is none of our business, and not strike back?"

Mr. President, if ever Europe or if ever Asia or if ever any part of the world again goes to war, I say that America should make it none of its business; and we can avoid the embarrassment of having our shipping destroyed by simply writing the rule that from now on America goes on to a cash-and-carry basis; and if our munition makers or manufacturers in America must supply some of the sinews of war to countries engaged in war, let them come to our shores, pay their cash for the material, and carry it away in their own bottoms. With that sort of a determination I think America can quite readily find its way to stay out of further conflicts.

But someone says, "Look at Japan! See how Japan is preparing evidently to make trouble for the United States, and making great appropriations each year to maintain her military strength."

Last week's issue of Time carries this very enlightening story:

> Almost to a man the docile little politicians of Japan's House of Representatives rose in their places last week to give Japan for 1934 and 1935 a general's dream of what a budget ought to be. Of its $633,000,000, 44 percent went to the army and the navy, an all-time peace-time record. The army got $135,000,000. The navy got $140,000,000.

Of course we are expected here in America to gather that information, take fright, and conclude that we must prepare more thoroughly for defense against Japan. Here is Japan spending, in the new year just approaching, $275,000,000 to maintain her army and navy, while we—poor we—are spending only about $700,000,000 to maintain our Army and our Navy. We must take fright; we must provide a billion dollars for more naval construction to be prepared for what the $275,000,000 being expended in Japan is apt to do to us.

Mr. President, our present action, our present consideration, is not at all surprising. Indeed, it is entirely in keeping with the program we have pursued in America for the past 10 years. For these years we have been assuming that we were getting back to normalcy; that we were working back to those stages of preparedness that we occupied back in 1914 and 1915; and that sooner or later we would be free from the terrible burden to which our military preparation is subjecting us each year.

Let me call certain figures to the attention of the Senate. In 1870 the cost of the maintenance of our Army and our Navy was $79,000,000; in 1880 it was $51,000,000; in 1890 it was $66,000,000; in 1900 it was $190,000,000; in 1910 it was $312,000,000; in 1914 it was $343,000,000. Then came the World War. Perhaps it is quite unfair to deal with the figures which then prevailed relative to the cost of the maintenance of our military machine.

In 1920, right after the war, after we had started tapering off, the cost fell to $1,730,000,000, and we were assured that as the years progressed we would be reducing that, getting back to normalcy; 1925 found us down to $684,000,000, 1926 to $669,000,000, 1927 to $684,000,000, as compared with $343,000,000 in 1915.

Then, after 1927, instead of continuing to reduce in that program of getting back to normal expenditures, we find that we started moving the other way. 1928 found us with an expenditure of $737,000,000 for military maintenance; in 1929 it was $792,000,000; and in 1930 it was $840,000,000.

The emergency of this terrible depression has necessitated, during the last 3 years, some slicing, but we are only back in the neighborhood now of an annual cost of $700,000,000, whereas in 1914 it was placed at $343,000,000. Twice as much is being expended in these times as was being expended just before the start of the World War.

The argument is made that all the world has gone crazy, that all the world is preparing for war as never before. I have not seen the more recent figures, but those compiled in 1930 reveal a comparison in military expenditures as between 1913 and 1930 for the nations of Great Britain, France, Italy, Japan, Russia, and the United States. The percentage of increase in maintenance cost between 1913 and 1930 for Great Britain was 42 percent; for France, 30 percent; for Italy, 44 percent; for Japan, 142 percent; for Russia, 30 percent; and we, the United States, the great leaders in the cause of world peace, during that same stretch increased our military expenditures 197 percent. No nation on earth was spending as we were spending, getting ready for another war.

Mr. President, in all sincerity I ask now, What sense, what good ground, is there for the United States to stand off today and say—"We are leaders in the cause of world peace. If only the rest of the world would see this business of war as we look upon it here in the United States, we could quickly get away from this terrible burden of expense." What right have we to set ourselves up as an example to the rest of the world, when no other nation in the world begins to compare with the increases which have been ours from year to year in the cost of maintaining military machines? No nation on earth spends more to maintain military machines than does the United States of America today.

There are those, of course, who insist that the only way to maintain peace is to be prepared for war. I deny that that is true, and I would call the attention of the Senate to the fact that we have a boundary of thousands and thousands of miles from East to West upon which during the entire lifetime of this Nation and our northern neighbor there has never been a mounted gun, there has never been stationed a soldier. Yet who is there to say that the absence of that military evidence has occasioned war between Canada or Great Britain and the United States? There is not an evidence of military show anywhere upon that boundary.

So outstanding has been that record of peace between Canada and the United States, without a show of armed force there on the boundary, that some few years ago the International Association of Landscape Gardeners, gathered in one of their conventions, determined that somewhere upon that boundary there should be erected something of a monument commemorating those years of peace without armament show, and as a result of their deliberations there

has finally been established what is known as the "International Peace Garden." I am intensely interested in that, because, fortunately, the site for that garden has been picked at a spot that is common to my State and to Canada. There those gardeners plan to take the sections of land which the United States has set aside on one side of the boundary, and the sections which the Dominion of Canada has set aside for that purpose on the other, and they plan to landscape the site beautifully, and to make it a really peaceful spot, to make it really commemorative of that remarkable understanding which can be made to prevail without any show of arms, without any threat of war.

Each year in July the people of Canada and the people of the United States gather at this particular spot. It has been my privilege to attend when eighteen or twenty thousand gathered there, thousands from the Canadian side, thousands from the United States side, with speakers from both lands. When one looks into the faces of those people, he will not dare to undertake to assert from which side of the line they come. One can visit with them and not find where there is any thought of ever any difficulty between the peoples of these two great Nations. There have been over 100 years of peace and thorough understanding, without an armed force upon that boundary. Yet men say that peace depends upon our preparation for war. The situation existing as between Canada and the United States gives the lie to that assertion in every possible way.

I might say that in this undertaking to establish this splendid monument, this peace garden, there have not been any generals in evidence, there have not been any colonels in evidence, nor have there been any munition makers making speeches, or pointing with pride to those years of peace which has subsisted between these two countries.

Mr. President, if the people, and I mean the people—not those who have been chosen as their rulers or their leaders, not those who have set themselves up as leaders—but if the people of this world could have a chance to say yes or no to a continuation of this burdensome program of ever preparing for more and more war, there is no doubt in my mind what the verdict of those people would be. Overnight they would cast aside the terrible burden upon their backs which war and preparation for war place there.

Here we are in the United States making our emergency expenditures. Here we are burdened by taxation, a terrible burden, expending normally about $4,000,000,000 a year; and of that $4,000,000,000, 75 cents of each dollar is required to pay the bills growing out of past wars and the bills occasioned by our desire to prepare for more wars.

I have said that if the people of the world could pass judgment, they would quickly abandon these insane programs of preparing for more war. I think the same result would be accomplished if profits were to be taken out of the business of preparing for war. The profits in preparedness, it seems to me—particularly in the light of the very splendid address of the senior Senator from Idaho [Mr. BORAH] in this Chamber yesterday preparedness for war and the profits it carries are what cause us greater danger of more war than any other contributing factor today.

We wonder why disarmament conferences fail. We wonder why they fail if the people feel as I have undertaken to declare they do feel in all enlightened nations. I say that it is alone because these disarmament conferences are manipulated, are played with, are influenced, by lobbyists for the munition makers, who do not want, above all things else, anything resembling disarmament.

Mr. Shearer, and his example of a few years ago, is all too clearly in mind as evidence of the ends to which the munition makers, those who profit from war, will go to continue this burden of preparation upon the backs of the American people.

Today very dangerous men, so we are told, are in position of leadership over great peoples, over great nations. We are told that these dangerous men are offering threats to every other nation, which threats must be met by preparation for war. Mr. President, if dangerous men are in those positions, is it not well for us to go back to that splendid address we heard yesterday and remind ourselves of the part that the munition makers of France and Germany played in elevating Mr. Hitler to his position in Germany? The Senator from Idaho [Mr. BORAH] spoke of and quoted from a very enlightening article appearing in the current number of Fortune entitled, "Arms and the Men." I find, Mr. President, the Senator did not request that the entire article be printed in the RECORD. I now ask that the entire article be printed in the RECORD following my remarks.

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Without objection, it is so ordered.

(See exhibit A.)

Mr. NYE. A review of that particular article, published in the New York World-Telegram, might well be read to the Senate at this time, and I ask the privilege of sending it to the desk in order that the clerk may read the article. It appear under the heading "French Munition Makers Helped Hitler to Power. Writer in Fortune Declares Family Owning Plants Changed Names as Control by Paris and Berlin Was Shifted."

The PRESIDING OFFICER. Without objection, the article will be read.

The legislative clerk read as follows:

[From New York World-Telegram, Feb. 26, 1934]

FRENCH MUNITION MAKERS HELPED HITLER TO POWER, ARTICLE IN MAGAZINE SAYS—WRITER IN FORTUNE DECLARES FAMILY OWNING PLANTS CHANGED NAME AS CONTROL BY PARIS AND BERLIN WAS SHIFTED

French munition makers united with those of Germany to elevate to power Adolph Hitler, "the one man most capable of stirring up a new outbreak of international anarchy in Europe", the magazine Fortune says in its March issue, published today.

As soon as this had been accomplished, French newspapers owned in part by French munition manufacturers "immediately broke out in a fever of denunciation against the Hitler regime and called for fresh guaranties of security against the menace of rearming Germany", it says.

In "Arms and the Men", the magazine presents a detailed account of the names, connections, international alliances, and methods of munition makers.

It rates as the richest and most influential those of France, topped by the Schneider-Creusot Co., controlling 182 French subsidiaries manufacturing heavy ordnance, machine guns, tanks, shells, ammunition, and warfare chemicals.

MANY ENTERPRISES

This company controls as well 230 armament and allied enterprises outside France, including Skoda, Czechoslovakia's biggest munition works.

With striking details the article relates the international operations of this and other munition concerns.

"In 1899 British soldiers were shot down by British guns that British armament firms had sold to the Boers", it says. "When, in 1914, the Kaiser's armies marched westward into Belgium, and eastward toward Russia, German soldiers were killed by German guns manned by the armies of King Albert and Czar Nicholas II.

"Great Britain had built and equipped the Turkish Navy before the war; in the Dardanelles British ships were blown up by British mines, shattered by British cannon. Bulgarian troops turned French 75's on French poilus.

MADE BY GERMANS

"In every naval engagement of the World War the German fleet encountered vessels protected by armor plate made by Germans or with German patents."

In some ways the most amazing part of the recital has to do with the De Wendel-Von Wendel family, aristocrats of Europe's armorers, who have altered the prefix to the family name as political control over coal and iron fields they own in the Lorraine has shifted between Berlin and Paris.

François de Wendel is president of the Comité des Forges de France, "the most powerful iron and steel organization in France", of which the activities lie "in the strategy and tactics of the iron and steel industries." The powerful Schneider-Creusot munition company belongs to the comité, along with all other French munition makers.

HISTORY DESCRIBED

Describing the family and industrial history of Francois de Wendel, Fortune says:

"When their vast Lorraine estates lay upon soil politically German, they attached to their name the prefix 'von' and turned their eyes toward Berlin; when the political frontier shifted under their rich deposits of coal and iron, they altered the prefix to 'de' and looked to Paris.

"Either capital was glad to claim them; the family was equally happy to serve either—or, better, both. Today, for example, when political boundary lines throw most of their estates into France, but leave a few in Germany, the family consists preponderantly of the De Wendels, but with a sufficient number of Von Wendels in reserve to manage its German affairs.

MEMBER OF REICHSTAG

"In 1914 the ranking member of the family was Humbert von Wendel, a member of the German Reichstag. He still lives at Hayange, but he is no longer a member of the Reichstag. A younger brother, Guy, is a French senator—and of his other brother, the François of the comité, more later."

François de Wendel's connections would fill this page", says the article. He is regent of the Banque de France, member of the Chamber of Deputies, owner of a majority interest in Le Journal des Debats, head of the group that purchased the semiofficial newspaper of the French Government, Le Temps, controls the Journee Industrielle, and is a power in the management of Le Matin, L'Echo de Paris, and the Agence Havas.

"The war in no way interrupted the cordiality of the armament makers", says the article, and cites the care with which German and French Armies both refrained from firing on mines and smelters in the Briey Basin.

Before the war France got 70 percent of her ore here. The Germans captured the district, being careful not to fire at the mines and smelters, and thereafter got three fourths of the ore she used during the war from it.

Two years later the French were within a short distance of Briey, but army officers testified they were forbidden to fire into that region.

LOANS ARE MADE

Another chapter of the story tells the manner in which munition makers, through their control of banks, finance foreign countries in order that they may buy arms, even when treaties prevent export and import of arms, and the manner in which, when these loans fall due and are in danger of default, new loans for just the amounts necessary have again and again been made by governments in order that their munition makers may be paid.

"'Conspirators' is not an unfair word to apply to the armament makers of France", says the article.

"They are conspirators because they have no loyalties, because theirs is the sword that knows no brother."

THE SUMMATION

After telling the story of Hitler's rise to power and charging that munition makers "not only in Germany but in France united in their support", the article sums up:

"In that one example the whole philosophy of the armament makers reveals itself. Keep Europe in a constant state of nerves. Publish periodical war scares. Impress governmental officials with the vital necessity of maintaining armaments against the 'aggressions' of neighbor states.

"Bribe as necessary. In every practical way create suspicion that security is threatened. And if you do your job thoroughly enough, you will be able to sink into your armchair and re-echo the contented words of Eugene Schneider announcing a dividend to his shareholders: 'The defense of our country has brought us satisfactions which cannot be ignored.'"

Mr. NYE. Mr. President, I think there has not been published in ages anything quite so enlightening as is this article appearing in Fortune. The encouraging thing is that more such articles are to appear, revealing the part that the munition makers are playing in bringing about more war and preparation for more war.

The article published in the New York World-Telegram, which has just been read at the desk, declares:

"Conspirators" is not an unfair word to apply to the armament makers of France. They are conspirators because they have no loyalties; because theirs is the sword that knows no brother.

In other words, the munition makers of the world are united as no other people are united in the cause of preparation. To them preparation in every quarter of the globe means more money; means more profit.

As relates to our own munition makers in America, we find the Government year in and year out giving aid, comfort, and encouragement to the conspirators, as, for example, when we turn loose an appropriation for more naval construction such as we are about to do here and now. We did it through the Public Works program. Let us take a look at the situation. We engaged in the Public Works program to win relief from that terrible thing that had followed upon the heels of the war. We engaged in a great program of public works to put men back to work, men who had found the war so upsetting the economic structure that it destroyed their places in society, and then out of that Public Works appropriation we appropriated millions upon millions of dollars to build more battleships, more cruisers, more machines of war, thereby inviting more such hardships as were invited by the last war. So we find ourselves aiding these conspirators, these "conspirators who know no loyalties, because theirs is the sword that knows no brother."

Yesterday the Senator from Idaho [Mr. BORAH] said that he did not believe we would ever have war with Japan; but he said if we do have it, we can well anticipate sending our soldiers up against those frightful instruments of war which the Japanese Government has brought from American munition makers, guns manufactured in America to be turned upon American soldiers if and when we engage in warfare with Japan. Certainly the munition makers are not going to complain about who uses the guns so long as they can continue to manufacture and sell them.

Mr. President, was the Senator from Idaho unfair in his conclusions, in his expectations that, in the event of war with Japan, American soldiers would find themselves being mowed down by American implements of war in the hands of the Japanese?

In 1899 the British soldiers were sent off into foreign lands to give battle to the Boers, and the Boers turned upon them guns made by munition manufacturers in Great Britain. When the German Army went both east and west in the opening days of the World War over there on the Russian side their men were mowed down by German-manufactured guns in the hands of the Russians, while the Belgian soldiers were using German-made guns to mow the Germans down on the west side. In 1933 the Japanese found their own munitions, instruments of their own manufacture, turned upon them by Chinese soldiers in China. In 1933 when delegates from all over North and South America were sent to Montevideo to see if there could not be better understanding accomplished, behind the scenes worked the munition manufacturers—American munition manufacturers—to sell one South American country an order and then go to the neighboring country and show what their neighbor had just bought, and sell them a like order, and then go back and sell orders for other munitions which were intended to offset the munitions which they sold a week or a month earlier.

Shot full, Mr. President, is this world with the activities, the selfish, greedy activities, of munition makers who do not want peace, who cannot thrive if we have a peaceful world—men who want war and ever more preparation for war.

Coming back to the point made by the Senator from Idaho relative to what we might expect in the event of another war as to American-made implements of war being turned upon our soldiers, was he unfair? Mounted as a monument in a little British village is a great gun captured from the Germans by the soldiers of that community in a conflict during the World War. That particular gun which they finally captured had been used most successfully by the Germans and had mowed down and destroyed the lives and the usefulness of many of the young men of that community; but the British persevered and captured that gun, and it was ultimately brought back to Great Britain, to this community, and there mounted as a monument. On one side of the barrel of that gun are engraved the names of the British soldiers who lost their lives facing that gun on the battlefield and on the other side of the barrel is the name of the British munition maker who manufactured that gun and sold it to Germany. Is the Senator from Idaho unfair when he says that in the event of another war with Japan we shall find our soldiers being mowed down by guns whose manufacturers were the American munition makers? Not at all.

Because of these considerations, Mr. President, and because of the very evident conclusion that there is not going to be peace and understanding accomplished in the world until we can cope with and curb the munition manufacturers, I appeal most earnestly to the Senate to abandon this piece of folly, to abandon this naval-construction program; for the moment to lay it aside, be done with it for now, be done with it, until we can know more definitely just what part the munition manufacturers the world over are playing in accomplishing these continued insane programs of expensive preparations for more war.

On the 6th day of February last I submitted a resolution (S.Res. 179) reading as follows:

Resolved, That the Foreign Relations Committee of the Senate be, and is hereby, authorized and directed to investigate the activities of individuals and of corporations in the United States

engaged in the manufacture, sale, distribution, import, or export of arms, munitions, or other implements of war, and particularly to investigate and ascertain—

(1) The nature of the industrial and commercial organizations engaged in the manufacture of or traffic in arms, munitions, or other implements of war.

(2) The methods used in promoting or effecting the sale of arms, munitions, or other implements of war.

(3) The quantities of arms, munitions, or other implements of war imported into the United States and the countries of origin thereof, and the quantities exported from the United States and the countries of destination thereof.

(4) The adequacy or inadequacy of existing legislation, and of the treaties to which the United States is a party, for the regulation and control of the manufacture of and traffic in arms, munitions, or other implements of war within the United States, and of the traffic therein between the United States and other countries.

As will be noted, this resolution was referred to the Committee on Foreign Relations. For some strange reason a few days ago, in my absence from the floor of the Senate, the resolution was referred to the Military Affairs Committee. I do not know why it should have gone to the Military Affairs Committee. It might as readily have gone to the Naval Affairs Committee or to the Commerce Committee or to the Interstate Commerce Committee, but I felt it properly belonged in the Foreign Relations Committee. However, its reference to the Military Affairs Committee is not going to cause me to protest until there shall be demonstration on the part of that committee that there is no will to give it serious consideration. I am sure, from my conversation with the Chairman of the Military Affairs Committee, that the resolution is going to have early consideration; and, I think, if we can impress upon the Senate the terrible nature of the games that are being played by munition makers, that there is not in the end going to be hesitancy in acting upon this particular resolution; and, because I feel that such an investigation is ultimately going to be undertaken, I appeal to the Senate, since we cannot vote to lay it on the table, to vote down the pending naval construction bill. Let it bide its time until we can know more of the facts concerning the activities of the makers of munitions.

Mr. BONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Washington?

Mr. NYE. I yield to the Senator from Washington.

Mr. BONE. Mr. President, I am very much interested in the resolution of the Senator from North Dakota calling for an investigation of the profits and the activities of private munition makers. I am also very much interested in the concurrent resolution of the Senator from Michigan [Mr. VANDENBERG], which touches in some aspects the same subject. I am wondering if the Senator from North Dakota is not interested in examining the activities of those who merely sell ammunition in the ordinary course from stores and the like in this country. He is interested, I take it, in the activities of those who supply munitions of war for warlike activities.

Mr. NYE. Precisely so.

Mr. BONE. I wondered if the resolution might be so broad as to cover the activities of the small fry, who are not interested in war.

Mr. NYE. I think we have had such studies made of the domestic phases of the question as would warrant any committee in assuming that the aspect referred to by the Senator from Washington was not a part of the studies contemplated or involved in this resolution.

Mr. VANDENBERG. Mr. President——

The PRESIDING OFFICER. Does the Senator from North Dakota yield to the Senator from Michigan?

Mr. NYE. I am glad to yield to the Senator from Michigan.

Mr. VANDENBERG. The Senator referred to the fact that his resolution now rests in the Military Affairs Committee. My own concurrent resolution, to which the Senator from Washington [Mr. BONE] referred, also rests in the Military Affairs Committee. I have the keenest interest in the pending proposition as submitted by my friend from North Dakota. I suggest to him that it does not go far enough in its scope, inasmuch as the final conclusion of this proposal, if it is to have a practical effect, probably must create a Government monopoly in the United States for the production of munitions and armaments. It is to the further investigation of that proposition that my resolution is addressed, and I am hopeful that both resolutions may be considered together in the Military Affairs Committee.

Mr. NYE. Mr. President, since the purposes of the Senator from Michigan and my own have so much in common, I am certain there is going to be no difficulty in accomplishing that cooperation which will bring consideration to both resolutions at one and the same time, if that is possible, and I see no reason why it cannot be done.

The reasons why the investigation should be made should be apparent to every mind in active public life today. There is not, it seems to me, any doubt as to the field existing and the call for such an investigation. The House Military Affairs Committee and the House Naval Affairs Committee have been revealing very compelling reasons why there should be a sweeping investigation undertaken, for they are showing collusion prevalent in the awarding of governmental contracts with munition makers. Then, there are charges, which have been concurred in by the able chairman of the Naval Affairs Committee who is seeing the pending bill through the Senate, of collusion in some recent awards that have been made. Then, I find, too, evidence of the makers of munitions dickering with and trying to sell bills of armament to foreign powers that have defaulted on every bond they have outstanding at this time; and yet there goes to these foreign powers in each such case the assurance, "even though you are in default, we think we can manipulate a line of credit for you in New York that will enable you to possess these munitions that you want and need."

Then, we had a few years ago the Shearer demonstration, which certainly ought to be foremost in our minds when we consider the need for further investigation of munition makers' activities.

Here in Washington a grand jury is engaged in ferreting out the frauds and such collusion as they may be able to discover respecting contracts being entered into by the War Department with private manufacturers.

Mr. President, until that kind of an investigation is made, until there is a full and complete knowledge of the tremendous profits which the munition makers enjoy as a result of our preparedness program, we are going on, not only here in our own beloved land but all over the world, with expenditures that constitute more and more and ever more an unbearable burden upon the backs of an already overburdened people. We should know these facts.

The Chairman of the Naval Affairs Committee of the Senate not so long ago wrote a letter to the President of the United States pointing out how very unscrupulous evidently the munition makers are when it comes to grabbing contracts which the Government has to award. In this letter, dated August 1, 1933, the chairman of the committee, the junior Senator from Florida [Mr. TRAMMELL], said:

I have been quite interested in analyzing the bids opened by the Navy Department on July 26, 1933, which were submitted by the shipbuilders on naval construction. I believe a thorough study of the matter should be made.

It is my information that on September 16, 1931, the Bethlehem Shipbuilding Corporation bid for one 15,000-ton destroyer $2,728,500.

On July 26, 1933, Bethlehem Shipbuilding Corporation bid for an identical destroyer $2,670,000, or a decrease in price of $58,500.

On December 14, 1932, Bethlehem Shipbuilding Corporation bid for one 8-inch gun (heavy) 10,000-ton cruiser $8,196,000.

On July 26, 1933, Bethlehem Shipbuilding Corporation bid for the same cruiser $11,720,000, or an increase in price of $3,524,000.

There appear to have been but 4 bidders on cruisers and 8 on destroyers. Gulf Industries, Inc., of Pensacola, Fla., appears to have submitted bids on the destroyers.

It is my information that, in addition to the facts outlined above, it was known in advance which of the four concerns bidding on the cruisers would be low on each of the several items, and it appears to have been known in advance that the position of each of the said shipbuilders would be protected by bids submitted by the remaining shipbuilders, for instance:

Bethlehem Shipbuilding Corporation, $11,720,000.

New York Shipbuilding Co., $12,100,000.

Newport News Shipbuilding & Dry Dock Co., $13,800,000.

United Dry Docks, Inc., $14,800,000.

The bid of the New York Shipbuilding Corporation on the two light cruisers was protected by the other three bidders, as follows:

New York Shipbuilding, $11,657,000.
Bethlehem Shipbuilding Corporation, $12,780,000.
Newport News Shipbuilding & Dry Dock Co., $13,900,000.
United Dry Docks, Inc., no bid.

I am unable to justify in my own mind the increase in cruiser cost as indicated by the 1932 and 1933 bids, particularly when those bids are compared with the destroyer bids of 1931 and 1933. I am convinced that the cruiser bids should be rejected.

Your attention is invited to the fact that Gulf Industries, Inc., of Pensacola, Fla., in its letter to the Secretary of the Navy, dated July 29, 1933, stated that it is prepared to submit bids on the cruisers which will save the Government millions of dollars. And this is so whether the bidding is reopened by private negotiations or by a call for new bids.

I bespeak your careful and thoughtful consideration of this request that the cruiser bids be rejected.

Mr. President, I congratulate the junior Senator from Florida upon having presented the situation as concisely as he did. It only emphasizes the point I am trying to make, namely, that we go on with these insane construction programs primarily for the purpose of giving some graft and giving some easy profits to the munition makers who get their heads together when a contract is involved and trade themselves into huge profits on each and every hand.

It cost, so it is estimated, $25,000 to kill each man who was killed in the World War—$25,000 a head, if I may put it that way. If we are going to insist upon the continuation in emergency of warfare of that kind, and if we are going to persist in our expressions of economy here in Congress, let us do away with these burdensome programs, such as we have before us now, and let us go out and engage the kind of men who can be hired for $50 a head to go out and kill. We have had many examples of that kind among our gangster and racketeering classes in the United States. Is it unreasonable, from the standpoint of economy, in the event of war to turn that kind of men loose and pay them, not $25,000 a head, as was the cost during the World War, but $50 or $25 or even $100 per head?

In support of a program such as we have on our hands now men stand and plead with the Congress to see what a terrible advantage is being taken of us by other world powers. Our Navy is nothing more than a washtub today afloat on the sea without a rudder; we have abandoned all our worth-while forces; we have not anything that resembles a navy any more. That is the conclusion one would draw from listening to such men, and yet the same speeches that men are making here in this Chamber regarding the finer advantage which Great Britain has over us or which Japan has over us, those same speeches with a change in the names of countries are being made in the deliberative legislative halls in Japan, in Great Britain, and in France, where the showing is being made that they are the ones who have not any navy, that the United States has gone ahead and taken such tremendous advantage of them that they have to have another naval-construction authorization to keep pace with the United States.

Cornelius Vanderbilt, Jr., did a very interesting bit of reporting over in Europe recently. He told of being in Berlin and sitting on the window sill in his hotel room listening to Hitler out in the great open space below him, and listening on the radio to the militaristic leaders of other countries on that Sabbath day which now it is found Europe turns over to a discussion of matters of this kind. Let me quote briefly from Mr. Vanderbilt. He is quoting what he heard from the German speaker that day:

> Fear not, comrades. * * * We have our army of tried and true men, the finest body of soldiers in the world. We do not want war, but if the hour of battle strikes, Germany will be ready.

Then his ear caught the message on the radio coming from over the French line:

> We are not afraid, citizens. Not only are we strong because of our righteousness but likewise because of our glorious army. France is not looking for trouble, but should trouble be forced on France she will be able to defend herself and punish the villains.

Then he turned and listened again to the voice just outside his window:

> German mothers must be urged to bear more and better children so that this nation may regain its place in the sun and defeat its enemies.

Then back to the radio:

> French mothers might well be proud of their sons. If necessary, they will again defend their country and the whole of humanity in the same self-sacrificing manner as in 1914–18.

So we have that sort of conflict with us always. We ought to be taking an advanced enlightened position which dictates, after all is said and done, that we ought to start reducing these terrible burdens. We ought to be setting the example for others to follow. But instead of doing that we advance programs like this naval construction program or this bill for the relief of munitions makers that we have on our hands and upon which we are about to vote today. Let us admit the terrible burden which these munitions programs are entailing. Let us admit them. Let us admit that we cannot afford to compete longer in that sort of a program—a program engineered 100 percent by the munitions makers—and, admitting that, cease this insane program which we find ourselves in, year after year, of seeing which country can do the best job of bullying another country through making preparations for more war.

If we were to take a position of that sort; if we were to lay aside the pending bill and say that we are not going to act upon it until we can have the results of a thorough, sweeping investigation into the means, into the practices resorted to by the munitions makers, a marvelous service would be performed for mankind. Nothing would give greater cheer to a burdened people throughout the world. Nothing would do more to restore order, to restore the faith of the peoples of the world. If, however, we insist upon going forward and continuing programs such as this, we shall be inviting just as surely as we stand here today, by reason of our course of preparation, not peace but more and more and more war—a war so terrible next time that all who must participate in it will have just cause for turning to their lawmakers and to their rulers and saying, "Shame upon you for bringing such a disaster as this upon the world."

EXHIBIT A

ARMS AND THE MEN

(A primer on Europe's armament makers; their mines, their smelters, their banks, their holding companies, their ability to supply everything you need for a war from cannons to the casus belli; their axioms, which are (a) prolong war, (b) disturb peace.)

According to the best accountancy figures, it cost about $25,000 to kill a soldier during the World War. There is one class of big business men in Europe that never rose up to denounce the extravagance of its governments in this regard—to point out that when death is left uphampered as an enterprise for the individual initiative of gangsters the cost of a single killing seldom exceeds $100. The reason for the silence of these big business men is quite simple: The killing is their business; armaments are their stock in trade; governments are their customers; the ultimate consumers of their products are, historically, almost as often their compatriots as their enemies. That does not matter. The important point is that every time a burst shell fragment finds its way into the brain, the heart, or the intestines of a man in the front line, a great part of the $25,000, much of it profit, finds its way into the pocket of the armament maker.

The problem of European armaments is complex: If we are to get anywhere with it we must first park our emotions outside. Pacifists and militarists alike have indulged in a good deal of loose talk on the subject. Most pacifists are not sufficiently informed; their arguments and accusations frequently boil down to nothing more substantial than Sir Arthur Eddington's definition of the Quantum theory, that is, "Something unknown is doing we don't know what." Most militarists are insincere.

Furthermore, American business at its biggest and most secretive is today an open book compared with any European big business. Therefore what Fortune does not know about this subject would fill many a volume. But what Fortune does know is worth knowing; it is set down herein, not as argument or invective but as elementary data. Some time, not too far distant, Fortune hopes to inaugurate a greater campaign on this subject; let this article, then, be considered as no more than an opening gun.

Anyone who talks about European armaments and their makers must inevitably oversimplify. But to oversimplify is not to overgeneralize—and we should start by ridding ourselves of one generality that will give us trouble as long as it stays in our heads.

There is nothing that could, in any strict accuracy, be called an "armament ring" in Europe today. There is no perfectly homologous group of single-purposed individuals that sits down

before a polished table in a soundproof room and plots new holocausts in Europe. Search through the armament makers as you will, you will find neither a Machiavelli nor a Dr. Fu Manchu. But that's all you won't find.

For without a shadow of a doubt there is at the moment in Europe a huge and subversive force that lies behind the arming and counterarming of nations: there are mines, smelters, armament works, holding companies, and banks, entangled in an international embrace, yet working inevitably for the destruction of such little internationalism as the world has achieved so far. The control of these myriad companies vests, finally, in not more than a handful of men whose power, in some ways, reaches above the power of the State itself. Thus, French interests not only sold arms to Hungary in flat violation of the Treaty of Trianon, but when Hungary defaulted on the bill the armorers got the French Government to lend Hungary the money to pay the French armorers. Thus, too, the great Czechoslovakian armament company, controlled by Frenchmen, promoted the rise of Hitler in Germany and contributed millions of marks to Hitler's campaign. These same Frenchmen own newspapers that did more than any others to enrage France against Hitler. It is time we had a dramatis personæ of arms, and the men.

KRUPP

Best known armament name in all the world is perhaps the name of Krupp. The Krupp who, despite early discouragements at the hands of his own government, built up the gigantic works at Essen and made his name a synonym for cannon was Alfred—a strange figure who wore wooden sabots when he visited his factory, opened the windows of his house only once a month, had a bathtub in his parlor, assembled his intimates in his home every few weeks to be weighed, for no discoverable reason, on scales of his own devising, and carried a steel walking stick. Alfred Krupp began as a humble petitioner of governments, coming hat in hand to ministers, kings, and emperors of assorted nationalities to beg orders for his guns. By the time of his death he was an intimate of Wilhelm I, the 1870 conqueror of France. He was also an officer of the French Legion of Honor (one of Napoleon III's earlier generosities) and a Knight of the Russian Order of Peter the Great. Under his son, Friedrich Alfred Krupp, the house rose to higher and higher glories. Yet Friedrich Alfred failed in one important respect: he left no male heir to carry on. It took Kaiser Wilhelm II to solve this difficulty. When big buxom Bertha, Friedrich Alfred's daughter, came of marriageable age Wilhelm II betrothed her to the protégé of his own selection and training, Gustav von Bohlen und Halbach—and it was the groom, not his bride, whose name was changed by the betrothal. He became then Krupp von Bohlen und Halbach. Under this new head of the house, who took command in 1909, Krupp went further still, supplied 52 countries with arms before the war, and stood all but single-handed against the world during it.

What of Krupp now? In theory, Krupp smelts only peaceful ore, and forges its steels only into such benign shapes as locomotives, rails, bridge girders, and others purely industrial. Actually, Krupp is rearming Germany—the discoverable portion of whose annual armament bill is now about $80,000,000. Germany, forbidden by the Treaty of Versailles to import armaments, receives generous supplies from Sweden (where Krupp controls the armament firm of Bofors) and Holland; forbidden to export armaments, she ships to South America, the Far East, or to any European nation that will violate its own treaty by ordering from her. Yet for all the might of the Krupp works we must look elsewhere today to find the real heart of the armament business.

BETHLEHEM STEEL ET AL.

To the United States, perhaps? After all, we have our Du Ponts, who at least own the State of Delaware. We have an Army and Navy whose officers, according to the statement of a former Cabinet officer, are far and away more active than the officers of any other armed forces in the world against any sort of international understanding. We have an armament bill of over $200,000,000 a year. (When we say armaments we mean here, and hereafter, only the actual implements and materials of war—cannon, guns, ammunition, tanks, military aircraft, and naval vessels.) We once had our big bass drum, Mr. William B. Shearer, whose boast was that he wrecked the Naval Conference at Geneva in 1927. We have our Midvale Co. (controlled by the Baldwin Locomotive Works) which prospered mightily during the war and has continued the manufacture of guns and gun forgings, armor plate, and projectiles; our Colt's Patent Firearms Manufacturing Co., which supplies machine guns as well as squirrel rifles, which declared an extra dividend in 1933; our Remington Arms Co. (controlled by Du Pont) whose output of firearms and ammunition together is one third of United States production. And we have our Bethlehem Steel Co.

Bethlehem's Mr. Charles M. Schwab dismayed the cadets of West Point in 1927 by saying: "Today the Bethlehem Steel Co. has definitely abandoned any thought of ever again engaging in the manufacture of ordnance except in times of great national emergency." Such times are apparently with us now—have, in fact, been continually with us since Mr. Schwab unloosed this shaft of oratory. In the official listing of Bethlehem's products (you need only turn to Standard Statistics or Bethlehem's own most recent annual report) you will find armor plate, projectiles, gun and shell forgings, battleships, battle cruisers, scout cruisers, destroyers, submarines, and airplane carriers all listed as products of Bethlehem's plants. The site at Bethlehem where cannon and armor plate are made is separate from the rest of the plant. No outsiders are allowed, and it may be that Mr. Schwab has never been able to evade the vigilance of his watchmen. But if he could once get inside he would see a triumph of inventiveness—for Bethlehem not only makes armor-piercing projectiles, but nonpierceable armor plate—which must sometimes cause slight confusion on the proving ground when anyone attempts to demonstrate the virtues of both at the same time.

Our own country is not, then, quite so virginally innocent in this business as we might like to suppose. But despite the size of our armament bill and our armament and munitions exports to South and Central America and the Far East, we are essentially small fry in this game.

ENGLAND'S VICKERS-ARMSTRONGS

Much larger fry is England, where the firm of Vickers-Armstrongs is the brightest star in the armament firmament. The annual bills of Vickers-Armstrongs to nations for armaments purchased quite possibly amount to $100,000,000. For England's powerful position as one of the greatest exporters of the materials of war in the world, the bulk of the credit goes to Vickers-Armstrongs. It makes other things than armaments, true enough; such unwarlike products as sewing machines and golf clubs come from some of its factories. But its chairman, General the Honorable Sir Herbert Lawrence, G.C.B., one-time Chief of Staff of the B.E.F., has put himself on record as saying, "Vickers-Armstrongs, Ltd., relies very largely on armament orders for its existence." The Vickers research staffs work constantly to bring into mass production such bolsters to international comfort as the Vickers-Carden-Lloyd light amphibious tank, or the Vickers Vildebeest bombing machine.

The sun never sets upon Vickers. It has its factories in Rumania where, for greater convenience, Sir Herbert Lawrence is a director of the Bank of Rumania (and Vickers to some degree allies itself with the Czechoslovakian armament firm of Skoda). In Italy it latinizes its name to Società Vickers-Terni; in Japan it has as a subsidiary the Japan Steel Works, and thus allies itself with the Japanese armament and industrial firm of Mitsui. There are Vickers factories or subsidiary companies in Spain, Canada, Ireland, Holland (The Hague affords an appropriate site for some of the Vickers operations), and New Zealand.

Vickers directors are men of wide affairs. Sir Herbert Lawrence, besides being a director of the Bank of Rumania, is also a director of the Sun Insurance Office, Ltd., with which Vickers-Armstrongs had a curious agreement that "if the profits [of Vickers] in any year during the 5 years ending December 31, 1932, do not amount to £900,000, then a contribution not exceeding £200,000 will be made in each year." Sir Otto Niemeyer, the infant phenomenon of British finance, who first entered His Majesty's Treasury at the age of 23, is another Vickers director; he is, in addition, an officer of the Bank of England, a director of the Anglo-International Bank and the Bank of International Settlements.

Through these industrial and financial interlockings Vickers-Armstrongs conducts its affairs. They are profitable affairs—for, as the agreement with Sun Insurance indicates, a profit of some $4,500,000 a year is considered so unsatisfactory that insurance must be carried against it. And England's aristocracy takes pleasure in clipping its coupons. Among the more prominent shareholders of Vickers or allied concerns in 1932 were: Rt. Hon. Neville Chamberlain, chancellor of the exchequer; Sir Austen Chamberlain, M.P., winner of the Nobel peace prize in 1925; and Sir John Simon, secretary of state for foreign affairs (but who sold out his shares last year). In 1914 the list was even more imposing. It included that lofty philosopher, Lord Balfour; that glittering snob, Lord Curzon; and also Lord Kinnaird, president of the Y.M.C.A; three bishops; and Dean Inge, of St. Paul's. It was in that same year that Socialist Philip Snowden spoke in Parliament: "It would be impossible to throw a stone on the benches opposite without hitting a member who is a shareholder in one or other of these firms."

You will gather that England, peace-loving England, has been quite some time at the task of building up this organization. She has. The firm began in 1829. Slowly throughout the nineteenth century the firm grew, changed its name, cast its outworn skins, grew fat, prosperous, and highly multicellular through the acquisition of this torpedo works, of that heavy ordnance factory. And then there came along Mr. Basileios Zacharias.

He is known today as Sir Basil Zaharoff. He was an intimate of Lloyd George during the war; a few relatively mild revelations of the degree to which he influenced Great Britain's armament, military, and foreign policies during and after the war were enough, in 1922, to send Lloyd George, who did more than any other man to win the war, out of office forever. This strange character, the greatest armament salesman the world has ever known, struck a major spark in the world when he collided with an American of somewhat similar interests. Zaharoff at that time was a salesman for the Nordenfeldt Guns & Ammunition Co., Ltd., of England, and had done very well in profits out of the perpetual dog fights in the Balkans and the Near East, to which he was usually purveyor, and of which he was frequently (it was an easy trick once he learned it) instigator. The American that gladdened his heart was Hiram Maxim, whose new machine gun was incomparably the best killing machine Zaharoff had ever seen. Zaharoff took Maxim to his bosom, with reservations. First he used his wily, polyglot salesmanship to block the gun's sale in Austria as an impractical toy; then, when he had offered Maxim a partnership and got the sale of the gun firmly in his own hands, he swept over Europe and Asia selling such quantities that soon the new firm of Maxim-Nordenfeldt Guns & Ammunition Co. was purchased for some $6,000,000 (the year was 1897) by Vickers interests and became Vickers Sons & Maxim. Sir Basil was established now as a power

in armament affairs, hence in Great Britain's affairs, hence in world affairs. He already enjoyed the distinction of having sold the first practical submarine ever used in naval operations to his native Greece, and the further distinction of having used this sale to frighten Turkey into buying two submarines. The Boer War added to his laurels; Boers shot Englishmen with Vickers guns and ammunition. The Russo-Japanese War provided him with an even wider field for his gifts; Vickers sold as much war material (and possibly more) to Russia as it did to Japan, England's supposed ally.

But naturally it was the World War that gratified Sir Basil most. The profits of war-time armament manufacture were practically incalculable; by the end of the war Sir Basil had a personal fortune that was estimated as low as $100,000,000 or $200,000,000 and as high as a billion; and in 1917, when there seemed a possibility of peace through the intervention of the United States, Lord Bertie, British Ambassador to France, naively recorded in his diary: "Zaharoff is all for continuing the war jusqu'au bout." * * *

So much for Germany and her Krupp, the United States and Bethlehem Steel, England and Vickers-Armstrongs, and the now withered and senile Sir Basil. Do these armament businesses seem big business? Then you must alter your sense of proportion before you go further. All the foregoing is a mere curtain raiser to the big show. The big show is France.

SCHNEIDER-CREUSOT

France stands at the very top. She stands at the top in the amount her government spends on armaments; at the top in the amount of arms she exports to other nations; at the top also by virtue of the billion francs she has spent to build a military Chinese wall of forts, many of them underground, along her eastern boundaries. But these mere quantitative details do not reveal the true significance of her position.

She stands today as a queer paradox: France, the democracy, a quiet pasture land for the world's most famous peasantry, coexisting with France, the greatest military power of modern times, with an army which all but equals in number and far surpasses in equipment Germany's vast militaristic machine of 1914.

At the head of this latter France stands the figure of Gen. Maxime Weygand (vice president of the higher war council, inspector general of the army, possessor of the grand cross of the legion of honor, member of the French Academy), ruling an army (including colonials) of 650,000 men. But, despite his decorations, his medals, his orders, and the power he has, once a new war begins, to order several million men to death, General Weygand, a devout Catholic, represents not the urge for war but, on the contrary, France's desire for peace—by means of security. The French threat to the peace of the world lies elsewhere—in France. For in France, and only in France, a new situation exists: The armament makers are no longer, like Alfred Krupp or Sir Basil Zaharoff, in his younger days, humble petitioners of government, hat-in-hand solicitors of orders—their influence is so infiltrated into the industrial, social, and political affairs of the nation that they have power in some ways beyond the state; a power so mighty that they are all but able, for their own individualistic reasons, to sweep the state along in a course of action against its own will. They are all but anonymous, these men. They are displeased by publicity and are well able to enforce their displeasure. But we must now displease one of them and present the figure of M. Charles Prosper Eugène Schneider.

Charles Prosper Eugène Schneider is a man of many offices—the executive head of hundreds of armament firms throughout Europe.[1] He is the president of the Schneider-Creusot Co., armament manufacturers, with mines, smelters, and foundries scattered throughout France. He is director of the Banque de l'Union Parisienne, one of whose most profitable sources of business is the financing of loans for armaments. In 1920 he founded and became the president of the Union Européenne Industriale et Financière, a holding company capitalized at 140,000,000 francs. Through it Schneider-Creusot controls 182 French companies that manufacture heavy ordnance, machine guns, tanks, shells, ammunition, and warfare chemicals. Out of the $300,000,000, which at the most conservative guess represents the annual billing of France's armament concerns, Schneider-Creusot or subsidiaries takes the lion's share.

CZECH'S SKODA

But the Union Européenne has an even more important function. Through it Schneider-Creusot reaches out to control 230 armament and allied enterprises outside France. The greatest of these concerns is that glittering jewel in the crown of the principal ideal state that came into being in 1919 as the result of the self-determination of oppressed peoples. The State is Czechoslovakia and its jewel is Skoda.

Skoda, although its main works are in Brno (which was once on Austrian territory), has factories scattered not only over Czechoslovakia but over Poland and Rumania as well. Upon the board of Skoda, which the Union Européenne controls through 56 percent of its stock, M. Schneider sits with his friend André Vicaire, director general of Schneider-Creusot; his brother-in-law, Arnaud de Saint-Sauveur; Eduard Benes, who, as Czechoslovakia's foreign minister, takes second place to no one in the vocal support he lends to the League of Nations; and two Czecho-Germans, Von Dutschnitz and Von Arthaber, who were, it is interesting to note in view of later facts, very heavy financial contributors to Hitler's political success. Political France and political Germany may be at constant swords' points, the Polish Corridor may inflame the Nazis, France may quiver at her lack of security from another northern invasion, but the lion and the lamb never lie down together with more good fellowship than these French, German, Czech, and Polish gentlemen when they come together to discuss, as fellow directors, the problems of increasing Europe's consumption of armaments. Thanks to the activities of Skoda and its allies, arms form a full 10 percent of all Czech exports—and 40 percent of all Skoda's products are exported—to the extent of $30,000,000 worth a year.

BACK TO SCHNEIDER

M. Schneider's nationality is capable of any supple manipulation that a political emergency may call for. The founder of his dynasty was his grandfather, also named Eugène, who, with a brother Adolph, left Bidestroff in the then German territory of the Saar and came to France in 1836. More particularly brothers Eugène and Adolph came to Le Creusot (literally "The Hollow" or "The Crucible") where, to the south of the Burgundy-wine district a small foundry had been making cannon from the days of Louis XVI. With perfect impartiality it had supplied first the monarchy, then the republic, and then Napoleon's Empire with its products. With the aid of the French banking house of Seillière these German brothers bought the foundry (La Société Générale des Hauts Fourneaux) for 2,500,000 francs—and were then forced to wait for almost 20 years for their first major war. War-promotion methods in those days were not what they were to become later in the century, but that gap was neatly bridged by the demands that the new steamboats and the even newer railroads were making on the producers of iron and steel. Then, in 1854, the Crimean War broke out and Eugène (alone now, following Adolph's death) converted Le Creusot almost exclusively to the manufacture of arms. The family fortune was founded; the family tradition was established.

In the few years that followed the Crimean War, Eugène Schneider had time to look about him for parliamentary posts. First he became a member of the Chamber of Deputies; later he rose to be minister of agriculture, then of commerce. By 1865 he had become president of the Chamber of Deputies (analogous to the Speaker of the United States House of Representatives).

It was from this vantage point that he was able to watch the sweep of events that led to the Franco-Prussian War. Alfred Krupp saw it coming, too. He, like Schneider, was capable of an internationalism far above the confines of narrow patriotism and was anxious to equip Napoleon III's armies with his own cannon—a suggestion not entirely without its logic or, even, its sportsmanship, for Krupp had borrowed in Paris (from the same banking house of Seillière as had set Eugène Schneider up in business) the money with which he made the guns that later humbled France at Metz and Sedan.

But in those days Schneider was jealous of Krupp's mounting power and persuaded Napoleon III that his patronage of Le Creusot would be more enlightened. The inferiority of the French cannon in 1870 was one factor that brought about the catastrophic ruin of the Second Empire.

Nothing in the career of the Schneider dynasty is more remarkable than the fact that it was able to overcome this shocking disgrace and actually to get the job of re-equipping the new armies of the Republic. This time Eugène Schneider supplied France with cannon modeled upon the designs of the victorious Krupps. It was not until some 20 years later that he died, full of years and his own sort of wisdom, to be succeeded by his son Henri.

It was under Henri's son—the present Eugene Schneider, now 66 years old, that the Schneider-Creusot Co. began to work upon a gigantic, world-wide scale. Its real expansion began with the turn of the century. Eugene Schneider acquired iron mines in Lorraine and began a program of mill, foundry, and shipyard building at Bordeaux and Toulon. And then, opportunely, the Russo-Japanese War arrived.

Not until after the close of this war did the real genius of the living Eugene Schneider begin to manifest itself. Russia needed re-arming. The Krupps rushed in. The English firm of Vickers rushed in. Eugène Schneider rushed in. There ensued a brief jockeying for position among the three firms—and it was Schneider, perhaps, who captured the best. "Buy from us", he whispered gently into the proper ears, "and pay with French money." It was not hard to arrange. The French Ambassador to Imperial Russia was then Maurice Paléologue, who was likewise a director in the Schneider Banque de l'Union Parisienne. The Russians made a brief call on Paris and came back to St. Petersburg with money with which to pay for Schneider armaments. From that time until, in 1918, the Soviet Government of Russia expressed its official uninterest in paying the debts of the Czarist regime 16,000,000,000 gold francs drained slowly from the savings of the French people, were loaned to Russia, secured by bonds that have long since been tossed on the rubbish heap. Most of the profit in the 16,000,000,000 found its way back to Schneider-Creusot and is today in their foundries and their bank accounts.

Yet the Czar's Government was not wholly credulous. It seemed to have some qualms that so much Russian armament

[1] One independent armament firm is the Anciens Etablissements Hotchkiss & Cie, founded by Benjamin Berkeley Hotchkiss, American engineer, and inventor of the Hotchkiss machine gun, born in Watertown, Conn., in 1826. British, French, and American capital are intermingled in the company now, but the managing director is a self-expatriated ex-ensign of the United States Navy, Laurence Vincent Benét, uncle of Stephen Vincent Benét, the poet. His American citizenship did not stop him from selling tons of guns and other war materials to Japan at the same time that Secretary of State Stimson was vainly trying to keep the Japanese out of Manchuria.

should be manufactured on foreign soil. This offered no problem to the armament makers. Schneider installed engineers and managers at the Putilov works in St. Petersburg. The Krupps did likewise. French newspapers screamed that the Krupps were spying. German newspapers screamed that the French were spying. But 1914 found Schneider and Krupp engineers side by side on terms of cordial friendship, overseeing ordnance manufacture on behalf of Nicholas II, Czar of all the Russias.

EYE OPENER—BRIEY

If you have a naïveté about the war, shed it now; the war in no way interrupted the cordiality of the armament makers. Throughout the years from 1914 to 1918 they stayed on jolly terms, they even emerged from the war better friends than they were when they went into it. One major war-time episode in particular revealed their unshakable solidarity.

Before 1914 the great iron mines and smelters in the Briey Basin provided 70 percent of the ore used by France. The German advance wrested them from the political control of France—and quite naturally the German artillery chiefs saw to it that the mines were so protected from shellfire that they could be taken over intact. Thenceforth the mines of the Briey Basin were operated for the benefit of Germany—in association with other mines in Lorraine which had been in German hands since 1871 they supplied Germany with some three quarters of the ore she consumed during the war.

In 1916, some 2 years later, the Briey Basin came once again within the potential grasp of the French. Throughout the second battle of Verdun, Briey was within range of the operations of the French Second Army. The Briey mines and smelters were turning out tons of raw materials per day which were being continuously turned into weapons of death against French troops, and the naive civilian would therefore suppose that the French Second Army would now turn loose its bombing planes and blast out of existence a principal source of enemy supply.

The naive civilian would be quite wrong. Bombs did not burst at Briey; nowhere near Briey did more than a few shells from either side fall during the entire course of the war. There were even line officers who shared civilian naïveté enough to question French general headquarters on the immunity of Briey. A reasonable explanation could have been that the French were withholding fire from Briey because they, in turn, hoped to recapture the basin and turn its products back to France. But this was not the explanation that emerged from headquarters; instead it was stated that if Briey were bombarded, the Germans, in reprisal, would turn their guns on Dombasle in Meurthe-et-Moselle, between the Argonne and Verdun, where equally large-scale mining operations were supplying the French with much of their own raw material for ordnance and ammunition. So long as the French left Briey alone the Germans would let Dombasle alone; what hothead was there who would want to upset the apple cart under these circumstances? Of course, if the French and Germans had each leveled the other's smelters the war would have ended sooner. And so would war-time profits. That was that. Briey and Dombasle came unscathed through the war.

Here the proof of the international operations of the armament makers is open to no question at all. In corroboration there is spread upon the records the testimony of Deputy Pierre Étienne Flandin (scarcely a flaming Bolshevist, for he was later finance minister under Tardieu) to the effect that he, an artillery officer during the war, knew of his own knowledge that the artillery of the French Second Army had been expressly forbidden to bombard Briey when the chance existed and when a 10-mile penetration of the sector would have come close to spelling German ruin. And the statement of his colleague, Deputy Barthe, in the chamber on January 24, 1919, lost little of its significance in the long, loud, vicious debates and investigations which followed it: "I affirm that either by the fact of the international solidarity of the great metallurgy companies, or in order to safeguard private business interests, our military chiefs were ordered not to bombard the establishments of the Briey Basin, which were being exploited by the enemy during the war. I affirm that our aviation service received instructions to respect the blast furnaces in which the enemy steel was being made, and that a general who wished to bombard them was reprimanded."

There is a quality of delirium about facts like these. Anyone who comes upon them for the first time is likely to feel a sense of incredulity that these can be facts at all; to feel that they must be, instead, some insane fiction of a super-Voltaire.

The sense of incredulity is quite excusable. Yet the facts are facts—and into the bargain they are quite easily explicable. In this present imperfect world nations have yet found no agreement upon practical methods of disarming. So long as they refuse to, the easiest way for them to stay armed is to permit a full exploitation of the private profit system in the manufacture of armaments. By this device nations avoid the expense and annoyance of maintaining plants and inventories of armaments throughout a period of 20 years, when perhaps they may never be needed at all; the private armorer meanwhile is able to keep his plants oiled and humming by sales not only to his own government but to foreign markets in which he is able to foment enough suspicion to sell large bills of goods. Here is the rock upon which every private conference that precedes official disarmament conferences has split. Here the circle closes. So long as we must have armaments we must lend rein and scope to the business methods of the armorers. What happened at Briey, considered in this light, was very simple: the mere working out of the profit system in armaments to its perfect, logical, and ultimate conclusion.

CLIMAX—THE DE WENDELS

The episode of Briey brings us now to the pinnacle of the armament structure. Who held the impulsive line officers in check? Through whose influence was the general reprimanded?

We must look higher than to Schneider-Creusot for the final answer. For far overtopping Schneider-Creusot and its subsidiaries stands that great organization of iron and steel manufacturers, the Comité des Forges de France.

The Comité des Forges is not, as it has frequently been called, the "French Steel Trust." It is not a cartel. Individual French iron and steel companies are bound together by rigid agreements covering quotas and prices into great groups like the Comptoir Sidérurgique de France or into lesser ones like the Comptoir des Rails or the Comptoir des Demi-Produits. The Comité cannot be said to combine these organizations; in actuality, however, it remains the most powerful iron and steel organization in France. It does not sell; it does not produce. Its activities are more subtile, more delicate than that. Essentially, its field is in the strategy and tactics of the iron and steel industries; accordingly, politics and propaganda are its principal concerns. It does not have subsidiaries; it has members that pay dues into its central treasury either upon a basis of their tonnage production or the number of their employees. Two hundred and fifty companies—mines, smelters, metallurgical establishments, foundries—make up its membership, and of these 250 companies, over 150 are armament concerns. The nominal capital stock of the member companies of the Comité totals some 7,500,000,000 francs, yet some accountants have placed the figure for a true valuation as high as 40,000,000,000 francs. The chief officer of the Comité, the president, is a man of whom we are to hear much more in just a moment. He derives his power not only from being president of the Comité but as one of the principal owners of his own iron and steel concerns. Beneath him and his administrative board on the Comité there spread out six regional committees: The Loire, Nord, l'Est, Minière d'Alsace-Lorraine, Forges de Lorraine, and Champagne. The total tonnage that the members of the Comité produce in France in a typical year are, for pig iron, some 10,000,000 tons, and for steel some 9,500,000 tons.

Membership begins with firms that may actually be as small and unimpressive as the capitalization would make them seem; it ends in the grand climax of member no. 1, Schneider-Creusot—whose capitalization of 100,000,000 francs reflects only a fraction of its true importance. The great and the little, thus bound together, make up the power and the glory of the Comité. It controls the press; it has the ear of the foreign office. Former President Millerand has been its legal defender; former President Doumer was a director of one subsidiary; present President Albert Lebrun is a former director of another. So—most significantly of all—is former Premier André Tardieu, great leader of the Right. There was no stronger influence upon former Premier Poincaré in his occupation of the Ruhr than the Comité; the present agitation over the Saar Basin springs from its headquarters. It is governed by a commission of directors, and upon this commission as president (we must now displease another lover of anonymity) there sits the misty and cloud-wreathed figure of François de Wendel.

François de Wendel comes legitimately by his present power and position; his family have been Europe's armorers since before the French Revolution—although the De Wendels have not always been French, nor, even, always the De Wendels. There was once a Johann Georg von Wendel, who in the seventeenth century was a colonel in the armies of Ferdinand III of Germany. Since his time, however, the family generally has preferred to remain out of uniform, on the theory that in uniform there is no higher title or power than that of general, whereas by the process of foregoing the title the power may be vastly increased. The members of this family have always been uniquely international. When their vast Lorraine estates lay upon soil politically German they attached to their name the prefix "von" and turned their eyes toward Berlin; when the political frontier shifted under their rich deposits of coal and iron they altered the prefix to "de" and looked to Paris.

Either capital was glad to claim them; the family was equally happy to serve either, or better, both. Today, for example, when political boundary lines throw most of their estates into France, but leave a few in Germany, the family consists preponderantly of De Wendels, but with a sufficient number of Von Wendels in reserve to manage its German affairs. (Being a De Wendel, however, is no necessary barrier to the perquisites and profits still obtainable from the German armament business, as will later appear.) In 1914 the ranking member of the family was Humbert von Wendel, a member of the German Reichstag, living at Hayange in Moselle, near the Saar Basin. After the Treaty of Versailles he became Humbert de Wendel. He still lives at Hayange, but he is no longer a member of the Reichstag. A younger brother, Guy, is a French Senator, however, and of his other brother, the François of the comité, more later.

This international hermaphroditism is not a new family trait. The son of Johann Georg von Wendel, who fought for the German Ferdinand III, blossomed into Christian de Wendel, who was a follower of Charles IV of Lorraine. For a good period of years the family retained the prefix "de"; Christian's grandson, Ignace, was the true founder of the family's fortune—and this, curiously enough, began when he established at Creusot the works that the

Schneiders were later to buy. When the Bastille fell Ignace's close relations with the monarchy drove him from the country. His properties were sequestered, but they were managed by his mother and were bought back through dummies for the account of his two sons. During this turbulent period the sequestered properties were arming the revolutionists, to the De Wendel profit, while the properties beyond the wabbling frontiers of the Republic were arming the monarchists, trying to regain power, and their allies—also to the De Wendel profit.

Then, with the Napoleonic Empire rearing its magnificance upon the ruins of the monarchy, an earlier François de Wendel (Ignace's son) returned to Paris to provide the armaments of the grande armée. The tragedy of Waterloo was no tragedy to the De Wendels; a cartoon of them going home after the battle to count their profit from it would not have been far-fetched.

Today's members of the family were, therefore, well equipped by wealth and heredity for the task of riding the political horses of France and Germany in the later years when Lorraine was to become one of the major circus rings for their virtuosity. Their long experience made Briey almost a minor episode to them. When a military advance turned a French possession into a German one, the De Wendels need have felt no great concern. Regardless of the national tag attached to these mines and smelters, they remained in the placid control of one or the other branches of the family.

The François de Wendel of the present day is a pooh-bah; his connections and directorships would fill this page. He is among other things a director not only of the French but of the German De Wendel companies. But that coincidence does not set forth his true qualities of being a pooh-bah. Is François de Wendel, president of the Comité des Forges, faced with a financial problem? Then let him consult François de Wendel, regent of the Banque de France. Is he in need of political support? François de Wendel, Member of the Chamber of Deputies for Meurthe-et-Moselle, intimate and supporter of André Tardieu, one time controller of some 60 deputies, is the man for him to see. Does this or the other piece of news need to be interpreted? He cannot do better than to consult that powerful journalist, François de Wendel, who owns a majority interest in Le Journal des Débats, is the head of the group that in October 1931 (jointly with the Comité des Houillères, the coal cartel) purchased the semiofficial newspaper of the French Government, Le Temps, controls the Journée Industrielle, and is a power in the management of Le Matin, L'Echo de Paris, and the Agence Havas, the newsgathering organization upon which the provincial press of France very largely depends. Yet for all the illustriousness of this multisided man the newspapers of France almost never mention his name. He does not like publicity.

DOUBLE-EDGED SWORD

Conspirators is not an unfair word to apply to the armament makers of France—yet it must not be used with any melodramatic connotations. Probably the conspirators are not bad men at all in their personal lives and their individual contacts with society. Sir Basil Zaharoff, the passion of whose declining years is orchid culture, would probably not be aghast at the suggestion that he was the greatest murderer the world has ever known. He has heard it too often. And he may even enjoy the irony of his gifts (they took a few millions out of the hundreds of millions he made from the World War) for hospitalization of the war wounded. But probably Eugène Schneider and François de Wendel are lovable old gentlemen who weep at a Chopin ballade. If an advance angel of judgment should undertake today to quiz the de Wendels or Eugène Schneider on the ethics of their business, they would unquestionably answer: (a) They didn't invent the passions and cupidities that lead to war; (b) If they didn't supply the demand for armaments someone else would; and (c) They inherited the business, anyway.

All of which is perfectly true. Then why are these men conspirators? They are conspirators because they have no loyalties; because theirs is the sword that knows no brother. The rise of Hitler to power in Nazi Germany provides a neat example of this—and into the bargain shows what a double-edged sword it is that the armament makers wield.

In Germany the greatest steel company is the Vereinigte Stahlwerke A. G. and for its head it has Fritz Thyssen, king of the Ruhr. It was Thyssen who was Hitler's angel; who, as one move in a battle to retain control of his industrial affairs (dealt a desperate blow by Germany's banking crisis of 1931) began pouring money into the treasury of the Nazis to assure to himself the help of a friendly government. So far nothing improper; if Thyssen believed in the Nazi philosophy or the good it might do him, there was no real reason why he should not lend Hitler all the financial support he wanted to. In 1932 old Fritz Thyssen capped many previous generosities with a single contribution of 3,000,000 marks for the German presidential campaign. But old Fritz, despite his personally violent nationalism, was not at all hostile to the de Wendel-Schneider interests in France. He favored, in fact, a working compact with them so long as he could retain unhampered control of his own properties. We see, then, the spectacle of a Nazi supporter on the one hand breathing fire against France, and on the other sitting down on terms of thorough understanding with the principal armament firm that represented the implacable political enemy of his country.

But that does not complete the picture. The Comité des Forges and Schneider-Creusot were not at all unwilling to see Hitler gain ascendancy in Germany. Here the documentary proof is lacking, but the inferential proof is close to inescapable. In 1933 Hitler sued a German journalist for having made the statement that Skoda (and, through Skoda, Schneider-Creusot) had contributed to his campaign expenses. When, however, he was challenged to make a direct denial that this was so, he stormed from the witness stand, cursed the opposing lawyer for a Jew, never specifically answered the question, and was subsequently fined 1,000 marks for contempt of court as a result. De Wendel and Schneider, according to their immemorial custom, said nothing, and nowhere has a denial of the accusation ever been made.

In other words, as the record stands, the leading munition makers not only in Germany but in France united in their support behind the one man most capable of stirring up a new outbreak of international anarchy in Europe. And by a curious coincidence (here is where the sword presents its other gleaming edge) the de Wendel-controlled newspapers in Paris immediately broke out in a fever of denunciation against the Hitler regime and called for fresh guaranties of security against the menace of rearming Germany. Awake, La Patrie!

ARMORERS' PHILOSOPHY

In that one example the whole philosophy of most armament makers reveals itself. Keep Europe in a constant state of nerves. Publish periodical war scares. Impress governmental officials with the vital necessity of maintaining armaments against the aggressions of neighbor states. Bribe as necessary.[2] In every practical way create suspicion that security is threatened. And if you do your job thoroughly enough you will be able to sink into your armchair and reecho the contented words of Eugène Schneider, announcing a dividend to his shareholders: "The defense of our country has brought us satisfactions which cannot be ignored."

For the armament industry operates with one curious advantage over any other business in the world; the greater the competition the greater the amount of business for all competitors. Perhaps it was Sir Basil Zaharoff who first discovered this economic fact when he played his one-submarine-two-submarine game with Greece and Turkey. At any rate, salesmen for the armament industry know the fact well and build on it today. If a Schneider-Creusot salesman sells 100,000 rifles to Yugoslavia he has already eased the path of the Vickers-Armstrongs salesman in selling 200,000 rifles to Italy. "Under this strange system", the French economist, Delaisi, wrote not long ago, "the war potential of a great country, or of a group of countries, is strengthened by the development of the adverse military power. The trade in arms is the only one in which an order obtained by a competitor increases that of his rivals. The great armament firms of hostile powers oppose one another like pillars supporting the same arch. And the opposition of their governments makes their common prosperity."

WHO HOLDS THE BAG?

A very handsome prosperity it has been; one that has endured as few others during the stormy days since 1929. As a result of the operations of these highly international concerns the world's yearly armament bill stands now in the vicinity of a billion and a half dollars. During the last few years the Far East in particular has contributed much to satisfy the MM. de Wendel and Schneider—to say nothing of Vickers-Armstrongs' Sir Herbert Lawrence. Japan has been a highly profitable customer; the firm of Mitsui, allied to both Schneider-Creusot and Vickers-Armstrongs, served its country splendidly when Manchuria was flaming brightest. It also served China excellently. In 1930 China, the world's largest importer of arms, bought almost 40 percent of its war materials from Japan. The European armament makers who were supplying this trade found the free port of Hamburg convenient: during one famous week in 1932 there cleared from Hamburg two ships loaded with dynamite, grenades, and airplane parts; another with 1,000 cases of explosives, another with 1,700 cases of ammunition, and still another, bringing up a triumphal rear, with 100,000,000 francs' worth of French machine guns.

The world traffic in arms has continued unceasingly since the war; the armament leopards have never changed their spots. Detail upon detail, incident upon incident, illustrate how well the armament makers apply the two axioms of their business: when there are wars, prolong them; when there is peace, disturb it. Let one incident suffice here.

Inevitably, after the war, Hungary caught the itch to rearm. The Treaty of Trianon, by which she made peace with the Allies and associated powers, forbade it. Schneider-Creusot, however, was above treaties. Hungary got the money with which to place a large order with Skoda, the Schneider-Creusot subsidiary in Czechoslovakia—got it through the Banque Générale de Crédit Hongrois, which in turn is financed by the Banque de L'Union

[2] Scarcely a year old is the arms scandal in Rumania. In March 1933 the Rumanian Government discovered that the Skoda Works had evaded taxes to the extent of 65,000,000 lei (something over $600,000). It looked into the safe of Bruno Seletski, Skoda's agent in Rumania, and discovered that he had distributed more than 1,000,000,000 lei (close to $10,000,000) among the "right" officials of both the Government and the army, and their wives and mistresses, and that hundreds of thousands had gone to charity and entertainment because the beneficiaries will be used by us some day.

There was an intense amount of internal and international noise over the scandal, but it subsided in the general political turnover in Rumania last fall. And everything, including the bribes, is just about where it was except General Popescu who, in a fit of conscience, shot himself fatally through the head.

Parisienne, of which Eugene Schneider is a director. Thus it was that Schneider contrived once again to circumvent his government and rearm a nation that France had spent blood and treasure in the attempt to disarm.

But the story does not end here. When the Hungarian loan fell due it seemed inevitable that Hungary would default. Thereupon it was conveniently arranged that Hungary negotiate a loan from the French Government. The plan went through like clockwork. The French Government lent the Hungarian Government just enough money to repay the Schneider firm. The money was transmitted through M. Schneider's Banque de L'Union Parisienne, instead of, as one might have expected, through the Banque de France.

One voice crying in the wilderness was the voice of the French deputy from the Creusot district, Paul Faure. Several times in 1931 and 1932 M. Faure made speeches to the chamber. He raised the question of the Hungarian loan and asked, in essence, Who holds the bag? Obviously not Skoda; it had paid a dividend of 5 percent in 1920 and a dividend of 28½ percent in 1930, with never a recession in its steady year-by-year increases. He went further; he traced from the early days of the century the curious fashion in which French governmental loans insisted on relating themselves to Schneider-Creusot orders. Throughout these years France had made loans to Mexico, Greece, Japan, Russia, Spain, Italy, Rumania, Serbia, Bulgaria, and Turkey, and every one of these countries had thereupon placed armament orders with Schneider-Creusot. The last two countries had, in fact, pushed the return compliment as far as turning French guns, so bought, upon French troops at the outbreak of the war. Almost inevitably, M. Faure pointed out, there sat on the directorate of the financing bank of the country that bought the armaments a representative of Schneider-Creusot or some other member of the comité. This precaution did not, however, prevent most of these loans from being in default. Coming to the present, said M. Faure, "we find M. Schneider arming Bulgaria, M. Schneider arming Turkey, Skoda supporting Hitler, Franco-Japanese, Franco-Argentine, and Franco-Mexican banks. This is all"—he ended with a masterpiece of moderation—"extremely suspicious." Then, having made these revelations, M. Faure shortly after found himself defeated for reelection to the chamber; he was, after all, a deputy from the Creusot district, and M. Schneider found it more convenient to bring about his defeat than to listen to more of his speeches.

RAY OF HOPE

Have governments ever taken any steps to confiscate the business of the armament makers? Very few. In the early days after the war Europe's governments had small heart for proceeding against their betrayers, even though the waxen seals on the Treaty of Versailles were scarcely hard before they were once again busy disturbing the peace.

And although the conviction began later to grow among Europe's more enlightened statesmen that something had to be done about the De Wendels, the Schneiders, and their breed, governments were puzzled to know what it could be. A nation that suppresses or confiscates its private armament industry is faced with these alternatives: (a) It must disarm; (b) it must become exclusively an importer of arms; (c) it must make arms manufacturing a function of the state, which means, in effect, that the state must become (or inevitably thinks it must) a vast arsenal, since, having no opportunity to keep plants large and active by supplying an export trade, it must manufacture in quantities sufficiently large so that it could step overnight from a peace-time to a war-time production schedule.

Therein lay one difficulty. But why could concerted action toward disarmament make so little progress? One important reason was first laid bare by Lord Robert Cecil. "There is a very sinister feature", he said, "to all the disarmament discussions. I refer to the tremendous power wielded against all the proposals by armament firms. * * * We must aim at getting rid of this immense instrument in the maintenance of suspicion." Yet in 1932 the Disarmament Conference was enriched by the presence of M. Charles Dumont, of Schneider-Creusot, president of the Schneider-controlled Banque Franco-Japonaise, on the French delegation. The British delegation was similarly benefited by the advice of Col. A. G. C. Dawnay, the brother of a director of Vickers-Armstrongs, and now the political supervisor of the British Broadcasting Corporation.

If the armament business were conducted by an outlawed band of international gangsters, the problem would be simple to define. The difficulty is that precisely the opposite is the case. The armament business is a part of the most essential industries of industrialized nations—steel and chemicals. But even so, the problem does not become acute until you have a nation in which the biggest part or a very, very large part of these essential industries is the manufacture of the actual munitions of war. Such is the case in France and also in Czechoslovakia and potentially in Germany.

No American would be shocked to hear that the steel business and the coal business of Pennsylvania, owners and workers together, exercised big political influence in Pennsylvania and, through Pennsylvania, upon the Nation. Now, put Detroit also in Pennsylvania. And then suppose that by far the most profitable part of the combined steel-coal-motor car industry were the manufacture of munitions. And then try to imagine a Senator from Pennsylvania convincing himself that there is no possible chance of war with Japan and that therefore both the American Navy and the American Army are much too big.

While this may make it easy to understand why Messrs. de Wendel and Schneider should be so influential in France, it brings us no nearer a solution. To deal with the general problem of disarmament in all its phases would be impossible within the limits of this article. Suffice it to say, the simplest solution is to have the State take over all the manufacturing of munitions. But to do that, the State would have to take over most of the essential industries of modern life. And for anyone but a 100-percent Socialist, that is not simple at all. Russia is today the only country in which there is no private manufacture and sale of armaments.[3]

Then is there no hope? Is Europe caught so tight in the steely grip of the armament makers that it can only do their bidding?

Well, the grip is pretty tight, yet there is some hope. Perhaps there is a war coming but first there is a fight coming.

And in recent months that fight has loomed most noticeably in France. The Comité des Forges has decidedly not been a popular name in France these last few months. To be exact, it never was a popular name. Just as a politician in the United States was always against Wall Street during his campaign, so in France many a political victory has been won by accusing the opposition of being in the pay of the Comité des Forges. Of late, as political tension in France has grown hotter, so resentment against the de Wendels and the Schneiders has grown more bitter.

No country has more to gain from peace and the sanctity of treaties than France. So it is not surprising to find that many Frenchmen are now saying that France made a tragic mistake in supporting Japan (in a backhand manner) in the Manchurian affair. And they note, with bitterness, that it was the de Wendel press that wanted to let Japan have her imperial way.

To France's great credit it must also be said that, except in the Manchurian affair, France has been, for her own best interest, the stanchest supporter of the League. More than that, her Briand was unquestionably the greatest peace man of the post-war decade. Today, many a Frenchman is resentful of the fact that Briand's policies did not succeed in conciliating Germany, and while blaming Germany most, he wonders whether the failure was not helped along by the patriotic M. de Wendel.

By the time this is published France may have chosen her next major political direction. If Herriot should come to power again, it may well be that he will feel a mandate even more powerful than ever before to fight against the warriors of Europe—and to include among his enemies the armorers, greatest of whom are the greatest industrialists of his own land. For they are sometimes not too clever, these Schneiders and de Wendels. And they seem to miss one point: the fire trenches and shell holes that scar the countryside in war time are only the primary lesions of an international social disease. When the disease at last inevitably attacks the blood and bones of nations that have gone to war even De Wendels and Schneiders can suffer—suffer with their tottering banks, their dropsical holding companies, their shocked and collapsing industrial empires.

Within their long lives, however, neither François de Wendel nor Charles Prosper Eugene Schneider has ever let drop a word to indicate that he sees any connection between his business and an eventual ruin of his capitalistic industry. Only Sir Basil Zaharoff, doddering brokenly in his wheel chair, seems to give any outward evidence of disillusionment. That may be only because he gambled $20,000,000 of his personal fortune on the only war in which he ever took emotional sides—the Greco-Turkish War in 1921—and lost it.

Or it might be because he was always the cleverest, anyway.

APPENDIX: ARMS AND THE MEN

Love thine enemy

The armorers, after all, are the true internationalists. Regardless of their nationalities, they work in concert at the two axioms of their trade—prolong wars, disturb peace. Between 1914 and 1918 they practiced constantly a neat practical way of prolonging war.

It was this: If your enemy is in danger of running short of a basic raw material that he needs in the business of destroying your troops, sell him some out of your own surplus stocks.

Such interchanges went on constantly during the war—always, of course, through a neutral intermediary. (The amenities of warfare must be observed, even at some inconvenience.) Throughout the war English and French industries maintained to Germany a steady stream of glycerin (for explosives), nickel, copper, oil, and rubber. Germany even returned the compliment; she sent France iron and steel and magnetos for gasoline engines. This constant traffic went on during the war via Sweden, Norway, Denmark, Switzerland, Spain, or Holland, by the simple process of transshipment—enemy to neutral to enemy.

It is no bristling Communist who supplies corroboration, but as conservative and well-considered a gentleman as Rear Admiral Montagu William Warcop Peter Consett, who was British naval attaché in Denmark between 1912 and 1917 and in Norway and Sweden between 1912 and 1919. He stated, in so many words, that if the blockade of Germany had been really effective during 1915 and 1916 Germany would have been forced to her knees long before the collapse of Russia permitted her to prolong the struggle by throwing more troops into the trenches of the western front. And it is he who is responsible for the following statement: "In

[3] Parenthetically it will be recalled by those who have followed the dreary course of disarmament conferences that Russia, in the mouth of Comrade Maxim Litvinoff, has been the most consistent and the loudest advocate of disarmament.

1915 England exported twice as much nickel to Sweden as in the 2 previous years put together. Of the total imports of 504 tons, 70 were reshipped to Germany. But it can be said that the total importation served the needs of Germany, for the remaining 434 tons were used in Sweden for the manufacture of munitions."

And so it went. Germany throughout the war had urgent need of nickel, aluminum, and chemicals like glycerin for explosives. France, because the rich Briey Basin and other sources were out of her control, had to scratch hard for iron and steel. Continuously, therefore, what one nation lacked, the armament manufacturers of an enemy nation did their urgent best to provide. Month after month, during the war, German heavy industries exported an average of 150,000 tons of scrap iron, steel, or barbed wire to Switzerland, where having been smelted to a more convenient form it was then transshipped to France. France, in her turn, shipped chemicals to the Lonza Co. (a Swiss industrial concern, German controlled, but with directors who were French, Italian, and Austrian as well) from which they reached munitions works in Germany. It was all very profitable—and the splendid war went on and on.

Mr. VANDENBERG. Mr. President, in the course of the very able address of the Senator from North Dakota [Mr. NYE] reference was made to the two resolutions which have been sent to the Military Affairs Committee respecting an inquiry into the various phases of the munitions problem. The Senator from North Dakota secured permission to insert in the RECORD the full text of his resolution. I ask unanimous consent that the full text of my resolution may also be printed in the RECORD at this point.

There being no objection, the resolution (S.Con.Res. 9) was ordered to be printed in the RECORD, as follows:

Whereas the influence of the commercial motive is an inevitable factor in considerations involving the maintenance of the national defense; and

Whereas the influence of the commercial motive is one of the inevitable factors often believed to stimulate and sustain wars; and

Whereas the Seventy-first Congress, by Public Resolution No. 98, approved June 27, 1930, responding to the long-standing demands of the American war veterans, speaking through the American Legion, for legislation to "take the profit out of war", created a War Policies Commission which reported recommendations on December 7, 1931, and on March 7, 1932, to demonetize war and to equalize the burdens thereof; and

Whereas these recommendations never have been translated into the statutes: Therefore be it

Resolved by the Senate (the House of Representatives concurring), That a new commission, to be known as the "Defense Commission", is hereby created to consist of 12 members, as follows: The Secretary of War, the Secretary of the Navy, the Attorney General, the Secretary of the Interior; four Senators to be designated by the Vice President; four Representatives to be designated by the Speaker of the House; and that this Commission is instructed to investigate and report within 12 months upon—

(a) A review of the findings of the War Policies Commission, and such specific legislation as it recommends to accomplish the purposes set forth in such findings and in the preamble to this resolution; and

(b) An inquiry into the desirability of creating a Government monopoly in respect to the manufacture of armaments and munitions.

For the purposes of this resolution the Commission, or any duly authorized subcommittee thereof, is authorized to hold such hearings, to sit and act at such times and places during the sessions and recesses of the Congress until the final report is submitted, to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures, as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the Commission, which shall not exceed $25,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.

OUTRAGEOUS GOVERNMENT FRAUDS

Mr. LONG. Mr. President, I am not going to detain the Senate more than a very few minutes.

I had expected to vote for this bill; but there has been exposed on the floor of the Senate, together with information I have received this morning, evidence showing such an orgy of corruption and rottenness surrounding this shipbuilding and these shipping contracts that I am not going to vote for anything of the kind, including this naval bill, under the circumstances that exist.

Particularly was I impressed by what the Senator from Idaho [Mr. BORAH] exposed here yesterday in connection with the munitions propaganda not only in America but in foreign countries, through which these American financiers are exciting one nation into building armaments, selling them to that country, and then coming back and exciting America into matching those armaments, and then at the same time carrying on their propaganda to encourage their trade in the Orient to sell more armaments after that is done.

I have here, however, something which I desire to have preserved in the records of the Senate that shows the kind, the character, and the depths of the rottenness and the corruption and the thievery that this shipbuilding business has finally fallen into.

A shipping line, known as the "United States Lines", was organized by the United States Government at a cost of around $50,000,000. The big ship of this fleet was known as the *Leviathan*. The United States operated that shipping line as its own business at a loss of around $1,000,000 a year. Finally, it decided that it had better let these ships out to private interests; and so a sale was arranged to a concern known as the "United States Lines of Delaware" for $16,000,000, for the institution and ships that the United States has spent $50,000,000 to build.

The United States Lines of Delaware paid $3,000,000 of that money in cash. They returned two ships for $2,800,000, and made the first deferred payment, I think, of $807,000, leaving a balance of about $9,000,000 of the original $16,000,000. After this concern, the United States Lines of Delaware, had operated for a while and had made one payment, they ceased to make any further payments.

This concern had also entered into a contract with the Government, through the Shipping Board, for a subsidiary concern to build two other ships at a cost of $20,000,000, of which the Government was to put up $15,000,000. They had been unable to put up the money for the second one of those ships—that is, their one fourth—though they had put up the money for the first ship. So there was a general break-down of the United States Lines of Delaware in its obligation to the Government. So there was sent on a kind of a cruising expedition, armed with the authority to negotiate by the Shipping Board, a gentleman by the name of T. V. O'Connor, the chairman of that Board, and Admiral H. I. Cone, retired. They went up to New York like roving ambassadors, and they had a number of conferences, and finally they went into and stayed in the hands of several gentlemen, most prominent among whom were Mr. P. A. S. Franklin, Mr. Kermit Roosevelt, and Mr. Basil Harris, connected with the International Mercantile Marine in many concerns.

They finally devised a scheme like this: The Delaware concern owed the Government $9,000,000. The United States Lines of Delaware sold all the ships that that corporation owned and all the stock that that corporation owned in subsidiary corporations to the United States Lines of Nevada. They just took the corporation and gave the same name to another corporation to be organized under the laws of another State, but they did not transfer the capital stock nor the debts of that corporation, mind you. What they had the new corporation buy was the physical ships and the stock which the old corporation held in its subsidiary corporations. Then the Shipping Board, through Mr. Cone and Mr. O'Connor, entered into a deal with the United States Lines of Nevada, and, without their paying a single copper cent in cash—not a quarter; they have not paid a quarter to this day—the United States Shipping Board sold to the United States Lines, Inc., of Nevada, the $9,000,000 worth of notes that it held against the ships and against the United States Lines of Delaware, for the consideration of a $3,000,000 note payable beginning 3 years from 1931.

There was a little hearing over in the House in which they subpenaed the memoranda of Admiral H. I. Cone, and they brought into the record evidence that Mr. Cone's memoranda were supposed to show that the consideration for giving away $6,000,000 of the Government's obligations and, we might say, deferring $3,000,000 more, was that it would cost a million dollars a year to operate the *Leviathan* between New York City and Southampton. Then it developed

that the United States Lines of Nevada was a concern owned by the interests connected in the International Mercantile Marine.

What is the International Mercantile Marine? True, it is confounded with certain shipping interests; but the main interest of this concern that is confounded with the International Mercantile Marine is a British interest. That concern owns a $9,000,000 mortgage on the White Star Line.

It owns the Leyland Line, and now the same interest, the majority of whose ownership is in the shipping company which sailed under the flag of Great Britain, has come to the United States, under the theory that they are running an American mercantile marine, and has canceled $6,000,000 of its debt to our Government, has gotten $3,000,000 of notes extended, and has in the meantime gotten a mail-subsidy contract in the amount of $4,000,000 per annum while paying nothing whatever on either the principal or interest.

Mr. President, that is just starting the story. It has not even started yet. What else have they done? These other British concerns, which were connected with this International Mercantile Marine crowd, which is supposed to be taking our ships and our $6,000,000 for the love and affection of establishing and of maintaining an American marine, were running a foreign competing line. The *Leviathan* was the biggest ship in the world, with which their British concern ships were competing between New York City and the United Kingdom and Great Britain. They have the *Majestic*, which is being run by the White Star Line between New York City and the United Kingdom, and other ships, and what have they done to the *Leviathan*, the operation of which was supposed to be the consideration for this gift? They have laid up the *Leviathan*. They have let it rust, they have let it go to waste. It has now become practically unseaworthy so far as sailing between the United States and any country on the other side of the Atlantic is concerned. Now the *Leviathan* is no longer being maintained, but they are operating the *Majestic*, a steamship owned by the White Star Line, over which concern the International Mercantile Marine holds a mortgage of $9,000,000, in close affiliation with the Leyland Line, also a British interest, which is today in complete control of the route over which an American line was supposed to be maintained in return for all the American millions given to this interest.

Mr. President, they have actually been given the money of the United States, and have used it as a means of driving out the American Line altogether, and they have been given $4,000,000 of American mail subsidy money for the purpose of putting out of business the American Mercantile Marine, and the United States Government is standing for that today.

Mr. LEWIS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. LEWIS. I merely ask the Senator from Louisiana whether he will not please inform his hearers under what administration and at what time the particular things to which he has alluded were done.

Mr. LONG. Both this administration and the last one. It is being done under this one, and was being done under the last one. There is no difference between them, not a bit on God's living earth. It is just the same thing.

Mr. LEWIS. Mr. President, if the Senator knows, will he be good enough to inform us under what administration and at what time these particular contracts, subsidies, and other arrangements, which he says merged the American marine out of existence, were conducted, and under what administration they were transacted?

Mr. LONG. They were originally made under the Hoover administration, but the late developments have taken place under the present administration, and the chief negotiator is Mr. Kermit Roosevelt. I am going to disclose further facts, and bring the recital up to date. This was part of the old Hoover contracts of 1929, and I want to say this, that before they made the contract to which I am referring, in the year 1923 or 1924, the United States Government spent $9,000,000 to put the *Leviathan* in absolutely tip-top condition, or three times the amount they sold the whole fleet of ships for.

Mr. LEWIS. The Senator says some other transactions transpired under the present administration. Will he not tell us what officers of the present administration participated, and what thing was particularly done by this administration which, he says, leaves no difference between this administration and the other?

Mr. LONG. I mean to say to the Senator that the *Leviathan* is laid up. I mean, further, that they took off two ships which they turned back, and they are not being operated. One was the *George Washington*, and the other was the *America*. One of them carried President Wilson to Europe when he went there.

I mean this, that this subsidy is today going to this concern. They are paying out $4,000,000 of our money now, and while the contract was originally made under the Hoover regime, I am calling it to the attention of the Senate so that this administration will take knowledge of what is being done now, because they are actually paying the money out to this crowd, which has used the purchase not only for taking the American money but in order to drive off the very American mercantile marine which they were supposed to maintain in return for these subsidies, and this $6,000,000 sliced off the purchase price.

Mr. LEWIS. Then the Senator did not mean to state that the present administration had participated in making the arrangement and carrying on the contract to which he has alluded, indicating such conduct as he has said was transpiring.

Mr. LONG. I mean it is going on right now, and I say it is as fraudulent and rotten a thing as was ever done. It is going on now and has been going on. I do not want to make this a partisan matter. I do not want to charge the responsibility either to the Republican Party or to the Democratic Party. It is going on today, under the old set-up, we are continuing it, and it is just as fraudulent for us to continue it as it was for them to have made it. That is why I am bringing it to the attention of the Senate today.

Mr. LEWIS. But I must call to the attention of the Senator the fact that he has stated, and it will be published over the country, that the conduct he has been indicting as treacherous and illegal, certainly as unlawful, was participated in by the present administration equally with the other, and that they were both equally to blame. I am calling to his attention the fact that he states that because we have not had time to investigate and undo the wrongs, for that reason he holds the present administration responsible until they shall undo them.

Mr. LONG. I do not know what the Senator would call the present administration, but the present Shipping Board administration has full knowledge of these facts. I do not mean to say that the present Senators and Representatives and the present President may know all about it, but the present administration of the Shipping Board is aiding and abetting, and I understand that they have about gotten things fixed up so that this man Cone is going to be appointed President of the Shipping Board, that is why I have risen here today, so that this disclosure will be made in time to prevent that happening.

Mr. LEWIS. I understand the Senator's position now.

Mr. LONG. I thank the Senator.

Mr. KING. Mr. President, will the Senator yield to me?

Mr. LONG. I yield.

Mr. KING. The Senator from Louisiana will recall that soon after the present administration came into authority, a resolution was adopted by the Senate under the terms of which a committee of which the Senator from Alabama [Mr. BLACK] is the chairman, and I am an humble member, has been investigating the contracts to which the Senator refers, as well as contracts made with many of the aircraft companies. There has been some criticism because one of the officials of the administration canceled some of the contracts which were entered into.

Perhaps it would be wise to await the report of the committee; and if there shall have been improper methods employed in obtaining these contracts, if they are tainted in any way with fraud, doubtless the committee will make such recommendations as will warrant proceedings in the courts, if necessary, or an abrupt cancelation of the contracts.

Mr. LONG. I thank the Senator; but I want these facts to go into the RECORD. I believe that perhaps the committee will get around to the matter, though I am sure the Senator will agree with me that it has a lot to do. But I want to give some facts which are matters of record, and I want to see that the thing is gone into a little more thoroughly, because it needs to be gone into.

The *Leviathan* is hung up, and it has been taken off its route—the *Leviathan*, the greatest ship in the world, on which they spent $9,000,000 in order to put it into better shape. Then they canceled $6,000,000 of this bunch of notes, and laid the *Leviathan* up, when it was supposed to be the consideration, and now they have $4,000,000 worth of contracts per year.

The air-mail subsidy was not a drop in the bucket compared to this kind of thing. All the air-mail contracts put together would not amount to a few things like this matter to which I am referring. But here is another thing to which I shall call the Senate's attention. They have these interests so confounded that it is now fixed so that they can keep all this subsidy money, they can put out of business the United States lines, and can drive what little independent American mercantile marine there is on the ocean back into the harbor, yet they do not have to pay a dime of this $3,000,000 when the 3 years expires. There is no responsibility whatever to make any one of them give back a dime, or to make any one of them give back any of the subsidy money, or to pay the $3,000,000, except this subsidiary corporation which they have incorporated under the laws of Nevada, and by the time the 3-year note comes due they can have made away with the ships, probably, about as they have with the *Leviathan*, and that will end the matter; they will have their subsidy money and the rest may all be killed, excepting such profits as they made in the meantime.

They have the Roosevelt Steamship Corporation, of which Mr. Kermit Roosevelt is president, supposed to be the steamship management company. It is in the form of an Insull set-up. Insull must have copied this set-up, because it was a great deal more successful than Insull was able to be in this country. They have the thing set up so that they have that little, old, two-bit corporation they are supposed to have organized under the laws of Nevada as the only debtor. They have countless other steamship companies operating in connection with the crowd of the International Mercantile Marine, which is drawing a million dollars subsidy over here and a million dollars subsidy over there, and making such use of the *Leviathan* as they want to, laying up that ship so that they can leave the way open for the British-subsidy ship to sail as the only ship on the line where the American ship was supposed to sail, and we cannot even touch the Roosevelt Steamship Corporation, or any of these other corporations which might have anything, because they are just operating management steamship companies.

That is the kind of rigging the United States Government finds itself in today. While I condemn the parties who, under the Hoover administration, made it, I condemn myself and everyone who is cognizant of it for not washing this thing out and bringing this kind of fraudulent and rotten scheme to the attention of the public, and further, Mr. President, it makes me shudder in my boots when I see the manipulators of such propositions called in for advice and counsel, and being prominent in social affairs and government affairs in this day and time.

It is enough to make a man who has been dead a thousand years turn over in his grave to see such people come here and engage in such kinds of fictions and frauds and rotten schemes, and then to hear talk about indicting some little old two-by-four man out in the country for some little two-bit crime, or talk about keeping Capone in jail for having done something that perhaps is very bad, and yet to allow these "decent" and "respectable", white-winged and long-tailed-coat gentlemen, philosophers of government, to reach their hands right down into the United States Government Treasury and take out $4,000,000 in one lick for 1 year, and $6,000,000 on something else, and then make a contract and state that the reason they are getting all this money is that they are to keep up an American steamship line, which is then turned over to a British steamship line, and then the American ships are taken off, leaving nothing on that route but the British subsidy ships. That, Mr. President, is the rottenest kind of a fraud ever perpetrated in a civilized country.

I think the whole thing, Mr. President, is full of such slime of racketeering from top to bottom that we had better pause, look about us, and see what we are about to go into before we talk about voting another billion dollars to be spent for shipbuilding, whether it is for the Navy or whether it is for the merchant marine. I will vote "no" this time for that reason.

I would prefer to vote this billion dollars to feed the starving rather than for more battleships to help to kill somebody under such conditions as prevail.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida [Mr. TRAMMELL].

The amendment was agreed to, as follows:

On page 4, line 11, strike out all after the word "act" down to and including the word "contract", in line 15, and insert:

Provided, That any profit resulting from any contract, or subcontract, of $10,000 or more, payable from such funds as may hereafter be appropriated for the vessel or vessels and aircraft authorized herein, or vessels heretofore authorized but not yet contracted for, or payable by the contractor to any subcontractor, shall not exceed 10 percent of the cost of performing such contract or the subcontract, respectively. All contractors and subcontractors shall report the net profits from such contracts, under oath, to the Secretary of the Treasury of the United States, upon the completion of the work under such contract or subcontract. Such report shall provide such information and be on such forms as shall be prescribed by the Secretary of the Treasury. All profits of either the contractor or subcontractor in excess of said 10 percent shall be and become the property of the United States of America and shall be collected by the Secretary of the Treasury by suit or otherwise and be paid into the Treasury of the United States under such rules and regulations as the Secretary of the Treasury may prescribe.

The PRESIDING OFFICER. The question now recurs on agreeing to the amendment heretofore proposed by the Senator from Washington [Mr. BONE], which has been temporarily laid aside.

Mr. BONE. Mr. President, at this time I propose to discuss two or three amendments to the naval bill which are now pending. One is my amendment to provide that naval aircraft under the proposed program of expansion shall be built in Government plants. I shall read the amendments after I have referred to them.

The second is an amendment which is in itself not legislation but a declaration of public policy.

The third is an amendment proposed by my colleague [Mr. DILL], which is in a way a restatement of the law as enacted, as I recall it, in the statute of 1916. I desire to read the amendments for the benefit of the Members of the Senate so they will understand their purport and meaning.

The first one relative to the building of naval aircraft in Government factories reads as follows:

Provided further, That not less than one half of each succeeding lot of aircraft, including the engines for such aircraft, the procurement of which is authorized by this act and hereafter undertaken, shall be constructed and/or manufactured in Government aircraft factories and/or other plants or factories owned and operated by the United States Government.

That was the original amendment suggested to the Senate committee. An official of the Navy Department talked to me and said this provision would impose a too severe restriction on building operations and asked if there might not be a further proviso attached to that suggested amendment which would authorize the President to suspend, in

part, at least, the necessity for building this proportion of planes in Government plants, a proposal to which I have no objection, provided there shall be coupled with it the further provision that in the event such an order is made, the Government itself shall so expand its present facilities as to be able to actively engage in the building of aircraft later. So the following provision was added by myself:

The foregoing proviso is subject to the further condition that if it shall be determined by the President that present plants, factories, and equipment owned by the Government are not such as to permit the construction and/or manufacture of the said aircraft and/or engines in such Government plants and factories, in the proportions herein specified and required, then and in that event such requirement may be suspended in whole or in part by his order.

Let me digress for an instant to say that under that provision the President could arbitrarily suspend the building or the attempt to build these naval aircraft in Government factories. I proceed to read further:

However, in the event of such order of suspension being made by the President, the existing plants, factories, and facilities now owned and/or operated by the Government shall forthwith be expanded and equipped to enable the Government to construct, manufacture, and repair its own naval aircraft therein, and, in addition, such other and further plants and facilities shall, as speedily as possible, be constructed and/or acquired by purchase or condemnation for the purpose of enabling the Government to take over and perform the work of constructing, manufacturing, and repairing all of its naval aircraft therein. The funds necessary for the enlargement and expansion of such existing plants and facilities owned by the Government and for the construction and acquisition of new plants, factories, facilities, and equipment for the construction and manufacture of naval aircraft are hereby authorized to be appropriated.

Mr. President, there has been some question as to whether or not we should require the building of all naval aircraft in Government factories under the proposed program of expansion. If it shall be determined, in the wisdom of the Senate, that it is not proper to build all naval aircraft in Government factories to be created as the result of my amendment, then the word "all" at the end of line 21, on page 2, might be stricken and a substitution made of the figure 50 percent, or 33 percent, or whatever percentage it shall be determined is the proper percentage of planes to be built by the Government.

The PRESIDING OFFICER. Does the Senator propose this minor amendment now?

Mr. BONE. I am not proposing it, Mr. President. I am merely suggesting that it has been brought to my attention. I am not going to insist on the word "all" remaining in if it defeats my amendment.

The PRESIDING OFFICER. The Senator has the right to modify his own amendment.

Mr. BONE. I understand that, Mr. President.

Mr. TRAMMELL. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Florida?

Mr. BONE. I yield.

Mr. TRAMMELL. In view of the lack of equipment and the necessity for the President to enlarge the present facilities, I suggest to the Senator from Washington that the chairman of the committee and, I am sure most of the members of the committee, would be willing to accept his amendment if he changes the word "all" on line 21, page 2, to "not less than 25 percent." That would provide for at least 25 percent of the aircraft to be constructed in Government plants. It seems to me that in view of our lack of equipment at the present time such a provision would give us a wonderful start on what I consider a very commendable purpose as proposed in the Senator's amendment. We might do a considerable amount of aircraft building in Government plants. I think we could agree on making that "at least 25 percent" instead of "all", or even 50 percent. That would give us a wonderful start in the direction which the Senator suggests, which suggestion I think is really very commendable.

Mr. BONE. Mr. President, I, of course, have no means of knowing what disposition the Senate will make of my proposal; and if the matter is to be opposed or if there is to be an adverse vote on the 25-percent proposal, as suggested, I should not want to consent to strike out the word "all", for I would rather the whole amendment go down to defeat on the direct issue of the proposal for public plants to build all planes. I know the attitude of the Senator from Florida, and I understand why he makes the suggestion, and I am not hostile to it. I merely want to be very certain that we begin on "public preparedness."

Before leaving that subject, let me suggest to the Senator from Florida that I have had supplied to me, by the American Federation of Labor, some information about our existing Government facilities for the building of aircraft. I know the Senator will agree with me that the provision does not compel the Government to immediately build 25, 50, or 100 percent of the aircraft. It merely provides that the Government shall, as rapidly as possible, expand its facilities for the building of naval aircraft in the event the President makes certain suspension orders, so there would, of course, be time given to the Government to either build or acquire by purchase or condemnation such facilities, factories, and equipment as the Government might require for carrying forward the public-building program.

There is an aircraft factory at Philadelphia owned by this Government and built during the war which was capable of manufacturing approximately 200 airplanes every year. During the World War this factory turned out an average of one airplane a day. In the light of the experience of the Government in dealing with private airplane companies, and the unholy and unconscionable profits revealed in the contract relations of the Government with some of these companies, I am at a loss to understand why this factory has not been expanded, as a matter of self-protection. I think the time has arrived to announce definite policy, and, in the vulgar vernacular of the street, come to a show-down on the question whether the Government is to continue to remain helpless and at the absolute mercy of private manufacturers of airplanes and war munitions, or whether it is to set up some definite yardstick by which it can protect itself from ruthless exploitation. It is a cold-blooded, business proposition. No one can justly complain of the Government defending itself against the encroachments of those who will take advantage of it and whose attitude of mind is simply to strike from the hands of the Government its last protective weapon, the only device by which it can protect itself from the greed of individuals.

I want to later discuss what some private agencies did to this Government in time of war when the Government was unable to operate its own factories in the supplying of munitions and war equipment.

At the Pensacola aeronautical station down in the State of the Senator from Florida airplanes are extensively overhauled. There is considerable amount of equipment for making airplane parts at that plant. I am advised that, with some additional facilities, airplanes could be manufactured at the Pensacola station.

The War Department, according to this statement from the American Federation of Labor, has no aircraft factory as well equipped as the Navy Department has in the aircraft factory at Philadelphia, but the Army has two stations at Dayton, Ohio, one called the Matériel Air Corps Station, and the other the Fairfield Air Depot, which are equipped extensively to repair and assemble aircraft. It is believed that this station could readily be equipped to manufacture aircraft. The War Department also possesses a repair depot at Middletown, Pa., which could be readily extended to manufacture aircraft.

But, aside from the matter of present facilities, it seems rather stupid to assume that this Government, with its great Departments and with its ability to hire men who know their business, cannot build efficient airplane factories within a reasonable length of time. Certainly, we can hire technicians and mechanics. I say that it would be the height of stupidity even to assume here—and I certainly am not going to do it in this argument—that the United States Government cannot hire men fully as capable as those any private company can hire. The experience of public bodies

in the development of public enterprises has demonstrated the folly of that sort of argument.

As to whether or not there is justification for the building of aircraft in Government factories, we only have to look at some of the profits shown by the recent investigations to have been derived by private companies from Government contracts. There is not a more somber chapter of American history than that revealed by the investigation of ship subsidies. I think I am justified in referring to some of these subsidies as sheer looting of the Treasury of the United States, which, in the name of patriotism, in the name of good business practice, has been accomplished and carried on under forms of law.

It is rather interesting to pick up the headlines of the newspapers and read them nowadays. For instance, in January 1934, I observe the percentage of increase in the price of airplane, shipbuilding, and related stocks due to the pendency of naval legislation, under which it is proposed to spend a half billion dollars. Now let us see what happened to the stock market and what the private-profit happiness boys were thinking about when they saw all this easy Government money in the offing.

The percentage of increase of an average of some 50 stocks amounted to about 8.5. But observe what happened to the airplane and shipbuilding stocks, the stocks of those companies that are vitally affected by the prospective expenditure of the vast sum of money under this bill and which they hope will be reflected in profits running all the way from 20 to 90 percent.

The stock of the Aviation Corporation of Delaware showed an increase of 28.1 percent.

The Bendix Aviation Co., 31.8 percent.

Bethlehem Steel Co., 26.2 percent.

Bethlehem Steel, preferred, 17.5 percent.

Curtiss-Wright, 95.2 percent. Curtiss-Wright, with $10,000,000 to be ladled out in the building of aircraft, reflects the coming Roman holiday by an increase of 95.2 percent in the market value of its stock in that month.

Curtiss-Wright A, 86.3 percent.

Douglas Aircraft, 82.5 percent.

Electric Boat, 80.6 percent.

New York Shipbuilding Co., 75.5 percent.

New York Shipbuilding Co., preferred, 16.3 percent.

United Aircraft & Transport, 13.6 percent.

United States Steel, 15.4 percent.

Wright Aeronautical, 232.2 percent.

Perhaps it is not fair to utilize this abrupt and abnormal rise in Wright Aeronautical as having any relationship with the pending bill. Probably that is not the case because I am informed there were short sales in that stock, which made it necessary for gentlemen to get the certificates at any price and almost under any consideration. Now let us take up some of the newspapers and see what the press has been telling the American people as to what has been revealed by these investigations, and let us see what connection there is between the facts that are being developed in the investigations and the plums that are going to fall into the laps of the private airplane companies in the event of the passage of this bill, unless restrictive provisions are placed in the bill which will prevent the exploitation of the Government.

The New York Times of February 6 carries the announcement that—

William E. Boeing, chairman of the United Aircraft & Transportation Co., made paper profits of more than $51,000,000 and actual profits of about $12,000,000 from an original investment of $487,119 in the Boeing Aircraft & Transport Co., he admitted today at a hearing held by the Senate committee investigating ocean-and air-mail contracts.

Further, says the New York Times article:

Mr. Boeing admitted that the Pratt & Whitney Aircraft Co., owned by Mr. Boeing's corporation, made a 5-year net profit of $12,045,549 and paid bonuses of $1,247,100 and executives' salaries of $629,766, largely through the sale of airplane motors to the Army, the Navy, and Government mail contractors.

It is easy to see what this private mortgage on our Government, or what virtually amounts to that under the conditions which have been discussed so vividly and forcefully on the floor of the Senate, is leading us to.

Here is another story published the other day about "poker parties in which lobbyists lost large sums of money to Government officials from whom they were seeking contracts", a condition now being investigated by a grand jury.

The Washington Post of February 26, 1934, carried an Associated Press story, from which I quote the following:

Representative McFARLANE (Democrat), Texas, one of the congressional investigators of American aviation, asserted yesterday that "the United States has virtually squandered over $200,000,000 since 1921 and ended up with an inefficient air force.

Another article is headed—

Aircraft sold Army 7 years without bids.

This story, which appeared in the Washington Post of February 27, says, among other things—

Over the protests of Comptroller General McCarl, with Congress ignorant of what was going on, the War Department for 7 years has been procuring aircraft for the Army Air Corps in contravention of the intent of the sponsors of the act of July 2, 1926, according to official information, which, it is understood, is to be placed before the House.

And, in that connection, it is disclosed that goggles were bought by the Army for $100 a pair.

Large profits—

Says the Washington Herald of February 27—

made by the Pratt & Whitney Aircraft Co. on aero engines furnished to the Navy were chiefly the result of the extraordinary aviation boom in 1927 to 1930, Edward P. Warner, former Assistant Navy Secretary, told the House Naval Subcommittee yesterday.

The committee questioned Warner about contracts for flying materials during the time he was in charge of naval aeronautics, from July 1926 to March 1929, when profits as high as 90 percent were gained by private contractors.

Again, in an article appearing in the Hearst Service, it is stated that—

The Navy Department figures the profit to the Boeing Airplane Co. on Navy business at 68 percent.

These are some of the things that are typical of what has been going on and what has been done to this Government.

Going back to February 7 of this year, the Associated Press carries a story that—

W. E. Boeing, of Seattle, chairman of the board of the concern, said that George S. Wheat, a vice president, drew $25,000 a year salary and his duties were chiefly in soliciting Federal business.

ADAMS INVITED

The concern holds a transcontinental air-mail contract and makes planes and engines for the Army and the Navy.

* * * * * * *

Boeing, asked if he did not know his concern was paying more than $60,000 to Washington representatives, replied, "That's possible."

Here is another headline in an Associated Press story:

Boeing profit of 90 percent on Army contracts bared.

Another story is headed:

Plan for $2,000,000 "cut" on Army truck deal bared in probe.

Mr. President, I sometimes wonder if the gentlemen who enjoy this Roman holiday, who have had this little fling at the expense of the American taxpayer—and what a pleasant Roman holiday they have had—have not after all created a sort of little C.W.A. all of their own and exclusively for themselves. I think most of us will recall the story of Aladdin's lamp. The small Arabian boy found his magic brass lamp and he rubbed it and a genii appeared. The small boy, badly frightened, did not know what it was all about, but the genii said, "I am the servant of the lamp and you can have anything you want." How thrilled the average small boy is when he reads the story, and further on learns that the genii brought a basket of diamonds or a great basket of beautiful fruit or whatever the small boy wanted.

But there is nothing more remarkable in that Arabian Nights story of Aladdin's lamp than there is in the fantastic story of our present-day mail subsidies and the looting of the Government Treasury by private corporations over a

long period of years. These subsidy and 90-percent-profit gentlemen did not have to rub a magic lamp. Apparently all they had to do was come down to Washington and gently rub Congress, just gently, not vigorously, and walk away with hundreds of millions of dollars of the taxpayers' money.

You will all recall what occurred during the war in the matter of war profits. I know it was not considered respectable to discuss them at that time, and certainly it was not a safe procedure. Men could make inordinate profits, thousands of percent, as I shall demonstrate from the records of the Government itself, and yet decent Americans dared not open their mouths to criticise or protest except on penalty of going to a Federal penitentiary.

Let us quote some figures that may be of interest in connection with the pending bill, showing profits to some of the shipbuilding companies of the country. In the Forum of November 1933, we find this assertion:

* * * Shareholders in Bethlehem Steel received in 1917, a dividend of 200 percent on class B common stock, while the total income of the corporation rose from $9,000,000 in 1914 to $57,000,000 4 years later. The Hercules Powder Co., of Delaware, increased its dividends from 8 percent in 1914 to 95 percent in 1916; in 1922, this company declared a stock dividend of 100. The Anaconda Copper Co., from a deficit in 1914, came out in 1916 with a surplus of $33,000,000. In the 3 years before the World War the United States Steel Corporation earned $180,000,000, but from 1916 through 1918 this organization made $633,000,000—a profit, as was disclosed by governmental investigation of alleged excess war-time gains, of more than 50 percent * * *.

The Foreign Policy Association has made some study of what has been happening to the profits made by these corporations, as follows:

BETHLEHEM STEEL CORPORATION

* * * For the single item of armor plate between 1887 and 1915 the Bethlehem companies secured contracts from the United States Government amounting to $42,000,000. The Bethlehem Shipbuilding Corporation, under the 1916 naval program, received $134,000,000 for construction of 85 destroyers. At the time that this company was building ships for the American Navy, it was also filling orders for foreign governments. In 1908 Bethlehem built 5 submarines for Japan, during the war it built 20 submarines for Great Britain, and in 1913 it constructed a battleship for Argentina * * *.

One of the oldest and largest subsidiaries of the Bethlehem Steel Corporation is the Bethlehem Shipbuilding Corporation, which specializes in the construction of naval vessels and large merchant ships. It was this company which, with two other shipbuilding firms, paid William B. Shearer $25,000 to attend the Geneva Naval Conference in 1927. After the failure of the Conference the Bethlehem Shipbuilding Corporation received contracts for three 10,000-ton cruisers for the Navy at a total cost to the Government of approximately $33,000,000. Since 1916 this company has built more than 100 vessels for the Government at a cost of more than $250,000,000. * * *

Profits of the parent company and its subsidiaries were enormous during the World War. In 1915 its net income was $24,821,000, in 1916 it jumped to $61,717,000, and in 1917 and 1918 was above $50,000,000. Gross earnings in 1918 reached the high mark of $488,000,000. In 1929 the net income of the Bethlehem Steel Corporation was $42,242,000, and it dropped to $23,843,000 in 1930.

I am not going to put more of these figures in the RECORD at this time. Those I have given are an indication of the type of profits being made by the companies which are very active in supplying materials of war to the United States Government.

It must not be assumed, Mr. President, that the mass of American people and many of the most active and wholesome agencies are not thoroughly committed to the principle of eliminating private profits from war and of preparation for war. I cherish the conviction that I am speaking what is in the hearts and minds of millions of American citizens in saying that private profits in the preparation for war must of necessity stand about on the same moral plane as profits in war themselves. If there is a distinction, it is one without a difference. I can see no fundamental moral distinction between private profits in preparation for war and private profits in war itself.

The American Federation of Labor in its 1933 convention, in its 1932 convention, and in its 1930 convention protested against private profit in war and war preparation. If my memory serves me right the senior Senator from North Dakota [Mr. FRAZIER] either read the resolutions into the RECORD or referred to them, but I am going to ask that these resolutions of the American Federation of Labor dealing with private profits in war and preparation for war be made a part of my remarks.

The PRESIDING OFFICER (Mr. RUSSELL in the chair). Without objection, it is so ordered.

The resolutions are as follows:

RESOLUTIONS OF AMERICAN FEDERATION OF LABOR CALLING FOR BUILDING OF SHIPS IN NAVY YARDS AND ELIMINATION OF PRIVATE PROFIT

1933 CONVENTION

Whereas the Boston convention of the American Federation of Labor and succeeding conventions resolved "that we favor the manufacture of war munitions in our arsenals and navy yards, so that the elimination of private profit will place this department of national defense beyond the baleful influence of those who seek to create sentiment for the production of war munitions so that they make greater profits"; and

Whereas during the political campaign of 1932 the Honorable Franklin D. Roosevelt, candidate for President, repeatedly asserted that "taking the profits out of war" should be made a national policy, and to that end the construction of naval vessels and the production of munitions of war should be confined to navy yards and arsenals; and

Whereas notwithstanding the assurances which the representatives of organized labor have received from the administration that 50 percent of the naval vessels constructed under the Public Works section of the National Industrial Recovery Act would be constructed at navy yards, the Navy Department has not only awarded the larger vessels to private shipyards and the smaller ones to navy yards but has awarded 17 of such vessels to private shipyards while only 15 were assigned to navy yards; and

Whereas the Navy Department is pursuing the policy of letting to private contractors the construction and manufacture of some of the main engines and auxiliary machinery for vessels to be built in navy yards where formerly this class of work was performed at the navy yards: Therefore be it

Resolved, That the officers of the American Federation of Labor are hereby directed to immediately urge upon the President of the United States the desirability of giving practical effect to the national policy of "taking the profits out of war" by having the construction of naval vessels, machinery, and other equipment for such vessels and the manufacturing of war munitions confined to navy yards and arsenals, and to correct existing deviations from this policy insofar as the law permits.

1932 CONVENTION

Whereas private shipbuilders and manufacturers of munitions have appeared before the Shannon committee (held hearings on Government in business) and demanded that the building of vessels for the United States Navy and the manufacture of munitions shall be taken out of the Nation's navy yards and arsenals and turned over to private industry; and

Whereas there can be no sane program for national defense until private profit has been eliminated from warfare and from the munitions and ships required for national defense: Therefore be it

Resolved, That this convention endorse the principle which holds that a sane, constructive policy of national defense is only possible when private profit for the construction and fabrication of necessary ships and munitions is eliminated; and further be it

Resolved, That the executive council of the American Federation of Labor be, and is hereby, requested to give its active support to prevent any action by Congress as the result of the submission of the Shannon committee's report, which would permit private industry to construct or fabricate vessels and materials for national defense which can be produced in the Nation's navy yards and arsenals; and be it further

Resolved, That this convention endorse the principle that private profit must be eliminated from the production of material for national defense before the sinister activities of the war mongers and patriots for profit can be abated and eliminated.

1930 CONVENTION

This Fiftieth Annual Convention of the American Federation of Labor places itself on record as favoring the development and upkeep of all navy yards and arsenals, and their use for the buildings of ships for any department of the Government, as well as for the Navy and Army, and, also the manufacture to whatever extent may be practicable, of material, equipment, and supplies for all departments of the Government, the adequate remuneration of all civilian employees, and the adequate remuneration of all enlisted men and officers in the Army and Navy. We also favor the manufacture of war munitions and naval vessels in our arsenals and navy yards, so that the elimination of private profit will place this department of national defense beyond the baleful influence of those who seek to create sentiment for the production of war munitions, so that they may make greater profits.

Mr. BONE. Mr. President, it is certainly a matter of vital concern to the taxpayers of the country to get rid of the additional expense incident to private preparations for war, which is and should be a Government function. It were the part of wisdom and the part of common decency

for us not to discuss thrift and economy any further on the floor of the Senate unless we recognize this fact. We must either bear allegiance to the proposition of practicing economy so we can meet the necessary expenditures of the Government, take care of the victims of war, meet those burdens which are not only incidental but absolutely necessary to the preservation of government, or else quit discussing economy.

Right at the very moment when we propose to spend the vast sum of money that will follow enactment of this bill, here is what is happening to the educational system of the country: Seven hundred and seventy schools are now closed, with no provision for 175,000 children; 1,540 schools will have terms of 3 months or less; 10,982 schools will have terms of 3 to 6 months. City schools are employing 18,000 fewer teachers now than in 1930; 200,000 certificated teachers are unemployed.

City school budgets average 20-percent reduction since 1930. Schools now operate on $368,000,000 less than in 1930. Expenditures for new buildings have dropped 79 percent since 1930. Forty-five thousand two hundred and twenty-eight teachers will receive less than $300 this school year; 210,120 teachers will receive from $300 to $750 this school year. One in four receives less than the minimum code wage.

Sixteen institutions of higher education have been discontinued since last year, mostly by merging with some other school. Colleges have reduced their teaching force by about 5,680 teachers in the last 2 years. In the past 2 years there has been a decrease of about $56,860,000 in college budgets for educational and general expenditures, and expenditures for capital outlays have practically ceased. It has been reported by 46 State superintendents that the figures which I have just given are accurate, these having been compiled by the United States Department of the Interior.

If we should not make adequate preparation for the Government to manufacture its own airplanes, its own ships, then it becomes manifest that if the Government goes into another war, as many assume we will, the Government is going to find itself in exactly the same position in which it found itself in 1917.

Let us see how patriotic a lot of these private outfits were that furnished munitions of war to the United States Government in the last war. They had an opportunity in 1917 to show how patriotic they were. They had an opportunity to show whether they were 100-percent Americans or just sordid money grabbers. Let us see what happened when these gentlemen had a chance to show their loyalty to the Government that protects them and their property.

If this Government should become embroiled in war, it is safe to assume that these fellows who are so vigorously fighting the establishment of Government yardsticks and who will put pressure on us not to permit Uncle Sam to build his own vessels and prepare his own munitions of war will do exactly what they did in 1917.

Now let us examine a small part of the record and see just what happened.

Today's difficulty in balancing our National Budget is due principally to what happened during the last war. I think that has been made plain on the floor of the Senate many times. Out of those World War profits, piled up by private concerns furnishing war munitions, we created 23,000 new millionaires. Of course, they were created unwillingly, by a system of outrageous looting of public funds by contractors for war material; but the physical fact remains that they were created. It is obvious that 23,000 millionaires must have grabbed at least $23,000,000,000. That is what this Nation handed to them in war profits.

During the war contractors made an agreement with the Government that required the Government to take all that was contracted for, regardless of the cessation of hostilities; also to ship the stuff to France and keep it there.

The same type of men would today oppose Uncle Sam protecting himself by setting up yardsticks in public plants and in expanded navy yards.

As a result of these contracts, made with alleged patriotic American business men, we were shipping goods to France for a year after the armistice. When the end came we had over $2,000,000,000 worth of materials in France, and the French Government took this stuff over at 20 cents on the dollar; but, unhappily, we never got even the 20 cents. The French repudiated that debt, and never paid it.

Right after the war we were paying 20 cents a pound for sugar, and it was being rationed to us in this country. While this was going on, the War Department, as I recall, sold 22,000,000 pounds of American sugar it had on hand in France for 2 cents a pound. It never would have done to ship that sugar back to this country and give it to Americans, who were patriotically paying high prices for it here.

During the war, and because Uncle Sam was not fortified and prepared to take care of his own needs in the matter of war materials, we let contracts for every conceivable sort of thing in that great splurge. We even shipped to France corn planters, cultivators, grain drills, drag harrows, disk harrows, thousands of manure spreaders. Possibly they were used to lick the Kaiser.

During the war the Government had 391,000 horses. Let us see what some of these patriotic business men did to us through their lobbyists. For these, the Government ordered 945,000 saddles, over a million sets of double harness, 1,637,197 horse brushes, 2,029,418 horse covers, 2,850,853 halters; and on top of these frightful expenditures it piled a cost of 195,000 branding irons. They made those out of copper, so that they would cost a little more.

The bright boy who had the branding-iron contract did not get these branding irons ready in time to ship before the show was over, and he made Uncle Sam give him $40,000 for the loss of profits that he would have made had he been able to ship these cute little ornaments over to France.

We were not satisfied with that sort of deal with this copper branding-iron boy. He had 20,000 pounds of copper left that he could not use, and the Government took it off his hands at 39½ cents a pound, and immediately sold it back to him for 11 cents a pound.

It is such things as that that reflect themselves in our present bonded debt. They are the result of this Government's being taken advantage of, being looted, in other words—let us use plain, unvarnished, "sawmill" English in discussing this matter—by private business concerns who enjoyed a special privilege. That privilege reflected itself in a contract which permitted unfair and extortionate profits.

A concern had a contract to build howitzer carriages. Uncle Sam ought to have had a factory to build that stuff. He ought to have been capable of building his own guns. None of these howitzer carriages were delivered when the armistice came. The Government had built the buildings where they were to be made. Now let us see what Uncle Sam did. He had built the buildings where these howitzer carriages were to be made, supplied the machinery, and supplied all the material.

The taxpayers paid for that, and the company was to have a commission on the delivery price. The buildings cost the Government $2,987,200. After the armistice, the Government sold these buildings to the company for $600,000. The materials on hand at that time were worth $5,558,000; and all this valuable war material was sold to this outfit under the classification of junk for $300,000, despite the fact that the arsenals around the country should have taken it over.

In spite of all that, we allowed these fellows to finish 200 of these carriages, although they were not needed—the war was over—for which the Government paid them $18,582,428. I have often wondered what emotions would move in the breast of a human being who had made 290,999 percent. I want to repeat that figure, Mr. President, 290,999 percent. "Impossible", you might say. Well, you do not know the possibilities of a good war, Mr. President.

There was one company handling contracts with this Government that made that incredible profit during the war. Imagine a farmer using his farm to raise food for the Government, and getting 2,900 farms just like his own, for his profit. I had believed it impossible that such a thing

could happen under the American flag. I did not think it possible that any outfit could make such war-time profits and get away with it; but if any Member of this body is at all curious he can examine Senate Document 259—prepared, I think, by the Senator from California [Mr. McADOO], who was then Secretary of the Treasury—and he will find a recitation of some of these profits. Just hastily, I am going to refer to a few of them. Incidentally, I may say that this volume is now out of print. I think I have one of the few copies in existence.

Coal operators reported profits as high as 7,856 percent. Nearly half the coal mines reported earnings equal to their entire capital stock that year.

Meat packers made as high as 4,244 percent.

Canners of food and vegetables made as high as 2,032 percent.

And so on down the line. Profits of eight and nine thousand percent were quite common; excessive and extortionate profits; frightful profits that simply transcend the bounds of reason, almost of imagination, were made by men in their dealings with their own Government.

The Senator from Louisiana [Mr. LONG] a moment ago referred to an incident in connection with our so-called "merchant marine" involving the *Leviathan*; but it might be interesting to the people of this country to know a little of what has happened in connection with our so-called "merchant marine", because all that goes back to the World War. It is a material part of this sordid story of preparedness. In a fair and decent consideration of this problem it all simmers right down to the question of whether the Government is going to do its own work and escape being the victim of extortion—of an extortion that almost amounts to legalized blackmail in some cases. Certainly a profit of 290,000 percent cannot be stamped as anything but legalized blackmail, no matter from whom taken. When we undertake to characterize a thing like that we discover the shameful paucity of the English language, its hopeless inadequacy as an intellectual exchange medium. One cannot find words, either singly or in combination, that by the grace of inflection or poetic license can be made to serve one's purpose in attempting to indict such social perversions.

We built a lot of ships during the war, and we would have had a real merchant marine, owned by the people, as it should have been, had we held on to those ships; but, instead of that, certain highly interested gentlemen, whose patriotism reflects itself in a desire to get something for nothing, or to make 1,000, 5,000, or 10,000 percent out of their Government, put over a legislative program under which the United States divested itself of ownership of these ships, for a song in most cases. Some very somber pictures are revealed by the investigations of the so-called "Black committee" in turning up the pages of this ghastly record.

During the period of the World War the United States Government expended approximately three and a half billion dollars in building ships and providing necessary terminals for the American merchant marine.

Since the war closed this Government has loaned for 20 years, at rates of interest ranging from one eighth of 1 percent to 3½ percent, the sum of $144,907,886 to shipping companies to build new ships and to reconstruct and remodel old ships; 80 percent of these loans have been used for the latter purpose.

Since 1928 the Government has paid, or contracted to pay, under 10-year contracts, through the Post Office Department, in subsidies under the guise of ocean-mail pay, the sum of $336,237,232, of which $140,086,201 has already been paid. These sums do not include any expenses of administration by Government or losses incurred through managing operators, operating for the Government. Neither does it include vast sums paid annually by the Government to steamship companies for transportation of mails upon a poundage basis.

Where have the vast sums totaling approximately $3,981,145,118 of public funds, appropriated for the building and maintenance of an American merchant marine, gone, and what has the Government today to exhibit to the taxpayers for this vast expenditure of public funds?

This is all part of a cold, ruthless program of private ownership of government. I do not mind private ownership of business, but here is a clear-cut example of private ownership of government itself. That is exactly what this sort of thing means.

Four hundred and thirty-eight ships, which cost the Government $559,287,426 to construct, have been sold to shipping companies for $40,106,614. Just what does that mean reduced to ordinary curbstone English? It means that these outfits bought these beautiful ships from the United States Government for approximately one fourteenth of their cost, or about 7 cents on the dollar. As a matter of fact, a lot of them were bought for much less than that, but that is the average. Some of them were bought for less than 2 cents on a dollar by outfits owned by some of the richest men in the world.

Through the Post Office Department, under the mail-pay plan of the Jones-White Act, the Government has already paid to steamship companies, since 1928, the sum of $140,086,201.

The manner in which part of this mail-pay subsidy has been used by steamship companies and their owners has been revealed by the special Senate committee headed by the Senator from Alabama [Mr. BLACK], now investigating air-mail and ocean-mail contracts.

The Export Steamship Co. purchased from the Government ships which cost $42,000,000 for $1,071,431 and secured a 10-year mail contract providing $18,566,431, on which it has received in 3 years the sum of $4,288,847. The president and sole owner of the company has drawn from the company and its subsidiaries in 3 years more than $1,000,000 in salaries and expense allowances; $375,000 was for his personal salary, and the remainder was spent by the president in making loans to the father-in-law of an official of the Government who supervised repairs to his ships, which loans have not and will not be repaid. Large sums were spent for so-called "travel and entertainment", which, the evidence tended to show, was used in efforts to corrupt public officials and to spread propaganda favorable to ship subsidies. The expenditures are listed as $75 per day for meals; $100 for waiters; $75 for taxicabs; $80 for telegrams, and so forth. Huge amounts were paid for attorneys' fees and commissions. The company is now in financial difficulties and cannot meet its obligations to the Government.

The Black Diamond Steamship Co. paid to one attorney a fee of $100,000 to aid it in securing favorable contracts with the Government. In his letter files was found a letter by the president of this company stating that in order to put over his deal he "was forced to play politics which took me as high as the President of the United States." He boasted of the fact that for $1,342,607 he had purchased ships which cost the Government $18,049,451.

Certainly! Could there be anything easier than this Government in deals of that kind. How generous we have been with the people's money. I sometime wonder if our Government is regarded by these subsidy gentlemen as their exclusive patrimony, as an agency that exists merely for the purpose of enriching them at public expense. They calmly assume that to be the fact, in any event. What a peculiar picture, that a subsidy grabber can boast of having grabbed your property, for a fraction of its cost, and apparently feel proud of his achievement. I wonder what the millions of unemployed think of that kind of patriotism.

The president of the Black Diamond Steamship Co., and sole owner of the company, drew annual salaries of from $27,000 to $50,000 and spent $30,000 to $50,000 per year in travel and entertainment. After securing highly remunerative contracts from the Government, this company employed as its vice president and Washington lobbyist, at a salary of $12,000 a year, one of the officials of the United States Shipping Board who while in office had aided in securing the contracts.

The American South African Line, owned principally by two brothers, has made huge fortunes in a few years as a result of Government bounties in the form of mail subsidies.

The president of this company has realized in salaries, dividends, and capital-stock gains the sum of $736,578.85 in 4 years, while his brother, the vice president, has profited to the extent of $1,827,212.40. These fortunes were made from an original investment of $75,000.

The chairman of the board of the Columbian Steamship Co. has realized in salaries, dividends, and capital-stock gains in 10 years the sum of $2,929,299.32. Other officers have profited in proportion to their stock ownership in this company.

The Dallas Steamship Lines paid its president and principal owner $635,493 in commissions for negotiating ship-sale contracts with the Government, although at the time he was receiving a large salary and expenses from his companies.

Through the purchase of ships at a fraction of their value and bounteous mail contracts, these companies made enormous profits, of course, out of the United States Government. One of the companies, with a capital investment of only $500, paid cash dividends of $999,500 in a few years.

Mr. President, if there is anyone who can find anything in the pages of mythology, Alice in Wonderland, or in any other book of phantasy ever published that is any more fantastic than this kind of funny business, I am not aware of it. I do not think there is an institution on earth that is as easy and generous as the United States Government. It is the most astounding spectacle ever presented to the people of this country.

The Dollar companies, which operate on the Pacific coast, received in mail subsidies in the past 4 years $14,300,000; and if the contract continues for the remaining 6 years, will draw $17,000,000 additional. The net profits of these companies for the past 10 years aggregate $13,365,507.39 and have accrued to four men and their families, who own practically all the stock.

I do not know why we should lift our eyebrows and hold up our hands in pious horror when reading of the abuses of the aristocracy under the old regime in France. We are developing a pretty good plutocracy in this country, when men can get away with that sort of business.

The facts I have stated constitute only a few of the matters which have been revealed by the Senate special committee.

In this connection it is interesting to note that, with all the expenditure of public funds to build an American merchant marine, only 57 new ships have been constructed, and, as will be observed from the following statistics, the United States is now at the foot of the list in ship construction and a poor second in tonnage of ocean-going ships.

The standing in goss tons in merchant ships, of the six principal maritime countries in ships of sea-going class 100 tons and over as of June 1933, was:

	Tons
British	21,036,000
United States	9,900,000
Japanese	4,172,000
German	3,883,000
French	3,460,000
Italian	3,080,000

A recent report of Lloyds Register of Shipping contains startling data showing the relative position of the United States in ships now under construction, as summarized in the following table:

Country	Gross tonnage	Percent of total
Great Britain and Ireland	303,762	40.2
France	95,838	12.7
Japan	85,570	11.3
Sweden	71,440	9.4
Holland	40,862	5.4
Denmark	31,970	4.2
Spain	31,924	4.2
Germany	30,300	4.0
Italy	27,076	3.6
United States	14,654	1.9
Other countries	23,356	3.1
Total	756,752	100.0

One would think that the so-called "leading business men", who were able to induce Congress to pass the Jones-White Act, under which $3,000,000,000 worth of valuable property has virtually been given to them for a song, would possess a high degree of sportsmanship. But sportsmanship is subordinated to greed. They want the dollars. One outfit over in Baltimore, called the "Baltimore Steamship Co.", bought beautiful steamers, costing this Government two and a quarter million dollars, for $30,000 apiece, and for hauling even one letter across the ocean that company will get a mail subsidy of approximately $24,000 for one trip. In other words, for hauling even one letter across the ocean they will get nearly as much as it cost them to buy a beautiful steamer from your Government.

One would think that gentlemen who were able to come here and put across such legislation would have enough sportsmanship to suggest at least that the law should provide that in the event our Government ever gets into war they would come to the rescue of the Government by furnishing the boats for a small sum. Not these men. Examine the Jones-White Act; what do you find written in that law? I confess I was dumfounded when I read the act and found what a queer recapture provision these pluperfect, superheterodyne profiteers had managed to slip into that law.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Washington yield to the Senator from Louisiana?

Mr. BONE. I yield.

Mr. LONG. I hope the Senator means to exclude the Democrats. That was suggested a moment ago.

Mr. BONE. Let us see what the United States Government can do with these beautiful vessels it sold to the Morgan steamship interests, the Baltimore Steamship Co., for one seventh of their cost, in the event we must have them for war use. Bear in mind these are the same vessels we sold at such low prices as to be an outrage on the taxpayers who are sweating under the bonded debt which represents their cost to this Government.

I want you to appreciate fully the brazen gall involved in this program of grabbing ships for one seventh of their cost and then demanding their fair actual value from the poor, old Government if it needs them back for war purposes.

The following vessels—

That is, these vessels which we sold to the bright subsidy grabbers for a song—

may be taken and purchased or used by the United States Government for national defense or during any national emergency declared by proclamation of the President.

Let us see under what condition we can take the vessels that the United States Government has virtually given to these people.

In such event the owner—

That is the fellow we sold it to—

shall be paid the fair actual value of the vessel at the time of the taking, or paid the fair compensation for her use based upon such fair actual value.

There you have it. Patriotism, naked and unadorned.

They get the vessels from the Government for 1½ or 2 cents on the dollar, but the Government, when it gets into trouble, and after having given these people the enormous subsidies they are now enjoying, and which has made huge private fortunes spring up like mushrooms overnight, must pay them the fair actual value of the vessels. And that is the sort of lop-sided, grossly unfair contract we made with the subsidy grabbers—all in the sacred name of patriotism and preparedness.

Mr. President, if there is a Member of the Senate who can justify such an outrage on the American people, who can find a parallel for such practice in private standards of business; if anyone can point out where any greater advantage has been sought and obtained over anyone, except morons, I wish he would point it out to me now. We have courts to protect mental incompetents—the poor old Government can shift for itself.

I have adverted to the matter of ship subsidies, Mr. President, because it is all tied in with the question of war preparedness. We were solemnly assured that creating an American merchant marine was part of the theory of national defense, and pursuing that policy and that theory and for a tiny fraction of their cost, we gave $3,000,000,000 worth of property that belonged to the American taxpayers to private shipping concerns owned by some of the wealthiest men in this world. We gave it to them for 2 or 3 cents on the dollar, on the theory that we were promoting national defense. Not satisfied with virtually getting the capital of their companies for nothing, these same interests came trooping down to Washington or sent high-priced lobbyists, as indicated in the record of subsidies now being written, and walked away with other millions for hauling a small amount of mail. They were not satisfied with having almost the entire capital of their companies supplied by the taxpayers; they had Congress arrange the matter so that the operating costs and nice fat dividends would be provided at public expense. Truly, it is a great arrangement.

On top of that, and as a sort of legislative capsheaf, our own law tells us that if we have the nerve to ask for the use of one of these Santa Claus boats in case the Government is attacked by a foreign power, we will have to give the company 100 cents on the dollar of what that boat is worth at the time we take it over.

Mr. President, I do not think that greed could go further. Greater gall was never exhibited by men under the blue canopy of heaven than is exhibited by the beneficiaries of this law. Poor old Al Capone! Imagine his mortification as he ponders over the fool impulse that drove him into liquor instead of subsidies. He could just as well have been rich and respectable—if he had trotted with the right crowd.

Mr. President, if this Government of ours does not fortify itself against this sort of patriotism, this 290,000-percent Americanism, then God help this Government when another war comes along. When this crowd of patrioteers get through, there will be nothing left.

We have no right to assume that the debaucheries, the saturnalian financial revelries of the last war, are not going to be repeated if we have another one. A $1,600,000 bonus was paid to the head of the Bethlehem Steel Co. at a time when the stockholders had not been getting dividends. Where did that come from? Partly out of Government contracts.

I have a quaint, old-fashioned idea that this Government should not be maintained to enrich a few men, but rather to promote the welfare of all the people, and when I realize that the sort of thing I have been discussing is reflected in outstanding bond issues and in the dreadful burden of taxation we now carry, it becomes vitally important to know whether we are to continue the program as in the past.

The Senator from Maryland [Mr. TYDINGS] said the other day that our Government would soon have to raise $1,600,000,000 a year to pay the interest on the national debt and provide a sinking fund. That is nearly $13 per capita burden on the people of this country. It is due in no small part to this orgy of greed and grab I have referred to.

Mr. President, I very fully share the views of the Senator from North Dakota [Mr. NYE] that the business of private ownership of munition factories presents a serious problem. The Senator from Idaho [Mr. BORAH] was absolutely right about the huge munition rings. As a matter of fact, a French deputy rose in the French Chamber of Deputies and denounced a concern by name over there which had shipped nickel into Germany during the war; shipped it through Sweden, in a circuitous round-about way, and that same nickel was used in making bullets which were shot into the bodies of French soldiers. That is how much patriotism those fellows have. Their patriotism is wholly conspicuous by its absence. It is plastered all over with dollar signs.

I have suggested the necessity for the Government's protecting itself in the building of its own airplanes. That is just merely a part and parcel of what I believe to be a proper and legitimate function of preparedness.

I doubt if anyone can find any legitimate argument against the theory that defense is a national or governmental function. Can there be a twilight zone? Who in this body can say that defense is a private function? If the preservation of the Government by its military and naval arms in time of trouble is a national function, then certainly the major portion of the work of war preparation should be done by the Government. The major phases of preparation for defense should be exclusively a Government function. That theory does not do violence to any reasonable American doctrine. This theory is something that any patriotic American can accept as a decent standard by which patriotism itself may be gaged. For that reason I have suggested not only the amendment with respect to the building of airplanes, but I have one more that I desire to read, and then I am through.

In this connection, Mr. President, I want to say that I hope that the amendment of the Senator from Washington [Mr. DILL], which is as follows—

Provided further, That in making awards under contracts for the construction of vessels in private shipyards, bids may be accepted from shipyards located on the Pacific coast: *And provided further*, That the cost of construction on the Pacific coast does not exceed the cost of construction on the Atlantic coast plus the cost of transportation of necessary materials from the Atlantic to the Pacific—

Will be agreed to.

That simply provides for putting the Pacific coast on a parity with eastern yards in bids on ships, and is in my judgment a very proper amendment, and was in the law, as I recall, in 1916, in somewhat the same form.

I have one other amendment which is, as I indicated in the beginning, not legislation but a mere declaration of public policy. I am well aware that many will not agree with my views about this thing. I am willing to concede that such gentlemen are perfectly honest in their viewpoint. I never challenge any other man's intelligence or honesty in differing with my viewpoint about these things. While so conceding, I think that the experience of this country in time past fully demonstrates the legitimacy of my attack on private profits in war preparations.

The only way that we can put an end to them is to provide yardsticks which make it impossible for greedy men to take advantage of the Government. They will take advantage of the Government if we allow them to do so. If they were satisfied with a legitimate profit, no one would quarrel with them. The trouble is that they are not satisfied with a legitimate profit. They have proven a thousand times that they want the earth.

The amendment I refer to is a declaration of policy. After the provision that at least 50 percent of the ships shall be built in Government yards it is provided—

That the Government shall, insofar as practicable, develop its navy yards, arsenals, and other plants and facilities to the end that it may—

(a) at all times hereafter be able to construct, maintain, and repair its authorized vessels and naval equipment;

(b) as speedily as possible become self-sufficient in time of war; and

(c) insofar as may be possible, eliminate private profit in war and in the preparation therefor.

I submit that this is good, wholesome American doctrine, and it would take from this bill much of the odium that attaches to it in the eyes of a lot of mighty clean, fine people in this country if we adopt this declaration of our intentions.

There is a great deal of opposition to the bill. I sincerely believe, Mr. President, that much of the opposition that rises in the hearts of the people to this sort of thing could and would be eliminated if the element of private profit were taken out of war and preparation for war, so far as we can do it. To that end, when the time comes for a vote on my amendments, I am going to ask for a favorable vote on the amendment which I have just read.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Washington [Mr. BONE].

Mr. TRAMMELL. Mr. President, in regard to that amendment, I suggested to the Senator from Washington

that I should be glad to accept it if he would change the word "all" in line 21, page 2, to the words "not less than 25 percent." That is the feature that deals with the building up of our present inadequate facilities for aircraft construction to a point where we may utilize those facilities. It occurred to me that we should have, at least, that much latitude by not requiring at the present time an excess of over 25 percent of the aircraft to be built by the Government. You see, at present the Navy has practically no facilities with which to build airplanes. It will probably take the Navy Department, under the orders of the President, 2 or 3 years even to reach 25 percent unless there are many millions expended within the next few moments for aircraft plants. I am in sympathy with the policy of the amendment.

The PRESIDING OFFICER. Does the Senator from Washington accept the amendment to his amendment?

Mr. NORRIS. Mr. President, I should like to ask a question so as to understand the proper parliamentary situation. I listened to the reading of the amendment of the Senator from Washington. I was struck with the idea that it was the same amendment as that offered by the committee. Is there a difference between the two amendments?

Mr. TRAMMELL. The committee proposed an amendment requiring the construction of as much as 50 percent of the vessels authorized by the pending bill in navy yards and plants which the Government now owns. The amendment of the Senator from Washington deals more particularly with aircraft construction.

Mr. NORRIS. I understand the difference.

Mr. TRAMMELL. The amendment of the Senator from Washington has to do with aircraft construction; and the idea is to have the Government enter into competition in the building of its own aircraft, which I think is a very commendable purpose.

Mr. BONE. Mr. President, may I intrude at this moment to say that, as I understand, the amendment suggested by the Senator from Florida [Mr. TRAMMELL] limiting profits on construction of vessels authorized under this bill to 10 percent, has been adopted?

Mr. TRAMMELL. That amendment has been adopted.

Mr. BONE. So there remains only the amendment I am suggesting in regard to the building of naval aircraft and providing a declaration of public policy?

Mr. TRAMMELL. They are two separate amendments.

Mr. BONE. Yes; they are two separate amendments.

Mr. TRAMMELL. We have before us now, as I understand, the amendment in regard to the building of aircraft in Government plants.

Mr. BONE. That is correct.

Mr. TRAMMELL. Mr. President, as chairman of the committee I feel authorized to accept the amendment of the Senator from Washington with the change I have suggested, so that the amendment will provide that not less than 25 percent of the aircraft shall be constructed in Government factories. The reason for that suggested change is that we have now no facilities, and that the President, under the provisions of the proposed act, will have to acquire and build up the facilities for the construction of aircraft. The administration thinks they will have to have a little time in order to do that, and, of course, that is true. This amendment contemplates that ultimately all aircraft shall be constructed in such Government plants, but we have not now the facilities, and it is impracticable to do that at this time.

Mr. BONE. Mr. President, will the Senator yield?

Mr. TRAMMELL. I yield.

Mr. BONE. May I call attention to the amendment itself?

The PRESIDING OFFICER. Does the Senator from Washington accept the amendment to his amendment proposed by the Senator from Florida?

Mr. BONE. Mr. President, the amendment is in line 21, on page 2, where it is suggested that the word "all", the last word in the line, shall be stricken out and there shall be substituted the words "not less than 25 percent."

The PRESIDING OFFICER. Does the Senator from Washington accept that amendment?

Mr. BONE. I will accept it.

The PRESIDING OFFICER. The Senator from Washington modifies his amendment. The question now is on the amendment of the Senator from Washington, as modified.

Mr. KING. Mr. President, I inquire of the Senator from Florida whether the amendment is compulsory, or does it merely give discretion to the President?

Mr. TRAMMELL. The amendment begins by providing that not less than 50 percent of each succeeding lot of aircraft, and so forth, shall be constructed in Government plants.

Mr. KING. That would be compulsory.

Mr. TRAMMELL. And the question having been raised that that is impossible and impracticable, because the Government does not have facilities, and on account of the enormous cost of providing factories, and so on, the requirement has been changed so that, if the President shall find that he cannot comply with the 50 percent requirement, he then has the discretion to so state, but then he shall proceed immediately and expeditiously to build up our present plants—we now have only one and it is rather antiquated—and to acquire other plants and facilities for constructing at least 25 percent of the necessary aircraft. That provision is really mandatory. The original provision, however, for 50 percent Government construction, which was also mandatory, is transformed into a discretionary provision to provide for acquiring facilities for at least 25 percent of the construction. That is the way I understand it.

Mr. BONE. Mr. President, will the Senator yield?

Mr. TRAMMELL. I yield.

Mr. BONE. In the interest, perhaps, of better grammar in the amendment, and also because it might look a great deal better, I suggest, on page 1, line 4, that the provision should read:

That not less than one quarter or one fourth of each succeeding lot—

And so forth.

In other words, if we are going to confine it to 25 percent in the end—if that is all we are going to have—there is no use in insisting on more in the beginning. Of course, personally I should like to see all aircraft for the Navy built in Government plants, but if we are going to provide in the end that not less than 25 percent shall be so constructed, we might as well start out with the provision of not less than 25 percent.

Mr. FRAZIER. Why not strike them all out?

Mr. KING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Utah?

Mr. KING. I will not interrupt the Senator, if he desires the floor.

Mr. TRAMMELL. Mr. President, I suggest further that, in order to conform to the amendment which we have already agreed to in line 4, page 1, the words "one half" should be stricken out and the words "25 percent" inserted in place thereof.

The PRESIDING OFFICER. As the Chair understands, the Senator from Washington agreed to the Senator's amendment striking out, in line 4, the words "one half" and inserting "25 percent."

Mr. TRAMMELL. As I understand, the Senator from Washington agreed, with the understanding, of course, that I, representing the committee, am free to accept it, because I am certainly in favor of the policy of the amendment. I merely made those suggestions to try to make the amendment workable.

The PRESIDING OFFICER. Does the Senator from Washington accept the last amendment suggested by the Senator from Florida?

Mr. BONE. I accept the modification, Mr. President.

Mr. KING. Mr. President——

Mr. TRAMMELL. Mr. President, if the question is not going to be put now, I desire to say a few more words. I thought we were about to vote on the amendment.

Mr. KING. Then, I shall not seek the floor at this time.

Mr. TRAMMELL. Mr. President, I have had very little to say during the discussion since the bill has been pending and I may also add that others have had very little to say in regard to the bill or its real merits. The discussion has gone afield on practically every subject known under the canopy of the sky and the bill itself has not been very much discussed. Of course, I mean that as no reflection upon the Senators because, under our rules, they have a right, under the provision for unlimited debate, to talk about anything they wish.

Much has been said in regard to corrupt practices and excessive profits which have prevailed in connection with purchases by practically every governmental activity, and that situation has been used as a reflection upon the question of—what? The question of building up the Navy to treaty strength. It is no more reprehensible to anyone in the Senate than it is to myself that there have been those who have filched from the Government, who have preyed upon it in time of war and in time of peace.

Feeling that way, I was ready to join with other members of the Senate committee in the preparation and presentation of the amendment which has been sent to the desk, and which has already been adopted, seeking to limit the profits on the construction authorized under this bill. That has been the very object and purpose of the principal amendment which the Senate committee has proposed. We worked it out as best we could, and no Senator has suggested any change in the amendment which seeks to limit profits to not exceeding 10 percent. From the figures and the statistics which have been given, that seems to be quite a reduction over the profit which heretofore may have been derived in certain instances at least. We have offered that amendment, which has been adopted, as an earnest effort to try to get rid of corrupt practices and excess profits about which a number of speakers have complained. To that extent we have remedied, as far as we can through legislation, the matter of excess profits, the matter of excessive returns which have been made by shipbuilding plants in the past.

Personally I do not have to come down to quite as recent time as the present to define my position on the question of excess profits, and my opposition to and condemnation of those who would prey upon the Government in time of peace or in time of war. It so happens that during the period of the war I submitted an amendment to curtail profits, to drive from membership upon the Council of National Defense and other governmental agencies those who had interests which they might have sought to promote by virtue of their quasi-official positions.

I am heartily in sympathy with the idea of the Senator from Washington [Mr. BONE]. I am in sympathy with the condemnation which has been heaped upon those engaged in the aircraft industry and every other line of industry where they have taken advantage of the Government.

Mr. LONG. Mr. President——

Mr. TRAMMELL. We have sought in this particular bill to try to correct that condition so far as the Navy is concerned in relation to the work to be undertaken under the provisions of the pending bill.

The PRESIDING OFFICER. Does the Senator from Florida yield to the Senator from Louisiana?

Mr. TRAMMELL. I do not know what the Senator is going to say, but I have only 10 minutes, and the Senator has already made several speeches on subjects foreign to the pending bill.

Mr. LONG. I want to ask one question on this subject. Will the Senator allow me to ask him a question?

Mr. TRAMMELL. I yield for a question only, but not for a speech.

Mr. LONG. When the Senator was speaking about aircraft fraud I was wondering if the Senator had secured any information on just how the loss involved in the fraudulent contracts that were canceled is to be or has been saddled on the backs of the innocent public by secret knowledge or convenient information being given to fraudulent operators in advance, as was done the other day? I thought we were taking money from people who were manipulating the fraud, but it seems they received the information in time to save themselves from losses——

Mr. TRAMMELL. Mr. President, I decline to yield further. I am not familiar with the details of the matter to which the Senator is referring. The Senator has probably made the discovery himself, with all his alertness in keeping up with matters of that kind. I cannot be expected to be as well informed as he is on that subject.

I revert to the fact that the situation in regard to unreasonable profits and fraud in connection with aircraft, ship subsidies, and other Government affairs, is scarcely a matter to be submitted as a legitimate argument against the bill now before us in its present form. The committee is doing and has done the best it could to try to prevent such practices in the future in connection with the contracts that are to be made for naval construction. The bill provides for building the Navy up to treaty strength only.

When we met in conference and our representatives and the representatives of other nations agreed upon what should be the strength of the navy of each nation, respectively, I take it that they thought at that time, and the nations afterward indicated that they thought so when they approved the treaty through their proper legislative tribunals, that that limitation was the strength to which they should be allowed to build. In this country we intended to build up to treaty strength. It is useless to discuss the question of how we were outwitted, as I believe, in the Washington Conference when we destroyed so many of our splendid vessels and the other nations did not make anything like the sacrifice that was made on the part of the United States.

It is thought by some that preparation is almost a declaration of war. I do not so construe it. It has been said that the people in their aggregate as nations represent only the sentiments and the views of the individuals. I have never been favorable to the idea of arming one's self personally, yet there are times when that would seem rather essential. My belief is that while this country wants to maintain peace, our purpose and our idea to maintain peace should not involve laying down helplessly, should not involve going without some provision for taking care of ourselves if it should become necessary as a matter of defense. Some may believe to the contrary. In communities where there are disturbing elements, as a rule, I have never seen a person so peaceful that he protected himself by that very attitude of peace on his part. In rough communities, communities of outlaws, those who seem to be of the aggressive fighting type, the peaceful man of lamblike tendencies usually before very long is run over roughshod.

I would not say that would be true if our Nation were not equipped at all for war-defense purposes, but it does occur to me that the sensible logical thing for the American Nation to do is to equip and maintain a reasonably efficient and capable navy instead of saying that we will fold our hands and do nothing and let all the other nations build all the ships they wish and make all the preparations they wish for war, but that we feel confident, because of our peaceful policy, that everything will be lovely and go well with us. That is what will result if we keep on letting the Navy deteriorate instead of building it up to treaty strength.

The PRESIDING OFFICER. The time of the Senator from Florida on the bill has expired.

Mr. TRAMMELL. Then I will continue for 10 minutes on the amendment.

Mr. President, we have under construction at the present time 32 of the ships already authorized, and the pending bill authorizes about 20 more.

Mr. FRAZIER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. FRAZIER. Has not the Senator from Florida spoken for 20 minutes?

The PRESIDING OFFICER. The Senator from Florida spoke 10 minutes on the bill and has 10 minutes additional on the amendment.

Mr. TRAMMELL. I have 10 minutes more on the bill?

The PRESIDING OFFICER. Ten minutes more on the amendment. The Senator from Florida has utilized all of his time on the bill.

Mr. TRAMMELL. Very well. It has been advocated by the Navy Department and by the administration that we should have a regular systematic program of building up to treaty strength instead of a spasmodic building. That has been the case heretofore. Sometimes we would build no vessels for 2 or 3 years, and then we would have a spurt of building and a very large sum of money would be expended within probably 2 years for naval construction. For a 10-year period the expenditures have averaged about $38,000,000 annually. Under the provisions of the bill now before us we would go along systematically over a period of about 7 years. The cost has been variously estimated to cover a period of 7 years, and not merely a period of 1 year. It is estimated that from $590,000,000 up to something less than $1,000,000,000 is involved which is thought excessive. Of course, the latter estimate has been placed upon it by some of those who are opposing the measure.

The best information that has been obtainable, however, is that the construction will cover a period of about 7 years, and that the cost probably will run something like $750,000,000, at the rate of ninety-odd million dollars a year. That is including the aircraft program, the ships, and all the other elements involved in the plan of construction.

I look upon this as a measure of peace, not one to encourage war. The foreign nations that were in the conference with America recognize the fact that we have a right to have this number of vessels; that it is only proper that America should have this strength in its Navy; and yet a few Americans think that we should have an inferior strength, inferiority to the nations who made these agreements with us.

On the question of peace or this being a step looking toward war, did not America show its disposition to bring about peace when we went before the conference and made the sacrifices that we did at that time in scrapping modern, first-class American ships? Has not this Nation all along, and especially at the present time, under our very capable and peace-loving President, shown that it is the desire of America to do all possible to reduce armaments, and to take every possible step to maintain peace in our country and among the nations of the world?

We are not responsible for the warlike spirit that animates other nations; but, as a great world power, we have to consider it in formulating our American policies. I think, and the administration thinks, as I understand, that building up to treaty strength will help in the future to bring about a greater reduction of armaments, to bring about measures that will be more conducive to peace and to the discontinuance of war in the future.

It is upon that basis and that belief that this bill is before the Senate, and not with any idea of doing anything that will disturb the peace of the world, or bring about any enmities on the part of other nations. I am sure America is friendly, and wants to be friendly, with all other nations. The pending measure indicates no other sentiment. Nor is it contrary to a policy of peace, but to the contrary I believe its influence will make for peace.

Other than the desirable policy embraced in the bill, it may well be remembered that it is a measure that helps to take care of the unemployed. Figures show that about 85 percent of all of the money expended through the Navy Department for construction purposes goes for the pay of labor, directly and indirectly. Probably 50 percent of the funds required under the pending bill would have to go to take care of the unemployed in other directions if not used in this way. Thus it may be reasonably said not more than $400,000,000 additional funds spread out over 7 years is required on account of this Navy construction program.

Mr. LEWIS. Mr. President, I desire at this moment to enter some observations touching the pending Navy bill. I dare say that I am quite at variance with Senators on both sides of this Chamber, and possibly I shall find myself at variance with those in authority within what might be called my own administration.

I am not without some small experience touching the status of the Navy in its relation to this, our America. I served on the Naval Committee as a Member of the House of Representatives. I served on the Senate Naval Committee as a Member of the Senate in the Wilson administration prior to our entering the World War. I have had occasion to discuss the Navy, and to observe the Navy from the point of view of one interested in it as a matter of national proceedure and international relations.

I have observed these Senate bills coming forward each year for passage, meeting with similar opposition as we have today on the part of well-meaning, beloved citizenship who have felt that by reducing the Navy we should reduce the prospects of conflict with nations and avoid war. I wish such were true; but history records that in each instance where the necessary strength of defense has been reduced, assaults from opponents have consistently followed.

Mr. President, I wish to have it understood that I am at variance with others in that I am opposed to any kind of an arrangement on the part of this country that brings America into an alliance by which other nations shall have a right to dictate to this, my country, what form and manner of defense she shall have against the assaults of her foes. I cannot accept as a principle the idea that we shall assemble with other nations who, in the very nature of things, at any time may be called on to be our antagonists, and perchance our enemies, and that they shall have the privilege of writing us down as to the limitations, as to the number of ships, the quality of ships, the quantity of defense, and the method and manner in which the United States of America shall defend herself in the event of a conflict calling for that necessity.

We never have entered into one of these arrangements that has been kept in entire good faith. There is not now one existing that is being complied with or lived up to by any of the nations involved. I regret to say I must include my own Nation in this impeachment. The nations may not intend, sir, to violate the treaties, and it may be that they have good faith in entering into them; but it is the subsequent events which intrude themselves in the affairs of the world that compel the changes. Since these events will transpire, we are compelled to adopt the philosophy that Shakespeare puts into the mouth of Cassius in Julius Caesar:

> But since the affairs of men rest still incertain,
> Let's reason with the worst that may befall.

We trust there will be no war, Mr. President, but every conflict that has ever existed while I have lived has always followed the assurance to the public that there never would be another war, and ever followed with a dire conflict.

The world at present, sir, is in great turmoil, not one nation trusting another; and this, my country, truth must compel me to say, has not one real friend among all the nations of the world. We need not pause to consider whether that is born of the international debts or of the rivalry in commerce. It is sufficient for us to recognize the plain truth.

I take it, sir, and I urge upon my brethren in the Senate to contemplate this view, that we seek economy in the defense of our country. We wish to reduce the Army to the very lowest grade that the necessary defense of our country will justify. Sir, the manner in which to reduce an army in a country such as is ours is to prepare an efficient navy. Any assault that may come upon America as to which we need have fear or deep concern as to its result will be that which will come upon the coasts, for there only can these countries of Europe or Asia assail us. If there shall arise within our land some conflict among our own people, we have a way of meeting that. It does not terrorize us, and we do not fear the results to be disastrous to the Nation; but if we are able to meet attack upon the coasts, and if our Navy be sufficient to prevent any nation from assailing us, we thus protect ourselves from war, and we make un-

necessary a very large standing army; for they that would assail us, where a standing army might be required in very large numbers to oppose them, never can land. The Navy protects us against the invasion, and guards us against the assault.

Therefore, as a measure of peace, but more important, sir, as a measure of economy, for the reduction of the Army, an efficient Navy is essentially the agent.

Mr. President, we speak of peace. I behold around me my brethren Virginians who recall the line of Patrick Henry, when, quoting the source, he used the famous expression:

Gentlemen may cry peace, peace, but there is no peace.

Shall America close her eyes to the fact that all around her is conflict? That in truth here and there there is a little less open antagonism and explosions of assault. Do we not see that in no country of the world is there complete peace in the hour wherein we are speaking?

What assurance has America from any source of power that she is to be exempted from that which has befallen every other nation, particularly as she rises to power in finance and commerce as this, our land, has done? When has a conflict between nations not arisen as the result of the power of finance, trade, and commerce?

I regret to confess to this honorable body that it is my knowledge and my belief, of course, sustained by that knowledge, that the last Great War was a war of commercial rivalries. It was a war from trade jealousy. With whatever beliefs the propaganda succeeded in investing the public mind about a war for democracy, or a war for justice, or a war for liberty, truth eventually, sirs, must record that the war was brought on by the rivalry of nations for the maintenance of supremacy in trade and in the dominance of commercial wealth.

Do you fancy that the spirit of that nature has come suddenly to termination? Has there been any religious revival anywhere in the world that has converted our fellow mankind by which we can feel that we are to be an exception in the future from that which we have endured in the past? Shall we behold the Orient in its situation threatening conflict with the world at any hour, or assuming to have to oppose it? Shall we behold this and not realize that the very first land that will be the victim of these conflicts, if they cannot be warded off, will be this, our America?

The PRESIDING OFFICER (Mr. BACHMAN in the chair). The Senator's time on the amendment has expired.

Mr. LEWIS. Mr. President, I was out of the Chamber and did not know that a limitation had been fixed.

The PRESIDING OFFICER. The Senator still has 10 minutes on the bill.

Mr. LEWIS. I will not desire that much time. I then hasten to conclude. Here I assert that I cannot for myself concur in the thought that this Government shall ever again assemble with any people, any nation, anywhere, vesting the privilege on the part of other nations to write down the limitations of the defense of this country of itself as against a foe or assault.

As we do not seek war against any country, and as our object is only to defend ourselves against any country, to America alone must be left the sense as to what measures and methods should be just to herself and of protection to her people.

Mr. President, I have occupied this floor from time to time in calling attention to how this country has been mulcted, literally trapped and tricked in the different international negotiations between ourselves and the other nations of the world, sometimes in these events, called commercial alliances, economic conferences, disarmament meetings, financial interventions. What has been the result? There has not been one out of which America has come forth where she can claim victory, or even equality of result, or even-handed judgment.

Do we learn nothing? Are we going to continue the course by ourselves which defeats ourselves? Are we not conscious that other countries are not in duty bound to us to preserve us? They owe us no obligation to watch our welfare. Their lights are not burning to guide along the thoroughfares of civilization this, our Nation, in peace or prosperity.

Shall we not, then, pause at a time like this, surrounding the world, to realize that the hour has come upon America when she must be wholly American, and if a Navy such as is presented here by the bill is one regarded by those in authority, after investigation, as essential to the defense of America, there ends the inquiry. We may proceed to supervise the investigation, but here we point and here we state that the hour has come when, in the language of Mr. Webster, our people should be "for our country, for our whole country, and, first and last, for this, our country, our America." I support the bill for a navy for adequate defense and complete security.

Mr. LOGAN. Mr. President, if by my vote I could bring the nations of the world even 1 inch toward universal peace, then I would cast my vote so as to bring about that result. It seems to me that the course we have pursued during the last few years has brought us into a position among the nations of the earth which requires us to take careful note of our national defense.

If we have decided—and it seems to me we have—that America must be self-contained, that she must be self-sufficient, that she will depend upon economic self-sufficiency, then it follows, as a matter of course, it seems to me, that we must be prepared to protect America to the fullest extent against the other nations of the world.

This is not something that has come upon us all of a sudden. It is a course that has been followed for many years. I undertake to say, if I correctly read history—and I believe I am familiar with history—all through the ages it has been true that a nation for its protection must depend upon armament or allies. Armament, perhaps, is not so good protection as allies, but we have no allies. We have determined that we will have none, and if we will have no allies, I think we necessarily must have armaments.

It is true as an historical fact, I believe, that the nation with allies, when in combat with a nation having only armament, wins finally over the nation depending solely on armament. But, as I have said, we have determined that we will have no allies, and if we have no allies, there is nothing else for us to have save armament.

It further seems to me that we as a nation must either build a wall or else we must build bridges. We have decided that we will not build bridges. We had presented to us the question of the League of Nations, and we decided that we would build no bridge in that direction. Then the question of our entrance into the World Court has been pending a long time, and apparently we have decided we will not build a bridge in that direction. A nation, as I have said, must build bridges for friendly intercourse with other nations, or, if it does not do that, it must build a wall. We have decided that we will build no bridges. Then it follows that we must build a wall, and if we must build a wall, that means that we must have a navy that can protect our shores.

Mr. President, I am against war. If I could do anything to silence every gun on every battlefront throughout all the future ages, if I had the power to do it, it would be a proud moment when I could take the step that would bring about such a condition. If I could make it possible that battleships should never be called into use, that no nation should ever resort to them, if I could destroy every battleship in the world today, I would gladly do so, and I would prevent the building of another at any time if I had the power. But I do not have the power, and this Nation does not have the power, and we cannot disarm in the face of a hostile world. While the world goes on preparing for war, which we hope will never come, when it is at least ready for war, we cannot sit idly by and change the future. We must be prepared, and that necessity grows out of the road we have traveled. We have pursued a course which makes it necessary for us to be able to protect our rights in every eventuality.

It has been suggested by an able Senator today that munition manufacturers would richly profit by reason of the enactment of a bill such as the one before us. Perhaps that

is true; but if it be true, it is our fault. If the munition manufacturers are seeking to bring this Nation into war, then, as compared to them, Judas Iscariot would be a gentleman, and they ought to have decency enough to commit suicide, as he did. On the other hand, if they persist in a course of agitation that brings our Nation toward war, or that even has a tendency in that direction, Congress is very derelict in its duty if it does not take some step that will prevent their following such a course; and I sincerely trust, regardless of what other Senators may think about it, that the resolutions referred to by the Senator from North Dakota [Mr. NYE] and the Senator from Michigan [Mr. VANDENBERG] may be adopted, and that at an early date.

We ought to have the power, we do have the power, if we have the courage to exert it, to prevent profits in the manufacture of munitions of war, and it is our duty as a part of the Congress of the United States so to do.

Mr. President, I know that there is a great propaganda being disseminated throughout this country against building a navy. Those who do not think advocate such a course. Those who are of the opinion that we are secure advocate such a course. But they do not know; they have not given consideration to the subject.

I have a passion for peace. I believe that we ought to be able to find some way to preserve the peace of the world. I have always held to the view that some instrumentality, some tribunal, should be set up somewhere that would prevent resort to arms between the nations of the earth when there was a disagreement. I have always believed that men should be wise enough to devise some way to settle their difficulties without resort to arms, and I believe the day will come when that will be brought about. I believe that at some time men will be wise enough to say that there shall be no more war. But the time is not here. The world is still seeking to preserve peace by equipping armies and building ships. It may be that that is the wrong way. It may be that we are to be censured because we cannot find a better way; but that is the only way we have; and much as I dislike war, much as my heart longs for peace, and much as I look for the day when peace may be provided intelligently, I believe it would be very unwise indeed that we should lie supinely on our backs while the world becomes an armed camp against us.

Mr. HALE. Mr. President, House bill 6604 is to all intents and purposes substantially the same bill that the Senate enacted some 2 years ago. It authorizes the bringing up of the Navy to treaty strength, and it also authorizes, as the former bill did not, the building up of the airplane strength of the Navy to a figure which shall be commensurate with its ship strength. The bill of 2 years ago died at the close of the session as the House took no action upon it.

The pending bill authorizes the building of the ships and airplanes necessary to attain to treaty strength; in other words, that strength which our naval and other advisers have decided we need relatively to the other sea powers of the world. This relative strength our delegates to all disarmament conferences have at all times insisted upon. To secure an agreement as to relative strength, we, far more than any other naval power, have had to sacrifice existing ships and the building of types of ships especially adapted to our naval needs.

Since the Washington Treaty in 1922 we have sought, by not building up our Navy, to influence other countries not to build up theirs. Our example has not been followed.

While up to 2 years ago we had built but very few ships since 1922, all of the other great naval powers had materially improved their naval armament during the same time by adding new ships and by replacing worn-out ships with modern up-to-date vessels.

Battleships, under the Washington and London Treaties, we may not build or replace, so this bill makes no specific provision for them, although under its general terms, should a later treaty agreement be made affecting battleships and battle cruisers, the provisions of this bill would be extended to ships of this class.

Aircraft carriers and cruisers, both 8-inch gun and 6-inch gun, we have very well provided for through the annual appropriations and through the money obtained from the Public Works appropriation, but in destroyers and submarines we are far below our treaty allowance.

At the close of the war we found ourselves, due to the demands of our allies for destroyer protection against submarines, with a very great number of destroyers either built or contracted for before or during the war, and we still have some 280 of these old vessels in our possession. This year the newest of these destroyers becomes over-age under the terms of the London Treaty. There is still left considerable usefulness in these old destroyers, but with their smaller guns, lesser cruising radius, and inferior seagoing efficiency in rough weather, they are in no way to be compared with the destroyer of these later days.

As I have said, all of these old destroyers of ours are of pre-war design. Until 2 years ago no new destroyers had been laid down since the Washington Treaty in 1922. Within the past 2 years 32 modern destroyers have been contracted for and 8 have already been laid down. Our treaty quota is about 90 destroyers.

In submarines we have 80 vessels, but of these, counting those now in process of construction, only 24 will be under-age at the close of the year 1936, when by treaty agreement we must destroy any surplus tonnage that we have over and above the 50,700 tons allowed us under the London Treaty. This will mean that we must destroy before the close of the year 1936, 39 of our older submarines.

In the same way in the destroyer class, where our treaty quota is 150,000 tons, we shall, under the London Treaty agreement, have to destroy some 160 of the old destroyers.

Unless additional ships, therefore, are built, our Navy on December 31, 1936, will consist of the following ships, built and building:

Capital ships, 15, of 455,400 tons; 7 over-age.

Seven of these ships will be over-age, but as the same will apply to the capital-ship quota of the other powers, that is not a serious defect.

Aircraft carriers, 6, of 131,300 tons.

Cruisers "A", 18, of 172,650 tons (including 1 provided for in the appropriation bill which has recently passed the Senate).

Cruisers "B", 17, of 140,500 tons (including 3 provided for in the appropriation bill which has recently passed the Senate).

Destroyers, 123, of 150,000 tons; 32 new destroyers, of 50,800 tons; 91 old destroyers, of 99,200 tons.

Submarines, 24, of 32,270 tons, new and not over-age; 25, of 20,430 tons, over-age.

So, except for the ships now building, which will come into commission before the close of the year 1936, we shall at that time, under the treaty requirements, scrap all tonnage in all classes of ships over and above our treaty quotas, be in a far weaker condition in case of hostilities than we are at the present time.

We might take care of our lack of modern destroyers at the present time, should hostilities occur, with our overabundance of old destroyers which still have some fighting value, but we shall not have these vessels after 1936.

In the same way we might utilize our overabundance of old submarines but, as in the case of destroyers, not after the close of the year 1936.

Our Navy, while it will be well provided with battleships, airplane carriers, and cruisers, will be deplorably weak in destroyers and submarines, both integral and necessary parts of the fleet, and we shall be very much in the position of a man who has a new, expensive, high-power automobile with two weak tires on the front wheels.

We have got to have new ships if we are to keep up our Navy. No navy lasts forever. Under the terms agreed upon in the London Treaty, aircraft carriers and cruisers are allotted an under-age life of 20 years, destroyers of 16 years (except those laid down before 1920), submarines 13 years. During these terms, these ships unless destroyed may not be

replaced. Granting an average life of 20 years, and the average would be very considerably less than that, a fleet must in its entirety be replaced in 20 years if it is to be kept up to full treaty strength.

The cost of replacement of an entire treaty navy, based on the cost per ton of each class of ship, taking the figures that were in existence before we went off the gold standard, would be $1,747,000,000 or an annual replacement cost of ninety-six-odd million dollars.

The PRESIDING OFFICER. The Senator's time has expired on the amendment.

Mr. HALE. I will now speak on the bill.

Leaving out the battleships, which under the terms of the Washington and London Treaties, we cannot replace, the annual cost of replacement of so much of our Navy as would constitute a treaty navy, would be sixty-eight-and-one-half-odd million dollars. Our annual expenditures for this purpose in the 10 years following the Washington Treaty has been less than $40,000,000, or more than $26,000,000 a year below what the cost of replacement of a treaty navy would be.

Mr. BONE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maine yield to the Senator from Washington?

Mr. HALE. I yield.

Mr. BONE. I know the Senator is reciting some of the figures that were discussed in the Naval Affairs Committee. I wonder if the Senator can tell us approximately how much it will cost, or give us at least some rough idea of what it will cost, to maintain the Navy if it is built to treaty strength. I think perhaps most of us would be very much interested in those figures.

Mr. HALE. I did not get the last part of the Senator's question.

Mr. BONE. My question was whether the Senator can tell us how much it will cost to maintain the Navy after the proposed building program shall have been completed, with the necessary replacements, and so forth.

Mr. HALE. Does the Senator mean the cost of building or actually maintaining the Navy Department, with its personnel and everything?

Mr. BONE. I mean the cost of the maintenance of the Navy.

Mr. WALSH. Mr. President, the Senator wants to know what would be the annual increase in appropriations in order to maintain the Navy.

Mr. BONE. I should like to know the annual increase in appropriations to maintain the Navy; yes.

Mr. HALE. I do not think I can give that information. No one knows what the personnel of the Navy will amount to after the ships shall have been built.

Mr. WALSH. There will be a substantial increase.

Mr. HALE. There will be a substantial increase over what it is at present. Up to this time, however, we have not spent what we should in replacing the ships of the Navy. That is the reason why we have to go to this large expense in the next few years.

Obviously, if the Navy is to be replaced within a given term and the average annual replacements for the first half of the program are under the requisite average for the total replacement, the deficit must be made up and much larger appropriations are required in the second half of the program.

Had the other powers kept on with their old ships and not replaced them when they became over age, we could well do the same thing and still maintain our relative strength; but as it happens Japan will wind up the year 1936 within some 3,000 tons—or less than one half the tonnage of one small cruiser—of her maximum allowance of modern, up-to-date ships; and Great Britain, though unless she speeds up her building program she will not be up fully to her treaty quota by 1936, will be far better off than we are and with more than twice as many modern destroyers as ours and with half again as many modern submarines; her shortage in under-age ships will not fall almost entirely on two classes of necessary ships, as does our own.

If we are to maintain our relative strength, we have got to spend money on our Navy; and this bill, while it does not appropriate, does give the necessary authorization to do so.

I sincerely hope that the Senate will enact the bill.

Mr. WALSH. Mr. President, there are some features of this question I should like to have made clear for the RECORD. A short time ago a statement was made that the armies and navies of the great powers were greater today than ever before. The statement was challenged, and I took occasion to write to the Chief of Naval Operations to ask his judgment and opinion as to the accuracy of that statement.

His reply is as follows:

I would say that the statement is substantially correct excepting, of course, the World War period when all navies were augmented both by building and conversion of merchant ships. At the close of the war many of these ships were obsolete and would have been scrapped in a few years in the natural course of events even without the agreement to do so at the Washington conference.

It is well known, of course, that the then existing capital-ship tonnage was greatly reduced and is now limited, but what is not generally understood is that in all other categories the so-called "limitations" have not yet had any real effect. This is due to the provision of the treaties that new ships may be built as replacements but the old ones that they are to replace and the excess tonnage over the treaty allowance need not be scrapped until 1936. As a result all countries now have a considerable excess over the treaty allowances in cruisers, destroyers, and submarines, except the United States has none in cruisers.

That all countries have steadily increased their navies since the Washington conference is readily seen from the following figures which show the number and tonnage of ships laid down or appropriated for since January 1, 1922.

Now, mark you, the Washington Conference was called for the purpose of disarmament. It was the hope of the peoples of the world that the crushing burden of militarism, which they felt so keenly during the World War, could be and should be lifted from the backs of the taxpayers of the world, and the Washington Conference was the first opportunity of a world-wide character and nature to vocalize the aspirations of the people for disarmament of naval craft. All the world hoped and prayed that the result of that conference would be beneficial in lessening and reducing this burden.

Before reading the figures which the admiral gave me, let me read the figures between the Washington Conference and the Geneva Conference, because, as we all know, following the Geneva Conference, our country realized, under the able and astute leadership of Mr. Coolidge, who had been for disarmament, in fact, up to that period of time, the folly of our attitude, and he came before Congress with a proposal that shocked the country, in view of his preachments for disarmament, by asking for money to build, in one fell swoop, 16 cruisers.

But, let us see how the statesmen of the world proceeded to carry out the desires and wishes of the people for disarmament after the Washington Conference.

Following this conference in 1922, and up to January 1, 1929, the great powers of the world laid down and appropriated for a naval expansion of the categories outside the treaty as follows:

Japan, 125 naval vessels; Great Britain, 74 naval vessels; France, 119 naval vessels; Italy, 82 naval vessels; the United States, exclusive of small river gunboats, 11.

This furnishes conclusive proof that we were the only nation in the world to interpret the spirit of the peoples of the world for actual and substantial naval armament reduction. We actually stopped building naval craft. No other nation followed our example.

Mr. President, I wish at this point to insert in the RECORD the figures furnished me by Admiral Standley as to the number of and the tonnage of ships laid down and appropriated for since January 1, 1922, up to date (1934):

United States, 74 ships of 330,980 tons.
British Empire, 170 ships of 453,415 tons.
Japan, 188 ships of 482,962 tons.
France, 200 ships of 508,328 tons.
Italy, 147 ships of 298,971 tons.

He adds:

During this same period the scrapping of ships has been almost negligible except for those capital ships specified by treaty to be scrapped.

Another factor generally overlooked is the growth of naval aviation which was practically nonexistent during the war and has now added greatly to the strength as well as the size of the world's navies.

This letter, if it means anything, means that the navies of the world today are larger than ever if we eliminate the naval craft that were developed in the World War as a result of the conversion of merchant ships.

Mr. President, there can be no consideration of the question of national defense or of naval strength with the elimination of the question of whether or not a nation has a merchant marine. There can be no serious differences in the measure of navies of a country unless we consider at the same time naval aircraft. In both of these we are inferior.

Mr. President, we have had three disarmament conferences, namely, the one at Washington, the one at Geneva, and, lastly, the one at London. Different constructions may be put upon those conferences, but, as I interpret and read the results of the last conference, it is my judgment that one of the reasons why steps toward actual naval disarmaments were not taken was because we went to that conference with an inferior Navy; we were in no position to make sacrifices and surrender any of our existing Navy in comparison with the sacrifices that we would have had to ask and would have required of other nations that had very much larger navies.

I am one of those who are convinced that the real movement toward disarmament in the world will begin the day when we meet at conferences with the great powers with a navy equal to theirs, and theirs equal to ours, and we may then say, "Let us talk no more about new ships and new naval craft. How many of your ships are obsolete and how many of our ships are obsolete? Let us build no more; let us build no more." We have never been in a position in any of these conferences to make any such assertion or to take any such position. Our position has been, "We are inferior; you may scrap but we will not." The reply has been, "You, the richest nation in the world, asking us, Japan, and Great Britain to scrap, and you are unwilling to scrap because you are inferior." It seems to me as plain as could be; and I honestly believe that if the Senator from Arkansas [Mr. ROBINSON] and the Senator from Pennsylvania [Mr. REED], who so ably represented us at the last naval conference in London, would speak they would confirm the interpretation I have placed upon one of the causes for failure to bring about disarmament on that occasion.

Mr. ROBINSON of Arkansas. Mr. President, will the Senator yield?

Mr. WALSH. I certainly will.

Mr. ROBINSON of Arkansas. I stated some days ago during the debate on this bill, and I now repeat the assertion, that always in international conferences designated to limit or reduce armaments the controlling factor is the status quo, the condition existing at the time of the conference. The nation that has built its navy to great strength is reluctant, and, in fact, usually refuses to reduce its existing ships, either as to number or as to armament, with the result that if the United States shall remain in its present position with respect to naval or sea power it will never be able to accomplish any effective arrangements for the reduction of naval armaments.

Mr. WALSH. I thank the Senator. He confirms the views that I have entertained, and he speaks as one who has been in contact with the statesmen of the world.

Mr. ROBINSON of Arkansas. May I add just one further thought?

Mr. WALSH. Certainly.

Mr. ROBINSON of Arkansas. There is rightfully a strong sentiment in opposition to the powerful military organizations that are maintained in various countries. That sentiment has reflected itself in the United States from time to time and is now very powerful; but reduction of armaments cannot be accomplished by merely expressing the desire for its accomplishment, because the forces which tend to build up military strength in the various nations, the forces which perpetuate rivalry in military and in naval power, are continuing. Hatred, national, commercial, and other forms of rivalry, still exist; they are not abolished by agreements not to resort to war. Experience, in my judgment, has shown that to be true.

Mr. WALSH. I thank the Senator.

Mr. President, we have disarmed. The United States has disarmed. I refer to the disarmament of the Army. We have only a police-force army in this country. That is all we have compared with the armies of other countries. We do not need any more than that, because there is no danger of any foreign foe reaching our shores and engaging in warfare on our soil so long as we have a navy that will keep a foreign foe from landing on our shores. That is why, until there is an agreement for disarmament, we are compelled to maintain a navy of adequate proportions.

What kind of a navy do we need to be protected adequately? Our statesmen met with the statesmen of Great Britain, France, Japan, and Italy and agreed upon what they considered was a necessary and an adequate navy. The United States said to Great Britain, "You need and we allow you to have a certain size navy." We said the same to Japan, to France, to Italy. Great Britain and Japan then said to the United States, "You need and we concede your right to maintain such and such a navy." What have we been doing? We have said, "We did not want it."

No one can accuse Mr. Coolidge of having been in favor of anything but disarmament. No one can accuse President Roosevelt of not being in favor of disarmament. No one can think of them in terms of militaristic desires or purposes; yet both of these men, when they have smelled the smoke of battle, when they have smelled the smoke of diplomatic battle in the chancellories of the world, have taken a position favoring a strong navy. I have already referred to Mr. Coolidge and his action, and we now know the views of the present President of the United States.

I would like to have the RECORD show just what steps have been taken under President Roosevelt to build up our Navy to treaty strength. The figures also include some congressional action under the guidance and direction of Mr. Coolidge.

At present we are building 22 ships, all told, regularly appropriated for by Congress, and in addition building 30 ships pursuant to a provision of the National Industrial Recovery Act, with their cost of $235,000,000 budgeted to the emergency Public Works $3,000,000,000 fund. In other words, President Roosevelt of his own volition has undertaken the building of 30 ships costing $235,000,000 which he has budgeted to the emergency Public Works $3,000,000,000 fund.

The total naval building program now actually under way, 52 ships in all, comprises 3 aircraft carriers, 11 cruisers, 8 large destroyers, 24 smaller destroyers, and 6 submarines. Expressed in terms of tonnage the total is 222,000 tons.

The naval appropriation bill which was passed by Congress during the past week provided funds for one 8-inch-gun cruiser and three 6-inch-gun cruisers previously authorized.

Even with the completion of all these ships, nevertheless at the expiration of the present naval treaty December 31, 1936, if we eliminate those of our naval ships which by that date will be over age, the United States will still be 102 ships short of full treaty strength. On the basis of comparison, Great Britain will be 64 ships short and Japan's Navy will be up to full strength.

To squarely deal with this still remaining naval inequality and naval inferiority, so far as the United States is concerned, in the number and size and modernness of our combat ships, we have the naval bill already passed by the House and now before the Senate. The bill is brief and easily understandable. I quote from the opening paragraph:

That the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington February 6, 1922, and at London, April 22, 1930, is hereby established at the limit prescribed by those treaties.

There is the issue. Are we for it or not? That is the essence of the bill. In the execution of this policy the bill

provides that, subject to the limitations imposed by those treaties, the President is authorized to undertake, prior to December 31, 1936, in addition to the ships previously authorized, the construction of one aircraft carrier to replace aircraft carrier *Langley*, the construction of 91,000 tons of destroyers to replace over-age destroyers, and to construct 35,000 tons of submarines to replace over-age submarines.

The bill further gives the President general authority to go ahead with any other naval replacements which circumstances may warrant and the treaties permit. The bill also provides for an expansion of naval aircraft, but so far as ships are concerned it is not authorizing an expansion program, merely a replacement program.

There is the whole story so far as the bill is concerned. Do we want to declare for that policy? Do we want to consent that the President in his judgment and discretion shall proceed, if he thinks conditions in the world necessitate it, to build up our Navy to treaty strength?

As one who believes in disarmament, as one who believes it is the only way we will ultimately obtain disarmament, I am going to vote for the bill.

Mr. DAVIS. Mr. President, everyone knows that the United States has made every possible effort to establish and maintain friendly relations with all other governments. It is generally and rightfully admitted that the idealism of our country as represented in our churches and schools and all of our traditions are opposed to military aggression. We have sincerely and steadfastly attempted to lead in the movement toward disarmament and world peace during the last 10 years. The Washington Arms Conference, the Kellogg Peace Pact, the moratorium on war debts, and the constant cooperation which we have given the nations of the world in every practical movement to advance social and economic well-being, stand as unimpeachable evidence of our desire for peace with all men.

The present bill calling for increased national defense cannot be construed by any well-informed person as a move on our part to begin a national competition in armaments because it is a well-known fact that ever since the Washington Arms Conference we have lagged behind in our naval-construction program, hoping, praying, and working to encourage disarmament. It is a source of keen regret to one of my temperament and attitudes to be compelled by world forces far beyond the control of any one of us to vote for this authorization when I know the countless ways in which the money is needed for education, decent housing, and general social improvement.

Mr. President, I am firmly convinced that this legislation has come before us not of our own choosing but has been made mandatory upon us by the world-wide trends in militarism which have taken no account of the appeals which we have made for friendly relations between nations and which have ignored our repeated proposals leading toward disarmament. We have not only preached disarmament but we have practiced what we have preached. However, the example which we have set in a thoroughly sincere attempt to promote world peace has been disregarded, and it is now apparent to everyone that the leading nations of the world have left us far behind in their military and naval programs. Under present world conditions our hope of neutrality in time of war and our hope of peace will depend largely upon the strength of our national defense. If authorization as provided in this bill will convince the militant nations of the world of the folly of competitive armaments it shall have served a useful purpose.

Mr. President, I shall vote for the bill with the hope that this action will tend to induce a practical program of disarmament which all of our other efforts have failed to attain. I hope that it will stimulate the countries which are now leading in a mad race toward armaments to change their course and agree with us on a general reduction of armaments program. We have given the program of nonresistance and disarmament as full a trial as is fair to the American people in view of the present world situation which we have been unable to control. Present conditions now make imperative my vote in favor of this legislation.

The PRESIDING OFFICER (Mr. GEORGE in the chair). The question is on the amendment of the Senator from Washington [Mr. BONE], as modified.

Mr. NYE. I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum being suggested, the clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Costigan	Johnson	Reed
Ashurst	Cutting	Kean	Reynolds
Austin	Davis	Keyes	Robinson, Ark.
Bachman	Dickinson	King	Robinson, Ind.
Bailey	Dill	La Follette	Russell
Bankhead	Duffy	Lewis	Schall
Barbour	Erickson	Logan	Sheppard
Barkley	Fess	Lonergan	Shipstead
Black	Fletcher	Long	Steiwer
Bone	Frazier	McAdoo	Thomas, Okla.
Borah	George	McCarran	Thomas, Utah
Brown	Gibson	McGill	Thompson
Bulkley	Glass	McKellar	Townsend
Bulow	Goldsborough	Murphy	Trammell
Byrd	Gore	Neely	Tydings
Byrnes	Hale	Norris	Vandenberg
Capper	Harrison	Nye	Van Nuys
Caraway	Hastings	O'Mahoney	Wagner
Carey	Hatch	Overton	Walcott
Clark	Hatfield	Patterson	Walsh
Connally	Hayden	Pittman	White
Coolidge	Hebert	Pope	

Mr. LEWIS. I again announce the absence of my colleague [Mr. DIETERICH], occasioned by immediate demand at his home. He will return to the Senate in the morning.

I also announce that the Senator from New York [Mr. COPELAND] is necessarily detained, and that the Senator from South Carolina [Mr. SMITH] is necessarily absent on account of a death in his family.

The PRESIDING OFFICER. Eighty-seven Senators have answered to their names. A quorum is present. The question is on the amendment of the Senator from Washington [Mr. BONE], as modified.

Mr. SHIPSTEAD. Mr. President, I do not intend to delay the vote upon the amendment or upon the pending bill. I intend to vote against the bill because I voted against the so-called "Disarmament Treaty of London."

This bill carries out the provisions of that treaty. So long as the ammunition makers are dominating our disarmament and peace conferences, I do not think we can get any other kind of disarmament than the kind that is manifested throughout the world today.

In view of the fact that I voted against that treaty, I am going to vote against this bill. If I had voted for that treaty, I should feel it my duty to vote for this bill, because it carries out the provisions of the treaty.

The amendment of the Senator from Washington [Mr. BONE] is the best part of this bill, and I shall vote for the amendment.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Washington [Mr. BONE], as modified.

Mr. LA FOLLETTE. I call for the yeas and nays.

Mr. KING. Mr. President, it had been my purpose to discuss the bill before us at some length, but under the rule adopted limiting my time, I cannot do so. I realize the futility of opposing measures carrying stupendous sums for naval purposes. For a number of years I was a member of the Committee on Naval Affairs, and I then discovered how unavailing were any efforts to prevent the adoption and execution of naval policies costing hundreds of millions of dollars and, in the aggregate, billions. Pressure was brought upon the committee by the Navy Department and the boards therein, and groups and organizations in various parts of the United States were unremitting in their efforts to obtain large appropriations for the purpose of building a Navy that would far outstrip any naval power in the world. It seemed as though the World War had developed an obsession upon the part of many of our citizens, and certainly upon the part of some naval officers, that our Government should enter upon a naval expansion policy that would result in the United States not only having a powerful Navy but one which would give to the United States supremacy against the combined fleets of the world.

The 1916 naval program was the result of a propaganda particularly among the navalists and the militarists. They aroused the fears of not only the naval powers of the world but of the peoples of many nations who could not understand why this Republic, which had no foes and was menaced by no dangers, should, following a calamitous World War, push forward with frantic haste the construction of 16 battleships at a cost of nearly a billion dollars, together with auxiliary craft that would call for an aggregate appropriation of a billion and a half dollars. Many of the arguments then made are being made now as justification for the more than a billion dollars which this Congress will appropriate or authorize to increase our naval strength.

Admiral Sims and Admiral Fullem, among the ablest of our naval officers, were not in harmony with many naval officers and with the Naval Affairs Committee and with militaristic groups, whose voices were so strident and whose influence unfortunately was too pervasive. They opposed the enormous appropriations demanded for capital ships, and challenged attention to the fact that the naval lessons of the war demonstrated that a modern, up-to-date, and properly constructed navy should be a three-plane navy; that it should be recognized that new factors had been introduced into naval warfare, namely, the submarine and the airplane.

The views of Admiral Sims were accepted by some of the greatest naval experts and officers of Great Britain, and they contended that the importance of the capital ship had been materially reduced, and that perhaps the most important weapons in future sea contests would be submarines and aircraft. But our naval officers, now, as then, prepare plans for naval vessels without proper regard for the causes of war and the effect upon other nations by the adoption of policies which they recommended.

The addresses made by Senators during the past 2 days prove what every intelligent person knows, that the munition manufacturers in this and other lands for many years have exerted pressure upon governments, including our own, to build up powerful military and naval establishments. They have used their unjust profits for propaganda and have powerfully influenced peoples everywhere in favor of enormous appropriations for the building of warships and for so-called "military preparation."

Behind the word "preparedness" there have been at times hidden sinister and selfish purposes. It must be apparent to all rational beings that if one nation spends millions and hundreds of millions to strengthen its army and to build a powerful navy other nations, through fear or jealousy, will feel compelled to embark upon a like course. When one nation arms other nations arm; and no explanation that can be made will eradicate fears or suspicion or resentment from the hearts of the people in other countries.

When the United States increases its Navy, though it has no foes and is menaced by no danger either from land or sea, the effect upon other nations will be immediate. They will ask the reason for the enormous military and naval expenditures and at whom are the weapons of war to be pointed.

When Congress was asked in 1919 and 1920 to approve the military and naval budget—the largest which had ever been submitted in peace time in the history of the world—Great Britain, Japan, and other nations became alarmed and demanded of their governments to know the reason for the course of this Republic. Japan, that had not laid a keel following the war, immediately revised her budget and prepared plans for the construction of 6 powerful war vessels; and Great Britain, who had scrapped approximately 300,000 tons of her naval craft following the war, took cognizance of our program and began assembling materials in preparation for the construction of 4 of the largest war vessels ever planned. Fortunately, as I stated the other day, President Harding interposed to prevent this awful, if not wicked, naval competition, and the result was the limitation-of-arms conference which resulted in limiting the construction of capital ships.

Notwithstanding the frightful burdens of debt resting upon governments, we now propose to embark upon another naval policy the cost of which no one knows and the effects of which cannot be otherwise than calamitous. We will arouse the fears of other nations. Within the past few days, both in Japan and in Great Britain, inquiries have been made as to the purpose of the United States in embarking upon a naval policy of such magnitude, and, as I am advised, these governments directly or indirectly have indicated that they would be compelled to enlarge their naval budgets for the purpose of constructing more war vessels. It seems that now, as in 1918 and 1920, our Government is to start a competitive naval armament race.

We know that the peoples of other lands are bound by the chains of debt, and we know that the American people are bowed beneath a debt so stupendous that it is beyond human comprehension. The value of all the property in the United States is but slightly in excess of the obligations resting upon the Government, the States, their political subdivisions, and the people.

Senators know that there is penury and want in the land; that many schools have closed, that children are denied educational opportunities. Senators know that we are spending billions of dollars every day in excess of the national income, and that the deficit for this fiscal year will be at least eight billions. No one can predict the deficit for the next fiscal year, and yet, demands are made here and elsewhere, that we appropriate for the ordinary expenses of the Army and the Navy, for the next fiscal year, between seven and eight hundred millions of dollars and for new naval construction, the cost of which few have had the temerity to even indicate.

Mr. COSTIGAN. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. COSTIGAN. There is no appropriation specified in the pending measure. Has the able Senator from Utah made a calculation of the amount ultimately to be taken from the Treasury under its provisions if this bill shall be enacted?

Mr. KING. Mr. President, the bill before us has been so fashioned as to prevent its understanding. Talleyrand said that language is made to conceal thought. I respectfully insist that this bill has been so drawn as to prevent its interpretation or to conceal its objectives and implications. I do not know what blind alley we are running into, what commitments are being made, and what dangerous consequences will result. I venture to state that the terminology of a measure of this character ought to have been free from ambiguity and subtle and hidden meanings that may not be discovered, even by experts, to say nothing of the ordinary legislator and the people in general.

I understood the Senator from Florida to state a moment ago that the direct commitment under the bill would be $750,000,000. No one knows what the ultimate cost of this mysterious and uncertain measure will be. In my opinion, it is a blind commitment that will cost the Government considerably more than a billion, perhaps a billion and a half dollars; indeed, it may exceed that amount. May I add parenthetically that it is most unwise for our Government, by this proposed legislation, to chain itself to categories prescribed in the London and Washington Treaties. Who is wise enough to say that we are to construct battleships and battle cruisers of the tonnage or characteristics laid down in the Washington conference or the categories and ratios established in the London Treaty?

In 1936, and even before, we may perceive the unwisdom, the folly or tragedy, of the commitments which we are asked to solemnly make in this bill. Who can tell the number of ships that will be constructed under the terms of section 2 of the bill before us? Who can tell what the cost will be? What is meant by the provision in this section that authority is given to "replace by vessels of modern design and construction vessels in the categories referred to in the Washington and London Treaties"? Who can tell what "aircraft are deemed necessary for vessels and also naval purposes in numbers commensurate with a treaty navy"?

We read a few days ago that militarists were demanding 4,000 airplanes for the Army. How many valueless but

enormously costly dirigibles will be regarded "as commensurate with a treaty navy"?

I repeat, we are embarking by this bill upon a stormy sea without chart or compass, and driven by a navalistic or militaristic spirit not compatible with the high professions of this Nation for peace and world fellowship.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. KING. I yield.

Mr. VANDENBERG. Is not the entire bill permissive, however, leaving the decision ultimately to the President with respect to our relationships with other powers?

Mr. KING. Mr. President, perhaps the language is permissive; but there is some authority in a democratic government that ought to be reserved to the people and to their legislative representatives.

Notwithstanding my high regard and, indeed, affection for the President of the United States, I am unwilling to commit to his hands or to the hands of any other person in peace time, the authority that is granted by this bill. President Roosevelt undoubtedly would use the power with wisdom and would endeavor to promote friendly relations with all nations but, as I have indicated, in the execution of this measure, no matter how high the purposes that may animate Congress or the President, it will arouse, as I have stated, fears, animosities, and resentments in other lands.

Without desiring to mention any government, I think Senators will agree that a measure that makes commitments, concededly of nearly a billion dollars for new naval craft and which authorizes the construction of capital ships either before the termination of the Washington Conference, or certainly the next day thereafter, will provoke comment and inquiry, fears, and apprehensions in some other part of the world.

The PRESIDING OFFICER. The time of the Senator on the amendment has expired.

Mr. KING. As I understand, I have some time on the bill.

The PRESIDING OFFICER. The Senator has 10 minutes on the bill.

Mr. KING. Mr. President, a number of the Senators have said that this bill only authorizes our Government to build up to treaty strength. The Senator from Massachusetts and the Senator from Maine have emphasized the words, "treaty strength." One would think from the speeches to which we have just listened that there was some compelling force in the treaties referred to, so that the United States could not avoid expending one or two billion dollars for new naval craft.

Before the war we never heard of treaty strength and were not much concerned about the waste of money upon the part of other nations for naval and military purposes, but, as I have indicated, this bill seems to chain us to some policy from which we may not escape. If at the London Conference something was said about the United States and Great Britain having a certain tonnage of cruisers, then, as Senators have contended, there was an obligation upon the part of the United States and, for that matter, upon the part of Great Britain, to construct enough ships to reach the high mark prescribed.

To me, Mr. President, this position is not tenable or sound. The Senator from Illinois [Mr. LEWIS], I think, repudiated the view that our Government must build established categories of vessels prescribed by a treaty and must build up to the terms of the treaty regardless of the wishes or needs of the American people.

Our Government took the lead in negotiating a treaty calling for a renunciation of war as a national policy and solemnly agreed to settle all controversies by pacific means; and, yet, in the face of this declaration we announce policies which I regard as being in contravention of our solemn obligations and which are bound to produce repercussions harmful to world peace.

Statements have been made by Senators that would seem to indicate that we were the only country in the world that desired peace, and that we were arming and spending hundreds of millions because we were the greatest exponent of international peace and good will. Mr. President, I challenge the view that the peoples of the world want war or that we are in danger from attack from any or all nations. One of the Senators who spoke a moment ago indicated that we must have a powerful Navy to repel the assaults that may be made upon our country. Admiral Sims and the greatest naval commanders of Great Britain have stated, over and over again, that no nation can send its fleet across the Pacific or the Atlantic and fight a successful war. Submarines, airplanes, and modern naval and military developments make it absolutely impossible for the invasion of the United States.

One would suppose from the addresses made today by the supporters of this bill, that our country is in danger. One Senator stated that we do not have a "single friend among all the nations of the world." Mr. President, I do not accept this view. What nations to the south of us are our enemies? Secretary Hull's recent visit to the Latin American governments demonstrated that there exists the strongest desire for collaboration with this Republic on all matters making for the welfare and happiness of their respective peoples, and for the promotion of world peace. Is Great Britain, that great democratic Nation, our enemy?

No one honestly can affirm it. We speak the same language, we have the same system of jurisprudence. The Bill of Rights which they have has been bequeathed to us. Hand in hand, Great Britain, Canada, Australia, New Zealand, and the other Commonwealths of the British Empire should and will walk together along the great highway of international fellowship. The French people love liberty. They are not our foes; nor can it be said that Italy, Poland, Czechoslovakia, Jugoslavia, Greece, Russia, the Scandinavian countries, Switzerland, Holland, Belgium, Spain, Portugal, or other countries that could be mentioned, are our enemies. We can make enemies of friendly peoples and friendly nations by denouncing them and calling them our enemies and affirming in an arrogant and supercilious way our own virtues and superiority.

The peoples of the world, Mr. President, have a passionate desire for peace. The World War left too many scars, too many bruised and broken hearts, too many sanguinary battlefields, too many empty homes, for the peoples of the world now to desire war.

But it is stated by a number of Senators that our Navy is inferior to Great Britain's and therefore we must build it up to what they denominated treaty levels or treaty strength. Mr. President, we have expended since the World War between two and three hundred million dollars annually—more than any other country in the world—for military and naval purposes. If colossal expenditures for arms and for navies are the test of peaceful purposes or military ambitions, then it might be said that we are the greatest offender; and we are now proposing to spend for the next year, perhaps, between four and five hundred million dollars more than any other nation on earth. In my opinion, our Navy is the most powerful navy in the world.

I know that this statement will be violently assailed by naval officers and by many other persons; but I insist that a fair and dispassionate examination of the navies of the world will demonstrate the correctness of my statement. We have spent approximately $70,000,000 during the past few years in modernizing our capital ships. The total number of our naval craft is 372, with a tonnage of 1,038,660; the British Empire Navy consists of 293 vessels, with a tonnage of 1,174,339; Japan's Navy consists of 221 vessels, the tonnage of which is 758,261.

Hector C. Bywater, recognized as an authority upon naval construction and naval affairs, recently stated that the United States battle fleet of 18 capital ships is the only completely oil-burning fleet in the world, which gives it an immense advantage over all others in steaming radius and strategic homogeneity. * * * It mounts 192 heavy turret guns as against 166 corresponding guns mounted in the British fleet.

Mr. President, time prevents further examination of the relative strength of the navies of the great powers. I can only repeat that offensively or defensively the United States Navy is the equal if not superior to that of any other nation.

One would assume from the discussions this afternoon that the United States was the only Nation that desired disarmament or the limitation of armaments, and that the other nations, or at least many of them, were the opponents of gradual or ultimate disarmament. As I have stated, we are expending more for military purposes than any nation in the world. Most of the nations of the world are spending but little. Undoubtedly Germany's course has aroused apprehensions and fears upon the part of France, Poland, Austria, and some other European countries; but in recent conferences, with which Senators must be familiar, representations were made by Russia, Poland, Italy, France, Great Britain, and even Japan, which indicated a desire for material reductions in military expenditures. Russia, upon a number of occasions, declared that she was willing to abolish all military and naval armament; and in a recent conference a representative of Italy, Signor Grandi, declared that his Government was willing to joint in a simultaneous abolition of capital ships and submarines and also practically all forms of naval craft and likewise to reduce land armaments to the minimum.

France expressed her willingness to abolish battleships and submarines, and Great Britain declared, in substance, in favor of the abolition of battleships, submarines, and in making important reductions in all other forms of naval craft. Our Government was not hospitable to the suggestion with respect to the abolition of battleships, and in one of the conferences, as I recall, declined to enter into discussions respecting this subject or the question of reducing their size or prolonging their period of service.

Mr. President, this Republic, without foes, impregnable against any or all nations, should, in this period of world confusion, hold high the banner of peace and pursue those policies that will lead not only to the physical disarmament of the world but which will result in moral unity.

Mr. President, let us have peace; let us speak the language of peace, not war; let us organize for peace in a constructive way, and devote a modicum, at least, of the billions spent for human destruction for the material, moral, and spiritual advancement of the world.

Mr. President, I ask unanimous consent to insert in the RECORD as a part of my remarks a statement from the Foreign Policy Report under date of June 24, 1931; also a statement by Admiral Sims, to which I have referred; statement from a memorandum published as an official White Paper of the British Government; also a statement by M. Dino Grandi at a session of the assembly of the League of Nations September 8, 1931; and a statement by Mr. Litvinoff, Minister of Foreign Affairs of the Soviet Government.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

At the London Naval Conference every power but the United States favored a substantial reduction in the size of future battleships. Great Britain openly favored a reduction in the size of battleships from 35,000 tons to 25,000 tons, and of guns from 16 inches to 12 inches; this was supported in principle by France, Italy, and Japan.[1] Italy went even further and offered "to examine favorably the abolition of capital ships" should the other powers concur.[2] Japan deemed it "desirable that an agreement should be reached so as to reduce the size of capital ships to 25,000 tons, from 35,000 tons stipulated in the Washington Treaty", and suggested that "the maximum gun caliber should be reduced to 14 inches."[3]

Thus at the London Conference the four other naval powers placed themselves on record as favoring the abandonment of the big battleship and its eventual replacement by a smaller unit.

* * * * * * *

[1] Documents of the London Naval Conference, cited, pp. 524, 525, 532, and 533.

[2] Ibid., p. 528.

[3] Ibid., p. 533.

Some naval authorities share the view of Admiral Sir Herbert Richmond that there is no tactical reason for the huge capital ship. In answer to the question, "How large must be the fighting ship of the power threatened with invasion?" Admiral Richmond declares:[4]

"The answer is plain. Provided she is strong enough to be able with certainty to compel surrender upon a ship carrying troops or goods and is provided in numbers sufficient to deal with the situations that will arise (geographical, strategical, tactical), she will be large enough to make her country secure against the danger of invasion."

The matter of size, he points out, is purely relative. "Commodore Oliver Perry's brigs and schooners on Lake Erie, having won the Battle of Lake Erie, were capable of exercising command on that lake * * * larger ships are not necessary for what is called 'battle.' Two or twoscore destroyers or corvettes, two or twoscore light cruisers or frigates, two or twoscore *Rodneys* or *Victorys* can equally fight to a finish or decision, just as two lightweights can fight as good and decisive a fight as a Dempsey or a Carpentier; and they can take as much punishment from their antagonists as the heavier ship or man from theirs."

The contention that the United States requires a battleship of 35,000 tons in order to insure a wide cruising radius has been criticized on the ground that at the present time neither the United States nor any other power possesses a single 35,000-ton battleship.[5] The largest American vessel is the *California*, of 32,000 tons ,and five ships of the present American fleet range from 26,000 tons to 28,000 tons each. Moreover, three of the American battleships which are now being modernized and which have a cruising radius of 25,000 miles are vessels of 30,000 tons displacement—5,000 tons less than the standard size regarded as essential for American needs.

In part because of its opposition to reduction in size of capital ships, the American Navy Department is opposed to reopening the naval question at the disarmament conference. The Navy Department takes the position that the question of battleships was definitely settled at the London Naval Conference and that the treaty resulting from that conference provides for further consideration in 1935.[6] The fact that Great Britain, France, and Italy share a common desire to reduce the size of capital ships, and that the latter countries are about to proceed with the construction of a new and smaller type of ship, would indicate that the issue will be raised at any rate in Geneva in 1932.

If the United States insists upon retaining the 35,000-ton battleship and succeeds in blocking a reduction in size at the disarmament conference next year, it will be placed in a difficult position in 1936, it is pointed out. * * *

The cost of building our last battleships, between 1919 and 1923, was approximately $35,000,000 each. The cost in 1936 will be well over $50,000,000, and may even approach $75,000,000.[7] A program of fifteen 35,000-ton capital ships, therefore, will cost between $750,000,000 and $1,000,000,000, which will have to be added to the already high bill for cruisers, destroyers, and submarines. In view of the difficulty of securing appropriations for smaller vessels permitted by the London Treaty, and the opposition to further expenditure on floating fortresses which many believe have outlived their usefulness, the adoption of a gigantic battleship program is likely to be fraught with difficulty.

* * * * * * *

Admiral Sims stated a number of years ago:

"It normally adds to the ability of a country to defend itself. No battleship afloat can operate against the coast of an enemy within the range of the enemy's airplanes for this reason. A fleet that goes over there, whether it has 6 or 8 or 10 airplane carriers. suppose it has 10—that would be nearly 1,000 planes. With 30 planes each, it would be 300 airplanes coming up against the coast where we are operating from the beach, and we have 2,000 airplanes. It simply means that you are controlling the air absolutely and you will wipe out all of the air force, and you will be perfectly free to attack that fleet.

"Great Britain with all her forces could not attack this coast without a base on this side to operate from. She has not a single ship that can come across the ocean and get back again, let alone stay here without assistance."

A press summary which was published as an official white paper by the British Government is as follows:

"The Government proposed that the number of capital ships for each signatory fixed by the Washington Treaty should be reached within 18 months of the ratification of the treaty resulting from this conference instead of by 1936. It proposes that no replacement of existing ships should take place before the next conference in 1935 and that in the meantime the whole question of capital ships should be the subject of negotiation between the powers concerned. The Government will press for reduction though, of course, without disturbing the Washington equilibrium. Its experts favor a reduction in size from 35,000 tons to 25,000

[4] Foreign Affairs (New York), April 1931.

[5] Great Britain possesses 1 battle cruiser, the *Hood*, built in 1920, with a displacement of 42,000 tons. The *Rodney* and the *Nelson* have a displacement of 33,500 tons.

[6] Cf. The London Naval Conference, cited.

[7] Application of new processes and equipment in naval construction has greatly increased the costs of all types of vessels. Thus the estimates for new 10,000-ton cruisers have increased from $17,500,000 in 1930 to more than $20,000,000 in 1931.

tons and of guns from 16 inches to 12 inches. They also favor a lengthening of the age from 20 to 26 years. The Government hopes that there will be an exchange of views on this subject during the conference. Indeed, it would wish to see an agreement by which battleships will in due time disappear altogether, as it considers them a very doubtful proposition in view of their size and cost and of the development of the efficacy of air and submarine attack."

M. Dino Grandi said:

"* * * My country, for its part, is therefore ready to accept an organic plan of quantitative limitations comprising:

"In respect of naval armaments:

"1. The simultaneous abolition of capital ships and submarines.

"2. The abolition of aircraft carriers.

"In respect of land armaments:

"1. The abolition of heavy artillery of all kinds.

"2. The abolition of tanks of all kinds.

"In respect of air armaments:

"1. The abolition of bombing aircraft.

"In general:

"1. The abolition of all kinds of aggressive means of chemical and bacteriological warfare.

"2. The revision of the laws of war so as to ensure a more complete and effective protection of civilian populations.

"I do not think it necessary to draw your attention to the fact that when once we have come to an agreement for the abolition of certain weapons of war which are the most powerful and the most deadly we should not only have taken a great step forward in the direction of disarmament but we should also be in a position to come more easily and more rapidly to an agreement on the quantitative reduction and limitation of other forms of armaments * * *."

Maxim Litvinoff said:

"* * * The only infallible way to the solution of the problem of the organization of peace, the problem of the averting of war, the problem of assuring security to all nations, is general and total disarmament.

"The idea of total disarmament is distinguished from all other plans by its simplicity and by the ease with which it could be carried out and with which its realization could be controlled. Identical security and equality of conditions for all countries could only be arrived at by means of total disarmament. The Soviet delegation has by no means come here merely to put before you yet another time its proposal for total and general disarmament, or to declare that we are determined to have complete disarmament or none at all. We have no illusions whatsoever as to the fate in store for our proposition. Our delegation is ready to discuss with you any proposals tending to reduce armaments; and the further such reduction goes the more readily will the Soviet delegation take part in the work of the conference. Considering the draft convention drawn up by the preparatory commission, altogether inadequate, the Soviet delegation will advocate here its own draft for the reduction of armaments, which, however, it regards merely as the first step toward total disarmament.

"I would remind the conference that the Soviet delegation was the first to propose, in its second draft convention put before the preparatory commission, the complete destruction of the most aggressive types of armaments, including:

"1. Tanks and superheavy long-range artillery.

"2. Ships of upward of 10,000 tons displacement.

"3. Naval artillery of over 12-inch caliber.

"4. Aircraft carriers.

"5. Military dirigibles.

"6. Heavy bombing planes, all stock of air bombs, and any other means of destruction for use from airplanes.

"7. All means and apparatus for chemical, incendiary, and bacteriological warfare.

"The Soviet delegation proposed the complete prohibition of air bombing and not only beyond the limits of a definite area. It also proposed not merely to refrain from chemical warfare but actually from preparing for it in time of peace.

"All these proposals remain in full force for the present conference.

"I am empowered to declare here the readiness of the Soviet Union to disarm to the same extent and at the same rate to which the other powers may agree."

Mr. JOHNSON. Mr. President, in a moment of exasperation Edmund Burke once exclaimed:

What shadows we are, and what shadows we pursue!

As I have listened to what has been said upon the question pending before the Senate, as I have heard it repeatedly asserted that our Navy is equal to that of any other navy in the world, as I hear the repetition constantly that for us to do anything in behalf of our national defense carries offense and hostility to the rest of the world, I have thought, "What shadows we pursue" in a discussion of this sort.

I recall that at the time of the London Conference in 1930, with all of the vigor of which I am capable but with little support from others, I contested what was done in that conference. I believed then I was right, and I think subsequent events have demonstrated conclusively that I was right. I saw after that conference other nations building in accordance with what was agreed by that conference. I saw our Nation lag in its construction until we were far inferior to the nations that had been the leading consultants and conferees in the London gathering. I have seen the after effects day by day leave us in a worse position; and now a new administration, thank God, with a realization of what it means to us to have an inferior navy, asks us not to engage in a naval race, not to endeavor to have any nation in hostility to us in building with them, but simply to grant such power that we may, under the London Conference, if the administration sees fit, construct a navy in accordance with the agreement that was signed at that time.

Why is it that there is such a delicate sensibility on the part of other nations that when we do exactly what they do we cause offense to them, and we offer them in reality some undisclosed and mysterious insult by pursuing what we have agreed to pursue and what they have already consummated? Was anyone here or anyone in our Nation offended when Britain went on with the program of the London Conference? Has anyone here or anyone in our Nation taken an attitude of hostility to Japan because Japan has pursued and carried out the terms of the London Conference? Then, why in the name of common sense, in the name of logic of any kind or any character should it be asserted when we merely authorize our duly constituted agents to pursue the agreement which we signed at London that we offend and perform an act of hostility to Britain or Japan?

It is perfect nonsense to say that it is so. There are positions which I can understand and of which I am not critical. I can understand the man who says that he does not believe in any navy at all and would not build a single ship. I can understand his attitude, because it is caused by a mental strabismus for which he is not responsible and which he thinks means something to the peace of the world. I deny his thesis and I deny his premise in that regard, but I can understand his position and I am not critical of him. But if we carry to its logical conclusion the attitude that thus is enunciated, then we would not have a ship of the United States of America and no Navy at all. The man who comes from the section of the Union from which I come and will not in accordance with the agreement of his country build a Navy such as that agreement will permit, is not alive indeed to passing events and little understands what may occur in the great Pacific and in the Orient within a brief period in the future. We seek, our country seeks, war with none; we seek to offend none; but within our jurisdiction, under international agreement, we have the right to build exactly as we see fit, and no nation on the face of the earth has the right to take offense in any way or in any shape or in any manner at all.

I do not like, Mr. President, assaults upon the Navy. I do not like to listen to remarks such as sometimes I hear in the Senate concerning the Navy. I recognize that there are some few people in the Navy underbred and overfed with whom I would rather have nothing to do; but I recognize as well, sir, that the vast majority of those who serve this Nation in the United States Navy deserve of us and of all America nothing but the highest praise. I cannot forget the glorious past of the American Navy. I cannot forget the deeds of valor and of heroism that have been performed in the days gone by upon the ships that have floated our flag. I glory in the personnel of the Navy of the United States today. I glory in what has been done by the personnel of the Navy of the United States in the past.

I want a navy, I want a real navy. I want a navy that either upon the Atlantic or the Pacific will be able to do all that may be done in behalf of the commerce of this Nation, in its protection, and that may, if the worst comes to the worst, finally do what the Navy has ever done for the United States of America.

It will be in time to come our first line of defense. It will be in days to come our first line of offense. The gentlemen who decry the United States Navy remind me of those

who decried Tommy Atkins, and whom Kipling answered when he said:

For it's Tommy this an' Tommy that, an'
" Chuck 'im out, the brute! "
But it's " Savior of 'is country ",
When the guns begin to shoot.

And this Navy of ours, with its glorious past, with its personnel today that is doing its full duty, deserves at the hands of the Congress of the United States its full meed of praise. And this administration that has asked us to pass the naval construction bill, after we have been dillydallying for so many years in the past, refusing to do our plain duty to our people and for their defense—this administration deserves for this one act the very highest praise that can be accorded it.

The VICE PRESIDENT. The time within which the bill is to be debated has expired.

The question is on agreeing to the amendment of the Senator from Washington [Mr. BONE], as modified.

The amendment as modified was agreed to, as follows:

On page 4, line 5, after the committee amendment and after the word " direct ", strike out the period and insert a colon and the following:

" *Provided further*, That not less than 25 percent of each succeeding lot of aircraft, including the engines for such aircraft, the procurement of which is authorized by this act and hereafter undertaken shall be constructed and/or manufactured in Government aircraft factories and/or other plants or factories owned and operated by the United States Government.

" The foregoing proviso is subject to the further condition that if it shall be determined by the President that present plants, factories, and equipment owned by the Government are not such as to permit the construction and/or manufacture of the said aircraft and/or engines in such Government plants and factories, in the proportions herein specified and required, then and in that event such requirement may be suspended in whole or in part by his order. However, in the event of such order of suspension being made by the President, the existing plants, factories, and facilities now owned and/or operated by the Government shall forthwith be expanded and equipped to enable the Government to construct, manufacture, and repair its own naval aircraft therein, and, in addition, such other and further plants and facilities shall, as speedily as possible, be constructed and/or acquired by purchase or condemnation for the purpose of enabling the Government to take over and perform the work of constructing, manufacturing, and repairing not less than 25 percent of its naval aircraft therein. The funds necessary for the enlargement and expansion of such existing plants and facilities owned by the Government, and for the construction and acquisition of new plants, factories, facilities, and equipment for the construction and manufacture of naval aircraft, are hereby authorized to be appropriated."

The VICE PRESIDENT. The question is, Shall the amendments be ordered to be engrossed and the bill to be read a third time?

Mr. BONE. There is another amendment to which I call the attention of the Senate, and on which I ask for a vote.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 4, line 5, after the word " direct ", it is proposed to strike out the period and to insert in lieu a semicolon and the following:

It being the intent and purpose of this proviso that the Government shall, insofar as practicable, develop its navy yards, arsenals, and other plants and facilities to the end that it may—

(a) At all times hereafter be able to construct, maintain, and repair its authorized vessels and naval equipment;

(b) As speedily as possible become self-sufficient in time of war; and

(c) Insofar as may be possible, eliminate private profit in war and in the preparation therefor.

The VICE PRESIDENT. The question is on agreeing to the amendment of the Senator from Washington.

Mr. TRAMMELL. Mr. President, that proposal was before the committee and the committee refused to agree to it. I suggest that the Senate reject the amendment.

The VICE PRESIDENT. All debate on the amendments and the bill under the agreement has ended. The question is on agreeing to the amendment of the Senator from Washington.

The amendment was rejected.

The VICE PRESIDENT. The question now is, Shall the amendments be ordered to be engrossed and the bill to be read a third time?

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The VICE PRESIDENT. The bill having been read three times, the question is, Shall it pass?

Mr. NORRIS and Mr. ROBINSON of Arkansas asked for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. ERICKSON (when his name was called). I have a pair with the senior Senator from New York [Mr. COPELAND], who is necessarily detained from the Senate. I am informed that if present he would vote " yea." If permitted to vote, I should vote " nay."

Mr. THOMPSON. On this question I have a pair with the Senator from South Carolina [Mr. SMITH]. If he were present he would vote " yea ", and if I were permitted to vote I should vote " nay."

Mr. TYDINGS. I have a general pair with the senior Senator from Rhode Island [Mr. METCALF]. I understand if he were present he would vote as I intended to vote. I therefore feel at liberty to vote, and vote " yea."

The roll call was concluded.

Mr. LEWIS. I desire to announce, by direction of my colleague [Mr. DIETERICH], that he has been necessarily detained. If present, he would vote " yea."

I also announce the absence of the Senator from Montana [Mr. WHEELER], the Senator from Alabama [Mr. BLACK], the Senator from Oklahoma [Mr. GORE], and the Senator from Mississippi [Mr. STEPHENS], who are detained on official business.

I wish further to announce that the Senator from South Carolina [Mr. SMITH] is detained from the Senate on account of a death in his family.

Mr. HARRISON. I have a general pair with the senior Senator from Oregon [Mr. MCNARY]. I transfer that pair to the junior Senator from Illinois [Mr. DIETERICH] and vote " yea."

Mr. ROBINSON of Indiana (after having voted in the affirmative). I have a general pair with the junior Senator from Mississippi [Mr. STEPHENS], who is necessarily absent. I transfer that pair to the senior Senator from Rhode Island [Mr. METCALF] and allow my vote to stand.

Mr. HEBERT. I desire to announce that the Senator from Oregon [Mr. MCNARY] is necessarily detained from the Senate on official business. I desire further to announce that my colleague the senior Senator from Rhode Island [Mr. METCALF] and the Senator from South Dakota [Mr. NORBECK] are necessarily absent from the Senate. If present, the senior Senator from Rhode Island would vote " yea " on this question.

I am further requested to announce that on this question the Senator from Michigan [Mr. COUZENS] is paired with the Senator from Montana [Mr. WHEELER]. If present, the Senator from Michigan would vote " yea ", and the Senator from Montana would vote " nay."

The result was announced—yeas 65, nays 18, as follows:

YEAS—65

Adams	Cutting	Kean	Robinson, Ind.
Ashurst	Davis	Keyes	Russell
Austin	Dill	Lewis	Schall
Bachman	Duffy	Logan	Sheppard
Bailey	Fess	Lonergan	Steiwer
Bankhead	Fletcher	McAdoo	Townsend

NOT VOTING—13

Black	Erickson	Metcalf	Stephens
Copeland	Gore	Norbeck	Thompson
Couzens	McNary	Smith	Wheeler
Dieterich			

So the bill was passed.

On motion of Mr. TRAMMELL, the bill (S. 2493) to establish the composition of the United States Navy with respect to the categories of vessels limited by the treaties signed at Washington February 6, 1922, and at London April 22, 1930, at the limits prescribed by those treaties; to authorize the construction of certain naval vessels; and for other purposes, was ordered to be indefinitely postponed.

Mr. DILL. Mr. President, I desire to enter a motion to reconsider the vote by which the bill was passed. I desire to discuss it for a moment.

I relied upon the unanimous-consent agreement that all pending amendments would be voted upon at not later than 4 o'clock. I had been called from the Chamber for a moment and during my absence the bill was brought to a vote without any consideration of the amendment which I submitted on the 23d of January. I think that the Senator from Florida [Mr. TRAMMELL], in charge of the bill, did not intend to overlook consideration of the amendment. I do not want to delay the bill, but I think I am entitled to have the amendment considered. I offered it in good faith. I have not taken any time on the bill or delayed it in any way. I appeal to the Senator in charge of the bill if he will not by unanimous consent permit a reconsideration of the vote by which the bill was passed, and permit my amendment to be voted upon.

Mr. KING. Mr. President, will the Senator from Washington yield?

Mr. DILL. I yield.

Mr. KING. I had several amendments pending. I had a call from one of the departments and stepped from the Chamber for not more than a minute, and when I came back the vote was being taken on the bill. I intended to offer the amendments and desired to have a vote on them.

Mr. TRAMMELL. Mr. President, I always like to be accommodating, but the proposal of the Senators would upset the purpose of the unanimous-consent agreement. The Senator from Washington [Mr. DILL] did tell me he had the amendment, and I was perfectly willing, so far as I was personally concerned, that it might go to conference; but when the amendments were stated at the desk we voted on each amendment that had been sent to the desk and had been properly offered. The Senator from Washington had not offered his amendment in regular order.

Mr. DILL. I took my amendment to the desk, made a correction in it, left it with the clerk, and took all the steps I thought necessary to protect myself against the kind of action which has been taken. I have acted fairly in the matter, and I appeal to the Senator from Florida that I be permitted to have the amendment offered and voted on at this time.

Mr. ROBINSON of Arkansas. Mr. President, I am going to suggest to the Senator in charge of the bill that he permit reconsideration of the vote by which the bill was passed, on condition, of course, that there shall be no further debate. The Senator from Washington would not expect to reopen the debate but merely that the Senate vote on his amendment.

Mr. DILL. That is all I ask.

Mr. TRAMMELL. That is agreeable to me, if there is to be no debate permitted.

Mr. ROBINSON of Arkansas. Then I ask unanimous consent, with the approval of the Senator from Florida, that the votes by which the bill was read the third time and passed be reconsidered and that it be in order to consider the amendment of the Senator from Washington [Mr. DILL] without debate.

Mr. KING. Mr. President, I have two or three amendments which I desire to have considered.

Mr. TRAMMELL. Mr. President, if the Senator from Arkansas will permit, I think the amendments of the Senator from Utah [Mr. KING] occupy quite a different status from the amendment of the Senator from Washington [Mr. DILL]. The Senator from Utah had not previously taken up any amendments. He made no reference to them whatever, so far as I am aware, but the Senator from Washington did discuss with me his amendment.

Mr. ROBINSON of Arkansas. I have made no request concerning any amendment save that of the Senator from Washington.

The VICE PRESIDENT. The Senator from Arkansas asks unanimous consent that the vote by which the bill was read the third time and passed be reconsidered for the purpose only of permitting the Senator from Washington to offer an amendment. Is there objection?

Mr. REED. Mr. President, reserving the right to object, as I heard the request, it calls for a vote upon the amendment of the Senator from Washington without further debate.

The VICE PRESIDENT. The Senator is correct. Is there objection?

Mr. FRAZIER. Mr. President, the Senator from Utah [Mr. KING] had an amendment printed which had been offered. If the amendment of the Senator from Washington is entitled to be voted upon, so is the amendment of the Senator from Utah. I object unless the amendment of the Senator from Utah is included.

The VICE PRESIDENT. Objection is heard.

Mr. DILL. Then I enter a motion to reconsider the votes by which the bill was read a third time and passed.

The VICE PRESIDENT. The motion will be entered.

Mr. BONE. Mr. President, I ask unanimous consent to have printed for the benefit of Members of the Senate the naval construction bill, with all amendments that were adopted in the Senate numbered, so we will have it before us tomorrow in its final form when we vote on the motion of the Senator from Washington [Mr. DILL] to reconsider the vote by which the bill was passed.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

CONSERVATION OF WILD-LIFE RESOURCES—DUCK STAMP BILL

Mr. WALCOTT, from the Special Committee on Conservation of Wild Life Resources, to which was referred the bill (H.R. 5632) to supplement and support the Migratory Bird Conservation Act by providing funds for the acquisition of areas for use as migratory-bird sanctuaries, refuges, and breeding grounds, for developing and administering such areas, for the protection of certain migratory birds, for the enforcement of the Migratory Bird Treaty Act and regulations thereunder, and for other purposes, reported it without amendment and submitted a report (No. 414) thereon.

CROP PRODUCTION AND HARVESTING LOANS TO FARMERS

Mr. GLASS. Mr. President, from the Committee on Appropriations, I report back favorably without amendment the joint resolution (H.J.Res. 290) to provide an appropriation to carry into effect the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934.

The resolution ought to be acted on at once in order to enable the farmers to get the money proposed to be loaned them. I ask unanimous consent for the present consideration of the joint resolution.

There being no objection, the joint resolution was considered, ordered to a third reading, read the third time, and passed, as follows:

Resolved, etc., That to enable the Governor of the Farm Credit Administration to carry into effect the provisions of the act entitled "An act to provide for loans to farmers for crop production and harvesting during the year 1934, and for other purposes", approved February 23, 1934 (Public Act No. 97, Seventy-third Congress), including personal services and rent in the District of Columbia and elsewhere; paper, printing, and binding; supplies and services, without regard to section 3709 of the Revised Statutes (U.S.C., title 41, sec. 5) when the aggregate amount involved does not exceed $50, and such other expenses as may be necessary, there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $40,000,000, to remain available until June 30, 1935.

INCLUSION OF CATTLE AS A BASIC COMMODITY

Mr. CONNALLY. Mr. President, I ask that the unanimous-consent agreement be carried out which provided that the Senate should at this time proceed to the consideration of House bill 7478.

The VICE PRESIDENT. Under the unanimous-consent agreement the Chair lays before the Senate House bill 7478.

The Senate proceeded to consider the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes, which had been reported from the Committee on Agriculture and Forestry with an amendment.

Mr. CONNALLY. Mr. President, the pending measure is not intricate or involved. It is known as the "Jones-Connally cattle relief bill." It provides that beef cattle and dairy cattle, under the comprehensive term of cattle, be placed under the Agricultural Adjustment Act as a basic commodity. It also authorizes an appropriation of $200,000,000 to enable the Secretary of Agriculture to carry out the terms of the bill.

It will be remembered that when the original Agricultural Adjustment Act was before the Congress the cattle interests appeared and indicated at that time that they did not desire that cattle be brought under the terms of the bill. Since that time, however, in hearings before the Committee on Agriculture of the House as well as before the corresponding committee of the Senate, it has been made to appear that the cattle interests of the country have changed their views with regard to this matter, and are now extremely anxious that cattle be brought within the operations of the act.

On the 29th of January of this year the Secretary of Agriculture called a meeting at the Department of Agriculture of representatives of the beef-cattle industry as well as the dairy interests. I was present at that meeting; and the Secretary, in a very clear and comprehensive statement, outlined what his policies would be in the event this measure should be enacted.

Allow me to say that the Department of Agriculture and the Secretary are earnestly in favor of the enactment of this bill. The Secretary advises the Congress that if it is enacted, before putting into effect any plan under the bill he will call a conference of representatives of both the beef-cattle and the dairy-cattle industries here in Washington, and will make a survey of the whole problem, and will try to work out with the cattle interests a plan that will be satisfactory to them, and will meet the purposes which the Congress has in view in enacting the legislation.

Mr. MURPHY. Mr. President, will the Senator yield?

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Iowa?

Mr. CONNALLY. I yield.

Mr. MURPHY. May I inquire of the Senator, if a condition should arise where cattlemen would not be in favor of the imposition of the processing tax, whether the Department of Agriculture would refrain from imposing the tax?

Mr. CONNALLY. I am forced to reply to the Senator that I cannot give him that assurance, because no one can know in advance, of course, what the conditions might be at that time. No one can give assurance as to what the Secretary might determine; but allow me to say to the Senator that in the meeting at the Department of Agriculture, as well as before the committee, the attitude of the Secretary has been one of entire sympathy with the beef-cattle interests and particularly with regard to the dairy interests as wanting to go along with them in working out some solution of their problem.

The Senator from Iowa, no doubt is aware that in the dairy industry particularly, the plan contemplates disposing of the old and diseased dairy cattle, and, in the case of the old cattle where they are not diseased, of working out a plan whereby they may be converted into canned beef and things of that kind, so as to aid the fresh beef cattle market in the United States.

Mr. PITTMAN. Mr. President——

The PRESIDING OFFICER (Mr. McKELLAR in the chair). Does the Senator from Texas yield to the Senator from Nevada?

Mr. CONNALLY. I do.

Mr. PITTMAN. In partial answer to the question of the Senator from Iowa [Mr. MURPHY], I desire to say that in the conferences with the Secretary of Agriculture and the department having particular jurisdiction over cattle it was determined to call into conference the representatives of the dairy interests and the cattle interests.

It is true that at the start some of the leading cattlemen, as we know, opposed having beef put down as a primary product. I desire to say that the secretary of the American Livestock Association—who, I believe, represented the sentiment of that association—was present at one of these conferences, in which he stated that at that time it was the overwhelming sentiment of the Livestock Association, as far as the association might be representative of the raisers of cattle, that there was but one remedy for the existing condition, and that was placing beef among other primary products so long as that policy was carried on by our Government.

The conferences made an effort to meet the distress in the cattle industry by direct cooperation between the livestock raisers and the packers of this country. They tried to draw a code, to draw an agreement whereby a part of the proceeds from the sale of cattle should be withheld in the nature of a tax to be used by the Secretary of Agriculture for the purpose of removing from the market surplus cattle which could not be carried over through a winter or fattened.

That utterly failed, and failed, in my opinion—for I was present at the conferences—because the packers of this country, in the opinion of those present, and I believe in the opinion of the Secretary of Agriculture also, would not act fairly in the agreement. So we were relegated to this process of protecting the cattle industry, if it is to be protected at all; and I do not think there is anyone here who does not know that the cattle industry has suffered more than any other industry in this country. Instead of being benefited at all, and instead of prices rising at all, the price of beef cattle today is lower than ever before in its history. While the price of retail beef has gone up, the price of cattle has gone down.

In those circumstances, in an industry that is absolutely universal throughout the United States—every community has a certain amount of cattle; every State has a certain amount of cattle—something must be done; and, judging from the conferences we had, apparently this is the only thing that can be done at the present time.

I desire to say that from the statements made by the representatives of the association I am satisfied that the association approves of this bill. I think that will answer the Senator from Iowa as far as any information we can get is concerned. There may be some who are opposed to the bill, but in this case I think there is only one thing to do, and that is the Secretary of Agriculture will do what the Senator says. He will call in those interested in the cattle business and those interested in the dairy business and thresh out the matter.

Mr. CAREY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Wyoming?

Mr. CONNALLY. In a moment. I desire to answer the suggestion made by the Senator from Nevada [Mr. PITTMAN].

The Senator from Nevada is correct in his assumption that the cattle interests of the country at large favor the enactment of this measure. When this matter was pending before the Committee on Agriculture and Forestry, there was a meeting here in Washington, not only of dairy representatives but of beef-cattle interests from all parts of the Nation; and that conference voted almost unanimously in favor of the enactment of this bill, largely for the reasons sug-

gested by the Senator from Nevada. The beef-cattle market is lower than it has been for years—perhaps not just at the moment, because in anticipation of the passage of this measure I understand that prices have increased slightly—but the cattle market has been lower than at any time within recent years.

In 1930, on my motion, the Senate adopted an amendment raising the tariff on beef cattle to the figure in existing law, and we have in a great measure limited imports of beef cattle; but there are considerable imports of canned-beef products, the figures as to which I have available and ask permission to insert in the RECORD at a later point in my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CONNALLY. We have also maintained for a considerable period an embargo on the importation of live cattle from the Argentine Republic because of the existence in the Argentine of the foot-and-mouth disease. So there is very little prospect of helping the cattle market by raising the tariff on live cattle. It might be benefited somewhat as to canned beef; and so there seems to be no remedy at hand to aid the beef-cattle industry or the dairy-cattle industry except the enactment of this measure.

Mr. COSTIGAN and Mr. CAREY addressed the Chair.

Mr. CONNALLY. I will yield to the Senators in a moment.

Let me say further, with regard to the statements of the Senator from Nevada, that the Secretary of Agriculture is not hostile to these interests. He is not going to do a thing, either by a processing tax or by any other proceeding, which he thinks will be harmful or hurtful in a large fashion to these interests. His purpose is to help these industries; and he intends to call in the representatives of the industries before any plan is formulated and consult with them and obtain their views. Of course, no one can guarantee what will transpire after those conferences, but I know that I speak with assurance of the facts when I say that the Secretary of Agriculture is going to approach all angles of this problem in a spirit of fairness and consideration.

Mr. O'MAHONEY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Wyoming?

Mr. CONNALLY. I shall have to yield first to the Senator's colleague [Mr. CAREY], who has been on the floor for some time. Then I shall yield to the Senator from Iowa [Mr. MURPHY], and then to the junior Senator from Wyoming.

Mr. CAREY. Mr. President, I should like to ask the Senator from Texas if it is not true that recently there were in this city representatives of some 53 livestock organizations, who submitted a plan to the Secretary, and the Secretary did not accept the plan submitted by them. I do not see how anything will be gained by calling another meeting, because he has had here as representative a meeting of livestock associations as he could get.

Mr. CONNALLY. May I ask the Senator if it is not true that that group appointed a committee to continue conferences with the Secretary looking to working out a plan after the bill shall be enacted?

Mr. CAREY. They submitted to the Secretary a written plan, which I will submit to the Senate later, of the things they felt should be done.

Mr. CONNALLY. Let me say to the Senator that, of course, the Secretary could not act finally upon the plan until he gets the authority of this bill to do so. No plan could be approved in advance.

Mr. CAREY. He could at least approve the plan, and say that if the bill shall be enacted he will carry out the plan.

Mr. CONNALLY. No; I think the Secretary would have been very unwise if he had done that before being given authority to do it.

Mr. CAREY. I should like to ask another question, and that is in regard to the processing tax. Is it not true that nearly all the representatives here were opposed to the processing tax?

Mr. CONNALLY. My information is that, of course, most of them were against the processing tax; and that is only natural, because if they can get a $200,000,000 appropriation out of the Treasury and get the benefit of enhancement of the price and not pay any processing tax, of course they would rather do it; but, at the same time, we must recognize that this is being done for the industry, and the industry is willing to do its part. The Government cannot continually subsidize industries out of the Treasury. Does that answer the Senator?

Mr. CAREY. Yes; but I want to ask the Senator one other question. The Agricultural Adjustment Act provides, in section 9 (a) that—

> When the Secretary of Agriculture determines that rental or benefit payments are to be made with respect to any basic agricultural commodity, he shall proclaim such determination, and a processing tax shall be in effect with respect to such commodity from the beginning of the marketing year therefor next following the date of such proclamation.

I think that means that no one could receive any benefits under this act unless a processing tax were levied. There would have to be immediately a processing tax of some kind.

Mr. CONNALLY. Let me say to the Senator that section 12, subdivisions (a) and (b)—and I have an amendment on that particular point—will authorize the Secretary to use this fund to make rental or benefit payments, or to carry out any of the powers provided in subsections (a) and (b) of that section, which would not require, necessarily, the levying of a processing tax. I ask to have the amendment printed and lie on the table.

The PRESIDING OFFICER. The amendment will be printed and lie on the table.

Mr. CONNALLY. Does that answer the Senator on that point?

Mr. CAREY. Yes.

Mr. MURPHY. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. MURPHY. The Senator from Nevada pictured the condition of the cattle growers admirably, and I am in entire sympathy with the proposal to do something for their relief, and believe in the necessity of doing it. The Senator from Texas has admitted that the tax to be imposed will be paid by the industry.

Mr. CONNALLY. If it is levied.

Mr. MURPHY. If it is levied; and my understanding is, from the testimony of Mr. Davis before the Committee on Agriculture, that it is the purpose of the Department of Agriculture to impose this tax at once.

We adopted the processing tax in the case of hogs, and there was no admission that that tax would be paid by the producer. On the contrary, there was the assumption, if not the explicit understanding, that the tax would be paid by the consumer. The tax is not being paid by the consumer, because there is a surplus production of a perishable commodity which must move into commerce. So that if we do enact this bill, it will be with the frank understanding and the admission that the industry is going to pay the tax and not the consumer, and that there is no bounty to the agricultural industry carried in the bill.

A processing tax imposed ad libitum by the Department of Agriculture may bespeak the continuance of low prices. We, in Iowa, with the processing tax on hogs, have endured a continuation of low prices, of bankruptcy prices.

An elaborate compilation of figures has been made by the Department of Agriculture showing that from last September 1 to February 2 hogs, on the basis of a week-end average, have sold for something like 47 cents more per hundred. Naturally, they would sell for more, because in that period the Federal Government bought 400,000,000 pounds of pork, and there was an increased consumption beyond that of 100,000,000 pounds.

The processing tax on pork has been paid out of the producer almost in full. It ought to appear in the RECORD that the hog farmer has not benefited out of the Treasury of the United States, that he has paid out of one pocket in the

reduced price received for what he sells, what will be paid back to him in benefits for the reduction of his production.

Mr. President, this is a situation which I think we ought to take cognizance of at a time when we say that the Federal Government itself is doing so much for agriculture, and we ought to appropriate out of the Treasury something for the relief of the agricultural industry.

I think this bill should be amended to provide more money, and to take money out of the Federal Treasury for the relief of the cattle feeder and the dairy farmer, and in the full measure possible. If I knew at what point to fix the price, I would provide that the Department of Agriculture should be estopped from imposing a processing tax until that point should be reached. However, so many factors intervene that I have not proposed such an amendment, and I will ask the Senator to be tolerant of, and sympathetic to, an amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE] for an appropriation for the relief of dairy farmers.

Mr. CONNALLY. Mr. President, let me say, in reply to the Senator from Iowa as to whether the processing tax will be paid by the consumer or the producer, of course, nobody can tell about matters of that kind. We always talk about the consumer having to bear all the costs. The producer thinks all the charges come out of him. There is no way of drawing a line of demarcation, because there are so many other factors entering into the problem. For instance, in the matter of hogs, the Senator says that all the processing tax on hogs comes out of the producer.

Mr. MURPHY. Practically all.

Mr. CONNALLY. Of course, if there is a scarcity of hogs and prices should go up, the consumer would be paying the increased cost. If there is a surplus and prices go down, of course, the producer feels that he is paying the tax. In the case of hogs, the pigs which were killed last summer under the program of handling hogs did not raise the price at that time because they were not then marketable. They would not have come upon the market until this past fall or the present winter, so we cannot judge the effect of killing those hogs on the prices of hogs at that particular time, except for the psychological urge it might have given to the hog market in general.

Mr. HATCH. Mr. President, is it not true that at the meeting referred to by the Senator from Iowa Mr. Davis did state that the effect of the processing tax on hogs had not yet had time to be shown and demonstrated, just along the line the Senator is speaking of now and that it would not be until later on that the effect would be demonstrated?

Mr. CONNALLY. I thank the Senator from New Mexico for drawing my attention to that particular aspect. Of course, as I undertook to suggest, there has not yet been time for the producer to get the benefit of the processing tax.

Let me say to the Senator from Iowa, further, that the bill contemplates something more for the producer of cattle than the mere processing tax and trying to get that money back into the Treasury. It contemplates marketing agreements by the producers of livestock under which they will be able to get more from the packers or the purchasers of cattle than they are getting now.

Mr. PITTMAN. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. PITTMAN. One of the weapons the Government must have in hand on behalf of the cattle growers of this country is such a weapon as the control of the packers of this country.

Mr. CONNALLY. To be sure.

Mr. PITTMAN. The Livestock Association, representing probably 35 percent of the livestock of this country, did try to benefit the livestock industry by enabling it to get rid of the surplus, "shelly" cattle and the old dairy cattle, by virtue of a marketing agreement with the packers of this country. They preferred that to this method. But, as I have said, the packers were arbitrary in the matter, in my opinion; they did not have to act; there was no power of the Government to make them act. They are in a far more independent position than any raiser of cattle can possibly be. They sell at a profit, no matter what the price of cattle is. This weapon provided here may never be used, but it is a weapon in the hands of the Government which may force what the cattlemen would rather have had than this; and if it does, then this need not be used. But I want to say that it is a lot easier to control the production of cattle where there is only an annual increase than it is to control the production of pigs, whose increase, I believe—and the Senator from Iowa will know much better than I about this—is very much more rapid.

Mr. CONNALLY. Mr. President, let me say to the Senator from Nevada that I was undertaking to point out to the Senator from Iowa that the marketing agreements which will be worked out, and which authority is given to the Secretary to work out under the bill, are the very heart of the measure. The cattlemen, on the one side, are confronted with a highly organized group of packers. The packers absolutely control the market. But if the Secretary of Agriculture, along with the producers, has an instrumentality by which he can work out marketing agreements, there can be some control over the markets, and they will in some degree be able to protect themselves from the packers.

Mr. O'MAHONEY. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield.

Mr. O'MAHONEY. The discussion has veered back and forth so rapidly between the processing tax and the packers that it has been rather difficult to follow. But, adverting to what the Senator from Nevada has said about the necessity for control of the packers, and what the Senator from Texas has said on the same subject, I wonder why it is, if the activities of the packers are responsible for present conditions, we do not have a bill reported by the committee undertaking to establish some form of control over them, instead of a bill providing for control over the cattlemen.

As I understand the statement of the Senator, the purpose of the Secretary, if this authority is granted to him, is to levy a processing tax only if the cattlemen agree. Is that correct?

Mr. CONNALLY. The Senator from Texas did not go that far.

Mr. O'MAHONEY. I want it clear in my own mind just how far the Senator did go.

Mr. CONNALLY. Let me say to the Senator from Wyoming that I stated in the early part of my remarks that I could not, of course, give any assurance to the Senate as to what the Secretary of Agriculture might or might not do with reference to the levying of a processing tax. I did say this: It is the attitude and the intention of the Secretary of Agriculture, before he formulates any plan of operation under the bill or determines upon the levy of a processing tax, to call in representatives of both the beef-cattle and the dairy-cattle industries and to work out with them, if possible, a plan of procedure under this bill.

I also have the boldness to assert that I regarded the Secretary as entertaining entire sympathy with the program and entire sympathy with trying to work out a plan that would be helpful and beneficial to these industries, and that he would approach the problem in that sort of spirit. That is as far as the Senator from Texas can go.

Mr. O'MAHONEY. Then may I ask, Mr. President, how the Secretary of Agriculture is to determine what the desires of the cattlemen are in this respect, and what cattlemen and what representative does he propose to call into conference?

Mr. CONNALLY. I shall say to the Senator from Wyoming that, of course, he cannot call a convention of all the cattlemen from over all the United States, but he will call a conference of representatives of the various associations. On the floor of the Senate I do not undertake to go over the head of the Senator from Wyoming and undertake to say what the people of Wyoming want. I look upon the Senator from Wyoming as the embodiment of the views and the sentiments and the impulses of the people of Wyoming, and therefore I accept his statement as to the attitude of his people. The Secretary of Agriculture no doubt would call in the presidents of the various State livestock associations, the various dairying associations, and he would assume that

they are speaking for their associations or for their members.

Mr. O'MAHONEY. The Senator presents a measure which clothes the Secretary with certain authority, and at the time that he presents it he tells us in effect, does he not, that the Secretary will be slow to use that authority?

Mr. CONNALLY. No.

Mr. O'MAHONEY. There is nothing in the bill, is there, to define how this authority will be used?

Mr. CONNALLY. Let me say to the Senator that I tried to point a while ago that there is something more to the bill than levying a processing tax. The Secretary is first given a fund of $200,000,000 to work out his marketing agreements or to take such other measures as he may see fit. Later on the question of whether it will be necessary to levy a processing tax will come around.

Mr. CAREY. Mr. President——

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Wyoming?

Mr. CONNALLY. I shall yield in just a moment. I cannot give the Senator any further assurances than I have already given him. Let me say this, however, to the Senator from Wyoming. Every grant of power carries with it a responsibility. That responsibility must be lodged somewhere. We cannot look into the future when we pass measures conferring powers upon departments of government, and put down in black and white just what shall be done. If we were to do that there would be no occasion to put the authority in anybody but ourselves. The Senator is bound to know that this question is so intricate that it cannot be worked out in advance and put down in the form of a statute. We must give the Secretary of Agriculture discretion, just as we give the head of a great corporation who is managing a business, discretion; we must give him the power to render decisions and to exercise his judgment to meet contingencies that are not foreseen. We cannot foresee what is going to happen every day of the year and tie the hands of the Secretary and say, "You have got to dot the "i" and cross the "t." We must give him some authority so that when he meets a problem in the middle of the road, a problem no one knew was going to arise, we can trust his intelligence and his judgment and his honesty and his patriotism to do what he thinks the circumstances require.

I now yield to the senior Senator from Wyoming.

Mr. CAREY. Mr. President, I wish I had the faith that the Senator from Texas has in what the Secretary of Agriculture might do.

Mr. CONNALLY. The Bible says that faith can move mountains. I hope the Senator from Wyoming will get a little such faith.

Mr. CAREY. I should like to read from the testimony of the Secretary before the House committee in reply to a question by Congressman HOPE. The Secretary said:

> I can agree with you, Congressman HOPE, that through a great program, involving a vast expenditure of time and money that it will require the sympathetic cooperation of the great bulk of the cattlemen to make it really effective. And I am inclined to think that it might be just as well, in case of the cattlemen, to make cattle a basic commodity now, and after that let the thing lay there until next fall, do nothing; just let the cattlemen suffer from low prices, and go ahead and let the whole thing wait to see whether they want a processing tax; let them stew and see how the corn-hog thing comes out, and next fall formulate something, if they want to go without the processing tax, and next fall, when hog prices go up and there has been an increase in hog production and consumption of hog meat and perhaps a shift to the consumption of beef and a compensatory tax is put on cattle, then I think they would like to have the bill, making cattle a basic commodity, so they can avoid the compensatory tax going on cattle.

Mr. CONNALLY. Does the Senator approve that statement?

Mr. CAREY. Naturally, I do not approve the statement; but when the Senator speaks of what the Secretary will do, and that we must trust the Secretary, I will say that I do not like the idea of making cattle a basic commodity and letting the cattlemen stew, as the Secretary suggests, until they get into a lot of trouble; and then the processing tax, he says, will do in that particular case.

Mr. CONNALLY. The Senator condemns the statement of the Secretary of Agriculture when he says, "Do nothing; just let the cattlemen suffer from low prices." He condemns that statement; yet that is the attitude of the Senator. If the bill does not pass, what is going to happen to the cattlemen? They will go on just as the Secretary of Agriculture indicated. Nothing can be done. They will have low prices, and by next fall, I have no doubt, they will be appealing for the Congress to do something for them. What does the Senator propose?

Mr. CAREY. No; let us go by what has happened before. In the case of hogs, with the expenditure of $35,000,000, with the Government pegging the market every day, buying a large proportion of the hogs—the Government bought as many as 150,000 a week—the price of hogs was increased just 12 cents a hundred with all this enormous program and this vast expenditure. Considering the fact that the processing tax is paid by the producer, I think the cattleman would be better off, and I would rather see him paddle his own canoe than to be under an act of this kind.

Mr. CONNALLY. The Senator from Wyoming wants the cattleman to continue to paddle his own canoe. He has been paddling it. Let us see where he has arrived:

> LIVESTOCK IN CHICAGO
>
> CHICAGO, March 5.—While good yearling cattle sold generally at steady prices, rank-and-file steers were generally 15 to 25 cents lower, with the latter in slow demand. The top was $7.50—

That is some very fancy stuff, I understand—

> with main sales at $4.75 to $6.50.

I ask to have the rest of the clipping inserted in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

> [From the New York Times of Tuesday, Mar. 6, 1934]
>
> While good yearling cattle sold generally at steady prices, rank-and-file steers were generally 15 to 25 cents lower, with the latter in slow demand. The top was $7.50, with main sales at $4.75 to $6.50. Receipts were 15,000, with 7,000 estimated for tomorrow.
>
> Heavier receipts of lambs caused a break in prices, late bids easing 40 to 50 cents. A few lots sold at $9.50 early, but packers were offering only $9.40 and under. Sheep were steady at $3.75 to $5.25. Receipts were 19,000, with 11,000 estimated for tomorrow.

Mr. CONNALLY. Mr. President, the cattleman has been paddling his own canoe, and he has paddled it to the point where cattle have been at the lowest price for years and years and years. If he continues to paddle it, the chances are the cattlemen will get no corresponding advance in their prices along with the prices of other commodities under the Agricultural Adjustment Act.

Senators speak about hogs. They say that the prices of hogs are raised only 12 cents a hundred pounds. Who can say how much the prices of hogs would have declined had they not done something about it?

It is easy for Senators to assume that because the price did not go up, therefore no good has been accomplished. Let me inquire, Where is the Senator so wise, where is the Senator with judgment so keen, where is the Senator with perspicacity so penetrating, as to be able to say what would have happened to hogs had there been no processing tax, or had they had no help under the agricultural program? The price might have been lower. It might have declined to still more ruinous levels. Who is it that knows? It is just like the question as to whether the consumer or the producer pays the processing tax. Nobody has yet been wise enough to say how that occurs or who pays the tax.

Mr. President, I know that the cattlemen of my State want the bill enacted. They did not want to come under the Agricultural Adjustment Act at the time that bill was passed. Subsequently, however, they saw other farm commodities rising in price. They saw the Department of Agriculture doing things for other industries, and they saw cattle remain at low figures. They saw the prices remain at

lower levels than at any time for years and years; and so they changed their minds, and they now want to come under the Agricultural Adjustment Act.

The cattlemen held a meeting in Albuquerque, in the State of the Senator from New Mexico. Forty-five leading cattlemen of my State were there. Out of the 45, 40 voted to come under the Agricultural Adjustment Act. I dare say the cattlemen from New Mexico who were at that meeting voted likewise.

Mr. CAREY. Mr. President——

Mr. CONNALLY. I must first yield to the Senator from New Mexico [Mr. CUTTING], because I involved him in the discussion.

Mr. CUTTING. I quite appreciate the difficulty in which the Senator from Texas and Senators from similar States find themselves. The trouble is, I believe, that a great many of the cattlemen have doubts in their own minds as to just how far they want to go in this matter.

However, what I rose to inquire is this. The Senator spoke a good deal about marketing agreements. The bill, as it has been printed, does not seem to have any reference to marketing agreements. It deals with questions of production only.

Mr. CONNALLY. I have sent to the desk an amendment, which provides that all other sections of the Agricultural Adjustment Act shall apply to cattle, which, of course, would include the making of marketing agreements.

Mr. CUTTING. I think that is a very important point.

Mr. CONNALLY. That is pending, and I expect to offer it formally when we reach that part of the bill.

Mr. CUTTING. I am very glad to have that assurance from the Senator, because I think that will perhaps help the stockmen as much as any other thing.

Mr. CONNALLY. I quite agree with the Senator. If he had been here during the earlier part of my remarks, he would have heard me say that I think the power of the Secretary and of the beef and dairy industries to make these marketing agreements is the very heart of the bill, because they can get more consideration from the packers.

I yield now to the Senator from Wyoming, who has been on his feet quite a little time.

Mr. CAREY. Mr. President, the Senator said several times that it is necessary to have the bill in order to enter into marketing agreements under the packers' code. I do not think that is true. I think it is possible under the present law to have a packers' code. In fact, the stockmen and the packers worked on such a code last August and September, and I believe the code has not been worked out largely because the Department of Agriculture was indifferent to such a code. The Secretary of Agriculture would not agree to it.

The Senator made a statement as to a meeting in Albuquerque. There was a meeting in Albuquerque of the American Livestock Association, an association composed of stockmen from the Western States. There was no vote taken in that meeting with reference to making cattle a basic commodity. The meeting to which the Senator referred was a group of Texas men, of whom the large majority were favorable to making cattle a basic commodity; but the question was not brought up at the meeting of the American Livestock Association, and they were very much divided as to whether they wanted it or not.

Mr. CONNALLY. If the Senator understood me to say they had a vote of the National Livestock Association, the fault was mine in not making myself clear. What I intended to say was that 40 of the 45 Texans who appeared at that meeting voted, but it was in their own group meeting. The national association did not vote on that matter at all. It took the position that it would take no action itself, but would refer the matter back to each State or regional association which was a member of the national.

Mr. CAREY. I believe that is correct.

Mr. BANKHEAD. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Texas yield to the Senator from Alabama?

Mr. CONNALLY. I yield.

Mr. BANKHEAD. A question asked by the Senator from New Mexico [Mr. CUTTING], with reference to the application of the marketing agreement plan, prompted me to indicate to the Senator from Texas my construction and ask his opinion. I have not a copy of the Agricultural Adjustment Act before me, which section 1 of the pending bill purports to amend. As I recall, the inclusion of the word "cattle" in that section simply adds cattle to the other basic agricultural commodities.

Mr. CONNALLY. That is correct.

Mr. BANKHEAD. With that word added, all the provisions of the Agricultural Adjustment Act would apply to cattle just as they do to other basic agricultural commodities, including the provision applicable to marketing.

Mr. CONNALLY. I shall say in reply to the Senator from Alabama that his construction is identical with mine except that in the second section of the bill, which carries the appropriation, it is provided that the appropriation may be used for the purpose of carrying out any of the objects and purposes of the bill.

Mr. BANKHEAD. But all the other provisions of the original act will then apply to cattle?

Mr. CONNALLY. Yes; the general provisions will then apply.

Mr. President, I have just consulted with the Senator from Arkansas [Mr. ROBINSON] and it is agreeable to me to suspend at this time with the understanding that we shall proceed with the consideration of the bill tomorrow.

FREEDOM OF THE PRESS

Mr. SCHALL. Mr. President, no dictatorship can long endure in a country which has freedom of the press. Until the discovery of the art of printing in the fifteenth century, and the first printing press of Gutenberg in 1450, the dictators had a comparatively free hand in dominating the people. There was no public medium for crystallizing public opinion against imperial outrages.

The printing press is the foundation of modern democracy. Therefore, the first step of the new-deal dictatorship—that of Mussolini, Stalin, Hitler, and that now developing in our own land—is to set up a press censorship, radio control, and finally a Federal domination of all sources of public communication.

I fear that Senate bill 2910, to provide for the regulation of interstate and foreign communication by wire or radio, is in harmony with the purpose to centralize authority for control of all press dispatches, all press associations, all transmissions of news, and create another Federal bureau to place all interstate communication under the censorship and secrecy ban of a Federal autocracy.

That is precisely what Mussolini did under his drastic press censorship edict that went into effect January 1, 1925. He quickly realized that his grip on the people of the self-governing communes could not be maintained under freedom of the press, the radio, and other instruments of public communication. Stalin had already done the same thing; and today Hitler and our own emergency rule are doing likewise, despite the guaranty of our Constitution.

What was the result of the Mussolini new-deal censorship? Even under a king, Italy, pursuant to her constitution, had 7,312 self-governing communes. Mussolini, under the secrecy ban of press censorship and control of communications, abolished every one of these 7,000 self-governing communes. By October 1925, only 9 months after the press-censorship edict, even the municipality of Rome itself was deprived of self-government, and all Italy was directly subject to one man, Mussolini. The king and all his dukes had been placed on pensions provided by the loans of Wall Street. Every form of self-government had been abolished, because the people had no free press, no uncensored communication.

The capitalistic London Morning Press frankly expressed the condition under its editorial forecast of 2 years before, when it published the Mussolini eulogy that he had "cast all constitutional figments to the winds."

Doubtless that editorial eulogist of Mussolini may soon say the same thing for the present American regime and

tell the world that we have abolished the constitutional figment that reads:

> Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

When the press of the country demanded that this guaranty should be included in the press code now pending, the White House refuses to allow article I and its freedom of the press to go into the code. The press receives a rebuff, accompanied by an insulting allusion, unworthy of a President, that press freedom—

> is not freedom to work children or to do business in a fire trap or violate the laws against obscenity, libel, and lewdness.

No publisher had asked for exemption from these laws. Indeed, it was the American press that originally had secured the adoption of such laws for the security of clean journalism. All that American publishers asked of the President was that the constitutional guaranty of freedom of speech and of the press be preserved in the press code. The White House's answer to the American press is that the freedom-of-the-press clause has no more place here than the Ten Commandments. The President sets up his own imperial word as a higher authority than the Constitution.

In the radio censorship bill, even the utterances of a candidate for public office are subject to Federal license rules. Again the straw excuse is advanced that it is to protect the public from obscenity and lewdness in campaign speech. The reports of public investigations are subject to radio license. The contents of a referendum to voters are subject to license. All press despatches come under a Federal license law.

A licensed press is not a free press. A licensed radio broadcast is not the freedom of speech guaranteed by article I of the bill of rights, drafted by the first Democrat, Thomas Jefferson.

It is indeed a far cry from Thomas Jefferson to a Federal censorship; from Abraham Lincoln to a Federal Bureau of Communications; from Washington to "Crack-Down" Johnson.

At the editorial masthead of the Chicago Tribune appears the declaration of Richard Brinsley Sheridan against the British autocracy from which American patriots rebelled in '76. Said Sheridan to the British Premier:

> Give me but the liberty of the press and I will give to the minister a venal House of Peers. I will give him a corrupt and servile House of Commons. I will give him the full swing of the patronage of office. I will give him the whole host of ministerial influence. I will give him all the power that place can confer upon him, to purchase up submission and overawe resistance; and yet, armed with the liberty of the press, I will go forth to meet him undismayed. I will attack the mighty fabric of that mightier engine. I will shake down from its height corruption, and bury it beneath the ruins of the abuses it was meant to shelter.

This utterance of Sheridan should be nailed to the walls of Senate and House to guard the portals of this Republic against the consummation of that dictatorship which first begins in a pretended emergency which already aspires to be permanent; and the name of a permanent emergency dictator, as disclosed by the precedents of 30 centuries, is emperor.

There is only one article of the Constitution that a would-be American emperor, even in control of all branches of the Government, today has to fear, and that is article I of the American bill of rights—that Congress shall make no law abridging the freedom of speech or of the press.

Besides the press code, the radio code, and this bill providing for a new bureau of communications—the latest of about 57 bureaus, corporations and administrations of the new bureaucracy—the administration has yet one other method for domination of the press.

The existence of a daily newspaper or magazine depends upon its business office. The business of a newspaper depends upon its bank credit. Control of the banks means control of all business enterprises, including the newspaper business. This administration has already expended something like $1,000,000,000 in the preferred stocks of over 5,000 banks. The other day the Chase National, formerly known as the "Wiggins bank", issued $50,000,000 of new preferred stock to be sold to the Treasury through the R.F.C.

Thus the freedom of the American press under article I of the Bill of Rights is not only to be hog tied by a press censorship code and hamstrung by a licensed radio and licensed control of interstate dispatches, but its financial existence is threatened by Federal ownership of the bank that has power to close down the newspaper.

This is perhaps the only method by which the temporary or emergency dictatorship can succeed in its declared aim to be declared permanent.

These moves to control the press have a sinister significance at this time, just before the congressional primaries that are to usher in the fall congressional elections. If the press-control program is consummated, it is useless to hold any election. An election under a press-dominated regime here will be as meaningless as under Mussolini, Hitler, Stalin, or any other dictatorship.

Threatened press domination is the new deal that threatens the calamity named by Lincoln at Gettysburg—"that government of the people, by the people, and for the people may not perish from the earth."

Mr. President, I ask leave to insert in the RECORD following my remarks an item from the Chicago Daily News relative to the matter of the freedom of the press; and I ask that both my remarks and this news item be referred to the Committee on Interstate Commerce, to which Senate bill 2910 has been referred.

There being no objection, the foregoing remarks, together with the news item, were referred to the Committee on Interstate Commerce, and the item was ordered to be printed in the RECORD, as follows:

[From the Chicago Daily News of Feb. 28, 1934]

SCHALL FINDS NEW MENACE OF CENSORSHIP—WIRE-CONTROL BILL HITS AT FREE PRESS, SENATOR WARNS

WASHINGTON, D.C., February 28—Senator Schall (Republican, Minnesota) said in a statement today that newspapers are confronted with censorship by the demand of President Roosevelt for a Federal communications commission.

"The newspapers of the United States", he said, "are about to have themselves censored. After battling for months to force the Roosevelt administration to guarantee freedom of the press in the publishers' code, they now find themselves confronted with the very same censorship by the demand of the President for a Federal communications commission.

"Under such a commission every press dispatch and every cable message can be censored by the administration. What have the newspapers gained by their code fight if they permit their news dispatches to be censored?

"With such a system as suggested by the President, not one word of the skullduggery committed in Washington could reach the people of the United States.

"Not a publisher up to date has sensed the danger in the demand sent to Congress.

"What the newspapers and the people of the United States need most at the present moment is a legislative bureau in Washington to follow all legislation introduced and see to it that the dictatorship now in the making is thwarted."

KNOX PRAISES SCHALL FOR REVEALING DANGER

The statement of Senator SCHALL that a Federal communications commission would inflict censorship on the press was "a real public service", Frank Knox, publisher of the Chicago Daily News, said in a statement today. He thanked the Senator for "directing public attention to the latest manifestation in Washington of a desire to control the sources of public information.

"The bureaucratic Federal control of all means of communications", said Knox, "can readily be converted into an efficient machine for censorship overnight. That the desire exists to exercise such a censorship can no longer be doubted. It has shown itself in a dozen different directions.

"It was only through the insistence of the newspapers that a complete freedom of the press was maintained in the formulation of a newspaper code. If this new danger is to be averted, it will only be because the newspapers militantly oppose these latest plans of the power-hungry bureaucrats in Washington for complete domination under a centralized Federal bureaucracy.

"I have no fear that the proposed censorship can be established, because I do not believe that an aroused public opinion will permit resort to precisely the methods employed by dictators in Europe to establish and maintain their supremacy. I utterly refuse to believe that Fascism of this type is possible in America."

CLAIM OF POTOMAC ELECTRIC POWER CO.

The PRESIDING OFFICER (Mr. McKELLAR in the chair) laid before the Senate the amendments of the House of Representatives to the bill (S. 1083) authorizing adjustment of the claim of the Potomac Electric Power Co., of Washington, D.C., which were, on page 1, line 10, after the sum "$2,157.25", to insert "in full settlement of all claims against the Government of the United States"; on page 1, lines 10 and 11, to strike out "in full and final settlement of said claim"; and on page 1, line 14, after the word "claim", to insert:

Provided, That no part of the amount appropriated in this act in excess of 10 percent thereof shall be paid or delivered to or received by any agent or agents, attorney or attorneys, on account of services rendered in connection with said claim. It shall be unlawful for any agent or agents, attorney or attorneys, to exact, collect, withhold, or receive any sum of the amount appropriated in this act in excess of 10 percent thereof on account of services rendered in connection with said claim, any contract to the contrary notwithstanding. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

Mr. BAILEY. I move that the Senate concur in the House amendments.

The motion was agreed to.

RECONNAISSANCE SURVEY FOR AN INTER-AMERICAN HIGHWAY

The PRESIDING OFFICER laid before the Senate a message from the President of the United States, which was read, and, with the accompanying papers, referred to the Committee on Post Offices and Post Roads, as follows:

To the Congress of the United States:

I transmit herewith two copies of a report prepared by the Bureau of Public Roads, Department of Agriculture, a letter of transmittal addressed to the Secretary of State by the Secretary of Agriculture, and a letter from the Secretary of State concerning a reconnaissance survey for an inter-American highway.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 6, 1934.*

[Enclosures: Two copies of report on inter-American highway; from Secretary of Agriculture, Jan. 25, 1934; from Secretary of State to the President.]

EXECUTIVE SESSION

Mr. ROBINSON of Arkansas. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. McKELLAR in the chair) laid before the Senate several messages from the President of the United States submitting nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

Mr. ROBINSON of Arkansas (for Mr. McKELLAR), from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

Mr. HARRISON, from the Committee on Finance, reported favorably the following nominations:

Thomas Temple Hoyne, of Chicago, Ill., to be comptroller of customs in customs collection district no. 39, with headquarters at Chicago, Ill., in place of Leslie L. Glenn; and

William J. O'Brien, of Buffalo, N.Y., to be collector of customs for customs collection district no. 9, with headquarters at Buffalo, N.Y., in place of Fred A. Bradley.

The PRESIDING OFFICER. The reports will be placed on the calendar.

THE CALENDAR

The PRESIDING OFFICER. The calendar is in order.

NOMINATIONS PASSED OVER

Mr. ROBINSON of Arkansas. Mr. President, I ask that the first two nominations on the calendar—Robert H. Jackson to be general counsel, Bureau of Internal Revenue, and Daniel D. Moore to be collector of internal revenue, district of Louisiana—be passed over for the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

DIPLOMATIC AND FOREIGN SERVICE

The legislative clerk read the nomination of J. Butler Wright, of Wyoming, to be Envoy Extraordinary and Minister Plenipotentiary to Czechoslovakia.

Mr. O'MAHONEY. Mr. President, I desire the RECORD to show that Mr. J. Butler Wright is a career man, that he entered the service of the State Department several years ago, and has been in that service continuously ever since.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of George S. Messersmith, of Delaware, to be Envoy Extraordinary and Minister Plenipotentiary to Uruguay.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of John C. Wiley, of Indiana, to be consul general.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of George C. Hanson, of Connecticut, to be secretary in the Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Angus I. Ward, of Michigan, to be secretary in the Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Charles E. Bohlen, of Massachusetts, to be secretary in the Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

THE JUDICIARY

The legislative clerk read the nomination of John B. Colpoys to be United States marshal, District of Columbia.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of John B. Keefe to be United States marshal for the northern district of Iowa.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

POSTMASTERS

The legislative clerk proceeded to read the nominations of sundry postmasters.

Mr. ROBINSON of Arkansas. I ask that the several nominations of postmasters be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations of postmasters will be confirmed en bloc.

IN THE ARMY

The legislative clerk proceeded to read sundry nominations in the Army.

Mr. SHEPPARD. I make the same request as to the Army nominations.

The PRESIDING OFFICER. Without objection, the Army nominations will be confirmed en bloc.

That completes the calendar.

INCLUSION OF CATTLE AS A BASIC COMMODITY

The Senate, in legislative session, resumed the consideration of the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes.

RECESS

Mr. ROBINSON of Arkansas. I move that the Senate take a recess until 12 o'clock noon tomorrow.

The PRESIDING OFFICER. The question is on the motion of the Senator from Arkansas.

The motion was agreed to; and (at 5 o'clock and 10 minutes p.m.) the Senate took a recess until tomorrow, Wednesday, March 7, 1934, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 6 (legislative day of Feb. 28), 1934

ENVOY EXTRAORDINARY AND MINISTER PLENIPOTENTIARY

Frank P. Corrigan, of Ohio, to be Envoy Extraordinary and Minister Plenipotentiary of the United States of America to El Salvador.

UNITED STATES CIRCUIT JUDGE

Florence E. Allen, of Ohio, to be United States circuit judge, sixth circuit, to succeed Smith Hickenlooper, deceased.

COLLECTOR OF CUSTOMS

Bernice Pyke, of Cleveland, Ohio, to be collector of customs for customs collection district no. 41, with headquarters at Cleveland, Ohio, to fill an existing vacancy.

REGISTER OF THE LAND OFFICE

Paul Witmer, of California, to be register of the land office at Los Angeles, Calif., vice John Robert White.

PROMOTIONS IN THE NAVY

MARINE CORPS

The following-named meritorious noncommissioned officers to be second lieutenants in the Marine Corps, revocable for 2 years from the 2d day of March 1934:

Corp. William M. Hudson
Corp. Frederic H. Ramsey
Corp. Reynolds H. Hayden
Corp. Charles A. Miller

CONFIRMATIONS

Executive nominations confirmed by the Senate March 6 (legislative day of Feb. 28), 1934

ENVOYS EXTRAORDINARY AND MINISTERS PLENIPOTENTIARIES

J. Butler Wright to be Envoy Extraordinary and Minister Plenipotentiary to Czechoslovakia.

George S. Messersmith to be Envoy Extraordinary and Minister Plenipotentiary to Uruguay.

CONSUL GENERAL

John C. Wiley to be consul general.

SECRETARIES IN THE DIPLOMATIC SERVICE

George C. Hanson to be secretary in the Diplomatic Service.

Angus I. Ward to be secretary in the Diplomatic Service.

Charles E. Bohlen to be secretary in the Diplomatic Service.

UNITED STATES MARSHALS

John B. Colpoys to be United States marshal for the District of Columbia.

John B. Keefe to be United States marshal for the northern district of Iowa.

APPOINTMENTS, BY TRANSFER, IN THE REGULAR ARMY

Capt. Frank Huber Partridge to Adjutant General's Department.

Second Lt. Douglas Glen Ludlam to Ordnance Department.

Second Lt. Harry Hollingsworth Geoffrey to Air Corps.

APPOINTMENTS BY PROMOTION IN THE REGULAR ARMY

Laurence Verner Frazier to be colonel, Corps of Engineers.

Jacob Loucks Devers to be lieutenant colonel, Field Artillery.

Larry McHale to be major, Field Artillery.

Engmann August Andersen to be captain, Quartermaster Corps.

John James Earle, Jr. to be first lieutenant, Coast Artillery Corps.

Robert Frederick Tate to be first lieutenant, Air Corps.

POSTMASTERS

CALIFORNIA

Owen Kenny, Calistoga.
Harry S. Markofer, Elk Grove.
Leslie A. Johnson, Escalon.
Edith A. Knudsen, Klamath.
Sidney F. Horrell, Moneta.
Edith B. Smith, Patton.

KENTUCKY

Benjamin F. Turner, Outwood.

LOUISIANA

Ernest B. Miller, Denham Springs.
Sylvester J. Folse, Patterson.

MAINE

Milton Edes, Sangerville.

MINNESOTA

Lambert J. Dols, Cologne.
Anton Malmberg, Lafayette.
Ruth Stevens, St. Paul Park.

MISSISSIPPI

Lewis F. Henry, Carthage.
Aaron B. Johnston, Enid.
Johnnie L. Posey, Philadelphia.

MISSOURI

Nat M. Snider, Cape Girardeau.
Elizabeth Farnan, Clyde.
Ora Lee Dean, Dearborn.
Joseph F. Hargis, Downing.
James P. Moore, Liberal.
Theodore G. Robinson, Maryville.

NEBRASKA

Frank A. Moon, Fairbury.

HOUSE OF REPRESENTATIVES

TUESDAY, MARCH 6, 1934

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D.D., offered the following prayer:

O Father, Lord of heaven and earth, help us to feel that the life of our fellow man is a part of our own; unite us to him by a common center, and may we experience his burden as our burden, his joy as our joy. O give us the charity to ever champion his rights. Send Thy Spirit to make us ready for the duties of this day and gladden and strengthen us within. Do Thou increase the power of our resistance, our faith, blessed Lord, so that trifles or obstacles may not disturb us, may not annoy us. Intensify our love for our country and for its wonderful traditions. We praise Thee that Thou hast a crown for the uncrushed soul, a wreath for the unwithered heart, and a laurel for the undimmed love for Thee. Heavenly Father, above all these things, let us feel eternity in our hearts, and then we shall step bravely through the gates of time, and Thine shall be the everlasting glory. In the name of the world's Savior. Amen.

CALL OF THE HOUSE

Mr. LEHLBACH. Mr. Speaker, I make the point of no quorum.

The SPEAKER. Evidently there is not a quorum present.

Mr. WOODRUM. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 99]

Abernethy	Colmer	Fitzgibbons	Lesinski
Auf der Heide	Corning	Fulmer	Lewis, Md.
Beiter	Cross, Tex.	Gambrill	McDuffie
Berlin	Crowther	Gillespie	McFarlane
Black	Crump	Goldsborough	McGugin
Brooks	Darrow	Greenway	McLeod
Burke, Calif.	De Priest	Hancock, N.C.	Mansfield
Cannon, Wis.	DeRouen	Hart	Meeks
Carley, N.Y.	Dickstein	Healey	Montague
Cary	Disney	Kelly, Pa.	Norton
Castellow	Doutrich	Kennedy, Md.	Palmisano
Cavicchia	Eltse, Calif.	Kenney	Pou
Claiborne	Evans	Lanzetta	Ramsay
Cochran, Pa.	Farley	Lee, Mo.	Reid, Ill.

Richards	Scrugham	Steagall	Treadway
Robinson, Utah	Seger	Sullivan	Wearin
Rogers, Okla.	Simpson	Thompson, Ill.	Williams
Sadowski	Stalker	Thompson, Tex.	Wilson

The SPEAKER. Three hundred and fifty-nine Members have answered to their names; a quorum is present.

On motion of Mr. BYRNS, further proceedings under the call were dispensed with.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

INTERSTATE AND FOREIGN COMMUNICATION BY WIRE OR RADIO

Mr. BLAND. Mr. Speaker, by authority and direction of the Committee on the Merchant Marine, Radio, and Fisheries, and as chairman of that committee, I move that the reference made by the Speaker on February 27, 1934, to the Committee on Interstate and Foreign Commerce of the bill (H.R. 8301) to provide for the regulation of interstate and foreign communication by wire or radio, and for other purposes, be corrected and that the said bill be referred to the Committee on the Merchant Marine, Radio, and Fisheries.

The SPEAKER. The Clerk will report the motion.

The Clerk reported the motion.

Mr. RAYBURN. Mr. Speaker, I recognize, of course, that except by unanimous consent this motion is not debatable; but the questions involved are so far-reaching and so challenging to the precedents of the House and to the authority of the Speaker to refer measures that I think it would be enlightening to the House if we could have, say, 10 minutes' debate on the side, 10 minutes to be controlled by the gentleman from Virginia [Mr. BLAND] and 10 minutes by myself. I think there are matters that could be developed in even this short time that would certainly make it worth while.

Mr. BLAND. Will the gentleman from Texas not make his suggestion 20 minutes to the side?

Mr. COLLINS of Mississippi. Mr. Speaker, I shall object to 20 minutes to the side. I will not object to 10 minutes to the side.

Mr. BLAND. Will the gentleman from Texas make the time 15 minutes to each side?

Mr. O'CONNOR. Mr. Speaker, will the gentleman from Mississippi yield?

Mr. COLLINS of Mississippi. Certainly.

Mr. O'CONNOR. This is an important question for the House to decide. All these jurisdictional questions are important. The House is not always informed about them. Few Members have examined the precedents. Surely we could spend half an hour on the subject of jurisdiction. This is not asking too much, in spite of the fact we have an appropriation bill pending.

Mr. COLLINS of Mississippi. Mr. Speaker, I shall object to the request of 20 minutes to the side. We must go on with the War Department appropriation bill as agreed to by the House yesterday.

Mr. O'CONNOR. I know; but does the gentleman feel that general debate is of such importance as to take precedence over the question of jurisdiction of a committee over a bill?

Mr. COLLINS of Mississippi. I regret I cannot concur in the request of 20 minutes to each side. I appreciate the desire of the distinguished gentleman from New York, whom I always like to accommodate, but other gentleman have made preparations to speak on the War Department appropriation bill, and these gentlemen should be accorded this opportunity.

Mr. McFADDEN. Mr. Speaker, reserving the right to object, so far as I personally am concerned, I am ready to vote now on the question of the reference of this bill.

Mr. RAYBURN. Mr. Speaker, I object to any argument out of order.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. McFADDEN. Mr. Speaker, I object.

The SPEAKER. The question is on the motion of the gentleman from Virginia.

The question was taken; and on a division (demanded by Mr. BLAND) there were—ayes 108, noes 125.

Mr. BLAND. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 148, nays 212, answered "present" 4, not voting 67, as follows:

[Roll No. 100]

So the motion was rejected.

The Clerk announced the following general pairs:

Mr. Byrns with Mr. Snell.
Mr. Corning with Mr. Darrow.
Mr. Doxey with Mr. Treadway.
Mr. Greenwood with Mr. Englebright.
Mr. McMillan with Mr. Bacon.
Mr. Gambrill with Mr. Seger.
Mr. McDuffie with Mr. Thurston.
Mr. Prall with Mr. Crowther.
Mr. Pou with Mr. Woodruff.
Mr. Cross of Texas with Mr. Cochran of Pennsylvania.
Mrs. Norton with Mr. Cavicchia.
Mr. Goldsborough with Mr. Waldron.
Mr. Black with Mr. Stalker.
Mr. Drewry with Mr. McGugin.
Mr. Auf der Heide with Mr. Peavey.
Mr. Reid of Illinois with Mr. De Priest.
Mr. Ramsay with Mr. Wearin.
Mr. Crowe with Mr. Burke of California.
Mr. Wilson with Mr. Lanzetta.
Mr. Kennedy of Maryland with Mr. Ellenbogen.
Mr. Shannon with Mr. Berlin.
Mr. Carley of New York with Mr. Henney.
Mr. Crump with Mr. DeRouen.
Mr. Williams with Mr. Thom.
Mr. Brooks with Mr. Thompson of Texas.
Mr. Sullivan with Mr. Montague.
Mr. Abernethy with Mr. Lewis of Maryland.
Mr. Greenway with Mr. Duffey.
Mr. Kenney with Mr. Snyder.

Mr. DREWRY. Mr. Speaker, I was not present when my name was called. If I had been present, I would have voted "aye."

Mr. BURCH. Mr. Speaker, I was not present, but I would have voted "aye" if I had been present.

Mr. KRAMER. Mr. Speaker, my colleague, Mr. BURKE of California, is ill and asked me to announce that if he were present he would vote "aye."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

UNFAIR COMPETITION AND PRACTICES IN COTTON INDUSTRY

Mr. BANKHEAD, from the Committee on Rules, reported the following privileged resolution for printing under the rule:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H.R. 8402, a bill to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed 8 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill for amendment the committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, with or without instructions.

Mr. BANKHEAD. Mr. Speaker, may I submit a unanimous-consent request?

The rule that has been presented provides for the consideration of the cotton control bill. A great many Members of the House are interested in the constitutional phases of this legislation, and properly so. May I ask unanimous consent to have incorporated in the RECORD for the benefit of the Members in studying this bill a brief on the constitutionality of the proposed legislation?

Mr. MARTIN of Massachusetts. Mr. Speaker, reserving the right to object, who is the author of this brief?

Mr. BANKHEAD. The brief was prepared by a representative of the Department of Justice, a very able man in the service of that Department.

Mr. MARTIN of Massachusetts. Mr. Speaker, at this time I object. If the gentleman will renew it later, I will think it over in the meantime.

The SPEAKER. Objection is heard.

INVESTIGATION BY COMMITTEE ON MILITARY AFFAIRS

Mr. WARREN. Mr. Speaker, I offer a privileged resolution from the Committee on Accounts and ask for its immediate consideration.

The Clerk read as follows:

House Resolution 284

Resolved, That the expenses of conducting the investigation authorized and directed by House Resolution 275, incurred by the Committee on Military Affairs, acting as a whole or by subcommittee, not to exceed $10,000, including expenditures for the employment of expert, clerical, and stenographic services, shall be paid out of the contingent fund of the House, on vouchers authorized by the committee, signed by the chairman thereof and approved by the Committee on Accounts.

SEC. 2. That the official committee reporters shall serve said committee at its meetings in the District of Columbia.

Mr. WARREN. Mr. Speaker, this is a resolution providing funds for the investigation which was authorized by the House a few days ago to be conducted by the Military Affairs Committee.

We have been promised a thoroughgoing, searching investigation of conditions in the War Department from 1926 to date, letting the chips fall where they will. The committee is unanimous that this amount of $10,000 is most reasonable and necessary to carry out the purposes of the investigation.

Mr. MARTIN of Massachusetts. Will the gentleman yield?

Mr. WARREN. I yield to the gentleman from Massachusetts.

Mr. MARTIN of Massachusetts. I am not opposed to the investigation, but is it understood by the committee that it is not likely they will come back for a further appropriation and that this will be sufficient?

Mr. WARREN. They so stated on the floor of the House.

Mr. Speaker, I move the previous question.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Latta, one of his secretaries, who also informed the House that on the following dates the President approved and signed bills and a joint resolution of the House of the following titles:

On March 2, 1934:

H.R. 5242. An act for the relief of William C. Campbell;

H.R. 6574. An act to repeal Federal liquor prohibition laws to the extent they are in force in Puerto Rico and the Virgin Islands, and for other purposes; and

H.R. 6951. An act making appropriations for the Department of the Interior for the fiscal year ending June 30, 1935, and for other purposes.

On March 5, 1934:

H.R. 7205. An act to provide for the care and transportation of seamen from shipwrecked fishing and whaling vessels;

H.R. 7554. An act to extend the times for commencing and completing the construction of a bridge across the Missouri River at or near Farnum Street, Omaha, Nebr.;

H.R. 7705. An act to extend the times for commencing and completing the construction of a bridge across the Mississippi River between New Orleans and Gretna, La.;

H.R. 6219. An act to repeal certain specific acts of Congress and an amendment thereto enacted to regulate the

manufacture, sale, or possession of intoxicating liquors in the Indian Territory, now a part of the State of Oklahoma;

H.R. 715. An act to award the Distinguished Service Cross to former holders of the certificate of merit, and for other purposes; and

H.J.Res. 278. Joint resolution to amend Public Act No. 81 of the Seventy-third Congress, relating to the sale of timber on Indian land.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate agrees to the amendments of the House to the bill (S. 407) for the relief of Willie B. Cleverly.

JOHN O. SNYDER

Mr. BOYLAN. Mr. Speaker, I ask unanimous consent to proceed for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BOYLAN. Mr. Speaker, I have asked for this time for the purpose of extending the congratulations of the House to one of our very efficient workers, Mr. John O. Snyder, our very capable pair clerk, who completes today 33 years of continuous service in this House. [Applause.] He has served under the following Speakers: Henderson, Cannon, Clark, Gillett, Longworth, Garner, and Rainey. I know you will unite with me in conveying our good wishes to Mr. Snyder and to express the hope that he may continue to work here during the service of many, many other Speakers who are to follow as the presiding officers of this House. [Applause.]

WAR DEPARTMENT APPROPRIATION BILL, 1935

Mr. COLLINS of Mississippi. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (H.R. 8471) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the Army appropriation bill, with Mr. LANHAM in the chair.

The Clerk read the title of the bill.

Mr. BOLTON. Mr. Chairman, I yield 15 minutes to the gentleman from New York [Mr. FISH].

Mr. FISH. Mr. Chairman, there is an old Latin saying, "Veritas magna est et praevalebit." Of course, all the lawyers in the House know the translation of this Latin phrase, but for those who are not lawyers and who have not had the benefit of that high degree of classical culture, I will translate it into plain, ordinary English. It means that "The truth is mighty and will prevail."

The other day the gentleman from New York [Mr. MEAD] made an eloquent speech in which he denounced those of us on this side of the House as playing politics when we criticized the cancelation of the air-mail contracts and when we stated that the death of the six Army officers flying or preparing to fly the air mail was legalized murder. The gentleman also went on to say, at least by inference, that the Republicans on this side of the House had spoken disparagingly of these young Army pilots as rosy-faced babies. I asked a good many Republican Members if anyone had used such language or any language of that kind. Of course, I found that none had, but I did find out that that was the language used in the radio address of the Chief of the Army Air Corps, General Foulois, not once but twice, intimating that those of us who had criticized the Army Air Corps and who had condemned the accidents had referred to these young pilots as "a bunch of rosy-cheeked babies." The gentleman from New York [Mr. MEAD] comes here and reiterates this statement and infers that it is made by some Republicans on this side. It is simply an example of the old political game of creating a straw man to knock down. But in this case, when courageous young Army pilots had lost their lives because someone had blundered, it does not help the Army Air Corps for its commanding officer, General Foulois, to make a political speech and use epithets such as "a bunch of rosy-cheeked babies" about as fine and brave group of Army officers that ever lived. It is unfortunate that it was ever used or repeated for political purposes.

Now, it is time that on both sides that we be permitted to speak out and speak the truth without being charged with playing politics. So far as I am concerned, I believe the cancelation of the air-mail contracts was rotten with politics. [Applause.] I believe it was conceived in politics; that it was aimed at and resulted in the grossest kind of political reprisal in the recent history of our country.

Mr. SABATH. Will the gentleman yield?

Mr. FISH. I am sorry that I cannot yield in the limited time.

They were canceled, all of them, without a hearing and without a trial of any kind, on the basis merely that might makes right. It is simply a striking example of the dictatorial action of an administration drunk and arrogant with power. It proceeded to cancel these contracts without a hearing of any kind in a most ruthless and autocratic manner, and up until this time the country has been waiting to find out the reason for the cancelation of these air-mail contracts.

If there is any fraud, the country is entitled to know where the fraud exists. It is inconceivable that 14 or more air-mail companies and their officials, representing all kinds of people in this country, are corrupt, dishonest, and fraudulent. I do not believe that many American people believe they were, and will not believe so until the officials of these companies have been afforded an impartial and adequate hearing to present their side of the case, which is the right of every American citizen. If there was any politics, it was in the cancelation of the air-mail contracts; that was the inception of it; and the burden of proof rests with the Government to produce evidence of the fraud it claims in general terms.

Now, in answer to the charge—and I believe I was the first one to raise it in the House—that the death of these six Army pilots was legalized murder. I used those words advisedly, but I did not invent them. They were first used by Capt. Eddie Rickenbacker, the greatest war ace in the history of our country, who shot down 26 German airplanes, who was decorated with the Medal of Honor and seven times with the Distinguished Service Cross. He said publicly that using Army pilots without any experience on the air-mail routes, in winter weather, in open machines, was legalized murder.

I do not claim to be an authority on aviation, but Captain Rickenbacker is one of the highest authorities in the United States. The newspapers of the country and the great champion of the Democratic Party in the last election, Mr. Hearst, in his newspapers, has repeatedly gone further and called it downright butchery.

I am not apologizing, nor is anyone else, for having used the words "legalized murder", because this is exactly what was meant at the time and is exactly what we mean today—when six young Army pilots, ordered to fly the mail almost overnight on unknown routes, in winter weather, went to their death on account of politics—and it is because of that we say it is legalized murder.

Very few on this side of the House have criticized the Army Air Corps. The chief criticisms of the Army Air Corps have come from your side of the House, whether they are justifiable or not. The Speaker of the House, over his own signature, sent out a statement that was broadcast in the papers from coast to coast, criticising the efficiency of the Army Air Corps in the very strongest terms. The gentleman from Mississippi [Mr. COLLINS] has criticized the Army Air Corps for several years, and other Democrats have made much stronger statements denouncing and condemning the types of planes that are being used in the Army Air Corps, but whenever the minority says a word, the cry of politics

is raised. Was it politics when the Democratic Speaker of the House sent his message out to the country, attacking the Army Air Corps—was that Republican politics? Or when the gentleman from Mississippi spoke out about its defects, was that Republican politics?

Some Democrats have developed a new rule in the House. I suppose some member of the "brain trust" has come down here with an old hat filled with Easter bunnies and Easter eggs and has brought out a new rule that the minority party must be seen and not heard; that not only they have no right to offer or vote on amendments, but they have no right to criticize, and that even veiled criticism is taboo. Therefore, from now on under this new gag rule, criticism of the Army Air Corps or of the cancelation of these air-mail contracts is criticism of the Democratic Party and therefore fundamentally wrong, and a new emergency must be created or manufactured every time some Republican begins to criticize either the Army Air Corps or the autocratic cancelation of the air-mail contracts.

I now want to answer more specifically and categorically the statements made by the gentleman from New York [Mr. MEAD]; first, that there were more open machines used by the commercial airplane companies than by the Army. In each case I have taken my evidence either from the Army Air Corps or from some Army authority. The following information was given me only yesterday by a colonel in the Army Air Corps.

The number of open machines being used to carry the mail by the Army is 149, closed machines 62; by the commercial companies, 316 closed machines and only 55 open machines. In other words, the Army is using more than 2 to 1 open planes and the commercial companies are using 6 to 1 closed planes.

Mr. KVALE. Will the gentleman yield?

Mr. FISH. I yield.

Mr. KVALE. Of course, the gentleman will admit that the commercial lines are carrying passengers and the Army is not.

Mr. FISH. Oh, certainly, I admit that; but the gentleman from New York, in speaking the other day, made just the contrary statement. He said:

> Now, Mr. Speaker, are open ships used by private lines? Yes, of course, they are; more open ships were used by private lines than are now being flown by the Army in carrying the mail.

This is just not correct. It is utterly incorrect.

Then the gentleman from New York [Mr. MEAD] goes on to speak of radio equipment—

> What radio equipment has the Army? Every essential bit of radio equipment that any private line has and all that is necessary for safe flying in any kind of weather.

In answer to that I want to quote from an article by Maj. Gen. James E. Fechet, retired Chief of the Army Air Service:

> This is specially true of radio. Seventy-five percent of Army planes carry no radio. None of them carries the best long-range set which the mail planes find as their greatest aid. The mail pilot can and does remain in constant contact with his ground station. The Army mail man will lose all contact with his ground station within 40 or 50 miles after he takes off.

Mr. KNUTSON. Will the gentleman yield?

Mr. FISH. Yes.

Mr. KNUTSON. Probably under the new regulations issued by the War Department, which are so restrictive, they do not need radios.

Mr. FISH. Continuing the quotation—

> He will often plow blindly into fog and snow, because a warning voice from the ground station would not reach him.

This is not from a Republican; it is not Republican politics. It is from a recent published article of General Fechet, formerly Chief of the Army Air Service.

And he has this to say:

> In flying the mail, experience is the thing. Army pilots suddenly jerked from military duties to pilot the mail will suffer many handicaps. They are taking the places of a group of pilots who are also expert airmen, who have gained their knowledge from thousands of hours flying over the mail routes.

I want to insist that when we charged these six deaths as being legalized murder we knew exactly what we were talking about, because the proof of the pudding is always in the eating.

Mr. TRUAX. Will the gentleman yield?

Mr. FISH. Not at this moment.

Six Army officers went to their death in 6 days, whereas the entire commercial air force over a period of 1 year, I think, lost eight pilots.

Mr. FITZPATRICK. Will the gentleman yield?

Mr. FISH. Yes.

Mr. FITZPATRICK. How many of those men out of the six were carrying the mail?

Mr. FISH. I am glad the gentleman asked me that pertinent question. He wants to know how many out of the six were carrying the mail. Of all the petty, foolish, picayune subterfuges that have been used by the Army Air Corps and others I think the worst is when they say only one officer was actually killed flying the mail. What difference does it make to the mothers or wives of the other five officers who lost their lives under orders learning the mail routes or ferrying other pilots?

(The time of Mr. FISH having expired, he was given 5 minutes more.)

Mr. FISH. I cannot conceive of any more unfair statement than trying to make out that these young officers who were killed while preparing to fly, or who went out in snowstorms in Utah and other States in order to learn the routes, were not engaged in carrying out the orders of the Postmaster General caused by the high-handed and unwarranted cancelation of the air-mail contracts. They were ordered to fly by the Government, and officers of the Army are accustomed to obey orders. It makes no difference to them or their parents or their families or the American citizens back home to say that they did not lose their lives flying the air mail when they were actually carrying out the orders received from the Chief of the Army Air Corps to prepare themselves to carry the air mail.

Mr. GOSS. Did the gentleman say "Chief of Staff"?

Mr. FISH. I intended to say Chief of the Army Air Corps.

Mr. SEARS. Mr. Chairman, I make the point of order that the gentleman from New York did not yield to the gentleman from Connecticut.

Mr. GOSS. I thought the gentleman yielded to me.

The CHAIRMAN. The Chair will protect the gentleman if he declines to yield.

Mr. FISH. I shall oppose any red herring being dragged across the trail and thereby get away from the main issue, the high-handed and arrogant cancelation without a hearing of the air-mail contracts. All that we have done has been to justifiably criticize from the beginning the cancelation of the air-mail contracts, based, so the Democrats say, on unproven fraud and on the fact that these air-mail companies were making huge profits and that they were robbing the Government. However, when you come to analyze the facts, you will find out that practically none of the companies has ever paid a dividend and that most of them have lost money. Yet, the statement is given out to the people back home that the reason for the cancelation in general terms is not only collusion, but that these air-mail companies were profiteers, that they were making huge sums of money when the fact is that some of the commercial air-mail companies were returning more in air-mail postage than they received in subsidy. My God, gentlemen, to think of any Democrat in these days questioning the right of the Government to build up a new industry by subsidy! Why, the very middle name of the Democratic Party is subsidy. We spend more in subsidies every day, twice as much as they spent last year on the entire air-mail contracts, and you propose to go ahead and spend 10 times as much as we go along on almost every conceivable industry. You have granted subsidies for every one, and now you are raising the question of a subsidy of $7,000,000 in the air-mail contracts given out by the Republican Party 4 years ago, to develop

and build up the finest commercial air transport in the world, when every one of you is supporting subsidies day in and day out amounting to many times the sum of this particular subsidy.

Mr. FITZPATRICK. Mr. Chairman, will the gentleman yield?

Mr. FISH. I cannot yield now. The gentleman from New York [Mr. MEAD] said he was tired of this sob stuff. It is very easy to talk about sob stuff when you put words into the mouths of other people that were not said by them, about the rosy-checked boys and a bunch of babies. However, it was no sob stuff when we offered an amendment here to pay $10,000 each to the widows and families of those Army pilots who were killed under orders in connection with flying the air mail. That was not sob stuff. That was plain ordinary justice and exactly what we did during the World War. [Applause on the Republican side.]

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. BLANTON. Mr. Chairman, I have charge of the time and I yield myself 25 minutes. I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BLANTON. Mr. Chairman, I would not be just to this subcommittee of the Committee on Appropriations, upon which I serve, if I did not pay tribute to its able chairman, and to its able ranking minority member. I deem it an honor to serve upon this subcommittee that has framed the War Department supply bill, guided by its distinguished chairman, my good friend Hon. Ross COLLINS, of Mississippi, and so ably aided by the distinguished minority member, my friend Hon. CHESTER BOLTON, of Ohio. I wish I could tell you gentlemen of all the hard work and of the great service that these men have rendered to the country in framing this bill.

The distinguished gentleman from Mississippi, Hon. Ross COLLINS, is well equipped and qualified to do the work that he performs here. After finishing the grade schools of his State, he attended the Agricultural and Mechanical College of Mississippi. He received his bachelor of arts degree from the University of Kentucky and his bachelor of laws degree from the University of Mississippi, and his doctor of laws degree from Transylvania University, and the experience which he afterward acquired during the 8 years he was attorney general for the great State of Mississippi, has well fitted and qualified him to serve here in the interest of the people. He is able to cope and to hold his own with these major generals from the general staff, across the table. He is as brave as a lion, and he knows how to develop all the facts about all transactions.

Mr. MARTIN of Oregon rose.

Mr. BLANTON. Oh, I yield to the distinguished major general from Oregon.

Mr. MARTIN of Oregon. Oh, I just wanted to suggest to the gentleman, while he is engaging in these encomiums on the distinguished chairman of his committee, that perhaps he has learned a lot about the Army since he has been a Member of this House.

Mr. BLANTON. Oh, I have learned a lot about all of the Departments. I have learned many valuable lessons from my association with the former commander of the Ninetieth Division, and during the last 2 years I have learned how to get along with him, and on many fundamentals I can agree with him, whenever he is right.

Mr. MARTIN of Oregon. Oh, just a minute. I understand that this is a magnificent Army appropriation bill, and I want to congratulate the gentleman——

Mr. BLANTON. I was sure that it would please my good friend.

Mr. MARTIN of Oregon. And to remind him how different it is from the other two that he brought in.

Mr. BLANTON. Mr. Chairman, our colleague from Mississippi, Hon. Ross COLLINS, is the kind of man who, when he asks the chief of staff a question that could be answered unequivocally, always gets the question properly answered before he stops. I have heard him ask the same question over three or four times until finally he would thus force an unequivocal answer. He goes to the bottom of everything. He has a faculty of getting all of the facts. The service he renders is most valuable to the people. He has reduced appropriations and placed valuable restrictions in this bill, and I am gratified that the full Committee on Appropriations has approved his action.

Ross COLLINS is an entertaining and delightful companion. He is a good neighbor. He is a faithful friend. He is an all around good fellow. He has been most active in his efforts to keep open the schools of the country. He has been working zealously to get the committee to report out his bill in the interest of the teachers and schools of the United States.

I sincerely hope that the good people of Mississippi will see fit to continue sending him here. His defeat would mean a distinct loss to the country. The intimate knowledge he possesses, and the ripe experience he has acquired through years of intensive study of Government bureaus and departments, make his presence here needed and indispensable. [Applause.]

I feel impelled also to mention the splendid work and helpful cooperation of the ranking minority member of this subcommittee, our good friend, the distinguished gentleman from Ohio, Mr. CHESTER BOLTON, of Cleveland. He is well qualified, both through study and experience. He has a bachelor of arts degree from Harvard and an honorary degree from Kenyon College. For several years he was State senator from Ohio. He served on the War Industries Board, and with the rank of lieutenant colonel he served on the General Staff of the United States Army during the World War, and he knows exactly what the business is about when he sits across the table and takes up those estimates and requires a proper showing for them. He has rendered valuable service, and I take my hat off to him. [Applause.]

And now I want to talk about another subject.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Yes.

Mr. JOHNSON of Texas. I am just wondering whether the display back of the gentleman will have anything to do with his speech.

Mr. BLANTON. Oh, no. These bottles and jars and other things are to be used shortly by our distinguished colleague from New York, Dr. SIROVICH, who will speak in behalf of his pure food and drug bill. I am glad to know that Dr. SIROVICH is not here trying to foist upon the country what is known as the "Tugwell bill." I am glad to know that he is not asking you to support the Tugwell bill.

That bill of Dr. Tugwell would have closed up every country drug store in the United States. It would have put out of business every country newspaper in the United States. It would have stopped a man in ordinary life from buying for 25 cents a family remedy of known efficacy and value that has given satisfaction for 50 years, and would have made him go to a physician and pay $3 for an ordinary prescription. At last we have got that Tugwell bill killed and buried. Dr. SIROVICH has quit Dr. Tugwell and will speak on his own bill.

LYNN P. TALLEY

Now, I am going to come to my subject. And that is, whether Lynn P. Talley, president of the Commodity Credit Corporation, is the master or the servant of the people he now represents. Every President of the United States, to run this Government, which is the biggest business in the world, must have agents to help him. He cannot do it by himself. If his assistants and agents and helpers are honest, reliable, faithful, and loyal, he can make a success out of it if he has the ability and the intention to do it. If the helpers and the agents of President Franklin D. Roosevelt are honest and loyal, his administration is just as sure to be a success as you are sitting here; but if his agents are not loyal, if they are unfaithful, if they are selfish and autocratic, if they are dishonest, the same thing could happen to President Roosevelt—God forbid—that happened to Woodrow Wilson, who suffered because he had some agents upon

whom he was forced to rely who were unfaithful and who betrayed the trust he placed in them.

This agent of this Government, Lynn P. Talley, who just now is at the head of the Commodities Credit Corporation, that loans money to farmers—not his money, but the Government's money—is the most autocratic, most unreasonable, most inefficient servant of farmers in this Nation. He is their avowed enemy. The Commodities Credit Corporation was created for the benefit of affording help and succor to the farmers of the country. Lynn P. Talley is now using it in an attempt to harass and ruin them. Ten cents a pound has been loaned to farmers on their cotton. The cotton is good security for the loan. Farmers have put their cotton in local warehouses of their own selection, near their homes, where they can see it when they want to, where it is properly housed, properly protected from the weather, properly insured, meeting every provision of the insurance department, and they want it to stay there. There is no reason for moving it. These farmers who own it do not want it moved. It is not to their interest that it be moved. It is not to the interest of the Government that it be moved. The farmers who own the cotton are perfectly satisfied with all conditions.

A few weeks ago, against their interest, Lynn P. Talley issued an order to move cotton from the local warehouses in the country in the interior down to Galveston and Houston and New Orleans. The farmers were not consulted. They were ignored. Their wishes were unimportant to Lynn P. Talley. Hundreds of farmers, from many sections, protested.

I took the matter up with him as to the cotton warehoused in my district, and belonging to the farmers there. He promised me faithfully that he would not move any cotton until he had given me due notice and let me be heard in their behalf as to whether the cotton was properly housed and properly insured and met all the conditions he prescribed. Lynn P. Talley promised to give me that hearing, and I gave such assurance to my constituents, and yet, within the last few days, he has ordered thousands of bales of cotton sent from numerous local warehouses in my section down to the big warehouses in Houston, Galveston, and New Orleans.

This telegram, addressed to me, is from the chamber of commerce of my home city of Abilene, Tex.:

Understand Commodity Credit Corporation planning move Government 10-cent loan cotton to compresses at Houston. We request that cotton remain at local compresses where it is properly stored under shelter and gives us opportunity sell same on competitive bids between interior buyers and port buyers, whereas at port will be at mercy of practically one buyer; also, by keeping at interior leaves money at interior towns and helps local people make living during these trying times. Please investigate and do all you can.

T. N. CARSWELL, *Secretary-Manager.*

Here is one from the Stamford Chamber of Commerce of Stamford, Tex.:

This organization protests the movement of cotton on which farmers secured 10-cent pound loans from Government from interior compresses to ports until cotton is actually sold. Compresses have gone to expense of building sheds to house cotton. We believe farmers will have square deal by leaving cotton where weights and staple can be checked when sold. Please use influence.

STAMFORD CHAMBER OF COMMERCE.

The biggest organization in west Texas is the West Texas Chamber of Commerce. It embraces the city of Fort Worth on the east, represented by our good friend, the gentleman from Texas, now presiding over this House, Hon. FRITZ LANHAM. It embraces the territory from his city of Fort Worth 620 miles west to El Paso. The West Texas Chamber of Commerce, with its thousands of members, represents the best interests of west Texas, including the farmers and all businesses in this vast empire. This is what that chamber of commerce has to say in the following telegram I have received from Hon. D. A. Bandeen, its manager:

Believing C.C.C. cotton should be compressed and warehoused at point of raising until sold and knowing of extraordinary investments made to warehouse this cotton at point of raising, we protest present effort to move this cotton from interior to ports and respectfully request your support.

WEST TEXAS CHAMBER OF COMMERCE.

Here is a telegram from 108 farmers sent from Hamlin, Tex., addressed to me:

The undersigned farmers of this territory, who have 10-cent loans on cotton, are informed it is proposed to move our cotton from local warehouses for concentration elsewhere. We strenuously oppose this. Rather have our cotton kept at home until sold or until maturity of notes than to have it anywhere else. We hope you will abandon any plan for moving this cotton and leave same where it is.

They seemed to think it was a part of my plan, when we Members of Congress have nothing whatever to do with it. There is one man in Washington who is ordering this done, Lynn P. Talley, and nobody else. It is Lynn P. Talley who is assuming to act as master over the property of 108 farmers of the Hamlin, Tex., community.

Mr. PIERCE. Will the gentleman tell us what position he holds?

Mr. BLANTON. I will tell you all about it in just a moment. He is the President of the Commodities Credit Corporation. He was put there to serve the farmers, not to become their master. He was put there to benefit the farmers, not to harrass and ruin them. And he has another guess coming if he thinks that we Members of Congress who represent the farmers of America are going to allow him to handle their property in this wasteful, inexcusable, unwarrantable, silly manner, merely to benefit a few big monopolistic warehouses in a few big cities.

Here is another petition from 210 farmers of Jones County, who mailed it to me from Stamford, Tex., and is addressed to me officially:

We, the undersigned, farmers and producers who are vitally interested in the 10-cent loan cotton stored in bonded warehouses in the interior, ask that you use your influence against the movement of cotton from where it is now held until July 31, 1934, or until it is actually sold by the producers. Cotton now held here is all in warehouses and well protected from the weather, and we believe that it should be left in the locality where it was produced so that if we wanted to exercise our option of closing out our contracts we could personally supervise the regrading and selling of it.

That is signed by 210 farmers.

Mr. GOSS. Is the gentleman going to put all those names in the RECORD?

Mr. BLANTON. No; I will not print their names, because they would not serve any purpose. I do not want to encumber the RECORD with a lot of names, but I wanted to show you this list of names so that you can see how many farmers there are protesting. There are five pages of signatures to this petition.

Mr. Chairman, I do have some excerpts that I will put in without reading them in full. I want to yield when I have time, if questions are asked, and do not want to take the time right now to read all of the excerpts of documents and records that I shall refer to in my remarks.

I do not want to take the time to read them all. Mr. Chairman, I ask unanimous consent that, excluding long lists of names, I be permitted to put some excerpts in the RECORD in connection with my speech.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BLANTON. Here is a telegram addressed to me from Abilene:

I have been informed through the press and otherwise that the A.C.C.A. have been appointed sales agent for all pooled and Government-loan cotton. I was appointed sales agent by the producer under Government-loan note under contract clause no. 8. I am a small cotton buyer trying to make an honest living for myself and family. My farmer friends were willing to make me their sales agent for 1,200 bales of this cotton and are still willing for me to act in this capacity. The same condition applies to several other private cotton buyers in and around Abilene. Have been informed that all Government-loan cotton will be moved to the ports from the interior compresses, taking away thousands of dollars in labor from this section. Will you use your influence to protect our interest?

BEN E. ALLEN.

Here is another petition, signed by 194 farmers, from the district of our good friend, MARVIN JONES, who, by the way, is Chairman of the Committee on Agriculture, and is dated at Spur, Tex., in Dickens County, way up north of me, and

addressed to me. I will not print their names, to save expense; but I want you to notice there are four long pages of names, each with a double column of signatures.

This statement reads as follows:

SPUR, TEX., *February 27, 1934.*

We, the undersigned, farmers having Government 10-cent loan cotton stored in Spur Bonded Warehouse & Compress Co., are registering protest as to Government moving said cotton from said plant and so insist that our cotton remain on said compress.

This warehouse company has built new additional warehouse capacity for our benefit to properly take care of our cotton. There is no congestion of any kind, this warehouse having ample space for all of said cotton.

The insurance rate is some ninety-odd cents per hundred dollars per year, which is about 5 cents per bale per month. We consider their warehouse charges reasonable and must insist on our cotton remaining in this warehouse where we can get our own samples and sell at any time we desire.

Respectfully submitted.

(Names omitted.)

Mr. GLOVER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. I yield.

Mr. GLOVER. As I understand it, the Government's lien on this cotton is simply a mortgage; it is just a hypothetical sale, and the Government has no right to remove the cotton unless there is something in the contract that permits it.

Mr. BLANTON. Certainly; or unless it is being damaged. And it is not being damaged. It is well protected, and the farmers want it to remain in their own warehouses.

Mr. GLOVER. Is there anything in the contract which permits them to do this?

Mr. BLANTON. Unfortunately, Lynn P. Talley claims there is.

Mr. GLOVER. Unfortunately, it ought not to be there.

Mr. BLANTON. If my friend the gentleman from Arkansas were a farmer; if he went to a bank and borrowed $100 on his span of mules and the bank were to attempt to take those mules from the gentleman, and take them 500 miles from the gentleman's farm, the gentleman would object to it, would he not?

Mr. GLOVER. Yes; and it is a penitentiary offense in my State to remove mortgaged property. The principle of this thing is wrong. It ought not to be permitted.

Mr. BLANTON. And the mortgagee has no more right to remove it away than the mortgagor.

Mr. GLOVER. Absolutely not.

Mr. BLANTON. And if Lynn P. Talley moves it, we are going to move him. Here is another telegram I have just received today:

ABILENE, TEX., *March 6, 1934.*

Hon. THOMAS L. BLANTON,
Washington, D.C.

We have received shipping order from Commodity Credit Corporation 5,654 bales be moved to Galveston. We have no congestion at Abilene compress and have class C marine insurance; also have been promised by underwriters they will restore former class B. If there is to be general movement, we have no complaint, but we understand no movement being made from a number of other compresses over the State not in your district that only have class C rating. What you advise us to do?

WESTERN COMPRESS & STORAGE CO.,
H. G. HAYNIE.

Here is a long telegram from numerous business firms handling cotton in my home city of Abilene, Tex., addressed to me, and signed by the business firms of Bland & Pratt; Ansley & Co.; Carl A. Sonnen; W. J. Hart; F. H. Ficke & Co.; S. P. Baugh; J. O. Green; Guitar Cotton Co.; H. J. Nebhut; H. M. McBeath; and Ben E. Allen, wherein they strenuously protest against this order of Lynn P. Talley moving thousands of bales of cotton from these local warehouses and concentrating it in the big monopolistic warehouses in a few big cities:

We, the undersigned cottonmen this territory, emphatically protest intention moving Government cotton to port, as this decided economical waste besides would prevent us bidding on cotton. This Government repeatedly stated they are for small man, letting him make livelihood. It's about time getting a break. For example, some Government cotton sold and large concern's bid was $2 per bale below what cotton sold for here, which shows that someone interested getting cotton out reach of competition, which means that farmers would lose considerable money on top of extra expense moving to port.

And, in a long letter addressed to me, these above firms show that the farmers are all against this removal of their cotton by Lynn P. Talley, that the farmers are well satisfied and want their cotton to remain in local warehouses and not moved away, and they present the following reasons why it should not be moved:

As you are well aware, the cotton business has suffered greatly during the past 5 or 6 years and it was, and is, hard for a small buyer to make a livelihood out of it. The margin of profit has been cut down to such an extent that one has to handle a large volume of business to break even. This season the Government took out of the market practically 2,000,000 bales, putting same into the 10-cent loan plan, thus assuring the farmers a minimum price for their cotton.

This plan was welcomed by all, farmers, business men, and last, but not least, by the cotton men, as by loaning money against this cotton, the trade was assured to have access to the cotton whenever it would sell. In other words, have open competition on all cotton which has been put into the loan plan.

The cotton was stored at local plants, assuring an employment to many a man who otherwise would have been thrown out of a job. The revenue coming out of the handling and storage would be distributed in this community. A good plan and a favorable one.

Now, the matter is intended to be changed. What for? The writer is quite sure that this was done step by step. The first one was to knock down the insurance classification. The Abilene Press is rated B—the Sweetwater, class C. Now the underwriters claim that the plants are overstored and the risk becomes greater, putting the classification down to C and D. Why? To give someone a chance to make this a major issue and have a leg to stand on to move the cotton to a better classified plant? There is a nigger in the woodpile somewhere.

Do you think that farmers would be in favor having the cotton moved to some far-off place? You know the farmers just as well as we cotton men—if not better—and you know that they like to know what happens to their bale, their product raised by their hands. If this cotton goes to the port, what weights would be governing? Would this cotton be open to competitive bids? Who is behind this intention?

A striking example: The other day a small lot of loan cotton was sold in this community. The party negotiating the loan put a price on this cotton, and was $2 per bale below the price the cotton actually sold for. This is only on a few bales, but it would amount up to a huge sum, and the farmer would benefit by it.

The cotton is stored in plants well able to handle it. From interior points cotton can be shipped either for domestic purposes or for export without additional cost; can be put to high density or move "flat"—the cotton is in the right place to be handled as economical as possible. All costs on the cotton will be borne by the farmer in the final windup so why not leave it where it is, as a minimum charge is assured?

Many a man devoted his time to negotiate the loan, working hours and hours, hoping that he will get the 85-cent per bale for handling the selling of the cotton. Why now try and take this bread away from him, giving him 35 cents, which hardly covers his expense? I am sure that these small fellows will give the farmer a fair deal in trying to sell the cotton to the highest bidder.

This cotton business has gone to the devil because it is domineered by large concerns and it would be a good thing to look into the whole matter—so that the small buyer again has a halfway chance to make a decent living.

What is wrong with the cotton trade, the small buyers have no leader who will put in all his heart and understanding to help them. They have no money to pay to lawyers, as they have a hard time to make a living. Therefore, the undersigned kindly ask you to give them a helping hand and help the small buyers back on their feet. It is the little buyer, whose competitive work is beneficial to the farmer, seeing to it that he gets a square deal. If this medium is taken out of existence, God knows what deal the farmers would get.

Very respectfully yours.

(Names omitted.)

One of these men within the past year has spent $25,000 to build his new warehouse. Lynn P. Talley cannot get away with this autocratic, unreasonable action of his by claiming that the cotton is unprotected, because it is protected. It is not being injured by weather. It is properly housed. It is properly insured. It is not congested. The farmers who own it have picked the warehouse they prefer, close to their own homes, where they can see their cotton and where they can sell it to advantage. It is against their wish that Talley is moving it. He is acting for the big warehouses in the big concentration cities, and is not acting for the farmers. I know more about conditions in my district than does Lynn P. Talley. The farmers know more about their own cotton and about what they want than does Lynn P. Talley. He is not their master. He is not their overlord. With their cotton moved to Galveston or New Orleans, it

will take over a month to get their certificates back, and they are retarded in making sales.

Mr. PARKER. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Certainly.

Mr. PARKER. I merely want to say that the conditions the gentleman pictures exist in my district as well.

Mr. BLANTON. They exist in several of the States.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. BLANTON. Certainly, to my friend from Texas.

Mr. JOHNSON of Texas. Did the gentleman protest against moving the cotton from his district?

Mr. BLANTON. Yes; and Mr. Lynn P. Talley promised me he would not do it without first giving me a hearing, but he now has ordered the cotton to be moved out.

Mr. JOHNSON of Texas. I had the unique experience of protesting without result.

Mr. BLANTON. We will get results before we get through with him. We ought to take the very hide off Lynn P. Talley from head to foot. If he moves this cotton, we ought to make him move it back at his own expense.

Mr. KELLER. Let us hear about him, as to his past record.

Mr. BLANTON. I am going to tell you about him.

Mr. DONDERO. Will not the gentleman tell the Members why this cotton was moved?

Mr. BLANTON. It is being moved for no reason in the world except to help big business; to help the big compresses and warehouses of a few big cities. Lynn P. Talley has always had a prejudice against farmers, and has always stood in with the "big fellows" and against the farmers and the "little man", and I will prove this by the RECORD.

I call attention to the facts that were placed in the CONGRESSIONAL RECORD on February 28, 1928, by our former distinguished colleague from Texas, Hon. Guinn Williams. At that time Lynn P. Talley was drawing $25,000 a year from this Government as a governor of the Federal Reserve bank at Dallas, Tex., Mr. Williams then said:

I make the charge, here and now, that the governor of the Federal Reserve bank at Dallas, Tex., does not have the ability to determine a solvent institution, nor has he the ability to determine an insolvent institution. I realize that is a broad statement; here is the record which I believe will justify the statement:

The governor of the Federal Reserve bank at Dallas, Tex., was never the operating or managing head of but one bank; his record as a banker is as follows: He held the position of assistant cashier with the City National Bank in Dallas, and received a salary of $4,000 a year; in 1911 he went with the Lumbermans National Bank, at Houston, Tex., as cashier at a salary of $6,000 a year. He remained with the Lumbermans National Bank until 1914, when he was given a position in the Federal Reserve bank at Dallas, at a salary of $5,000. This information was furnished by a member of the Federal Reserve Board here in Washington, the information as to the salary he received when he entered the Federal Reserve bank—note this, will you—he received a salary of $1,000-a-year reduction when he entered the Federal Reserve bank. Do you believe that had he been a banker the Lumbermans National Bank would not have endeavored to retain him? You know that it would.

He remained with the Federal Reserve bank until July 1921, when he accepted the active vice presidency of the Southwest National Bank, of Dallas, Tex., with entire control and management as to policies of the bank; and it would shock you to know what he charged for his services, but he claimed that he could put the bank over, and the directors stood for his demands in the way of a salary. He operated the Southwest National Bank until early in 1923, when he severed his connections with the bank, and at a reorganization of the bank whereby the North Texas National Bank was organized and took over the assets of the Southwest National Bank, it was agreed by the North Texas National that after all losses sustained by the Southwest National—the present governor of the Federal Reserve bank had entire authority in the management for over a year—had been taken care of, the balance would be paid to the stockholders of the Southwest National, and the management of the North Texas National has made the statement that up to this time the stockholders of the Southwest National have not received one cent, and that they might get as much as 15 percent on their stock after the losses in Southwest National had been taken care of. The capital stock of the Southwest National was $2,000,000, and 15 percent on the stock would be $300,000, a loss to the stockholders of the Southwest National Bank of $1,700,000, and, say, the stockholders have not yet received the 15 percent. Do you think that is the record of a banker? And remember that when he was connected with the City National Bank of Dallas, and the Lumberman's National Bank at Houston, he was not the managing head of either institution.

Then our former colleague, Mr. Williams, said:

As a further evidence that he is not the proper man for the position, I submit the following information, which is evidence to you how the bankers of the district feel toward the policies of the governor of the Federal Reserve bank in that district:

On October 12 last year a meeting of the bankers on the South Plains was held at Lubbock, Tex.; there was present at the meeting 35 bankers, representing 23 banks, and passed resolutions unanimous condemning the policies of the governor of the Federal Reserve bank at Dallas, Tex.

On October 18 last year a meeting of bankers was held at Abilene, Tex., with over 30 bankers present, representing 15 banks, and passed unanimous resolutions condemning the policies of the governor of the Federal Reserve bank at Dallas, Tex.

In November last year a meeting of bankers was held at Corsicana, Tex., with over 35 bankers present, representing 20 banks, and passed resolutions condemning the policies of the governor of the Federal Reserve bank, with one vote dissenting, and I am informed that he stated that it was a personal matter with him.

This month, I believe it was about the 6th or 7th, a meeting of bankers of the Paris (Tex.) district, composed of bankers from Lamar, Red River, and Fannin Counties, and bankers from southern Oklahoma, met at Paris, Tex., with between 90 and 100 bankers present, and passed resolutions unanimously condemning the policies of the governor of the Federal Reserve district at Dallas, Tex., and my colleague [Mr. Hudspeth] is my authority for the statement that the bankers met in his district at San Angelo and passed resolutions condemning the governor's policies. Think of it, gentlemen of the House, at four meetings of bankers, with almost 200 bankers present, and only one vote against the resolutions condemning the policies of this man.

In addition to the above, the directors of the West Texas Chamber of Commerce, at a meeting held at Cisco, Tex., in June last year, with 65 members present, passed resolutions condemning his policies as applied to the member bank located in the farming and livestock communities, and again at a meeting of these directors, held at Fort Worth, Tex., on January 19 of this year, passed resolutions condemning his policies.

And concerning the many small country bankers whom Lynn P. Talley had deliberately caused to be ruined, our former colleague, Mr. Williams, said:

Gentlemen of the House, I know the country banker; I am familiar with the conditions under which a country bank is operated. I know what the country bank means to the community in which it is operated; I doubt if there is a man in my State who knows more country bankers than I. I know them by name, I know where they live, I have visited the community where their banks are located, I have been in their banks, and I want to say here and now, there is not a higher type of banker living than the country banker in my State, and there is no more patriotic and loyal men on earth than the country banker in Texas, and many of the prosperous communities and cities in Texas today is an evidence that some country banker operated a country bank in the community and assisted in developing the resources of that particular part of the State.

During the World War, when drives were being made to sell Liberty bonds and to secure funds for the Red Cross and all other activities to assist in winning the war, the country banker in Texas, as in other States, was working in the lead. He neglected his business, left it in the hands of others, and went out over the country making speeches, contributing money, and loaning money to those who did not have money to contribute, that he might assist in his small way, as a good citizen, in giving the best of which he was capable to his country.

The country banker in my State is a free-born white man, and when he has a right granted to him under the laws of this country he resents being treated in a manner as though he were a crook and that he had no rights. Imagine how you would feel, knowing that you had a legitimate right to apply to the governor of a Federal Reserve bank for the rediscount privilege, a right accorded you under the Federal Reserve Act, and as you know, the member banks are forced under the act to keep a certain percent of their deposits in the Federal Reserve bank upon which the member bank receives no interest, you as the operating head of a member bank, and have the governor not only treat you as though you had no right to make the application but bawl you out and, as he has done in many instances—and the RECORD will bear me out in the statement—absolutely insult you. That is what the governor of the Federal Reserve Bank at Dallas has done on numerous occasions, and a committee from the Senate and this House will find such has been the case, should this resolution be adopted.

The record shows that Lynn P. Talley caused numerous cattlemen in Texas and the Southwest, normally worth several million dollars each, to become broke and to lose everything on earth they possessed. He could have saved them by granting the credit discounts authorized by the purpose and intent of the Federal Reserve Act to the country banks

which offered good security, but that Lynn P. Talley deliberately withheld this credit and deliberately ruined hundreds of the finest cattlemen in the world.

Notice what was said by our former colleagues, Hon. Claude Hudspeth and Hon. Guinn Williams. I quote from the same RECORD of February 28, 1928, as follows:

Mr. HUDSPETH. The gentleman is an experienced banker, as I understand it?

Mr. WILLIAMS. I have been in the banking business for over 25 years.

Mr. HUDSPETH. As I understand, the difficulty with this gentleman is that he caters to the big city bank and discriminates in favor of the big city bank against the country bank?

Mr. WILLIAMS. If I can reach it, I will prove that by the record.

Mr. HUDSPETH. Of course, anyone looking at the gentleman from Texas [Mr. BUCHANAN] and myself would know we are from the country, and I want to ask the gentleman how many of those city banks belong to the Federal Reserve System and how many country banks?

Mr. WILLIAMS. Well, there are 60 banks in the district in group 1—that is, banks having a capital of $500,000 and up—and there are 467 banks in the 11 Federal Reserve districts which have a capital of $100,000 down to $25,000.

[Here the gavel fell.]

Mr. BLANTON. Mr. Chairman, I yield myself 10 minutes more.

May I give you this further information from the RECORD of February 28, 1928, and then we are going to hear about some of the big salaries:

Mr. HUDSPETH. And he discriminates against the country banks in favor of the city banks?

Mr. WILLIAMS. Yes; and it seems to me it is for the purpose of compelling those banks to close their doors.

Then our colleague from Oklahoma [Mr. MCKEOWN] interrupted and made the following statement:

Mr. KEOWN. I will state that we have some banks in that Federal Reserve district and the record bears out the fact that they have stood by and knocked at the doors, yet it appears to be the desire to shut the banks in our district.

Mr. JONES of Texas. Is there any practical and direct way for them to get rid of an official who violates the spirit and the purpose of the law?

Mr. WILLIAMS. I do not know. If there is not, there should be legislation introduced in these two Houses that will do it.

We ought to get rid of him now. If Lynn P. Talley moves the cotton of the farmers down there to their detriment and to their disadvantage when they do not want it done, we ought to take him by the nape of the neck and the seat of his pants and throw him out of public life forever and eternally. That is what ought to be done to him.

Here is a banker who went to him with solvent paper and tried to get him to give the discount that the law authorized, and here is what he said, and I quote from Mr. Williams' speech. The banker, addressing the governor, said:

Governor, do you mean to tell me that if it becomes necessary to extend our banks further rediscount privilege or close our bank, that we will have to close the bank?

Here is the governor's reply:

That is exactly what I mean. Go home and close your damn bank. It will be a damn good lesson to your community.

That is the answer that the banker received, who had solvent paper to offer for rediscount purposes under the law of this land.

Another banker went to Talley, so Mr. Williams said, and, by the way, both of these banks are running today. They were denied credit at that time, but they are running today. They did not go broke like his bank at Dallas did. Another banker went to him and asked for credit. Here is what Talley said, which I quote from the RECORD of February 28, 1928:

We have too many banks; we only need a few banks in the larger towns in Texas to take care of all the business.

Then Lynn P. Talley went on further and stated:

You should not loan money to farmers, but invest your money in Government securities and commercial paper.

Is not that a fine kind of governor of a Reserve bank in a district like Dallas, which covers tremendous territory, a man who tells the banks not to make loans to farmers but to invest their money in Government securities? He ought to be run out of this country.

Mr. MOTT. Will the gentleman yield?

Mr. BLANTON. I yield to the gentleman from Oregon.

Mr. MOTT. Who appointed this man that the gentleman from Texas is criticizing?

Mr. BLANTON. He was appointed to this $25,000 position in Dallas during your Republican administration.

Mr. MOTT. Who appointed him to his present position?

Mr. BLANTON. But we got him out of that $25,000 per year position.

Mr. MOTT. The gentleman has already said that, but who appointed him to his present position?

Mr. BLANTON. God knows; I do not know. Such fellows have a way of getting appointed.

Mr. MOTT. Can the gentleman find out for us?

Mr. BLANTON. I do not know. He is certainly a misfit and ought to be removed.

Mr. MOTT. Why does not the gentleman go to the appointing power and get rid of this bad man?

Mr. BLANTON. I am bringing these facts to his attention now. This record will be brought to the attention of the President. I talked with Lynn P. Talley this morning and invited him to come here and hear what I had to say about him.

I am going to show you now what was done during Talley's administration and the kind of salaries that were paid. This is also from the CONGRESSIONAL RECORD, and you will find it on page 2346 of the RECORD for February 1, 1928:

Here are the figures furnished me by the secretary of the Federal Reserve Board:

The salary of the chairman of the board of 9 branch banks is $20,000 per year; 2, $24,000; and 1, $50,000; 12 individuals drawing a total salary of $274,000, or an average of $22,833.

Governors of 8 branch banks draw a salary each year of $25,000, 1 a salary of $22,500, 1 a salary of $30,00, 1 a salary of $35,000, and 1 a salary of $50,000; 12 individuals drawing a total salary of $337,500, an average of $28,125.

Twenty-three deputy governors, which is a position of secondary importance and also of limited responsibility, receive salaries as follows:

One deputy governor receives $40,000; 1, $36,000; 2 receive $30,000; 1 receives $25,000; 2 receive $20,000; 2 receive $18,000; 2 receive $17,500; 1 receives $16,000; 3 receive $15,000; 1 receives $14,000; 2 receive $13,000; 2 receive $12,500; and 3 receive $12,000.

It is a disgrace to this Nation that such salaries are paid.

I quote from yesterday's Washington Star the following concerning salaries paid to bankers in no way connected with the Government, but which concerns the people vitally:

HUGE SALARIES TO BANKERS BARED—SENATE COMMITTEE REVEALS 10 DREW MORE THAN $100,000 LAST YEAR

During one of the most trying years in American bank history, a year in which the Nation saw an unprecedented bank "holiday", 10 bankers were drawing annual salaries of $100,000 or more, and 370 others were receiving more than $25,000.

The disclosure of bank salaries for the year ending last June was made today by the Senate Banking Committee.

Names of the officials were included in a bulging report submitted to the Senate by the Federal Reserve Board in response to a resolution adopted last spring at the request of Senator COSTIGAN, Democrat, of Colorado.

H. C. McEldowney, president of the Union Trust Co. of Pittsburgh, and W. W. Aldrich, chairman of the governing board of Chase National Bank, were the highest-paid bank officers in the United States, the report indicated.

RECEIVED $165,000 A YEAR

The Pittsburgh banker received $165,000 during the year. His rate of compensation at the start of the year was $180,000, but later it was cut to $120,000.

Aldrich's compensation meanwhile was rising. He received $151,744 during the year, but at the end of the period his salary rate was $175,000, making him the highest-paid banker in the United States.

This was a far cry, however, from the compensation received by his predecessor, Albert H. Wiggin. The Banking Committee's own investigation had disclosed that Wiggin's peak salary was $250,000 a year, and that in some years his total compensation was almost $300,000.

The highest salary in the National City Bank, where Charles C. Mitchell once drew more than $1,000,000 a year, was paid to Gordon S. Rentschler, president. He received $125,000 plus a bonus of $5,550.

James H. Perkins, who succeeded Mitchell, was getting only $45,000 a year, with a bonus of $4,550.

BONUS NOW ONLY MEMORY

The report showed incidentally that the bonus system uncovered by the committee's investigation in some of the bigger institutions is now only a memory. Most banks paid no bonus during

the year, and the highest were insignificant compared to those of the boom days.

Other bankers who drew $100,000 or more during the year included:

Charles S. McCain, chairman of the board, Chase National Bank; salary, $128,488; bonus, $2,040.

George W. Davison, chairman of the board, Central Hanover Bank & Trust Co.; salary, $100,000.

Percy H. Johnston, president Chemical Bank & Trust Co. of New York; salary, $125,000.

Walter E. Frew, chairman Corn Exchange Bank & Trust Co. of New York; salary, $100,000; bonus, $2,882.

Charles H. Sabin, chairman Guaranty Trust Co. of New York; salary, $95,333; bonus, $5,586.

W. C. Potter, president Guaranty Trust Co.; salary, $95,333; bonus, $5,735.

Harvey D. Gibson, chairman of the board and president of the Manufacturers' Trust Co., New York; salary, $125,000.

HIGH SALARIES IN STATE BANKS

The report disclosed that the highest salaries were in the State banks rather than the national banks.

Some of the bigger banks had whole corps of officers making more than $25,000. In addition to Aldrich and McCain, the Chase National Bank reported seven officers drawing from $50,000 to $90,000 and 63 vice presidents getting from $11,500 to $45,000.

The National City Bank, in addition to Rentschler, had 6 officers drawing from $50,000 to $75,000 and 28 others ranging from $10,000 to $40,000.

The Philadelphia National Bank, of Philadelphia, paid three officers salaries ranging from $39,320 to $96,674 and 15 others from $13,750 to $24,570.

The report also showed that Charles G. Dawes, former Vice President, was getting only $13,300 as chairman of the board of the City National Bank & Trust Co. of Chicago, although Philips R. Clark, president, was receiving $33,000.

LIST IN DISTRICT OF COLUMBIA AREA

WASHINGTON HAS FOUR BANKERS GETTING OVER $25,000

The following local and near-by bankers are among the names of bank officers who received $25,000 or more during the year ended June 30, 1933, with their position, salary, and bonus in that order (figures in parentheses are the salary rate at the end of the year):

NATIONAL BANKS

Washington: National Metropolitan Bank, George W. White, president, $25,000; Riggs National Bank, Robert V. Fleming, president, $35,200.

Baltimore: First National Bank, Albert D. Graham, chairman of board, $55,000; Morton D. Prentis, president, $35,000; James D. Harrison, vice president, $27,000.

Richmond, Va.: First & Merchants' National Bank, John M. Miller, Jr., president, $28,679 ($26,830).

STATE MEMBER BANKS

Washington: American Security & Trust Co., Corcoran Thom, president, $24,583 ($22,500); Washington Loan & Trust Co., Harry G. Meem, president, $28,170 ($25,080).

Baltimore: The Fidelity Trust Co., W. Bladen Lowndes, president, $25,000; Maryland Trust Co., Heyward E. Boyce, president, $27,306 ($25,200).

You will remember the salaries of $125,000, $150,000, $175,000, and even $200,000 that insurance companies were paying their presidents last year. It is a disgrace. The people ought to stop doing business with them.

I promise you that if I live long enough and if I can stay here in this House long enough, so help me God, I am going to help you to stop these unreasonably big salaries that are being paid Government employees and that are being paid to bank, railroad, and insurance company officials, which is unjust to the people. It ought to stop. It must stop.

If Mr. Talley thinks he can move the cotton from the interior points of the States of Texas and Arkansas and the other States down there and carry it to the big warehouses in a few big cities in the interest of these big compressing and warehouse companies, he has another guess coming. When we Congressmen from the cotton States combine against him, he had better look out. I am asking every one of you to help me pick him up and throw him across the Potomac River. We have no use for him here.

Mr. O'MALLEY. Will the gentleman yield?

Mr. BLANTON. I yield to the gentleman from Wisconsin.

Mr. O'MALLEY. What the gentleman complains about is the result of operating certain parts of the new deal with members of the old gang?

Mr. BLANTON. He never has had a heart for the ordinary citizen. He has been against the farmers all his life. He has been against the country and for the big city. He says that we in the small areas should not have any banks. In other words, in my section I ought to go 200 miles to Dallas in order to do my banking business. The gentleman from Texas [Mr. THOMASON] should go to Dallas to do his banking business. El Paso is not big enough. Talley feels that the banks of the country are needed only in the big cities because his heart is not with the farmers.

He tells these bankers not to lend their money to farmers but put it in Government securities. This is the reason the farmers in the country have been losing their farms. This is the reason that the owners of homes in the small towns of 25,000 and under have been losing their homes.

You can take some peewees and put them in a big position that is much too big for them, and they immediately imagine they are above the people. They immediately become convinced that they are the masters of the people and not the servants of the people. Lynn P. Talley has got to remember that he is a servant of the people and not their master.

Mr. Chairman, I reserve the balance of my time and yield 30 minutes to the distinguished gentleman from New York [Mr. SIROVICH].

Mr. POWERS. Mr. Chairman, I yield 30 minutes to the gentleman from New York [Mr. SIROVICH].

Mr. SIROVICH. Mr. Chairman, ladies and gentlemen of the Committee, food, beverages, and drugs have been the foundation, from time immemorial, upon which the superstructure of the health of mankind has been preserved. Food and beverages to maintain bodily health and vigor. Drugs to restore lost health. Cosmetics to improve women's looks have had the keen attention of the women of all times and climes, and of all races, from the dawn of civilization throughout all the ages.

"Tell me what you eat, and I'll tell you what you are." This adage can be paraphrased by saying:

"Tell me with what his food was adulterated, and I'll tell you what caused his death."

Nature does not produce all our food products the same everywhere. Nor is all food of the best quality. All fruits grown are not of superlative standard. All vegetables that Mother Earth brings forth are not of the finest quality. All meat products do not come from the choicest animals.

There is a natural variation in quality, standard, and nutritive value in all plant and animal products. Food and drugs, offered for sale, should be graded officially, by labeling, to show the consuming public these variations in the quality of food and drugs they purchase.

If the food products we produce are not consumed, as time rolls by, nature, through decomposition, takes its toll on these animal and vegetable products. Deterioration and decay set in. The stage of putrefaction and dissolution arrives. The nutritive, caloric, and vitamin value of the food has been destroyed. In this condition food substance is unfit for human consumption.

Here some of the vultures and carrion crows of unscrupulous business come in. Animated by greed and avarice they actually embalm this animal and vegetable material unfit for human consumption, by the utilization of artificial and chemical preservatives, colorations, astringents, and adulterants, such as sodium sulphite, aniline dyes, sulphur dioxide, sodium benzoate, formaldehyde, alum, boric acid, and countless other poisonous chemicals, that react on these decomposing foods, that are unfit for human consumption, to make them appear to be wholesome, palatable, fresh, and nutritious.

Food, decayed and injurious and wholly unfit for human consumption, is thus sold by the carload. Millions on millions of dollars is the price that the innocent purchaser pays for the privilege of being poisoned daily.

When there is a surplus of good food obtainable, humanity should be protected by stringent laws declaring it to be criminal to adulterate, devitaminize, demineralize, and abstract important nutritive elements and ingredients from the food of mankind for the benefit of the personal greed and the enrichment of unscrupulous racketeers dealing in food products.

What is true about food products is equally true about certain drugs, cosmetics, and nonalcoholic and nonintoxicating beverages. In drugs we have adulteration, substitution, and vitiation of strength. In cosmetics we find the use of poisonous elements that may be harmful to the human body. In nonintoxicating and nonalcoholic beverages we have colored and charged water, dyed to make them attractive seeming to the eyes, no matter how harmful they may be to the human system.

High-pressure salesmanship and false propaganda, designed to make the public what is craftily called "health conscious", not out of regard for the public or the health of any citizen, but solely to sell alleged remedial products, is put out daily, yes, hourly, in a constant barrage through every form of available communication.

Who ought to be held responsible for this frightful and dreadful state of affairs that has excited an innocent and often gullible public with fears about their health, their stomachs, their nervous systems, their teeth, their throats, their appearance? The answer is: Those who seek profit, and profit only, by the sale of alleged medicaments; remedies that neither remedy, nor cure; and cosmetics that scarify rather than beautify. These are the responsible ones, and they should be held up to public contempt and obloquy, and be punished for their reprehensible acts.

Who profits by constantly urging the public to eat, drink, gargle, smear, brush, and spray with products that they promise will postpone the onset of every conceivable disease? Who assures mankind that they will provide recovery from every ailment that flesh is heir to, even to the curing of such diseases as cancer, tuberculosis, and other diseases now incurable by any known remedy? The same type of profiteering buccaneers worshiping on the altar of Mammon—gluttons of greed. [Applause.]

Who is responsible for permitting pears, apples, plums, asparagus, cauliflower, and cabbage to be sold to you still bearing overdoses of insecticides containing arsenic and lead? It is the producers who use the insecticides to kill the bugs that infest their product. They are too indolent to clean away the poison by means, easily available, but send it forth to do its deadly work, not caring who suffers from their criminal indifference or their willful and contributory negligence and callousness.

Who is responsible for the selling to your home of chickens that are infected and diseased with tuberculosis, sarcoma, peritonitis, septicemia, croup, and other infectious diseases? Certainly not the honest poultry raiser. Certainly not the man or firm who takes proper pride in producing a healthful product. There are plenty of such honorable organizations. They should be protected against the avaricious and conniving poultry buccaneers who fatten from the chicken racket by making the public pay tribute to them throughout the length and breadth of our Republic.

Who sells these diseased products to the public without proper Government inspection? Outlaws of the food and drug industry who, under the guise of honest merchants and manufacturers, daily mulct their gullible victims. Why do these outlaws take these desperate chances? Because there are not enough inspectors properly to examine food and drug products offered for sale. There are not enough inspectors because Congress does not provide enough money to pay their wages.

For the current fiscal year ending June 30, 1934, the appropriation actually usable by the Food and Drug Administration is $1,493,000—a little more than 1 cent a year for the population of the United States. For the 48 States of the Union there are provided 76 inspectors, an average of less than 2 inspectors for each State. Imagine 14 inspectors investigating food, drugs, cosmetics, nonalcoholic and nonintoxicating beverages covering the metropolitan area, which consists of the city of New York and adjacent counties, with a population of over 10,000,000. These 14 inspectors are supposed to inspect all the manufacturing and selling plants of New York City and its five boroughs, besides Albany, Schenectady, Syracuse, Herkimer, Utica, Rochester, Buffalo, and the lesser cities of the State of New York. Imagine four inspectors covering the entire State of California. Bad as it is for New York State and California, it is even worse in the rest of the 46 States of the Union. They have fewer inspectors than New York and California. Is this condition of affairs just? Is this adequate protection to 120,000,000 innocent consumers?

Would it surprise you to learn that certain so-called "germicidal, antiseptic, and disinfectant preparations", profusely advertised by prints, signs, and voice as being able to kill every form of bacteria and germs harmful to humans are so weak in their germ-killing effect that bacteria actually live and thrive in these very solutions and preparations? Alluring and emphatic claims and assertions will not kill germs.

Harmful germs and bacteria subjected to the germicidal effects of much-tooted concoctions, for which killing effects have been claimed within 15 seconds, have been proved to be alive and active at the end of long hours of complete immersion in the advertised germicidal fluid, when tests have been made by others than the manufacturer.

In one such series of tests, 21 so-called "antiseptics" were subjected to trial to determine the efficacy of the much-heralded product when used according to the actual directions for application printed by the manufacturers. Instead of the slaughter of germs promised, the results were wholly unsatisfactory, only the weakest of germs succumbing after 15 minutes to 1 hour instead of in the instantaneous slaughter promised.

Infections in industry from accidents due to the use of tools and machinery usually none too clean total about 250,000 a year. Industrial casualty insurance companies pay from 40 to 60 percent of their compensation cases for infected wounds. Time lost by employees in cases of infection of wounds averages 18 weeks longer in serious cases than where the wound is not infected; that is, the wound, of itself, is not as dangerous to the body as the germs that are introduced into the human system at the time of wounding or through later infection. The money loss from industrial wounds each year totals $104,000,000; the time loss, 4,450,000 weeks, or 85,000 years. These figures do not include wounds received in agriculture, the home, at play, or in transportation, and it is on all these injuries that the germicidal and antiseptic makers fatten.

Do the ladies and gentlemen of this House realize that what are called "radium cures" have sent several persons to horrible deaths after suffering frightful pain and torture ere they passed away? Throughout the length and breadth of our country the newspapers have carried full accounts of such tragedies. Radium has its uses in the treatment of certain malignant diseases by qualified specialists. Even these authorities, with all the knowledge obtainable and available about this mysterious substance, radium, have lost fingers, arms, and parts of their bodies, due to exposure to the effects of radium, and eventually have died from these effects. What chance do you think the innocent drinker of radium water, as it was called, had when this fluid, powerfully fortified by a highly destructive element, came into contact with the sensitive membrane and tissue of the internal organs? None whatsoever. Its sale and distribution were criminal.

I am wholly in sympathy with the efforts of womankind to make themselves as attractive as possible and to aid nature in this process by the careful and judicious help of art. If a touch of rouge on the cheeks relieves a natural pallor, any woman is justified in using it. If a tint of lipstick enhances the color and better defines the form of the lips, what harm does it do? Most men can tell when artificial aids have been used, and accept it as a whim of womankind, and let it go at that, in modern days. The women of Babylon and Nineveh, of Egypt, Greece, and Rome used cosmetics. Articles found in tombs prove that as a fact, absolutely beyond any question of doubt. They even bobbed their hair in the most approved method of 1934, as the monuments and statues of ancient days show. When women will, they will. Let the male of the species beware. [Applause.]

Mr. Chairman, adulteration of food is not a new racket of recent growth. It has been practiced by all peoples from the start of recorded time. "There is death in the pot" (II Kings iv : 40) was cried to Elisha to warn him that the herbs of which the pottage was made were poison weeds of which he could not eat.

Amongst the ancient Athenians a row was raised during the building of the Parthenon by the workingmen that their wine was being adulterated. A special wine inspector was appointed by the government to catch these adulterators. In 1482 a wine falsifier of Germany was forced to drink 6 quarts of his own vintage, from the effects of which he died.

Pliny the Elder, prior to the destruction of Pompeii and Herculaneum by the volcanic Vesuvius, complained that "white earth" was added to the bread baked in his day.

During the reign of William the Conqueror brewers were heavily fined for adulterating beer and were drawn around in carts receiving the jibes and execrations of an outraged citizenry.

In 1830 there appeared in England an anonymous book on the adulteration of food by the baker, brewer, grocer, cheesemonger, pastry cook, confectioner, and so forth. Most of the food purveyors were implicated. The author recommended that those found guilty of adulteration of food be exiled from England. He opposed fining those guilty of adulteration because of the large profits which made it easy for them to pay their fines.

Apparently the old racket goes on garbed in new vestments. Solomon was right when he said, "There is nothing new under the sun." But that is no reason for any manufacturer to concoct and sell, at ridiculous prices, depilatory creams for removing surplus hair, such as I show you, that contain a large percentage of thallium acetate, a most virulent poison, that has caused terrible and dreadful suffering and permanent scarification to women. These depilatories have been highly advertised and sold to innocent and unsuspecting women to their tragic regret and to their permanent disfigurement.

Here is a bottle of Jamaica ginger, commonly known to those who drank it as "jake", that an irresponsible manufacturer adulterated with triorthocresol phosphate, a powerful poisonous synthetic preparation, that caused horrible deformities and paralysis among 25,000 victims, many of whom died. Thus far sentences of 20 months in prison and fines of $2,500 were imposed upon two of the individuals responsible for shipment of this poisonous ginger extract, and a prison sentence of 17 months on a third. Two members of a Boston firm responsible for the manufacture of the goods have been prosecuted and upon having pleaded guilty were given jail sentences of 2 years each in addition to a fine of $1,000 against the company. One member of the firm is serving his sentence. The other is at liberty under suspended sentence.

This is the type of justice meted out to 5 people for killing hundreds of people and poisoning 25,000 people in 24 States of the Union. Thousands of these unfortunate victims of "Ginger Jake" poisoning are still suffering and remain crippled and paralyzed from the poisonous effects of this powerful drug. Millions of dollars have been paid in accident insurance by various companies in the United States to these tragic victims of unscrupulous and criminal business methods of racketeers and bootleggers operating despite the present pure food and drug laws of the United States.

Do you know that yeast used in some commercial breadmaking in the United States contains a chemical improver called "potassium bromate", and that French health officials consider this drug so harmful that its use in baking is prohibited in France? Still it is used in the yeast that goes into some of the bread that we eat in the United States.

Heralded far and wide by screaming advertisements everywhere, through radio, newspapers, magazines, periodicals, billboards, are the alleged great and powerful virtues, germicidal and antiseptic powers, of various well-known tooth pastes and preparations. The chief chemical used in forming one of these tooth pastes is so poisonous that a German officer committed suicide by swallowing the contents of a tube of it. Abrasive ingredients were found in other tooth pastes. These materials were shown to have sharp, heavy angles and edges that not only injured the gums but wore away the hard enamel of the teeth.

Penny prize candies containing copper coins, small toys, and even alcohol are made and sold by manufacturers to innocent little children. Their nefarious profits are obtained from the purchase by innocent children of wares that are heavily injurious, not alone from the prizes they contain but from the poor quality of the candy and the coatings used. It is serious enough when adults are gulled into purchase of foods, drugs, and beverages; but when children are induced by specious and cheap prizes to buy and eat stuff that often is not fit for hogs to eat, the business is being carried on to a point of villany that is indescribable. How would you like to find that your small boy or girl had stuck in its throat, or bronchial tube, a leaden toy, such as a jack, a rabbit, a chicken, or a copper cent covered with the green slime that only copper can produce? In many of these cases surgical intervention had to be resorted to to remove these foreign bodies from the throat and bronchial tubes of these innocent and unsuspecting children.

It would shock the conscience of the American people if they knew that thousands of lives are annually jeopardized upon the operating tables, and serious complications often ensue in our hospitals because the ether with which the patient had been anesthetized is contaminated and vitiated. Ten years ago 35 percent of all ether examined was found to be below standard; that is, dangerously impure and adulterated. When this fact became known there was some improvement. Recently tested samples of ether entering interstate commerce were found to be adulterated and impure.

How would you like to be one of the innocent victims operated in a hospital that might die on the operating table because the ether that the surgeon relied on to relieve you of pain, trusting to the manufacturers' promise that it is pure, gave you eternal sleep and relieved you of pain forever?

There is no time in a woman's life when she needs the most tender and sympathetic care, the utmost sanitation in all accessories, than when she is about to give birth to her child. Maternal mortality at childbirth is still too great. Perhaps the great mortality in modern childbirth that has caused the death of thousands of mothers can be attributed to the terrific hemorrhages that take place after delivery, due to the impotency of the drug called "ergot", which has been found to contain only one fourth of the strength it should have to stop the hemorrhages, which is the purpose for which it is used.

How many Members of Congress know that there is a little pamphlet usually issued monthly by the United States Department of Agriculture which is called "Notices of Judgment Under the Food and Drugs Act", in which are printed the names of organizations, groups, and manufacturers whose foods, drugs, cosmetics, and nonalcoholic and nonintoxicating beverages are being confiscated because these products have been found to be unfit for human consumption through adulteration, decomposition, substitution, and other causes.

Still, in the records I have searched, I have found that only one person was sent to jail, and that for a short time, for violation of the Food and Drugs Act. How many corporate owners, groups, and individuals who manufactured these foods and drugs unfit for human consumption have been arrested? Only one. The containers and packages holding these products are arrested, not the persons who are responsible for the placing of unfit, putrid, decomposed, and filthy food or below-strength or adulterated drugs or poisonous cosmetics in the containers and packages. The thing is made the criminal—not the person who is responsible for the thing—the person who made and sold the thing, whatever it was, that was unfit for human consumption. Did you ever hear of anything so tragically ridicu-

lous? Like arresting the jimmy and not the burglar. Or arresting the pistol and not the murderer. Or, as is actually the case, arresting the poison and not the poisoner. [Applause.]

Mr. Chairman, under the operation of the present food and drug law, I have found, time after time, as disclosed in these notices of judgment the governmental seizure of food that has been libeled as being "adulterated in that it consisted in part of a decomposed-animal substance." In one particular case the packing company admitted the allegation of the libel. The food, in this case, 925 cases of salmon, was released to the claimant conditioned that this decomposed food be made to conform with the Federal Food and Drug Act and the product was allowed to be reshipped back to Seattle to be reconditioned. I would like to have some Member of this distinguished House tell me how and by what means decomposed fish can be reconditioned to make it fit for human food and human consumption. The case I have referred to is that of the United States against McGovern & McGovern reported on page 213 of Notices of Judgment, issued in January 1934.

Ladies and gentlemen of the Committee, do you realize that 120,000,000 people in the United States spend $20,000,000,000 annually for food, drugs, cosmetics and nonalcoholic and nonintoxicating beverages. Think of it, $20,000,000,000. Yet the Congress of the United States for the current fiscal year appropriated net, only $1,493,000 to run the Food and Drug Administration and to enforce all the pure food and drug laws throughout the entire United States, which means that less than 1 cent a year is spent on each person to prevent him or her from being poisoned by unscrupulous racketeers in foods, drugs, cosmetics, and beverages throughout the United States.

May I repeat that to carry out the provisions of the Pure Food and Drugs Act there are only 76 food and drug inspectors employed. Imagine 14 inspectors being able to cover all the nefarious chicanery in food and drugs in the State of New York. Imagine the great expanse of the State of California being successfully covered by four inspectors. This is a tragic indictment of the negligence of legislation to provide sufficient appropriations to safeguard and preserve the vital interests in pure food and drugs of the consuming people of the United States. [Applause.]

During the last 14 years Congress has appropriated the tremendous sum of $250,000,000 to enforce the prohibition laws that the American people have detested and that were finally repealed. Congress has appropriated between twenty-five and fifty millions of dollars to exterminate the boll weevil, the corn borer, the fruit fly, the grasshopper, hog cholera, cattle diseases and God knows how many other countless parasites that are living in the animal and vegetable kingdom. Yet when it comes to protecting and preserving the human family, the men, women, and children of our Nation against poisoning, adulteration, substitution, abstraction, cheating in quality and quantity, of their food, drugs, cosmetics, and beverages we deny sufficient money to and emasculate the work of the Food and Drug Administration to such a pitiful state that it is impossible for that administration adequately and properly to function and to do justice to its work of preserving the health of 120,000,000 human beings.

Is cotton, or the destruction of the parasites that live and thrive on it, of more value than human life? Was the prohibition of drinking, interfering with the personal liberty of our fellowmen, of more importance than the protection of the quality and the purity of their food? Is the health of cattle and swine more important than the happiness, prosperity, and the health of human beings? Are crop profits of more importance than the physical and mental welfare of our fellowmen? Is human life of such little value that Congress does not appropriate more than 1 cent a year for each person to assure good, wholesome food to keep the vital spark going in our children, our wives and mothers, our aged and infirm, and ourselves? Answer me with your votes, when the time comes to grant adequate appropriations that will safeguard the life, health, and happiness of our American people and they will answer you when they come to vote for you. In this new era of the new deal—the square deal—the forgotten man must come to the fore. Humanity must take its place in the forefront of civilization. In the future call of the national roll of honor human rights must and will supersede property rights. [Applause.]

Just as the circulation of the blood carries life and nutrition to every tissue of the body, so do newspapers, magazines, periodicals, and other publications carry news, information, and advertising to 120,000,000 people of the United States.

Newspapers, magazines, periodicals, and publications receive only 15 percent of their gross income through circulation. The other 85 percent comes to them through selling advertising space in their publications. Every publication uniformly preaches the gospel of honesty, of integrity, of justice in the business relationship of mankind with his fellowman. Why should not every publication itself do likewise and carry only the truth regarding advertising?

Why should many of our publications exaggerate, falsify, and disseminate advertising news that is palpably and grossly unjust to the consuming public and unfair to the ethics and standards of honest publications?

The slogan of the New York Times, one of the greatest newspapers in all the world, is that it prints "all the news that's fit to print." Why should we not paraphrase that sentiment to every publication and say, "You shall print only the advertising fit and right to print"? The New York Times lives up to this ethical standard and has prospered. Why not all publications?

Only a short time ago the late William E. Humphrey, of the Federal Trade Commission, estimated that there were at least 1,000 advertisers of fraudulent schemes now operating regularly with the aid of certain magazines and newspapers throughout the country. In one publication alone he found no less than 50 different advertisements which he considered safe to designate as illegal. Mr. Humphrey contended that the annual loss to the consumers through false, misleading, and exaggerated advertising runs into hundreds of millions of dollars.

Mr. Chairman, ladies, and gentlemen, it would be a most liberal estimate to say that only 25 percent of the business transacted in our country each day is done as a result of natural demand. The other 75 percent is contributed as a result of salesmanship in one form or another. It is on this 75 percent of advertising that the welfare and prosperity of our country is dependent.

Advertising is founded on the publicity formula and the economic fallacy that "repetition makes reputation." Constant advertising of the virtues and qualities of all food, drugs, cosmetics, nonalcoholic and nonintoxicating beverages brings the product before the consuming public and induces them to purchase food materials whether they need them or not.

More than 16,000,000,000 copies of daily, weekly, and monthly periodicals are printed and circulated every year in the United States. Every copy carries advertising matter intended to induce the readers to buy some article of commerce, and of these at least one third are food, drugs, beverages, and cosmetics. Approximately $1,000,000,000 is paid publishers annually by advertisers who use the 20,000 daily and monthly newspapers, which have a circulation of about 1,400,000,000 a month.

These publications live on revenue collected from advertisers. The advertisers live on money collected from the purchasing public.

For many years in the past a great many publishers, without consideration for their readers, accepted and published advertisements filled with false and misleading representations and thereby became parties to the deception and fraud perpetrated on their readers.

The vast majority of publishers today are reputable and respect the confidence of and guard the welfare of their readers. The business office of a newspaper or periodical edits advertising copy as carefully as the news section edits reading matter. These reputable publishers will not know-

ingly publish false or misleading advertisements. They approve all efforts to stop such advertising and loyally cooperate with the Federal Trade Commission, which, under the law, now has charge of this type of advertising, in its efforts to prevent it.

Unfortunately, there are many unscrupulous advertisers and publishers who still print any advertising copy for which payment is made to them.

Laws are essential to restrain and punish such unscrupulous advertisers and publishers in order to protect reputable advertisers and publishers as well as the general public.

Laws are not necessary for law-abiding citizens, but they are essential to protect the law-observing from the law-breaking element.

Every reputable advertiser and publisher need fear no law designed to prevent false, misleading, or fraudulent advertising, since they do not use nor publish such form of advertising. It is the unscrupulous and disreputable advertisers and publishers who must be restrained and punished for their use and abuse of a noble profession and institution, the daily, weekly, and periodical press, to forward their nefarious projects to make profits from advertising worthless and dangerous medical products and for helping, through advertisement to dispose of food unfit for human consumption.

The present cooperation of the Federal Trade Commission with the Food and Drug Administration, for the prevention of unfair trade practices as they apply to the advertising in a false, misleading, or fraudulent manner of foods, drugs, cosmetics, and nonalcoholic and nonintoxicating beverages, is made more powerful by my food and drug bill. No powers in the present Federal Trade Commission Act are disturbed by my bill. Indeed, their commendable work is fortified, enhanced, and strengthened.

Newspapers, magazines, periodicals, and publications have constantly been denouncing the paternalistic attitude of our Government through its granting of subsidies. We have subsidized the railroads, the great banking institutions, the great life-insurance organizations, the merchant marine, the different States of the Union for various projects and enterprises, and, last but not least, we have subsidized the newspapers, magazines, periodicals, and publications during the last year by granting them a subsidy of almost $90,000,000 through the carrying of these publications as second-class mail matter.

It should, therefore, be the privilege, no, I should say the duty of newspapers, receiving the beneficence and munificence of the contributions of 120,000,000 of citizens, taxpayers of the United States, that these great publications to carry into fruition and realization the ideal of having their advertising space carry advertising news that is the truth, the whole truth, and nothing but the truth. [Applause.]

Our modern financial and monetary system is founded upon the philosophy of economic scarcity of gold, while our mass technological standards and industries are built upon the philosophy of economic abundance. These two systems, one represented by economic scarcity and the other by economic abundance, are in conflict with each other. They do not articulate. They do not harmonize. They fail to unite. Because of this incompatibility between economic scarcity and economic abundance, advertising becomes an accepted necessity adequately to distribute in the markets of our country and the world the materials of production. The present condition of production and distribution brings into play the disintegrating forces of competition.

In the old days competition was the life of trade. Today competition is the death of profits. The only medium whereby the principle of economic scarcity and the element of economic abundance can be harmonized is through the element of advertising. Constant repetition is the slogan, watchword, and shibboleth of modern business enterprise. Advertising within the last 30 years has been chiefly instrumental and responsible in making the great strides that business, commerce, and industry have enjoyed.

It has always been my intent, and I believe always my action, to be fair and just to everyone. In the food and drugs bill which I introduced in the House on January 29, 1934, H.R. 7426, I have embodied proposed legislation that I think will meet and cure many of the difficulties which now arise under the present food and drugs laws.

My main thought has been the protection of the American people against those who would sell them food, drugs, cosmetics, and nonalcoholic and nonintoxicating beverages unfit for human consumption. My chief desire has been to be fair and just to the 90 percent of the producers of such products, who honestly and sincerely desire to provide wholesome goods to our American citizens. No honest producer, processor, or manufacturer need fear the effect of any section of my bill. It is designed to protect him against the racketeersman in his own line of endeavor, as well as against the charlatan and quack, as well as to protect the public.

The cornerstone and touchstone of worthiness I have used throughout my bill is this: Does the product contain anything that is harmful or injurious to the average human system? If it does not, there is nothing to prevent its sale anywhere and any place under the jurisdiction of the United States Government.

If the article be food and it be found to be pure and wholesome, within the common and accepted meaning of this term, the Food and Drug Administration is directed to issue a permit to the producer, processor, or packer to print on or surcharge his private label with these words:

This product meets the requirements of the quality standards of the Food and Drug Administration of the United States of America.

No manufacturer or anyone else could ask more than this.

I define a food to be any edible material, or materials, the nutritive elements of which are ingestible, digestible, absorbable, assimilable into, and beneficial to and not harmful nor injurious to the average human body.

Producers and manufacturers of drugs or medicants are required to file the formulas of their preparations with the Food and Drug Administration, but such formulas need only disclose the active therapeutic ingredients; and all formulas must be kept secret. If anyone connected with the Food and Drug Administration shall reveal to any unauthorized person the contents of any formula in whole or in part, either while in the employ of the Administration or subsequent thereto, that person is subjected to imprisonment of from 1 to 3 years, and the person soliciting or inducing such disclosure is made equally culpable of a felony and is subjected to the same penalty and must give an accounting of and pay compensatory damages for the illicit use of such formula to the rightful owner thereof. Mutilation or destruction of any formulas, records, or correspondence carries the same penalty. Therefore every safeguard is thrown around the formulas of the manufacturer and producer to prevent the formulas being made known to anyone who might use them illegally to their own purposes.

The manufacturer of any food, drugs, cosmetics, or nonintoxicating and nonalcoholic beverage may continue to use his private label and his present trade mark. Neither right is disturbed in any way, provided that the label contains no false or fraudulent statements in conflict with the contents, capacities, or the amount of fill in the packages or containers in which it is sold. In addition to the surcharge on pure-food products that I have referred to, my bill provides for three other labels to be used, which are white, blue, and orange in color, so the buying public at once can see into what class various drugs are placed.

Here are the ways the classes and the colors of the labels are determined: If the material or materials described in the formula or in the prints, labels, or labeling are not harmful to the average human system, if intaken or applied by self-treatment and contain no harmful drug, injurious to the average human system in the proportions represented by the formula or in the prints or labels presented to the public, the applicant shall be granted a license by the Food and Drug Administration to use a white label on the immediate container or package of his product bearing the words—

Formula registered in the Food and Drug Administration of the United States of America at Washington, D.C.

And in type of the same size the words—

Contains no material or materials harmful or injurious to the average human system in the proportions represented by the formula or formulas for this product.

This white label will be a certificate of character. It will indicate that the food, drugs, and beverages are pure and wholesome. It will make the American consumer "white-label conscious."

I digress to call your attention to the words "average human system" and the reason for their use. All persons do not react the same to all drugs. Some persons have what physicians call an idiosyncracy against certain foods and drugs. Shellfish, strawberries, cucumbers, and other edibles produce a rash on some folk. Certain drugs, camphor, quinine, and others affect some persons adversely, but that is no reason why the rest of us should be deprived of edibles, potables, and medicines that act favorably on us and produce beneficial results.

Resuming: There are certain powerful and effective drugs and extracts that are most valuable in the restoration of health, but their potency is such that they can be used safely only under the prescription and continuous observation and care of a physician. For such drugs my bill provides that the container or package shall bear a blue label, permit for the use of which is to be issued after the filing of the formula with an analysis of it by the Food and Drug Administration. This label shall bear the words—

Formula registered with the Food and Drug Administration, Washington, D.C.

And shall also state the dosage and name of the drug and continue—

Caution! Contents to be used only under the care and supervision of a registered physician.

Certain hypnotic and narcotic drugs such as opium, morphine, cocaine, and so forth, are highly useful in the practice of medicine and in the alleviation of pain. But they never should be self-administered and should be available to the general public only on the prescription of a doctor and used medically only under the care and supervision of a physician.

These drugs are placed in a third class, and their containers or packages under the provisions of my bill must bear an orange-colored label, permit to use, which is to be granted by the Food and Drug Administration after filing of the formula, and its analysis of the materials proposed to be sold. This label shall bear the words, "Formula registered in the Food and Drug Administration at Washington, D.C.—Caution, Habit Forming", shall bear the name and dosage of the habit-forming hypnotic or narcotic drugs, and continue "to be sold and used only under the prescription and supervision of a registered physician."

Hair dyes which contain an aniline derivative, or an amine or a metallic salt or compound, under the provisions of my bill, shall bear on their containers or packages a white label which shall state this, followed by the words: "For external use only and must be used with care, and should not be used on eyelashes or eyebrows." The formula must be registered with the Food and Drug Administration, and when a permit is granted by it for such use the label shall state "Formula registered in the Food and Drug Administration at Washington, D.C."

The decision as to the medical, therapeutic, or remedial status of the materials in any container or package offered for sale and submitted for analysis does not rest finally with the officials of the Food and Drug Administration. My bill establishes a board of appeals for food, drugs, nonalcoholic and nonintoxicating beverage cases consisting of four specially qualified members to be appointed by the President. To the board any applicant who has been refused a permit to use a white, blue, or orange label, or whose product has been set in a lower class than he thinks it should be placed may appeal. If the board sustains his contention he gets his label; if the decision of the board is adverse to him he still retains his right to appeal to the Federal courts, and the same right of appeal to the Federal courts is granted the Food and Drug Administration if it desires to use it.

In my bill it is provided that every container or package holding food, drugs, cosmetics, or nonalcoholic and nonintoxicating beverages shall bear a trade mark registered in the United States Patent Office on the private label of the manufacturer. If the manufacturer now has a trade mark so registered, he need not obtain a new one. The art quality in the design of the trade marke is not considered. A special class for such trade marks is established in the Patent Office and the fee for such trade marks is reduced from $15 to $1.

The applicant for a permit to use the Food and Drug Administration labels must submit samples of his product for analysis to the Food and Drug Administration, and for this laboratory work a very reasonable fee of from $1 to $10 is charged him. Counterfeiting or imitating any private or Government label is made a felony and penalized by from 5 to 10 years' imprisonment, so the manufacturer gets protection for his trade mark and private label such as he never had before. No trade mark is granted until the product has been certified by the Food and Drug Administration not to be harmful or injurious to the health of any average human being.

What I consider the most important feature of my bill is the complete emancipation of the small drug, grocery, and provision storekeeper. He will no longer be subjected to the humiliating disgrace of being indicted and arrested for a crime of which he is innocent. His belief in the manufacturer as to his good faith in producing and selling to him wholesome products relieves him of the responsibility if he acted in good faith. The responsibility is placed where it belongs—at the source—the manufacturer, producer, processor, or packager of food, drugs, beverages, and cosmetics that sold him food and drug products unfit for consumption or use by human beings.

For the benefit of my colleagues I am going to ask unanimous consent to extend my remarks by printing after the conclusion of my address the full text of my bill I have introduced to cure all the evils about which I have complained.

Mr. Chairman, ladies, and gentlemen, the great progress of the United States can be attributed to the tremendous advances that have been wrought in the social, economic, and political fabric of our Republic.

Each Congress of the United States has contributed its political share to the agricultural, industrial, and commercial development of our people. In every form of human endeavor, in science, in art, in literature, in philosophy, in statesmanship, in engineering, invention, and technological perfection and improvement, our Republic stands in the forefront with the highest civilized nations of the world.

In the past, those Congresses have been remembered that have declared war in order to preserve the ideals for which our Republic was founded. The War of 1812, the Mexican War, the Civil War, the Spanish-American War, the World War.

On the field of battle of these great conflicts of our country's past, millions bared their breasts to shot and shell and died that our institutions might be preserved. Today we are engaged in another great conflict. It is to determine whether these institutions founded upon the lifeblood of our martyred citizens shall endure or shall perish. We are waging a great war against economic depression. Revolutionary changes are taking place everywhere. The policies upon which the superstructure of our Government has been reared are tottering and collapsing. Millions of deserving Americans ready to die for our Republic in time of war are starving in times of peace, amidst a harvest of plenty.

To preserve our institutions of hallowed memory, to keep faith with those who have given up their today that others may have their tomorrow, it has become necessary for Franklin D. Roosevelt, the beloved Commander in Chief of our Republic, to strengthen, fortify, and reconstruct those pillars that have supported the superstructure of our social, economic, political, and capitalistic form of government.

When the actions and deeds of every Congress that has preceded us in the past will have been forgotten in the ashes of time, the Seventy-third Congress will remain and

endure in the memory of historians because it enabled us to escape a bloody revolution through adoption and practicing of the principles and ideals of social and economic justice. This action of the Seventy-third Congress has enabled us to rear a new edifice dedicated to our fellow man and consecrated to the philosophic ideals of social, economic, and political justice that will bring the greatest good to the greatest number.

While we are passing through this great period of economic and social transformation, let us not forget in these trying days and depression times, to protect the life, the limb, and health of 120,000,000 American consumers through the adequate enactment of laws that will safeguard to each and to every American citizen food, drugs, and beverages that are and by the rights of humanity should be fit for human consumption. [Applause.]

We have given much consideration to capital and material things, now let this Congress give consideration to men, women, and children and see to it that they are provided with food that is good and clean, with food that is wholesome, with beverages that are pure and palatable, and with medicines that are remedies for sickness, that human life may be made better, fuller, and happier for all. [Applause.]

Mr. Chairman, now that I have concluded my remarks on the subject of pure foods, drugs, cosmetics, nonalcoholic and nonintoxicating beverages, I shall be pleased, as is my usual custom, to answer any questions any Member of the House desires to propound to me.

By the way, I am very pleased to see sitting in the body of the House of Representatives our beloved and distinguished Speaker, the Honorable HENRY T. RAINEY. Our gracious Speaker told me this morning that he was present in the House when the famous Dr. Henry W. Wiley, the great pioneering expert in foods, and James Mann, the leader of the House on the Republican side, appeared on this floor to explain to the Membership of this House the necessity for the enactment of the first pure food and drugs act in 1906. Speaker RAINEY was greatly interested at that time in that measure, an interest which he has maintained ever since in legislation that will insure pure foods, drugs, and beverages, and harmless cosmetics for the men, children, and women of our country.

Our beloved Speaker has been most gracious and exceedingly helpful to me in my efforts to bring the pure food and drugs law up to date, to strengthen them in such a way as will forever prevent fraud and deception in the preparation, manufacture, and sale of articles that play such a great part in the preservation of the health and vigor of our people. For his courtesy to me I most emphatically wish here and now sincerely and gratefully to thank our great Speaker. [Applause.]

Mr. Chairman, ladies and gentlemen of the Committee, before I begin to answer any question that any Member of the House may ask me I am going to show you actual examples of poisoned foods, drugs, and cosmetics, which have been before your eyes here in the well of the House during my discussion. Look at this sample of noodles in clear cellophane and in gold-colored cellophane. Both samples are the same, but the one in the gold-colored container appears as if it were heavily loaded with eggs. Sheer fraud.

Look at this, which shows how the Lydia Pinkham people meet the requirements of the drug law on their label, but continue to make unwarranted claims in their hand-out advertising. If this concoction has any value, it is only in the 18 percent alcohol contained in the alleged remedy.

Here is an exhibit of the kind of alleged Jamaica ginger that a few years ago was sold throughout 24 States and poisoned over 25,000 persons. It is the infamous "jake." It was made in Boston and four men were imprisoned and fined for this murderous fraud and another was sentenced but the sentence was suspended.

This is an example of how a trustful woman, desiring to add to her attractiveness, used a preparation called "Lure-Lash" on her eye lashes, with the result that one of her eyes was destroyed and she was made blind. President Roosevelt shuddered with horror when his attention was called to this.

Here is a preparation that is made from a rank weed called horsetail. It is of no remedial, value but it is advertised to cure a dozen diseases besides diabetes.

Here is a concoction called "Bar-Ban" for which it is claimed that it can be used for rheumatism, neuralgia, bronchitis, colds, kidney trouble, and a long list of diseases. It could be used, but it would be useless for any remedial purpose.

Here is an advertisement of yeast to make a woman grow thin; I have another advertisement of another yeast that claims to make women grow fat. One yeast makes fat women thin; another makes thin women fat. The age of miracles must have come back. [Laughter.]

How many Members of the House know that the Food and Drug Administration issues a monthly pamphlet under the title of "Notices of Judgment" in which are printed the often grewsome details of cases brought against food poisoners? I will have these passed around to the Members of the House. Read them. Take them home with you and study them. You will see from them the necessity of efficient and punitive food and drug laws to stop the racketeering in edible and drinkable products.

Look at these bottles. This one is a genuine 3-ounce bottle. This one seems larger, but is not. It is a 2-ounce bottle. Note the way it is made taller and thinner. Here is another fake bottle. The glass side walls are so close together that this bottle holds only three quarters of an ounce instead of its pretended 2 ounces.

Here is the infamous Marmola of unsavory memory. The name is craftily attractive, but the material itself is vicious when used for self medication. It contains thyroid extract, which is very dangerous to use unless given under the supervision of a physician. Marmola has ruined the health of many unfortunate women who have used it to their bitter regret.

This product that I show you is Koremlu. It was put up by Cora M. Lubin and contains thallium acetate and was used as a depilatory. Over two and a half million dollars damages were asked for in suits brought against this woman, and she is now a bankrupt. But the product is still being sold to ruin and scarify thousands of unfortunate women who buy and use this preparation.

Here I show you a set of testimonials for an alleged remedy, called B & M, and beside them are the death certificates of those who wrote the testimonials and died from the diseases it was alleged to cure.

This B & M alleged remedy is the king fraud of them all—B & M. It began as a horse liniment and was used only for horses. Now it is advertised everywhere to cure tuberculosis, pneumonia, bronchitis, blood poisoning, asthma, heart disease, and every disease that mortal flesh is heir to. Here is the evolution of quack medical concoctions beginning with the horse and ending with man.

Mr. BOLAND. Will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Pennsylvania.

Mr. BOLAND. May I ask the gentleman if he has read the bill I have introduced (H.R. 8316) along this line?

Mr. SIROVICH. For the benefit of my distinguished friend, and for the edification of the House, I want the Membership to know that there have been several bills introduced regarding pure food, drugs, and cosmetics. One is additional powers to the Secretary of Agriculture which I sponsored in the House and which I have relegated to the background, because it takes away privileges and prerogatives of the Federal Trade Commission and emasculates the work that this great organization is doing. It also gives additional powers to the Secretary of Agriculture to which I am opposed. Then we have the Black-Stephens bill, which is a bill written by the proprietary interests which is simply the old, pure food and drug legislation as it now exists, with a couple of Ethiopians buried in the middle, which would continue the very conditions I have been criticising here.

My friend PAT BOLAND has introduced a bill which I think, if my bill could not be passed, is one of the finest and most complete and progressive measures ever brought before the House. It is a bill that has been written by the Consumers Research of the United States, representing at least 100,000 consuming people. It is a bill that is designed to bring about the millennium in food, drugs, cosmetics, and beverages. It is a bill that will help every human being to have the quality standard and nutritive value in foods and drugs to which he is entitled, and I want to compliment my friend PAT BOLAND for having the courage to introduce this kind of bill. [Applause.]

Mr. BEAM. Will the gentleman yield?

Mr. SIROVICH. I shall be very pleased to yield to the gentleman.

Mr. BEAM. I was very much interested in the gentleman's explanation of the anesthesia proposition. Does not the gentleman think it would be beneficial to the doctor, to the hospital, and to the patient if some analysis were made of the quality of the anesthesia administered to the patient without any direction from the Government itself?

Mr. SIROVICH. I want to explain, for the benefit of my colleague and friend, that the United States Government has a Bureau of Standards and it never purchases anything until this Bureau investigates it to see that everything that is given to any of Uncle Sam's men is of the best quality. It is about time we established a bureau of standards of the United States that would investigate all the food products for the benefit of the consuming public in just the same way. So I believe if we had this kind of bureau that could investigate ether and other products, the doctors and the public hospitals would be in position to buy the best they can have.

Mr. SHOEMAKER. Will the gentleman yield?

Mr. SIROVICH. I yield to the gentleman from Minnesota.

Mr. SHOEMAKER. It may interest the gentleman to know that our so-called "Bureau of Prisons" has been buying from the wholesale houses stale goods and drugs that have been on the shelves for a long time and has been killing prisoners with them in our Federal penitentiaries.

Mr. SIROVICH. That is not so bad, I will say to my friend, as when the United States Government, in 1920, sold all the ether it found was worthless after the war was over. It sold this to second-class dealers with the understanding that they would use it for varnish, shellac, and other similar purposes. One cruel man relabeled it and sold it to the hospitals of the United States, and 35 percent of it was so vitiated and contaminated that thousands of people died in our country because of its use. I read of one case where there was stamped on an article by the Government of the United States the word "second", and some unscrupulous dealer who bought this product changed it to "second to none" and sold it in that way.

Mr. FITZPATRICK. Will the gentleman yield?

Mr. SIROVICH. I yield to my colleague from New York.

Mr. FITZPATRICK. What are the qualifications that the Government requires of a food inspector? The gentleman knows that to enforce a law of this kind such a man would have to have special qualifications to be able to make such investigations.

Mr. SIROVICH. Mr. Chairman, there are thousands of doctors in the United States who are in penury and want and would be glad to act as food inspectors if they were given an opportunity to take such an examination; but you have not given the Food and Drug Department the appropriation that they need to effectively carry on their work. You have only 76 food inspectors in the United States. We have 48 States in the Union, and if you gave every State 2 inspectors, you would have to have 96. Take my friend TOM BLANTON. BLANTON'S State, from what the former Speaker, Jack Garner, told us, could be divided into six States of the Union because it is so large. In that entire State they have not more than one or two inspectors to look after the food, drugs, and cosmetics that they are using there.

Mr. FITZPATRICK. Are these inspectors doctors?

Mr. SIROVICH. No; they are not doctors.

Mr. FITZPATRICK. That is just what I am trying to find out. What are the qualifications required by the Government?

Mr. SIROVICH. The qualifications are such as necessitate knowledge of chemistry, of the physiological action of drugs, ability properly to analyze materials, and determine where adulteration was made. He would have to know physiological chemistry and physiology, and everything that pertains to food, drugs, and cosmetics.

Mr. BLANTON. Will the gentleman yield?

Mr. SIROVICH. I will yield to my friend.

Mr. BLANTON. What are you going to do when the inspectors disagree and when the doctors disagree as to the efficacy of remedies? Forty years ago some doctors would not let us have ice cream when we had a fever but now some feed us on ice cream. Years ago some doctors would not let us have ice with fever and now they pack us in ice. [Laughter.]

Mr. SIROVICH. Increased knowledge, experience, and scientific observation are constantly making the medical profession improve its methods. Time and the increased longevity of mankind has vindicated changes and consequent improvement in treatment. The gentleman from Texas and I have been very consistent in our common ideals. When I was battling against poison in alcohol little did he and I dream that when I called the attention of the people of the United States, single-handed, almost 8 years ago, to poisoned liquor, that we would repeal the iniquitous eighteenth amendment at this time. All the time he was exclaiming, "Hold the line! Hold the line!" Both of us have held the line. [Laughter and applause.] My good friend from Texas does not know when he is licked.

Mr. BLANTON. Will the gentleman yield again?

Mr. SIROVICH. It is a pleasure to yield to my aggressive colleague.

Mr. BLANTON. Does the distinguished physician who does not drink himself feel proud that in most of the large hotels and cafes in Washington you can buy hard liquor that is drunk openly before young people?

Mr. SIROVICH. Let me say to my distinguished friend, whom I personally love, honor, and respect, that I am not conversant with the situation in Washington with which he seems to be so familiar. [Laughter.] Let me say, however, as one who never drinks and never smokes, that I believe in moderation in every form of indulgence. I never condemn the use of anything, but I always condemn the abuse of overindulgence in anything that would make a man or woman lose their self-respect. [Applause.]

Mr. Chairman, I ask unanimous consent that I may have permission to extend my remarks by incorporating here my bill, H.R. 7426.

The CHAIRMAN. Is there any objection to the request of the gentleman from New York?

There was no objection.

[Here the gavel fell.]

Following is the bill referred to:

H.R. 7426

A bill to protect the consuming public of the United States of America, numbering 125,000,000 people, and the honest producers and distributors, numbering 50,000 persons, of food, nonalcoholic or nonintoxicating beverages, drugs, and cosmetics, sold, or offered for sale, in containers or packages, and to prevent the manufacture, shipment, and sale of adulterated or misbranded food, drugs, nonalcoholic and nonintoxicating beverages, and cosmetics, and to regulate traffic therein; to prevent the false or fraudulent advertisement of food, drugs, nonalcoholic and nonintoxicating beverages and cosmetics, and for other purposes

Be it enacted, etc., (1) That 9 months after the passage of this act every bulk and separate container or package of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, produced or prepared or processed or packaged or distributed in the United States of America, its Territories, possessions, or in the District of Columbia, shall have affixed thereon and thereto a print or label which shall state: "Trade mark and label registered in the United States Patent Office. Formula registered in the Food and Drug Administration."

(2) When the formula or formulas of the product is filed for registration in the Food and Drug Administration by the producer, or preparer, or processor, of food, nonalcoholic or nonintoxicating

beverages, drugs, or cosmetics, the formula or formulas, shall fully describe the physiological action and properties and proportions, combination or composition of food, nonalcoholic or nonintoxicating beverage, drug, or cosmetic named in the formula, the names of all the active ingredients only being given in full. If the material or materials, named in the formula or formulas be drugs, the therapeutic action, accepted by recognized authorities, shall be fully stated; if the material or materials be cosmetics or any preparation intended for use in improving the appearance of the user, the action, after external application, of the simple form or of the compound, composition, or combination of the material or materials shall be fully stated.

(3) On receipt of the information herein required, together with specimens or samples of sufficient quantity for all tests of the product of the food, nonalcoholic or nonintoxicating beverages, drugs, and cosmetics, and accurate copies of the prints, label, labels, and labeling purposed to be used by the applicant on or in the containers or packages of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, which prints, label, labels, and labeling shall truthfully state the authoritative accepted use and physiological action of the material or materials described in the formula or formulas, the Food and Drug Administration shall make chemical analysis, or other necessary examination, for which the applicant shall pay a minimum fee of $1 and a maximum fee of $10, of the specimen or sample material or materials submitted, and of similar material or materials purchased in the open market, if obtainable, and shall compare the material or materials submitted and purchased with the formula or formulas, submitted by the applicant to determine—

(1) If the material or materials described in the formula or formulas, or in the prints, label, labels, or labeling and offered or purposed to be offered for public or private sale, or sold, are not harmful to the average human system if intaken or applied by self-treatment in or to the average human body, and that it or they contain no harmful drug injurious to the average human system in the proportions represented by the formula or formulas, or in or on the prints, label, labels, or labeling presented to the public;

(2) If the material or materials described in the formula or formulas are such that they cannot be used safely for medicative, remedial, palliative, antiseptic, germicidal, disinfectant, or beautifying purposes except under the care and supervision of a registered physician;

(3) If the material or materials described in the formula or formulas, contain any habit-forming, hypnotic, or narcotic drug or drugs, or the material or materials singly are habit forming, hypnotic, or narcotic, and are designated as such by recognized competent authorities, and should be used only under the prescription and care and supervision of a registered physician.

SEC. 2. (1) If there be food in the container or package, with or without a liquid concomitant, and such food be found to be pure and wholesome, within the common and accepted meaning of this term, with no essential element or constituent abstracted, and not to be filthy, putrid, adulterated with foreign or inferior substances, or preserved, processed or packed, or distributed in such manner or by such means or in such places as to be injurious to the health of an average human being, or animal used for food, and to be equal to or surpass the quality standards for that particular food or the general standards for food set up by the Food and Drug Administration under the Food and Drugs Act, the Food and Drug Administration shall issue a permit, to continue in force while this standard is met by the producer, preparer, processor or packager, or distributor of food, to print on or surcharge his label, labels, labeling, or prints with the words: "This product meets the requirements of the quality standards of the Food and Drug Administration of the United States of America."

(2) A food is hereby defined for the purposes of this act to be any edible material or materials the nutritive elements of which are ingestible, digestible, absorbable, assimilable into and beneficial to and not harmful nor injurious to the average human body.

SEC. 3. (1) The Food and Drug Administration is hereby authorized and directed to determine, establish, and promulgate, from time to time, reasonable standards of quality, condition, and/or fill of containers or packages for each class of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics as will, by fair judgment, promote honesty and fair dealing in the interest of the consumer; the Food and Drug Administration is further authorized and directed to prescribe and to promulgate, from time to time, the form of statement that must appear in a plain and conspicuous manner on each label, print, or labeling on or in each immediate container or package of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics that falls below the standards set by and promulgated by the Food and Drug Administration; and the Food and Drug Administration is authorized to alter such form of statement, from time to time, as may be necessary to keep the product level with any improvements in producing, preparing, processing, or packaging that may be developed. In promulgating such standards and forms of statements and any alterations thereof, the Food and Drug Administration shall specify the date or dates when such standards shall become effective, or after which such statements shall be used, and shall give public notice not less than 6 months in advance of the date or dates on which such standards shall become effective or such statements shall be used. Nothing in this paragraph shall be construed to authorize the manufacture in or the sale, shipment, or transportation of adulterated or misbranded food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics into or from any State, Territory, or possession of the United States, or into any other State, Territory, or possession of the United States, with intent to violate the provisions of this act.

(2) A product of food, drugs, nonalcoholic or nonintoxicating beverages, or cosmetics shall be deemed to be misbranded if the material or materials or ingredients within, associated with, or combined with such product are not capable of producing the alimentary, curative, medicative, remedial, palliative, antiseptic, germicidal, disinfectant, or beautifying effects and results that are claimed in the label, labels, labeling, or prints attached to, affixed on, or delivered with the product they describe, or otherwise distributed, or if the statements appearing on the label, labels, labeling, or prints attached to, affixed on, or delivered with the containers or packages holding such product are intentionally false or misleading regarding or concerning the contents of the container or package, or if the material or materials fall below the standards authorized herein and in the present food and drug law, as amended, to be set by the Food and Drug Administration.

(3) Nothing in this act shall be held to prohibit the production, manufacture, preparation, processing, packaging, or the offering for sale or distribution of any material or materials, or the combination of a medical formula or formulas, beneficial for the protection, maintenance, or promotion of the public and personal health of the population of the United States of America, its Territories, possessions, and the District of Columbia, if the use of such material or materials, formula or formulas is not injurious to the health of average human beings, and if such material or materials, formula or formulas is or are recommended by a lawfully registered physician or by competent medical authorities.

(4) Any drug, medical or masticatory substance, preparation, product, compound, combination, or composition when mixed with food or coated with confection or other disguising materials shall be deemed to be either a drug or a food, dependent upon its intended use, and shall be classified as such, and its use and physiological action and effects shall be described clearly on the descriptive label on the container or package.

(5) After examination and analysis of the submitted material or materials, if the material or materials shall meet the requirements of this act and the food and drug act, as amended, the Food and Drug Administration shall issue to the applicant therefor a license to print, produce, or impress a label descriptive of his product and to use and be required to use such print or label or labels or labeling as its examination and analysis warrant, which license shall clearly indicate in which class hereinbefore set forth, the material or materials described in the formula or formulas and submitted for examination and analysis should be included.

SEC. 4. (1) If the material or materials fall in class 1, as hereinbefore described, the applicant shall be granted by the Food and Drug Administration a license, revokable for cause, to use, and be required to use, a label, white in color, on the immediate container or package holding his product, bearing the words: "Formula registered in the Food and Drug Administration of the United States of America at Washington, D.C." in clearly legible text of the same size throughout and continue: "Contains no material or materials harmful or injurious to the average human system in the proportions represented by the formula or formulas for this product."

(2) If the material or materials fall in class 2, as hereinbefore described, and if the formula or formulas contains the names of material or materials that may prove dangerous or harmful or injurious to the average human system, unless used under the care and supervision of a registered physician, then the label, blue in color, shall bear the words: "Formula registered with the Food and Drug Administration of the United States of America at Washington, D.C.", shall next state the name and dosage of injurious drugs, and continue: "Caution—Contents to be used only under the care and supervision of a registered physician", in clearly legible text.

(3) If the material or materials fall in class 3, as hereinbefore described, the applicant shall be granted by the Food and Drug Administration a license, revokable for cause, to use and be required to use, a label, orange in color, on the container or package holding his product, bearing the words: "Formula registered in the Food and Drug Administration of the United States of America at Washington, D.C.; caution—habit forming", and state the name and dosage of habit-forming contents of hypnotic or narcotic drug or drugs, as the case may be, and continue: "To be sold and used only under the prescription and supervision of a registered physician." The words "caution" and "habit-forming" shall be prominently displayed on the label and the other text be clearly legible.

(4) The Food and Drug Administration is hereby authorized and directed to prohibit by regulation the transport, sale, or gift to or from any State of the United States, or its Territories, possessions, or in the District of Columbia, of any product or preparation offered for sale or sold as hair dye which contains any of the following material or materials, an aniline derivative or an amine, a metallic salt or compound, unless there shall be affixed to or attached to the container or package a label, white in color, which bears the words "Formula registered with the Food and Drug Administration of the United States of America; caution—this product contains an aniline derivative, or amines, or metallic salt; it is for external use only and must be used with care and should not be used on eyelashes or eyebrows." The words "caution" and "external use only" shall be in capitals of the text.

(5) Every container or package transported, sold, or given away, in the United States, its Territories, possessions, and in the District of Columbia, containing virus, therapeutic serum toxin, antitoxin, bacterial product of analagous products, or any serological or bacteriological products or derivatives shall bear a blue label affixed thereto or thereon which shall state the date of actual manufacture and the final date beyond which the material or materials cannot reasonably be expected to produce the physiological results for which it is intended and prepared, and the words "Not to be sold nor used after the date of its impotency."

SEC. 5. (1) If the applicant is denied a license to use for his product a label authorized by the Food and Drug Administration and is convinced that on the facts disclosed by his formula or formulae and his product he should be granted a license by the Food and Drug Administration to use any or all of the labels hereinbefore described; or if he is granted by the Food and Drug Administration a license to use, and be required to use, a label in a lower class than that in which he thinks his formula or formulae and product should be classified, he shall have the right to appeal from the decision of the Food and Drug Administration to a board of appeals for food, drugs, nonalcoholic and nonintoxicating beverages, and cosmetic cases.

(2) A Board of Appeals for Food, Drugs, Nonalcoholic and Nonintoxicating Beverages and Cosmetic Cases is hereby created, which Board shall consist of four members, to be appointed, if possible, within 30 days after the passage of this act, by the President of the United States of America, with the advice and consent of the Senate, for terms of 4, 3, 2 years, and 1 year, in the order they are named for the first Board, after which the terms of the Board members shall be of 4 years' duration; the members shall be paid a salary of $7,500 per annum out of the general fund of the Treasury and shall be provided with suitable quarters in a Government-owned building in Washington, D.C., which shall be their headquarters; one of them shall be a qualified and competent expert in animal food products offered for sale and sold in containers or packages; one of whom shall be a qualified expert in vegetable food products offered for sale and sold in containers and packages; one of whom shall be a physician of at least 10 years' experience, who shall be a qualified and competent expert in drugs and the ingredients used to produce cosmetics offered for sale and sold in containers or packages; one of whom shall be a qualified and competent expert in nonalcoholic and nonintoxicating beverages of all classes.

(3) There is hereby created the office of a secretary of the Board of Appeals in Food, Drugs, Nonalcoholic and Nonintoxicating Beverages, and Cosmetic Cases, who shall be appointed for a term of 4 years by the President of the United States with the advice and consent of the Senate, who shall be paid a salary of $6,500 per annum, out of the general fund of the Treasury, and who shall be provided with suitable quarters in a Government-owned building with the Board of Appeals. The duties of the secretary shall be to receive all papers, records, and correspondence, including the certification of the cases, in cases of appeal from the decision of the Food and Drug Administration in food, drugs, nonalcoholic and nonintoxicating beverages, and cosmetic cases, and who shall assign each case so received to the member of the Board of Appeals to whom jurisdiction in the case is granted by this act, and who shall advise the appellant of day and hour set for the hearing of his appeal, if the attendance in person or by attorney is desired by him, or required by the member of the Board of Appeals hearing his case, and shall also advise the appellant or appellants of the decision of the member of the Board of Appeals who has heard his case, and who shall perform such duties as are customary in such position and who shall request the Civil Service Commission to supply him with such stenographers and typists, clerks, and other help as he may require to aid him in the proper performance of his duties.

SEC. 6. (1) All producers, preparers, processors, packers, or distributors of food, nonalcoholic and nonintoxicating beverages, drugs, or cosmetics offered for sale or sold, in containers or packages, in the United States of America, its Territories, possessions, and in the District of Columbia, shall apply for a license to use the form of Food and Drug Administration white, blue, or orange label herein specified, as applicable to their product not later than 9 months from the date of the passage of this act. No denial of a license to use a Food and Drug Administration label as described shall be effective unless such denial shall be based on the causes set forth in this act and in the Food and Drug Act now in force, which are not inconsistent with or in conflict with the provisions of this act, and be fully stated to the applicant in writing.

(2) In any case where the Food and Drug Administration shall render a decision adversely to any applicant and said applicant shall appeal to the Board of Appeals for a review of said decision, it shall be the duty of the member of the Board of Appeals to whom the case is assigned by the secretary of the Board of Appeals to require by order, or otherwise, any such case to be certified by the Food and Drug Administration to the Board of Appeals for its review and determination and it shall be the duty of the member of the Board of Appeals handling the case to maintain the record in said case in strict secrecy in the same manner as is required by the Food and Drug Administration in the original case.

SEC. 7. (1) Nine months after the passage of this act every bulk and separate container or package of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, produced or prepared, or processed or packaged in the United States of America, its Territories, possessions, or in the District of Columbia, shall have affixed thereto and thereon in the label hereinbefore prescribed, or on a separate label, the name and postal address of the producer, processor, preparer, packer, or manufacturer thereof, or a trade mark owned by him and registered in the United States Patent Office under the laws providing for registration of trade marks, but it shall be considered a compliance with the requirements of this act if, instead of a registered trade mark, there shall be used a notice that trade-mark registration has been applied for in the United States Patent Office before the passage of this act, or within 30 days after the passage of this act, or within 30 days of the adoption and use of the trade mark by its owner in interstate commerce: *Provided, however,* That the use of any trade mark, registration of which the United States Patent Office has been finally refused, shall not be a compliance with this act.

(2) Trade marks used on foods, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, which have been in bona fide use by the proprietor thereof for not less than 15 days in interstate or foreign commerce, or commerce with the Indian tribes by the proprietor thereof, may be registered under the act of March 19, 1920, notwithstanding the requirements for use not less than 1 year in section 1 (b) of said act, provided said trade marks in all other respects are registrable under such act.

(3) In connection with every application for registration of a trade mark for foods, nonalcoholic and nonintoxicating beverages, drugs, or cosmetics there shall be filed in the United States Patent Office, before the certificate of registration is issued, evidence that the Food and Drug Administration has issued a license to the applicant to use the label submitted as a specimen.

(4) Nine months after the passage of this act, no food, nonalcoholic and nonintoxicating beverages, drugs, or cosmetics shall be sold or transported in interstate commerce unless the bulk and/or separate containers or packages containing the same shall bear a label registered in the United States Patent Office under the copyright laws governing the registration of prints and labels: *Provided,* That no label for use on or in connection with food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics shall be registered in the United States Patent Office unless and until such label has been approved by the Food and Drug Administration.

(5) The Commissioner of Patents shall keep a register of all labels not registrable under the act of June 18, 1874 (18 Stat.L. 78), but which are impressed or stamped directly upon containers or packages of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, or upon a slip or piece of paper or other material to be attached in any manner to receptacle, bottles, boxes, containers, or packages containing the same, upon which a fee of $1 has been paid to the Commissioner of Patents, and such formalities as required by the said Commissioner of Patents have been complied with: *Provided,* That publication of the label with notice of copyright shall not be required as a prerequisite to registration, nor shall the lack of artistic quality in the label be a ground for refusing registration thereof. No exclusive right of any kind shall attach to or be predicated upon the registration of a label under the provisions of this section.

SEC. 8. (1) Any label which has been refused registration by the Food and Drug Administration or by the United States Patent Office shall not subsequently be affixed to any containers or packages of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics shipped or transported, offered for sale, or sold, in the United States, its Territories, possessions, or in the District of Columbia.

(2) No trade mark used on or in connection with food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, or on the containers or packages of such material, shall be registered, after the passage of this act, in the United States Patent Office under the provisions of the Trade Mark Act of 1905 and the act of 1920, as amended, unless the specimens filed with the application for registration, showing the manner in which the mark is used on the goods, shall have been previously approved by the Food and Drug Administration.

(3) The dissemination in any manner or by any means of communication of any false or fraudulent claim or assertions as to the physiological use, effect, or action on the average human system of any article of food, nonalcoholic or nonintoxicating beverage, drugs, or cosmetics, is hereby declared to be an unfair trade practice and an unfair method of competition in commerce.

The Federal Trade Commission is hereby empowered and directed to prevent the use of such unfair trade practices and unfair methods of competition in commerce by proceeding in the manner provided in the Federal Trade Commission Act as amended (U.S.C., title —, secs. 41 to 77).

Nothing in this act shall be construed to impair the powers of the Federal Trade Commission.

The Food and Drug Administration shall report to the Federal Trade Commission such cases of dissemination together with all evidence in its possession relating thereto and its medical or scientific opinion as to the truth or falsity of the claims or assertions disseminated.

The Federal Trade Commission under its present authority, or on receipt of such report from the Food and Drug Administration, shall promptly cause appropriate proceedings to be instituted to prevent the unfair trade practices or unfair methods of competition reported.

(4) If such person, or persons, real or corporate, persist in making such false and fraudulent claims and/or assertions, he or they shall be fined not less than $500 nor more than $1,000 for

each repeated offense, and such real person shall be imprisoned for not less than 6 months nor more than 1 year. This order shall thereon become immediately effective, except as to communications the copy for which has been set up and made ready in the forms of a newspaper, magazine, or periodical and cannot be removed therefrom before going to press, or which communications have already gone to press, and shall remain in effect unless and until it may be canceled by the Board of Appeals of Food, Nonalcoholic and Nonintoxicating Beverages, Drugs, and Cosmetics Cases, or the Food and Drug Administration, or by a court of competent jurisdiction: *Provided,* That any appeal to the court of competent jurisdiction, the respondent shall be entitled to a hearing de novo.

SEC. 9. (1) If the respondent shall persist in false or fraudulent claims or assertions, against which a cease and desist order has been issued by the Federal Trade Commission, the Food and Drug Administration shall revoke his license to use the label, labels, labeling or prints registered in the Food and Drug Administration. If the respondent shall consider the action of the Food and Drug Administration unfair or unjust the respondent shall have the right to appeal to the Board of Appeals and if the Board of Appeals shall sustain the action of the Food and Drug Administration the respondent shall have the right to appeal his case to a court of competent jurisdiction, and if the Board of Appeals shall overrule the action of the Food and Drug Administration, that body shall have the same right as the respondent to appeal the case to a court of competent jurisdiction, if it so desires, but, pending such appeal by the Food and Drug Administration from the Board of Appeals to a court of competent jurisdiction, the respondent shall have his license restored by the Food and Drug Administration and be permitted to use the statements in controversy until the case is finally adjudicated.

(2) Nothing in this act shall prohibit or prevent the wholesale or retail sale at any future time of material or materials produced, prepared, processed, or packed and in the actual physical possession of the wholesaler or retailer before the passage of this act. If it is found impractical, due to excess of official or clerical work, for the Food and Drug Administration to examine and analyze formula or formulae and products submitted to it and within a reasonable time to issue licenses to use the labels required by the provisions of this act, the Food and Drug Administration shall issue temporary licenses to applicants to print and use temporary labels on their products, such license and label or labels to be current until the permanent license is issued to the applicant by the Food and Drug Administration.

(3) Nothing in this act shall be construed to prohibit or prevent the sale after a permanent license has been granted the applicant of products offered for sale under a temporary label or labels authorized by the Food and Drug Administration.

(4) In considering the alimentary, medicative, remedial, palliative, germicidal, antiseptic, or disinfectant properties and physiological effects and actions of any material, materials, or compound, composition, or combination of materials described in any formula or formulas submitted to it for examination, before accepting such formula or formulas as registrable, or rejecting such formula or formulas as injurious to the health of average human beings and granting or denying a license to use the label prescribed by this act, the Food and Drug Administration shall be governed by the majority opinions of competent specialists as expressed in the accepted textbooks and scientific and medical literature on the subject.

SEC. 10. (1) All formula or formulas deposited with the Food and Drug Administration under the provisions of this act shall be kept secret in a safe and secure depository, access to which shall be limited to the Chief of the Food and Drug Administration and the chiefs of the divisions thereof, and the contents of such deposited formula or formulas shall not be made public nor disclosed to others than the owners thereof unless the owner of such formula or formulas shall disclose or publish the formula or formulas so deposited and notifies, in writing, the Food and Drug Administration to that effect.

(2) Any person or persons, officials of, or employed by the Food and Drug Administration who, during such office or employment, or subsequent thereto, shall disclose, or cause to be disclosed, to anyone except the rightful owners, or his heirs, executors, or assigns, or to the Board of Appeals, or to any court of competent jurisdiction, in the event of litigation, any formula or formulas, or any part thereof, deposited with the Food and Drug Administration, under the provisions of this act, shall be guilty of a felony, and on conviction therefor shall be imprisoned for not less than 1 nor more than 3 years, and any person or persons, real or corporate, who shall solicit or induce such disclosures or who shall receive or purchase the original formula or formulas, or any copy, in whole or in part thereof, shall be subjected to the same penalty and shall give an accounting of all moneys obtained from the illicit use of said formula or formulas, and shall be assessed such compensatory damages as the courts may determine, and any person who shall mutilate or destroy any formula or formulas, records, or correspondence in relation thereto shall be subjected to the same penalty.

(3) All bulk and/or separate packages of containers of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics shall bear a label that has been registered in the United States Patent Office under the law governing the registration of prints and labels, but it shall be considered a compliance with the terms of this act if during the interval between the application for and the registration of the label there shall be affixed to each bulk and separate container or package, a notice that application for registration of a label has been filed in the United States Patent Office within 3 months subsequent to the passage of this act: *Provided,* That if the applicant is the owner of a label already registered by him in the United States Patent Office, that complies with the provisions of this act, he shall not be required to register a new label with the Food and Drug Administration unless he shall so elect: *Provided further,* That any print or label the registration of which has finally been refused by the Food and Drug Administration or the United States Patent Office shall not, subsequently, be affixed to any container or package of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics sold or given away in the United States, its Territories, possessions, or in the District of Columbia.

(4) In the case where food, drugs, nonalcoholic or nonintoxicating beverages, and cosmetics are produced, or prepared, or processed, or packaged, solely for export to foreign countries, they may be produced, prepared, processed, and packaged in the States, Territories, or possessions of the United States, or in the District of Columbia, according to the laws and the regulations under the laws obtaining in the country to which the products are intended for export: *Provided,* That such products are produced and intended solely for export and that they shall not be offered for sale nor sold in the United States, its Territories, possessions, or in the District of Columbia, and the introduction, offering for sale, or sale of any article of simple or combined food, simple or combined nonalcoholic or nonintoxicating beverage, simple or compound drugs, simple or compound cosmetics within a container or package, unless the material or materials comply with the standards set up by the Food and Drug Administration and the print, label, or labels, before designated and required to be affixed thereon and thereto are affixed thereon and thereto, into any State of the United States, or its Territories, possessions, or into the District of Columbia is hereby prohibited. All products of food, nonalcoholic and nonintoxicating beverages, drugs, and cosmetics imported from without the United States, its Territories, or possessions shall be subject to and conform to the provisions of the Food and Drug Act as amended.

(5) Any person or persons, real or corporate, who shall ship or deliver for shipment, for pay or not for pay, from any State, Territory, or possession of the United States, or the District of Columbia, to any other State, Territory, or possession of the United States, or the District of Columbia, or who shall offer to deliver to any other person or persons, real or corporate, within a container or package, any article of simple and compound food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, without such Food and Drug Administration label, described in this act, and such other label registered in the United States Patent Office being affixed thereon and thereto, or any person or persons, who shall sell or offer to sell or give away in any State, Territory, or possession of the United States, or the District of Columbia, any simple or compound article of food, nonalcoholic or nonintoxicating beverage, drugs, or cosmetics without such Food and Drug Administration label and label of the producer, processor, preparer, or packager registered in the United States Patent Office being affixed to the bulk and separate containers or packages thereof, or export or offer to export or import the same for pay or not for pay to or from any foreign country, except as hereinbefore provided, or who shall, with intent to defraud, for profit or with any other motive, substitute in any container or package or in or with any articles of food, nonalcoholic or nonintoxicating beverage, drugs, or cosmetics during the preparation, processing, or manufacturing before such articles are packed, or after such articles are originally packed, or repacked, any material, or materials, other than those specified in the formula or formulae, deposited with the Food and Drug Administration before or after license to use the Food and Drug Administration label or labeling has been issued, on conviction therefor shall be fined not less than $50 nor more than $200 for the first offense, which offense shall be predicated as occurring in the place and site of origin from which the product is shipped or caused to be shipped, or introduced into interstate commerce, and for the second offense, as designated, shall be fined not less than $100 nor more than $300, or by imprisonment of not less than 3 months nor more than 1 year, or both such fine and imprisonment, and the product involved shall be confiscated and impounded and after final adverse decision, as provided herein, shall be destroyed. For the third violation of this act such person or persons, real or corporate, shall have their license to use the Food and Drug Administration label or labels on the particular product involved, revoked, and if a real person, to be imprisoned for not less than 6 months nor more than 1 year.

SEC. 11. (1) Any person or persons, real or corporate, who shall, with intent to defraud for profit, or with any other motive, counterfeit, imitate, or produce or reproduce by any means whatever, apparent facsimiles of the license, label, labels, prints, or trade marks registered with the Food and Drug Administration, or in the United States Patent Office, for the purposes hereinbefore described, or who shall offer to sell or sell any counterfeit, imitation, apparent facsimile, or any document, paper, or print purporting to be such license or label, or labels, issued by the Food and Drug Administration, or authorized to be used by the Food and Drug Administration, or who shall counterfeit, imitate, or produce any apparent facsimile, or what purports to be such, of a label or trade mark of a producer, processor, preparer, or packer or manufacturer of food, nonalcoholic or nonintoxicating beverages, drugs, or cosmetics, bearing his registered label or labels, or trade mark when the same has been filed with the Food and Drug Administration, and registered with it and/or in the United States Patent

Office under the provisions of this act, shall be guilty of a felony and be imprisoned for not less than 5 nor more than 10 years.

(2) Nothing contained in this act shall affect the operation and/or enforcement of the present Food and Drug Act, as amended, except insofar as the provisions of the present Food and Drug Act, as amended, may be inconsistent with or are replaced by the provisions of this act. All parts of the present Food and Drug Act inconsistent with or in conflict with the provisions of this act are hereby repealed. If any provision of this act is declared unconstitutional or the applicability thereof to any person, circumstance, or commodity is held invalid, the validity of the remainder of this act, the sections thereof, and the applicability thereof to any persons, circumstances, or commodities shall not be affected thereby.

(3) This act shall go into effect 30 days after its passage by Congress.

DEFINITIONS

SEC. 12. (1) (a) The term "food", in addition to the definition in the body of this act, includes all materials, substances, and preparations used for or entering into the composition of food, beverage, confectionery, or condiment for man, or for animals used for food by man.

(b) The term "drug" includes all materials, substances, and preparations recognized in the National Formulary, United States Pharmacopœia, Homeopathic Pharmacopœia, or supplements thereto, or presented officially to and accepted and approved by legally organized medical, surgical, or chemical societies or associations after scientific and clinical proof of the efficacy of such materials, substances, or preparations intended for use in the treatment, cure, mitigation, or prevention of disease in man or in other animals.

(c) The term "cosmetic" includes all materials, substances, or preparations intended for cleansing the skin, teeth, nails, or hair, or for altering the appearance of or promoting the attractiveness of the human person or any part thereof. Definitions of food, drugs, nonintoxicating and nonalcoholic beverages and cosmetics are intended to exclude all adulterations or additions of materials dangerous, harmful, or injurious to the average human body.

(d) The term "label" means the principal label or labels, except where "label" refers to the labels to be issued, or authorized, by the Food and Drug Administration, used by the producer, preparer, processor, packager, and/or distributor of any food, nonalcoholic and nonintoxicating beverages, drugs, or cosmetics, on the immediate container or package, or bulk container or package, of the product.

(e) The terms "labeling" and "prints" includes all labels and other written, printed, or impressed text, with or without graphic illustrations or additions, or any combination of text and graphs in any form whatsoever, accompanying any food, drug, nonalcoholic, or nonintoxicating beverage, or cosmetic product.

(f) The terms "container" and "package" mean and include any form, sort, or kind of means capable of making portable any foods, drugs, nonalcoholic, and nonintoxicating beverages or cosmetics.

ADULTERATION OF FOOD

(2) A food shall be deemed to be adulterated if it is, or may be, dangerous, harmful, or injurious to the health of an average human being.

ADULTERATION OF DRUGS

(3) A drug shall be deemed to be adulterated if it is, or may be, dangerous, harmful, or injurious to the health of an average human being under the conditions of use prescribed in the labeling thereof, or if any other deleterious or injurious material, dangerous, harmful, or injurious to the health of an average human being, is mixed with or added to the drug.

ADULTERATION OF COSMETICS AND HAIR DYES

(4) A cosmetic, or a hair dye, shall be deemed to be adulterated if it is, or may be, dangerous, harmful, or injurious to the average human being.

SEC. 13. The short title of this act shall be "An act to prevent the manufacture, shipment, and sale of adulterated or misbranded food, drugs, nonalcoholic and nonintoxicating beverages, and cosmetics, and to regulate traffic therein; to prevent the false or fraudulent advertisement of food, drugs, nonalcoholic and nonintoxicating beverages, and cosmetics, and for other purposes."

Mr. BOLTON. Mr. Chairman, I yield 10 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, ladies, and gentlemen, a Congress, by sound legislation, can help economic forces toward recovery. By unsound legislation it can help to perpetuate economic disaster or it can delay and prevent economic recovery.

Our Democratic Congress started in well in December 1931 because it accepted the recommendation of President Hoover for the passage of the reconstruction finance bill. Then it followed that up by passing a bill to increase some taxes and raise some other new taxes which would help toward balancing the Budget. Then the stage was set for economic recovery, if we had been willing to let it go along that way and had been willing to give it a chance; but the Democratic majority was not willing to do this.

First we had the Garner pork barrel bill, proposing to waste a lot of the people's money, and then we had the Patman bonus bill. These two destructive measures frightened what little there was of economic recovery into the ground, and a further advance was stopped and things remained that way until after Congress adjourned on the 16th of June 1932.

From that date on, until the Maine elections in September, there was every indication of improvement in business and of economic recovery. The Maine election indicated the probable election of a Democratic President, and the fear which was thrown into the business situation as a result of it was sufficient to give us another set-back. In spite of that situation and in spite of the election which followed and the fear which was engendered, the forces of recovery were so strong that we had very marked improvement all through the latter part of December 1932 and the early part of January 1933.

Then there began the agitation for inflation in such volume and with such force that the people were so frightened that they began to draw their gold out of the banks and the Federal Reserve System. This proceeded with such rapidity and force that it caused great deflation in the commodity and security markets and resulted ultimately in the closing of all banks.

The President-elect, by declaring for sound money, could have allayed the fear and could have stopped the runs on the banks, but that responsibility he did not take and would not take, and so we went through the worst period in the lifetimes of most of us in February, March, April, and the early part of May 1933.

The administration, faced with the situation as it was, supported and had passed two sound measures: First, the emergency banking bill; and, second, the Economy Act.

All of us have hated to see the administration wreck the Economy Act by improper regulations with reference to veterans and by improper handling of their claims before the Veterans' Bureau and by the terrific orgy of extravagance which has been indulged in since the 1st of last May.

With the first sign of improvement discretion and sound thinking were lost sight of by the party in power. The Democratic Party brought in the so-called "agricultural bill", creating the A.A.A., and what happened?

Due in part to the operations of the Economy Act, due in part to the drought which affected the Middle West, and due in part to the additional feeling of security which the Banking Act gave, conditions improved very rapidly. The prices of wheat, corn, cotton, and beef mounted. The price of wheat had reached a figure of $1.25 per bushel when, just about the time Congress adjourned, in the middle of June the Secretary of Agriculture announced that he was going to put into effect the processing tax, and a little after Congress adjourned he announced that the tax would be 30 cents per bushel and that it would go into effect in the early part of July. Almost immediately there began a drop in the price of wheat. Almost immediately the surge of prosperity which had been rising in the farm territory began to drop. The price of wheat dropped to 90 cents, and it has fluctuated between 67 and 91 cents on the Chicago exchange ever since.

Unquestionably the farmer pays the processing tax, and that always must be so when there is a surplus of produce. No other way can possibly be worked out.

The price of cotton was advanced and was kept up to a certain percent only because of governmental loans to support the market.

Then we had the processing tax on tobacco, which ruined the market of the farmers in my territory for tobacco. And then we had, last of all, a processing tax on hogs; and the situation has become so acute that the processing tax has been raised to 2½ cents per pound, and the farmer is receiving in my territory 1 cent per pound for his hogs, so that he is out 1½ cents.

Never before, under any circumstances, has such a situation existed. Frankly, in my own humble opinion, this has been a bad bill. It will raise processing taxes totaling as high as $800,000,000 or $900,000,000, and this money will be

spent largely for operations designed to reduce the number of acres in production. Frankly, I do not believe it is going to reduce the volume of crops. In the case of cotton it has raised the price because of the loan given to the cotton growers on cotton by the Government, and this has resulted in an increase in retail prices and resultant stagnation of trade.

This bill also carried the power to devalue the dollar and the power for inflation. That that power was bad, that it has resulted badly, is my opinion. It has demoralized and made unstable our whole business situation. It has restored confidence nowhere.

Next, we had the so-called "National Industrial Recovery Act." The spending features of this proposition, involving $3,300,000,000, largely spent for unproductive public works and unnecessary public works which provide almost no employment, I have previously discussed. This was unquestionably bad. The part of this act relating to industry I have not so far discussed since its passage. I have not felt that one should discuss it when it was in its first stages of trying out until after it had demonstrated what it could do. That has been done.

The scale-of-labor prices were raised as a result of the demands of the administrator. The amount that each laborer received was reduced as a result of the stagnation of trade which followed the raising of prices, which inevitably follows the increase in wages and prices and costs of operation.

The interest of employees is served best by an increase in wages when the volume of business is sufficient to justify it, but when the volume of business is low an increase in wages does not benefit the employee because the resultant high prices throws them out of work and reduces the pay envelop of each man.

After this act had reached its peak of control on the 1st of October, employment dropped off at an alarming rate. Nineteen hundred and thirty-three figures in January, February, March, and April have been held up to us as low points. Let us consider what some facts are. January retail sales are supposed to have gone up in dollars 16 or 17 percent, as compared with 1933. The commodity index of the Department of Labor went up from .52 in 1933 to .73 in 1934, an increase of 21 points, or 40 percent, indicating that volume sales went down 20 to 25 percent.

There appeared in the Washington Times of yesterday statistics on the sale of automobiles in January 1934 on 41 States reporting to that date, indicating that in January 1933, 67,714 passenger cars were sold, while in January 1934, in the same States, only 51,683 were sold. However, the increase in truck sales was about 90 percent.

The situation seems to be this: When the administration adopted a sound policy of reduction in governmental expenditures and straightening out the bank situation and continuing and expanding the loan policy of the R.F.C., the Farm Loan outfit, and the Home Loan outfit, the trend was to restore confidence, and improvement in business conditions was evident. When the bad features of the administration's policies were the dominant factors, they brought on a stagnation of trade in the fall and winter of 1933 and 1934, which has tended to prevent and delay economic recovery, and now practically the only employment of any extent is relief employment through advance of funds of one kind or the other by the Government.

Now it is proposed to go further with this process and to raise prices further. I expect that this will result in further stagnation of trade and in preventing the natural spring rise that the economic situation has slated for itself, if it is allowed to come along.

Declarations of prominent members of the "brain trust", so called, which seem to control the operations of this administration, indicate a policy of destroying farming in certain sections of the United States, of destroying industry in certain sections of the United States which the professors think are not suited for the particular industry that exists in them now, and forcing the people who live there to move into other places where their lives will be planned for them. This means just one thing—governmental control of farming, industry, and business; governmental dictation of everything; the rationing of the people; the enslavement of the farmer and the laborer; the wiping out of the professional classes and the business man.

America has provided a better place to live in and better living conditions than any other country in the world, under a system of free labor and the right of each one to go out and develop something on his own initiative for his benefit and the benefit of the people. He developed his spirit of energy and a spirit of thrift beyond that of any other in the world. Our people have not gone back. They are not yet ready to become the slaves of the state as the Communists of Russia.

Some people have said that it is unpatriotic and un-American to criticize the State and its operations. I say to you it is un-American and unpatriotic not to tell of the things which are being done which are leading us straight to socialism and the destruction of industry.

There never was any excuse for the application of the so-called "N.R.A." to the small merchants, the small manufacturers, and the small business man. It has ruined countless thousands of them, and with its further application will ruin countless thousands more. If that is the object of the N.R.A., is it not time and is it not patriotic for the people to know it?

I have followed this administration when it proposed a sound policy. I have done so without regard to whether or not it would make me popular. Frankly, I know it did not. I have opposed it in its tremendous spending program. I oppose it now in the effort that is being made by those in it who desire to destroy American institutions and prevent economic recovery. I oppose it so that we may not have a destruction of industry and of wealth. That is what is now being accomplished. The wiping out of working capital, which is necessary to give business a chance to come back, will not help the workingman.

We must have certain items of governmental relief. An honest effort to relieve distress has never had my opposition, but if we are going to have business come back we must not have those processes which raise prices and clog the channels of trade when the volume of business does not justify it. We must not have those processes which in the long run will destroy the laborer, the farmer, the professional classes, and the small business man. We must have an opportunity for America again to live.

I hope that those whose only answer to constructive criticism so far has been to call names will come to realize what they are doing and stop. The American people will realize what is being done to them and soon they will cast off the fetters which those who would enslave them would put on. [Applause.]

Mr. BOLTON. Mr. Chairman, I yield 5 minutes to the gentleman from Missouri [Mr. DUNCAN].

Mr. DUNCAN of Missouri. Mr. Chairman, I rise to talk for just a few minutes about the provisions of the farm mortgage law. A few days ago I introduced a bill to amend section 22 of the bill passed at the special session of Congress, by striking out the words and figures "50 percent of the normal appraised value of the land", and inserting "70 percent", and striking out "20 percent of the appraised value of the insured improvements", and inserting the figures "40 percent of the insured improvements." There is no question but that a great deal of good has resulted from the application of the Farm Mortgage Act, but I think it is also true, and that every man in the House will know it, that there are thousands of farmers who have not been able to enjoy the benefits of the law, because of the methods used in making the appraisals. The law provides that the normal value of the land shall be found, and then 50 percent of that value may be loaned, and 20 percent of the insured value of the improvements. Suppose we have a farm valued at $10,000, $6,000 of which is upon the land and $4,000 upon the insured improvements. Under the law as it exists now

the farmer can get relief to the extent of $3,800 only, and that is not enough to afford relief to thousands of farmers in this country.

In the district that I come from in northwest Missouri we have a very fine agricultural community. There are a lot of farms there of the kind that I have talked about. When this law was passed, those who held the mortgages were willing to give the owners of the farms every opportunity to make their application to the Government to take over these loans. Many of them did put out their $40, and in hundreds of instances those applications have been declined because under the provisions of the law providing for the valuation they could not get enough money to afford relief. If the law is amended as I suggest, the farmer will be able to get $5,800 on that kind of a farm, and it ought to be done.

We passed a law providing for home loans. We provided they might borrow 80 percent of the appraised value of their homes. The homes do not produce anything. But, of course, they represent the savings of many years to their owners, and they ought to be protected; but a farm is producing something, and if the new deal is worth anything, if we have any confidence in it—and, of course, we do—we must expect that the value of our land will increase.

The price of hogs has gone up, the price of corn has gone up, the price of all kinds of farm commodities has increased, and yet these appraisers working for the Federal land banks—the same bunch of fellows who went through the depression—are viewing these farms today through the eyes of depression. The Federal land banks have gathered unto themselves a lot of ex-bankers, men who worked in banks that have failed, and are using them as appraisers, and they are still making appraisals just as they visualized things during the darkest period of the depression. So I say to you the time has come when these mortgagees, who have been holding off, are going to foreclose on farms, where the owners cannot obtain assistance from the Government. They will be foreclosed because the mortgagee can visualize the increase in the value of the farms and they are going to enjoy the benefits of the increase in value of those farms. I hope that this House will take seriously the amendment I have offered to the bill and raise the amount that may be loaned to the farmers for the purpose of refinancing their mortgages. [Applause.]

Mr. BOLTON. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, I listened very intently yesterday to the address of our distinguished President before 5,000 or more code authorities representing the principal industries of the United States. Anyone listening to that address must have been impressed with its constant reference to humanity's needs and the desire of the present administration to care for them. I am rather inclined to agree with Dr. SIROVICH that this Congress will go down in history not so much for what it has done but for what it has failed to do. It has failed in a number of instances to understand the public pulse in its demand for legislation affecting humanity. Before talking of my subject matter I am going to quote from the President himself as of October 13, 1933, when he addressed by radio, over a national hook-up, the Third Annual Women's Conference of Current Problems. He referred to the school problem in particular as one of humanity's needs. He said:

> The main point is that we need to make infinitely better the average education which the average child now receives, and that, through this education we will instill into the coming generation a realization of the part that the coming generation must play in working out what you have called "this crisis in history."

I repeat, "this crisis in history"; he then said:

> This crisis can be met, but not in a day or a year, and education is a vital factor in the meeting of it.

Education is a vital factor in the meeting of this crisis, said the President at that time. Let us see what Mr. Harry Hopkins, the Civil Works Administrator, had to say about education on August 23, 1933. At that time he said:

> While it is most emphatically not the intention of the Federal Emergency Relief Administration to subsidize the school system in any community or relieve school officials of their responsibility, I believe that the expenditure of work-relief funds in the interest of destitute teachers will result indirectly in great community benefits.

I repeat:

> Will result indirectly in more community benefits.

Then he added:

> No one will ever be able to make up for the loss to the children who are deprived of education, for the plastic state of childhood mind comes but once.

I repeat:

> The plastic state of childhood mind comes but once—

Said the Civil Works Administrator.

Mr. Chairman, there are 30,000,000 boys and girls seeking an education in the 1934–35 year. Three and a half to four million between the ages of 6 and 15 will be without any instruction at all this year. That is a horrible situation to comprehend, my friends, and much of it, very much of that, can be completely removed by some action of the present Congress.

There are pending before the Committee on Banking and Currency probably a dozen bills which have for their purpose—not necessarily relief for the school teachers through the C.W.A.—but we have proposals before that committee looking toward loans by the Federal Government to municipalities or school districts where the loan would be positively assured and good, and where the Federal Treasury would make money by extending the loan rather than losing money; and yet no definite action appears to be taken by that committee. I am not criticizing the chairman of that committee or any member of it, but there is a dormant attitude. There is a recalcitrant attitude toward those bills by that committee. They are showing no disposition, except through a little hearing that was held by a subcommittee some few weeks ago, to press that legislation into effect.

My colleague the gentleman from Illinois [Mr. SABATH] has a very good bill pending before that committee. It provides for one form of Government relief in the purchase of school-district bonds and the acceptance of tax warrants. I have a bill before that committee, but I am not thinking solely of Chicago. I am thinking of the United States. I am thinking of the fact that 20,000 schoolhouses will be closed to education on the 1st day of April of this year throughout the United States.

Mr. SABATH. Will the gentleman yield?

Mr. BRITTEN. I yield for a question.

Mr. SABATH. I have been informed that Mr. Hopkins has made an allocation of about $50,000,000 that will take care of all the schoolhouses through the United States, in the smaller and less populous communities. I am informed that none of those schools will be closed; that he will see to it that they will remain open for the balance of the year.

Mr. BRITTEN. That is not quite correct. The amount is $20,000,000 instead of $50,000,000. It is true that the Civil Works Administrator has set aside approximately $20,000,000, and that $20,000,000 is being distributed according to population throughout the United States. Illinois is to get $124,000 per month, as an outright gift, for the payment of salaries of school teachers, and nothing else, in communities and localities of 5,000 population and less. Some 40,000 teachers are being helped in this manner by direct expenditures out of the Federal Treasury. That is the reason I am on my feet now, Mr. Chairman.

Just why a school teacher in a town of 5,000 population is a preferential educational factor over one in a large city is hard to understand, and just why Federal money should be given outright for education in smaller communities and at the same time refused as a loan upon excellent securities in larger cities is equally hard to understand. Just why railroad bonds and notes of questionable value should be accepted as collateral on loans when anticipation tax warrants in a city like Chicago are refused on a loan is a question that even an astute banker cannot answer.

I say they should go hand in hand. But where the Federal Government is spreading throughout the United States this very beneficent activity, and it is good, it is a couple of million dollars a month as an outright gift for the payment of teachers' salaries.

Mr. Chairman, the Reconstruction Finance Corporation should be authorized by law to make loans to municipalities and to public-school districts for the payment to teachers of unpaid as well as current salaries. Such loans should be made upon school warrants lawfully issued or upon real estate tax warrants issued in anticipation of taxes, at a rate of interest not exceeding 3 percent per annum, and should be made for a period not to exceed 10 years. The Federal Government certainly should make loans in this direction in the interest of the education of our children. What public work is there in the United States more important than the public work of educating our children? There is no public work in the United States so important as the education of our children, and why it should be so shamefully neglected will be a question which the present administration will have to answer before long. Money is being loaned to railroads on questionable security, almost by the billion. Is the stabilization of a railroad more important than the education of our children?

[Here the gavel fell.]

Mr. BOLTON. Mr. Chairman, I yield to the gentleman from Illinois 5 additional minutes.

Mr. BRITTEN. I contend that even the preservation of the banks, the preservation of the insurance companies, the public works that are being instituted all over the United States, is not as important to the future welfare of the United States as is the education of our boys and girls. Surely, my friends, this Congress should take action on at least one of those bills pending before the Committee on Banking and Currency, where no outright expenditure or gift from the Federal Treasury is demanded. There is no loan in the United States, under ordinary circumstances, that is as good as an anticipation tax warrant on private property, particularly in a city like Chicago. It has always been held the very finest sort of security. The banks of the country have accepted tax anticipation warrants in your town and mine, I do not care where you live or where you come from, as the ultrasecurity to be had for loans because of the simplicity of its collection. Suppose the Federal Government had a lot of these tax warrants, it could put a manager in any man's property until the taxes had been paid, and when the taxes were paid the Federal Government could step out again. The Reconstruction Finance Corporation is equipped today to handle this business.

I say to you, and I think I know the general attitude of President Roosevelt about as well as any man on the floor of this House, that this Congress does not sense the President's desire when he constantly refers to humanity's needs, as he did on yesterday. Is there any need of humanity so important as the education of your child and mine; the child who, 10 or 15 or 20 years from now, has to go out in the world and compete with the European and with the South American and with the Asiatic; and if he does not have the proper gray matter he is going down to defeat. We are just sitting idly by and we are doing nothing. I contend that we do not propose to do anything, when in certain communities—and I am not thinking alone of Chicago—the teachers are actually starving. That frightful condition is the reason for the $20,000,000 expenditure, which is an outright grant coming through the Civil Works Administration.

Mr. RANDOLPH. Will the gentleman yield?

Mr. BRITTEN. I yield.

Mr. RANDOLPH. I am in hearty accord with what the gentleman is saying, and I simply want to add the observation that in the State of West Virginia the condition of our school system for the children and for the teachers is one of the most challenging in the history of our Commonwealth.

In the face of this crisis I commend the spirit and sacrifice of those who are carrying on in the face of discouragement. To forget our duty to America's youth today is for us to fail in our duty to the future.

Mr. BRITTEN. Oh, yes; and I may say to the gentleman that we are spending this $20,000,000 through the C.W.A. as a relief measure. I agree with the gentleman that relief is very valuable there, but in the rural communities the teacher is very much closer to the student and very much closer to the parents than in the big cities.

Mr. COLLINS of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. BRITTEN. Yes.

Mr. COLLINS of Mississippi. The gentleman knows that I introduced a bill to authorize an appropriation of $100,000,000 for that purpose. This bill went to the Committee on Education. This committee held hearings. Did the gentleman testify at the hearings?

Mr. BRITTEN. No; I did not even know the gentleman had such a bill before the committee. I did appear before the Committee on Banking and Currency where nine or ten bills were pending; but I do not recall that the gentleman had one there, although he may have.

Then, the gentleman agrees with everything I say. I repeat that in the rural communities the teachers are very much closer to the students and the parents. The teachers there are in no danger of starvation. The farmers will see that they get eggs, that they get pork, that they get apples, that they get potatoes and other farm products; there is no danger of the teacher in the rural community going without a good roof over her head or going hungry. But this does not apply in the big cities like Chicago, Detroit, Pittsburgh, Philadelphia, and New York where teachers have actually fallen over through weakness from hunger because they had no funds with which to provide the daily needs of life.

Mr. Chairman, in the city of Chicago the school teachers worked 9 months last year and got but 6 weeks' pay; yet the schools in Chicago are open today and the school teachers are not being paid. This spirit is as courageous as any spirit in war time, these fine men and women toiling with the kids they love with little in their stomachs in the shape of food. This condition could not come about in a rural district, because there the teachers and the families are very close; they understand each other; they call each other by their first names.

One of these bills should be reported out; and if this Congress does not do it, I say to you that every Republican on this side of the aisle will make speeches between now and next election time and let the fault lay where it will. If the Democratic administration is not going to insist on this legislation, then the House of Representatives should insist upon it.

You gentlemen on the other side of the aisle who have your President's interest at heart, your democracy at heart, your own political welfare at heart—you gentlemen with your tremendous majority can report out one of these bills. It will not cost the Federal Treasury a dime if you surround the Reconstruction Finance Corporation with authority to lend money only on good sound collateral and on rules and regulations to be made by the R.F.C.

[Here the gavel fell.]

Mr. BAILEY. Mr. Chairman, will the gentleman from Mississippi yield 1 minute to the gentleman from Illinois that I may ask the gentleman from Illinois a question?

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 1 minute to the gentleman from Illinois.

Mr. BAILEY. Does the gentleman know that the Committee on Education just a week ago completed hearings on this question and are now considering a bill covering the problem?

Mr. BRITTEN. The gentleman from Mississippi [Mr. COLLINS] told me a moment ago about a bill he had before that committee.

Mr. BAILEY. Yes; they are considering this very question and have heard the testimony of representatives from the gentleman's own city and State. The committee is now considering the question and will report the bill out as soon as they can wisely do so.

Mr. BRITTEN. I wish to congratulate the gentleman for making the positive statement that the committee of

which he is a member is going to report such a bill. I feel that loans should be made to municipalities to pay the salaries of these teachers where the municipalities have good collateral. I regard this as much more important than 90 percent, or I will say 100 percent of your Public Works program scattered throughout the United States. A very large portion of the P.W.A. appropriation is given as an outright grant to the community.

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Illinois [Mr. SABATH].

Mr. SABATH. Mr. Chairman, I am very much pleased that my colleague [Mr. BRITTEN] takes such interest in wishing to relieve our school situation, of which he so bitterly complains.

Had it not been for the action of a Republican President, Mr. Hoover, in vetoing the first Reconstruction Finance Corporation bill, this relief would have been provided long ago. Unfortunately, President Hoover vetoed the bill because it provided that loans could be made to municipalities, to States, and even to private institutions. In the desire to give the country some legislation we were obliged to take the bill as amended by the Senate, which precluded making any loans for projects that were not self-liquidating. This made loans to school districts for school purposes impossible. He remembers that, I presume.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. SABATH. I gladly yield.

Mr. BRITTEN. Is the present administration in favor of making loans to private individuals and corporations?

Mr. SABATH. The present administration is going to do anything and everything to properly help everybody in the country, private interests, individuals, and corporations if it will aid the masses of the people and restore the commerce of the country.

Mr. BRITTEN. That is not an answer to my question.

Mr. SABATH. Mr. Chairman, I cannot yield further.

The criticism made by the gentleman from Illinois [Mr. BRITTEN] of the R.F.C. is proper; but all the things about which he complains occurred under a Republican administration. Although loans were made to railroad companies, to insurance companies, and to the big bankers of the Nation, the small banks were forced to close and the millions of depositors lost their life savings—everything they had—in the smaller institutions.

When I introduced that bill the first day of the Seventy-second Congress I had in mind, and my bill so provided, aiding municipalities and States. This would have taken care of the school districts and been of benefit to the entire Nation. I advocated and pleaded with President Hoover and with Eugene Meyer, then Governor of the Federal Reserve Board, to accept for rediscount Finance Corporation paper and short-term municipal bonds and anticipating warrants of municipalities. I urged it on them and pleaded with them to adopt it. I still believe that had they followed my advice at that time the Nation could have been saved from much of the wreck and ruin which was brought about because they refused to listen to reason and good advice.

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. SABATH. I yield.

Mr. BRITTEN. Has the gentleman begged and pleaded with Jesse Jones, Chairman of the Reconstruction Finance Corporation, at the present time?

Mr. SABATH. Yes; I have. But unfortunately, the law does not allow making loans for school purposes or municipalities unless it be for self-liquidating projects. It is for that reason, as the gentleman knows, I have introduced several bills in the last session and again this session, giving, the R.F.C. the authority and power to make loans regardless of the self-liquidating provisions.

These bills are now before the Committee on Banking and Currency, and, as the gentleman knows, I have secured a hearing on them and have appeared before the committee, urging favorable action upon them, and I have been assured that due consideration will be given them shortly. Moreover, I have endeavored to secure relief from the Civil Works Administration, as well as having urged favorable consideration of the bill pending before the Committee on Education.

My colleague is unjustified, however, in charging that nothing has been done for Chicago or Illinois. I think it is the first time in many, many years that Illinois has been decently and fairly treated, as he himself knows.

The Civil Works Administration has set aside fifty millions to keep schools open. True, this fund has gone to the rural communities, because it is believed that the large centers are in better position to keep their schools open than are the cities with a population of less than 5,000. However, in view of that relief to the rural sections, I am hopeful that this will enable us to obtain favorable action on my bill, which is not seeking any grant but which only authorizes making loans to municipalities that can amply and fully protect the Government against failure to repay, the same as Chicago can, especially since a special act of our legislature authorizing the school board to pledge in addition to bonds the clear real estate of the school board having a value of between thirty and forty million dollars.

We secured relief for the sanitary board. We have secured loans that are of great benefit and blessing to thousands and thousands of employees. I understand, appreciate, and deplore the condition of our school teachers and our children, but unfortunately I am obliged to call attention to the fact that in the city of Chicago, where the school teachers have remained unpaid for many, many months, it is not the fault of this administration. It is the fault of a Republican administration that wasted the school funds. If proper care had been taken of the taxes that had been collected and of the funds of the school board, the school teachers today would not be 8 or 9 months without pay.

Mr. MILLARD. Will the gentleman yield?

Mr. SABATH. The gentleman does not know enough about the situation.

Mr. MILLARD. May I ask the gentleman one question? The last three mayors of the city of Chicago were Democrats?

Mr. SABATH. No; the gentleman, as I knew, is not well informed. The Democrats came into power in Chicago in 1933, not quite 2 years ago, and due to the assassination of Mayor Cermak we have had two Democratic mayors since that time; but, unfortunately, the Republican school board remained in complete power until some months ago, and had it yielded to the appeals of Mayor Cermak, a Democrat, after he was elected and started to practice economy instead of extravagance, the school board could have paid up. The reckless extravagance occurred under Thompson's Republican administration. Thompson was in power for 4 years, and the deficit was created under his administration. The Democratic administration stepped in and started to practice economy. We have eliminated these abuses and graft and have brought about a condition whereby we will be able to balance the budget from now on. As I have stated, had the Republican school board taken the advice or listened to former Mayor Cermak and Mayor Kelley, the conditions would have been different. These unfortunate conditions, however, are with us, due to Republican misrule. The school teachers and the children are not responsible.

In addition to the reasons I have given and the reckless extravagance of the Republican school board appointed under ex-Mayor Thompson, which school administration held sway and had control until May or June 1933, a further cause for the nonpayment of teachers' and school employees' salaries was the differences of Republican Mayor Thompson and the Republican State Tax Commissioner, Mr. Malone, as to tax assessments. Their protracted fight, together with the action of the Republican board of review in ordering a reassessment of properties in Cook County, delayed the collection of our 1929 and 1930 taxes for 2 years. Thousands of taxpayers with millions of dollars available in pocket and in bank were forced to hold their tax funds awaiting receipt of tax bills. With the crash and destruc-

tion brought about by the Republicans, with the resultant and continuing closing of banks in the Chicago area in 1930, 1931, and 1932, today approximately 40 percent of the 1929 and 1930 taxes remain uncollected, a great majority of the hard-pressed property owners being the victims of these bank failures in which their tax funds were tied up or totally lost. Therefore, in the face of these facts, the attempt of some of my Republican colleagues to find fault with the Democratic administration in the city of Chicago, county of Cook, or the State of Illinois, as to the present unfortunate financial condition is ridiculous and preposterous.

I hope and expect that the House Committee on Education, as well as the Committee on Banking and Currency, will report bills that will bring about relief. I am heart and soul for any bill which will bring about this relief. I am not wedded to the bill I have introduced. I would be just as happy if they would report any bill regardless whose name it bears so long as it will relieve the conditions now existing in Chicago and elsewhere. With me it is not a question of politics; it is not a question of whose bill it is. It is how we can relieve the conditions, and while I am pleading for relief I cannot allow to go unanswered the criticism against this administration. My colleague charges that we have appropriated tremendous sums for other purposes, and that is the charge of other Republicans.

Concededly, we have been expending a great deal of money under the direction of President Roosevelt and the Democratic administration for humane purposes. I grant that education is of particular importance to the Nation, but let me tell you that the feeding of the starving people and creating employment for the unemployed, to my mind, is of as great importance to the starving people of this country as is providing for the payment of these school teachers.

The school teachers are patriotic men and women and I know they will continue to bear with the Nation until we can be placed in a position whereby we will meet our bills, balance the Budget, and pay these deserving people. As I previously stated, we have expended large sums of money, but is there anybody here who will deny that the expenditures made to feed hungry, starving people were unfair or unjustifiable? No one can tell today what would have taken place in this country if we had not taken care of the 15,000,000 people who were unemployed in 1930, 1931, and 1932. Thanks to President Roosevelt and the Democratic Party, we have to a great extent demonstrated to the masses of this country that this administration will not permit the American people to starve, that we are ready and willing to appropriate millions more to see that they are properly clothed and obtain enough food so that they can continue to exist. [Applause.] But we are not ready and willing to continue that procedure if we can create employment for worthy citizens, whereby they will be self-sustaining; if these eight or nine millions still out of employment can be put to work to provide for themselves and their families without assistance from the Federal Government, the States or the municipalities to keep them off charity. [Applause.]

Knowing my Republican colleagues as I do, I feel that they will claim that under Thompson's administration the school teachers were paid. Yes; I admit that the school teachers and the thousands of employees and contractors were paid under Thompson, but he used $60,000,000 of the city's funds and the subway fund for that purpose; and he left millions of unpaid bills, so many that in 1931 the work on the many school buildings had to cease, because not only school funds and the city funds were gone, but the credit of the city and of the school board was gone.

Mr. Chairman and gentlemen, I do not object to honest criticism, but I do resent undeserved, willful, destructive criticism. Criticize until you are black and blue in the face, yet people know, appreciate, and recognize that President Roosevelt is doing all within his power to improve conditions brought about by Republican extravagance, corruption, and misrule.

Mr. BOLTON. Mr. Chairman, I yield 15 minutes to the gentleman from Illinois [Mr. DIRKSEN].

Mr. DIRKSEN. Mr. Chairman, this looks like a field day for the State of Illinois. I am very happy to have a brief opportunity to elaborate upon the remarks of the preceding speaker with reference to the pedagogical situation in Chicago. The eloquent and epic statement made by the gentleman from Illinois [Mr. SABATH] would be convincing enough if we who also share the honor of citizenship in the State of Illinois did not know better.

They owe these school teachers in Cook County and the city of Chicago about $22,000,000, and when they had Republican mayors in Chicago previous to the late lamented Mr. Cermak and the present Democratic mayor, Mr. Kelley, they always paid the school teachers right on the dot, and the gentleman from Illinois, the distinguished member of the Rules Committee, will admit the truth of this statement. All of the deficit that is piled up at the present time has been piled up under the scuttling practices of a couple of Democratic mayors and a Democratic city administration. Is that not right?

Mr. SABATH. It is not right. The gentleman is wrong, absolutely wrong.

Mr. DIRKSEN. The facts will bear out the statement.

Mr. SABATH. The deficit was created under Thompson's administration.

Mr. DIRKSEN. There was some deficit, but not such a tremendous deficit as exists at the present time. What is the situation with respect to the Sanitary District, another of your taxing bodies that the gentleman knows all about? You cannot go out and pledge any of those bonds for money on the line, without tremendous discount.

Mr. SABATH. We do not need it any more.

Mr. DIRKSEN. The gentleman will probably be coming here to the Government of the United States and asking for more before very long.

Mr. BRITTEN. Will the gentleman yield?

Mr. DIRKSEN. I yield to the gentleman from Illinois.

Mr. BRITTEN. The fact of the matter is that during the last administration of a Republican mayor of Chicago every city employee was paid right up to the last moment before the Democrats came in.

When Cermak came in the deficit started. The deficit got larger, pay was withheld, with the result that between $22,000,000 and $24,000,000 today is owed to the city employees of all kinds, policemen, firemen, school teachers, and everybody in the city of Chicago is behind in pay, due entirely to the two Democratic administrations.

Mr. DIRKSEN. And let me say that that is not all: they owe the State of Illinois many millions in taxes which the State has not been able to collect.

Mr. SABATH. Will the gentleman yield?

Mr. DIRKSEN. I yield.

Mr. SABATH. I know the gentleman does not desire to be unfair to the city of Chicago.

Mr. DIRKSEN. No, indeed.

Mr. SABATH. There is one fact which I did not have time to call attention to, and that is the fact that we are 2 years behind in the collection of taxes.

Mr. BRITTEN. Two Democratic years.

Mr. SABATH. And this is due to the fight between a Republican mayor and the Republican tax commissioners, who by their fight prevented the levying of taxes against real estate and prevented the collection of any kind of taxes. We are now beginning to collect them.

Mr. MILLARD. Will the gentleman yield? Is this the same city that the gentleman from Illinois referred to in his speech?

Mr. DIRKSEN. The great city of Chicago, the metropolis of the West; yes.

However, Mr. Chairman, I had no intention of washing any of the linen of the great Commonwealth of Illinois here this afternoon. What I rose to speak about very briefly has reference to the proposed measure that will come to the attention of this body before very long dealing with reciprocal tariff powers to be conferred upon the Chief Executive.

I am led to speak very briefly on the subject for the reason that on Sunday night when I went to my apartment there

was a professional broadcaster on the radio who charged directly and indirectly that the Republican criticism that had been aimed at the contemplated enlargement of the tariff powers of the President was based on pettiness and partisanship and that sort of thing. So I believe I should clarify my own particular position, because I am at present opposed to the granting of such powers, and I believe I can rise above all sectional interests to the point where my objection can be based on principle.

You know Adam Smith, the old English economist, long ago advanced the theory that there should be division of labor between nations as well as individuals; in other words, if some nation in Europe has a special adaptability to some kind of manufacturing, that nation ought to lend its efforts in that direction and so take that share of the world's work. If over in the Western Hemisphere there is a nation that can best produce foodstuffs and raw materials, that nation ought to direct its energies to that end. Nations, like individuals, should do the things they could most efficiently and economically do. They preached this doctrine of division of labor between nations for a long time, but it occurs to me that this doctrine has become worn out, particularly so under the stimulus of the World War.

Let me say that when the World War came on and the submarine warfare became rather effective we found, for instance, in this country that we were dependent upon Germany for a supply of salvarsan to take care of that dread social scourge, syphilis; we did not have sufficient to go around, and here we were dependent on another nation. We were dependent upon Germany for luminal, which is used as a preventive of epileptic fits. We were dependent upon Japan for camphor. We were dependent upon Sicily for sulphur, until they discovered the deposits in Louisiana. One might compile a long list of items for which we were dependent on other nations.

We shared a certain dependency upon all the nations of the world, but when the war came on and we found that these available supplies in the different countries of the world had been shut off, it stimulated inventiveness, it stimulated industrial enterprise, and as a direct consequence we began to expand our nationalistic spirit and to determine that perhaps after all, both agriculturally and industrially, we could set up a certain kind of independence. We found ourselves more or less dependent on Germany for dyes and dyestuffs, but under the stimulus of the nationalistic and inventive spirit that deficiency was remedied and we now produce dyes. We seemed so dependent on Chile and Germany for nitrates, and then came the fixation process, a development of which we now see in the work being carried on at Muscle Shoals. We used to import five sixths of our requirements of rayon, because as late as 1921 we only produced 15,000,000 pounds. Today, however, we are producing more than 140,000,000 pounds annually and giving employment to 40,000 people in that industry. The war made us keenly conscious of our dependent condition, stimulated enterprise, disclosed the tremendous opportunities in so many fields, and as a result we are in the position where we cannot only produce virtually everything we need but can produce more.

While this development was proceeding in the United States, do not forget that the same stimulus was operating in other countries. Mussolini no longer needs Johnny Bull's coal, because Mr. Mussolini developed Italian water power. Hydroelectric development also proceeded in Sweden and Switzerland and elsewhere. Germany and Norway carried the nitrogen fixation for fertilizers to a high and efficient degree. The world's sugar problem was aggravated by expansion not only in this country but in Asia and European countries as well. The Chinese and Japanese, quite alive to the fact that the great market for cotton goods was in the Orient, increased the number of mill spindles by the hundreds of thousand and already threaten the outlet for the cotton cloth which is made in England of American cotton and then shipped to the Orient. We are proud of American craftsmanship in the manufacture of shoes, and yet so intensive has been the development that Cuba, Mexico, Bolivia, Czechoslovakia, and virtually all other countries now manufacture shoes in quantities. One cannot point to a single industry but what he will find, with few exceptions, that other nations have so paced our development that today they are not only our competitors, but by virtue of low wages, can actually threaten us because of the low prices which they are able to maintain. A look in the merchandise stores will convince anyone that Japanese shrimp, pottery, toys, incandescent lamps, Chinese novelties, Czechoslovakian linens, Norwegian sardines, and canned fish, and a host of other items are selling in quantities, and in proportion as they do they simply perpetuate unemployment, because there is no market in those countries for our wares.

Nor will there be. What will they use for money if we expect them to become outlets for our goods? We shall be compelled to finance them if we expect to sell to them. If they use our money to buy capital goods, it means that they are only preparing for more intensive competition with us. If they use loaned money to buy consumers' goods, we may just as well kiss it good-bye, because it will probably not be repaid. If we must take goods from them, then we must squarely face the problem of determining what portion of our people must relinquish their present livelihoods and transfer their efforts to the production of exports goods. There will ultimately be no way to avoid these painful decisions. They must be made.

One fact we so often overlook is that we have steadily reduced immigration to the point where we now lose more people annually than we gain. If outlets for the peoples of other nations are closed, those nations must provide plant equipment to give them employment and that but intensifies the ultimate struggle, if we intend to follow this will-o'-the wisp of international trade.

As I see it, we have in recent years loaned money to every country on the globe, sold them machinery, sent them our best brains, taught them how to become manufacturing nations, making the same goods we used to sell them, and now we are about to plunge into competition with them by trying to revive international trade.

Now, it seems to me that the program of the administration, as it began last March, was definitely along nationalistic lines, and I am willing to subscribe to that program for better or for worse, provided it consistently seeks to carry out such a policy. But in this reciprocal proposal, it makes a sharp departure. For some time economists have contended that there should be brought about a balance between consumption and production, and the policies they are pursuing under the Agricultural Adjustment Administration, such as retiring of marginal land, reducing the production of corn and tobacco and cotton and hogs, is a direct attempt to bring about a better balance between consumption and production. But it occurs to me that if the Chief Executive should carry out the traditional policy and the leanings of his party with respect to economic treaties that are in contemplation at the present time, it would be hopelessly at variance with the very program upon which we embarked in March of last year.

I can see no relationship between the two. They seem to be at complete variance. On the one hand we seek to effect a domestic balance and on the other we are asked to throw that same domestic market open to foreign exploitation. Be it understood that these conclusions are by no means hard and fast. Rather, I am sort of thinking aloud today in the hope that queries will bring out additional light on the subject. After all, whether there shall be high protective tariffs or low tariffs, or free interchange of goods with nations whose standards of living are lower than ours, is not a question of preserving any one or any group of industries. It goes deeper than that. It is a question of preserving American living standards. Are we willing, for the sake of making a benevolent attempt to pull the standards of other nations up, to take the perilous chance of having our own pulled down?

It seems to me to be an altogether futile task to breathe life into a dead horse, and by "dead horse" I mean this theory of internationalism that we have embraced hereto-

fore. First, I doubt whether it can be done. Secondly, it is highly doubtful whether it should be done, if it could.

Let us look at it for a moment from the viewpoint of agriculture. If I thought for one moment or can be convinced that reciprocal tariffs will bring benefits to the farmer, I would embrace the idea with great enthusiasm. I can see no benefits for the farmer, because I can see no outlet for the very agricultural commodities that constitute our chief surplus.

If we go back to the war for just a little bit, we find there was such an intensification of agricultural efficiency in Denmark, in Norway, in Great Britain, in France, in Germany, and elsewhere, that their acreage yields have substantially increased since the war. We find, for instance, in Italy—where they produced 184,000,000 bushels of wheat in 1915—Mussolini stated, on the 16th of December 1933, in a special article in the St. Louis Post Despatch, that their production would be 300,000,000 bushels, and they are reclaiming an additional 7,000,000 acres of land with which to enlarge their wheat production.

The result is what? It may be determined by looking at Italy's wheat purchases in 1915 when it was 52,000,000 bushels, while the amount last year was less than one and one half million bushels. She has become self-sustaining as far as wheat is concerned. A little bit later she will not only be self-sustaining but be a competitor for exports.

The same thing is true of Argentina, the same thing is true of Australia, the same thing is true of Canada, and of the United States. As a result I believe that Secretary Wallace was on perfectly good ground when on the 16th of December, in a special article, he wrote that the world production of wheat had increased more rapidly than the population, and that our excess carry-over of foodstuffs in 1933 was twice that of 1926.

A glance at the figures in the Agricultural Yearbook for 1933 are rather illuminating. In 1890 world production of wheat was 1,878 million bushels. In 1932 it was 3,771 million bushels. That total for 1932 does not include Russia, where production was enormous. In 1890 Russia produced but 212 million bushels. It is safe to assume that in 1933 it will be in excess of a billion bushels. Canada produced but 42 million bushels in 1890 and 431 million bushels in 1933. Argentina produced but 31 million in 1890 and 321 million in 1933. Australia produced but 27 million in 1890 and 200 million in 1933. Greater farm efficiency, not only in America but in all corners of the world, but also greater acreages have simply drugged the world with wheat that far exceeds the increase in population.

This kind of decrease is also reflected in beef, pork, lard, and other commodities, and if one will but examine the figures he will find that the decline in exports did not set in in 1930 or 1929, but back in 1920 and 1921. Already at that early date we were beginning to feel the effects of production in other nations, but we paid little attention to it. The figures are expressed, not in dollars but in pounds, bushels, tons, and bales. That means that the old wheeze of depreciated money cannot be brought out as an explanation that the declines are due to fluctuating exchange rates.

I saw a statement made by Dr. Ezekiel only recently in a pamphlet saying that this excess carry-over started 6 or 7 years ago. I agree. It is not a matter that comes to us like a thief in the night. It started years ago and we did not heed the warning, we did not sense the signal bells, and as a result today you find intensified production of agricultural commodities the world over, far in excess of world demand, and then expect to remedy the trouble by applying reciprocal agreements.

That leads us to this radical question: Suppose we enter into reciprocal agreements with relation to wheat, of which, prior to 1929, we exported 20 percent of our entire crop. Where are we going to export it now? Send it to Italy? I say no, because the aggregate amount of wheat there is beyond their requirements. Send it to Norway, to Sweden, Germany, to Denmark? Indeed, no, because they have a sufficiency. They are in the export market themselves, and so far as the information comes to us they have sufficiency. That is to say, their requirements are so small as to be of little consequence in this export picture. Are we to enter into reciprocal agreements with the nations that are not able to pay for it? No; we have had some experience in that respect.

Mr. DONDERO. Will the gentleman yield?

Mr. DIRKSEN. I yield.

Mr. DONDERO. Is what the gentleman says about wheat true of other things going to make up food for the existence of life?

Mr. DIRKSEN. Those are the precise things I want to discuss as I go along. All these staples that are designated as agricultural commodities are the things that manifestly we would want to export. We face that condition in all respects, particularly with regard to cotton, the market for which is being slowly shut off because they are raising cotton in Argentine, in Brazil, in the Georgian Caucasus, and in India. It was said by a member of the British Parliament that in 5 years the calico printers of Lancashire and a great many weavers will be put out of business. Do you know why?

The cotton that went from the United States across the pond was fabricated into cloth in Lancashire mills, and then the cloth was shipped to India, China, Japan, the Orient generally. What is happening today? They are setting up the printing and knitting and weaving and spinning mills right there in the Orient where they are growing the cotton. That is the reason for the statement in the Parliament that they expect ultimately to have their interests prejudiced in England. If that is true, then what outlet other than a temporary one can we see, particularly for this fluffy product of the South? How can the situation be improved to any measurable or advantageous degree by conferring a grant of power to the President to enter into reciprocal agreements that might result in downward as well as upward revision, and do more harm than good in unbalancing the present program and imperiling the vast expenditures already made?

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. BOLTON. Mr. Chairman, I yield the gentleman 5 minutes more.

Mr. SUMNERS of Texas. Mr. Chairman, before the gentleman begins I should like to ask him a question.

Mr. DIRKSEN. I yield.

Mr. SUMNERS of Texas. The gentleman is making a very interesting statement. Does the gentleman have any notion that possibly the tariff policies of the world have resulted in a congestion, and in a congestion in the world's economic circulatory system, that it might be agreed that we could work around and go back to the old notion of letting other people produce, and bartering with them?

Perhaps I can make my question a little more pointed. If the cotton producers and the corn producers are shut out from the markets of the world, then the manufacturers of America, it seems, would be shut out from the purchasing power of the people heretofore producing that surplus. I am asking that question not in a combative or antagonistic way, but it is an interesting point, and the gentleman has evidently studied this question.

Mr. DIRKSEN. I am grateful to the distinguished gentleman from Texas for the question. I want to assure the gentleman that I do not profess to be an expert, but I have labored over this matter, and shall be glad to present my views on the matter. The gentleman alludes now to the purchasing power of the world; that is, these other countries with which we have had commercial intercourse all these years.

Mr. SUMNERS of Texas. Yes.

Mr. DIRKSEN. And of the purchasing power that would recede from this country by virtue of high tariff walls?

Mr. SUMNERS of Texas. Let me make my question a little more clear. If, by reason of our tariff walls, we force countries who have ordinarily purchased from us to make

capital investment in order to supply their own needs, would not that be rather a dangerous thing for us to do?

Mr. DIRKSEN. I am glad to get the gentleman's question correctly, because I fear precisely that conclusion. I believe, first of all, that this country has capacity for self-containment. I believe that as a matter of policy it would be basic and fundamental, and that we would be infinitely better off than to give opportunity to other hungry nations in the world to come in and exploit the greatest and most open free market that is left on the face of the globe. I rather fancy that there are only a few countries that have a complete capacity for self-containment at the present time. I should say that the United States is one, that Russia perhaps is another, and that ultimately Japan, if she enlarges her territorial domain and continues to push into Manchukuo and Manchuria will have that. Now the gentleman says that is dangerous.

Mr. SUMNERS of Texas. I did not say so. I was asking the gentleman.

Mr. DIRKSEN. The gentleman will excuse me making the wrong inference. There are a great many people who infer and assume that it is dangerous to carry on a policy of isolation. I say that economically we can do it. We can do it for the simple reason that there are only three or four products that are lacking within the territorial confines of this country to make us completely self-contained, and if we were compelled to do so, those could be synthetically produced. I refer to tin, that we receive from Bolivia, and to rubber and to tea and possibly to coffee, and I assume there would be a way to supply our needs and requirements of those through the laboratory or in some other synthetic way, so that we could be self-containing.

I started out with the premise that I thought we were trying to breathe life into a dead horse called "international trade" through the instrumentality of this reciprocal tariff policy, and that, in my estimation, it cannot be done for one thing; and, secondly, it is not desirable. When we look at our export trade, here is what we find: In 1932, 35 percent of our total exports were made to five countries that have defaulted on their war debts—Germany, France, Belgium, Italy, and Great Britain. Those five countries took 35 percent of our exports in 1932.

The CHAIRMAN. The time of the gentleman from Illinois has again expired.

Mr. BOLTON. I yield the gentleman 2 minutes more.

Mr. DIRKSEN. Mr. Chairman, by way of conclusion, and I am sorry that I must conclude, let me say this. What has happened in this country, as far as expansion of industry and efficiency are concerned, is happening also in other countries. Let no one labor under the misapprehension, because a man's skin is yellow or black, that under modern conditions, with the agencies of standardization and mass production, that that man is not equal in skill to the American workingman. Why, Henry Ford can take a man, black or yellow, who cannot talk our language, and inside of a week he will make an efficient workman out of him.

That has happened in all countries. They have developed agricultural independence. They have developed certain industrial independence, and largely so through our own contriving.

Mr. SHALLENBERGER. Will the gentleman yield?

Mr. DIRKSEN. I yield.

Mr. SHALLENBERGER. The gentleman's argument leads to the fact that we should abandon tariffs and place embargoes? In other words, we should abandon the idea of restoring our foreign trade by simply prohibiting it entirely?

Mr. DIRKSEN. I think ultimately that is what we would come to, if the present condition persists.

Mr. SHALLENBERGER. The gentleman has not forgotten that upon this matter of reciprocity the great Republican President, William McKinley, and James G. Blaine were the first advocates and forceful speakers for this policy of reciprocity. It really had its origin in the Republican Party and not in the Democratic Party.

Mr. DIRKSEN. Possibly so, but as an individual who tries to get away from all sectional sentiment I cannot subscribe to it in the light of what has happened since 1917 and 1918. The war opened our eyes. It opened the eyes of other nations. It was the rude jolt which indicated to nations that there was nothing particularly sacred or divine about industry or agriculture and that they could make shoes and ships and pottery and raise wheat and rye and hogs the same as this or any other country.

It is regrettable that more time is not available for a more logical and extended discussion of this matter. However, by way of conclusion, let me say that we have in the hysteria days loaned billions to other nations, have in fact begged them to accept our money, have sold them machinery and capital goods, have showed them how to do it, have watched them do it, have watched them develop from customers to competitors, have seen them become efficient both industrially and agriculturally, and thus shatter Adam Smith's old theory of division of labor among nations; and now, with their low wages, low standards of living, and their inability to buy from us unless we loan them the money, we contemplate opening up the American market and pulling down the American standard of living in an international trade battle. I doubt the wisdom of such a course.

We started out on a nationalistic basis. Millions have been expended to curtail production. Millions are exacted from the American public in the form of processing taxes. We seek to effect a domestic balance of consumption and production, and now we are about to open the back door and let the products of other nations in, in the hope that they will buy from us and so help ease the present situation. If you can show me what they can buy from us and what they will use for money and show me a single substantial advantage, I shall be better able to understand the wisdom of this contemplated power to effect reciprocal agreements.

The CHAIRMAN. The time of the gentleman from Illinois [Mr. DIRKSEN] has again expired.

Mr. COLLINS of Mississippi. Mr. Chairman, I yield such time as he may desire to the gentleman from Alabama [Mr. OLIVER].

Mr. OLIVER of Alabama. Mr. Chairman, I ask unanimous consent to extend my remarks on the recovery program of the President since he was inaugurated in March 1933, and to insert as a part of my remarks some excerpts from messages and speeches of the President relating thereto.

Mr. MARTIN of Massachusetts. Reserving the right to object, is it the gentleman's own remarks?

Mr. OLIVER of Alabama. Yes; and some excerpts from the President's speeches and messages on his recovery program.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

Mr. OLIVER of Alabama. Mr. Chairman, in a modest way I shall attempt to review some of the outstanding accomplishments of this administration. When the President was inducted into office and announced his program of recovery, I took my place at his side and have consistently supported and cooperated with him.

The progress that has been made and is now being made is nothing short of marvelous. Neither time nor space will permit a comprehensive survey of the entire work done and the difficulties overcome. The whole work has not been completed, but the light in the east is the breaking of the dawn of a new era, the coming of which is as sure as that Time itself will endure. No other President has faced such a serious situation as did Mr. Roosevelt when he took the helm of state in March 1933.

HOW NEW DEAL MET DESPERATE SITUATION

The banking situation was desperate. He did not delay or dally but told the bankers that they must all close their doors and keep them closed until such time as would be necessary to let the people get rid of the hysteria that was causing them to withdraw their holdings. He told the bankers that they must put their houses in order, that the

crooked money changers must be driven from the temple. He told the people that they must not hoard gold, and had laws passed by Congress that brought into the channels of commerce a vast amount of that money which was being hidden out.

The Reconstruction Finance Corporation was given broader powers and made to function more smoothly. In our own State, for example, the Corporation stepped into the breach and provided funds to pay our teachers and keep our schools operating in order that there should be no temporary breakdown in our educational system. Funds were poured into all needy sections of Alabama for this purpose. Funds have also been available to prevent foreclosure sales of many homes in country and town.

The National Recovery Act became a law and under it an unheard of field of activities was initiated. Millions of idle people were put to work, and bare backs were clothed, and empty stomachs were filled. The activities under this act have been far-reaching. No other peace-time undertaking has ever approached it in magnitude.

T.V.A. DEVELOPMENT CITED

The Tennessee Valley improvements are well under way, and soon the waters of that stream will be harnessed, the floods will be controlled, and the waters that through the eons of time have been wasted will be driving the turbines, producing electric energy, and will become one of our greatest national assets—instead of a white elephant it has become a white hope—

Auspicious Hope! in thy sweet garden grow
Wreaths for each toil, a charm for every woe.

PAY CHECK VERSUS DOLE

The Public Works program has given jobs to idle people in every corner of the Nation. The pay check has forestalled the dole. The independence of the people has been encouraged and preserved.

The question of capital and labor, always difficult and trying, has been and is being ironed out. The Biblical edict that the laborer is worthy of his hire has been disinterred and a new motto has been added—that there must be reasonable working hours and adequate living wages, so that when pay day comes the workman will have money for meat and bread, clothes and raiment, a little to spend for pleasure and comforts, and some to lay by for the rainy day.

There can be no general prosperity if the farmer and those who toil for a daily wage are not adequately paid for their work. These classes consume more than three fourths of the necessities and essentials. The ball of progress can only be started when these people have something to spend. When these millions are gainfully employed, each revolution of the wheels of industry is given momentum, resulting in a demand for more coal, and iron and steel, more lumber and building materials, more things to eat, and more clothes to wear.

FARMER GAINS EQUAL RECOGNITION

Much has been done for the farmers. They were paid to plow up parts of their crops. Loans have been made to them at reasonable rates of interest. They have been advised and importuned to rotate crops, and grow on their farms, as nearly as possible, everything needed for living purposes. The table given below shows how the farmer has benefited. These figures are approximate and, of course, change from day to day:

Wheat today, 87 cents; last year, 47 cents.
Corn today, 51 cents; last year, 24 cents.
Oats today, 35 cents; last year, 16 cents.
Cotton today, 12 cents; last year, 6 cents.

Many other farm products are bringing better and more adequate prices.

The President has recognized and stressed the self-evident proposition that for real prosperity to be regained and maintained, the productivity of the farm and labor must be nurtured and not exploited.

Look at the prices given above and see what it means to my immediate constituents. The difference between the value of a cotton crop of 11,000,000 bales now and last year is around $300,000,000. This benefit does not stop the farmer, but enables him to pay the merchant, who can pay the banker; puts all kinds of money in circulation, and creates a cycle of spending that is felt in every mart of trade and commerce.

There is one strange thing in the history of this country. The farmers have never been recognized and treated by the Government as have been the industrial and financial interests. Everything we wear and eat must come from the farms. Without their products we must die. That farmers are entitled to an adequate, comfortable living is recognized by the President, and he has done more to help them than any other man who has ever served this Nation.

WOMEN SHARE NEW-DEAL EFFORTS

The President has not overlooked the good women. He has paid just tribute to their part in conducting the affairs of the Nation. Miss Perkins has been made Secretary of Labor, and no one can deny that she is making good with her administration of the affairs of her high and honorable position. Mrs. Ruth Bryan Owen is the Nation's representative at the Danish court, where her grace and charm are reflecting great credit and evidencing an ability for public service that is worthy of the daughter of the great commoner, William Jennings Bryan. Miss Allen, a lawyer and jurist from the State of Ohio, has been elevated to the United States Circuit Court of Appeals, the first woman to hold such a high place. There are many other able women also holding honorable and responsible places of trust under Mr. Roosevelt's appointments.

PRESIDENT ASKS CONTINUED COOPERATION

I want to call particular attention to some of the sayings of the President in a recent speech concerning his investigations of the capital-and-labor issues:

Every examination I make and all the information I receive lead me to the inescapable conclusion that we must now consider immediate cooperation to secure increase in wages and shortening of hours. I am confident that your deliberations will lead you also to this conclusion.

Reduction in hours, coupled with a decrease in weekly wages, will do no good at all, for it amounts merely to a forced contribution to unemployment relief by the class least able to bear it. I have never believed that we should violently impose flat, arbitrary, and abrupt changes on the economic structure, but we can nevertheless work together in arriving at a common objective.

SUPREME COURT CATCHES SPIRIT

The judges of the high courts of last resort have been caught by the spirit of the times and have held that emergencies such as have and now are confronting this Nation must be taken into consideration in passing upon the validity of laws enacted for the purpose of ameliorating the conditions which now surround and are prevalent all over the country.

The following is from a recent opinion of the United States Supreme Court holding valid a law passed by the New York Legislature fixing the minimum price of milk:

Under our form of government the use of property and the making of contracts are normally matters of private and not of public concern. The general rule is that both shall be free of governmental interference. But neither property rights nor contract rights are absolute, for government cannot exist if the citizen may at will use his property to the detriment of his fellows or exercise his freedom of contract to work them harm. Equally fundamental with the private right is that of the public to regulate it in the common interest.

The milk industry in New York has been the subject of long-standing and drastic regulation in the public interest. The legislative investigation of 1932 was persuasive of the fact that for this and other reasons unrestricted competition aggravated existing evils, and the normal law of supply and demand was insufficient to correct maladjustments detrimental to the community. The inquiry disclosed destructive and demoralizing competitive conditions and unfair trade practices which resulted in retail price cutting and reduced the income of the farmer below the cost of production.

NEW-DEAL POLICIES WILL WIN

In every crisis, in every emergency through which this Nation has passed, there has arisen some great genius—and I say it most reverently, at the call of the Almighty Ruler of the Universe—to grasp the helm of the Ship of State and pilot

her safely through the breakers to a haven where peace, plenty, happiness, and prosperity are found, where cosmos and not chaos reigns.

No one can say that the whole work has been done, but our undaunted and unafraid leader is still carrying on with wizardous foresight and intuition, and just as sure as Moses led the hosts of Israel in triumph through the Wilderness, just as sure as George Washington piloted the Continental Army to victory and nurtured the young Nation through its period of swaddling clothes, just so surely will we emerge from these troublesome times. We must all stand shoulder to shoulder and arm to arm and give all the aid and power at our command to the gallant captain of our hosts. There must be no bickering and no stalling at this time of travail in our country's history.

CONTINUED SUPPORT PLEDGED

The President has subordinated political expediency and partisan politics to the higher things which are exacting from him unbelievable labor, but his capacity for work seems unlimited. His grasp of the many difficult questions which he has been called on to decide and the facility with which he has handled them are marvelous. His cheery smile and contagious good humor, with his devotion to duty, have made him the idol of his people.

From the depths of my heart comes this sincere tribute to the great Chieftain. I have supported him as best I know how and shall continue to do so. I am proud and deeply appreciative that my people have honored me by giving me the opportunity to serve under such a leader.

May the President live long and see and enjoy the full fruition of his toil and have a happy journey down the shaded side of life's highway, surrounded by a happy and contented people.

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 15 minutes to the gentleman from Texas [Mr. McFARLANE].

Mr. McFARLANE. Mr. Chairman, I think the subcommittee on this War Department appropriation bill is entitled to great praise for the splendid work it has done on this measure.

By referring to bill we find that the total appropriation carried this year is about $349,000,000. The appropriation for next year shows that the committee has cut that some seventy-odd million dollars, for which they are entitled to great credit.

What I want to speak to you about at this time is our national-defense policy in the air.

As you know, we have it divided up at this time among different departments—Bureau of Aeronautics, of the Army, Navy, Post Office Department, Commerce Department, Coast Guard, and several other bureaus bearing directly on this subject. Since the World War the Government has averaged in spending, so I am informed, more than $100,000,000 annually on aviation, and this is more than any other nation is spending on aviation. Where are we going and what progress are we making? All of these are questions I am sure, in which we are all vitally interested.

WHAT IS OUR POSITION IN THE AIR?

What is our position in the air today? Where do we find ourselves? We find a divided organization, our land forces supreme on the land, our sea forces supreme on the sea, each primarily interested in the fundamental principles and purposes for which they were organized, and therefore slight or neglect other departments under them where there is a conflict of interest.

Mr. WALTER. Will the gentleman yield?

Mr. McFARLANE. I yield.

Mr. WALTER. Does the gentleman feel that a combination of all of the aviation activities into one department might in some way eliminate the various things we have been learning about recently?

Mr. McFARLANE. Yes, sir. That is just the proposition I am coming to, that is, a unified system of national defense. The creating and organizing of all these different departments and bureaus into one unified air system is what I have in mind. I believe that we must of necessity come to that if we are to take our proper place in the air. We must have unified air control. Hon. JAMES A. FREAR, in making their report on investigating aircraft expenditures in the War Department in 1921, said:

A SEPARATE AIR SERVICE INDISPENSABLE

Any investigation to be of permanent value should offer a solution for the problem of intelligent aircraft advancement.

Fortunately or unfortunately, the striking failure of the War Department to rise to the aircraft emergency, either, in peace or in war, has made necessary the creation of a separate bureau or department of aeronautics. Therein all governmental activities should be centered, with a capable, progressive official at the head.

Practically every witness examined on the subject of future American air service united in a plea for separate independent control. From generals to lieutenants, from private citizens familiar with the subject, and from every experienced aviator appearing before our committee, including Generals Mitchell, Kenly, and Foulois, military aircraft authorities, and LaGuardia, Meissner, Kindley, and, last but not least, Rickenbacker—men who upheld American air laurels at the front—all unanimously urge a separate air service that will work and cooperate with the Army, Navy, Post Office and Interior Departments in the development of aviation. We feel that real progress in aviation must depend in a material degree upon encouragement given to civil and commercial aviation.

Adequate appropriations, wisely expended, are necessary to put America to the front, where she belongs. The imperative necessity for this policy must be apparent to all who have studied the constantly increasing scope of aeronautics. Cooperation with and encouragement to inventors and manufacturers and a broad, intelligent policy are demanded. Practically all other countries have adopted that course, and ours must not fail at this crucial period to do so.

The future of aviation is beyond our present dreams or understanding, and our Government must do her full part in leading in its development.

Great Britain faced this same situation during the World War. Germany organized and unified its air force in 1916. Great Britain in 1917, after much of its country was bombed and much property destroyed, was forced to organize and unify its own air forces under one head. Soon thereafter France, Italy, Spain, and the other countries followed suit. Ours is one of the few major powers today that do not have a unified air system.

It may be argued that we should continue as we have done, with a divided departmental service, and that each will not suffer as a result thereof. The answer to that, my friends, I think, can be found in a careful analysis of some statistical charts that I shall insert in the RECORD to show the exact position of the United States in the air as near as we can reach a conclusion at this time.

(The charts are as follows:)

COMPARISON OF THE LEADING WARPLANE ENGINES OF THE WORLD, 1933

TABLE I.—*Warplane engines, characteristics and performance*

SEC. A. 400 TO 450 HORSEPOWER FOR SMALL FIGHTERS

Position	Country	Engine	Cylinder arrangement	Cooling	Rated horsepower	Maximum power		Weight (pounds per horsepower)	Supercharged	Remarks
						Actual horsepower	Altitude (feet)			
1	France	Delage G.V.I.S	12A	W	450	450	16,500	1.30	S	Inverted.
		Farman 12 G.V.I	12A	W	450	420	18,150	1.28	S	Inverted, 540 h.p. maximum.
		Potez 12 A.S	12-	W	400	400	21,450	1.71	S	Opposed cylinders.
2	Great Britain	Armstrong-Siddeley "Jaquar"	14 R	A	400	400	14,500	1.99	S	
2	Japan	Mitsubishi "Jaquar"	14 R	A	400	400	14,500	1.99	S	License from Great Britain.
3	U.S.A	Pratt & Whitney "Wasp Jr." T-3A	9 R	A	420	360	4,000	1.50	S	Mildly supercharged, 1932.
		Wright "Whirlwind" SR-975-E2	9 R	A	420	360	4,000	1.40	S	Mildly supercharged, 1932.

TABLE I.—*Warplane engines, characteristics and performance*—Continued

SEC. B. 500 TO 550 HORSEPOWER FOR FIGHTERS

Position	Country	Engine	Cylinder arrangement	Cooling	Rated horsepower	Maximum power		Weight, pounds per horsepower	Supercharged	Remarks
						Actual horsepower	Altitude (feet)			
1	Great Britain	Bristol "Mercury IV" S. 2	9R	A	540	560	16,000	1.12	S	Special: 893 h.p. at 16,000 feet.
		Armstrong-Siddeley "Panther"	9R	A	535	520	11,200	1.86	S	1351.
		Napier "Lion" XV	12W	W	550	600		1.75		Holds world's long-distance record of 5,341 miles.
2	Japan	Nakajima "Jupiter" XF	9R	A	540	570	12,000	1.66	S	License from Gt. Britain, 1931.
3	France	Lorraine "Petrel"	12V	W	500	500	14,850	1.09	S	800 h.p. maximum.
		Gnome-Rhone "Mistral" K. 9	9R	A	500	500	13,200	1.33	S	
		Farman 12 W.E.S	12W	W	500	500	19,000	1.40	S	
4	U.S.A	Pratt & Whitney "Wasp" S1-D1	9R	A	550	500	11,000	1.42	S	550 h.p. at 5,000 feet, 1933.

SEC. C. 600 TO 650 HORSEPOWER FOR FIGHTERS, BOMBERS

1	Great Britain	Rolls-Royce "Kestrel" II S	12V	W	600	840	11,500	1.11	S	Ground equivalent: 1,200 h.p.
		Bristol "Pegasus" S. 2	9R	A	600	580	13,500	1.69	S	Holds world's altitude record of 43,976 feet, 1932.
		Armstrong-Siddeley "Tiger"	14R	A	650	722		1.53	S	
2	France	Hispano-Suiza 12 X brs	12V	W	(500)	710	13,200	1.29	S	Ground equivalent: 1,100 h.p.
		Renault	12V	W	650	650	13,200	1.73	S	
		Lorraine "Courlis"	12W	W	600	660		1.41		
		Farman 12 W.I	12A	W	600	555	18,000	1.36	S	Inverted, 74 h.p. maximum.
2	Japan	Kawasaki-B.M.W. VII A	12V	W	600	770		1.39	S	Japan can also manufacture Rolls-Royce and Lorraine engines.
		Mitsubishi-Hispano-Suiza	12V	W	600	650	13,200	1.29	S	
3	Italy	Fiat A. 30R	12V	W	600	600	13,200	1.20		850 h.p. maximum.
3	U.S.A	Curtiss "Conqueror" SV-1570F	12V	W	600	600	12,000	1.44	S	First supercharged September 1932.
		Pratt & Whitney "Twin Wasp Jr." R. 1535.	14R	A	600	625		1.33	S	1932.
		Pratt & Whitney "Hornet" T. 1C	9R	A	(700)	578	8,000	1.20	S	
		Wright "Cyclone" SR-1820-F2	9R	A	(700)	600	12,000	1.21	S	605 h.p. maximum.
		Wright "Whirlwind" R. 1510	14R	A	(700)	600	12,000	1.24	S	1933.

SEC. D. 700 TO 900 HORSEPOWER FOR HEAVY DUTY

1	Great Britain	Rolls-Royce "Buzzard" II M.S	12V	W	850	935		1.65	S	
		Armstrong-Siddeley "Leopard"	9R	A	800	854		1.89	S	1932.
2	France	Hispano-Suiza 12 Y brs	12V	W	(650)	900	13,200	1.09	S	Ground equivalent: 1,490 h.p.
		Gnome-Rhone "Mistral Major" K.14.	14R	A	800	870	13,200	1.56	S	Ground equivalent: 1,340 h.p.
		Lorraine "Orion"	18W	W	700	870		1.44		
		Renault 18 J br	18W	W	700	850		1.67	S	
3	Japan	Kawasaki-B.M.W. IX A	12V	W	800	900		1.53	S	Japan can also manufacture Lorraine and Junkers engines.
		Mitsubishi-Hispano-Suiza	12V	W	700	860	13,200	1.09	S	
3	Italy	Isotta-Fraschini "Asso" 750R	18W	W	850	920		1.64		
		Fiat A. 26R	12V	W	700	760		1.44		
4	Germany	Junkers L. 88a	12V	W	800	850		1.98	S	
5	Czechoslovakia	Avia V. 30	12V	W	700	700	13,200	1.76	S	Allied to France.
6	U.S.A	P. & W. "Twin Wasp, Jr."	14R	A	700	700	8,000	1.33	S	725 h.p. maximum, 1933.
		P. & W. "Twin Wasp"	14R	A	800	830	4,500	1.36	S	

SEC. E. 900 TO 1,000 HORSEPOWER FOR HEAVY DUTY

1	Czechoslovakia	Avia W. 44	18W	W	1,000	1,000	15,200	1.65	S	Allied to France, 1932.
2	France	Hispano-Suiza 18 Sb	18L	W	1,100	1,125		1.20	S	
		Lorraine "Eider"	12V	W	900	1,050		1.33	S	
3	Great Britain	Rolls-Royce "Buzzard" II M.S	12V	W	(900)	935		1.65	S	
3	Italy	Fiat A. 25	12V	W	950	1,050		1.69	S	As supplied to China.
		Isotta-Fraschini "Asso 1000"	18W	W	900	1,100		1.62		
3	Germany	Mercedes-Benz F.2	12V	W	900	1,030		1.76	S	
4	Japan	Licensed to manufacture Hispano-Suiza, Lorraine, and Rolls-Royce airplane engines.								
0	U.S.A	None								

SEC. F. 1,000 HORSEPOWER AND UP, FOR RACING PLANES

1	Italy	Fiat A.S. 6	24V	W	2,300	2,600		0.78	S	2,900 h.p. at 3,000 r.p.m. World's airplane speed record, 1933. World's airplane speed record, 1931.
1	Great Britain	Rolls-Royce "R"	12V	W	2,300	2,600		0.63	S	
		Napier "Lion" VIId	12V	W	1,250	1,350		0.89	S

[4] See note 2.

[5] Betwixt and between types not encouraged abroad.

[6] Displays ignorance of aerobatics.

TABLE III.—*Warplanes—duty, characteristics, and performance*—Continued

SUPPLEMENTARY—THE RACING PLANES OF THE WORLD

Position	Country	Type	Wing arrangement	Engine	Cooling	Rated horsepower	Maximum horsepower	Maximum speed	Year	Remarks
1	Italy	Macchi-Castoldi S-M. 67	M	Fiat A.S. 6	W	2,300	2,600	424.03	1933	World's speed record for all types of planes.
		Macchi M. 5z bis	M	Fiat A.S. 3	W	1,000	1,050	318.4	1928	World's speed record in 1928.
2	Great Britain	Supermarine S-6 B	M	Rolls-Royce "R"	W	2,300	2,600	407.5	1931	World's speed record for all types of planes.
		Gloster VI	M	Napier "Lion" VII D	W	1,250	1,350	336.3	1929	World's speed record in 1929.
3	France	Bernard 120	M	Hispano-Suiza	W	1,000	1,200	310.5	1929	Unofficial speed.
		Nieuport-Delage	M	Lorraine "Radium"	W	2,000	2,200	400.0	1931	Estimated speed, has not completed tests.
4	Japan	Licensed to manufacture Rolls-Royce, Hispano-Suiza and Lorraine airplane engines, and Nieuport-Delage airplanes.								
5	United States of America	"Mercury"	M	Packard X	W	1,200	1,250		1929	Never flown, could not leave the water.
		Granville "Gee Bee" R-2	M	P. & W. "Wasp Jr." special	A	600	800	294.4	1932	U.S.A. landplane record.

SUPPLEMENTARY—THE STRATOSPHERE (HIGH-ALTITUDE) PLANES OF THE WORLD

Position	Country	Type	Wing arrangement	Engine	Cooling	Rated horsepower	Weight (pounds)	Lbs./hp.	Miles per hours	Ceiling (feet)	Crew	Performance	Remarks
1	Germany	Junkers JU. 49	M	Junkers L. 88	W	800	8,800	11.0	310	50,000	2	Estimated	Supercharged. Variable-pitch propeller.
2	France	Farman F. 1000	M	Farman S V. I.	W	400	5,600	14.0		65,000	2	do	3-stage supercharger. Ultimate ceiling: 80,000 feet.
		Guerchais	M	Lorraine "Orion"	W	700	5,500	7.9	200	150,000	2	do	Brown-Boveri supercharger.
3	Japan	Licensed to manufacture Junkers airplanes and airplane engines.											
4	Great Britain, Italy, and Soviet Russia are considering stratosphere planes, and developments are under way.												
5	United States of America	No stratosphere planes under development.											

NOTE 1.—122 different warplanes have been compared in table III.

NOTE 2.—Tail-gun stations on the warplanes in secs. H, I, and J are behind the tail surfaces. For defensive armament, the use of such a tail-gun station gives a warplane 50 percent superiority over a warplane without it.

NOTE 3.—Only the speeds of warplanes at war-service altitudes have been compared in table IV. If rate of climb, war-service ceiling, useful load, and armament were also to be included, the United States average deficiency would be much worse, approximating engine table II.

NOTE 4.—The deficiency figures for the United States in sec. I have been omitted from the average deficiency totals, as the U.S. Army heavy bomber has been superseded by the United States fighter bomber.

NOTE 5.—Soviet Russia is manufacturing warplanes of its own design, and of German and Italian design. It may be considered as not weaker than the United States in warplanes.

NOTE 6.—A=Air-cooled; P=Prestone-cooled; W=Water-cooled; B=Biplane; M=Monoplane; S=Sesquiplane (1½ plane).

TABLE IV.—*Leading warplanes in table III compared according to their actual speeds at war-service altitudes*

SEC. A. ARMY FIGHTERS, PURSUIT, 1-PLACE (WAR-SERVICE ALTITUDE 15,000 TO 20,000 FEET)

Position	Country	Type	Miles per hour	United States deficiency in speed at war-service altitudes	
				Measured in miles per hour	Measured in percentage
1	Great Britain	Vickers "Jockey"	238		
2	Do	Hawker "Fury"	225		
2	France	Dewoitine 500	215		
3	Poland	P.Z.L.P. XI	205		
3	Italy	Fiat C.R. 30	205		
4	Japan	Kawasaki 92 (licensed to manufacture Hawker and Nieuport-Delage warplanes)	200		
5	Sweden	Svenska "Jaktfolk"	195	−53	−22.27
6	United States of America	Curtiss XP-934 / Boeing P. 26	185	−40	−17.78

SEC. B. NAVY FIGHTERS, 1-PLACE (WAR-SERVICE ALTITUDE, 15,000 TO 20,000 FEET)

1	Great Britain	Hawker "Nimrod"	210		
2	Japan	Hawker "Nimrod" (license from Great Britain)	205		
3	United States of America	Boeing F4B-4 / Curtiss "Goshawk" F11C-2	175	−35	−16.67

SEC. C. ARMY FIGHTERS, MULTIPLACE (WAR-SERVICE ALTITUDE, 15,000 TO 20,000 FEET)

1	Great Britain	Hawker "Demon"	205		
2	France	Breguet 41M3	195		
3	Japan	Junkers K. 47 (licensed to manufacture Hawker, Breguet, Junkers, and Dornier warplanes.)	180		
4	Switzerland	Dornier Do. C4	175		
5	United States of America	Berliner-Joyce P. 16	160	−45	−21.95

SEC. D. NAVY FIGHTERS, MULTIPLACE (WAR-SERVICE ALTITUDE, 15,000 TO 20,000 FEET)

1	Great Britain	Hawker "Osprey"	195		
2	Japan	Lincensed to manufacture Hawker, Junkers, and Dornier warplanes			
3	United States of America	Vought V. 70	160	−35	−17.95

TABLE IV.—*Leading warplanes in table III compared according to their actual speeds at war-service altitudes*—Continued

SEC. E. ARMY OBSERVATION GENERAL-PURPOSE PLANES (WAR-SERVICE ALTITUDE, 15,000 TO 20,000 FEET)

Position	Country	Engine	Horsepower	United States deficiency in power of warplane engines	
				Measured in horsepower	Measured in percentage
1	Great Britain	Hawker "Audax"	200		
1	Belgium	Renard R. 31	200		
2	France	Mureaux 112 R. 2	190		
3	Japan	Kawasaki 88 (also licensed to manufacture Hawker, Breguet, Junkers, and Dornier warplanes).	150		
3	United States of America	Curtiss "Raven" O-40A	175	−25	−12.50

SEC. F. NAVY OBSERVATION LANDPLANES, CARRIER PLANES, (WAR-SERVICE ALTITUDE, 15,000 FEET)

1	Great Britain	Hawker "Osprey"	195		
2	Japan	Licensed to manufacture Hawker, Short, Junkers, and Dornier warplanes			
3	United States of America	Vought V. 50	160	−35	−17.95

SEC. G. NAVY TORPEDO BOMBERS, LANDPLANES, CARRIER PLANES (WAR-SERVICE ALTITUDE, 10,000 FEET)

1	Great Britain	Blackburn "Ripon" M. 1/30	150		
2	France	Latecoere 29	140		
3	Japan	Navy 89 (licensed to manufacture Blackburn and Hawker warplanes)	135		
4	United States of America	Martin MB-2	125	−25	−16.67

SEC. H. ARMY FIGHTER BOMBERS (WAR-SERVICE ALTITUDE, 15,000 FEET)

1	Great Britain	Vickers B. 19/27	180		
2	United States of America	Martin YB-10	170		
2	France	Amiot 141 M	170		
3	Japan	Junkers K. 37 (licensed to manufacture Junkers warplanes)	165		
4	Czechoslovakia	Aero A. 42	160	−10	−5.56

SEC. I. ARMY HEAVY BOMBERS, TROOP TRANSPORTS (WAR-SERVICE ALTITUDE, 15,000 FEET)

1	Great Britain	Fairey	175		
2	Japan	Junkers K. 51 (licensed to manufacture Junkers and Dornier warplanes)	160		
2	Italy	Caproni 95	160		
3	France	Liore et Olivier "Le O" 206	140		
4	United States of America	Keystone B-6A	100	[1] −75	[1] −42.86

SEC. J. NAVY PATROL FLYING BOATS (WAR-SERVICE ALTITUDE, 10,000 FEET)

1	Great Britain	Short "Singapore II"	150		
2	Italy	Savoia-Marchetti S-55	135		
2	Holland	Dornier "Wal"	135		
3	Japan	Navy 90-1 (licensed to manufacture Short, Blackburn, and Dornier warplanes)	130		
4	France	C.A.M.S. 55-3	125		
5	United States of America	Martin XP2M-1	120	−30	−20.00

SUPPLEMENTARY—THE RACING PLANES OF THE WORLD

1	Italy	Macchi-Castoldi S-M. 67 (official world's record, 1933)	424.03		
2	Great Britain	Supermarine S-6B (official world's record, 1931)	407.5		
3	France	Bernard 120	310.5		
4	Japan	Licensed to manufacture Rolls-Royce, Hispano-Suiza, and Lorraine airplane engines, and Nieport-Delage airplanes.			
5	United States of America	Granville "Gee Bee" R-2	294.4		
		Total I, using Vickers "Jockey" (d^1) in sec. A (United States average deficiency in speed, all classes).		−33	−16.84
		Total II, using Hawker "Fury" (d^2) in sec. A (United States average deficiency in speed, all classes).		−31	−16.34
		Total III, racing planes, all types (United States deficiency in speed of racing planes).		−129.63	−3.570

[1] Omitted, see note 4, p. 3858.

BATTLE COMPARISON OF THE LEADING UNITED STATES WARPLANES WITH THE LEADING FOREIGN WARPLANES, 1933

TABLE V.—*United States Army fighters attacking foreign army warplanes*

GROUP A. UNITED STATES ARMY FIGHTERS (PURSUIT), 1-PLACE AND MULTIPLACE[1]

Comparison no.	Country	Type of warplane	Maximum speed (m.p.h. at 15,000 feet)	Crew	Number of guns	War-service ceiling (feet)	Remarks
1	United States	Boeing P-26	195	1	2	30,000	Wire-braced monoplane.
		Curtiss "Swift" XP-934	195	1	2	30,000	Enclosed cockpit.
		Berliner-Joyce P-16	170	2	3	26,000	
		Curtiss "Shrike" A-8	170	2	6	19,800	Ground attack plane.

[1] These machines cannot even reach the corresponding foreign planes.

TABLE V.—*United States Army fighters attacking foreign army warplanes*—Continued

VERSUS

GROUP B. FOREIGN ARMY FIGHTERS, 1-PLACE [2]

Country	Type of warplane	Maximum speed (m.p.h. at 15,000 feet)	Crew	Number of guns	Tail-gun station	War-service ceiling (feet)	Remarks
Great Britain	Vickers "Jockey" [3]	238	1	2		36,000	
	Hawker "Fury" [4]	225	1	2		35,000	Vertical power dives, 400 m.p.h
	Fairey "Firefly II"	225	1	2		35,000	
	Bristol "Bulldog IIIA"	200	1	2		33,000	
	Gloster S.S. 19	207	1	6		32,000	Compare with Curtiss "Shrike."
France	Dewoitine 500	230	1	2		35,000	207 m.p.h. at 26,000 feet.
	Nieuport-Delage 121C-1	225	1	2		39,000	Highest war-service ceiling.
	Loire 43 C-1	221	1	2		35,000	
	Mureaux 170C-1	220	1	2		33,000	
Poland	P.Z.L.P. XI	215	1	2		33,000	Allied to France.
Italy	Fiat C.R. 30	214	1	2		30,000	
Japan	Kawasaki 92 (K.D. 5)	205	1	2		32,000	Licensed to manufacture. Hawker and Nieuport-Delage.
	C. FOREIGN ARMY FIGHTERS, MULTIPLACE [5]						
Great Britain	Hawker "Demon"	210	2	3		32,000	
	Fairey "Fox II"	210	2	3		32,000	
France	Breguet 41 M3	195	3	5		31,350	2 engines.
Japan	Junkers K. 47	190	3	3		33,000	Licensed to manufacture Hawker, Breguet, Junkers, and Dornier.
Switzerland	Dornier Do. C4	190	2	4		31,150	
	GROUP D. FOREIGN ARMY, OBSERVATION GENERAL-PURPOSE, PLANES [1]						
Great Britain	Hawker "Audax"	210	2	3		35,000	
	Westland "Wallace"	190	2	3		35,000	
France	Mureaux 121 R-2	195	2	4		35,000	
	Breguet 27-3	200	2	4		30,000	
Belgium	Renard R. 31	205	2	3		34,500	
Japan	Kawasaki 88	155	2	4		27,000	Licensed to manufacture, Hawker, Breguet, Junkers and Dornier.
	GROUP E. FOREIGN ARMY FIGHTER BOMBERS [7]						
Great Britain	Vickers B. 19/27	180	4	[1] 2	1	27,000	No gun-station amidships.
France	Amiot 141 M	170	5	[8] 3	0	26,000	
Japan	Junkers K. 37	165	4	[8] 3	0	27,000	
	GROUP F. FOREIGN ARMY HEAVY BOMBERS, TROOP TRANSPORTS [9]						
Great Britain	Fairey	175	5	[8] 3	1	25,000	As transport: 4+20 soldiers.
	Vickers 163	150	5	[8] 4	1	20,000	As transport: 4+21 soldiers.
	Boulton & Paul P. 32	155	5	[8] 3	1	18,000	
	Gloster	143	5	[8] 4	1	19,000	As transport: 4+30 soldiers.
Italy	Caproni 95	160	6	[8] 3	1	18,000	Estimated.
Japan	Junkers K. 51	160	10	[8] 4	0	24,000	Licensed to manufacture Junkers.
	Kawasaki 87	150	6	[8] 4	0	20,000	Similar to Dornier Do. F.

[2] Superior in speed and ceiling to U.S. planes in group 1-A. Out of reach of United States planes in group 1-A.
[3] +30 horsepower now (1933).
[4] 250 miles per hour now (1933).
[5] Superior in armament, speed, and ceiling to United States planes in group 1-A. Out of reach of United States planes.
[6] No protection required owing to superior armament, speed and ceiling. Out of reach of United States planes in group 1-A.
[7] No protection required owing to superior defensive armament with tail gun.
[8] Gun stations.
[9] No protection required owing to superior defensive armament with tail-gun station. Optional defense by planes in group 1-C.

TABLE VI.—*U.S. Navy fighters attacking foreign navy warplanes*

GROUP A. U.S. NAVY FIGHTERS, 1-PLACE AND MULTIPLACE

Comparison no.	Country	Type of warplane	Maximum speed (miles per hour at 15,000 feet)	Crew	Number of guns	War-service ceiling (feet)	Remarks
2	United States of America	Boeing F4B-4	185	1	2	27,500	
		Curtiss "Goshawk" F11C-2	180	1	2	25,400	
		Curtiss "Sparrowhawk" F9C-2	163	1	2	21,700	U.S.S. *Macon* airship defender.
		Berliner-Joyce XFJ-2	180	1	2	24,700	
		Vought V-70	160	2	3	22,300	
		Curtiss "Helldiver" F8C-7	160	2	3	22,000	As supplied to U.S. Marine Corps.

VERSUS

GROUP B. FOREIGN NAVY FIGHTERS, 1-PLACE [1]

Country	Type of warplane	Maximum speed (miles per hour at 15,000 feet)	Crew	Number of guns	Tail-gun station	War-service ceiling (feet)	Remarks
Great Britain	Hawker "Nimrod"	210	1	2		35,000	Fastest navy fighter in the world.
Japan	do	205	1	2		35,000	License from Great Britain.
Do	Nakajima 90	200	1	2		32,000	

[1] Superior in speed and ceiling to all U.S. planes in group 2-A.

TABLE VI.—*U.S. Navy fighters attacking foreign navy warplanes*—Continued

GROUP C. FOREIGN NAVY FIGHTERS, MULTIPLACE [1]

Country	Type of warplane	Maximum speed (miles per hour at 15,000 feet)	Crew	Number of guns	Tail-gun station	War-service ceiling (feet)	Remarks
Great Britain	Hawker "Osprey"	200	2	3		32,000	
Japan							Licensed to manufacture Hawker, Junkers, and Dornier warplanes.

GROUP D. FOREIGN NAVY OBSERVATION, LANDPLANES AND CARRIER PLANES [2]

Great Britain	Hawker "Osprey"	195	2	3		32,000	
	Short "Gurnard"	185	2	3		30,000	
Japan							Licensed to manufacture Hawker, Short, Junkers, and Dornier warplanes.

GROUP E. FOREIGN NAVY PATROL FLYING BOATS [3]

Great Britain	Short "Singapore II"	[4] 150	7	[5] 4	1	16,000	Altitude maintained on 2 engines. 5,580 horsepower maximum.
	Short "Rochester"	[4] 145	10	[5] 4	1	15,000	
	Supermarine "Southampton X"	[4] 125	7	[5] 4	1	15,000	
	Blackburn "Iris V"	[4] 120	5	[5] 3	1	15,000	
Japan	Navy 90-1 (navy yard)	[4] 130	6	[5] 4	1	15,000	Cruises at 130 m. p. h.
	Navy 90-2 (Kawanishi)	[4] 125	7	[5] 4	1	15,000	K.F. 1 et seq. Cruises at 124 m. p. h.

[1] Superior in speed and ceiling to all U.S. planes in group 2-A.
[2] No protection required. Out of reach of all U.S. planes in group 2-A.
[3] No protection required owing to superior defensive armament with tail-gun station.
[4] Miles per hour at 10,000 feet.
[5] Gun stations.

TABLE VII.—*Foreign army fighters attacking United States Army warplanes*

GROUP A. FOREIGN ARMY FIGHTERS, 1-PLACE AND MULTIPLACE

Comparison no.	Country	Type of warplane	Maximum speed (miles per hour at 15,000 feet)	Crew	Number of guns	War-service ceiling (feet)	Remarks
3	Great Britain	Vickers "Jockey"	238	1	2	36,000	
		Hawker "Fury"	225	1	2	35,000	Vertical power dives, 400 m. p. h.
		Fairey "Firefly II"	225	1	2	35,000	
		Bristol "Bulldog III A"	200	1	2	33,000	
		Gloster S.S. 19	207	1	6	32,000	Compare with Curtiss "Shrike."
		Hawker "Demon"	210	2	3	32,000	
		Fairey "Fox II"	210	2	3	32,000	
	France	Dewoitine 500	230	1	2	35,000	207 miles per hour at 26,000 feet.
		Nieuport-Delage 121 C-1	225	1	2	39,600	Highest war-service ceiling.
		Loire 43 C-1	221	1	2	35,000	
		Mureaux 170 C-1	220	1	2	33,000	
		Breguet 41 M 3	195	3	5	31,350	2 engines.
	Poland	P.Z.L.P. XI	215	1	2	30,000	Allied to France.
	Italy	Fiat C.R. 30	214	1	2	30,000	
	Switzerland	Dornier Do. C4	190	2	4	31,150	
	Japan	Kawasaki 92 (K.D. 5)	205	1	2	32,000	
		Junkers K. 47	190	2	3	33,000	Licensed to manufacture Junkers. Licensed to manufacture Hawker, Nieuport-Delage, Breguet and Dornier warplanes also; and Rolls-Royce, Hispano Suiza, and other leading European airplane engines.

VERSUS

	Douglas O-38S	165	2	2		21,500	

GROUP E. U.S. ARMY FIGHTER BOMBERS [4]

United States of America.	Martin YB-10, 12, 13 (123)	170	3	[5] 2		25,000	Retractable landing gear.
	Boeing B-9	170	4	[5] 2		22,600	Do.

[1] Inadequate speed and ceiling against group 3-A.
[2] Inadequate speed, cannot reach planes in group 3-A.
[3] Protection required by United States planes in group 3-A and group 3-B.
[4] Protection required owing to the "blind tail".
[5] Gun stations.

TABLE VIII.—*Foreign navy fighters attacking U.S. Navy warplanes*

GROUP A. FOREIGN NAVY FIGHTERS, 1-PLACE AND MULTIPLACE

Comparison no.	Country	Type of warplane	Max. speed (m.p.h. at 15,000 feet)	Crew	Number of guns	War-service ceiling (feet)	Remarks
4	Great Britain	Hawker "Nimrod"	210	1	2	35,000	Fastest navy fighter in the world.
		Hawker "Osprey"	200	2	3	35,000	
4	Japan	Hawker "Nimrod"	205	1	2	32,000	License from Great Britain.
		Nakajima 90	200	1	2	32,000	

VERSUS

GROUP B. U.S. NAVY FIGHTERS, 1-PLACE [1]

Country	Type of warplane	Max. speed (m.p.h. at 15,000 feet)	Crew	Number of guns	War-service ceiling (feet)	Remarks
United States of America	Boeing F4B-4	185	1	2	27,500	
	Curtiss "Goshawk" F11C-2	180	1	2	25,400	
	Berliner-Joyce XFJ-2	180	1	2	24,700	

GROUP C. U.S. NAVY FIGHTERS, MULTIPLACE [3]

Country	Type of warplane	Max. speed (m.p.h. at 15,000 ft.)	Crew	Number of guns	Tail-gun station	War-service ceiling (feet)	Remarks
United States	Curtiss "Helldiver" F8C-7	160	2	3	----------	22,000	As supplied to U.S. Marine Corps.
	Vought V-70	160	2	3	----------	22,300	

GROUP D. U.S. NAVY OBSERVATION LAND PLANES-CARRIER PLANES [3]

United States	Vought V-50	160	2	3	----------	25,000	
	Vought SU-1	165	2	3	----------	25,000	

GROUP E. U.S. NAVY PATROL FLYING-BOATS [4]

United States	Martin XP2M-1 (121)	[5]120	5	[6]2	----------	14,600	
	Martin XP3M-1 (120)	[5]100	4	[6]2	----------	12,500	
	Consolidated P2Y-1	[5]100	5	[6]2	----------	14,000	

GROUP F. U.S. NAVY AIRSHIPS AND AIRSHIP-DEFENDER PLANES [7]

United States	"Macon" [8]	84	81	16	3	30,000	
	Curtiss "Sparrowhawk" F9C-2	163	1	2	----------	21,700	Airship defender plane.

[1] Inadequate speed and ceiling against foreign planes in group 4-A.
[2] Inadequate speed and ceiling against group 4-A.
[3] Protection required by group 4-B and group 4-C.
[4] Protection required by group 4-B because of "blind tail."
[5] Miles per hour at 10,000 feet.
[6] Gun stations.
[7] Airship defender too slow; cannot reach ceiling.
[8] Cannot return to mother ship at altitude, nor defend it at latitude.

Mr. McFARLANE. These charts show that our country is far behind several of the other major powers as to its position in the air. We find as a comparative basis that the speed of our aircraft or warplanes is from 20 to 30 percent less than that of other countries. That is a very serious situation. What does it mean to us? It means that our air forces cannot fight when they like, where they like, or how they like. Our leading warplanes are most deficient in elasticity of performance. They cannot even reach similar foreign planes to do battle with them. Comparatively speaking, these charts show we do not actually make or possess any warplanes.

OUR NAVAL COMMITTEE INVESTIGATION

As you know, our Committee on Naval Affairs has just recently concluded hearings on aircraft purchases for the Navy. It may be interesting for you to know that we have not had before our committee, in examining the different aircraft manufacturers, any but very few of what some might believe are independent aircraft concerns. How can we accurately arrive at the facts in the case when we hear very largely only one side of the question? I am sure we all will be greatly interested in the facts that will be brought out by the Military Affairs Committee of the House, which is now starting its labor, delving into the aircraft purchases for the Army under a resolution unanimously adopted by the House in which investigators will be employed and an appropriation of $10,000 made to make a thorough investigation.

THE AIR TRUST

Both the House Naval and Military Affairs Committees have been studying this question for more than the past month. After considerable effort I have today received the chart I hold in my hand. I believe it is the first time a chart of this kind has been compiled. It shows the interlocking connection of the aircraft trust in the United States and how it functions.

Mr. Chairman, I ask unanimous consent to insert this chart in the RECORD in connection with my remarks that the Members may have an opportunity to study it.

Mr. MARTIN of Massachusetts. Mr. Chairman, reserving the right to object, does the gentleman mean to insert the entire chart?

Mr. McFARLANE. Yes. I have examined the RECORD, I may say to the gentleman from Massachusetts, and find it has been done frequently in the past. This chart can easily be inserted on one page; and it will give accurately information I think each Member should have. I trust the gentleman from Massachusetts will not insist upon his objection.

Mr. MARTIN of Massachusetts. Will not the gentleman withhold his request until the ranking minority member of the Committee on Appropriations returns to the Chamber? This will not be long. For the time being I object.

Mr. O'CONNOR. Mr. Chairman, will the gentleman yield?

Mr. McFARLANE. I yield.

Mr. O'CONNOR. It is not an unusual request. We have had charts printed in the RECORD.

Mr. MARTIN of Massachusetts. I never saw one printed.

Mr. O'CONNOR. We have seen charts printed in the RECORD where they had to be spread out the long way of the page. We have had a number of charts printed in the RECORD. There is no question about it.

Mr. MARTIN of Massachusetts. Mr. Chairman, I withdraw my objection.

Mr. O'CONNOR. The gentleman was thinking of the cartoons that the gentleman from New York wanted to put in.

The CHAIRMAN. The gentleman from Texas asks unanimous consent to include in his remarks purely statistical matter arranged in columns.

Mr. McFARLANE. That is right, this chart showing the interlocking directorate of the Air Trust.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. McFARLANE. Mr. Chairman, this chart shows the intimate connection between the different aircraft companies now doing business with the Government. It shows that all, or practically all, the aircraft concerns of any consequence in the country head up through four holding corporations. The chart shows their connection and their interdependence upon these four holding companies.

NO COMPETITIVE BIDDING IN AIRCRAFT PURCHASES

What does this mean when our Government goes into the field to purchase aircraft for the different departments? It means that we are confronted with the Air Trust which sets the price all governmental agencies must pay for their aircraft equipment. The hearings before the Committee on Naval Affairs have shown clearly that there is not any serious competition in bidding for the sale of aircraft equipment to the Navy.

Most of the Members are familiar with the purchases of aircraft made by the different departments. After the experimental-design period has passed, then comes the question of production contracts. The hearings disclose that there has been very little, if any, competition in the procurement of aircraft for the Government departments. The aircraft are purchased by what is known as "negotiated" or "proprietary contracts"; the company that gets the experimental contract in practically every instance secures the production contract.

On February 2 Admiral King testified before our Subcommittee on Naval Affairs investigating aircraft purchases for the Navy, as follows:

Mr. DELANEY. You will take up the engines later?

Admiral KING. Yes, sir. There are only two engine companies in this country which produce engines of the size and power which are required for military aircraft. One is the Wright Aeronautical Co., of Paterson, N.J., and the other is the Pratt & Whitney Aircraft Co., of Hartford, Conn.

Mr. DELANEY. These are the two companies whose books you have audited in connection with their contracts with the Government for engines?

Admiral KING. Yes, sir.

Mr. DELANEY. Those are the Wright Aeronautical Co. and the Pratt & Whitney Co.?

Admiral KING. Yes. Those are the only two companies in this country which produce engines of the size and power to meet the requirements of military aircraft * * *.

As to the Pratt & Whitney Co., engines and spare parts completed during 1927 to 1933, total sales, $21,299,867; cost to the company, $15,563,067; profit to the company, $5,736,000; or a profit of 36 percent. That is a summary of it.

Mr. DELANEY. Then the difference in profit between the Wright Aeronautical Co. and the Pratt & Whitney Co. would be a difference of 31 percent; Pratt & Whitney making 36 percent and Wright Aeronautical Co. 5 percent.

Admiral KING. That is one way of looking at it, yes; Mr. Chairman.

On February 27 Admiral King gave additional testimony as follows:

We have provided first-class aircraft representing the most advanced state of performance available at the time of purchase. Aircraft which we feel are not inferior for our mission to those of any foreign power * * *.

I come now as to what is the crux of this hearing, viz, why do we not have competition? The answer to this is that we do have competition and extremely keen competition it is * * *.

The only engines that they make that is comparable in size and power are the Hornet and Cyclone series. When you come to the intermediate powers, only Pratt and Whitney make the Wasp engine. The Wright Aeronautical people have never brought out an engine of that size and power. Also, the Wright Aeronautical people bring out a whirlwind series which is about 200 or 300 horsepower, and Pratt and Whitney have no competition for that. So that you have the low-horsepower Wright Aeronautical, intermediate Pratt and Whitney, and in the high power they are comparable, and you find that the power is about the same and the prices are about the same. * * *

In the printed hearings before the Subcommittee of the House Committee on Appropriations for this bill Generals Pratt and Foulois testified as follows:

Page 489, lines 5 to 19, inclusive:

Mr. COLLINS. Now, as a matter of truth, the specifications were written down as to cruising radius, as to speeds, and as to ceiling?

General PRATT. Yes, sir; that is, the specifications simply said in words that no plane would be considered at all that did not meet those minimum requirements. There is nothing in the proposal to show that a plane that meets those requirements has to be bought.

Mr. COLLINS. I understand that in one instance the cruising radius was reduced from 500 miles to 375 miles; is that so?

General PRATT. I would have to check the exact figures. But I might clear that point, Mr. COLLINS. Those minimum specifications were inserted by me and my officers. They were not seen by the Assistant Secretary of War, and they were not seen by the Chief of Air Corps. I received instructions that the lawyers felt that minimum performance must go in there or else there would be no competition. There was a legal point involved, and they were inserted by me. * * *

Page 490, lines 20 to 40, inclusive:

Mr. COLLINS. General Foulois, you were allotted certain moneys by the Public Works Administration for the procurement of bombing, pursuit, and attack planes, were you not?

General FOULOIS. Yes, sir; $7,500,000.

Mr. COLLINS. Now, in the procurement of the three types of planes you wanted to get, of course, you wanted planes of each type having the largest proven accomplishments, did you not?

General FOULOIS. Yes, sir.

Mr. COLLINS. And, therefore, you specified types that you had every reason to believe would have a cruising radius of a certain amount, a ceiling of a certain amount, a speed of a certain amount, and other accomplishments; is that so?

General FOULOIS. In general, that is correct; yes, sir.

Mr. COLLINS. But before bids were invited on these three types of planes, with those particular accomplishments as the minimum, a change was made, was there not?

General FOULOIS. Yes, sir.

Mr. COLLINS. Who made that change?

General FOULOIS. The change was made by the Assistant Secretary of War.

These statements speak for themselves.

REMARKS IN INTERVIEW MISCONSTRUED

On Saturday I gave an interview, and my remarks in regard to the interview have been somewhat misconstrued. I was quoted as saying at that time that certain officials had even lied to cover up the deplorable conditions of our air forces.

My remarks have been misconstrued, for what I really meant was that because of the sudden way in which our investigation was brought to a close we were unable to bring out the true facts regarding the way the Navy has actually been procuring its planes and engines. I am confident that, if given the opportunity, our committee could and would have been able to show the existence of an air trust and that it completely dominates the purchase of aircraft equipment by the Government in the different departments. Every effort has been made to stop these hearings as soon as possible, although they were being conducted very cheaply and without any salaries being paid investigators or others in the conduct of the hearings.

Mr. Chairman, I ask unanimous consent to revise and extend my own remarks and to insert in the RECORD statements I have taken from the recorded testimony of Admiral King, General Foulois, and General Pratt.

Mr. MARTIN of Massachusetts. Mr. Chairman, reserving the right to object, are these statements taken from the printed hearings?

Mr. McFARLANE. They are taken from the printed hearings; yes.

Mr. MARTIN of Massachusetts. Mr. Chairman, to that I object.

As a matter of fact, I believe objection should have been made to the gentleman's request to insert the chart. At the time I withdrew my request I had not seen the chart.

The CHAIRMAN. The Chair understands, with reference to the chart, the gentleman from Texas desired to insert

in the RECORD a compilation of statistics which could be set out in parallel columns; that it is not a chart showing curves or things of that character.

Mr. BRITTEN. Mr. Chairman, I think the Chair is in error in the Chair's impression of what the chart is. It is a graph.

Mr. MARTIN of Massachusetts. For such a chart to be inserted in the RECORD permission must be obtained from the Committee on Printing.

Mr. McFARLANE. If the gentleman from Massachusetts thinks the circles showing the interlocking of the directorates should not be included, they can be left out and the balance of the information shown in parallel columns.

Mr. MARTIN of Massachusetts. All I am trying to do is to protect the rules of the House. The rules state that such a request must go before the Committee on Printing.

Mr. McFARLANE. I shall be glad to take it up with the Committee on Printing.

The CHAIRMAN. The usual procedure is as indicated by the gentleman from Massachusetts if it is not a compilation of statistics which may be shown in parallel columns. If the matter sought to be inserted is a diagram the permission must come from the Committee on Printing.

Mr. McFARLANE. I am perfectly willing to take it up with the Committee on Printing. If it is a violation of the rules, I shall withdraw my request.

The CHAIRMAN. In view of the statements that have been made as to the nature of the chart, the Chair thinks it would be better for the gentleman to submit his request in the House, for the Committee, of course, has no jurisdiction over the Committee on Printing.

The gentleman from Texas asks unanimous consent to revise and extend his own remarks. Is there objection?

There was no objection.

Mr. McFARLANE. Mr. Chairman, I find that the present world position of the United States air forces is as follows:

First. Not higher up than third of the nations in merely the number of warplanes. Three other nations, namely, Italy, Soviet Russia, and Japan, are so close to the United States in this connection that it would be easy for some authorities to place this country sixth of the nations.

Second. Not higher up than sixth of the nations in the number of factories manufacturing warplanes or high-powered airplane engines. In fact, the United States can easily be classed as eighth of the nations in this respect as I show in detail hereinafter.

Third. Definitely the most backward of all the nations manufacturing warplane engines and warplanes in the design of them in service and projected.

Fourth. Its leading warplanes are most deficient in elasticity of performance.

Fifth. Its leading warplanes cannot even reach similar foreign planes to do battle with them.

Sixth. Comparatively, it does not actually make or possess any warplanes.

Seventh. The whole of its air forces could probably be grounded and rendered useless or destroyed by the tiny Belgian air force, given the same type of warplane pilots as the principal combatant nations had in the World War.

Eighth. The whole of its air forces could be grounded and rendered useless or destroyed by 30 percent of the British Royal Air Force, or 40 percent of the French air force, or 50 percent of each of the Italian, Japanese, or Soviet Russian air forces.

Ninth. It will take at least 2 years to catch up with the outside world in design, production, and availability of warplane engines and warplanes if it begins to produce the leading types of these devices under license from the original foreign manufacturers; and at least 3 to 4 years if it proceeds without such foreign licenses, and if the foreign nations concerned stop progress meanwhile.

Tenth. The United States has as much to defend in the sense of actual wealth as the British Empire.

The United States air forces decidedly cannot fight when they like, where they like, or how they like.

The preceding would seem to be emphasized by recent experiences with air-mail transport.

The warplane engine factories of the world, exclusive of diesel engines, are as follows:

Position	Country	Number of factories	Names of factories
1	France	7	Delage, Farman, Gnome-Rhone, Hispano-Suiza, Lorraine, Potey, and Renault.
2	Japan	5	Aitcha (Lorraine under French license and own air-cooled radial engines), Kawanisi (Rolls-Royce under British license), Kawasaki (B.M.W. under German license), Mitsubiski (Armstrong-Siddeley under British license and Hispano-Suiza under French license and Junkers under German license), Nakajima (Lorraine under French license and Bristol "Jupiter" under British license).
3	Great Britain	4	Armstrong-Siddeley, Bristol, Napier and Rolls-Royce.
4	Germany	4	B.M.W., Junkers, Mercedes-Benz and Siemens Halske.
5	Soviet Russia	4	Amstro (B.M.W. under German license and Hispano-Suiza under French license), Ikar (Bristol "Jupiter" under British license and own water-cooled types), Motor (B.M.W. under German license and Gnome-Rhone under French license), "9 Zawod", translated means "Ninth Factory" (B.M.W. under German license). A series of "M" air-cooled radial engines is also being manufactured in Soviet Russia. Besides the preceding, the British-made Napier "Lion" engines; the French-made Lorraine engines; and the German made Junkers engines are used. The said factories can produce at least 80 warplane-engines per week at present on a peace footing.
6	Italy	3	Alfa-Romeo, Fiat, and Isotta-Fraschini.
7	Czechoslovakia	3	Avia, Praga, and Walters.
8	United States	2	Pratt & Whitney and Wright Aeronautical Corporation, both making only moderately high-powered airplane engines. These factories make principally air-cooled radial engines, the United States being strongly biased in favor of such engines. However, the Wright Corporation also makes the only type of moderately high-powered, liquid-cooled airplane engine in the United States. The United States makes no warplane engines according to the understanding of such an engine abroad. By comparison it resembles a person of athletic appearance but with a weak heart. Thus, the position of the United States is a good eighth with regard to warplane-engine factories; in fact, even this places it too far forward. Besides this, it is to be seen that this country has practically all its eggs in one basket, even for production of moderately high-powered airplane engines. The warplane engine has long passed its horse-and-buggy stage of the World War. It is not now possible for the United States to repeat its feat with the "Liberty 12 installation" in that war, in connection with the modern warplane engine. The grave difficulties experienced by the Curtiss Aeroplane & Motor Co., Inc., of Buffalo, N.Y., and all other aviation factories in the United States, with warplane production during the World War should not have been consigned to oblivion. In consequence, they will now be much greater. It is only possible now to use efficient commercial-type airplanes as very poor auxiliaries in war. In fact, they are basically, so far as possible, removed from modern war service. The lore acquired by their pilots and crews has to be jettisoned and replaced by real warplane experience before such pilots and crews can be usefully employed in war—qualified to face the deadly air attacks of only seconds in duration. Finally, the United States air forces are hybrid to such an extent, owing to civilian engineering and operational influence, that it is doubtful that they can perform either war service or civil transportation satisfactorily.

The aforesaid foreign warplane-engine factories are large factories with more war experience than any corresponding factory in the United States. Many of these foreign factories are world famous for the best of reasons—excellence of products in war and in peace. All of these factories are in the position to swing into maximum production at the peak of possible improvement of their products on the outbreak of war. This cannot be said of any United States aviation-engine factory.

The Mitsubishi Aircraft Co., Ltd., of Nagoya, Japan, is an example of the size of the said foreign factories. In 1931 it

covered 59 acres and had 2,500 employees. Now it covers about 70 acres and has over 4,000 employees. It is a branch of the great Japanese armament, engineering, and shipbuilding firm of Mitsubishi, Busan & Kaisha, and was originally sponsored by the giant British armament firm of Vickers, Ltd., to which no United States manufacturer can ever approach for war experience throughout the world.

The superiority for airplane and warplane performance of the high-powered, water-cooled engine over the corresponding air-cooled radial engine, which is recognized abroad, is demonstrated by the following table of frontal areas:

Engine type	Approximate frontal area engine (square feet)	Approximate frontal area radiator (square feet)	Make of engine
6 cylinder in-line	3	1½–2	German, Junkers Juno–4.
12 cylinder "V"	4	1½–2	British, Rolls-Royce; French, Hispano-Suiza; etc.
14 cylinder radial (44-inch diameter).	10		American, Pratt & Whitney (Twin Wasp Jr.).
14 cylinder radial (48-inch diameter).	12		American, Pratt & Whitney (Twin Wasp).
9 cylinder radial (56-inch diameter).	16		American, Pratt & Whitney (Hornet T.I.C.).

The water-cooled engines are much easier to stream line, and have the additional advantage of affording much better visibility for the pilot-gunner in the fighter types of warplanes—a matter of greatest importance. The Townsend ring and N.A.C.A. cowling have helped to reduce the frontal resistance of air-cooled engines slightly, enabling increase of the speed of the plane by a few miles per hour. The disadvantages of increased weight of cooling equipment are more than offset by the greatly reduced frontal area and lighter and better stream-lining possibilities of the water-cooled engine.

The weights per rated horsepower of water-cooled engines usually include only the air-screw hub, magnetos, carburetors, supercharger, and gearing, if any. The weight of the radiator, cooling water, piping, and so forth, is equal to about 0.4 to 0.5 pound per rated horsepower.

My investigations have disclosed to me the shackled state of the aviation industry of the United States.

The structure of that portion of the aviation industry of the United States which is producing warplane engines and warplanes is assembled as follows:

(a) The United Aircraft & Transport Corporation, New York, N.Y., which comprises the following:

First. Boeing Airplane Co., Seattle, Wash., airplanes and warplanes.

Second. Stearman Aircraft Co., Wichita, Kans., airplanes.

Third. Sikorsky Aircraft Corporation, Bridgeport, Conn., airplanes and warplanes.

Fourth. Chance-Vought Corporation, East Hartford, Conn., warplanes.

Fifth. Pratt & Whitney Aircraft Co., East Hartford, Conn., P. & W. Wasp and Hornet air-cooled radial airplane and warplane engines.

Sixth. Hamilton Propeller Co., East Hartford, Conn., airplane and warplane propellers.

Seventh. Boeing School of Aeronautics, Oakland, Calif., flying service.

Eighth. United Aircraft Exports, Inc., New York, N.Y.

Ninth. Boeing Aircraft of Canada, Ltd., Vancouver, British Columbia.

This group of firms, probably the largest Aircraft Trust in the United States, is not free to make its own decisions on aviation matters. Possibly its technical and other material becomes speedily known to foreign countries. It is controlled by the National City Co. and the National City Bank of New York and by the Morgan international financial interests.

(b) The Goodyear-Zeppelin Corporation, Akron, Ohio. This corporation is the manufacturer of the rigid United States airship *Akron, ZRS–4*—destroyed by a storm in April 1933—and the new rigid United States airship *Macon, ZRS–5*, of United States Naval Aviation, the new nonrigid coastal patrol, 65 miles per hour, United States airship *TC–13*, of the United States Army Air Corps, and other slower and smaller nonrigid airships. It owns the Zeppelin rights for the United States and controls airship work previously undertaken by the Goodyear Tire & Rubber Co. Probably all its technical and other material soon becomes known to Germany and other foreign countries. The National City Co. and the National City Bank of New York and the Morgan international financial interests are concerned with the Goodyear-Zeppelin Corporation.

Its activities have led the United States taxpayer into a useless expenditure on gas-filled airships during the years 1930–33 of at least $20,000,000, which has largely benefited the Mellon controlled Aluminum Co. of America.

This unnecessary expenditure of time, energy, and money is still being caused to mount rapidly. What is even more serious, it detracts not less than to an equal extent from the development of airplanes and warplanes and their engines. It is altogether the wrong way for the United States to recognize foreign or aviation ability.

(c) The Curtiss-Wright Corporation, New York, N.Y., which comprises the following:

First. Curtiss Aeroplane & Motor Co., Buffalo, N.Y., airplanes and warplanes.

Second. Keystone Aircraft Corporation, Bristol, Pa., airplanes and warplanes.

Third. Curtiss-Wright Airplane Co., St. Louis, Mo., airplanes.

Fourth. Wright Aeronautical Corporation, Paterson, N.J., Curtiss D–12 (450/500 rated horsepower, water-cooled), and "Conqueror", "Prestone"-cooled, airplane and warplane engines, and Wright "Cyclone" and "Whirlwind" air-cooled radial airplane and warplane engines.

Fifth. Curtiss-Wright Flying Service, flying service.

Sixth. Curtiss-Wright Export Corporation, New York, N.Y.

Seventh. Canadian Wright, Ltd., Montreal, Canada.

This group of firms constitutes another aircraft trust in the United States, and it is about the size of the United Aircraft & Transport Corporation already referred to. The Curtiss-Wright Corporation is likewise not free to make its own decisions on aviation matters. Possibly, all its technical and other material also becomes quickly known to foreign countries. In the background, the Chase National Bank and the Rockefeller financial interests are concerned with the Curtiss-Wright Corporation. The Bank of the Manhattan Co., the City Bank Farmers Trust Co., the Central Hanover Bank & Trust Co., and the Marine Bank of Buffalo, N.Y., appear more prominently as this corporation's bankers.

The Curtiss-Wright Corporation and the United Aircraft & Transport Corporation between them control the aviation industry of the United States. Their pattern is the same, and they present a united front to any third party, including the Government of the United States. They monopolize the manufacture of airplane and warplane engines in this country. It is the case with both of them, that the last word, on whether or not they shall adopt any aviation improvement or invention, lies not with their technical executives, but with their outside, unqualified financier masters. These groups maintain a pool of patents that discourages the offer and adoption of any aviation improvement or invention from without, and deprives their own personnel of real incentive to make any such improvement or invention. Neither of the groups has been responsible for the introduction or adoption of any actual improvement in aircraft or aircraft engines.

They have been—and are being—caused by the purely financial powers behind them, to adhere to the false manufacturing policy in a competitive market of maximum reproduction with minimum improvement. Although the trust builders and stock manipulators of these combines have prevented competition in the design and production of aircraft and aircraft engines in the United States, they have been, naturally, unable even to slow down that of foreign

countries, and so, as the appended charts show, their progress has made United States air defense a negligible factor in the world today.

The only momentous development in aircraft production which any of these financial interests has supported is the already referred to extremely costly and unnecessary one of the gas-filled airships which can be made to call for much greater lump sums of money from the United States Treasury, be more spectacular than any other form of aircraft production as yet, and benefit the Aluminum Co. of America. No foreign nation would tolerate in the path of the development of its air defense any such double-faceted single block of private interests as the United Aircraft & Transport Corporation and the Curtiss-Wright Corporation, nor any such conflicting appendage of the financial systems behind either or both of them as the Goodyear-Zeppelin Corporation.

(d) North American Aviation, Inc., New York, N.Y., which comprises the following:

First. Berliner-Joyce Aircraft Corporation, Baltimore, Md., warplanes.

Second. Douglas Aircraft Co., Inc., Santa Monica, Calif., airplanes and warplanes.

Third. Sperry Gyroscope Co., Inc., Brooklyn, N.Y.

Fourth. Ford Instrument Co., Long Island City, N.Y.

Fifth. Transcontinental & Western Air, Inc., New York, N.Y.

Sixth. Eastern Air Transport, Inc., Brooklyn, N.Y.

This smaller aircraft combine is, perforce, subject to the United Aircraft and Transport Corporation and the Curtiss-Wright Corporation because of its dependence upon them for airplane and warplane engines, their ascendancy in the aviation industry of the United States, the market they provide, the great financial powers behind them, and interlocking interests in general.

(e) The leading allegedly individual firms engaged in warplane production in the United States are the following:

First. Bellanca Aircraft Corporation, New Castle, Del.

Second. Consolidated Aircraft Corporation, Buffalo, N.Y.

Third. Glenn L. Martin Co., Baltimore, Md.

Fourth. Great Lakes Aircraft Corporation, Cleveland, Ohio.

Fifth. Grumman Aircraft Engineering Corporation, Valley Stream, Long Island, N.Y.

Sixth. Hall-Aluminum Aircraft Co., Buffalo, N.Y., affiliate of the said Aluminum Co. of America, New York, N.Y., the Mellon-controlled Aluminum Trust.

I understand that now some of these firms even have been absorbed by the aforesaid North American Aviation Corporation.

These six concerns together merely approximate the size of only the Curtiss-Wright Corporation. They are more or less independent as regards each other and North American Aviation, Inc., but they are, perforce, subject to the United Aircraft & Transport Corporation and the Curtiss-Wright Corporation for the same reasons that North American Aviation, Inc., works hand in hand with these two ascendant combines.

Thus at least all the worth-while limbs of the aviation industry of the United States engaged in producing warplane engines and warplanes are shackled as heavily as possible by the limitations of the private and wholly financial interests of the Wall and Pine Streets area of New York. No foreign country manufacturing warplane engines and warplanes permits any similar restriction of its aviation industry.

These interests have dictated and persisted in the false manufacturing policy of maximum reproduction with minimum improvement in the highly specialized and competitive field of warplane engines and warplanes.

Although this policy is the line of least resistance for purely financial interests to follow, it is treacherously harmful to industry in general and to the manufacture of devices for war in particular. The extent to which it has been caused to prevail in the United States has made this country paramount in reproductive means for obsolete or obsolescent finished products and the least protected against internal price cutting and unemployment. It has been largely responsible for the United States lacking competent air defense.

The private banking and similar financial interests of the United States are the arch priests of this untruthful doctrine, and not this country's comparatively few, efficient, and quite independent manufacturers, such as Mr. Henry Ford. The historical Ford automobile, model T, which received throughout the world more nicknames—including "Tin Lizzie" and "Spider Car"—than anything else has ever done, is not an example of maximum reproduction with minimum improvement in a competitive market, even though some 15,000,000 of these automobiles were made and sold without appreciable change for many years up to 1928. It was uniquely constituted for the road surfaces of its heyday, and so it cost less all around to own and operate than any other automobile. It could be made to get anywhere with the least amount of trouble.

During the World War the British Royal Army Service Corps, operating against the Germans in the wilds of Africa, kept official records of the mileage that various types of automobiles could be relied upon to make without having to be abandoned. These records proved that the Ford model T made by far the greatest mileage per car and that it was the only type of automobile to give satisfactory service in these African campaigns. Improvement of road surfaces and not any advance made by the automobile industry in general has been the principal reason for the Ford model T being superseded in 1929 by the Ford model A, and this type being followed by the Ford model V–8 in 1932, and so on.

While road surfaces guided Mr. Henry Ford, the automobile industry generally was guided by mechanical detail. This caused him to lead in the prevention, rather than the cure of automobile failures, somewhat like the sanitary engineers who, through attention to first considerations, have been more responsible by prevention of disease, than the doctors have been by cures of the sick for the improvement in the general health of civilized communities. It was principally responsible for Mr. Ford's phenomenal success as an automobile manufacturer. He satisfied the chief demand in connection with automobiles, and stubbornly kept on doing so. Those responsible for United States air defense have not yet embarked upon this policy in connection with it, as this country has no real air defense.

The fostering of maximum reproduction with minimum improvement naturally entailed the shutting out from production in the United States for this country's air forces of foreign warplane engines and warplanes under license from their original manufacturers abroad.

WEAKNESS OF THE UNITED STATES WARPLANE ENGINE PROGRESS LIES IN INSUFFICIENT DEVELOPMENT OF AVIATION ENGINE SUPERCHARGERS

Superchargers are used on a rapidly growing number of aviation engines today to increase or boost the power of the latter at high altitudes, particularly for warplanes, and to maintain an increased, constant power output from sea level to the maximum boost altitude.

A supercharger forces a super, or additional charge, of fuel into an aviation engine, and thereby boosts or increases its power. Without a supercharger the power of an aviation engine falls off rapidly as an airplane or airship climbs, but with a supercharger not only is the sea-level power output of an aviation engine greatly increased but this increased power is maintained up to the supercharger altitude, which varies for the most part between 12,000 feet and 20,000 feet at present.

Since a full supercharger maintains for an airplane a much faster rate of climb and speed at high altitude, it is recognized as indispensable for warplanes. But a supercharger is also useful in a moderate form for other types of planes for economical service—some of these planes may be for war purposes also.

There are two principal methods of supercharging used, but the results obtained are the same. Mechanically these two types of superchargers are somewhat similar, the rotating element consisting of an impeller or fan which is driven at high speed through gearing from the engine crank-

shaft. A flexible friction drive is provided to protect the gearing against damage upon sudden acceleration or acceleration of the engine due to the inertia of the impeller. The gear ratio varies from 1:6 in moderate superchargers to 1:10 in full superchargers, the normal speed of the impeller being from 12,000 revolutions per minute to 32,000 revolutions per minute for different types of aviation engines. Maximum impeller speeds often exceed 25,000 revolutions per minute.

In the United States and Great Britain the accepted practice is to connect the supercharger on the output end of the carburetor so that it sucks the mixture from the carburetor and forces it into the engine. This system is used on the American Curtiss "Conqueror", the British Rolls-Royce "Kestrel" and "Buzzard", and the various radial air-cooled engines. The French Lorraine "Petrel", one of the lightest aviation engines in the world for its power—500 horsepower at 14,850 feet, 1.09 pounds per horsepower—uses a two-speed supercharger of this type.

Most of the French aviation engines, however, are fitted with a supercharger connected to the input end of the carburetor, which blows air through the carburetor into the engine. The new Delage inverted engine has two positive Roots-type blowers which operate on this principle, and which maintain the sea-level power output of the engine up to 16,500 feet. The French Hispano-Suiza engines have blower-type superchargers with automatic air-pressure regulators. The French Farman inverted engine has a two-speed Farman supercharger of this type controlled by the pilot, which functions up to 6,000 feet and 18,000 feet altitudes.

A moderate supercharger gives increased power to the engine for taking-off, and maintains power to 2,000 or 3,000 feet altitude. A full supercharger maintains the sea-level rated power of the engine up to at least 12,000 feet altitude—the United States maximum. In Europe and Japan supercharge altitudes for warplanes (with correspondingly increased engine powers) are very much higher, going up to 18,000 feet and 25,000 feet. Thus, European and Japanese warplanes can maintain engine output and corresponding performance from sea level to 25,000 feet, which is vastly superior to the capabilities of United States warplanes. This deficiency is a principal fault in the United States warplanes, and makes the whole of the United States air forces of the present time practically useless. It should be remedied in all new warplanes contracted for by the United States; otherwise all the additional expenditures involved by these new warplanes will be wasteful. As such remedy entails redesign and reconstruction of the United States warplane engines, it will take at least 3 to 4 years to carry out if the manufacture in the United States of foreign warplane engines is still excluded; otherwise it will take at least 2 years to accomplish. This means that immediate wholesale manufacture in the United States of new warplanes without imported foreign engines for them will be largely extravagant.

As regards boost control. It is essential to provide against serious damage to a fully supercharged aviation engine which would result from the unrestricted use of full throttle and supercharger at low altitudes. An automatic boost control or gate control is used to prevent such full-throttle opening, and is controlled by atmospheric pressure or other means. It automatically opens the throttle sufficiently when climbing to keep the engine operating at normal boost power up to its maximum boost altitude. Above this altitude, of course, the power of the engine decreases up to the ceiling of the plane.

In an emergency, at low altitudes, such as an "over-shot" landing in a small field or on an airplane carrier, the momentary use of the full sea-level supercharged power of the engine should be provided for to gain flying speed and altitude which will frequently save a serious crash.

The full sea-level supercharged power of the 600-horsepower British Rolls-Royce Kestrel II S warplane engine is equivalent to 1,200 horsepower, that of the 500-horsepower French Hispano-Suiza 12 Xbrs warplane engine is equivalent to 1,110 horsepower, and of the larger 600-horsepower French Hispano-Suiza 12 Ybrs is equivalent to 1,490 horsepower.

The Rolls-Royce Kestrel II S supercharged warplane engine has an automatic gate control which normally functions up to the maximum boost altitude, but it also has an emergency feature—a pilot can go through the gate, as with the gear shift of an automobile, for a few moments to have the use of the enormous full sea-level supercharged power of the engine, a most excellent form of life insurance in battle.

In conclusion, it is to be readily seen from this question of supercharging aviation engines that commercial planes are unsatisfactory for war purposes and that warplane pilots have to be specially trained.

The aforesaid very backward position of the United States air forces is principally due to the bankers' control of the American aviation industry, which has naturally fostered maximum production with minimum improvement instead of moderate production with maximum improvement. In case of war at the present time the United States has only quantity production facilities for obsolete or obsolescent warplane engines and warplanes instead of being able to swing into quantity production of such devices at their maximum point of improvement.

The foregoing deals with the question of supercharging aviation engines in the simplest terms. It does not go into such matters as the three-stage supercharger of the French Farman 8V.I. aviation engine for an ultimate ceiling of 80,000 feet, nor with the use of oxygen and similar subjects.

Warplane-engine development in the United States has been additionally interfered with by Prestone cooling, a form of liquid cooling of aviation engines.

This mixture, as used for the American Curtiss "Conqueror" SV–1570-type aviation engine, is ethylene-glycol, with about 5 percent water added to prevent freezing.

Advantages:

First. Saves weight, about 0.2 pound per horsepower, or 120 pounds for 600 horsepower. This, however, amounts to a saving of only 44 pounds on the weight of the corresponding French Hispano-Suiza 12 Xbrs., which develops much more power, i.e., 710 horsepower at an altitude of 13,200 feet.

Second. Saves area of radiator by 35 percent, but the tunnel radiator practically wipes this out.

Disadvantages:

Besides obstructing full supercharging of the engine, these are as follows:

First. Engine must be run at a higher temperature (250° to 180° F.).

Second. Power of engine is limited by higher temperature.

Third. Life of engine is shortened by higher temperature.

Fourth. Life of lubricating oil is shortened by higher temperature.

Fifth. Difficult to cool the pistons properly.

Sixth. Difficult to lubricate engine; oil flow must be increased.

Seventh. Engine clearances must be greater; more wear, more noise.

Eighth. Strength of aluminum alloys may be affected.

Ninth. Coolant has more tendency to leak, requiring special gaskets to withstand the composition of coolant and higher temperature.

Tenth. Special rubber-hose joints in the cooling system are required to withstand the higher temperature.

Eleventh. The radiator must be made stronger, using special solder.

Twelfth. The engine cannot be cooled by water in an emergency.

The aforesaid explains the aversion to this cooling mixture for aviation engines abroad. It has interfered with the development of the liquid-cooled aviation engine in the United States for several years.

I have already submitted for the consideration of the committee four at-a-glance tables of the world's leading warplane engines and warplanes showing the actual position of the United States air forces in detail. The position re-

vealed by this survey reminds me forcibly of the advice "scrap the lot" of the late British admiral of the fleet and first sea lord, Lord Fisher, to the British Board of Admiralty in connection with unsatisfactory equipment and administration of the British Fleet at the time. Lord Fisher had the strength of character to carry out this policy, and did so.

It would seem to me that the United States Army Air Corps and Naval Aviation would be benefited greatly by being merged into a single United States air force under a department of aviation presided over by a secretary and two assistant secretaries for aviation. This department of aviation should be divided into an air staff, responsible for the air force, and a civil aviation branch, responsible for civil aviation. The air force should be directed by a chief of the air staff. All of the said officials should constitute together an aviation council, headed by the secretary for aviation, within the department of aviation. This department should be able to sue and be sued in the same way as a citizen of the United States may sue or be sued by a fellow citizen and therefore be subject to this strict control by law.

As an air force is a mechanized force operating three dimensionally, the pay of the pilots, flying observers, designers, engineers, and mechanics of the air force should be made to compare favorably with corresponding civil aviation pay. In addition, pilots, their observers, and the mechanics responsible for their machines should receive a cash bonus for each hour of actual flying without accident, but with a suitable cash penalty applying only to such bonus in the case of any accident due to them.

The present practice of inviting competitive manufacturing bids and proprietary aviation devices be abandoned, and replaced by the grant of contracts on solely a net cost (including labor) plus a suitable percentage.

A mobile aircraft inspection section should be formed in such a way that intimacy with contractors is reduced to minimum.

The present policy of buying in quantity airplanes for war purposes, and their engines, be discontinued.

The present policy of maximum reproduction with minimum improvement of warplanes and their engines be dropped as beneficial only to commercial bankers and the like.

All gas-filled airships and amphibian planes for war purposes be jettisoned as of no war value and a sheer waste of the taxpayers' money.

The United States might well acquire the license to manufacture at home certain foreign types of warplane engines and warplanes. Payment for such licenses to be an offset in kind against debt payments owed to the United States by the foreign countries concerned.

The type percentages of warplanes in the present United States Army and Navy Air Force is unsatisfactory as shown by the following:

Warplane:	*Percent of total*
1. Fighters	28.89
2. Observation planes	48.89
3. Other types	22.22

It will be seen from this that the largest part of the equipment in planes of the United States air defense consists of observation planes, known as "joy riders" in England, and I believe called "air taxis" for officers in this country. The present allotment of planes to war vessels of the United States Battle Fleet is 4 observation planes per cruiser, and 3 observation planes per battleship, which provide excellent taxi facilities.

I respectfully suggest that the type percentages of warplanes be modified as follows:

Warplane:	*Percent of total*
1. Fighters	62.5
2. Observation planes	15.0
3. Other types	22.5

The allotment of planes to the battle fleet should be altered to 3 fighters and 1 observation plane per cruiser and 2 fighters and 1 observation plane per battleship. I have observed a demand to very greatly increase the number of planes of the Army and Navy Air Corps. If the planes be made really efficient, the number need not be so great. A total of about 2,000 to 2,500 planes should form a substantial air force.

As the United States has some very large and wealthy cities to protect, at least nine, special combat squadrons should be formed and stationed in these cities, these squadrons to be known as the "city defense squadrons." They should consist of one-place fighters, specially made with enclosed cockpit and designed capable of high-altitude, combat-patrol service, with a speed of not less than 240 miles per hour at 25,000 feet and war service ceiling of 40,000.

The practically universal use of aluminum alloys in the construction of war planes of the United States Air Forces should be either terminated altogether or very drastically curtailed. This usage of aluminum would appear to benefit only the aluminum interests in this country. The action of sea water—salt water—is not favorable to this material in navy planes; besides it is very prone to perishing; also it is merely a superstition that an airplane constructed of aluminum or duraluminum or similar aluminum alloys is necessarily lighter than one constructed of steel. In fact, the aluminum plane works out to be the heavier one because of the weakness of the material.

In foreign countries aluminum is being rapidly dropped as a structural element in war planes. Great Britain has now switched to stainless-steel structure for navy and other planes, and exhaustive tests of this material in completed warplanes have proved its great superiority over aluminum for lightness, strength, and in every other way. Great Britain already has indestructible stainless-steel seaplane floats and flying-boat hulls tested in actual collisions. Machines constructed of stainless steel require much less ground attention, and so effect a great all-around saving which offsets very favorably any increase of initial cost of production. In the United States are some factories capable of producing excellent stainless steel for warplanes, but they are not encouraged. Great Britain has always been suspicious of aluminum for the construction of airplanes.

I am aware of a statement made by Mr. Edward P. Warner, editor of Aviation, made in the committee hearings; because of several references made by him therein to the aforesaid "at-a-glance" tables, I inserted in my remarks March 6—I note that in the latter part of 1926 he was responsible for an order by the Navy Department to the Pratt-Whitney Co. of 200 radial air-cooled engines of nominal horsepower, each of 400 horsepower, at a price of $9,250 each. Before this order was obtained by the Pratt-Whitney Co. they had had practically no experience of aviation-engine manufacture. They had made only about three engines for which they had been paid $15,000 each by the Navy Department. This engine was named the "Wasp", and nothing in it was new or superior, or even equal, to other radial air-cooled engines existing at the time. Thus there was really no experimental work to be done. It was really a question of teaching the Pratt-Whitney Co. to make a very ordinary aviation engine, and at a time when they had practically no factory facilities for aviation engines. If in these circumstances the company was satisfied with $15,000 apiece for three engines, the price of $9,250 each for 200 engines was unconscionable high, and certainly included provision that the United States Government should pay in advance for the teaching of Pratt-Whitney Co. to make aviation engines and to equip them so that they would become an unnecessary competitor with a mediocre article of an older aviation-engine manufacturer in the United States—the Wright Co.

The circumstances make clear a situation in which a company promoter or stock speculator would be provided with a sort of manna from heaven, upon which he could transform very little capital into enormous profits.

I note that in a period of about a couple of years or so the Wasp engine price became reduced to less than $5,000 each, due principally to the fact that nothing was done to supply the Navy Department with a better engine for war purposes than was necessary for an ordinary commercial plane. In other words, the practice was to reproduce both for war purposes and commercial purposes exactly the same engine as

many times as possible so as to bring in as large a return as could be obtained for the capital invested.

Thus we find that the figures for warplane engines of the United States set out in my set of tables are fully confirmed. These figures show no special warplane-engine development for the United States.

At the time that the Pratt-Whitney Co. aviation-engine enterprise was so colossally boosted by the Navy Department there existed in Great Britain an aviation engine known as the "Bristol Jupiter", behind which there was a number of years of warplane-service experience and which was in all respects a superior engine to the said Pratt-Whitney Wasp. A responsible American firm had laid themselves out to manufacture this engine in the United States, but they were given practically no support to do so.

The Bristol Jupiter engine is manufactured under license in at least six countries outside of England. Incidentally, in 1932 that fine American naval flyer, Capt. Alford Williams, D.F.C., owned a Curtiss Hawk with a Bristol Jupiter engine. All Colonel Lindbergh's great flights have been made with Wright engines.

Mr. Warner says that the British Government paid about the same price as the United States Government for radial engines. This may be so, but the British engines maintained power up to 15,000 feet at the time, whereas the Pratt-Whitney Wasp dropped about 50 horsepower at 4,000 feet at this time.

In my considered opinion, the Pratt-Whitney should not have been given the said order for 200 engines. It would have served the Navy Department better to have placed an order at the time for only 50 engines, as would be the practice in the strictly supervised foreign countries.

Mr. Warner's qualifications for recommending or approving any warplane engine orders were well illustrated by his own description in the July 1932 issue of Aviation of the *Boeing XP-936* pursuit plane of the United States Army Air Corps that its general appearance suggests something over 220 miles per hour at low altitudes. Just how this shows efficiency in a pursuit ship is very obscure. And what speed would the general appearance suggest at the recognized war-service altitudes of 15,000 feet and 20,000 feet?

It would seem that he was then in sympathy with Maj. Louis K. Hibb's ridiculous theory that the United States air forces should operate by hedge hopping, published in the Field Artillery Journal in 1933; one reason prompting this being that then American warplanes would blend with the ground and so escape being attacked. No idea of attacking enemy planes here, merely running away from them.

Mr. Warner refers to the French Deliage G.V.I.S., 450-horsepower aviation engine as merely a racing-plane engine, and ignores the fact that this engine maintains that power up to the altitude of 16,500 feet, which is altogether too high an altitude for racing planes under usual circumstances. As the French air forces consist of many thousands of warplanes, it is quite possible that Mr. Warner has not noticed the Deliage engine amongst them to any great degree.

He also refers to the fact that there is more than one liquid used for cooling aviation engines. This is barely noticeable abroad, but in the United States, Prestone cooling is practiced. Although Wr. Warner thinks this system a great tribute to the country, I have shown hereinbefore the exact value of Prestone cooling for warplane engines. He has informed the committee that Mr. MacKenzie-Kennedy is the only person who classes planes by horsepower in my aforesaid tables. This confirms that he has little recollection of them. In the tables referred to, planes are not classed by horsepower, as will be seen from them. The only table that is classed by horsepower is the warplane engine table which, I think, is reasonable. By referring to his aviation magazine for April 1934 we find that Mr. Warner is now using a similar classification, but he refuses to vouch for their accuracy.

He refers to the British Hawker Super Fury fighter as not yet out of the development stage. It was last year a unit of the Royal Air Force. Mr. Warner's notions with regard to rapid climbing for planes seem to be confined to something to do with crossing the English Channel, but, as the great French war ace Guynemer always emphasized, it was exceedingly convenient to possess this facility in air combat. I refer the committee to the book Guynemer, Knight of the Air, published by Harvard University Press.

I believe that Mr. Warner skipped the fact that the Pratt-Whitney Wasp engines are in several models of more or less horsepower, and so he conveys an exaggerated impression of improvement. The United States Army and Navy programs of about 340 and about 225 planes for the 6 months ending December 1933 and 18 months ending December 1933, respectively, support the impression that the said Pratt-Whitney 400-horsepower model was being supplied quite recently.

It appears that Mr. Warner very materially champions the Pratt-Whitney concern, both by his statements and his silences. It seems, however, that Pratt-Whitney is merely an incubus on United States air defense. It only duplicates unnecessarily the Wright engine factory. Pratt-Whitney might with benefit to the country be made to manufacture a good foreign water-cooled engine under license obtained by the Nation, as aforesaid.

Aviation trade periodicals still have a limited circulation, and this enhances the value of a consistently big advertiser. Thus, members of the staff of such journals are not called upon abroad for information likely to operate against their advertisers.

In conclusion let me say that since the World War repeated investigations have been held and recommendations made for a unified air force. We are all familiar with the scandals growing out of the $1,051,000,000 spent for aircraft during the World War, and know that apart from the training planes and about 100 flaming coffins D.H.-4s were in service in France at the signing of the armistice. Now, 16 years later, according to the above statistical data, we find ourselves badly outclassed in the performance in practically all the different categories in all warplanes and warplane engines, and yet the records show we are spending more money than others and are receiving in return what several other nations would consider as obsolete equipment. It is easily seen that unless and until we enact legislation placing our entire air forces under one command and under one central purchasing agent, providing competitive bidding in the purchase of all aircraft, that we cannot expect to reach our proper place among other nations of the world in the performance of our warplanes and warplane engines. [Applause.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, may I discuss for a short period the reconsideration by the House of the independent offices appropriation bill, which is soon to come before us?

In the first place, a very careful study of the language of the amendment as it refers to World War veterans is exactly in line with the policy of the present administration in the treatment of service-connected and non-service-connected veterans, in my opinion. I do not understand that there is a great deal of difference between the Byrnes amendment and the Steiwer-McCarran amendment in that regard, the principal difference being that the presumptive cases are restored by the Byrnes amendment with a 25-percent cut pending reconsideration, whereas under the Steiwer-McCarran amendment they are restored with full compensation subject to being cut off if the Government can satisfy the burden of proof and show by clear and convincing evidence that their disability arose prior to or subsequent to their service. I feel that this is a very fair obligation for the Government to undertake. It still preserves the differentiation which this administration has attempted to make between so-called "service-connected" disabilities and "non-service-connected" disabilities.

We have necessarily done many an injustice by making that distinction. Without any personal reference, I know of many cases in which men have received disabilities which they are unable to connect with their service but which are

in fact so connected; and this administration has established the principle of compensation to service-connected disabled World War veterans and no compensation to veterans of that war who cannot prove a service connection for their disabilities.

In this particular amendment only those World War veterans rated as service connected before March 1933 are restored, and from this number are excepted, first, those who have joined the service after the 11th of November, the date of the actual closing of hostilities; second, those whose disabilities are the result of their own misconduct; third, those who are on the rolls by fraud, mistake, or misrepresentation; and, lastly, those in which the Government can prove by clear and unmistakable evidence that the disease, injury, or disability had its inception before the period of active military service or thereafter. As far as I am concerned, the Steiwer-McCarran amendment gives fair treatment to the service-connected disability cases, and I shall be glad to support it. I shall also be glad to support the next amendment, which deals with Spanish-American War veterans, but it needs some changes.

I realize, of course, just as all other Members of this Congress realize, that the Spanish-American War veterans, by reason of the lack of hospital, medical, and physical-examination records, are under an insuperable handicap. I realize also that by reason of the scattering of their comrades the necessity of obtaining affidavits becomes a real obligation. It is difficult and often impossible to locate them, and when they are found no memory can be accurate 35 years after the war. For this reason I have reached the conclusion, after considerable investigation of my own, that these veterans ought to be granted the benefit of any doubt. In other words, by putting an impossible task upon these service-connected veterans and thus excluding them all, we would be doing a greater injustice to men who have received their disability by reason of their service than we would be doing if we included them all. This is predicated upon the theory, however, that the disabilities from which they suffer are caused by their service. This administration has committed itself to the program of differentiating between service-connected and non-service-connected disability cases.

Mr. BOLTON. Will the gentleman yield?

Mr. BAILEY. I yield to the gentleman from Ohio.

Mr. BOLTON. Was it not stated in the case of the Spanish-American War veterans that the burden of proof rested upon the Government?

Mr. BAILEY. No; nowhere in this amendment is that stated.

Mr. BOLTON. I mean in the first regulation put out by the Chief Executive?

Mr. BAILEY. In regulation no. 12. The gentleman is correct. I am sorry to say that the Veterans' Bureau apparently never read the regulation, or, if they did, they never obeyed it. This is one of the reasons why, after a considerable investigation, I have come to the conclusion that these men must be restored in order that ample and simple justice may be done to the truly service-connected cases.

I have recently completed the review of the case of a Spanish-American War veteran who had an affidavit from a doctor that had treated him for 28 continuous years, and the doctor in his affidavit stated that during all of this time the veteran had suffered from his present disability and from the condition of the disability 28 years before it was apparent that prior to that time the disability had occurred. He had an affidavit from his regimental surgeon to the effect that while he could not make it definite because of the lapse of 35 years, his recollection was that this man had reported to him for treatment for this same disability a number of times during his service. He also had affidavits from two of his comrades to the effect that about 2 months after he joined the service he had been compelled to be excused from duty because of this disability and was not permitted to drill. He had his his own affidavit and the affidavit of his family; and yet, despite all that clear and convincing proof, the Veterans' Bureau had three times refused this man a service-connected rating.

Mr. SIROVICH. On what ground?

Mr. BAILEY. I have no idea. I do not know that they had any ground. Under regulation no. 12 of the President they had no ground at all for refusing this man this rating.

Mr. CHRISTIANSON. As I understand the gentleman, there is nothing in the Economy Act itself that would prevent the Veterans' Bureau from doing full justice?

Mr. BAILEY. No, sir; not with respect to Spanish War veterans. There is nothing in the Economy Act and nothing in the regulations of the President that would prevent this. It is only in the administration of the regulations by the Veterans' Bureau that it has been done.

Mr. CHRISTIANSON. The gentleman agrees that what we need is not new legislation but a more humane attitude upon the part of those who are charged with the responsibility of administering it?

Mr. BAILEY. Yes; and about the only way I know to get that humane attitude is to clean most of them out that have been put in there during the 12 years preceding this administration.

Mr. DONDERO. Can the gentleman tell the House the reason for the great difference in the percentage of cases allowed in some of the States as against the very small percentage of cases allowed in other States?

Mr. BAILEY. Is the gentleman dealing with World War veterans or with the Spanish-American War veterans?

Mr. DONDERO. World War veterans.

Mr. BAILEY. That is not a question that I had in mind discussing. My own experience with the two boards in the State of Texas is that they worked excellently; and if all the boards had aroused as little complaints as those boards, there would not be any justification for complaint. These boards had very capable men. One of the members of the Dallas board was the commander of the American Legion in Texas; two others were, and had been, vitally interested in the welfare of the veterans. They were personal acquaintances of mine; and from a personal examination of many of the cases rejected by them, I must say they did the right and the fair thing to the veterans and to the Government. I do not understand that any man can sit here and say that because a certain percentage was accepted and a certain percentage rejected, these boards are, because of that fact, to be condemned. The real question is what cases were rejected, and so far as I know, no Member of this Congress can answer that question.

If we do not believe they did their duty, we ought to investigate the boards and the rejected cases. Then we would know what we are talking about.

But to return to Spanish-American War veterans. As I say, I am perfectly willing, and I am anxious, to restore these Spanish-American War veterans to the rolls at 90 percent of their previous allowance on the theory that they are service connected. But if we are to assume that they are to be restored as service-connected disabilities, then I can see no possible justification for excepting World War veterans under circumstances such as to preclude service connection and including Spanish-American War veterans in the same such instances.

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. BAILEY. If you adopt the Steiwer-McCarran amendment without change, you will restore to the rolls all of those men who were on there under the act of 1930. You will restore 781 men suffering with misconduct cases; you will restore 12,177 men who joined the Spanish-American War forces after the close of actual hostilities and who did not see service in the Philippine Insurrection in the Moro Province or the Boxer Rebellion.

It seems to me, if you are going to do equal and exact justice to the World War veterans, then the same facts which would exclude a World War veteran from receiving a service-connected pension should also prevent a Spanish War veteran from receiving a pension.

All of us know that some injustices were done when the disability allowance was dropped. Many of those men had disability which was actually caused by their service, but we have dropped all World War veterans in that class. Are we to do a further injustice to these men and, while still excluding them, restore the Spanish War veterans in the same class of cases?

I know the argument is made that the Spanish War veteran is disabled with age, and so he is. I sympathize with him, and so do you, I am sure; and yet his disability is no greater than a World War veteran of 40 years whose body is wracked with tuberculosis. If the World War veteran enlisted after November 11, 1918, by the present Presidential regulation, he would only get $30 a month if totally disabled. But the Spanish-American War veteran who joined after August 12, 1898, and never saw foreign service could draw as high as $72 a month.

One of the things which contributed more than anything else to the passage of the Economy Act and the consequent trouble of all veterans in the past year was the fact that Congress had so liberalized the pension laws that many undeserving cases had been included by those laws on the pension lists. The adoption of this amendment without the qualifications suggested would restore these same undeserving cases. Again the real deserving veteran would suffer, just as he always has before. It is perhaps true that 13,000 veterans would be kept off the pension rolls, but by so doing about 180,000 real deserving Spanish War veterans would be left in peace to enjoy the rewards of a grateful Government. A real friend of the veteran would not hesitate in making such a decision.

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. TRUAX].

Mr. TRUAX. Mr. Chairman, I am sorry the gentleman from Illinois [Mr. DIRKSEN] is not here, because in the few moments given me I want to challenge some of the statements be made with reference to the reciprocal-tariffs proposed by the President of the United States.

In the first place, the gentleman has accepted the untenable and intolerable theory that is prevalent in the Department of Agriculture and in the A.A.A. that the ills of agriculture in this country are due to overproduction. I expect within the next few days to give you tabulations taken from the various annual reports of Secretaries of Agriculture to prove conclusively that in the past 10 years we have produced less basic farm commodities in this country than we did in the preceding 10 years. In other words, this entire fallacious theory which, up until the present administration, has advocated a policy of laissez faire, or let well enough alone, is predicated upon the false premise that during the war the farmers greatly overproduced the basic farm commodities of this country, and since the war, instead of a reduction in production, this increase has been steadily carried on year after year, thus producing the demoralization of agricultural prices that we have witnessed for the past 3 years.

The gentleman from Illinois [Mr. DIRKSEN] said that the world had increased its production of wheat tremendously in the past few years. This is distinctly not the fact, I will say to this House. In 1909 the world production of wheat was three billion six hundred and odd million bushels; in 1933 the world production was 3,700,000,000 bushels of wheat, a slight increase of 100,000,000 bushels; while the increase in world population has been tremendous since 1909, particularly in this country of ours.

The gentleman from Illinois said European countries were becoming self-sufficient in agricultural production. I challenge any Member of this House to name one European country that is self-sufficient or that will ever be self-sufficient, with the possible exception of Italy, one of the countries named by the gentleman from Illinois.

It is true that the European peasant farmers produce more bushels per acre than we do in America. But the American farmer produces more per man than any farmer in Europe. His nearest competitor is the Belgian farmer, and our farmer produces three times as much as the Belgian farmer. Then comes the German farmer, and we produce nearly four times as much as does the German farmer. Then comes the Italian farmer, and we produce five and a half times as much as the Italian farmer. So that theory is proved to be fallacious.

In Europe they produce more bushels because the farms are small—usually 5 acres. The 10-acre farm is a big farm. They plant their fields as we plant our gardens. When it come to livestock and beef, they do not compare with our production. In Germany they kill the calf when it is born because they have not sufficient grain and forage to feed their cattle and to raise the calf to even a veal stage as we do in this country. So our farming is entirely different.

In normal times we send abroad 15 percent of our agricultural products, and this 15 percent has been seized upon by the theorists, doctors, and crystal gazers as the cause of all our ills.

I would point out that the only success achieved thus far with the A.A.A. has been where prices have been definitely fixed for commodities; cotton at 12 cents, corn at 45 cents a bushel, tobacco about 10 cents a pound. They have fixed these prices by lending the farmer an equivalent of that price on his crop, which is stored in the bin or in the warehouse.

I predict that the only success which will ever be recorded is where prices are fixed on a minimum basis.

Today the United States Supreme Court rendered a decision nearly as momentous as the Minnesota case, when that Court decided that the price fixed for milk was constitutional and legal. I ask now, in the face of that decision, how can the A.A.A. in consistency and in harmony with the program of the President of the United States, longer refuse to fix prices for such basic commodities as wheat, pork, beef, butter fat, poultry, and other commodities? [Applause.]

The Secretary of Agriculture, Henry A. Wallace, is quoted in press dispatches of a few days ago as stating that it may be necessary to change not only the present cropping system of the country, but to change the present cropping systems of various States, or words to that effect.

He said, for instance, that it may be necessary to eliminate the growing of wheat in my own State of Ohio, and let the State of Kansas produce Ohio's normal wheat crop, varying between 38,000,000 and 40,000,000 bushels per year.

For the Secretary's information I would state that in 1850, or 83 years ago, in an official report issued by the Ohio State Department of Agriculture, the total wheat yield of my State was 35,000,000 bushels or more. That was 83 years ago. Today we are producing yearly thirty-eight or forty million bushels, an increase of slightly more than 10 percent, proving conclusively that in no wise has the production of wheat kept pace with the increase in population, or with the increase in number of consumers.

What is true of Ohio is also true of the Nation, and I warn the Secretary that any attempt to force Ohio farmers to abandon the growing of wheat will be met with State-wide revolt.

As another illustration I will point out to this Committee that in 1909 the total production of wheat in this country was 737,189,000 bushels. The farm value of that wheat in that year was $730,046,000. We exported slightly more than 15 percent of our total crop, yet the price on the farm averaged nearly $1 per bushel. The year 1918, the year in which the Armistice was signed, witnessed the first large increase in wheat production in this country, 921,438,000 bushels being harvested that year. This production was of course superinduced by the Government appeal to the patriotism of the farmers through its food administrator and spokesman, Herbert Hoover, who exhorted wheat growers to raise more wheat.

Mr. Hoover asked our farmers to double their production of the year before of 30,000,000 bushels to 60,000,000 bushels. Consequently, acreage greatly increased, which necessitated reduction of other basic crops. The war prices then pre-

vailing, of approximately $2.10 a bushel for wheat in the Corn Belt, of course, was another great incentive.

The year 1919 was another bumper year: 948,987,000 bushels were produced. In the year 1920 a marked reduction was noted, 787,000,000 bushels being recorded, and in 1921 a slight upturn took place with a yield of 795,000,000 bushels.

It is worthy of note that the record yield of wheat in this country occurred in 1915, when we beheld a bumper crop, 1,025,801,000 bushels. The crop year 1932 records the lowest production in 18 years, 726,831,000 bushels being given as the total production for that year. It will be noted that this production had occurred in a year which was considerably more than a year in advance of the creation of the Agricultural Adjustment Administration by the Congress of the United States.

It is also worthwhile to note that the farm value of that wheat was only $254,525,000.

A survey of world production figures dating back to 1921 does not reveal the alarming increase in world production of wheat, or, as some assert, that it makes European countries self-sufficient insofar as breadstuffs are concerned.

1921–22 to 1925–26	3,281,000,000
1929–30	3,561,000,000
1930–31	3,813,000,000
1931–32	3,771,000,000
1932–33	3,760,000,000
1909	3,624,418,000

Where is the Arabian Nights increase in production that the farm doctors, quacks, theorists, and professors continually prattle about? I cannot share the conclusions of the gentleman from Illinois that our foreign-export markets are now a "dead horse." We cannot expect European nations to buy our wheat when we erect insurmountable tariff walls and barriers against certain products we could well use in this country under reciprocal tariff agreements as proposed by Franklin D. Roosevelt.

It might be well for Secretary Wallace to either look into the records more closely, or to confer with some honest-to-God dirt farmers in Ohio before deciding upon such an unwarranted, unprecedented, asinine plan. He will find that our Ohio farmers raise wheat because:

First. In normal times wheat is a profitable summer cash crop.

Second. Wheat is the principal rotation crop to seed the soil with clovers, alfalfas, and other legumes, so as to conserve and increase the fertility of the soil. Of all the small grains grown in Ohio, it is only in a crop of wheat that the farmer can be assured of obtaining a good stand of clover and other legumes. Hence, most Ohio farmers are willing to produce a certain acreage of wheat year after year, even though it should only return cost of production. However, they will not continue forever to produce it at a distinct monetary loss.

Third. Good wheat crops must be grown on good soil. Consequently, the only alternative crops for our Ohio farmers are corn, oats, rye, or barley. They will not permit the land to lie fallow and idle, as the Secretary's plan contemplates.

The present method of lending the farmer 45 cents a bushel on his wheat means depletion of the fertility of the soil, and, naturally, a destructive, devastating, and unpatriotic policy.

The early Roman Empire collapsed because its leaders in their generation were not wise enough to safeguard the resources of the soil. Two thousand six hundred years ago Solon, wise old Greek philosopher, bemoaned in nearly identical words and phrases the difficulties and agonies that Greek agriculture was experiencing.

Said Solon: "Agricultural pauperism is a cancerous growth in the economic life of our country and will eventually pull the nation down." That is exactly what happened.

England started on the road to industrial stagnation, agricultural bankruptcy, and universal doles away back in 1848 when she repealed her corn laws, acting on the fallacious theory that England should be superindustrialized, that she should devote all of her finances, man power, and resources to the intense development of industrial production, subordinating her agriculture, letting her farmers go to ruin, on the ill-advised theory that England could go out into the world's markets and buy her food much cheaper than she could afford to raise it at home. This theory worked until the superindustrial plant had to be dismantled, following the signing of the armistice. With that slowing-up, thousands of men were unemployed, and universal doles, adopted originally as an emergency measure, became a permanent policy, just as this country today in P.W.A. and C.W.A. projects is, in a sense, granting doles to unemployed workers, and must continue to grant those doles until the prosperity of the basic industry, agriculture, normally representing 40 percent of the Nation's purchasing power, is restored in full.

Other older European nations, France, Italy, Germany, Belgium, and Denmark, have all been confronted squarely with these early and mistaken policies, and for the past several years have been doing everything humanly possible to rectify those mistakes, by granting huge bonuses and subsidies to the farmers of their respective countries. Arbitrary price levels in those countries can be easily maintained, because they produce less than their people consume. Hence a tariff sufficiently high to keep out American wheat and American meat tells the story.

Russia is often mentioned as a nation that is increasing agricultural production tremendously. Even if true, the United States does not need to be unnecessarily alarmed. For decades the peasant farmer of Russia has been notorious for his poverty, illiteracy, and general demoralization. In the past, hope has been stifled, and ambition has been annihilated by the plutocrats.

Today Russia, under the iron-clad rule of the dictator, Stalin, produces more per acre. She produces better quality of foods, but not by the wildest stretch of the imagination can Russia be considered as a real competitor for our American farmers within this or the next decade.

Every well-informed individual knows or believes that a war between Russia and Japan is imminent and unavoidable. No one would be so foolish as to accuse Stalin and his advisors of even attempting to export any great quantities of their agricultural production under this crisis that is impending. Rather we must believe that whatever surpluses that may be accumulated will be held in reserve for this titanic conflict for supremacy between the two nations.

Further recital of facts, statistics, and data pertaining to production of other agricultural crops and commodities would only strengthen the belief and conviction that instead of being a "dead horse", our foreign markets are a most fertile and lucrative field, ready to open its arms to our exports, provided we reciprocate in a manner and form that enables them to dispose of certain of their commodities, industrial and otherwise, that we could use to the best advantage without imposing penalties of any sort on American industry or American labor.

Let Franklin D. Roosevelt, the friend of the oppressed and the protector of the poor, breathe the breath of the new deal into the nostrils of this so-called "dead horse" of foreign trade, and the horse will spring up and be transformed as with a magician's wand, into a charging, spirited steed that neither partisan politics nor capitalistic influence can stop.

Again reverting to the subject of wheat, and bearing in mind that in the years 1931, 1932, and 1933 the world's importation of wheat has increased by more than 100,000,000 bushels, while our exportation has declined from 25 percent in 1929 to 14 percent in 1933, the final spike is driven into the propaganda of those who knowingly or unintentionally disseminate the false doctrine and dogma of the bureaucrats, dreamers, and crystal gazers of the United States Department of Agriculture and of the A.A.A., who make a living by farming the farmer. [Applause.]

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. TRUAX. Can the gentleman from Mississippi give me a couple of minutes more? I should like to answer the inquiry of my friend from Ohio [Mr. BOLTON].

Mr. COLLINS of Mississippi. Mr. Chairman, I yield the gentleman 1 minute more.

Mr. BOLTON. I just wanted to learn how the gentleman felt about the A.A.A., and I think his remarks have answered that thoroughly.

Mr. COLLINS of Mississippi. Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. MILLER].

Mr. MILLER. Mr. Chairman, when I came over here this afternoon, I had no intention of undertaking to submit any remarks at all; but in listening to the general debate, pro and con, I feel impelled to submit a few observations. I was very much interested in the discussion of our educational system in this country by the gentleman from Illinois [Mr. BRITTEN]. I agree with him that it is of vital importance that the youth of our country be educated. I agree with him that any Government ought to devote whatever attention is necessary to accomplish that end. I further agree that ordinarily anticipating tax warrants that are issued are ultrasecurity, but I am wondering if we have not reached the point in this country today where the people have become, we might say, quite oblivious to the matter of taxation. We will all support any bill that the Committee on Education reports, whether it be a direct gift from the National Government or what not, to support our schools, and it looks as if it might be necessary to do it at this time. I am wondering if the people of our country today, if the average citizen, has not lost all sense of taxation. I am also wondering what the cause of the deplorable condition is aside from what is generally laid to the depression. Are there alive in the people of the country today that knowledge and that feeling that this money, whether it be given as a gift or a loan, must some day be repaid by taxation? Is there a tax consciousness among the people of America today? Are we not having entirely too much government? This is not a partisan question.

I am wondering if the Congress, regardless of politics—you and I as individuals—are not partially responsible for the feeling that exists in this country, for the condition that exists, whether it be in Chicago, the Far West, or the East, which causes the people to turn their eyes and lift their hands to the Federal Government for help. Have we not unconsciously undermined the self-reliance of our people? I am wondering where we are going and what is going to be the end. The National Government cannot nationalize the school system. We cannot continue these unprecedented expenditures of money unless we take that money back from the people by taxation. I should like to see in this country a reawakening of that spirit which prompted your father and my father to carve empires out of the wilderness, when they went out and of their own strength and determination and will power earned a living for themselves and their families; when the Government was unknown from the standpoint of looking to that Government for some help.

The only thing that a just government owes to its people is an equal opportunity for them to earn a livelihood by honest toil and labor. This idea that is growing up in your State and my State that the Government owes help to this class or that class of citizens is fallacious. It is the entering wedge that will bring down upon our heads our superstructure of government unless we stop it. We all agree with that, but we are much in the position of Mark Twain in respect to the weather. Mark Twain said that a lot of people complained about the weather, but he never did see anybody doing anything about it. That is the way we are. We are going ahead in this Congress making appropriations for purposes heretofore unheard of and without precedent because we are convinced that the emergency is such that it is necessary. The roads will come in, and this and that will come in, but what will this Congress or the next Congress or the Congresses after that do about the practical question of stopping the paternalistic demands in this country?

Mr. MARTIN of Colorado. Mr. Chairman, has the gentleman time enough for a friendly interjection?

Mr. MILLER. Yes.

Mr. MARTIN of Colorado. Frequently when I do down through these gigantic buildings swarming with Federal employees I get a very disturbed feeling. More gigantic buildings are coming up all the time and are being filled to overflowing before they are completed. It makes me realize that government is the major industry in this country, that all eyes are turned and lifted to Washington. It is the matter of give, give, give. There are others of us besides the gentleman from Arkansas who wonder what the final answer to this will be. When I was in this Congress 25 years ago we used to congregate in this cloakroom and cuss this or that bill creating some bureau and then rush in on the floor and vote for it, and the same thing is going on today.

Mr. MILLER. Of course, it can be said in justification of our course that during the last 20 years the whole social structure in this country has undergone a change. We are prone to believe that the war was and is responsible for the creation of a great many of these demands, and during the depression people in their distress naturally turned to the Federal Government.. But the Federal Government is not something apart from the people themselves. It is their creature and they must sustain it. They cannot sustain it and forever draw its strength away with demands that cannot be met without the levying of taxation that will be so burdensome as to cause a revolt.

We have said that there will be no more appropriations for direct loans to make a crop. I do not know whether there will be more or not. We often say that there will be no more appropriations of a certain class, but that does not stop them. They will not stop until an enlightened citizenship demands that they stop, and these demands on the Federal Government cannot stop until the local, the State, and municipal governments reassume their proper functions and meet the obligations of local government and thus take from the National Government some of its present-day load.

The support of the schools is primarily a question for the local governments, but if they cannot or will not support them, then we must, and I shall go as far as anyone to see that every youth of our land has an opportunity to qualify himself for the duties of citizenship.

I am just as much concerned about the stability of government as I am with any function of that government, and if our schools, the press, and our leaders desire to render a real service to the coming generations of our country they will join in the efforts to reawaken in our people that spirit of self-reliance.

The entire governmental theories have undergone a change. We can say that in justification of it, but still that does not justify us from getting away from the bedrock upon which our Government exists. Our Government is just as strong as the individual will and determination of its people is. [Applause.]

[Here the gavel fell.]

Mr. COLLINS of Mississippi. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. LANHAM, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee, having had under consideration the bill (H.R. 8471) making appropriation for the War Department, and for other purposes, had come to no resolution thereon.

EXTENSION OF REMARKS

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include the bill which I introduced on the control of food and drugs.

Mr. TABER. The gentleman's own remarks?

Mr. SIROVICH. My own remarks.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. McFARLANE. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and to include short statements of Admiral King and General Foulois, and also the chart which I discussed in my remarks, showing the Aircraft Trust in the United States.

Mr. MARTIN of Massachusetts. Reserving the right to object, just for a moment—and I shall not object—I just want to call the attention of the gentleman to rule 10 of the Regulations for the publication of the CONGRESSIONAL RECORD promulgated under authority of law by the Joint Committee on Printing which provides that no illustration may be published in the CONGRESSIONAL RECORD unless approved by that committee through our Committee on Printing. I do not intend to object.

Mr. McFARLANE. I expect to present that to the Joint Committee today. This is not an illustration but a chart, pure and simple. However, I expect to discuss the matter with the Joint Committee on Printing of the House.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. McFARLANE]?

There was no objection.

INTER-AMERICAN HIGHWAY—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with the accompanying papers, referred to the Committee on Roads:

To the Congress of the United States:

I transmit herewith two copies of a report prepared by the Bureau of Public Roads, Department of Agriculture, a letter of transmittal addressed to the Secretary of State by the Secretary of Agriculture, and a letter from the Secretary of State concerning a reconnaissance survey for an inter-American highway.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 6, 1934.*

(Enclosures: Two copies of report on inter-American highway; from Secretary of Agriculture, January 25, 1934; from Secretary of State to the President.)

ELECTION CONTEST—RALPH O. BREWSTER *v.* JOHN G. UTTERBACK

The SPEAKER laid before the House the following communication from the Clerk of the House, which was read, and, together with the accompanying papers, referred to the Committee on Elections No. 3, and ordered printed:

HOUSE OF REPRESENTATIVES,
CLERK'S OFFICE,
Washington, D.C., March 6, 1934.

THE SPEAKER, HOUSE OF REPRESENTATIVES,
Washington, D.C.

SIR: I have the honor to lay before the House of Representatives the contest for a seat in the House of Representatives for the Seventy-third Congress of the United States for the Third District of the State of Maine, *Ralph O. Brewster* v. *John G. Utterback*, notice of which has been filed in the office of the Clerk of the House; and also transmit herewith original testimony, papers, and documents relating thereto.

In compliance with the act approved March 2, 1887, entitled "An act relating to contested-election cases", the Clerk has opened and printed the testimony in the above case, and such portions of the testimony as the parties in interest agreed upon or as seemed proper to the Clerk, after giving the requisite notices, have been printed and indexed together with the notices of contest, and the answers thereto, and original papers and exhibits have been sealed up and are ready to be laid before the Committee on Elections.

Two copies of the printed testimony in the aforesaid case have been mailed to the contestant and the same number to the contestee, which, together with an abstract thereof and copies of the briefs of the parties, will be laid before the Committee on Elections to which the case shall be referred.

Yours respectfully,

SOUTH TRIMBLE,
Clerk of the House of Representatives.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. THOMPSON of Illinois, for an indefinite time, on account of illness.

Mr. BYRNS. Mr. Speaker, the gentleman from Pennsylvania, Mr. BERLIN, has been called home on account of illness in his family. I ask unanimous consent that he be granted indefinite leave of absence.

The SPEAKER. Without objection, the request is granted. There was no objection.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 407. An act for the relief of Willie B. Cleverly;

S. 2277. An act to establish fish and game sanctuaries in the national forests;

S. 2461. An act to amend an act entitled "An act to give the Supreme Court of the United States authority to prescribe rules of practice and procedure with respect to proceedings in criminal cases after verdict"; and

S. 2529. An act to promote the conservation of wild life, fish, and game, and for other purposes.

ADJOURNMENT

Mr. BYRNS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 25 minutes p.m.) the House adjourned until tomorrow, Wednesday, March 7, 1934, at 12 o'clock noon.

COMMITTEE HEARINGS

SUBCOMMITTEE OF THE COMMITTEE ON THE POST OFFICE AND POST ROADS

(Wednesday, Mar. 7, 9:30 a.m.)

Hearings on H.R. 3384, H.R. 4940, H.R. 6923, and H.R. 7088, in committee rooms.

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

(Wednesday, Mar. 7, 10 a.m.)

Continuation of hearings on H.R. 7852, the National Securities Exchange Act of 1934.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. BANKHEAD: Committee on Rules. House Resolution 292. Resolution for the consideration of H.R. 8402, a bill to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes; without amendment (Rept. No. 872). Referred to the House Calendar.

Mr. WARREN: Committee on Accounts. House Resolution 284. Resolution relative to the expenses of conducting the investigation authorized and directed by House Resolution 275; without amendment (Rept. No. 873). Ordered to be printed.

Mr. SCHULTE: Committee on Immigration and Naturalization. H.R. 3674. A bill to clarify the application of the contract-labor provisions of the immigration laws to actors; without amendment (Rept. No. 874). Referred to the House Calendar.

Mr. ADAMS: Committee on Public Buildings and Grounds. H.R. 7428. A bill providing for the transfer of certain lands from the United States to the city of Wilmington, Del., and from the city of Wilmington, Del., to the United States; without amendment (Rept. No. 876). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. KVALE: Committee on Military Affairs. H.R. 3980. A bill for the relief of Carl L. Bernau; without amendment (Rept. No. 875). Referred to the Committee of the Whole House.

CHANGE OF REFERENCE

Under clause 2 of rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H.R. 6859) to amend the act entitled "An act for the relief of contractors and subcontractors for post offices and other buildings and work under the supervision of the Treasury Department, and for other purposes", approved August 25, 1919, as amended by act of March 6, 1920; Committee on Claims discharged, and referred to the Committee on Public Buildings and Grounds.

A bill (H.R. 8211) granting insurance to Maybelle M. Hannan; Committee on Claims discharged, and referred to the Committee on World War Veterans' Legislation.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MURDOCK: A bill (H.R. 8491) to define and fix the standard of value and to regulate the coinage; to the Committee on Coinage, Weights, and Measures.

By Mr. CONNERY: A bill (H.R. 8492) to provide a 30-hour week for industry, and for other purposes; to the Committee on Labor.

By Mr. BOEHNE: A bill (H.R. 8493) authorizing the owners of Cut-Off Island, Posey County, Ind., to construct, maintain, and operate a free highway bridge or causeway across the old channel of the Wabash River; to the Committee on Interstate and Foreign Commerce.

By Mr. KNUTE HILL: A bill (H.R. 8494) to authorize the Secretary of the Interior to modify the terms of existing contracts for the sale of timber on the Quinault Indian Reservation, when it is in the interest of the Indians so to do; to the Committee on Indian Affairs.

By Mr. EDMONDS (by request): A bill (H.R. 8495) to authorize the Secretary of the Interior to repossess certain mineral lands ceded by Mexico to the United States of America by the Treaty of Guadalupe Hidalgo, and to provide for the national defense, and for other purposes; to the Committee on the Public Lands.

Also (by request), a bill (H.R. 8496) to withdraw from "disposition and sale" under the public land laws all lands lying within the exterior boundaries of "alleged" or "duly asserted" Spanish or Mexican land grants, and for the protection of bona-fide homesteaders, settlers, and/or innocent purchasers thereon, and for other purposes; to the Committee on the Public Lands.

By Mr. DIMOND: A bill (H.R. 8497) to grant 160 acres of land or one placer- or lode-mining claim in the Territory of Alaska to the surviving residents, or the widow and minor children of deceased residents, of Alaska who served in the World War; to the Committee on the Public Lands.

Also, a bill (H.R. 8498) to extend the facilities of the Public Health Service to seamen on Government vessels not in the Military or Naval Establishments; to the Committee on Interstate and Foreign Commerce.

By Mr. MARTIN of Colorado: A bill (H.R. 8499) to provide for the payment to veterans of the face value of their adjusted-service certificates; to the Committee on Ways and Means.

By Mr. JOHNSON of Texas: A bill (H.R. 8500) to amend the World War Adjusted Compensation Act; to the Committee on Ways and Means.

By Mr. BANKHEAD: Resolution (H.Res. 292) for the consideration of H.R. 8402, a bill to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes; to the Committee on Rules.

By Mr. BOYLAN: Resolution (H.Res. 293) creating a select committee of five Members of the House, to be appointed by the Speaker, to determine the desirability and practicability of stabilizing the domestic and world price of silver by legislation and international agreement designed to establish and maintain a proper ratio of the value of silver to gold; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. COLDEN: A bill (H.R. 8501) for the relief of Fred West; to the Committee on Military Affairs.

By Mr. DOBBINS: A bill (H.R. 8502) for the relief of Arch Boyles; to the Committee on Military Affairs.

By Mr. JOHNSON of Texas: A bill (H.R. 8503) granting a pension to Claudia E. J. Davenport; to the Committee on Pensions.

By Mr. KOPPLEMANN: A bill (H.R. 8504) granting to William J. Wholean the privilege of filing application for benefits under the Emergency Officers' Retirement Act; to the Committee on Military Affairs.

By Mr. LAMNECK: A bill (H.R. 8505) for the relief of Alex Lindsay; to the Committee on Military Affairs.

By Mr. LUDLOW: A bill (H.R. 8506) for the relief of Edwina R. Munchhof; to the Committee on War Claims.

By Mr. LUNDEEN: A bill (H.R. 8507) for the relief of John W. Sweger; to the Committee on Military Affairs.

By Mr. SOMERS of New York: A bill (H.R. 8508) to correct the military record of Arthur R. Adair; to the Committee on Military Affairs.

By Mr. TARVER: A bill (H.R. 8509) for the relief of Ida N. Moulton; to the Committee on Claims.

By Mr. WADSWORTH: A bill (H.R. 8510) for the relief of Julian C. Dorr; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

2774. By Mr. BEITER: Petition of Buffalo Junior Chamber of Commerce, Buffalo, N.Y., urging restoration of Air Mail Service in Buffalo district; to the Committee on the Post Office and Post Roads.

2775. By Mr. BOYLAN: Resolution adopted by the Men's Energetic Club, of Brooklyn, N.Y., approving the Wagner-Costigan antilynching bill; to the Committee on the Judiciary.

2776. By Mr. COLDEN: Petition of 3,487 voters of the Seventeenth Congressional District of California, asking for the restoration of pensions, hospitalization, and care of veterans of the Spanish-American War as same existed prior to enactment of Public, No. 2, Seventy-second Congress; also that the act of June 2, 1930, be reinstated, and that relief be provided for veterans and nurses of the war mentioned who are physically incapacitated and unable to earn a livelihood; to the Committee on Appropriations.

2777. By Mr. CULLEN: Petition of Men's Energetic Club, of the Brown Memorial Baptist Church, Brooklyn, N.Y., urging the enactment of the Wagner-Costigan antilynching bill; to the Committee on the Judiciary.

2778. By Mr. JAMES: Petition of Board of Supervisors, Ontonagon County, Mich., favoring continuation of Civil Works Administration; to the Committee on Appropriations.

2779. By Mr. JOHNSON of Texas: Petition of J. T. Mayfield and 15 others, of Hillsboro, Tex., favoring truck and bus regulations as proposed in House bill 6836; to the Committee on Interstate and Foreign Commerce.

2780. Also, petition of A. C. Hall and 141 others, of Teague, Tex., favoring truck and bus regulations as proposed in House bill 6836; to the Committee on Interstate and Foreign Commerce.

2781. Also, petition of Mr. and Mrs. Robert Fry, of Madisonville, Tex., favoring House bill 7986, McFadden radio bill; to the Committee on Merchant Marine, Radio, and Fisheries.

2782. Also, petition of R. V. Dunbar, agent, Missouri Pacific Lines, Malone, Tex., favoring House bill 6836, regulating motor carriers; to the Committee on Interstate and Foreign Commerce.

2783. Also, petition of A. E. Mahon and 117 others, of Ennis, Tex., favoring truck and bus regulations as proposed in House bill 6836; to the Committee on Interstate and Foreign Commerce.

2784. By Mr. KVALE: Petition of 59 farmers of Kandiyohi and Renville Counties, Minn., urging passage of farm relief legislation; to the Committee on Banking and Currency.

2785. Also, petition of members of the Congregational Church of Barnesville, Minn., protesting against the increasing of armaments; to the Committee on Naval Affairs.

2786. Also, resolution of the Minnesota Conservation Commission, opposing any action on House bill 2833; to the Committee on Indian Affairs.

2787. Also, resolution of the Minnesota Conservation Commission, urging the Federal Government to remove debris, etc., from the waters of the upper Mississippi reservoirs because of their menace to navigation; to the Committee on Rivers and Harbors.

2788. By Mr. LINDSAY: Petition of National Committee on Wild Life Legislation, favoring the passage of Senate bills 2277, 2529, and 2633; to the Committee on Agriculture.

2789. Also, petition of Men's Energetic Club of Brown Memorial Baptist Church, Brooklyn, N.Y., urging the enactment of the Wagner-Costigan antilynching bill; to the Committee on the Judiciary.

2790. By Mr. LUNDEEN: Petition of the Farmer-Labor Association of Polk County, Minn., urging that the Frazier bill for refinancing farm loans be immediately passed; to the Committee on Banking and Currency.

2791. Also, petition of the Farmer-Labor Association of Polk County, Minn., opposing the Prince plan, or any other similar plan of merger of railroads; to the Committee on Interstate and Foreign Commerce.

2792. Also, petition of Branch 9, National Association of Letter Carriers, urging Congress to defeat wage reductions for postal employees; to the Committee on the Post Office and Post Roads.

2793. Also, petition of the St. Louis County Club and Farm Bureau Association, Gilbert, Minn., urging that the St. Lawrence Treaty be ratified; to the Committee on Foreign Affairs.

2794. Also, petition of the Farmers Educational and Cooperative Union of America, Big Stone Local, No. 160, Ortonville, Minn., urging that the Frazier bill, the Swank-Thomas bill, and the Wheeler bill be passed, and that Congress take upon itself their constitutional power to issue currency and regulate the value thereof; to the Committee on Coinage, Weights, and Measures.

2795. Also, petition of the Brown County Farm Bureau Association, Inc., Sleepy Eye, Minn., urging an immediate embargo on imports of all dairy products, fats, and oils; control over the manufacture of oleomargarine and butter substitutes; the elimination of diseased dairy cows; the use of a portion of the processing tax to meet the cost of a national disease-control program; and a further reduction of interest rates on loans to farmers; to the Committee on Agriculture.

2796. By Mr. MARTIN of Massachusetts: Memorial of the General Court of Massachusetts, relative to increasing immigration quotas so as to enable persecuted Jewish people in Germany to enter the United States; to the Committee on Immigration and Naturalization.

2797. By Mr. MEAD: Petition of the Ladies' Society of the Brotherhood of Locomotive Firemen and Enginemen, Holly Lodge, No. 70, Buffalo, N.Y., protesting against the plan for railroad consolidation; to the Committee on Interstate and Foreign Commerce.

2798. Also, petition of the Society of Polish Apothecaries, Buffalo, N.Y., urging adoption of legislation for protection of drug stores; to the Committee on Agriculture.

2799. By Mr. RUDD: Petition of National Committee on Wild-Life Legislation, favoring Senate bills 2277, 2529, and 2633; to the Committee on Agriculture.

2800. Also, petition of the Men's Energetic Club of Brown Memorial Baptist Church, 629 Herkimer Street, Brooklyn, N.Y., favoring the passage of the Wagner-Costigan antilynching bill; to the Committee on the Judiciary.

2801. By Mr. SINCLAIR: Petition of J. L. Maupin and 155 others of Minot, New Rockford, and other points in North Dakota, favoring House bill 7401 to limit the car length of trains; to the Committee on Interstate and Foreign Commerce.

2802. By Mr. STRONG of Pennsylvania: Petition of the teachers of the Johnstown Senior High School, Johnstown, Pa., favoring Senate bill 2000; to the Committee on Interstate and Foreign Commerce.

2803. Also, petition of the Westmont Woman's Christian Temperance Union, Johnstown, Pa., favoring the Patman bill for the Federal supervision of motion pictures; to the Committee on Interstate and Foreign Commerce.

2804. By Mr. TAYLOR of Colorado: Petition of citizens of Dolores, Colo., urging legislative action for the remonetization of silver; to the Committee on Coinage, Weights, and Measures.

2805. Also, petition of citizens of Rico, Colo., urging legislative action for the remonetization of silver; to the Committee on Coinage, Weights, and Measures.

2806. By the SPEAKER: Petition of the city of Amarillo, Tex., regarding the demobilization of the Civil Works Administration; to the Committee on Agriculture.

SENATE

WEDNESDAY, MARCH 7, 1934

(Legislative day of Wednesday, Feb. 28, 1934)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

S. 407. An act for the relief of Willie B. Cleverly;

S. 2277. An act to establish fish and game sanctuaries in the national forests;

S. 2461. An act to amend an act entitled "An act to give the Supreme Court of the United States authority to prescribe rules of practice and procedure with respect to proceedings in criminal cases after verdict"; and

S. 2529. An act to promote the conservation of wild life, fish, and game, and for other purposes.

CALL OF THE ROLL

Mr. ROBINSON of Arkansas. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Costigan	Kean	Robinson, Ark.
Ashurst	Couzens	Keyes	Robinson, Ind.
Austin	Cutting	King	Russell
Bachman	Davis	La Follette	Schall
Bailey	Dickinson	Lewis	Sheppard
Bankhead	Dill	Logan	Shipstead
Barbour	Duffy	Lonergan	Steiwer
Barkley	Erickson	Long	Stephens
Black	Fess	McAdoo	Thomas, Okla.
Bone	Fletcher	McCarran	Thomas, Utah
Borah	Frazier	McKellar	Thompson
Brown	George	McNary	Townsend
Bulkley	Gibson	Murphy	Trammell
Bulow	Glass	Neely	Tydings
Byrd	Goldsborough	Norris	Vandenberg
Byrnes	Gore	Nye	Van Nuys
Capper	Hale	O'Mahoney	Wagner
Caraway	Harrison	Overton	Walcott
Carey	Hatch	Patterson	Walsh
Clark	Hatfield	Pittman	Wheeler
Connally	Hayden	Pope	White
Coolidge	Hebert	Reed	
Copeland	Johnson	Reynolds	

Mr. HEBERT. I desire to announce that my colleague the senior Senator from Rhode Island [Mr. METCALF], the Senator from South Dakota [Mr. NORBECK], and the Senator from Delaware [Mr. HASTINGS] are necessarily absent.

Mr. LEWIS. I desire to announce that my colleague the junior Senator from Illinois [Mr. DIETERICH] and the Senator from South Carolina [Mr. SMITH] are unavoidably detained from the Senate, and that the Senator from Kansas [Mr. MCGILL] is absent because of a severe cold.

The VICE PRESIDENT. Ninety Senators have answered to their names. A quorum is present.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a telegram in the nature of a memorial from Olin West, secretary of the American Medical Association, Chicago, Ill., remonstrating on behalf of the association against the adoption of proposed legislation in House bill 6663, the independent offices appropriation bill, as passed by the Senate granting hospitalization and domiciliary care at Federal expense to all veterans who make oath to inability to pay for such care, irrespective of whether the disability, disease, or defect for which treatment is sought is or is not due to military service, which was ordered to lie on the table.

Mr. SHIPSTEAD presented the memorial of the Minnesota Humane Education Society (by its president), remonstrating against the passage of the so-called "Tugwell-Copeland pure food and drug bill", which was referred to the Committee on Commerce.

Mr. TYDINGS presented resolutions adopted by the board of directors of the Congregation Adath Jeshurun, of Philadelphia, Pa., favoring the passage of Senate Resolution 154 (submitted by Mr. TYDINGS), opposing alleged discriminations against Jews in Germany, which were referred to the Committee on Foreign Relations.

He also presented petitions of several citizens of Cleveland, Ohio, praying for the passage of Senate Resolution 154 (submitted by Mr. TYDINGS), opposing alleged discriminations against Jews in Germany, which were referred to the Committee on Foreign Relations.

Mr. COPELAND presented resolutions adopted by several women's organizations and petitions of sundry citizens of the State of New York praying for the passage of House bill 6097, providing higher moral standards for films entering interstate and foreign commerce, which were referred to the Committee on Interstate Commerce.

He also presented petitions of sundry citizens of the State of New York praying for the enactment of legislation relating to hours of labor and service, length of trains, and disposition of disputes between carriers and their employees, which were referred to the Committee on Interstate Commerce.

He also presented a resolution adopted by Rome, N.Y., Post No. 2246, Veterans of Foreign Wars of the United States, protesting against the enactment of legislation limiting the freedom of speech and of the press, which was referred to the Committee on Interstate Commerce.

He also presented a resolution adopted by the Property Owners Association, of Middle Village, Long Island, Inc., favoring lengthening the period of amortization of mortgage loans from the Home Owners' Loan Corporation to 25 years and the unconditional guaranty of the principal of bonds of the Corporation, which was referred to the Committee on Banking and Currency.

He also presented a petition of the Spuyten Duyvil Property Owners Association, of New York City, praying for the enactment of legislation to reduce the interest rate of 6 percent on loans on real estate made by the Home Owners' Loan Corporation, which was referred to the Committee on Banking and Currency.

He also presented a petition of sundry citizens of Hornell, N.Y., praying that the revaluation of gold be followed by an adequate issuance of currency, the restoration of silver to be used as money along with gold, and that new currency be used to cancel interest-bearing war bonds, which was referred to the Committee on Banking and Currency.

He also presented a resolution adopted by the St. Lawrence County subdistrict of the Dairymen's League Co-operative Association, Inc., of New York State, favoring the passage of legislation to prohibit the manufacture and sale of oleomargarine, which was referred to the Committee on Agriculture and Forestry.

He also presented a resolution adopted by the Democratic Club of the First Assembly District of the Borough of Queens, Long Island City, N.Y., favoring the transportation and delivery of mail by Army and Navy airplanes and pilots, which was referred to the Committee on Post Offices and Post Roads.

He also presented two petitions of sundry citizens of Queens County, N.Y., praying for the enactment of legislation to repeal the Federal tax of 1 cent per gallon on gasoline, which were referred to the Committee on Finance.

He also presented a petition of sundry citizens of Queens County, N.Y., praying for the enactment of legislation incorporating the United States, to limit the printing and issuance of money and the control of credit to the Government only, and to discontinue the issuance of tax-exempt interest-bearing bonds to bankers, which was referred to the Committee on Finance.

He also presented a resolution adopted at Syracuse, N.Y., by the Onondaga County Holstein Club favoring a 5-percent tax on importations of all animal, vegetable, fish, or other fats or oils coming into competition with butterfat, which was referred to the Committee on Finance.

He also presented resolutions adopted by the Erie County Committee of the American Legion, of Buffalo, N.Y., to permit veterans sitting on adjudication boards to receive compensation, and remonstrating against the removal of the regional office of the Veterans' Administration from Buffalo to Batavia, N.Y., which were referred to the Committee on Finance.

He also presented a resolution adopted at New York City by the National Association of Manufacturers of the United States favoring the holding in abeyance of action on the Great Lakes-St. Lawrence Deep Waterway Treaty until a survey has been made covering expenses of operation, volume of traffic, savings in transportation costs, returns on and amortization of the investment, and other economic aspects involved, which was ordered to lie on the table.

He also presented a resolution adopted by the Massena Democratic Club, of Massena, N.Y., favoring the ratification of the Great Lakes-St. Lawrence Deep Waterway Treaty, which was ordered to lie on the table.

He also presented a resolution adopted by the Wayne County Committee, the American Legion, Department of New York, favoring the enactment of legislation providing for building the Navy to the strength permitted by the Washington and London Naval Treaties, which was ordered to lie on the table.

He also presented memorials of sundry citizens and organizations of the State of New York, remonstrating against the passage of legislation providing for building the Navy to the strength permitted by the Washington and London Naval Treaties, which were ordered to lie on the table.

FEDERAL EMERGENCY RELIEF IN ARIZONA

Mr. ASHURST presented a letter from the Assistant Federal Emergency Relief Administrator, which was referred to the Committee on Banking and Currency and ordered to be printed in the RECORD, as follows:

FEDERAL EMERGENCY RELIEF ADMINISTRATION,
Washington, February 28, 1934.

Hon. HENRY F. ASHURST,
United States Senate, Washington, D.C.

MY DEAR SENATOR ASHURST: I am in receipt of your letter of February 24. We are putting into Arizona for transient care something like $250,000 per month, more than in any other State in the Union, more than we are putting into Mississippi, Arkansas, Louisiana, Tennessee, and Missouri combined.

Very truly yours,

AUBREY WILLIAMS,
Assistant Administrator.

U.S.S. "CONSTITUTION"

Mr. WALSH. Mr. President, I present and ask to have printed in the RECORD and appropriately referred resolutions adopted by the House of Representatives of the Massachusetts General Court, petitioning the Secretary of the Navy to enshrine the U.S.S. *Constitution* as a national museum in its home port of Boston, Mass.

The resolutions were referred to the Committee on Naval Affairs and ordered to be printed in the RECORD, as follows:

THE COMMONWEALTH OF MASSACHUSETTS,
OFFICE OF THE SECRETARY,
Boston.

Resolutions relative to the U.S.S. *Constitution*

Whereas the U.S.S. *Constitution* was originally built in Boston at Hartts Shipyard, near what is now Constitution Wharf, and was rebuilt and restored at the Boston Navy Yard; and

Whereas it was through action by the people of Boston and of the Commonwealth of Massachusetts that said U.S.S. *Constitution* was saved from destruction; and

Whereas it is proposed that said ship be kept in Washington as a national museum; and

Whereas it is the desire of the citizens of Massachusetts that said ship be returned to its home port and kept there as a national museum: Therefore be it

Resolved, That the House of Representatives of the General Court of Massachusetts petitions the Secretary of the Navy of the United States requesting the Navy Department in its wisdom to enshrine the U.S.S. *Constitution* as a national museum in its home port of Boston; and be it further

Resolved, That a copy of these resolutions be sent forthwith by the secretary of the Commonwealth to the President of the United States, to the Secretary of the Navy, and to each United States Senator and Congressman from Massachusetts.

In the house of representatives, adopted March 1, 1934.

[SEAL] FRANK E. BRIDGMAN, *Clerk.*

A true copy.

Attest:

F. W. COOK,
Secretary of the Commonwealth.

THE WORLD COURT

Mr. BARBOUR. Mr. President, I ask unanimous consent that a resolution adopted by the annual international relations dinner at Elizabeth, N.J., be printed in the RECORD and referred to the Committee on Foreign Relations.

There being no objection, the resolution was referred to the Committee on Foreign Relations and ordered to be printed in the RECORD, as follows:

Resolution in favor of prompt completion of the adherence of the United States to the World Court, passed by a group of 250 citizens at the annual international relations dinner in Elizabeth, N.J., May 18, 1933

Whereas our Government is making a tremendous effort at this time, through an emergency program, to heal an economic condition resulting largely from the last war; and

Whereas the World Court, in the 11 years of its existence, by successfully settling 48 international disputes, has proved its practical value as a peaceful agency; and

Whereas 7 years have elapsed since the United States Senate, by a vote of 76 to 17, passed a resolution providing for the adherence of the United States to the World Court if five conditions were met; and

Whereas in the view of the Department of State and of such authoritative bodies as the American Bar Association these conditions have been entirely met by the three World Court treaties now awaiting the action of the United States Senate; and

Whereas public opinion has shown its impatience with the continued delay in settling this question, the most notable instance of this being the recent passage, by an overwhelming majority in both houses, of the New Jersey Legislature's resolution calling on the National Senate to complete our adherence to the World Court by ratifying the three pending treaties: Now, therefore, be it

Resolved, That this group of 250 citizens, gathered at the annual international relations dinner in Elizabeth, hereby declares its belief that it is contrary to sound legislative policy to postpone further settlement of such a vital issue as our adherence to the Court and urges the Senate to ratify at the earliest practicable moment, and with no reservation that will invalidate such action, the three World Court treaties now pending in the Senate.

REPORTS OF COMMITTEES

Mr. SHEPPARD, from the Committee on Commerce, to which was referred the bill (S. 1194) to amend section 4 of the act entitled "An act to regulate the construction of bridges over navigable waters", approved March 23, 1906, as amended, reported it without amendment and submitted a report (No. 415) thereon.

Mr. WHEELER, from the Committee on Indian Affairs, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

S. 236. An act to provide funds for cooperation with the school board at Queets, Wash., in the construction of a public-school building to be available to Indian children of the village of Queets, Jefferson County, Wash. (Rept. No. 416); and

S. 2891. An act to authorize turning over to the Indian Service vehicles, vessels, and supplies seized and forfeited for violation of liquor laws (Rept. No. 417).

Mr. WHEELER also, from the Committee on Indian Affairs, to which was referred the bill (S. 1826) for expenditure of funds for cooperation with the public-school board at Poplar, Mont., in the construction or improvement of public-school building to be available to Indian children of the Fort Peck Indian Reservation, Mont., reported it with an amendment and submitted a report (No. 418) thereon.

Mr. LOGAN, from the Committee on Military Affairs, to which was referred the bill (H.R. 2632) for the relief of Wilson G. Bingham, reported it with an amendment and submitted a report (No. 419) thereon.

Mr. STEPHENS, from the Committee on Claims, to which was referred the bill (S. 2898) conferring jurisdiction upon the Court of Claims of the United States to hear, consider, and render judgment on certain claims of George A. Carden and Anderson T. Herd against the United States, reported it with an amendment and submitted a report (No. 420) thereon.

ENROLLED BILL PRESENTED

Mrs. CARAWAY, from the Committee on Enrolled Bills, reported that on the 6th instant that committee presented to the President of the United States the enrolled bill (S. 1759) to revive and reenact the act entitled "An act granting the consent of Congress to the Mill Four Drainage District in Lincoln County, Oreg., to construct, maintain, and operate dams and dikes to prevent the flow of waters of Yaquina Bay and River into Nutes Slough, Boones Slough, and sloughs connected therewith", approved June 17, 1930.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. TYDINGS:

A bill (S. 2970) for the relief of George Edwin Godwin (with an accompanying paper); to the Committee on Naval Affairs.

A bill (S. 2971) granting a pension to Annie Cantwell (with accompanying papers); to the Committee on Pensions.

By Mr. COPELAND:

A bill (S. 2972) for the relief of John N. Knauff Co., Inc.; and

A bill (S. 2973) for the relief of First Lt. Walter T. Wilsey; to the Committee on Claims.

A bill (S. 2974) to incorporate the American National Institute (Prix de Paris) at Paris, France; to the Committee on the Library.

A bill (S. 2975) for the relief of Charles Wellesley Berrington; and

A bill (S. 2976) for the relief of Raymond Nelson Hickman; to the Committee on Naval Affairs.

By Mr. WHEELER:

A bill (S. 2977) granting a pension to Mary Lange; to the Committee on Pensions.

A bill (S. 2978) to amend the act of March 3, 1927, amending section 1 of the act of May 26, 1926, entitled "An act to amend sections 1, 5, 6, 8, and 18 of an act approved June 4, 1920, entitled 'An act to provide for the allotment of lands of the Crow Tribe, for the distribution of tribal funds, and for other purposes'"; and

A bill (S. 2979) to repeal the act approved March 3, 1927 (44 Stat.L. 1365) entitled "An act to amend section 1 of the act approved May 26, 1926, entitled 'An act to amend sections 1, 5, 6, 8, and 18 of the act approved June 4, 1920, entitled "An act to provide for the allotment of lands of the Crow Tribe, for the distribution of tribal funds, and for other purposes"'"; and to prevent the execution of competent grazing and farming leases in advance of the expiration of existing leases affecting said lands by competent Crow allottees and to make possible a unified system of leasing between competent and incompetent Crow allottees, and for other purposes; to the Committee on Indian Affairs.

By Mr. SHIPSTEAD:

A bill (S. 2980) to modify the effect of certain Chippewa Indian treaties on areas in Minnesota; to the Committee on Indian Affairs.

By Mr. NEELY:

A bill (S. 2981) to amend section 201 (a) of the Emergency Relief and Construction Act of 1932 so that the Reconstruction Finance Corporation may loan money to States, municipalities, and so forth, for the purchase of bridges and to operate and free the same from collection of tolls; to the Committee on Banking and Currency.

By Mr. VANDENBERG:

A bill (S. 2982) to enable the people of the Philippine Islands to adopt a constitution and form a government for the Philippine Islands, to provide for the independence of the same, and for other purposes; to the Committee on Territories and Insular Affairs.

INCLUSION OF CATTLE AS A BASIC COMMODITY—AMENDMENT

Mr. O'MAHONEY submitted an amendment intended to be proposed by him to the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes, which was ordered to lie on the table and to be printed.

E. BARRETT PRETTYMAN

Mr. TYDINGS. Mr. President, due to the fact that I have to be absent this afternoon when the nomination of Mr. Robert H. Jackson as general counsel for the Bureau of Internal Revenue, Income Tax Department, will come before the Senate, and inasmuch as his predecessor, Mr. E. Barrett Prettyman, is a constituent of mine, I feel it proper and appropriate that I should make a brief statement about Mr. Prettyman.

First, while I did not recommend Mr. Prettyman for this position at the time he was appointed, I was asked by the authorities whether or not his appointment would be agreeable to me. Knowing Mr. Prettyman to be a man of splendid legal attainments and of outstanding ability and integrity it was a pleasure for me to endorse his appointment.

When Mr. Prettyman took over the position of general counsel of the Income Tax Department of the Bureau of Internal Revenue he found there about 20,000 claims in litigation, involving over half a billion dollars of back taxes, which the Government sorely needed, because its financial plight at that time was so desperate that the compensation of veterans and Federal employees and others had to be cut in order to sustain, it was said, governmental credit. Mr. Prettyman immediately began a reorganization of the Income Tax Department, insofar as his duties applied to it, and evolved certain modes of procedure which were calculated to speed up the collection of these taxes which were in dispute.

I wish to call the attention of the Senate for just a moment to the situation which he faced. As I have said, there were about 20,000 claims in litigation or in dispute pending in that department. The amount of taxes in dispute was estimated to be about $550,000,000, or over a half billion dollars. Mr. Prettyman has in the short while that he has been in charge of the legal end of the Income Tax Department speeded up greatly the machinery of collection; he has evolved a new set-up for the handling of these cases, and now there is some promise that these cases—some of which are 10, 12, or more years old—will be disposed of in the near future.

Bear in mind, Mr. President, we have been settling only about 1,800 claims a year; they have been accumulating over the past 5 or 6 or 8 years at the rate of 6,000 a year; and we have been settling only about 1,800, or a third of those which yearly are in dispute and come to the counsel for settlement. So that, if the old system had prevailed, in 5 or 6 or 8 more years the Bureau would have had 40 years' work ahead of it.

Mr. Prettyman faced that situation with ability, and the scheme he devised to collect the taxes in dispute and settle the cases has been accepted by the Treasury Department. I regret that he has tendered his resignation because, as I have said, he is a man well versed in the income tax laws, a man of unimpeachable integrity and of outstanding ability in his profession.

However, the new Secretary of the Treasury, Mr. Morgenthau, for reasons best known to himself, wanted in that position a man whom he knew. He said he had nothing at all by way of criticism to say of Mr. Prettyman; that his work had been splendid; that he had applied himself with great diligence to the collection of the taxes and the settlement of the disputes, but he said he thought it was only fair, inasmuch as he had the ultimate and final responsibility in the matter, that he should have a man as general counsel whom he knew, and that for no other reason he was anxious to place Mr. Robert H. Jackson in the position because he had been associated with Mr. Jackson for some time in the past.

I rose to make the statement that I regret the Government has lost the services of so splendid a man as Mr. Prettyman in that office. I rose to make the statement because I should like it to be known from Mr. Morgenthau and others that there is not the slightest criticism of the conduct of that office under Mr. Prettyman. I should like it to be known that there is no cloud, no suspicion, no reasonable room for criticism of the conduct of the Income Tax Bureau under Mr. Prettyman. On the contrary, all authorities over and under him, so far as I know, are in accord that he has done an excellent piece of work in collecting the half billion dollars of back taxes which are 8, 10, and 12 years overdue, and that the plan he has evolved will be followed by his successor and by the Bureau.

Since Mr. Prettyman tendered his resignation in order to accommodate Mr. Morgenthau in his desire to have a man whom he knew, I opposed the confirmation of Mr. Jackson because I thought we were losing too good a man in that very vital department, a man who could not be approached, a man whose conduct is exemplary, a man who knows the income tax laws from beginning to end.

However, Mr. Prettyman does not care to remain in the office if Mr. Morgenthau, Secretary of the Treasury, does not wish him to do so. I am authorized to say that in accepting his resignation there is no reflection upon Mr. Prettyman from any source whatsoever in the Government.

While I have been displeased to see Mr. Prettyman surrender this important post, it is gratifying to know that his services are so outstanding that he has been offered the position of Corporation Counsel of the District of Columbia. While he does not care for that kind of work, yet at the request of the President he has been glad to undertake it. I know in that position he will make a record equal to that which he has already made in the Internal Revenue Bureau.

I felt that I owed it to Mr. Prettyman to make this statement in order that people might know there is no cloud of suspicion or reflection in any way upon him in tendering his resignation, but that his desire to cooperate with the new administration was the sole reason for that action.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

Mr. WHEELER. Mr. President, I desire to announce at this time that tomorrow, at the first opportunity when I can obtain recognition, I shall address the Senate on the pending St. Lawrence Waterway Treaty.

VISIT OF PRINCE TOKUGAWA, OF JAPAN

Mr. COPELAND. Mr. President, I wish to make a brief verbal report on behalf of the Committee on Rules.

On Friday we had a visit from a very distinguished citizen of Japan, Prince Tokugawa. In view of the fact that the Senate was in recess on last Friday and Saturday, I escorted His Grace about the Capitol and showed him its various attractions. Also we visited the House of Representatives.

His Grace wished me to convey to the Senate his regrets that he did not meet Senators personally. I expressed to

him then, as I do now, our great regret that we were not in session to greet him and extend to him the privileges of the floor.

AMENDMENT OF AGRICULTURAL ADJUSTMENT ACT

Mr. O'MAHONEY. Mr. President, I desire to offer an amendment to the bill (S. 2732) to include sugar beets and sugar cane as basic agricultural commodities under the Agricultural Adjustment Act, and for other purposes, and I ask unanimous consent to proceed for 2 or 3 minutes in explanation thereof.

The VICE PRESIDENT. Is there objection to the Senator proceeding as requested? The Chair hears none, and the Senator is recognized for the time designated.

Mr. O'MAHONEY. Mr. President, in June 1933 the Congress enacted the National Industrial Recovery Act. There is contained in it a provision known as section 208 which made an appropriation of $25,000,000 to be used by the President of the United States under rules and regulations to be issued by him for the purpose of encouraging subsistence homesteading. In the language of that section the purpose was "to aid in the redistribution of the overbalanced population in industrial centers."

For many years the Federal Government through the Reclamation Service has been developing what are really very efficient subsistence homesteads but in a slightly different form. In my State and in other States in the West there are numerous reclamation projects constructed by the Federal Government, settled at the invitation of the Government by men and women of high standards. Those projects, some of which are devoted to the raising of sugar beets, are particularly successful. In the opinion of those who live on the homesteads and those of us who are familiar with them, they offer an ideal answer to the query which, so to speak, was before the Congress and in the mind of the President when this particular section of the National Industrial Recovery Act was adopted.

I have in mind one particular project, the North Platte project, the chief town of which in my State is Torrington. That project was settled by veterans of the World War who were invited by the Federal Government to take up the homesteads. They have been engaged in the raising of sugar beets. In the neighborhood of Riverton is another project of similar homesteads and at Powell is another. It is the feeling of the settlers who, under contract with the United States, have made their homes there, and certainly it is my feeling that any action by the Federal Government now which would undertake to cut down the opportunity of those settlers to continue the work in which they are engaged would amount almost to a breach of faith. It is with that thought in mind that I am presenting the amendment and soliciting the very earnest consideration of all Senators thereof.

Mr. President, I am advised that the area in reclamation projects now devoted to the raising of sugar beets is scarcely more than 10 percent of that in the country which is so utilized.

I ask that the amendment may be printed in the RECORD.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 18, after the word "thereto", to insert the following: "*Provided, however,* That production of sugar beets upon any reclamation project constructed under the Reclamation Act shall not be curtailed: *And provided further,* That the Secretary of Agriculture may authorize the production of sugar beets upon any reclamation project construction of which was initiated prior to the approval of this act."

The VICE PRESIDENT. The amendment will be referred to the Committee on Finance and printed.

INCLUSION OF CATTLE AS A BASIC COMMODITY

The Senate resumed the consideration of the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes.

Mr. CONNALLY. Mr. President, on yesterday I outlined the provisions and the purposes of this measure, and it is not my intention to consume much of the time of the Senate.

At this point I ask unanimous consent to have printed in the RECORD my remarks before the House committee during the hearings, and also my remarks before the Senate Committee on Agriculture and Forestry, when the bill was pending before that committee.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[From hearing of Wednesday, Jan. 17, 1934, before the Committee on Agriculture of the House of Representatives]

STATEMENT OF HON. TOM CONNALLY, UNITED STATES SENATOR FROM THE STATE OF TEXAS

Senator CONNALLY. Mr. Chairman and gentlemen of the House Agriculture Committee, I want to thank you for this opportunity of appearing before the committee. I understand you are now considering a bill introduced by your chairman, Congressman JONES, to make cattle a basic agricultural commodity for the purposes of the Agricultural Adjustment Act. I want to say to the committee that I have introduced a similar bill in the Senate.

As you, perhaps, know better than I when this Agricultural Adjustment Administration bill was first proposed, the cattlemen, as I understand, by their own request, or at the request of the representatives of the industry, were omitted from the provisions of the measure. But since that time I have been convinced that there is now a change, almost a radical change, on the part of cattlemerr with regard to the Agricultural Adjustment Administration and the possibility of aid to cattle thereunder.

Other agricultural commodities have been benefited tremendously. Speaking for cotton particularly, since I am very familiar with it, I think that the operation of the Agricultural Adjustment Act last year absolutely saved the cotton industry from disintegration and disaster. Its condition was already disastrous but there would have been an absolute holocaust in my State if it had not been for the program of relief adopted by the administration made possible under this act which put us back on the road to recovery at least.

Now wheat and a great many other agricultural commodities have been benefited, but cattle and the cattlemen are in a very bad situation. I have had telegrams from the president of the Texas and the Southwest Cattle Raisers Associations to the effect that according to their view 90 percent, and perhaps 95 percent of the cattlemen in my State want cattle included in the Agricultural Adjustment Act as a basic commodity.

The American National Livestock Association's executive committee, I believe, had a meeting at Albuquerque and from wires I received from the Texas members attending that meeting I am informed that of the 45 representing the Texas cattlemen attending that meeting 40 had voted to have cattle included as a basic commodity, and only 5 were voting against.

I also had wires from the Panhandle Cattle Raisers Association, from the Northeast Panhandle Hereford Association, with which you are very familiar, Congressman Jones, and I believe they are almost unanimous in wanting cattle included in this act as one of the basic commodities.

I believe if the committee will investigate further it will find that the cattle industry as a whole is very strongly in favor of having cattle brought within the purview of the Agricultural Adjustment Act.

Of course, I do not need to urge upon this committee the importance of taking some steps to relieve the cattlemen, but I do urge that the committee proceed with such hearings as you decide to have so that the bill may be reported for action of the House at an early date.

With reference to the suggestion for a tariff on the importation of canned goods as a means to relieve agriculture: When the last tariff bill was before the Senate I was a member of the Senate Finance Committee, and the amendment for increasing the tariff on live cattle was proposed by me, and adopted by the Senate, and agreed to by the House. While I am in favor of adequate protection for cattle, at the same time the volume imported is appreciably small compared with the volume produced, and I am convinced that no tariff legislation alone is going to remedy the situation, because the passage of a tariff measure for the further protection of cattle is not going to reach the spot in the present situation. Duties on canned meats ought to be raised. Now, as you know, on account of the foot-and-mouth disease in Argentina and other South American countries, we have had practically an embargo on cattle from the Argentine. I do not think that would apply to canned goods, but it does to live cattle, so that gate has been closed up.

There are very few cattle coming into the United States from Mexico; some cattle were being brought in, but the cost is almost prohibitive today and because of the international exchange condition they can hardly bring cattle in now.

The only measure that offers early help for the cattlemen is to be found in relief of the kind here proposed, and I am very strongly in favor of and urge this committee to include cattle as a basic commodity in the Agricultural Adjustment Act, and I believe I speak the sentiments of a majority of those in the industry.

The other basic commodities covered in the act have been taken care of or are being taken care of pretty well, and if cattle is not

a basic commodity or a basic agricultural industry it will be hard to find an industry that is basic.

Mr. Chairman, I am hoping that this committee will be able to complete its hearings very quickly on this bill and report it to the House recommending the inclusion of cattle in the act, as it was originally included when the measure first passed the House.

I believe I have expressed the attitude of the cattlemen of my State, have I not, Congressman KLEBERG?

Mr. KLEBERG. I think that is correct, Senator CONNALLY.

Senator CONNALLY. And so I hope very much that the committee will proceed and conclude its hearings on the bill, so there will be no delay in having cattle brought under the provisions of the Agricultural Adjustment Act and its administration.

I believe that a vast majority of the cattlemen are now in favor of including cattle. I just had a letter from a man in Houston, Tex., who is very active in the industry, and he stated that the cattlemen of that portion of the country and through south Texas, that the cattlemen were now anxious to bring cattle under the act as a basic commodity. I have had many wires and telegrams from the cattlemen in my State, and I believe that I am speaking the views of the vast majority of the cattlemen in urging the inclusion of cattle.

Mr. Chairman, I do not want to suggest to this committee what it should do, but I understand before any program can be worked out for the cattle industry we must have this legislation. Of course they might have their marketing agreement under the present act, but what we need is to have sufficient authority vested in the Department of Agriculture to put this program over; and I was going to suggest that this legislation be enacted, with the assurance on the part of the Department of Agriculture that before adopting the concrete manner in which the program was to be worked that a hearing be held to which all the cattlemen would be invited to give their views, because many of the interested parties will want to appear before the actual details of the plan are put into operation.

Mr. KLEBERG. May I suggest, Senator, that you include in your remarks a request that the Department of Agriculture express its attitude on the matter of the program to be worked out, and that before such a program is adopted that a hearing be held here in Washington on this question, to be attended by the cattlemen and that such a program be arrived at based on the suggestions and evidence presented at such a hearing.

Senator CONNALLY. Yes.

Mr. KLEBERG. If that meets with your suggestion.

Senator CONNALLY. I would be glad to do that. Mr. Chairman, I think it is hardly necessary for me to urge upon you the procedure to be followed.

The CHAIRMAN. I will state in that connection that Secretary Wallace is appearing before another committee this morning and if he gets through in time he expects to appear before us.

Senator CONNALLY. That matter can be covered by him.

The CHAIRMAN. Yes.

Senator CONNALLY. I was just going to suggest that you request either the Secretary of Agriculture or a representative of the Department to appear before the committee, and you can put that matter up to them.

The CHAIRMAN. I am sure that will be the procedure followed, as that is the usual method of the Department in developing these programs.

Senator CONNALLY. Yes. I was just suggesting that you get from the Department some assurance that if cattle are made a basic commodity under the act that the program would be worked out with those interested in the industry, by the representatives of the industry at a hearing.

I am sure that the Secretary when he appears before the committee will tell you that he is in favor of cattle being included under the Agricultural Adjustment Administration. I know what his attitude is with reference to the matter. I attended a meeting some time ago with representatives of farm groups and farm organizations in the office of the Secretary of Agriculture at which time this very matter was discussed, and the purpose of the meeting was to find out the sentiments of those groups with reference to putting cattle under the Agricultural Adjustment Administration, and the Secretary at the time submitted to the group his ideas for a plan or method in the very illuminating and interesting address he made advocating the giving to the Department of Agriculture a fund of $200,000,000 with which to administer the beef cattle and the dairy cattle industry, on the theory that he would be able to recoup that amount through some processing tax or some other arrangement of that kind.

The CHAIRMAN. May I suggest, Senator, if you have the time, in order to get your reaction to it, that I understand there has been some insistence on the part of hog producers, especially, that cattle be taxed as a competing commodity. I am advised that has been deferred for the present for the reason that the cattle industry would not be able to pay it. And if they are required to pay a compensatory tax they will not be able to benefit from any of the proceeds of such a tax. In other words, it might be possible under the terms of the present law to tax cattle as a competing commodity but there is no authority to pay any of those benefits to cattle.

Senator CONNALLY. Yes.

The CHAIRMAN. And if such a tax is to be levied certainly it would be to the advantage of the cattle industry to have the total proceeds of such a tax so applied, under some program that might benefit the industry.

Senator CONNALLY. Yes.

The CHAIRMAN. In that connection, if a processing tax were levied on cattle, then a compensatory tax might be levied in addition to the tariff on imports of other commodities.

Senator CONNALLY. Yes.

The CHAIRMAN. For the protection of the domestic market, and through which the cattle industry would receive some advantage if it is made a basic commodity.

Senator CONNALLY. I agree entirely with you, Mr. Chairman, in the very clear statement you have made of the situation.

Of course, I do not believe we ought to tax cattle as a competing commodity with hogs, for the benefit of hogs, most certainly unless you are going to bring cattle within the range of benefits from the Agricultural Adjustment Administration. I cannot see why we should. Of course, the hog people would like to get the benefit that would accrue from an increase on cattle, but I do not see why one class of the farming people should be taxed for the benefit of another engaged in another branch of the same industry. I know there are certain reasons being urged for taxing one branch for the benefit of the distressed producer in another line, but I do not believe there ought to be a tax unless its operations will apply to all.

Now, Mr. Chairman, those are briefly my views, and I simply want to say that I am heartily in accord with the views of the chairman of the committee, with whom I have been cooperating, and with whom I shall continue to cooperate.

And I want to take this occasion to congratulate the committee in having as its chairman one of our own distinguished Texans and one who is familiar with these matters, and who has shown such a grasp of the whole situation.

Mr. MARSHALL. Mr. Chairman, I should like to ask the Senator a question.

The CHAIRMAN. Mr. Marshall.

Mr. MARSHALL. Senator Connally, I should just like to ask you if you would care to express an opinion whether the operation of the processing tax has been successful, so far as hogs are concerned, or whether it has caused a shift to the consumption of cattle or beef products.

Senator CONNALLY. Frankly, I do not know much about the hog program, because we do not produce hogs for the market in large volume, and I am not familiar with just how the processing tax has affected the consumption of pork. But, of course, any processing tax which increases the cost of an article has a tendency to decrease the consumption, just like the cost of any article; when the price goes up the use of it declines to a certain degree. But if you do not increase the price to the consumer you are not going to be able to raise the price to the producer. You have got to raise the price and, of course, the consumer will have to suffer, somewhere along the line; the consumer will have to pay more if it is going to do any good. So the effect of a processing tax, even though it must result in the consumer paying a little more for the article, if it does not result in an increase in the price to the consumer, we cannot get a better price to the producer.

Mr. KLEBERG. Senator, may I ask you another question?

Senator CONNALLY. Yes.

Mr. KLEBERG. There have been times when the market for cattle on the hoof was very good when there was no appreciable difference noted in the price to the consumer on the different types of meat. How would you explain that? In other words, when cattle or beef was at 8 cents the price of beefsteak per pound, or roast, and the other cuts, remained about the same; the housewife paid about the same, with very little change in price to her, regardless of the price of beef on the hoof.

Senator CONNALLY. Of course, that involves a good many factors. For instance, the packing industry is interested in maintaining a stable level, I assume, insofar as it can, on all products handled in that industry, so that it is not a question altogether of the price of livestock or of beef cattle on the hoof.

Then there are distributing factors, freight factors, and many other factors which would enter into that situation, as they do in any other situation. When a man rides on a Pullman and gets a steak and pays a dollar or a dollar and a half for it, naturally he must expect to pay for the service involved in furnishing him that service.

The cost of everything—distribution, freight rates, overhead, facilities for furnishing the service are all things that must be taken into consideration in arriving at the price of the finished product.

Mr. KLEBERG. The reason I asked that question was to bring out whether or not the Senator did not think that it is barely possible that the distributors of the commodity, those who are interested in beef and cattle, possibly were in position to absorb very largely a part of the processing tax on these various livestock products if it were found desirable to levy a processing tax.

Senator CONNALLY. I will say that they are bound, naturally, to absorb some of it. We always have a law that when an article reaches a certain level, at which the price becomes burdensome, its use falls off. For instance, take the gasoline tax. When you put a gasoline tax on of half a cent, immediately that is reflected in the market price of gasoline, and if the tax is increased to a cent a gallon, the consumption of gasoline will fall off a little more. That is true all over the country. Now, the same thing is true in other commodities. When the price of beef gets too high immediately the consumption falls off. Necessarily if the processing tax is an appreciable amount, resulting in additional cost to the consumer, the packers have got to absorb some of it at least, by reason of the fact that consumption is going to decrease to a certain extent, resulting in the falling off in their volume of business.

And, of course, the greater the volume of business the less the pro rata expense per pound in handling the commodity is.

Mr. FULMER. May I ask the Senator a question?

Senator CONNALLY. Yes.

Mr. FULMER. During the consideration of the Agricultural Adjustment Act last year I advised the committee at that time that the program would work 100 percent so far as cotton was concerned.

Senator CONNALLY. Yes.

Mr. FULMER. Because so far as its application to cotton is concerned there was a considerable demand for export cotton and cotton would bring a better price. In other words, they would have to take the cotton, and so far as its operation with cotton is concerned the users of cotton would not have an opportunity to beat down the price to the farmer; they have had to pass it on to the consumer. At that time I stated that I was perfectly willing to go along with the hog and wheat and other commodities included in the act, but I could not understand how we were going to keep the packer from taking the price, increased price by virtue of the processing tax out of the farmer unless we had a fixed price.

Senator CONNALLY. Yes.

Mr. FULMER. And that is the way the plan has worked out in my section. Of course, if we had fixed the price at 6 cents and then the packer had cut the farmer's price down to 5 cents we would have had the privilege of raising a tax, increasing the tax 1 cent, so that there would have been no advantage to the packer in cutting the price to the farmer, and therefore instead of passing this tax back to the farmer, resulting from the processing tax, naturally the packers would have passed it on to the consumer.

Senator CONNALLY. Yes.

Mr. FULMER. And without fixing the price at which hogs are to be sold, or for that matter, any other commodity, the principal part of which is consumed in this country, unless we fix the price we are going to be met with the same situation; the benefit will not be passed back to the farmer, but they will take this tax out of the price paid to the farmer and the producer will have to absorb the tax just as the farmers have had to absorb it on hogs.

Senator CONNALLY. Of course, you cannot avoid some problems. We might take some of the cattle out of production.

Mr. FULMER. At the same time it is my belief that with the experience of the Department in dealing with cotton they will be able to work out a program that will meet this situation.

Senator CONNALLY. Yes. The Department has been learning things. There were a lot of things for them to do. These matters were all new and had to be worked out, and I think the Department of Agriculture has learned a lot of things in the administration of these various programs.

I want to stress one thing which your chairman brought out, and that is this: That, insofar as importation is concerned, you put cattle under the Agricultural Adjustment Administration as a basic commodity and then give the power to the Department of Agriculture to go ahead to put such restrictions upon the importation of beef as may be necessary; with the addition of the processing tax which could be imposed, the industry could receive a benefit. You are going to get much quicker results in that way than you could through any tariff legislation.

If you proposed a tariff to meet this situation, the tariff legislation will be opened up all along the line. Once you undertake to legislate on the tariff any Member of the Senate can ask a revision of the tariff on any article and you would upset this whole program. The best way to get at this is through the Agricultural Adjustment Administration by giving the Department of Agriculture power to balance the situation through restriction of imports and through such imposition of processing taxes as may be necessary to protect the domestic market.

Of course, Congressman FULMER, a tax on cotton has resulted in raising the domestic price. That is the only way that you are going to raise the domestic price to the producer, increase the cost to the consumer. That is the only way we are going to be able to raise the farmer's price. We probably cannot raise the price to the farmer as much as is desirable, but it is necessary to increase the price to the consumer more than was being effected through the tariff. We can, through the process of this processing tax, raise the domestic price and give the people here at home, the farmer, a better price for his commodity and take out of production some of this surplus which has been competing with what the farmer has been raising, and which has been destroying the industry. That is the only way that it can be done.

Mr. FULMER. In other words, the farmer is put in the position whereby he can receive the benefit of his own production through a tax, a processing tax on his commodity.

Senator CONNALLY. Yes, sir.

Mr. FULMER. And at the same time reduce, as has been done, the production of cotton.

Senator CONNALLY. Yes. Congressman JONES had a bill in the House and I introduced a bill in the Senate, what was known as the "export-debenture plan." Now, the export-debenture plan turned the tariff around, and the tariff benefited the industry and benefited the importer. And, therefore, to get the industries in this country back to raising the cost and to make the people here at home pay more for those articles in order that the farmer may receive a better price, we simply turned the tariff around and, instead of saving that, the manufacturer was going to be able to charge the consumer a greater price because of the tariff protection he had on his output; we provided that the producer would receive a better price, require the processor to pay more, and pass that on to the consumer. In other words, we simply turned the tariff around through a device whereby the producer would receive more and the consumer would have to pay for that export debenture, just as he has had to pay more by virtue of the tariff on the finished article.

Mr. FULMER. In other words, make the consumer pay just what he has paid heretofore?

Senator CONNALLY. Yes; the consumer has paid the increased cost just as he has been paying it for a hundred years in the case of the manufactured articles, and in the case of a great number of other commodities that have been imported into this country on which the farmer has been paying the price plus the tariff. They have had to pay that bounty, through the tariff, and the plan here provided is to give the benefit to the cattleman and to the farmer.

Mr. FULMER. Is it not a fact, Senator, that the program has been working out something like this, that as soon as we give the farmer a fair price for his commodities through the program of the National Recovery Administration, prices for the commodities which he purchases have increased so that the farmer after all is not benefiting as much as he otherwise would?

Senator CONNALLY. You are correct, Congressman FULMER. Of course, everything that the farmer buys is affected by the increase resulting through increase in wages, and the benefits to those engaged in the other industry resulting from the program of the National Recovery Administration.

Mr. FULMER. But is not the trouble this, that as fast as the Agricultural Committee here presents legislation and the Department of Agriculture and the Agricultural Adjustment Administration finds some way of doing something for the farmer, in raising his price, that the other industries, through the program of the National Recovery Administration are just placed in position to be a jump ahead of the farmer with the result that everything that the farmer has to buy has increased in price anywhere from 20 to 50 percent over what it was last year?

Senator CONNALLY. Well, I do not want to get into an argument about the other act, Congressman FULMER. But I am very much concerned in meeting this question of how we are going to help the cattlemen because I feel that something must be done for them, to offset whatever additional charges the cattleman has had to pay, and I believe the Department will be able to work out a program if we adopted the suggestion contained in this legislation.

The CHAIRMAN. Any further questions?

Mr. MITCHELL. Why was cattle stricken out from the original act as a basic commodity? I understand it was included originally in the bill.

Senator CONNALLY. I tried to make that clear. Evidently I did not make it clear when I first started. At the time the bill was pending in the Senate the cattlemen's position was represented by Senator Kendrick, of Wyoming, who was a very distinguished cattleman who was largely representing the cattle industry. He was on the Agricultural Committee in the Senate and was very much opposed to placing cattle in the Agricultural Adjustment Act, and most of the cattlemen, apparently, were opposed to it. They were afraid of getting into a program under which they might be taxed in some way. I do not remember all their reasons but at any rate, when the measure came up, cattle were excluded.

Since that time, however, there has been a radical and vital change of opinion among cattlemen, and I believe the overwhelming majority of them are now in favor of including cattle as a basic commodity in the Agricultural Adjustment Act.

Mr. Chairman, I wish to thank the committee for permitting me to appear before you. I beg your pardon for taking so much of your time.

The CHAIRMAN. Thank you very much, Senator CONNALLY, for your presentation.

Senator CONNALLY. I hope the committee will be able to report the bill forthwith and get it over to the Senate so we can act on it over there.

[From hearings of Friday, Feb. 9, 1934, before the Senate Committee on Agriculture and Forestry]

STATEMENT OF HON. TOM CONNALLY, A UNITED STATES SENATOR FROM THE STATE OF TEXAS

Senator CONNALLY. Mr. Chairman, I thank you for the courtesy of granting me this opportunity. I do not have any long, prepared statement with statistics, and so on.

This is the cattle bill. The committee was good enough the other day to report favorably a similar bill by me, and this is the House bill, and the reason I am asking that you also report this bill is that my bill, which was reported favorably, simply puts cattle under the Agricultural Act as a basic commodity. It did not include the clause which this bill carries making an authorization for an appropriation of $200,000,000 to be recouped, of course, through processing taxes, and I was afraid if we did not report this I would not be able to take it up and substitute it for my bill when mine is reached on the calendar. There is no pride of authorship; I want to get the measure through. My idea was that my bill is already on the calendar, and when we got to my bill I would take it up and substitute the House bill for it; but if the House bill has not been reported by this committee, I am afraid I cannot do that.

Senator FRAZIER. Your bill did not carry the $200,000,000?

Senator CONNALLY. No; but that part of it is the administration program. The Secretary of Agriculture is for it and everybody, so far as I know, is for it. It passed the House practically unanimously, so I should like to get this bill out and get it into shape so that I can take it up in lieu of my bill and get it right through.

Senator FRAZIER. This includes dairy cattle as well as beef cattle?

Senator CONNALLY. Yes; it includes dairy cattle, so that the dairy interests are for this as well as the cattle people.

In December I attended a meeting with the Secretary of Agriculture of the dairy and cattle interests, and at that time the Secretary of Agriculture proposed, in substance, this measure: First, to put cattle under the law as a basic commodity, under the act, and then to provide a fund to take care of dairy and cattle interests, to be recouped by a processing tax.

The cattle interests of the country are generally for this measure. My State is the biggest cattle State in the Union, and the president of the association there has wired me and written me that he thinks 90 percent of the cattle interests of our State are favorable to this measure. Recently at a meeting out in Albuquerque of the board of directors of the national association—and while the national association did not take any action because it felt that each State organization ought to express its views—there were 45 Texas cattlemen attending that convention, and 40 of them voted for this measure, expressing their approval of this bill, and 5 otherwise. So that is a pretty fair reflection of the sentiment of the cattlemen.

As you know, cattle is one agricultural product that has not done very well because it is not included. You remember, Mr. Chairman, a year ago the cattlemen themselves asked to be left out of the agricultural bill, and quite a change of sentiment has taken place, and I think if the committee would report this bill favorably and put it into shape where we could get early action on it, it would be a very good thing for the cattle industry.

Senator MCGILL. Senator, under the terms of your bill, the only reason for having the raising of cattle declared a basic industry would be to make it possible that a processing tax could be collected?

Senator CONNALLY. That is largely it; yes.

Senator MCGILL. Do you not understand that the cattle industry generally over the country are opposed to the processing tax on cattle or beef?

Senator CONNALLY. They are very largely, but that thing has been met in this way, Senator: While a great many of them are against the processing tax, yet they realize that something has got to be done about the cattle situation. Now, here is what is going to happen: They have had assurances, I understand, that the Secretary of Agriculture, after this bill shall have been enacted, will call a conference of all the dairy people and the cattlemen here or somewhere, and will undertake to work out a plan, under the act, of handling the situation which will be agreeable to the cattle people. As you know, the powers of the Secretary under the original act are very broad. He can do a lot of things, but the whole plan of this thing—the cattlemen have been here for some time conferring with the Secretary and his agents every day, and they have reached the point now where they think that the best thing that can be done is to pass this act, and after it is passed the Secretary then is going to have these conferences with the cattle people and try to work out something that will be satisfactory to them toward handling the situation.

Senator MCGILL. I am simply speaking from the knowledge I have from communications that I have had from my own State, and out there they seem to be opposed unalterably to a processing tax with reference to beef cattle. I can see that this is a different arrangement, and I can understand why mostly any industry would be willing to take an appropriation of this sort for its own benefit and probably its interest. I am not talking against it, but I think our people are opposed to a processing tax. They figure that a processing tax will be——

Senator CONNALLY (interposing). Will make beef higher.

Senator MCGILL. No; it will just be deducted from the price of the cattle.

Senator CONNALLY. It has a double effect, either way you take it, according to their view. Their view is that if you put it on cattle the consumer will eat hogs, pork, or something else; or if the producer pays it, it will come out of his pocket.

Senator MCGILL. Do you not think that a processing tax on beef cattle would be deducted from the price of the cattle rather than making cattle higher?

Senator CONNALLY. It probably would be a little of both.

Senator MCGILL. Do you not think it would fall right back on the producer?

Senator CONNALLY. To some extent. Probably a little of both. Let me say this to you, Senator: The packers are a big factor in this situation, and it is believed that, if the Secretary of Agriculture has some controlling power over the cattle situation, he can exact more consideration for the cattlemen from the packers than in any other way, because the packers are more or less a monopoly; and if the Secretary of Agriculture is given a little monopolistic power himself, he can probably make those boys act a little better than he can if we just turn them loose on the cattlemen. My information is that the packers made more money last year than they have made in any year for quite a considerable period of time. Well, that is all coming out of the cattlemen.

Senator CAPPER. They have collected a lot of it from the hog raisers.

Senator MCGILL. They have collected it from the men who produce hogs.

Senator CONNALLY. To be sure. That is the situation now.

Senator MCGILL. That did not help the hog producers.

Senator CONNALLY. That is the situation now; but if the Secretary of Agriculture is given a good deal of power in this and works out a plan that is agreeable to the cattle people, he can probably make those packers do a little jumping.

Senator MCGILL. Well, it seems to me that the beef-cattle industry and the hog-raising industry are a good deal in the same situation here.

Senator CONNALLY. That is true.

Senator MCGILL. If we are going to appropriate money for the benefit of the beef-cattle industry, we likewise should appropriate it for the hog industry. Why discriminate between the two?

Senator CONNALLY. I will say frankly, Senator, that the theory is that this sum will be gotten back into the Treasury through some method of processing tax which is hereafter to be worked out. The chances are it will not all get back into the Treasury, because of the law of abrasion there will be rubbed off part of this Government money.

Senator MCGILL. I think it is clear that even under the House bill the processing tax can be used, but the complaints I have had with reference to the pork industry indicates that the producer is the man who finally has to pay the tax.

Senator FRAZIER. Mr. Chairman, I think the House bill carrying this appropriation is an improvement on the Senator's bill.

Senator CONNALLY. Oh, yes; it is.

The CHAIRMAN. That is what he has come here to testify to.

Senator CONNALLY. When I originally introduced my bill, however, it was the understanding that this other was coming along. Congressman JONES, of my State, Chairman of the Committee on Agriculture in the House, and myself have been working absolutely in harmony. He introduced this the first day of the session, simply putting cattle under the Agricultural Adjustment Act as a basic commodity. Later on they worked out this plan of appropriation, so I did not amend my bill but waited till the House got its bill in shape, and I am now here asking the committee to report the House bill.

The CHAIRMAN. So that when his bill is reached on the calendar he can substitute the House bill for his bill.

Senator MCGILL. I agree that this is a better bill; that we had better provide for this appropriation. The only thing that is in my mind here is whether we should not make it possible to levy a processing tax; whether that is a detriment rather than a benefit, either to the hog or the cattle industry.

Senator FRAZIER. The Department is trying that processing tax out; and if they are going to try it out on hogs, it seems to me there would be the chance to make it more effective if we include cattle. I thought so last spring when we had the executive session and voted to put cattle in at that time.

Senator CONNALLY. Let me say, Senator MCGILL, that if they have the power to put the processing tax on, they do not have to do it; but if they go along and find later that it is necessary and they have got no power to do it under the legislation, then we are tied up again. So why not report the bill and give them the power and let them work it out with the cattle and dairy people?

Senator MCGILL. Would you have any objection to putting hogs, pork, under the same category here as you do cattle?

Senator CONNALLY. Are they not there now?

Senator FRAZIER. They are now.

Senator MCGILL. No. They have to have a processing tax, do they not?

Senator FRAZIER. They have; yes.

Senator MCGILL. In order to have any money. We are making an appropriation here for cattle and we are not for hogs.

The CHAIRMAN. But you must remember that hogs are already in the original bill. They are a basic industry.

Senator MCGILL. That is true.

The CHAIRMAN. And they are coming in to be taken care of just as this bill here provides, and they have apportioned in this bill $200,000,000 for the purpose of putting that industry in the same category as the others.

Senator CAPPER. The processing tax is now paid by the hog raiser. The allotments here are to be paid out of the Public Treasury, which is all right with me.

Senator MCGILL. The point I am getting at is this: That it only applies to cattle—beef cattle and dairy cattle. Now, if we are going to appropriate money here for the cattle and dairy industries, I think we ought to appropriate it for the hog industry.

Senator CAPPER. They ought to be on the same basis.

Senator MCGILL. That is the point I am getting at. Would you have any objection to that?

Senator CONNALLY. I do not know hardly what to say about that. Of course, I should like to get the bill up just as it is, but I would have no objection to offering an amendment on the floor. I would not object to it. I should like to get this out quickly, so that we can get some action on it, because I have assurances of the leadership that we can get this bill up pretty promptly if we can get it out.

Senator BULOW. You do not know what the attitude of Secretary Wallace is toward it?

Senator CONNALLY. He is for it. As I stated a while ago, Senator, we had a meeting last December, and this is the Wallace plan. This is his proposal. He is thoroughly for it. We had a big meeting of the cattle and dairy men, and Secretary Wallace really proposed this. This is an administration measure.

Senator CAPPER. As it stands now, he is not planning to levy this processing tax on the cattle raiser.

Senator CONNALLY. He is going to call a conference, Senator, as soon as the bill is enacted, of the cattle and dairy people and work out some plan that they hope will be agreeable to all interests. I cannot say what that plan is going to be, but he cannot do that unless he has got this authority, Senator. Unless we pass this legislation he cannot do anything.

Senator CAPPER. There is a general protest throughout our part of the country against this processing tax being passed back to the producer.

Senator CONNALLY. I know.

Senator CAPPER. And that is what is being done.

Senator FRAZIER. That was not the intention of the original bill.

Senator MCGILL. But that is what happens.

Senator CONNALLY. But they are learning some lessons out of that, and are trying to avoid that situation with regard to this particular product.

Senator FRAZIER. There was a group of representatives of the dairy interests of those Middle and Northern States down here 2 or 3 weeks ago. I had two or three conferences with them and the rest of our group out there, and we also went down to see the Secretary at that time. They wanted $200,000,000 appropriated for dairy cattle alone at that time.

Senator CONNALLY. They worked that out with the Secretary, I am sure.

Senator FRAZIER. Their plan was to have $200,000,000. There are some States that have not cleaned up on the tuberculosis of their dairy cows. They wanted that cleaned up. Then they suggested that surplus dairy cows be purchased by the Government out of this money and distributed to Indian reservations where they did not have any cows, just for the individual families, not in competition in the dairy business, and to some of the southern cotton farmers who did not have any cows—renters, I suppose—to distribute down through there, to take this surplus of dairy cows out of production at present. That was their plan, and the Secretary was quite favorable to it, although he was not sure whether we could get that amount of money or not, and I am satisfied that when this bill gets on the floor of the Senate they will attempt to amend it to increase that amount for dairy cattle.

Senator CONNALLY. Well, they may. But this has the hearty approval of the Secretary and the administration.

The CHAIRMAN. Senator CONNALLY, we are very much obliged to you for coming in and making this statement. This meeting was called and witnesses have been subpenaed on this other matter.

Senator FRAZIER. Can we vote on this bill right now? I think everybody understands it.

Senator CONNALLY. I wish we could.

Senator MCGILL. It is subject to any amendments we want to offer on the floor?

Senator CONNALLY. Certainly.

The CHAIRMAN. I will put the motion to report the bill.

(The motion was put and carried.)

The motion is carried, and it is so ordered.

Senator CONNALLY. I am certainly very grateful to you, Mr. Chairman and members of the committee.

Mr. CONNALLY. Mr. President, there is a committee amendment pending; but I desire to say that I wish to offer a substitute for the committee amendment. I will not press the matter for the moment, however.

The VICE PRESIDENT. The Senator may do that at any time. The question is on the committee amendment.

Mr. VANDENBERG and Mr. ROBINSON of Indiana addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield; and if so, to whom?

Mr. CONNALLY. I yield to the Senator from Michigan.

Mr. VANDENBERG. Mr. President, am I correct that this is the first basic commodity written into the Agricultural Adjustment Act for which a direct appropriation has been proposed?

Mr. CONNALLY. Does the Senator mean since the enactment of the measure?

Mr. VANDENBERG. Yes.

Mr. CONNALLY. So far as I know, this is the first amendment of the Agricultural Adjustment Act adding a commodity.

Mr. VANDENBERG. Or in the act itself? Is there any basic commodity in the act itself which is not wholly dependent upon processing taxes for its revenue?

Mr. CONNALLY. Oh, yes! In the original act, as I understand, funds were provided in somewhat similar fashion to this amendment, for instance in the cotton campaign and in the hog and other campaigns, which were subsequently reimbursed through processing taxes.

Mr. VANDENBERG. Precisely. It was a revolving fund for the purpose of reimbursement subsequently?

Mr. CONNALLY. I shall say to the Senator that if he were here yesterday, he will recall that it was stated that under this bill the Agricultural Administrator will have power to levy a processing tax to reimburse the Government for this appropriation.

Mr. VANDENBERG. I was here yesterday, and that is what disturbs me, because when one of the Senators asked the Senator from Texas something about the processing tax, the Senator from Texas interrupted to say, "If it is ever levied."

Mr. CONNALLY. I did.

Mr. VANDENBERG. Indicating a possibility that under the Senator's prospectus there will be no processing tax.

Mr. CONNALLY. No; on the other hand, Senators who occupied the other position and did not want any processing tax tried to get an admission from the Senator from Texas that there would be none levied; and he expressly stated that that was a matter that the Secretary would determine after the enactment of the bill and the outlining of the program. I do not know whether the Secretary will levy a processing tax or not.

Mr. VANDENBERG. Would it be fair, then, to say—and I am only seeking information—that under the bill as it stands it would rest within the authority of the Secretary to use this $200,000,000 in the nature of a bounty if he so saw fit?

Mr. CONNALLY. I do not think he could do it as a direct bounty, but he could do it if he expended it in carrying out any of the provisions of the Agricultural Adjustment Act.

Mr. VANDENBERG. And he could do it without reimbursement?

Mr. CONNALLY. I rather think he could expend it in carrying out the act, but not in paying benefits directly.

Mr. BORAH. Mr. President——

Mr. CONNALLY. I yield to the Senator from Idaho.

Mr. BORAH. Why was it not thought wise to determine definitely by the terms of the bill whether or not a processing tax should be levied? Why should we leave it open? It seems to me that as a matter of fairness to the cattle industry we should know where we are going.

Mr. CONNALLY. Of course, that is a matter of policy that the Senate can easily determine; but the bill simply puts cattle under the act along with other commodities, to be treated just as all other commodities have been treated under the previous legislation.

Mr. BORAH. In view of the policy which has been adopted with reference to other commodities, we would be justified in assuming that the same policy would be carried out with reference to cattle, and therefore that a processing tax would be laid. Would not that be reasonable?

Mr. CONNALLY. It is reasonable to assume that there will be a processing tax. I cannot say that there will be or that there will not be; but let me read to the Senator the proposed amendment which I shall offer as a substitute for the Senate committee amendment. It is to go in on page 2, line 2. This has reference to the appropriation:

> With respect to the dairy- and beef-cattle industries, to carry out any of the purposes described in subsections (a) and (b) of this section (12), and to support and balance the markets for the dairy- and beef-cattle industries.

That makes the appropriation available to carry out any of the purposes of section 12, subsections (a) and (b).

Several Senators addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield the floor?

Mr. CONNALLY. I do not care to occupy further time of the Senate.

Mr. BORAH. Mr. President, just a moment before the Senator takes his seat. I call attention to the statement of the Secretary, who says:

> I can agree with you, Congressman HOPE, that through a great program, involving a vast expenditure of time and money that it will require the sympathetic cooperation of the great bulk of the cattlemen to make it really effective. And I am inclined to think that it might be just as well, in case of the cattlemen, to make cattle a basic commodity now and after that let the thing lay there until next fall, do nothing, just let the cattlemen suffer from low prices, go ahead and let the whole thing wait to see whether they want a processing tax; let them stew and see how the corn-hog thing comes out, and next fall formulate something, if they want to go without the processing tax, and next fall, when hog prices go up and there has been an increase in hog production and consumption of hog meat and perhaps a shift to the consumption of beef and a compensatory tax is put on cattle, then I think they would like to have the bill, making cattle a basic commodity, so they can avoid the compensatory tax going on cattle.

Just what does the Senator understand by that?

Mr. CONNALLY. The Senator understands that the Secretary was answering the contention of those particular cattlemen who wanted all the benefits of the act, and yet wanted to be guaranteed that there never would be a processing tax. He was replying to that attitude.

Mr. BORAH. As I understand the statement of the Secretary, it indicates very clearly that he intends to levy a processing tax.

Mr. CONNALLY. I so stated yesterday, that he had the power. I do not know whether he is going to do it or whether he is not. I cannot speak for the Secretary in advance; but it is clear that under the bill he has the power to do it if he sees fit to do so. I stated that yesterday repeatedly, and I reaffirm it today.

Mr. ROBINSON of Indiana. Mr. President——

Mr. CONNALLY. Mr. President, before I yield the floor, I desire to appeal to Senators to let us get along with this bill. It is my hope to have it passed today; and I hope Senators will not interpose and discuss extraneous matters if they can avoid doing so.

Mr. MURPHY and Mr. NORRIS addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield; and if so, to whom?

Mr. CONNALLY. I yield first to the Senator from Iowa.

Mr. MURPHY. Mr. President, with respect to the appropriation of $200,000,000, this colloquy occurred in the Senate Committee on Agriculture and Forestry, with Mr. Davis present:

Senator MURPHY. How do you propose to recover this $200,000,000?

Mr. DAVIS. We have not gone into that phase of it, Senator. This appears to be an authorization for an outright appropriation. In that respect, that is a good deal like the $100,000,000 in the amendment last year. It was out of any money not otherwise appropriated.

Senator MURPHY. You do intend to impose processing taxes?

Mr. DAVIS. Yes, sir.

Senator MURPHY. You do not know when you will impose them?

Mr. DAVIS. We would have to impose them when the program first begins, and that should be regarded, I think, as a supplement to the income from processing taxes, so that more money can go out to the farmer, rather than substitute the price.

Mr. BORAH. Mr. President, may I interrupt there?

Mr. CONNALLY. I yield to the Senator from Idaho.

Mr. BORAH. May I ask the Senator from Iowa if Mr. Davis was representing the Agricultural Department?

Mr. MURPHY. Yes; he was.

Mr. BORAH. That leaves no kind of doubt as to what the plan is, it seems to me.

Mr. MURPHY. I have not any doubt in my own mind, I will say to the Senator, that under this bill the purpose and intent of the Agricultural Administration are to impose a processing tax.

Mr. BORAH. I do not think anyone could have any doubt in view of the statement of Mr. Davis.

Mr. MURPHY. Mr. Davis left no doubt of that fact in my mind at the meeting of the committee.

Mr. CAREY and other Senators addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield; and if so, to whom?

Mr. CONNALLY. I yield to the Senator from Wyoming.

Mr. CAREY. I should like to ask the Senator from Iowa whether Mr. Davis did not also admit at the hearing that if processing taxes were imposed, they would be passed on to the producer rather than to the consumer? Does the Senator recollect his testimony?

Mr. MURPHY. I would not quote Mr. Davis as saying that; but Mr. Davis did resist the contention that the processing tax had been passed on to the producer, insisting that there was a twilight zone, and that nobody could determine where the tax went.

Mr. CAREY. It has been admitted that when prices are low, the producer must necessarily assume that tax.

Mr. MURPHY. That is my contention.

Mr. GEORGE and Mr. CAPPER addressed the Chair.

The VICE PRESIDENT. Does the Senator from Texas yield; and if so, to whom?

Mr. CONNALLY. I yield first to the Senator from Georgia.

Mr. GEORGE. Mr. President, I desire to say that in the Public Works section of the National Recovery Act an appropriation of $100,000,000 was carried last year to enable the Agricultural Adjustment Administrator to administer that act. When the bill was passed, and the question of imposing a processing tax upon certain of the basic commodities originally included in the Agricultural Adjustment Act was before the Secretary of Agriculture, the very definite position was taken that the Secretary would impose the processing tax, and he did impose the processing tax, although there were repeated and most earnest and insistent requests that the processing tax on certain of the basic commodities covered by the operations of last year, particularly cotton, be deferred for the time being. As I understood, the Secretary of Agriculture took the position that he was, if not legally bound, at least morally obligated to impose the processing tax for the purpose of reimbursing the Treasury, as well as for the purpose of carrying on the operations of the Agricultural Adjustment Administration under the Adjustment Act.

Mr. HAYDEN. Mr. President, will the Senator yield?

Mr. CONNALLY. I yield to the Senator from Arizona.

Mr. HAYDEN. I desire to ask the Senator from Georgia a question. A processing tax was levied on cotton, as I understand.

Mr. GEORGE. It was levied on cotton.

Mr. HAYDEN. Does the Senator feel that the tax was passed on to the producer of cotton?

Mr. GEORGE. Well, that question would lead to quite a good deal of debate.

Mr. HAYDEN. The statement was made a moment ago, on the other side of the aisle, that it was generally conceded that the producer paid the processing tax. If that was invariably so, it would be true with respect to cotton. The price of cotton has advanced, as I understand.

Mr. GEORGE. The price of cotton has advanced, but my own judgment is that the producer of cotton paid the processing tax last year, as a matter of fact.

Mr. HAYDEN. Was that a temporary situation?

Mr. GEORGE. I do not think so.

Mr. HAYDEN. I ask that question because it has been said that, while the producer might pay the processing tax temporarily, with respect to hogs it was stated that by next fall it is hoped the price of hog products will have so advanced that the tax will not be a burden to the producer.

Mr. GEORGE. I want to say in answer to the Senator from Arizona that the cotton farmers have received benefits under the Adjustment Act, beyond all doubt, and under other administrative measures taken during the year 1933.

Mr. HAYDEN. In the judgment of the Senator from Georgia, would the price of cotton be now as high if no processing tax had been levied?

Mr. GEORGE. I do not think the processing tax had a great deal to do with it. I think that other things that were done, wholly outside and irrespective of any processing tax, have had more to do with the price of cotton. But the benefits were given to the cotton farmer. In the first instance, they were made immediately available out of the hundred million dollars appropriated, but, at the same time, the processing tax was levied; and my own opinion—and I believe it to be the opinion of those engaged in the cotton business generally—is that the producer himself probably absorbed the tax last year.

Mr. HAYDEN. But the producer could afford to do that if he received a higher price for his cotton?

Mr. GEORGE. He did receive a higher price, and he received certain definite and distinct benefits through various operations undertaken.

Mr. HAYDEN. Mr. President, my reason for asking the question is that I have received the following telegram from the president of the Arizona Cattle Growers Association:

Arizona Cattle Growers Association has no serious objection cattle being made basic commodity, but object strenuously to processing tax on beef, because, as beef is competitive commodity, tax would immediately be taken off price of cattle same way it has been taken off price of hogs. With cattle market at present low level, any further reduction in income from sales would be added burden which the industry is unable to stand.

J. M. CARTWRIGHT,
President Arizona Cattle Growers Association.

I am trying to find out from the expressions of the Senator from Georgia how the processing tax worked with respect to cotton, and whether we could entertain the hope that the operation of the entire plan would ultimately effect an increase in the price of beef, so that the producers of livestock will be benefited rather than injured.

Mr. VANDENBERG. Find out how it worked in the case of hogs. That is the better way of ascertaining the probable effect in the case of cattle.

Mr. GEORGE. It is a debatable question, and I have given the Senator the benefit of my own opinion.

Mr. MURPHY. Mr. President, will the Senator from Texas yield to me?

Mr. CONNALLY. I yield.

Mr. MURPHY. In reply to the Senator from Arizona, I will say that there is a fundamental difference between the processing tax on cotton and the processing tax on hogs and beef. That difference lies in the fact that cotton is not a perishable commodity, while beef and hogs are perishable commodities.

I think it is a fundamental truth that if a processing tax is imposed on a perishable commodity of which there is a surplus production, inevitably that tax is taken out of the producer, and we will not be able to collect it from the consumer until such time as the supply falls short of the demand.

The price of beef will be depressed by a processing tax, as the price of hogs was depressed by a processing tax, and the price of beef now being so low, it ought not to be driven lower, and we ought to give discretion to the Department of Agriculture in the imposition of the tax. I myself would make it mandatory, if there were any way of doing it, and provide that the processing tax should not be imposed until such time as consumption should make it possible to raise the price.

Mr. CONNALLY. Mr. President, I send the proposed amendment to the desk and ask that it be read for the information of Senators.

The VICE PRESIDENT. The clerk will read.

The CHIEF CLERK. On page 2, in lines 2 and 3, it is proposed to strike out the words "to make advance rental and/or benefit payments with respect thereto" and to insert in lieu thereof the following: "to carry out any of the purposes described in subsections (a) and (b) of this section (12) and to support and balance the markets for the dairy- and beef-cattle industries."

Mr. BORAH. Mr. President, in connection with the question we have just been discussing, as to where the incidence of this tax will finally lie, I have before me a letter from Swift & Co. with reference to the processing tax on hogs. A farmer in Kerkhoven, Minn., dropped a postal card to Swift & Co. asking for information, and they replied to him as follows:

DEAR SIR: Replying to your post card of February 8, it was undoubtedly intended by the framers of the law that the processing tax on hogs would be paid by the consumer in the form of higher prices. The packer on whom the tax is first assessed was supposed to pass it along.

So far as we are able to tell, it has been impossible to get higher prices from consumers as a result of the tax. What consumers will pay for pork depends upon their incomes, as has recently been shown by the United States Department of Agriculture. Since the imposition of a tax on hogs does not increase the consumer's purchasing power, it does not enable the packer to get more for his pork products.

As you know, pork is highly perishable and must be sold for what the consuming public will pay, whether the price is satisfactory or unsatisfactory. The same is not true of other less perishable products like wheat, cotton, and tobacco, where it has been found possible to pass along processing taxes in the form of higher prices. The packer is in a position where he must sell at a market determined for him by the purchasing power of consumers.

In effect the processing tax has been an added expense to the packer and has had the effect, like he pays for hogs and what he is able to get for pork products. The packer's margin is not wide enough and never has been to enable him to bear the tax himself. It has therefore made the price of hogs lower than it would otherwise have been.

In my judgment, that is precisely what would happen with reference to cattle.

Mr. CAREY. Mr. President, does not the Senator believe that if the $2.25 processing tax which is being imposed were not imposed, the producer would be receiving that additional money in the price of his hogs?

Mr. BORAH. I should think so.

Mr. CAREY. I think so. I think it is simply taken out of the price.

Mr. BORAH. Undoubtedly the packers are taking it out of the price of hogs.

Mr. TYDINGS. Mr. President, is it not the opinion of the Senator from Idaho that the higher we make the price of hogs, through any process, whatever it may be, the less consumption of hog meat there will be?

Mr. BORAH. Undoubtedly. What has happened is that they have passed this tax on to the producer of hogs. He has paid it, and the price of his hogs is that much lower.

CANCELATION OF AIR-MAIL CONTRACTS—OPERATIONS OF N.R.A.

Mr. ROBINSON of Indiana. Mr. President, referring again to the ruthless cancelation of the air-mail contracts by the administration, and the tragic results which followed the Executive order directing the Army fliers to carry the mails, I have an editorial, published in the Logansport Press a day or two ago, under the caption: "Farley, Air Mail, and Death", which I ask to have read from the desk by the clerk.

The PRESIDING OFFICER (Mr. GEORGE in the chair). Without objection, the clerk will read.

The Chief Clerk read as follows:

[From the Logansport (Ind.) Press]

FARLEY, AIR MAIL, AND DEATH

What mail do the Army planes carry one half so precious as the lives of the flyers?

When Postmaster General Farley launched his age-old political trick of the ins building themselves up by showing the shortcomings of the outs, he visioned the drama, the snap, the headlines, the partisan plaudits, the "turn the rascals out!"

Always with himself basking beneath the halo of the good and faithful servant of the public.

And, to show that he, Postmaster General Farley, is a man of infinite resource he had his alternative ready for the time when commercial flying of the mail should cease, "The Army will fly the mail!"

Terse, dramatic, looked good in headlines—but it meant death and disaster to boys who bravely jump at a task set them by a fat, sassy, plausible politician safely on the ground.

All the mail carried is not worth one of the lives that have been lost.

Why, in the name of humanity, did the Postmaster General have to fix on this homicidal alternative? Is this ghastly thing also a product of the "brain trust"?

Suppose the Postmaster General felt it his duty to cancel the contracts to fly the mail—what then?

Is there law requiring that this circular and that market letter and this pep letter to salesmen be carried in the air?

Why could it not have been carried as mail has always been carried up until a few years ago?

Is industry so booming, is business so rushing, that the trains could not handle it, at least until the flyers were trained in the courses and the new work set to them?

In the greatest years of boom prosperity the mail seemed to get there on trains. Business was a whole lot better and faster than it is now. And the mail was heavier.

What emergency exists to throw untrained flyers into the break of political scandal? Whether or not Postmaster Farley was right or wrong in revoking the air-mail contracts is not the question.

The question is: Why, in the name of God, he cannot put the mail on the trains until this matter is settled or until his Army flyers have a chance for their lives?

Postmaster Farley before becoming a statesman and a king maker was a member of the New York Boxing Commission. It was a lousy, corrupt thing dealing with the dregs of humanity and his record for a short turn and a crosscut was an odorous thing on all the sports pages of America.

Someone, some person, should tell him that he cannot send a clean-cut American boy aloft to certain death with the same nonchalance that the boxing commission sent "set-ups" into the boxing ring to be brutally beaten in order to build up the reputation of some favored slugger in whose fistic destinies some of Farley's political cronies held an interest.

President Roosevelt is a genuine humanitarian. Six flyers have already been done to death in this crazy, irrational thing. We believe that the man who can grieve for the afflicted child can also feel for the relatives of these boys who are sent into unknown and needless danger as pawns on the politician chessboard.

Until the Government is prepared with experienced mail flyers let the mail be carried on trains, on auto—even by horse and buggy—rather than this holocaust which has a Nation wondering "who will be next?"

Mr. ROBINSON of Indiana. Mr. President, further, in connection with the cancelation of the air-mail contracts, there was published on the front page of the Washington Star, Monday, March 5, 1934, an article by the Associated Press, the headlines of which read as follows:

Morgan revealed air-stock seller as cancelation of pacts neared. Evidence 4,500 shares of United Aircraft was disposed of is given to Senate committee. "Leak" among Federal officials being hunted.

I will read this much of the story:

Evidence that J. P. Morgan, head of the big banking house bearing his name, sold a block of 4,500 shares of United Aircraft stock within 2 weeks before Government cancelation of the air-mail contracts, was presented today to the Senate Banking Committee.

Morgan's name was on a list—submitted to the committee by the New York Stock Exchange—of those who sold more than 1,000 shares of the air-transport stocks from a long position within the 2 weeks before cancelation.

Then further down in the article appears this item:

Morgan was listed as selling the 4,500-share block of United Aircraft through Richard Whitney & Co.

So it appears, Mr. President, that the international bankers knew all about the proposed cancelation before it took place. It would be interesting to know how the House of Morgan learned that the contracts were to be canceled. Evidently the money changers have not been driven out of the temple.

I note in another part of the article it is said that James Seligman also sold 800 shares of United Aircraft, 12,400 shares of Curtiss-Wright, and 5,200 shares of Douglas Aircraft. I understand James Seligman is of the Seligman Banking House, with which Mr. Earle Bailie was connected, the Mr. Bailie who was the right-hand man of the present Secretary of the Treasury, Mr. Morgenthau, until the latter's confirmation itself was held up by the Senate Finance Committee until he should get rid of Bailie. Evidently the Seligmans, as well as the international bankers generally, knew all about the proposed cancelation.

All this, Mr. President, is certainly food for thought for the American people in connection with one of the most ruthless, high-handed actions ever taken by an administration in the history of this or any other country.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Indiana yield to the Senator from Louisiana?

Mr. ROBINSON of Indiana. I yield.

Mr. LONG. I wonder if the Senator did not know that in the case he was speaking of the bankers were just pursuing an ordinary course. It is nothing out of the ordinary. I should like to call the Senator's attention to the fact that when the bankers discovered what was being done in Cuba, and the Chase National Bank's confidential report showed that the loans were being carelessly spent and that the funds were being squandered, and when all the other illegalities that were being committed by Machado were discovered by them, the result was that they promoted a little stock offering to the public and cleared the vaults of the Chase National Bank of the Cuban securities and put them out to the public. The bankers are now fixing to see if they can clear up this air-mail business, penalizing the general public in order to take care of the matter. It is only customary with these big men that when they wish to cancel out something they have, they pawn it off on the little man a few days ahead of the time an unfavorable situation becomes known. I think the Senator is just wasting time in discussing it. It is nothing out of the ordinary.

Mr. ROBINSON of Indiana. I thank the Senator for his observation.

Mr. President, there are other concerns that evidently sold the aircraft stock with advance knowledge. There was published last night in the Washington Star a long list of the short sellers, the names of whom I shall not mention at this time.

It now develops, Mr. President, that in connection with the so-called "air probe" one man, at least, close to the administration, has had enough of it, and complains rather bitterly. Last night the Washington Star carried a story, again by the Associated Press, with the following headline:

James Roosevelt assails air probe. Declares Democrats on committee owe apology to Adams.

The story follows:

LOWELL, MASS., March 6.—James Roosevelt, in an address before the combined service clubs of this city last night, described as "absolutely silly" that phase of the air-mail contract investigation involving Charles Francis Adams, former Secretary of the Navy.

He declared the probe has become "focused on personalities", and added that Democratic members of the investigating committee owe the former Hoover cabinet member an apology for summoning him to Washington.

James Roosevelt is the son of the President of the United States. So much for that, Mr. President.

While I am on my feet I desire to mention an incident that took place with reference to the N.R.A. A great deal was said here yesterday and the day before about the accomplishments of the administration during the past year. Much has been made of it by members of the Democratic Party and representatives of the President on this floor and elsewhere. But apparently all is not well.

I suppose the cornerstone of the President's recovery program, probably the foundation for it all, is the N.R.A. It has been brought out on the floor of the Senate by distinguished Members of this body and by others throughout the country that the N.R.A. works under the present set-up in the interest of big business, but the little business interests throughout the country are finding small opportunity under this despotic sway. Evidently the President knows that by this time.

At the end of the first year of the present administration the President addressed a great assembly of business men and citizens in this city, in the Auditorium. Anyone would have thought, if all we read be true of the great recovery that has taken place, that that audience would have warmed up to the occasion. As a matter of fact, the Washington Daily News, which has been very friendly to the administration, published a report of that meeting which was addressed by the President. The meeting must have been very disappointing to the administration, from the story that appears in this newspaper which is so very friendly to the administration. The article is written by Martha Strayer and is entitled:

ROOSEVELT AUDIENCE WEARS POKER FACE, SITS ON HANDS

I send the article to the desk and ask that it may be read by the clerk.

The PRESIDING OFFICER. The clerk will read the article.

The Chief Clerk read as follows:

[From the Washington Daily News, Mar. 5, 1934]

ROOSEVELT AUDIENCE WEARS POKER FACE, SITS ON HANDS

By Martha Strayer

President Roosevelt will never face a tougher audience than the 4,000 American business leaders who heard him open the big code conference today at Constitution Hall.

They brought along their poker faces and sat on their hands.

They made one of the most amazing gatherings of the Roosevelt or any other administration.

Every seat of the 4,000 in Constitution Hall was taken, and there were two overflow meetings of people who wanted to get in and couldn't. Outside the doors were other hopeful souls who asked ticketholders, sotto voce, if they had any extras they weren't using.

Inside there was the Marine Band, in scarlet coats, out of sight in the orchestra pit and playing a concert for the half hour before the President arrived.

On the stage were Frances Perkins, Frances Robinson, Democratic Cabinet members, Senators, and others high in official life.

In the boxes were Cabinet members' wives, and other well-dressed women.

On the main floor and in the balconies were rows and rows and rows of men, with a very small scattering of women.

The meeting was opened like a session of Congress, with a prayer by Senate Chaplain ZeBarney Phillips.

An elevated platform was in the middle of the orchestra, supporting at least half a dozen sound-picture machines and operators.

There were Klieg lights above to play on the President, and flashlights of many exploding camera bulbs.

"The President of the United States", said Gen. Hugh Johnson, introducing Roosevelt.

The President began.

It was 5 minutes before he got even a flicker of applause.

He said, to an accompaniment of deep silence:

"For your support I give you my thanks."

When he quoted a question which has been much on the lips of American people, answering critics of N.R.A.:

"Well, what do you suggest?" there was a spontaneous burst of laughter.

When he said:

"One thing is very certain: We are not going back either to old conditions or old methods", Senator GEORGE NORRIS led the applause which came closer to rocking the building than at any other time in the speech.

The meeting was held up after his address until General Johnson could return after accompanying the President to the overflow gatherings.

Mr. ROBINSON of Indiana. Mr. President, evidently among the people themselves, if we get away from the ballyhoo of the administration and the propaganda, certain features of the program, notably the basic structure—the N.R.A.—are not so popular with the country.

This morning there is published in the Washington Herald an editorial on the front page entitled, "Government by Personal Whim Is Despotism." I shall not read it all, but just a paragraph or two, and then ask that the entire editorial may be incorporated in the RECORD in connection with my remarks. Some of these statements are startling:

We are advancing fast toward absolutism. We are retreating fast from constitutional democracy.

Encroachment after encroachment upon popular liberties follow one another.

Usurpation leads to further usurpation of dictatorial authority.

The President seems to think he can easily enlarge his already extended powers by merely weaving into a request for new authorizations some passing reference to the "existing emergency" and the "prevailing unemployment."

This is the familiar balustrade upon which he again leans in casually asking Congress for power personally to negotiate and conclude tariff treaties without their submission to the Senate for ratification, without recommendation or guidance by the Tariff Commission, without check from any quarter, without the concurrence of any other person or official body, without revealed method or proven principle or established precedent or even thorough survey of the facts.

Autocratic authority is so substituted for constitutional prerogatives and procedure.

The President becomes the panjandrum of American business, with power, by personal treaties, independently of any action by the representatives of the people, to raise or lower tariff rates 50 percent in all trade bargaining with foreign nations.

I shall read no more of the editorial, Mr. President, but I want to point out at this juncture if the bill giving the President alone and single handed the power to deal with foreign nations in tariff matters shall ever pass both Houses and become a law, that will be the end of the war debts. If the Congress should vote to him the complete power that is concealed within the bill as proposed, then he would have absolute authority to cancel the war debts, notwithstanding the fact that the American people, to the extent of at least 90 percent, are opposed to any such procedure.

Let the Senate take warning. If that bill shall be enacted, the majority in the Congress will be giving the President of the United States the power, himself alone, without ever referring it back to the Senate or the other House of Congress, to do that thing against the interests of the people of this country which Congress has solemnly said no President should do, namely, cancel the debts. I ask at this point that the entire editorial, a part of which I have just read, may be incorporated in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The editorial is as follows:

[From the Washington Herald, Mar. 7, 1934]

We are advancing fast toward absolutism. We are retreating fast from constitutional democracy.

Encroachment after encroachment upon popular liberties follow one another.

Usurpation leads to further usurpation of dictatorial authority.

The President seems to think he can easily enlarge his already extended powers by merely weaving into a request for new authorizations some passing references to the "existing emergency" and the "prevailing unemployment."

This is the familiar balustrade upon which he again leans in casually asking Congress for power personally to negotiate and conclude tariff treaties without their submission to the Senate for ratification, without recommendation or guidance by the Tariff Commission, without check from any quarter, without the concurrence of any other person or official body, without revealed method or proven principle or established precedent or even thorough survey of the facts.

Autocratic authority is so substituted for constitutional prerogatives and procedure.

The President becomes the panjandrum of American business, with power, by personal treaties, independently of any action by the representatives of the people, to raise or lower tariff rates 50 percent in all trade bargaining with foreign nations.

Conceding the virtuous intentions of the President and without dwelling upon the naive insensibility to business actualities revealed in his proposals, it is manifest—clear beyond all shadow of doubt—that this power should not be given at all.

The authority belongs to Congress and should be exercised by Congress!

If Congress, in its servile desire to surrender its functions, should confer more of its powers on the President, that power in this instance should be limited strictly to the right to raise tariff rates as a reprisal for prohibitive rates or quotas imposed by foreign nations on American products.

This power would at least be the right to defend American industry.

But the power to lower tariff rates 50 percent is the power to destroy American industry!

It is the power to cripple the 95 percent of production and employment which supplies domestic markets in order to favor the 5 percent which competes in foreign markets.

Such a policy is not only allowing the tail to wag the dog; it is destroying the dog to save the tail.

And the tail would be utterly valueless without the dog, not only in the simile but in the actuality.

There is another reason—although no other reason is needed for not giving the President power to make these bargains with foreign nations—and that reason is that the bargains will not be scrupulously carried out by foreign nations, most of which are unreliable in their dealings with America, and some of which are definitely dishonest.

The American Government is an utter innocent in the diplomatic field, and the foreign nations know it.

They borrow money of us and do not pay it. They make agreements and do not keep them.

To use the popular phrase, they are sharpers and we are hicks. We play their shell game and they make fools of us.

We buy their green goods and they laugh at us. We lose our money, and they take it and spend it to compete with us.

We labor under a load of taxation inherited from their war, and they show their appreciation by piling their taxation upon us on top of our own.

They have not even the gratitude which a sharper should show toward the simpletons who support him.

If we open our home markets to their goods, on their worthless pledges, we will find that we have sacrificed American industry and American labor for a bond that is without value, and a word that is without honor.

Take Mr. Roosevelt's historic apple swap, an example of ingenious innocence which has never been matched in the whole history of our fatuous foreign relations.

Under this arrangement the United States permits the entry of some $10,000,000 worth of French wines and France agrees to allow the importation of some $1,000,000 worth of American apples.

For some reason or other even this one-sided agreement has not operated reciprocally, various shipments of American apples having been left to rot on the French docks or seek a market elsewhere.

We confidently leaned again on the broken reed of French sincerity and honest intent, and experienced the usual consequences.

What reason have we to believe or to hope that other bargains would be more scrupulously kept, or that the United States can ever depend on the pledges of nations which repudiate their debts and dishonor their agreements?

The reaction of Congress to this startling proposal of the President's will be watched by thoughtful Americans with profound concern.

Perhaps it is with the issue here presented that real recovery in the United States will begin—the recovery of itself and its self-respect—the recovery of its constitutional rights, its independence, and its liberty.

Mr. VANDENBERG. Mr. President——

Mr. ROBINSON of Indiana. I yield to the Senator from Michigan.

Mr. VANDENBERG. I should like to call the Senator's attention to a really challenging hazard. Many of us were constrained to object when the money bill permitted the

Secretary of the Treasury, in his unaccountable and unaudited wisdom, to play with $2,000,000,000 in the dark. The domestic market is worth $90,000,000,000, and, if it was hazardous to permit one executive to play with $2,000,000,000 in the dark, it is 45 times more hazardous to permit another executive to play with $90,000,000,000 in the dark.

Mr. ROBINSON of Indiana. The Senator is exactly right, Mr. President, and I am grateful to him for the suggestion. As a matter of fact, it is my opinion that the Senate of the United States will never cease to regret the day it turned over $2,000,000,000 of the people's money to the youthful Secretary of the Treasury with which to gamble in the international poker game. The truth is that there he sits in with those who know so much more about that game than he does that there is no comparison. In my opinion, inevitably the entire $2,000,000,000 will be lost, while at the same time the veterans of the war are positively refused any consideration as far as the $2,000,000,000 due them is concerned. We turn that vast amount over to a young man, the Secretary of the Treasury, with utterly no experience, to gamble away as he pleases for a period of 3 years, and even the Senate cannot question him as to what he may do with it. Furthermore, as has been suggested, he has no definite policy at this moment. He has $2,000,000,000 and does not know today what to tell the people he proposes to do with it. He has, by his own statement, no policy of any kind. So far have we drifted, Mr. President, from safety.

LIMITATION OF INCOMES AND WEALTH

Mr. FESS obtained the floor.

Mr. LONG. Mr. President——

Mr. FESS. I yield to the Senator from Louisiana.

Mr. LONG. I thought I had the floor. I beg the Senator's pardon.

Mr. FESS. I yield to the Senator.

Mr. LONG. Mr. President, I want to call the attention of the Senator from Mississippi [Mr. HARRISON] and of the Senate to Senate Joint Resolution 65 and Senate Resolution 113, which I have offered, and I want to ask that, following the disposition of the present unfinished business, they become the unfinished business of the Senate.

The PRESIDING OFFICER. Is the Senator from Louisiana submitting a request for unanimous consent?

Mr. LONG. I am asking unanimous consent or I will ask the consent of the Senate.

Mr. McNARY. Mr. President, what is the nature of the Senator's request?

The PRESIDING OFFICER. The Senator from Louisiana requests that, immediately following the disposition of the pending bill, Senate Joint Resolution 65 and Senate Resolution 113 be taken up for consideration.

Mr. LONG. Mr. President, for the information of the Senator from Oregon, I will read Senate Resolution 113, if the Senator from Ohio will permit me. It is as follows:

Resolved, That it is the sense of the Senate of the United States, and that it accordingly does instruct the Senate Finance Committee, that it reform all revenue bills coming before it during the Seventy-third Congress, so that no person shall have an annual income in excess of $1,000,000; so that no person during his or her lifetime shall receive by gifts, inheritances, or other bequests more than $5,000,000; and so that all estates shall be limited so as not to exceed $50,000,000 to the person, all surplus above such allowances to become payable to the Government, in cash or in kind, on such terms as may be prescribed by said Finance Committee.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana?

Mr. HARRISON. Mr. President, this is a resolution which expresses the sense of the Senate. It is not a resolution that calls for any expenditure. It seems to me that the better procedure would be that when the revenue bill reaches the Senate the Senator offer his amendment to the bill at that time.

I have no objection to the Senate expressing its sense at any time. The resolution does not come within the category of resolutions which first have to go to a standing committee. I think the better plan in this case would be to wait until the revenue bill comes to the Senate and then offer an amendment accordingly.

Mr. LONG. The purpose is to work out the matter in the committee. In other words, it can be much more readily worked out in the committee than on the floor of the Senate. If the Senate decides to carry out the program which our President has announced, then I propose to make the method of its confirmation very practical rather than to undertake to consider it on the floor of the Senate. It would save much time. Perhaps my resolution will not be adopted, though I very much hope it will not be defeated.

Mr. McNARY. Mr. President, I feel precisely as does the Senator from Mississippi [Mr. HARRISON] that probably some day we should vote upon the resolution. I protest the practice of piling unanimous-consent agreements one upon another. I have no objection to making the resolution a special order at some time. But we have a unanimous-consent agreement under which we are now working. To add to that another is not a practice which I am inclined to follow and therefore I must object.

The PRESIDING OFFICER. Objection is made.

Mr. LONG. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. LONG. I ask the attention of the Senator from Arkansas [Mr. ROBINSON]. We are recessing now from day to day. What is before the Senate when we get through with the bill in charge of the Senator from Texas [Mr. CONNALLY]? Is it the Great Lakes-St. Lawrence Waterway Treaty?

Mr. ROBINSON of Arkansas. Mr. President, there has been no arrangement with reference to the order of business beyond the present bill and beyond the arrangement that at 2 o'clock today the Senate shall interrupt its consideration of the present unfinished business to consider a nomination on the Executive Calendar.

Mr. McNARY. Unquestionably the unfinished business is the Great Lakes-St. Lawrence Waterway Treaty.

Mr. ROBINSON of Arkansas. It is not the unfinished business in a technical sense, but there has been an agreement made to vote on the treaty at a definite time.

Mr. McNARY. In a parliamentary sense it is the unfinished business.

Mr. LONG. Then, one might demand the regular order at any time?

Mr. McNARY. To enter into a unanimous-consent agreement such as is now proposed would have the effect of displacing the treaty. I think I have made my position clear as to procedure.

Mr. ROBINSON of Arkansas. The unfinished business as a matter of fact and of law is the bill in charge of the Senator from Texas [Mr. CONNALLY]. There is a unanimous-consent agreement which implies an obligation to bring the Great Lakes-St. Lawrence Waterway Treaty before the Senate whenever some Senator wishes to discuss it.

The PRESIDING OFFICER. May the Chair suggest that the treaty is executive business and not legislative business.

Mr. ROBINSON of Arkansas. Yes; it is an executive matter.

Mr. HARRISON. Mr. President, will the Senator from Arkansas yield for a suggestion?

Mr. ROBINSON of Arkansas. Certainly.

Mr. HARRISON. Of course if we take an adjournment, the resolution of the Senator from Louisiana could come up during the morning hour. I have no doubt the Senator from Arkansas will have no objection to having a morning hour soon during which the resolution could be laid before the Senate.

Mr. ROBINSON of Arkansas. I shall be very glad to move an adjournment when the pending bill shall have been disposed of.

Mr. HARRISON. I do not want to commit myself as to whether or not I shall make a motion to table the resolution of the Senator from Louisiana or to refer the resolution to a committee, but it does seem to me it would be

perfectly proper that we should have a morning hour sometime soon when we could take it up for disposition.

Mr. LONG. The only trouble about that is that if my resolution gets into the hands of the committee, the chairman of which is opposed to its consideration, it might never again come back to the floor of the Senate. That is why I want to get action on the floor of the Senate if I can.

Mr. ROBINSON of Arkansas. I shall be glad to move an adjournment of the Senate when the pending bill shall have been disposed of. If it suits the convenience of the Senate and the debate on the pending bill is to be prolonged somewhat indefinitely, I may do that earlier.

NOMINATION OF DANIEL D. MOORE—AGREEMENT FOR EXECUTIVE SESSION

Mr. HARRISON. Mr. President, I desire to submit a proposed unanimous-consent agreement. I ask unanimous consent that at 2 o'clock on Friday, March 16, the Senate proceed to the consideration of executive business and to the consideration of the nomination of D. D. Moore to be collector of internal revenue, district of Louisiana. The nomination is now on the Executive Calendar.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The unanimous-consent agreement was reduced to writing and entered, as follows:

Ordered, That at 2 o'clock p.m. Friday, March 16, 1934, the Senate shall go into executive session to consider the nomination of Daniel D. Moore to be collector of internal revenue for the district of Louisiana.

INCLUSION OF CATTLE AS A BASIC INDUSTRY

The Senate resumed the consideration of the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes.

Mr. FESS. Mr. President, in reference to the bill which is the unfinished business and which proposes to enlarge the operations of the Agricultural Adjustment Act by amending it so as to include cattle as a basic commodity, I only wish to say that I cannot support the proposal. I do not want by my vote or voice at any time to indicate that I approve, first, of delegating to the Secretary of Agriculture such authority, and, secondly, after he has gotten it, of enlarging it. I would take it away from him as soon as I could by voting a repeal of the act which gave the authority in the first place.

I was opposed originally to the passage of the act. It was passed under the statement that it was to be purely an emergency measure; that it was temporary in character, to be repealed when the President declared the emergency ended. But we are now being told from the highest circles in the Government that the emergency legislation is not to be temporary, but is to become permanent law. We need not go further back than the statement on last Monday of the President of the United States and consider what he asked in reference to the control of industries in the country.

I should assume that any fair-minded person, considering an experiment which had been such a hopeless and admitted failure as the Agricultural Adjustment Act has been since it has been operating, would not only concede the unwisdom of the original act, but would be glad to vote to repeal it at the earliest opportunity.

In relation to the operation of the Agricultural Adjustment Act as to the several items that have been covered—and Mr. Davis, who is the best authority on it, says of the 7 articles 6 have been covered—I know of no instances where failure has been so glaring, and admittedly so, as in this governmental experiment. We were first told that the only way we could increase the price of commodities on the farm was either by increasing the demand or decreasing the production. I agree with that principle. That is a sound economic announcement. The truth about the matter is that prices cannot be determined by government. Of course, we can say that the price shall be such a figure, but that would mean a total divorcement between price and value. Whenever price is artificially fixed with no respect to value, it cannot be a success, as everyone must know. The difficulty about price fixing by the Government is that we yield to impulse rather than to common sense, and we fix the price not with regard to the value of the article, but with regard to the convenience of obtaining a greater return in order to be able to liquidate our debts.

Mr. LONG. Mr. President, I hope the Senator will pardon me. I have tried to get the floor to propound an inquiry.

Mr. FESS. Let me announce to my friend from Louisiana that we are to go into executive session at 2 o'clock, and I do not want my time before 2 o'clock to be used up.

Mr. LONG. I shall not use over a minute and a half.

Mr. FESS. I yield to the Senator.

Mr. LONG. I ask the attention of the sponsors of this bill on both sides of the Chamber. I desire to find out whether the formula upon which we were proceeding with reference to the processing tax on hogs has been applied as we were given to understand it would be.

This is from Mr. Mordecai Ezekiel. It is the table that was to be applied to hogs under the processing tax. Says Mr. Ezekiel:

> The price for each month may be conceived as represented by a small black ball, suspended above the line for its own date, at the height of the average price for that month, and as far over from right to left as indicated by the supply for that month. There would necessarily be only one ball for each month. These balls, however, would all be very close to the demand surface, a little above it for those months when the actual price was higher than the price as shown by the correlation formula and a little lower for the months when the actual price was a little below the estimated price. In general, however, it would be seen that the demand surface approximated the position that these prices occupy as they were thus suspended through space and time.

[Laughter.]

I desire to find out whether or not this formula has been applied.

Mr. FESS. I assume that it has been, because nobody knows what has resulted from it except failure.

On the subject of hogs, we have the following statement from Mr. Davis, found on page 1023 of the hearings before the House Committee on Appropriations on this year's appropriation bill for the Department of Agriculture:

> Our spring farrowings in 1933 were so heavy that it was evident that this winter was going to see a condition where farmers could not even market the hogs that they would produce at any price. That is what we were facing. So the farm groups set up a committee, at our suggestion, which brought in a recommendation for an emergency purchase of a surplus of pigs under 100 pounds, and we bought 6,200,000 head in the late summer of 1933.

I should like to have my friend from Louisiana note this formula.

The original proposal was to purchase 2,000,000 brood sows and 4,000,000 small pigs and take them off the market. When the Government agents came to purchase the pigs, they offered such an attractive price that everybody was willing to sell the pigs.

A friend and neighbor of mine, who is a large farmer, decided that he would sell half of his pigs at the price that was announced. His pigs averaged 50 pounds in weight, for which he got $5.10 a head. He had a lot of old corn, however, and he wanted to feed it, and he thought that would be a profitable thing to do. So he retained one half of his pigs, about 100 in number, and fed his corn 9 bushels to the pig, and brought the 50-pound pigs to 210 pounds. He had sold his 50-pound pigs for $5.10 a head, as I remember. He fed 9 bushels of corn a head to the others and brought them to 210 pounds, and sold the 210-pound hogs for 10 cents more than he had sold the 50-pound pigs for. That is the way the program operates.

How did this come about? The farmer urged the sale of his pigs at the high price; and the Government, instead of purchasing 4,000,000 pigs, purchased, according to this statement, 6,200,000 at the high price; and instead of purchasing 2,000,000 brood sows, it purchased only 220,000. In other words, the Department purchased 1,800,000 less brood sows than the program because the farmer was not inclined to sell a brood sow when he could sell a pig at such a high price. The result was that with the purchase of these hogs at a very high price the Government found that we had a

greater amount of hogs for sale than we had previously had, because the method adopted made it profitable for the farmer not to sell the brood sows but to sell the pigs at a high price.

That is the practical application of the effort to reduce the quantity of pork.

I want to say frankly that I think the announcement of the Secretary of Agriculture that the only way prices can be increased normally is either to increase the demand or to decrease the production is correct. The idea of increasing the demand is the natural one, the rational one, but it is very difficult to carry out. If we knew how to increase consumption, whether by individual units or in the aggregate, that would bring about an advance in the price of a farm product; but there is a limit to the satisfaction of appetite, especially for food. The only way in which the demand for a food can be increased is to increase the purchasing power of the individual who now purchases a quantity below his desire. If we could put to work every individual who is unemployed, we should increase the demand; but we all know that the power to increase the demand for farm products is limited. No one knew that better than the Secretary of Agriculture; so he decided that the relief was not in the direction of increasing demand, but that it lay in the direction of reduction of production.

No one knows better than the Presiding Officer at this moment (Mr. GEORGE in the chair) how difficult it is to bring about reduction of production when 6,000,000 people are engaged as the producing agencies. Our Democratic friends have been afraid of that method, and I have much sympathy with the position they took. In their platform of 1928 they announced what I regard as rather a sound position. They say:

> Industrial production is largely under human control, while agricultural production, because of lack of coordination among the 6,500,000 individual farm units and because of the influence of weather, pests, and other causes, is largely beyond human control.

Therefore they offered this announcement as a plank in their platform against the effort to solve the agricultural problem through reduction of production.

I have heard the Senator from Oregon [Mr. MCNARY], on this side of the aisle, emphasize the difficulty of undertaking to limit production on the farm, first, because it is so difficult to do, and, secondly, because it might bring us to a position where somebody would starve. It is very easy to see that if we should reduce acreage, and then there should be a bad crop, production might be so small that there would not be enough foodstuffs produced in the United States to satisfy our own demands.

I recognize that fact, and I mention it to indicate that, although the program of the present Secretary of Agriculture is along the line of reducing production, which would be a basis for increase of price if it were successful, yet it is rather a dangerous policy to establish as a fundamental principle; but I am perfectly willing to go along with the theory that reduction of production of agricultural crops would definitely increase the price of the product. When, however, we come to put the principle into practice, it breaks down, because the desired result is so difficult to bring about. In the first place, there is such a number of units, disorganized and independent, that it is almost impossible to get action, and, in the second place, if a farmer is paid a sum of money to induce him to reduce his production of any one of the commodities upon which the Agricultural Adjustment Act operates, and it is made an advantage, from a monetary standpoint, for him to reduce his acreage, he can very easily, knowing that a good price is to follow, take the money he receives and purchase fertilizer and cultivate his land intensively, with the result that out of the reduced acreage he will produce a greater crop than he produced before his acreage was reduced. That is what has happened with respect to cotton. We paid $160,000,000 to the cotton farmers as an inducement to them to cut down cotton production. Then we wake up to the fact that upon the reduced acreage they are producing a crop almost equal to what had been produced before the acreage was reduced. That is human nature, and the situation cannot be reached by agreement. There are too many people involved in the agreement.

Mr. VANDENBERG. Mr. President, will the Senator yield?

Mr. FESS. I yield.

Mr. VANDENBERG. The net result does not flow merely from natural causes. It is, precisely as the Senator has indicated, the result of human causes, and I point the Senator's attention to the fact that the Southern Railway announces that it has hauled four times as much fertilizer this year as ever before.

Mr. FESS. Precisely. If a farmer had 20 acres of wheat last year, and was required to cut it to 15 acres, he could, with a little money, purchase sufficient fertilizer to produce on his 15 acres a greater yield of wheat than he did on the 20 acres, and the Government would have no right to interfere with him if he should want to do it. In other words, while I admit that the theory of reduction may be sound as an economic principle, it is simply impracticable, as has been shown in the cotton and hog experiments.

Mr. BORAH. Mr. President, does the Senator admit that the reduction of acreage is sound in principle, at a time when half the people in the world are hungry and ill clad?

Mr. FESS. I do not think I would want to admit that the theory is sound. I mean that it is sound as a basis of increasing prices.

Mr. BORAH. The purchasing power of people is constantly falling as production falls. That is happening now, and unless purchasing power is restored, or is at least kept to the point where it now is, reduction serves no purpose in the way of raising prices, because the farmer who reduces his acreage will get a lower price for his product. It seems to me that our problem is not reduction but restoration of purchasing power to those whose purchasing power is now so low that it causes what seems overproduction. If those who need food could buy food, there would be no overproduction.

Mr. FESS. I think the Senator is correct in that respect. My contention is that if the purpose is to increase the price, if the quantity of the commodity produced is less, naturally the price will be increased accordingly, but if the burden of the purchaser is increased, then, of course, the price may decrease. The Senator means that in the long run the price will go down.

Mr. BORAH. What we do is to say that half the human race is hungry and poorly clad, therefore we will destroy food, and we will destroy clothing. Is that a sound principle?

Mr. FESS. No. I recall what the Senator from Kansas said the other day, to this effect, "You cannot make me believe, at a time like this, with so many people needing food, that it is a sound principle to destroy food." I think the Senator from Idaho is absolutely correct. What I am trying to bring out is that as an economic principle, if the purpose is to increase the price, a reduction in the yield of the product would naturally eventuate into that result.

Mr. President, in order to get away from the human element, which takes advantage of an agreement such as has been entered into by the Secretary of Agriculture, there is a proposal to make it compulsory, and there is now before this body a bill, which I am told is backed by 90 percent of the cotton producers, intended to make the reduction of acreage not the result of agreement but of law, with the compulsion of law behind it.

If that is done as to cotton, it will be done as to wheat, it will be done as to corn, it will be done as to every basic article under the adjustment plan, and if we proceed along that line, the time will soon arrive when no farmer will put a plow in his field or turn a single furrow without first getting permission from a bureau here in Washington.

Mr. President, that sort of thing is within the possibilities; the way is open for it, but I do not believe the American people will stand for it 24 hours, when they realize what it

involves. I am willing to concede, for the sake of argument, that the purpose of the administration of this act seems to be well grounded, but the practice is not good.

Reverting to what was said by the Senator from Idaho, I have here an editorial, published September 2 last in the Washington Post, which reads:

Under Secretary Wallace's plan to purchase 4,000,000 pigs under 100 pounds in weight by offering a special price which will remove them from market competition next year when they would have become full-grown porkers, the youngsters are being rushed to the slaughter. Over 40,000 arrived in Chicago in 1 day, exceeding the packing-house capacity by 5,000. Reports indicate that throughout the country probably 1,000,000 piglets will be marketed by the end of the first week.

The offer of a $4 flat premium on 1,000,000 sows exceeding 275 pounds in weight has not met with the same prompt response.

I am reading this editorial because it comments upon the impracticability of the proposal.

Whether this is due to the fact that many sows are found to be underweight, or, as Secretary Wallace is credited with suggesting, the farmers shrewdly anticipate more little pigs to sell next year, has not been clearly determined. But there is no question about the way the youthful progeny is rolling in, and it looks as though the full 4,000,000 quota would be received by the deadline set for October 1.

The general program is expected to increase the market price of hogs by from 25 to 30 percent, but that will apply to hogs sold next winter. The desirability of selling young pigs now is calculated roughly in this way: If a 225-pound hog can be sold in 4 or 6 months at $6 per hundredweight, it would bring $13.50. The emergency price for an average 60-pound pig now is $8 per hundred pounds, or $4.80. To fatten this 60-pounder into a 225-pound hog would necessitate feeding him some 16 bushels of 50-cent corn, an expense of $8, which, subtracted from next year's value of $13.50, leaves $5.50.

That is precisely what took place with this program. Instead of the price of hogs increasing the price of hogs has been decreasing until, as was shown by the list submitted to me by the Department of Agriculture, to which I referred a few days ago, the price of hogs has gone below what it was before the adjustment act was put into operation.

In order to give the Senate a clear picture of the situation, I want to read another editorial. This is also from the Washington Post of September 25, last:

Some interesting facts are brought to light by a statement of the Agricultural Adjustment Administration as to its hog-slaughtering campaign.

This covers the subject to which the Senator from Idaho referred:

The Government has purchased approximately 3,575,000 swine, from which have been cured 51,000,000 pounds of meat. The average is a little better than 14 pounds of meat per pig.

I hope Senators will note that.

To get a clear picture of what the A.A.A. has accomplished it is necessary to break up these figures. Only a small portion of the total number of pigs slaughtered is being converted into food. About 36,000,000 pounds of meat have been obtained from 600,000 pigs weighing from 80 to 100 pounds each and 75,000 sows have yielded 15,000,000 pounds of meat. This leaves 3,500,000 smaller pigs with a total weight of about 159,000,000 pounds from which no edible substances appear to have been saved.

If the average yield of meat per pig is no higher in the future than it has been thus far, there is some doubt as to whether the A.A.A. will be able to supply the Federal Emergency Relief Administration with 100,000,000 pounds of cured pork. Director Hopkins has announced the allotment of that amount of pork to the various States. But at present only 51,000,000 pounds of meat are available.

Nearly 60 percent of the pigs called for in the Government's program have been slaughtered. The deficiency might be made up by larger purchases of heavier swine, but farmers are extremely reluctant to part with their sows. Only 7.5 percent of the number sought by the A.A.A. agents have been purchased thus far.

In spite of this probable shortage, thousands of tons of pork are going to waste. From the statement of A.A.A. authorities it appears that nothing has been salvaged from the slaughter of 2,900,000 pigs weighing less than 80 pounds, except 13,000,000 pounds of inedible grease and 13,000,000 pounds of fertilizer. The Government has spent $13,000,000 for pigs of this type, or 50 cents per pound for grease and fertilizer. In some cases the undried tankage has been turned over to farmers on request. In other cases it has been destroyed for lack of tankage facilities.

Mr. President, if we take the final statement of the adjustment in connection with the hog program, it will be found that the hogs, instead of costing the Government the amount it would ordinarily pay out to buy livestock will cost the Government something like 32 cents a pound. When the figures are analyzed to indicate what the Government bought, what the Government did with what it purchased, what the Government paid for what it purchased, and what the Government received from the transactions, it will be found that the cost to the Government will amount to something between 32 and 33 cents a pound.

Such, Mr. President, is, of course, the practice of the Government. It is naturally most wasteful and most extravagant. When we talk about turning the business of industry over to the management of the Government, such waste and such extravagance is precisely what we are proposing to bring about.

I will read, Mr. President, a letter which came in to me today:

I have been reliably informed that an amendment to the A.A.A. to include beef cattle as a basic commodity has been passed by the House and is now up for consideration by the Senate. Allow me to state that if the Government is going to manage my business and prevent my making any money, I will soon be asking the Government for support.

I signed the corn-hog contract, largely because the farmers will all pay the processing tax whether they sign or not; most farmers realize this; hence the heavy sign-up. But not long ago I bought a small bunch of cattle intending to grass them. If cattle are made a basic commodity, I suppose I will have to sell them or else cancel the contract. There are plenty of farmers who think the whole program isn't right, but feel they are forced to sign.

Please use all the influence available to defeat this unjust amendment.

Probably the farmer who wrote the foregoing letter does not know the exact operation of the proposed amendment. The cattle producers do not observe any increase in price, in spite of the 60-cent dollar and in spite of what would seem to be the only common-sense view, that if we cheapen the dollar we naturally increase the price. Yet, in the face of that, the price of livestock has gone down, and the farmer is suffering. The farmer is coming here and asking us to do something for him. If we have done it for others, why should we not do it for him? There is not any reason why it should not be done; that is, if it is proper to do it for one, it will be proper to do it for the other. But at the same time we objected to the processing tax, because it is a sales tax, a sales tax on food, and it is a tax levied not by Congress but by an arm of the Executive.

Others say that every article must stand on its own feet; that, if we are going to do some favor for the farmer, should there, on the other hand, be any loss, he must suffer. Consequently, persons who do not like the processing tax, and at the same time feel that if the Government does something for the producers of one commodity it ought to do it for others, are desirous of including cattle in the Agricultural Adjustment Act but to exempt cattle from the processing tax. I hardly see how that can be done, Mr. President.

It is true that the processing tax, in the case of cattle, very likely will not be assessed against the consumer. It is likely to be assessed back to the producer, and, if it is—and it probably will be done—then the inclusion of cattle in the Agricultural Adjustment Act, with the processing tax, would necessarily be an injury to the cattlemen greater than that they are now suffering.

Yet how are we to make flesh of one and fowl of the other? Why put the processing tax on the one and not on the other? The whole program is artificial and should never have been entered upon. On the other hand, it should be repealed just as soon as Congress can do it.

Some people have the opinion that everyone is in favor of this artificial proposal. That is a great mistake. I have here a letter from a baker, as follows:

It would be just as fair for the Government to tell me, "Instead of baking 100 loaves of bread, you bake 80 loaves only, and we will not only pay for the 20 you do not bake but also a higher price for what you do bake."

Thus setting aside every law of trade based upon supply and demand.

Mr. DICKINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Ohio yield to the Senator from Iowa?

Mr. FESS. I yield.

Mr. DICKINSON. A most interesting suggestion came to me the other day. The suggestion was that, in view of the fact that we have overbuilt in many of our cities, the Government should assume the responsibility of paying rental on 20 or 25 percent of the rental space for stores and for offices and for all the other types of real estate suffering the same slump as every other line of business. Is that not just as logical as the other things that have recently been done?

Mr. FESS. The Senator knows that that is not only logical but if we pursue the course of socialism that we have entered upon we shall be driven to do that thing.

I was somewhat amazed at the answer of Mr. Davis, who is the best authority on the agricultural adjustment law, I think, in Washington. When he was asked, "If we appropriate $200,000,000, how will that ever be returned?" his answer was, "I had not thought about it." No, Mr. President, that had not been thought of. Why think about it? Why in these days think of any sum that comes from the Treasury? If some use can be found for the money, let us appropriate it. When asked the question, "How will it be repaid?" the answer is, "We had not thought of it." I would not expect them to; that is not their function.

The statement appears in a newspaper that payments to farmers exceed the amounts received from them by $122,431,666. That statement is given out by the Associated Press of February 27.

Mr. President, it is certainly a trite question to ask "What is to be the end of this program?" We have had an experiment with respect to hogs, a laughable mistake if it were not so serious. We have made an experiment with respect to cotton, an admitted blunder. We are now trying to correct it in a way that will be very dangerous. Other experiments have been tried and prices have gone up, but, unfortunately for the proponents of the program, the commodities not covered by the A.A.A. have had a greater increase in price than those in the A.A.A. That is what the Senator from Idaho referred to a while ago when he suggested that the price would not necessarily go up and substantially remain up. Yet, in the face of this dismal blunder, we are closing our eyes and saying, "Well, it is an experiment; we do not have anything else to do, and therefore we have decided we will not only do it but we will continue it and will enlarge it."

Mr. President, of course, while I have sympathy for the livestock man, knowing that if we do take this action in one case we will have to take it in others, I cannot vote for any such amendment as the one now proposed.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, returned to the Senate, in compliance with its request, the bill (S. 2359) to provide for the disposition of unclaimed deposits in national banks.

EXECUTIVE SESSION

Mr. ROBINSON of Arkansas. I rise to a point of order.

The PRESIDING OFFICER. The Senator will state his point of order.

Mr. ROBINSON of Arkansas. The hour of 2 o'clock having arrived, the Senate has agreed to proceed to the consideration of executive business.

Mr. FESS. I was aware of that, and so I stopped.

Mr. ROBINSON of Arkansas. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to.

EXECUTIVE REPORTS OF COMMITTEES

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters.

Mr. HARRISON, from the Committee on Finance, reported favorably the nomination of Bernice Pyke, of Cleveland, Ohio, to be collector of customs for customs collection district no. 41, with headquarters at Cleveland, Ohio, to fill an existing vacancy.

Mr. PITTMAN, from the Committee on Foreign Relations, reported favorably the following nominations in the Diplomatic and Foreign Service:

Frank P. Corrigan, of Ohio, to be Envoy Extraordinary and Minister Plenipotentiary of the United States of America to El Salvador;

Karl deG. MacVitty, of Illinois, to be secretary in the Diplomatic Service; and

H. Earle Russell, of Michigan, to be consul general.

The PRESIDING OFFICER. The reports will be placed on the calendar.

ROBERT H. JACKSON

The PRESIDING OFFICER. The question is on the confirmation of the nomination of Robert H. Jackson to become general counsel Bureau of Internal Revenue.

Mr. HARRISON. Mr. President, I desire to bring to the attention of the Senator from Michigan [Mr. COUZENS] that the nomination of Mr. Jackson is now before the Senate.

Mr. COUZENS obtained the floor.

Mr. KEYES. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Costigan	Kean	Robinson, Ark.
Ashurst	Couzens	Keyes	Robinson, Ind.
Austin	Cutting	King	Russell
Bachman	Davis	La Follette	Schall
Bailey	Dickinson	Lewis	Sheppard
Bankhead	Dill	Logan	Shipstead
Barbour	Duffy	Lonergan	Steiwer
Barkley	Erickson	Long	Stephens
Black	Fess	McAdoo	Thomas, Okla.
Bone	Fletcher	McCarran	Thomas, Utah
Borah	Frazier	McKellar	Thompson
Brown	George	McNary	Townsend
Bulkley	Gibson	Murphy	Trammell
Bulow	Glass	Neely	Tydings
Byrd	Goldsborough	Norris	Vandenberg
Byrnes	Gore	Nye	Van Nuys
Capper	Hale	O'Mahoney	Wagner
Caraway	Harrison	Overton	Walcott
Carey	Hatch	Patterson	Walsh
Clark	Hatfield	Pittman	Wheeler
Connaliy	Hayden	Pope	White
Coolidge	Hebert	Reed	
Copeland	Johnson	Reynolds	

Mr. LEWIS. I desire to announce that my colleague the junior Senator from Illinois [Mr. DIETERICH] and the Senator from South Carolina [Mr. SMITH] are necessarily detained from the Senate. I wish further to announce that the Senator from Kansas [Mr. McGILL] is absent on account of a severe cold.

The PRESIDING OFFICER. Ninety Senators having answered to the roll call, there is a quorum present.

THE CALENDAR

Mr. McKELLAR. Mr. President, will the Senator from Michigan yield?

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Tennessee?

Mr. COUZENS. I yield to the Senator from Tennessee.

Mr. McKELLAR. As I understand, the Senator's objection is to the first nomination. Would he have any objection to having the nominations on pages 2 and 3 of the calendar acted on at this time?

Mr. COUZENS. I would not.

Mr. McKELLAR. I ask unanimous consent that the nominations, beginning on page 2 and going to the end of the Executive Calendar, may be acted upon at this time.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the clerk will state the first nomination in order.

CUSTOMS SERVICE

The legislative clerk read the nomination of Thomas Temple Hoyne to be comptroller, collection district no. 39.

Mr. LEWIS. Mr. President, I move that the nomination of Mr. Hoyne be confirmed.

The motion was agreed to.

The legislative clerk read the nomination of William J. O'Brien to be collector of customs, district no. 9.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

POSTMASTERS

The legislative clerk proceeded to read sundry nominations of postmasters.

Mr. McKELLAR. I ask unanimous consent that the nominations of postmasters may be confirmed en bloc.

The PRESIDING OFFICER. Is there objection? The Chair hears none and the nominations of postmasters are confirmed en bloc. That completes the calendar with the exception of the two nominations passed over.

Mr. TRAMMELL subsequently said: Mr. President, a short time ago the Senate confirmed the appointment of a postmaster in Florida, no. 1248 on the calendar. I ask that the vote by which that nomination was confirmed be reconsidered, and that the nomination be recommitted to the Committee on Post Offices and Post Roads.

Mr. McKELLAR. Does the Senator refer to the Greenville, Fla., postmastership?

Mr. TRAMMELL. Yes.

Mr. McKELLAR. I hope the Senator's request will be complied with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the vote by which the nomination was confirmed is reconsidered, and the nomination will be recommitted to the Committee on Post Offices and Post Roads.

ROBERT H. JACKSON

Mr. COUZENS. Mr. President, the question before the Senate is the nomination of Robert H. Jackson, which is Order No. 925 on the Executive Calendar. I am somewhat embarrassed at having this nomination taken up this afternoon, due to the absence of the Senator from Maryland [Mr. TYDINGS]. The Senator from Maryland approached me along about the last of January or the 1st of February and asked me to join with him in protest against the action of the Secretary of the Treasury in removing Mr. E. Barrett Prettyman as general counsel for the Internal Revenue Bureau. He said the methods of the Secretary of the Treasury were reprehensible in this matter, and asked me to join with him in protest against the removal of Mr. Prettyman and the appointment of his successor.

I immediately got in touch with the Secretary of the Treasury and asked him if he had discharged Mr. E. Barrett Prettyman. He replied he had not. I said, "I understand you have asked for his resignation", and the Secretary of the Treasury said he had. I then asked what the difference was between discharging a man and asking for his resignation, and the Secretary of the Treasury said, "Why, he does not have to grant my request for his resignation." That, Mr. President, seemed so frivolous to me, coming from the Secretary of the Treasury, that I was astounded. It afterward transpired that Mr. Prettyman did accede to the Secretary's request for his resignation, and subsequently there was appointed in his place the nominee whose name is now before the Senate, Mr. Robert H. Jackson, of Jamestown, N.Y., to be general counsel for the Bureau of Internal Revenue.

On the 14th of February the Chairman of the Finance Committee, the senior Senator from Mississippi [Mr. HARRISON], called a hearing. The Senator from Maryland asked permission to be present and to examine the Secretary of the Treasury, Mr. Jackson, and Mr. Prettyman. The Senator from Maryland did appear before the Finance Committee, and examined the Secretary of the Treasury as to the reasons for removing Mr. Prettyman. The question of the confirmation of the nominee, Mr. Jackson, was not a matter that was greatly involved. The question was the procedure and the methods adopted by the Secretary of the Treasury in removing Mr. Prettyman.

I thought at the time there were stenographic notes taken of the hearing, but I have since been informed by the clerk of the committee that no stenographic notes were taken of the hearing.

It appeared that Mr. Prettyman presented to the Secretary of the Treasury a proposed settlement of some cases with which the Secretary of the Treasury disagreed. The Secretary of the Treasury told the general counsel, Mr. Prettyman, that he wanted them settled in another way, and the general counsel, Mr. Prettyman, acceded to the decision of the Secretary of the Treasury. The Secretary of the Treasury was asked at the hearing if there was any insubordination on the part of Mr. Prettyman, and he answered in the negative that there was no insubordination; but the justification the Secretary of the Treasury advanced for the removal of Mr. Prettyman and the selection of Mr. Jackson was that he wanted a man who would do as he wanted and think as he thought and a man on whom he could absolutely rely; and yet at no time did he make the statement that he could not rely on Mr. Prettyman. At the hearing I asked, if Mr. Jackson disagreed with him in the next 30 days would he discharge Mr. Jackson and ask the Senate to confirm someone else. The Secretary of the Treasury said in all probability he would.

The question involved is not a question of personality. It has been reported in the press that Mr. Prettyman was at one time my counsel. That is not true. In the so-called "Mellon suit" against the Ford minority stockholders, one of my associates in the case employed a firm of which Mr. Prettyman was a member, but neither Mr. Prettyman nor his firm represented me, and so I have at no time had any connection with Mr. Prettyman. I do not recall ever having seen him until his name came to the Senate for confirmation, at which time I went into his record very carefully because of my long-continued interest in the administration of the Treasury Department and particularly of the Bureau of Internal Revenue.

This is not a matter of personality. It is a matter of method. I desire now to condemn vigorously the methods of the Secretary of the Treasury in this matter and to further point out that his statements were unreliable and not dependable. At the hearing on February 14 he was asked if Mr. Jackson had been sworn in or had taken the oath of office, and he said that he had. He made no further comment than that, and yet, as I shall point out later, Mr. Jackson took his office on February 1, 1934, and was not sworn in until February 9, 1934, when he was sworn in as special counsel pending his confirmation as general counsel.

Having gone into this matter primarily at the urge of the Senator from Maryland [Mr. TYDINGS] I am required, I am sorry to say, in his absence to differ with some of the statements he made this morning prior to the Senate's going into executive session and taking up the matter. I am not charging any improper motive to the Senator from Maryland, but I notice that he has changed his viewpoint materially apparently since his friend Prettyman has received an appointment as corporation counsel for the District of Columbia. In the statement of the Senator from Maryland this morning, speaking of Mr. Prettyman, he said:

> I regret that he has tendered his resignation because, as I said, he is a man well versed in the income tax laws, a man of unimpeachable integrity and of outstanding ability in his profession. However, the new Secretary of the Treasury, Mr. Morgenthau, for reasons best known to himself, wanted in that position a man whom he knew. He said he had nothing at all by way of criticism to say of Mr. Prettyman.

That is not in accordance with the evidence. The evidence before the Finance Committee was to the effect that Mr. Morgenthau did have objections to Mr. Prettyman because Mr. Prettyman did not think along the same lines as the Secretary. The Secretary said he wanted a man who would think as he thought. So Mr. Prettyman was not above criticism, as stated by the Senator from Maryland to the Senate this morning.

Mr. LONG. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER (Mr. POPE in the chair). Does the Senator from Michigan yield to the Senator from Louisiana?

Mr. COUZENS. I yield.

Mr. LONG. Did not Mr. Morgenthau want to keep Mr. Bailie in office also on account of knowing him so well; was not that the reason he gave?

Mr. COUZENS. Yes; but that is another story, a long story, and one that does not add anything to the reputation of Mr. Morgenthau.

Mr. LONG. I want to inform the Senator from Michigan that I heard on the floor this morning that the banking house with which Mr. Bailie was connected, Seligman & Co., was one of the fortunate ones that unloaded its aircraft stock because it was told in advance about the cancelation of the air-mail contracts.

Mr. COUZENS. I have no information in that connection.

Mr. LEWIS. Mr. President, will the Senator from Michigan yield for a question?

Mr. COUZENS. Certainly.

Mr. LEWIS. I take the liberty of asking the Senator from Michigan about his remark as to the Secretary of the Treasury having insisted that some person should be appointed who would think along the same lines as himself. I take it the Senator means the new nominee, Mr. Jackson. Will the Senator say that the Secretary himself made that statement, or was it brought to the Senator from someone who claimed to speak for the Secretary of the Treasury?

Mr. COUZENS. The Secretary said that himself before the Finance Committee at a time when I was present, and at the time he was being examined by the Senator from Maryland [Mr. TYDINGS].

Mr. LEWIS. I wish to ask the able Senator if he did not understand that the Secretary meant someone thinking along the lines of policy in harmony with the Secretary of the Treasury, and not a personal matter of thinking individually in his own behalf.

Mr. COUZENS. I assume that the Senator from Illinois has put a proper interpretation upon it; but, as I pointed out, either before the Senator from Illinois came into the Chamber or at some other time, there was at no time any charge of insubordination against Mr. Prettyman. As long as Mr. Prettyman had gone along the lines that he had been instructed by the Secretary to pursue, there could have been no difference with respect to policy, although there may have been a difference with respect to details, as the Senator from Illinois now points out.

I continue to quote from the statement made this morning by the Senator from Maryland [Mr. TYDINGS]:

> He said he had nothing at all by way of criticism to say of Mr. Prettyman; that his work had been splendid; that he had applied himself with great diligence to the collection of the taxes and the settlement of the disputes; but he said he thought it was only fair, inasmuch as he had ultimate and final responsibility in the matter, that he should have a man as general counsel whom he knew; and that for no other reason he was anxious to place Mr. Robert H. Jackson in the position, because he had been associated with Mr. Jackson for some time in the past.

Mr. President, I am somewhat handicapped because I do not have the hearings before the Finance Committee in typewritten or printed form; but as I recall—and the Senator from Mississippi [Mr. HARRISON], chairman of the committee, will correct me if he thinks I am inaccurate—there were some matters presented to the Secretary of the Treasury by Mr. Prettyman and by the Commissioner of Internal Revenue, Mr. Helvering, in the settlement of a fraud case.

The Secretary of the Treasury objected to the settlement of the fraud case, to which no one I know of in the committee objected. It appears that the former Commissioner of Internal Revenue had told counsel for the concern involved that if he would plead guilty of fraud and submit the facts, the case might be settled and compromised. That was before the advent of the new administration or at least before the advent of the present Secretary of the Treasury, who was then Undersecretary of the Treasury.

In that matter of settlement Mr. Prettyman and the present Commissioner of Internal Revenue agreed with the decision of the former Commissioner of Internal Revenue, and submitted it to the Secretary of the Treasury. The Secretary of the Treasury, exercising his prerogative, as he had a perfect right to do, declined to agree. He sent Mr. Prettyman and Mr. Helvering back and said he would not settle the case on that basis. That, it seems, was the primary difference which arose between the Secretary of the Treasury and Mr. Prettyman.

The Committee on Finance did not attempt to give any consideration to the merits of the controversy which first arose between Mr. Prettyman and the Secretary of the Treasury. I think if the committee had taken a vote on the matter, we would have agreed generally with the Secretary of the Treasury. But that is not the point involved. The point is that the Secretary of the Treasury misstated the facts with respect to Mr. Jackson's being sworn in, misstated the facts with respect to Mr. Prettyman's removal, and did as a matter of fact declare that he wanted a man who would "go along with" him. I specifically asked the question, "If Mr. Jackson differs with you within 30 days, will you remove Mr. Jackson and send a new nomination for us to confirm?" Mr. Morgenthau replied, "In all probability", or "possibly", or something to that effect.

The point I am trying to make is that the whole issue was raised in the first instance by the Senator from Maryland [Mr. TYDINGS] because of the methods of the Secretary of the Treasury; and because of my long-continued interest in the Internal Revenue Bureau he solicited my assistance in bringing to the attention of the Senate and the country the methods of the Secretary of the Treasury, which I wholly condemn, and which I think he condemns, and which I know others condemn. The Senator from Maryland, however, has made his statement, which is not in accordance with the statements he has made to me, nor in accordance with the hearings that were held before the Finance Committee; but he states that he has been required to leave for New York, and is unable to participate in this discussion.

It also appears that Mr. Prettyman was a very good Democratic friend of the Senator from Maryland, and he has since gotten Mr. Prettyman a job as corporation counsel for the District of Columbia, and therefore the Senator from Maryland has lost his interest; at least, he has lost the interest he first had when he invited me to join him in this protest.

Mr. REED. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Pennsylvania?

Mr. COUZENS. Yes; I yield.

Mr. REED. I have my doubts as to whether we can correct injustices in dismissals by refusing to confirm the successor; but I am wondering what sort of testimony it is to the qualities of Mr. Jackson if the Secretary of the Treasury admits that he expects him to be nothing but a "yes man" for him.

What has the Senator to say about that?

Mr. COUZENS. When Mr. Morgenthau, Mr. Jackson, and Mr. Prettyman were before the Finance Committee, having the same thing in mind that the Senator from Pennsylvania had, I asked the Secretary in case Mr. Jackson disagreed with him at any time whether he would remove him and we would be asked to confirm a successor; and Mr. Morgenthau said, "In all probability", or "possibly." I cannot quote the exact words, because there appears to have been no record taken of the hearings, although I understood at the time that a record was being taken.

Later on—and I desire to point this out because I think the Secretary of the Treasury was absoluely tricky, and I think he is wholly unreliable, in this connection, at least—on February 9, I think, someone down in the Treasury Department drew my attention to the fact that Mr. Jackson was occupying his position in the Treasury Department before he had been confirmed, or before he had taken his oath of office. I went to the telephone and called up the Secretary, and he was not available; so I talked with Mr. Helvering, the Commissioner of Internal Revenue, and asked him if Mr. Jackson was occupying his position in the Bureau of Internal Revenue. Mr. Helvering answered in the affirmative. I said, "It is strange that he is occupying his position in the Bureau of Internal Revenue before he

has been confirmed and before he has taken his oath of office", to which Mr. Helvering said, "That is not right. It should not be that way."

Later, on the 14th, Mr. Morgenthau was asked, before the Committee on Finance, whether Mr. Jackson had been sworn in, and he answered in the affirmative; that he had been sworn in as special counsel. He made no explanation that Mr. Jackson served 9 days without being sworn in, during which time he was under no oath of office. Mr. Jackson had access to all the records of the Internal Revenue Bureau. He had information as to income-tax cases and as to settlements which no Member of Congress can get, which are, under the law, secret; yet this man Jackson, who was not even an employee, who had taken no oath of office, who had not been confirmed, had access to all these records.

Later on Mr. Jackson telephoned me, I think, and as a result wrote the letter which I will read to the Senate. It is dated February 21, 1934, and is addressed to me:

Enclosed is a list of my substantial or permanent clients. I shall be glad to give you any further information pertaining to any of them and to furnish a detailed statement of services rendered to any of them and the charges made therefor, or to bring the office books down for your inspection. No claim of privilege will be made as to any business which I have transacted.

I began to work on February 1 at the direction of the Secretary of the Treasury, and, as I am informed, by the express approval of the President. It was after you called attention—

I want to emphasize this. I am quoting:

It was after you called attention to the possible irregularity of the procedure that I took the oath as temporary special counsel. This was done on the 9th day of February. Prior to that time my work consisted chiefly in going over matters which Mr. Prettyman thought should have my attention and other matters of policy with him and other members of the staff.

I had planned to go to Jamestown tonight, returning here Monday morning. I will, however, of course defer the trip, or return here earlier, if you wish.

Please do not hesitate to ask any information you wish, however personal, as I do not want to start work with any misapprehension on the part of those whose opinion I would value, and whose support I would need in office.

(Signed) ROBERT H. JACKSON.

To this letter he attaches, as he states, a "list of substantial clients, 1933, in order of relative importance of fees."

I am not raising any particular objection to Mr. Jackson; but he has a number of clients that it would have been preferable he did not have, going into an office with several hundred attorneys, without any past experience, without any knowledge of internal-revenue matters, and coming from a place like Jamestown, where there never was any great opportunity to have a large office experience.

Mr. LONG. Mr. President, will the Senator tell us who some of those main clients are?

Mr. COUZENS. Yes; I will put them all in the RECORD after I conclude my remarks.

Mr. LONG. Will the Senator read a few of them, please?

Mr. COUZENS. Yes. The list is as follows:

LIST OF SUBSTANTIAL CLIENTS, 1933, IN ORDER OF RELATIVE IMPORTANCE OF FEES

Bank of Jamestown: General counsel; director; chairman merger committee negotiating merger three banks.

Estate Shelden B. Broadhead (Robert H. Jackson, one of administrators) (died 1925): Controls or has large interest in Jamestown, Westfield & Northwestern Railroad (electric, 30 miles); Jamestown Street Railway; Jamestown Motor Bus Co.; Jamestown Worsted Mills; Chautauqua Navigation Co. (practically defunct); Chautauqua Traction Co. (in liquidation); Broadhead Realty Co., (owns real estate, formerly William Broadhead); Broadhead Holding Co. (owns stocks and bonds Broadhead companies). This estate in bad financial condition.

Superintendent of Banks of New York State: Liquidation of Shearman State Bank and Sinclairville State Bank.

Jamestown Telephone Corporation: Local company. New York Telephone Co. owns nonvoting stock.

The New York Telephone Co. is a subsidiary of the American Telephone & Telegraph Co.

Local interests own two thirds voting stock. Is now engaged in controversy with New York Telephone Co. over toll rates and litigation likely. I do not represent the A. T. & T. or any subsidiary of A. T. & T. Have been active in Independent Telephone Association affairs. My employment is by J. N. Wright—active in fighting A. T. & T. in competition and in antitrust prosecution during Wilson administration.

That is going a long way back.

Homer M. Preston estate: Coexecutor and attorney. About administered. Still interested real estate St. Paul, Minnesota, Florida, and Jamestown.

Jamestown Mutual Insurance Co.: Local mutual insurance company handling compensation and automobile liability.

Niagara, Lockport & Ontario Power Co. and Hydraulic Race Co., subsidiaries of Niagara-Hudson.

The Niagara power interests is the great power interest of the State of New York, as all of you know.

Local attorney: Company sold its distribution system to city of Jamestown in 1929 and now sells power to municipal plant, which also manufactures. Tried one long lawsuit for Race Co. involving dispute with Niagara Falls Milling Co. over amount of water to be taken from its raceway.

These companies' fees together never amounted to 10 percent of my practice. Connection came about through N. L. & O. P. Co., buying small electric plant that I had been attorney for.

National Chautauqua County bank: Reorganized after bank holiday. Have represented them in resulting litigation. Argued for it that Emergency Banking Act was constitutional when their existence challenged. Favorable decision New York Supreme Court.

Fanny Jones estate: Litigation over construction of will.

Hultquist estate: Usual proceedings.

Pennsylvania Gas Co.: Distributes natural gas from Pennsylvania fields. Occasional negligence suit and question with customers. Public Service Commission hearing on minimum bill regulations.

Ashville & Panama Telephone & Telegraph Co.: Rural telephone line owned by about 20 local people. Not an A. T. & T. company. Reorganized last year as franchise expired.

Post Publishing Co.: Publishes Jamestown Morning Post. Business advice and libel suits defense.

Other clients who consult frequently: Blackstone Manufacturing Co., makes washing machines; Watson Manufacturing Co., makers of metal furniture and hollow metal; Chautauqua Worsted Mills, worsted textiles; Emprere Case Goods Co., bedroom furniture; Davis Furniture Corporation, four plants, bedroom and dining hoom; Ellison Bronze Co., bronze workers; Hotel Jamestown, Inc., owns and operates two hotels; New Process Co., mail-order merchants.

Litigation: Several defenses for insurance companies; *Kellogg Lumber Co.* v. *Union Furniture Co.*, for defendant; *South Shore Association* v. *H. J. Heurz Co.*, for defendant; *Gates* v. *Prudential Insurance Co.*, for plaintiff; *Goseoski* v. *International Rwy. Co.*, for plaintiff; *Johnson* v. *Johnson Estate* (suit to impress trust), for defendant; *W. D. Packard Est.* v. *J. W. Jackpard Est.*, for claimant.

These consist of litigation in State or Federal courts and counsel work.

We have no lobbying relation with State or Federal Government or city government.

Mr. President, as I stated when I began my remarks, there is no personal matter involved so far as I am concerned. It is the matter of methods. I am very doubtful of the ability of the Secretary of the Treasury to conduct that great office in the light of the methods which have developed in the few weeks or months that he has been in charge.

I am not going to make any protest against the confirmation of Mr. Jackson. Other Senators have the same records that I have, but it is quite evident that Mr. Jackson and all other employees in the Treasury Department will have to be "yes men"; unless they are, they will be removed and we shall have before us other nominees to take their places.

While I am on that subject, it is well known that almost ever since I have been in the Senate, or at least since 1923, I have been more or less a critic of the administration and the conduct of the Treasury Department. I was hoping that under the new deal I should at least be freed from thinking I had to observe the conduct of the Treasury Department. It seems, however, from all the information I can get, that the need for watching the Treasury Department is going to be as great as it was under the famous Mellon.

I have here a clipping showing that no matter what administration we have, apparently we cannot prevent a grapevine connection between all parties and all interests.

It is well known that under the $2,000,000,000 equalization fund that was granted to the Secretary of the Treasury under the so-called "gold act", the agent for the Treasury Department was to be the Federal Reserve Bank of New York. I read from a clipping taken from a Pittsburgh paper, I think it is:

Bank promotes Ray Harrison. Richard K. Mellon, the new president of the Mellon National Bank, announced today that Ray

Harrison, assistant cashier, has been promoted by the board of directors to be the vice president.

I am not going to read all of this clipping, but it states near the end—

He is a brother of George L. Harrison, governor of the Federal Reserve Bank of New York.

So, whether premeditated or otherwise, it is quite apparent that there is to be a connection between the old Mellon interests and the present administration of the Treasury Department.

Further than this, I do not care to have anything to say.

Mr. HARRISON. Mr. President, I think the Senator from Michigan [Mr. COUZENS] has made a very fair and a very correct statement of the facts as they were brought out in the Committee on Finance. Of course, I do not subscribe to some of his conclusions in criticism of the Secretary of the Treasury, to the effect that he is unreliable and tricky, because I saw nothing in the whole proceeding which in the wildest flight of the imagination would lead me to think that the Secretary was tricky or unreliable. On the contrary, it seemed to me that in this whole matter the Secretary of the Treasury was trying to lay the cards on the table, so to speak, that he took the committee into his complete confidence, and that he was trying to tell the truth, in his simple way, about the matter.

Of course, the Secretary of the Treasury has not been in his present office very long. He has not had that large and long experience in financial matters my friend the Senator from Michigan has had. Because of his lack of experience, he cannot express himself in that sweet, adroit, and persuasive way that characterizes the Senator from Michigan. But I predict for the Secretary of the Treasury that, while he may make mistakes as to some of his appointments, there will never be anything during his administration that will reflect upon his honesty and his integrity and his great desire to conduct the Treasury Department in the interest of the American people.

There is no great controversy about this matter. I regretted that the Secretary of the Treasury saw fit to ask for the resignation of Mr. Prettyman. All that was said by the Senator from Maryland [Mr. TYDINGS], all that was said by the Senator from Michigan in tribute to Mr. Prettyman's work and services, is true. He made an excellent and competent official in the Treasury Department. But the Secretary of the Treasury said that he preferred someone else in that position; and when the committee asked him why, he said, "I wanted one who, I believed, thought along the same lines I did, and one in whom I had complete confidence."

The Senator from Michigan is right; the Secretary of the Treasury did tell us that he wanted a man as general counsel of the Bureau of Internal Revenue in whom he had complete confidence and who thought along the same lines he did. He went further and said that if he should find that Mr. Jackson did not think along those lines, it might be that he would ask for his resignation. It may be that the Secretary of the Treasury is wrong in that position; I do not know, but that is the way he wants to conduct the Treasury Department, and that is the way he wants to keep free from criticisms which my friend from Michigan and others might hurl at him.

I did not believe there was enough to justify asking for the resignation of Mr. Prettyman; but this was the cause of the difference of opinion: The Secretary said that when Mr. Burnett was Commissioner of Internal Revenue there were some fraud cases before the Bureau, and an attorney, I think it was, went in one day to Mr. Burnett and said, "You do not know anything about this fraud, but I will reveal it to you, provided you compromise the case, and the Government, by compromising this case and accepting our version of it, will get something more than $200,000." I believe that was the sum, but I am not sure as to the exact amount.

I do not criticize Mr. Burnett for his stand, but he did accept the version of the attorney and compromised the case. Then there was a change of administration, and those fraud cases came over to the solicitor's department under the new Secretary. Mr. Prettyman took the view that since the past administration, acting through Mr. Burnett, had agreed upon this compromise, he ought to stand behind it, and he recommended to the Secretary of the Treasury an acceptance of it. Mr. Morgenthau said, "I shall not accept a compromise in fraud." He felt that he might be a party to it if he did accept it, and he took just the opposite policy.

People may differ as to that matter. Mr. Prettyman was honest in his interpretation of the policy, and certainly the Secretary of the Treasury was honest in the policy he laid down. But he said, "I just felt that if I had somebody in that position who, I knew, would think along my lines of thought, I would feel better", and that is why he asked for the resignation of Mr. Prettyman. He did not reflect in the slightest upon Mr. Prettyman. He said nothing against him. He said that Mr. Prettyman had ideas about policies different from his own, and that that was the only reason why he asked for his resignation.

No objection was raised in the committee to Mr. Jackson, not the slightest. Mr. Jackson came before the committee and answered all the questions the members of the committee asked him, and everything that was presented to the committee about Mr. Jackson bore out the fact that he was an excellent lawyer, and since the hearing I have been given to understand that he is one of the best lawyers in northern New York. He admitted that he did not know much about tax matters, that he had not specialized in those matters at all. He frankly gave this list of clients to the Senator from Michigan.

Mr. LONG. Mr. President, will the Senator yield?

Mr. HARRISON. I yield.

Mr. LONG. I suggest to the Senator that Mr. Jackson was attorney for the American Telephone & Telegraph Co., which should convince anyone that he was a good lawyer, because they do not hire poor lawyers.

Mr. HARRISON. It may be that he represented a telephone company at sometime, and it may be that because of that fact he ought to be turned down; I do not know. I do not suppose I could hold a place here if the rule were invoked that at sometime in my life I represented somebody who was tied up in some remote degree with some interest. It never was charged, however, that Mr. Jackson represented special interests. There was no objection to him on that ground. Indeed, after the hearings were closed, the Senator from Michigan, with the spirit of fairness which always inspires him, moved that the nomination be reported favorably by the committee.

Mr. COUZENS. Mr. President, will the Senator yield?

Mr. HARRISON. I yield.

Mr. COUZENS. During the comments I made previously, I stated that I raised no particular objection to Mr. Jackson. I submitted his record for the Senate, and in the committee I did exactly what the Senator has stated. After the Senator from Maryland had left the room, and it was not an issue between Mr. Jackson and the committee, but rather, in my judgment, between Mr. Morgenthau and the committee, there was no reason for holding up Mr. Jackson's confirmation, and the only reason why the confirmation has been held up has been that it seemed to me it afforded the only opportunity I would have to point out what I considered the reprehensible methods of the Secretary of the Treasury.

Mr. HARRISON. I thoroughly appreciate the Senator's stand. The Senator made a similar statement to me, and I am not offering any criticism of it. I was sorry Mr. Prettyman was let out, but I do not think that should be the basis of an objection in the Senate to the confirmation of Mr. Jackson.

I sympathize with the Senator, too, in that the distinguished Senator from Maryland has shifted a little bit in this matter. I do not know, but I expect he was provoked at first when his constituent, one whom he had probably endorsed and advocated, was let out. The Senator from Maryland felt a little bit provoked, no doubt. I suppose I would have been provoked. He said some things which perhaps he would not now repeat. If I had been in his position, I suppose I would have done what he did. He probably went

over and encouraged the Senator from Michigan to join with him in this fight. I do not know how the Senator from Michigan must look on the fact that the Senator from Maryland has left him at this particular stage of the proceedings.

Mr. McKELLAR. Mr. President, will the Senator yield?

Mr. HARRISON. I yield.

Mr. McKELLAR. I am in favor of the confirmation of Mr. Jackson, but I want to say that, so far as Mr. Prettyman is concerned, I have known him for many, many years, ever since his father was at one time Chaplain of the Senate, and there is no finer man than Mr. Prettyman. I cannot imagine a reason for his displacement. He is a splendid lawyer, a most conscientious and high-minded man and official, and I feel that I want to pay this small tribute to a man for whom I have such a high regard. I have confidence in his honesty, in his integrity, and in his ability, and I regret the situation which has arisen. I have no doubt that Mr. Jackson is a good man also, but I believe there is no better man than Mr. Prettyman. I am glad that the President has shown his confidence in Mr. Prettyman by appointing him to another high office immediately.

Mr. CLARK. Mr. President, if the Senator from Mississippi will yield, in response to what the Senator from Tennessee has said, I want again to emphasize, as the Chairman of the Committee on Finance has already done, that during the whole hearing before the Finance Committee there was not, either from the Secretary of the Treasury or anybody else, the slightest reflection on Mr. Prettyman. As a matter of fact, the Secretary of the Treasury stated that, while there had been some disagreement in policy, some difference in view, between him and Mr. Prettyman, he had such high respect for Mr. Prettyman that, in his desire to emphasize that Mr. Prettyman's resignation was not any reflection on either Mr. Prettyman's character or ability, he had already given direction that immediately after Mr. Prettyman's resignation he should be employed as special counsel in one of the biggest cases in which the Government was concerned at that time.

Mr. HARRISON. And to show that nothing reflects upon him, the President of the United States thought well enough of him to kick him upstairs into the corporation counselship of the District of Columbia.

Mr. COUZENS. Will the Senator from Mississippi yield at that point?

Mr. HARRISON. I yield.

Mr. COUZENS. The Senator knows that the President did that because of the great cry and protest that was made by the Senator from Mississippi and the Senator from Maryland and the Senator from Michigan and some other Senators. Let us not bluff each other. We know how Mr. Prettyman came to get the job of corporation counsel. [Laughter.]

Mr. HARRISON. I hope the Senator will exclude me from that designation.

Mr. COUZENS. I could not exclude the genial Senator from Mississippi, because it was his great influence, coupled with, as I understand, the influence of the Secretary of the Treasury, that got Mr. Prettyman the position of corporation counsel.

Mr. HARRISON. I would go a long way to keep the Senator from Michigan from making a fight on anything I have anything to do with, and I may say to the Senator that I have gone around with my basket a long time, and nothing has yet fallen into my basket, and I had nothing to do with the appointment of a corporation counsel.

Mr. President, we have taken too much of the time of the Senate on this question. I hope Mr. Jackson's nomination will be confirmed.

Mr. COPELAND. Mr. President, I was quite distressed when I heard there might be some objection to the confirmation of Mr. Jackson. I have known Mr. Jackson for so long a time, and have known him so favorably, that I did not conceive it possible that anyone could find any criticism to make regarding him. I am happy to say that no such criticism can be found.

The only thing I can think of against Mr. Jackson is that he is rather better looking than the ordinary man, and perhaps might come in for criticism on that account.

Just a word about Mr. Jackson's alleged connection with the corporations. First, the telephone corporation: His employment in that connection was in active opposition to and fighting the A. T. & T. Then his power connection came through the fact that the Niagara, Lockport & Ontario Power Co. bought a small local plant at Jamestown, a plant for which Mr. Jackson was the attorney. So in that way he was indirectly connected with large corporations.

I assure the Senate Mr. Jackson is a man of capacity and real ability. If the Secretary of the Treasury really wants a "yes man", I am sorry for the Secretary, because Mr. Jackson is not that sort of man. I doubt, of course, that Mr. Morgenthau does want a "yes man." However, so far as this particular candidate for confirmation is concerned, he is not of that type. He is a man of ability, capacity, energy, intelligence, and honor. He will serve well in any capacity because he would not undertake a place of legal responsibility unless he knew he had the qualifications for that place. I am glad to testify to his capacity and hope he will be confirmed.

Mr. GLASS. Mr. President, it is my expectation to vote for the confirmation of Mr. Jackson, not because I know anything much about him, or because the Secretary of the Treasury knew anything much about him, but because I prefer to assume that the Secretary of the Treasury would not seek the nomination of anyone for this vitally important position whom he did not highly regard, whether he knew him or not, and in whose integrity and legal ability he did not have confidence. For that reason I expect to vote for the confirmation of Mr. Jackson's nomination.

I am anxious to have it appear—as it does now appear in the RECORD—that there was not any valid reason for the summary dismissal of Mr. Prettyman. My personal interest in that connection is that I think it was somewhat upon my unqualified recommendation of Mr. Prettyman that he was appointed as general counsel for the Internal Revenue Bureau. That recommendation of him was based upon a personal knowledge of his very high character, having been briefly associated with him at the Treasury Department when I was Secretary, and upon my very definite knowledge of his fine abilities as a lawyer, so attested by some of the best legal firms in the District of Columbia and in Maryland. And I feel prouder of him today than I did on the day on which I recommended him for this position.

Mr. Prettyman's only offense was that he did not agree with the Secretary of the Treasury as to the moral obligation of the Treasury to carry out an agreement which had been made by the former Commissioner of Internal Revenue in certain specified circumstances. Mr. Prettyman thought the agreement was binding, if not legally, certainly morally binding; and, thinking that, he had integrity enough and courage enough to say so to the Secretary of the Treasury. The Secretary of the Treasury differed with his views. I personally asked the Secretary if Mr. Prettyman at any time ever intimated that he was unwilling to conform to the policies of the Secretary, and the Secretary stated explicitly that he did not decline to do it, so there was no question of insubordination whatsoever involved.

Mr. Prettyman, being a lawyer, was asked his legal opinion as to the effect of the agreement, and he gave it. I asked the Secretary in person whether he objected to Mr. Prettyman, because he had courage and integrity enough to give him his legal opinion, and he said quite the contrary; he respected him for it, but he wanted somebody there who would agree with him and whom he knew. Well, more as a matter of interest, perhaps more as a matter of curiosity than anything else, I asked him how well he knew Mr. Jackson. He said he had seen him only once in his lifetime; that he met him incidentally in the last presidential campaign at Jamestown, where he presided over a meeting.

That was the extent of his knowledge of Mr. Jackson. Yet my inquiry convinces me that Mr. Jackson is a first-class lawyer; that he is a man of high character, totally destitute of any knowledge of questions of taxation, however, a question in which Mr. Prettyman was largely and long experienced.

As between the fitness of the two men to discharge the duties of that office, I have no hesitation in affirming my own belief in the great superiority of Mr. Prettyman for the position in question. Moreover, it is no compensation to Mr. Prettyman or to his friends that he has been given another job. I am not and hope I never will become a job hunter. I did not recommend Mr. Prettyman because be wanted the position but because I then felt perfectly confident, and now more so, that he was peculiarly fitted for this particular place, which was one of service to the Government and to the taxpayers of the country, and I think so now.

I have no idea of vituperating the Secretary of the Treasury. I could not if I would, because, as everybody knows, I am so conservative of speech that I could not say anything of a critical nature of anybody, even in as gracious a way as the Senator from Michigan has said it.

I like Mr. Morgenthau personally; I think he would like to do well, and I hope he will do well; but there can be no question of the fact, and, in my own opinion, certainly there is none, that Mr. Morgenthau made a very grave mistake in depriving the Internal Revenue Bureau of the services of a man of high character, of great courage, and of large information concerning the problems with which he had to deal, and supplanting him with another gentleman, perhaps of equally high character, and it may be of equal courage, but certainly he cannot have superior courage, and with no qualifications whatever at the initial stages of his service to deal with large and important taxation matters. I shall, however, vote for the confirmation of Mr. Jackson.

MORE OUTRAGES PLANNED AGAINST THE GOVERNMENT

Mr. LONG. Mr. President, I do not care to speak on Mr. Prettyman or Mr. Jackson. I do not know either one of the gentlemen; I would not know them if I saw them. I do, however, wish the Senate to know that there are certain influences undertaking to use for a racket the financial processes of the Government in its several departments. I am going to send to the desk a document in my posession and ask the clerk to read it before I say anything further.

The PRESIDING OFFICER. Without objection, the Clerk will read, as requested.

The Chief Clerk read as follows:

[Excerpt from the New York Times, Feb. 22, 1934, p. 7, col. 2]

Memorandum placed on the record but not read to Mr. Brown tended to show that the interests seeking the contract after abandoning hope of obtaining the contract from Mr. Brown, proposed to bring influence to bear upon Postmaster General-designate Farley through Vincent Astor and on the President-elect through his cousin, Kermit Roosevelt. Senator Black quoted frequently from memoranda from the files of A. J. Ball, foreign freight agent of the Pennsylvania Railroad. An excerpt from one of them addressed to J. L. Heyman follows:

"We agree with him, as we feel we are close enough to Farley through Vincent Astor to accomplish what we want. Kermit Roosevelt is away with Vincent Astor and the President-elect on Mr. Astor's yacht and we have wired a complete statement of the facts to Kermit Roosevelt so that he can get in his good work as soon as possible."

Mr. Brown made no comment on this part of the memorandum, which was not read openly but was placed on the record, nor was it revealed who was meant when it said "We agree with him."

Another part of the same memorandum said:

"We considered an investigation called for in the resolution the most healthy method of clearing the atmosphere and would accomplish what the Departments were after, i.e., to distribute the patronage under a Democratic administration. The Roosevelt-I.M.M. (International Mercantile Marine) people feel that they are sufficiently strong with the new administration to secure prompt and favorable action on the bids."

Mr. LONG. Mr. President, I have no comment whatever to make on the statement that has been read. By some accident it was printed in the "bulldog" edition of the New York newspaper and was taken out of the succeeding editions and never was printed in any others, and I just wanted to afford the facility in case someone wished to read it who did not have the opportunity of doing so in the edition of the newspaper in which I read it, by reason of the matter having been omitted from subsequent editions.

The other matter, Mr. President, that I have to mention in connection with this and other financial rackets is this: I was present when Mr. Morgenthau came before the Finance Committee; in fact, I asked him some questions. Some statements had gone out that were rather not in keeping with what some of us, at least, had regarded as the law. Following that, the Senator from Michigan [Mr. COUZENS] stated he wanted the Secretary of the Treasury to dismiss Mr. Bailie, or, rather, indicated that he desired him to do so. My recollection is that Mr. Morgenthau hesitated considerably—if I am in error as to that, I hope I will be corrected—and held out quite at length before he finally consented to dismiss Mr. Bailie. I was later informed that even after Mr. Bailie was supposed to have resigned he stayed on for some time.

Following Mr. Bailie's dismissal, Mr. President, there came from the Post Office Department a cancelation of the air-mail contracts, and we find that Mr. Bailie's concern was one of those that unloaded air-mail company stock on the public a day or two days ahead of the day when the contracts were canceled.

The air-mail stocks had been away up to one of the highest points they had ever reached, and suddenly the J. & W. Seligman Co., the House of Morgan, and several others, began to unload the stock on the innocent public, so that when the break came, through the action of Mr. Farley's office, they would be out from under as much as possible and the public would have gotten the stock; and that is what happened, to a large extent. There were some very large sales; I have forgotten the exact number, but they were shown by a map someone placed on the wall.

Mr. President, I now have more specific and personal knowledge of the racket that is being made not only in the Post Office Department but elsewhere, for there is a close working between the Post Office Department and the Treasury Department. In the main, those appointed to the Post Office Department are recommended, of course, by the Postmaster General, and those appointed in the Internal Revenue Bureau are going in there on the recommendation of Mr. Farley. I am not undertaking, as the newspaper clipping did this morning, to question Mr. Farley's capacity to select men for the internal-revenue work. I do not say that just because the newspaper clipping read at the desk says he has been in the prize-fighting business, or something like that, rigging up matches and publicizing various and sundry individuals and giving them set-ups to knock down; I do not know whether he is that kind of a man or not; that is not the point. But what I am just bringing to the attention of the Senate is that through the same source that manipulated the handling of the cancelation of the air-mail contracts come the leaks that enable the big houses to get from under, and so that there will come out with great big headlines, "The Postmaster General takes action on behalf of the people." The ex-prize-fight promoter and matchmaker let it slip out to somebody 2 days and 24 hours ahead of time, and the big brokerage houses suck poor little innocent people in Louisiana, Arkansas, and Tennessee and West Virginia, for they unload that stock onto them. I am not particularly criticizing it; I am just simply mentioning it in this connection, so that we may know what to expect.

Now I come to what I have more direct knowledge of. This common source of selection operates in my State. They are doing the work by calling on certain citizens to help in the internal-revenue work, and they were able, through the personal contact of the present Postmaster General, Mr. Farley—and they will put him out of there before very many moons, I am afraid, before we know nearly as much about him as we want to know—to place in charge there a gambling magnate who helped run the casino gambling house, I think, in Palm Beach, Fla., in partnership with Colonel Bradley. I refer to a man by the name of Sullivan—John P. Sullivan—who, through an associate, ran a wire gambling-house outfit in the Ridges section of New Orleans, which I raided once when I was Governor of the

State, taking a roulette wheel, a dice table, and two or three thousand dollars of money.

This gambling king, John P. Sullivan, who also ran a race track, was placed in charge of selecting the internal-revenue collector, the United States attorney, and the postmaster of my own city of New Orleans. This gambling king was so bold about it that he actually came into the Finance Committee and into the subcommittee of the Judiciary Committee. He does not deny that. I am not slandering the man; I am only giving the Senate what the man has paid the newspapers to publish about himself. I would not have the Senate think that I would go beyond anything that the gentleman did not want known about himself! I am giving him advertisement that he has been paying the newspapers to print for the last 10 years. So there is nothing that is intended to reflect upon the man.

This gentleman, very much apparently of the same order as Mr. Bailie, has been calling in the business men of New Orleans and Louisiana, and has been telling them that he has had the internal-revenue collector appointed—and the newspapers published the fact—that he has named the district attorney, and he has; and the newspapers have so reported. He has been saying to them, "I am going to have this one indicted; I am going to have that one indicted." And we now behold the spectacle that the gambling king, in consort with his past associate, the ex-prize-fight promoter, are calling upon citizens far and wide—Mr. Sullivan, not on the pay roll, is calling in citizens as witnesses and putting them on cross-examination, giving them to understand that he has been vested with the power and discretion of adjusting incomes and assessing incomes and of making indictments.

There was a man in Louisiana by the name of R. L. Gay. He was very prominent and occupied in his church work in the State, and consequently was a man not in my company very frequently. [Laughter.] We lived 100 miles apart and we were in different towns on Sunday. But there was this gentleman named R. L. Gay. Mr. Gay discovered an oil field. He settled up his income tax in the year 1931, 3 years ago. One year ago Mr. Gay's name appeared in the newspapers in an item in which he said that he would put up $20,000 in cash at odds of 30 to 1 that the Long ticket would be elected in the State of Louisiana.

Mr. Sullivan, this gambling-house operator and dive keeper, was very much incensed over the matter. I do not mean to slander the gentleman, if the Chair please. I am merely giving him for nothing what he has been paying the papers to print. I could read from all the papers that are opposed to me in New Orleans now whatever may be needed from their editorial columns to show that he is the greatest gambling king the State has ever known, the partner of Mr. E. H. Bradley, who was in Kentucky and went down to Miami and opened up his several dives down there, then extending his influence as Sullivan's partner back to New Orleans.

They proceeded about 3 days ago to indict Mr. R. L. Gay through the internal-revenue man who has not been confirmed, and through the United States attorney who has not been confirmed. They never went to Mr. Gay. They checked over his returns and told him time after time he was all right. They never went to Mr. Gay and asked one question in 3 years. They never called upon him to pay a dime. They never said to him or to a friend of his that there was anything wrong about his income taxes. Instead of presenting his case before the district court in the district where the man lived and where his business is located and where he made his return, as has always been the practice, they had the indictment against him returned in the eastern district of the State at New Orleans. They never asked him for a copper cent.

I know nothing of the merits of the matter except as I have stated here to the Senate. However, it seems that this matter came just about the time they were changing counsel there. It seems that Mr. Morgenthau wanted somebody he knew. There had come out great big announcements that Mr. Morgenthau had stated that he was sending a flock of men down there with instructions to indict at least 100 of HUEY LONG's friends in the State of Louisiana. I do not think that is to be held against Mr. Morgenthau. I do not hold it against him. I never even brought up the matter when he was before the Senate for confirmation.

But the facts are that with the J. & W. Seligman fraud through Bailie, with the other frauds mentioned in what has been read at the desk, there is a trail of slime and corruption forming here at this very early day that is so wide and so deep that it is becoming almost an offense even in the Halls of the Senate. I hesitate to say where it might lead.

Someone might say, as this report read, he was on a yacht with the President fixing him up, and still be in error, or that he has the inside track with Farley—though I do not think it would take very much to get the inside track with Farley. It seems that a trip would do it.

Some men have very simple ways of estimating what it takes to break down the virtue of a man. Most of them will come for $20, or they will not come at all. I think that $20 hat is about Farley's size. That is what I would estimate to be the ordinary cost of his caliber. I understand he got a barbecue, got a free trip in an airplane that was not carrying a pound of mail on a trip that was not on a mail route at all, got a new hat that cost $20, everything paid for, and came on back to Washington. There is a yacht free to take them out while men try to use them for a scheme for some crooked thing to rob the American people of some of the franchises that belong to them, free airplanes to bring men here and there to do something else with banking-house stool pigeons, to let them know when there is to be a cancelation of something that will enable them to swindle the poor American consumers out of the little that they have.

But that is not half of it. I believe it has been said that the ground upon which the air-mail contracts were canceled was that it was found that there had been a spoils conference at which it was agreed on who was going to carry the mail, and that there was a division of the routes. When that information became public, they instantly found that sufficient ground to cancel the air-mail contracts. I am not going to take issue with that. I accept that. But I want to deal with another spoils conference that was held in which the parties named in the document read at the desk a few moments ago participated, and I want to read the facts into the RECORD, as given under oath, to see whether or not we cannot get another contract canceled before they unload their stock on an unsuspecting public.

The stock market is closed now, and they cannot get the sucker list into operation between now and tomorrow morning. I want to save the American people from being treated just as they were in the air-mail-contract imbroglio.

At page 618 of the hearings in the merchant-marine investigation before the Committee on Merchant Marine, Radio, and Fisheries of the House, appeared the following. This is from the minutes of a meeting of the Shipping Board. They have the proceedings of the Shipping Board printed in this hearing. Commissioner Denton there said:

> I move that the International Mercantile Co. interests, the Chapman-Dollar-Dawson interests, and Mr. J. E. Sheedy, who represents also an interest, be invited to a session with the Board, looking toward a consolidated bid on the part of all of them.

This was a secret meeting of the Board in which he moved that all these people be brought in to make a consolidated bid for the whole thing.

> Chairman O'CONNOR. Do you want him to come down before the Board?
>
> Commissioner DENTON. All together, at the same time, as early as can be arranged.

The air-mail contract conclave cannot beat this one.

I want them all here to consolidate on their bid and put this thing in one barrel at one time. It is too much trouble to have a deal with too many of them. We are liable to have some man roaming the range when we do not know what his business is. It is a whole lot more satisfactory and convenient when we are dividing these spoils, it is much easier when the Government has $4,000,000 or $5,000,000 that

it wants to donate to men who want to furnish airplanes and boats, to give it to them in one lump. If we have to divide the drink and pass it around, it takes time and it is liable to be confusing.

At any rate, let us read on a little further:

All together, at the same time, as early as can be arranged.
Commissioner SMITH. Suppose you gave them until Tuesday.
Commissioner DENTON. Let us make it Monday.

Tuesday was too long.

Commissioner SMITH. 10 a.m., Monday morning.
Chairman O'CONNOR. Wouldn't you be willing to leave out with reference to consolidation and just simply say a conference as to the proper disposal of this question now before us?
Commissioner DENTON. I think that would be more diplomatic; yes.

Still in secret session:

Commissioner SMITH. Just leave out the question of combination and consolidation; that might frighten some of them; looking to a solution of the difficulties in which the Board finds itself with the United States Lines.

Commissioner Denton says, on page 616:

Gentlemen, this is a lot of responsibility in our duty toward the establishment and maintenance of the services on the north Atlantic. Would it not be well, at this stage, when we have to consider Mr. Burke's telegram, which I have not had a chance to read yet, and the negotiations that we have not been able to make yet, or agree to as yet, with Chapman-Dollar-Dawson—would it not be worth while for this Board to make an effort to attempt to interest those people to agree on this working together in a mutual partnership or some agreement among themselves? The International Mercantile Marine and Chapman-Dawson-Dollar. Isn't it worth our effort to try to bring about such action?
Commissioner CONE. In my opinion, it is the only solution of this question.

Mr. President, it was in response to that—it was there and then—with these gentlemen as the absolute instigators of the matter, that this ship subsidy went out. That is the subject matter of what was contained in what was read at the clerk's desk just a few moments ago; and who wound up with the subsidy?

Why, Mr. President, in order that they might handle it exactly as they wished, when the United States Lines of Nevada got the contract and the ships, as I showed here on the floor the other day, they made an agreement giving the Roosevelt Steamship Co.—that is Kermit Roosevelt's outfit also—23 percent of the gross revenue as the "fees of operating management." In other words, of the tonnage that the *Leviathan* carried, 23 percent of the gross was paid to the Roosevelt Steamship Co. for what was supposed to have been operating management; and Mr. Dollar himself testified on the witness stand that he had never heard of any such thing as that as a charge for operating management as long as he had been in the steamship business.

They were building up an American merchant marine, were they? Well, let us see what the International Mercantile Marine did.

Here is a contract between the International Mercantile Marine and His Britannic Majesty. The International Mercantile Marine had this in its contract: Here is the agreement with this benevolent concern that had charge of things, that was given $6,000,000 of Government notes free, that took out of service the *Leviathan,* which was supposed to be the greatest ship sailing between the United States and Southampton, and it is in the mud; and this concern has not paid a dime on the $3,000,000 it did agree to give for the $9,000,000 of notes. Here is the contract that the International Mercantile Marine had entered into. This was between the International Mercantile Marine and the British Government:

This agreement shall have effect for 20 years from the 27th of September 1902 and shall continue in force thereafter subject to a notice of 5 years on either side (which may be given during the continuance of this agreement); provided, that His Majesty's Government shall have the right to terminate this agreement at any time if the association pursue a policy injurious to the interests of the British mercantile marine or of British trade.

In other words, this benevolent concern, to which we made all these gifts, and which we gave a $4,000,000 subsidy for the purpose of carrying the mail, for which Mr. Kermit Roosevelt was exerting himself in an effort to get some kind of an underhold in order to preserve it—the International Mercantile Marine had, several years previously, gone into an agreement that nothing that would ever be done by them was ever to interfere with the supremacy of the British mercantile marine.

They tried to get around that, Mr. President. They went over and made some kind of an amendment of this contract stipulating that the contract should not apply to American ships duly documented under the laws of the United States; but I am told by authority that this did not say anything about the management of American ships by the International Mercantile Marine and that there was a vast difference between putting responsibility in the ships and putting it in the management of the ships, and that that was the view taken of the matter by a former member of the Shipping Board, and he always regarded it as strictly impossible for them to do anything except contrary to the best interests of the American mercantile marine.

Now, there is another little innocent thing before the Senate.

Following this particular time when Mr. Kermit Roosevelt and Mr. Vincent Astor had the yacht down there in Florida waters that they are talking about, Mr. Kermit Roosevelt issued a statement; and here is his statement, published in the New York Evening Post. He said:

We are hopeful that the administration in Washington will eventually render the kind of assistance necessary to permit the completion of plans we have for a further development of American-flag fleets second to none on the high seas.

How were they going to develop them? Why, they took off the *Leviathan.* Today the White Star Line, flying the British flag, on which the International Mercantile Marine holds a mortgage for $9,000,000, are operating the *Majestic,* and it is advertised as the biggest ship on the seas. They have taken off the *Leviathan,* which they bought for a song, with all the other ships, for $3,000,000 in notes, due 3 years from date, and we gave them a $4,000,000 contract on top of that, and they never have paid a dollar of the $3,000,000 up to this time, and they junked the *Leviathan,* the operation of which they claimed was the consideration for the low price.

Was there a reason for taking off the *Leviathan,* Mr. President?

I have here a report which shows that the last month the *Leviathan* ran it had 993 passengers to the voyage, as against 955 carried in the *Majestic,* under the British flag. The *Leviathan* was carrying an average of 40 more passengers per trip than the *Majestic,* which flew the flag of Great Britain, was carrying. The *Leviathan* was the biggest ship in the world. It flew the American flag. These people had been given millions and millions and millions of dollars of American money; and after being placed in full control, with this kind of a subsidy, the next thing they did was to take off the *Leviathan* and make it unseaworthy, and today it is lying in the mud.

Talk about giving them a subsidy! Here is another little thing coming up—this matter of reciprocity.

I understand that these gentlemen have something figured on reciprocity. I never figured on it. I understand that the International Mercantile Marine now have matters all fixed so that they and their allies in agreement are the only ones that have any ships, and that if they can work the reciprocity agreements around to the point where they can say, in these reciprocal trade agreements, that a certain amount of the traffic shall be hauled in American ships, that is the same as though we wrote "the International Mercantile Marine" into the contract for a lot of it. Thereby will this concern, so closely attached to foreign shipping interests, be given cargoes for the future, through "reciprocity."

Those things, Mr. President, I present to the Senate. They have come within my knowledge; and I think it is my duty to communicate them to the Senate.

ROBERT H. JACKSON

The Senate, in executive session, resumed the consideration of the nomination of Robert H. Jackson to be general counsel for the Bureau of Internal Revenue.

Mr. COUZENS. Mr. President, I desire to make just one or two more comments because of the statements made by the Senator from Mississippi [Mr. HARRISON] and the Senator from Virginia [Mr. GLASS] with respect to my statement to the following effect. I quote from the RECORD:

I desire to point this out because I think the Secretary of the Treasury was absolutely tricky, and I think he is wholly unreliable, in this connection, at least—

The Senator from Mississippi said that he could not agree in that conclusion, and the Senator from Virginia made some reference to vituperation.

I have been here a long time. If I should approach the leader of the majority, the Senator from Arkansas [Mr. ROBINSON], or the Senator from Virginia, and ask a question, and should be answered in the same manner that Mr. Morgenthau answered me, I should say that they were tricky and unreliable. Mr. Morgenthau was asked by me if he had "fired" Prettyman, and he said "No." It later developed that he had asked for his resignation. That did not develop, however, until later.

I ask the Senator from Virginia now, if I should approach him and ask him if he had "fired" Prettyman, and he had only asked for his resignation, whether he would have said "no."

Mr. GLASS. Mr. President, I should have said that I had "fired" him.

I was unhappy in the use of the words. I am so accustomed to moderation that, knowing that the Senator from Michigan was scarcely less moderate than I, I just blundered there. I meant to use the word "reproach", rather than "vituperate."

Mr. COUZENS. I thank the Senator.

That is no. 1. Now, I shall mention point no. 2 in confirmation of my statement, which I do not retract one iota.

When Mr. Morgenthau was asked before the Finance Committee whether Mr. Jackson had been sworn in or not, he answered in the affirmative, and stopped. It appears that for 9 days prior to that Mr. Jackson had occupied the position of general counsel without taking his oath of office. Yet, in answer to my question as to whether he had been sworn in or not, the Secretary answered in the affirmative, without any qualification at all, to the effect that he had served 9 days without having taken his oath of office.

I submit that if I had asked the Senator from Arkansas or the Senator from Virginia that same sort of question, either of those gentlemen would have said, "He was sworn in on the 9th of February, 9 days after he was appointed."

Because of those evasive answers, I stand by my conclusion that at least in this connection the Secretary was tricky and unreliable.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of Robert H. Jackson to be general counsel for the Bureau of Internal Revenue?

The nomination was confirmed.

Mr. ROBINSON of Arkansas. Mr. President, in view of the length of time the nomination of Mr. Robert H. Jackson has been pending before the Senate, I ask unanimous consent that the President be notified of the action of the Senate in confirming the nomination.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the President will be notified.

LEGISLATIVE SESSION

Mr. ROBINSON of Arkansas. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to.

NATIONAL INCOME

Mr. LA FOLLETTE. Mr. President, some time ago the Senate authorized the publication of a report on distribution of income, which has been given Senate Document No. 124. Since that time certain illustrations have been presented.

After conferring with the Chairman of the Senate Committee on Finance, I ask unanimous consent for an additional order incorporating the illustrations and ordering them printed with the document.

The PRESIDING OFFICER. Without objection, it is so ordered.

TREASURY AND POST OFFICE DEPARTMENT APPROPRIATIONS—CONFERENCE REPORT

Mr. McKELLAR submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7295) making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1935, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 5, 25, and 35.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 26, 29, 37, and 38, and agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$18,500,000"; and the Senate agree to the same.

Amendment numbered 27: That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$98,500,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$47,200,000"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "$12,000,000"; and the Senate agree to the same.

Amendment numbered 36: That the House recede from its disagreement to the amendment of the Senate numbered 36, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,325,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 3, 31, 32, 33, and 34.

CARTER GLASS,
KENNETH MCKELLAR,
PARK TRAMMELL,
FREDERICK STEIWER,
L. J. DICKINSON,
Managers on the part of the Senate.

WILLIAM W. ARNOLD,
LOUIS LUDLOW,
JOHN TABER,
CLARENCE J. MCLEOD,
Managers on the part of the House.

Mr. McKELLAR. I move that the Senate agree to the conference report.

The motion was agreed to.

Mr. McKELLAR. Mr. President, I move now that the Senate recede from its amendments numbered 31, 32, 33, and 34.

The motion was agreed to.

Mr. McKELLAR. Mr. President, in regard to the amendments on which the Senate has just voted to recede, I want to make a short statement.

These amendments refer to what is known as the "Reedsville, W.Va., matter." The House conferees took the amendments back to the House, and the House voted 3 to 1, as I recollect, against accepting the Senate amendments. Of course, under those circumstances, I cannot ask to have the amendments go back to conference, and therefore I have moved that the Senate recede.

In that connection I want to say that I think both Houses made a mistake in not adopting the Reedsville plan. My reasons are to be found in a statement from the Post Office Department, which I ask unanimous consent to have printed in the RECORD as a part of my remarks at this place in the RECORD.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

MARCH 7, 1934.

Memorandum for Mr. Evans.

In connection with the strong opposition to the proposed erection of a Government factory in connection with the consummation of the subsistence-homesteads project near Reedsville, W.Va., which has developed among manufacturers throughout the country, and particularly to that which has manifested itself through the Keyless Lock Co., of Indianapolis, Ind., which, it is understood, is owned by Mr. Arthur R. Baxter, of that city, there is set out herein for such consideration as the facts may warrant, certain information which is supported by records in the Department and by personal observation and contact in the factory of the Keyless Lock Co. and in post offices on a number of occasions.

For several years the product of the Keyless Lock Co., as far as the Post Office Department is concerned, has been confined exclusively to the manufacture of steel furniture and screen-line equipment which is sold on contract to the Government, or sold outright or leased to a postmaster or the lessor of a building in which the post office is located. The latter plan is more highly remunerative to the Keyless Lock Co. than the former plan for the reason that in practically every instance a much lower rate is made to the Government than to a postmaster or other lessee for the outright purchase of the necessary equipment.

Investigation disclosed that the greatest source of revenue accruing to the Keyless Lock Co., however, is derived from post-office furniture and screen-line equipment furnished a postmaster on a rental basis, payable monthly in advance, under the terms of an iron-clad lease contract executed by the company and the postmaster or lessor of a post-office building. There is attached hereto a photostatic copy of form of such lease executed by a postmaster, which is as follows:

"To have and to hold same from the date of installation, and to continue thereafter so long as the said lessee continues as postmaster at ————, and until said chattel property is shipped back to said owner by said lessee, as hereinafter provided. And said lessee, in consideration of the leasing of said chattel property, by the said owner, as herein set forth, agrees to pay to the said owner, as rent for said chattel property, the sum of —— dollars and —— cents ($——) a month in advance, the first payment being due on the date of installation, and to continue thereafter monthly until the termination of this lease contract.

"And the said lessee further agrees that all of the said property shall be considered as chattel property, and hereby agrees not to attach any portion thereof to any building which would operate to make said chattel property a part of any building. It is, however, agreed between the said owner and lessee that the said owner will supply the necessary 'filler strips' without charge to the said lessee, which 'filler strips' the said lessee may attach to his walls as part of said walls, and to said 'filler strips' the above-mentioned post-office screen work may be attached with removable screws.

"It is further agreed and understood between the said parties to this lease contract that the said owner will carefully crate the said chattel property described above, and deliver the same f.o.b. the railroad station at Indianapolis, Ind., and that the said lessee will pay for, at his own expense, all freight, hauling, and erection charges connected with the installation of said work, and further that at the expiration of his incumbency as postmaster, the said lessee shall immediately, at his own expense, carefully take down, crate, and ship same to the said owner at Indianapolis, Ind., or to some equally distant point at owner's option, all freight charges prepaid.

"It is further agreed between the parties that at the expiration of this lease, peaceable possession of the said chattel property shall be given to the said owner in as good condition as when shipped to the said lessee, the usual wear and tear excepted; and furthermore, that upon the nonpayment of said rent that the said owner may, at his election, within 30 days after said rent shall have become due, recover possession of said chattel property, as if the same was held by forcible detainer."

This lease contains no provision whatever for the subsequent purchase of the equipment by the lessee, regardless of the amount that may have been paid in rental therefor, and, notwithstanding the provisions of the lease as applies to the lessee it might not deserve severe criticism if it obligated the lessee for a reasonably limited period, but it is operative to the fullest extent "so long as the said lessee continues as postmaster", and there are numerous instances where postmasters have continuous service extending over a period of 25 or 30, and in some instances over 40 years, there being a few instances in excess of even this period.

Investigation disclosed that there are a large number of cases where this, or a similar contract has remained in full force and effect over such an extended period that, based upon the quoted sale price, the equipment covered by such lease contract had been paid for several times over in rentals, even as many as six or seven times.

For instance, there was installed in the post office at Beacon Falls, Conn., on September 1, 1918, certain equipment manufactured by the Keyless Lock Co., at which time that company quoted to the postmaster, who was also the lessor of the building in which the office was being conducted, a price of $1,209 for the outright purchase of the equipment by the postmaster, or on a rental basis of $104 per quarter, or $416 per annum. The rental plan was chosen by the postmaster and the records in the Department show that this equipment is still being rented at that rate. On the basis of 15 years and 7 months (the current March quarter in advance) since the date of the installation of this equipment and figured at the rate quoted per annum, it appears that there has been paid in rental on this equipment a total of $6,968. Based on the initial cost of this equipment as quoted by the Keyless Lock Co., that is, $1,209, fully installed, the annual payment of $416 in rental is equal to 34.4 percent per annum on the investment.

Again the Keyless Lock Co. furnished certain equipment, to the lessor, for use in the post office at Tonkawa, Okla., on a rental basis of $80 per month and the lease on the present post-office quarters at that point terminated on February 26, 1934, at the expiration of 10 years. Rental on this equipment at the rate of $80 per month amounted to $960 per annum and over the period of 10 years there was paid $9,600 for the use of the equipment, which would have cost at the beginning of the lease approximately the sum of $1,861, figured item by item at the prevailing rate at that time. Much of the equipment furnished, however, is not in use, a large portion of it now being stored in the building. Recently when investigating the case at Tonkawa with a view to obtaining a new lease at a reduced rate, the post-office inspector handling the case was able to obtain an offer for the new lease at a rate of $830 per annum, as against a rate of $2,100 per annum under the former lease, due in a large measure to the Keyless Lock Co. having agreed to reduce to the lessor the rate for rental of such equipment as was actually in use at Tonkawa from $80 to $15 per month, with the understanding that any taxes that might be levied against this equipment would be paid by the lessee.

Further, there was installed in the post office at Urbana, Ohio, on March 1, 1922, certain equipment manufactured by the Keyless Lock Co., which equipment was rented by the lessor of the building in which the post office was conducted, from the Keyless Lock Co. on the basis of $964 per annum, the records showing that this rental was paid throughout the life of the lease which expired on March 1, 1932. When this lease was about to expire and the post-office inspector was endeavoring to negotiate a new lease at a reduced rate it developed that the lessor of the building would not consent to a reduction in the rental then in effect and it became necessary to take the matter up direct with the Keyless Lock Co. with a view to having that concern make a substantial reduction in their charge for rental of the equipment. After a somewhat lengthy correspondence the Keyless Lock Co. stated that they were willing to reduce the rate of rental but they requested the Department to set the amount which, of course, the Department could not do. The inspector who handled the lease case in this instance stated in his report that he had no information as to what this equipment originally cost, but gave it as his opinion that new equipment sufficient for the needs of the office would cost approximately $3,500 at the time of the investigation and that it was not believed that the equipment then in use would have a value in excess of $2,000 in 1932. It was also the opinion of the inspector that the rate of rental then being charged by the Keyless Lock Co. for the use of this equipment was apparently excessive, which rate, of course, would be included by the proponent in his proposal to the Department. The list of items of equipment furnished in this instance has subsequently been checked against approximate current prices in effect at that time, and it is estimated that this equipment, when new, could have been purchased for approximately $2,250 and that it could be purchased today for about $2,000.

In any event, when the Department informed the Keyless Lock Co. that it was not believed that their equipment had a value in excess of $3,500 they immediately agreed on that amount as a basis on which to submit an offer to reduce their rental, and they submitted an offer to accept 12 percent of that amount, or $420, per annum for the new lease. The Department protested that this rate was still too high and that a rate of $280 per annum, or 6-percent return plus 2 percent for incidentals, would be fair. To this latter proposal the Keyless Lock Co. finally agreed, but when it came to setting the date for the new rental rate to become effective they would not consent to March 1, 1932, the date of expiration of the former lease, as desired by the Department, but they arbitrarily set it for June 1, and the higher, or former, rate was paid them from March 1 to May 31, and then the new rate of $280 per annum became effective on June 1, 1932. This rate continued in effect until December 11, 1933, on which date the office was moved into the new Federal building, and the lease on the equipment automatically expired. Thus it will be noted that the Keyless Lock Co. received a total of some $10,308 from the lessor of the building for the use of equipment which could have been

purchased by the Department outright for about $2,500, and title to this equipment was still vested in the Keyless Lock Co. at the termination of the lease; and the same is likewise true in the two cases previously mentioned herein.
